In 1819 a band of religious people came here to secure an asylum against the encroachment of unsound doctrine, which toward the close of the last century had begun to undermine, as they thought, the faith of their forefathers. Rationalism, had indeed, invaded the Church of Wurtemberg and penetrated into the Consistory. The new Liturgy and Hymn-book, "cut down," as the venerable body put it, "to suit the requirements of modern culture," these sturdy defenders of the faith refused to adopt. They were inspired by a religious genius, named Michael Hahn; and their code of laws was drawn up by their founder, Gottlieb Wilhelm Hoffmann, aided by an "Advisory Council." It consisted of thirty articles of civil and religious faith.

After some delay, these articles were duly signed and sealed by King William, of Wurtemberg. Thousands of the so-called "Pietists" had already left the country on account of the faith, emigrating to Southern Russia, where they had established numerous flourishing colonies. Therefore the king felt the need of propitiating those who might otherwise, he feared, become disaffected, and who were among his most loyal subjects. One of the wagons prepared for the journey to Russia was known for a long time, in Kronthal, as the "Jerusalem coach."

Before the year 1819, Kronthal was a freehold, consisting of 836 acres of land, a castle, two tenant-houses, and six farm-houses. It was owned by Count von Gurlitz, Grand Steward of the Wurtemberg Court, who sold it, after some reluctance, for 115,000 guildens. In a letter which accompanied the sale, he says: "It costs me a great struggle to resign an estate to which I am attached by the dearest recollections of my life. But your designs for wishing to purchase this inheritance of my forefathers are so worthy, that I feel unwilling to prove a hindrance to you in the carrying out your plans; and I hope that a blessing will rest upon your efforts."

The good Count did not "hope against hope," for a blessing has indeed attended their labors. In 1859 a grand semi-centennial jubilee occurred here, of which I have heard many a glowing account. At that time the history of the little community was rehearsed before 5000 people. It was related how, from the small beginning, first, a church building, then substantial dwelling houses and school buildings, came to be erected. There are now at least two hundred houses, and (including two orphanages) seven school houses; while the inhabitants number about 1500. During all this period of fifty years, not a single fire, not a single criminal case, not a bankruptcy, occurred. Meanwhile, the strictest morality prevailed. Twice a day every man, woman, and child assemble for prayer and praise. The only preparation is that of the heart. The women, for the most part bonnetless, with perhaps a lace cap or strip of ribbon bound tightly around the head; the men in ordinary working garments, but look-

ing intensely solemn and earnest; with various schools, marshaled by their se teachers, and issuing from every three walk decorously in by twos, and take respective places.

We have attended a confirmation service a wedding, and a funeral; the latter decidedly the most cheerful of the three. even the outward signs of woe are permitted but are religiously superseded by every suggesting victory. The coffin is painted white, with a red cross; the pall is also white with a red cross upon the centre. The words said over the body were something like "Thou poor body, from which the soul of dear brother has departed; we commit thee earth to earth, ashes to ashes," &c.

After the procession had left the background, we stood there watching the old digger, who, with respectful courtesy, proached us. We remarked, pointing to grave, "The poor old man lying there is at rest; better so, is it not, than to be in a bed of sickness?" "Yes," he answered promptly, "but sickness is also good." "I can that be?" I replied. "Ah, sickness giveth patience, and patience hope, and hope Christ, victory! Ah! lady, no cross, crown!" The words came to me—

"Shall I be carried to the skies
On flowery beds of ease;
While others fought to win the prize,
Or sailed through bloody seas?"

The old man's face, though furrowed with age, looked almost radiant as, lifting his eyes he said at parting, "To die is joy!"

"This is the victory that overcometh world, even our faith." "O death! where thy sting? O grave! where is thy victory?"

From what we have already seen, it is whole community is still penetrated with much of the religious enthusiasm of the spiritual founder, Michael Hahn. He was elected to be their first overseer, but died eight days after the purchase of the land. Before his death, conventicles of religious worship were, under his leadership, established all over the land. Remaining externally within the pale of the National Church they resorted to these private gatherings, a means of making up for the deficiency of the public services. These meetings are frequented, to the present day, by sixty seven thousand persons in Wurtemberg. *Christian Intelligencer.*

For "The Friend"

"Were the members of all our churches guided by the Holy Spirit into the faith those who lived in the glow of the Divine ascension, and heard the voices of the Apostles, instead of imprisonment for fraud, a bezzlement and theft, there would be transparent simplicity; the members of our church would be obedient to all Christ's commands carry about a perpetual atmosphere of spirituality, would be fragrant roses bathing in the sunlight of living truth, unfolding to its bean flamed by the breezes, and refreshed by the dews of heaven."

This beautiful sentiment, contained in the correspondence of the *National Baptist*, presupposes that the faith exercised by the members of the Christian churches, is that *living faith* of which the Apostle James speak which works by love; and which is inseparably connected with walking in obedience to the Light of Christ in the heart, without

h we cannot obtain salvation, or those and graces that accompany it.

Street Road P. O., Chester Co., Pa.

For "The Friend."

ave recently received, through the mail, y of "The Friend," containing remarks two Friends in Bloomfield, upon my essay h appeared in "The Friend" of 11th mo., 1878. I would that we all might bear mind that strong expressions, especially n writing upon difficult and delicate ques- are no substitute for argument, nor I will condescend to draw the blessing of the e maker. Those two Friends are brothers whom I have lived on terms of Chris- intimacy for very many years, I have since loved them as brothers, and I do intend to let any thing deprive me of so ions a privilege; nor do I yet believe that er of them, upon the sober second thought, eave me capable of pervariation, or gar- ing a quotation, or of intentionally mis- ing a fact.

he former [speaks of] errors in doctrine ch he very correctly intimates that I w nothing about, never having heard one gle utterance of the kind he refers to. The ment from some Friends in Norwich, in 7, to which he refers, was introduced the on time to the Yearly Meeting at my ggestion, and in both cases I acted consci- ously, and therefore have no apology to r.

I refer to the remarks of my friend, Levi ny, with exceeding regret, because I e no doubt that both he and I are equally ions to present nothing but the truth; do I doubt that when the whole truth is sented we shall substantially agree. The mmittee supposed they were appointed to mine the whole Norwich difficulty from evidence laid before it, and report which the bodies purporting to be Pelham Quar- should be acknowledged. This duty I eieve they performed deliberately and con- scientiously, and as the lesser body did not a single advocate, I see no way open to a committee but the course they pursued; deavouring to word their report in a way at would not necessarily leave any burden on the minds of a single brother or sister.

The apparent difference between Levi Varney and me, in our views of the report, arises from the simple fact that he states, perhaps unconsciously, what took place after the report was read and before it was directed to be signed, and I stated what I clearly understood to be the conclusion after explanations had been given as to the form of the words which a few seemed to fear were too strong; as no other words were suggested as a substitute, and as we were directed to sign it on behalf of the committee, and as no objection was made to this direction, I think that no impartial reader will entertain any doubt that I was fully justified in stating that the report was adopted without any expressed dissent.

Had I any fear of the prediction of W. V., in his last paragraph being realized, I should feel the need of exercising a godly jealousy over myself, that no word nor act of mine might contribute to so deplorable a result; but I have no such fears; the mission of our branch of the Church is not yet completed; the purposes for which, in the Providence of God, it was called into being, in my view, will not be answered till "the whole lump is leavened," until the comprehensive design of the gospel is fulfilled by the whole earth being filled with the knowledge of the glory of God. Fiery trials may overtake us in the future as in the past; but my faith is, that the great Master will be equal for every emergency, and as a refiner, will be watching the crucible—for good. Israel's Shepherd neither slumbers nor sleeps, and therefore *His* flock fear no enemy as none such will be able to pluck them out of the Father's hand.

THOMAS CLARK.

The Plumber and Sanitary Engineer, a paper published in New York, has joined with some public-spirited men in that city in offering a premium for the best design for a house for working men.

Some parts of that city are greatly overcrowded. It is said that 500,000 of its population live in tenement-houses, and a large part of this number sleep in rooms which are never aired except from another room. Ninety per cent. of the children born in them die before reaching youth. They are described as hot-beds of vice and crime.

Public attention has been called to this subject, and the authorities have decided to refuse building permits for the erection of any building where the plan of construction does not conform to the sanitary code.

No man has a moral right to do anything, the influence of which is certainly and inevitably hurtful to his neighbor. I have a legal right to take arsenic and strychnine; but I have no moral right to commit self-destruction. I have a legal right to attend the theatre. No policeman stands at the door to exclude me, or dares to eject me while my conduct is orderly and becoming. But I have no moral right to go there; not merely because I may see and hear much that may soil my memory for days and months, but because that whole garnished and glittering establishment, with its sensuous attractions, is to many a young person the yawning maelstrom of perdition.

The dollar which I give at the box office, is my contribution toward sustaining an establishment whose dark foundations rest on the murdered souls of thousands of my fellow

men. Their blood stains its walls, and from that "pit" they have gone down to another pit, where no sounds of mirth ever come. Now I ask what right have I to enter a place where the tragedies that are played off before me by painted women and dissolute men, are as nothing, to the tragedies of lost souls that are enacted in some parts of that house every night?

What right have I to give my money and my presence to sustain that moral slaughter house, and by walking into the theatre myself to aid in deceiving others to follow me.—*Theo. Cuyler in "Heart Life."*

A new way of reading the Bible has been invented in these highly enlightened days. I used to get on exceedingly well with the book years ago, for it seemed clear and plain enough; but modern interpreters would puzzle us out of our wits and out of our souls, if they could, by their vile habit of giving new meanings to plain words. Thank God! I keep in the old simple way; but I am informed that the inventors of the new minimizing glasses manage to read the big words small; and they have even read down the word "everlasting" into a little space of time. Everlasting may be six weeks or six months, according to them. I use no such glasses; my eyes remain the same, and "everlasting" is "everlasting" to me, whether I read of everlasting life or everlasting punishment.—*Spurgeon.*

Words like lenses obscure what they do not enable us to see better.

THE FRIEND.

SEVENTH MONTH 1, 1879.

The statements contained in the newspapers of the day of the treatment of the fugitive Cheyenne Indians who were imprisoned at Fort Robinson, Nebraska, are disgraceful and revolting in their character. These Cheyennes, it will be remembered, had been removed from their former homes and settled on a reservation selected for them in the Indian Territory. A portion of their number were much dissatisfied with their location, and finally became so discontented, that they fled northward through Kansas, killing several persons whom they met on their journey, and were finally overtaken and imprisoned by the United States troops.

The attempt to confine individuals or tribes within certain limits by the exercise of arbitrary power, is certain to arouse a feeling of opposition. It is only as their own comfort, convenience or interest is promoted, that people settle down contentedly in their homes. Therefore, however inconvenient to the Government the unsettled and restless character of these Indians may have proved; they are not to be so severely condemned for exercising their natural right of changing their place of abode.

As to the treatment at Fort Robinson, to which we have referred, an extract from a private letter, written the day before they escaped from that post, says:

"We have now in this department a delicate question to handle in the removal of the Cheyenne prisoners to Leavenworth. They say they will die before they will go. From

the latest accounts the officer in command, in order to induce them to consent, had taken their rations from them. They had then been twenty-four hours without provisions, and refused to permit him to feed the children, of whom there were about fifty. He was, when he reported, about proceeding to stop their fuel. All our information leads to the belief that they are in deadly earnest, and that when the removal commences, which will be in a few days, somebody will certainly be hurt. In fact, from present indications, the matter is likely to prove serious."

The Chicago *Inter-Ocean* states that the attempt to starve and freeze the Indians into submission was begun on the 5th ult. "For three days they were kept in the lodge used as a prison, without fire or food, and practically without clothing. This was inhuman and disgraceful, but an act of treachery and perfidy followed that far exceeded it. Under the pretence of holding a council, the two chiefs were enticed away from their followers, and when separated were set upon, struck down, and placed in irons. A war song, sung by one of the chief's daughters, was heard by the Indians confined in the lodge, who divined the meaning and proceeded to prepare for a defence against further acts of this character. Bread was offered to the children, but the Indians refused it, declaring they would all die together."

It is grievous to us that such things should be done in our country; for besides the shock given to all feelings of humanity, we can but look forward with fear to the just retribution of Him in whose hands all the nations of the earth are but as the small dust of the balance; and who sets up and pulls down according to His own righteous pleasure.

We have received from Thomas Clark, of Canada, some additional remarks, making explanations which he thinks are called for by the letters of William Valentine and Levi Varney, printed in our 29th number.

We deemed the occurrences which have taken place among Friends in Canada of sufficient importance to interest our readers generally; and therefore have published such portions of the communications received as seemed calculated to convey a clear account of what had taken place. We wish to guard against burdening our columns with what is merely personal and local in its character. Yet in justice to Thomas Clark, we publish on another page of our journal, so much of his article as is requisite to explain the criticism on his course contained in the letters he refers to.

We note particularly his statement, that he had not heard uttered such doctrinal sentiments as those mentioned by Wm. Valentine. We sincerely desire, that having now learned what unwholesome food is distributed to the flock in meetings less favored than his own, he may join in his efforts to those of faithful Friends elsewhere, in checking the dissemination of doctrines and practices at variance with the original principles of the Society. Unless a concern in this direction should continue and prevail among Friends, the consequences to our Society, we believe, will be disastrous. The Head of the Church is able to take care of his own cause; and if we prove unfaithful, will raise up others to proclaim to the world his Truth; but his language to us may be, "I created thee a noble vine, wholly

a right seed. How art thou become the degenerate plant of a strange vine unto me!"

SUMMARY OF EVENTS.

UNITED STATES.—It has been estimated that the total tonnage of iron vessels launched on the Delaware River during 1878, was 23,000 tons; valued at about \$5,000,000.

The State of Pennsylvania is now in possession of a tentative plan of the ground presented for the Middle Penitentiary, in Huntingdon county, and in a short time the building will be laid on the springs intended to supply the building with water. These springs discharge 120,000 gallons every twenty-four hours, more than four times the quantity required.

There are now 186 American vessels employed in the whale fishery, with an aggregate tonnage of 40,603, New Bedford, Mass., owns 152 of them.

The Loomis Gap mine, near Mount Carmel and Shamokin, Pa., was discovered to be on fire, on the night of the 24th ult., at a depth of 300 feet, where several barrels of tar were stored. For a time the fire burned furiously, but was finally extinguished; 250 men and boys were employed in this mine. On the night of the 25th, a fire broke out in the Tunnel Level of the Summit coal mine, near Williamstown, Pa. Nearly 600 men were employed at this mine.

The Missouri State Lunatic Asylum, near St. Joseph, was destroyed by fire on the afternoon of the 24th ult. The patients, 250 in number, were removed to the court-house. The estimated loss is nearly \$300,000.

A dispatch from Fort Robinson announces that the fugitive Cheyenne warriors, by the United States troops, about 45 miles from the fort, they refused to surrender, and resolutely fought till all but nine of their number were killed.

It is reported from Washington, that the Commission appointed to consider the propriety of transferring the care of the Indians to the War Department, are equally divided on the subject—for favoring the transfer, and four opposed to it. It is expected that reports will be presented to Congress early next month.

The mortality in this city during the past week was 624. In New York, for the same period, there were 639 deaths.

Markets.—The government bond market has been considerably excited during the past week, and a general decline in prices of all bonds, in consequence of their being rapidly refunded. It is said to be the intention to fund, at 4 per cent. interest, all the bonded debt, except the $\frac{1}{2}$ per cent. of 1891. The subscriptions to the 4 per cent. amounted on the 25th ult. to over \$100 million dollars. Arrangements were also made during the week for placing them abroad. The quotations on the 25th were for consols, 1887, 107 $\frac{1}{2}$, registered, 105 $\frac{1}{2}$; do. coupon, 106 $\frac{1}{2}$; 4 per cent. 106 $\frac{1}{2}$; 4 per cent. 100 $\frac{1}{2}$; 5-20 consols, 1867, 102; do. 1868, 102.

Cotton.—Sales of middings, 93 a 95 cts. per pound for middings and New Orleans.

Petroleum.—Crude 8 cts. in barrels, and standard white, 9 $\frac{1}{2}$ cts. for export, and 11 $\frac{1}{2}$ a 12 $\frac{1}{2}$ cts. per gallon for home use.

Flour.—Minnesota extra, \$4.25 to \$4.75; Penna. \$4.50 to \$4.75; Ohio, \$4.75 to \$5.30; patent and other high grades, \$5.50 to \$7.50. Rye flour, \$2.62 to \$2.87 $\frac{1}{2}$.

Wheat.—Wheat firmly held. Penna. red \$1.05 a \$1.05 $\frac{1}{2}$; amber, \$1.00 to \$1.06 $\frac{1}{2}$. Corn, 42 $\frac{1}{2}$ a 44 cts. per bushel. Oats, 30 a 32 cts.

Hay and Straw.—Prime timothy, 65 a 75 cts. per 100 pounds; mixed, 45 a 60 cts. Straw, 65 a 75 cts. per 100 pounds.

Beef cattle were in fair demand, 2500 head arrived and sold at 5 $\frac{1}{2}$ a 6 cts. for extra; 4 $\frac{1}{2}$ a 5 cts. for fair to good, and 4 cts. per pound gross for common. Sheep, 4 a 5 $\frac{1}{2}$ cts. per pound as to condition. Hogs, 3 $\frac{1}{2}$ a 5 $\frac{1}{2}$ cts. as to quality.

FOREIGN.—The weather in Great Britain has been very severe the past week, and continues so, consequently the applications for relief for the distressed poor have greatly increased.

One thousand three hundred colliers at Merthyr and Aberdare have struck work. There were 177 strikes in England last year, against 181 in 1877.

An action has been brought by the owners of the steam tug *Admiral* against the United States Ship Commission, to recover 1500 pounds for salvage. The sun tug, but it was not recovered.

France.—Before the adjournment of the Chamber of Deputies on the 24th ult., the Minister of Public Instruction presented a bill making primary education obligatory after the first of 1880.

In Paris the street traffic is almost suspended now. Reports from Brittany, and other French provinces, represent that heavy snow-falls are interfering telegraphic and railway communication.

It is stated that from the *débris* of their coal, France makes annually 750,000 tons of excellent Belgian charcoal.

A Geneva dispatch says, that American coals are gaining to sell there slightly cheaper than French American coals, and are much superior to their German locomotive, burning anthracite coal, in a general commercial collapse is feared in Sw.

Thousands of persons have been thrown out of employment, and further failures are daily expected. It is reported in Berlin that Prince Bismarck decided to withdraw the Parliamentary Discipline leaving the matter to the Reichstag.

Russian and German medical journals state the east of Europe is in a state of great alarm at the prospect of what they allege to be the plague, which is rapidly making its way upwards towards the north-east of Russia, from the Caspian Sea along the coast of the Volga. There is said to be a great want of experienced medical men in Russia, about one-third of doctors having died in the recent war, and a number of young students have been summoned to the Russian and Turkish frontiers to take their places.

The Russian and Turkish governments have agreed to the clause of the definitive treaty of peace, stipulating that the Russians shall evacuate Turkey within five days of the signature of the treaty.

Advices from Rio Janeiro to the 7th ult., state drought and small-pox are increasing in the north provinces.

CORRECTION.—In last number of "The Friend" page 191, near the middle of 1st column, for 1 Cor. read ii.

FRIENDS' ASYLUM FOR THE INSANE

New Bedford, (Twenty-third Ward), HALL'S PHYSICIAN AND SURGEON.—JOS. C. HALL, Jr., Physician in Charge, and J. H. HALL, Jr., Secretary. Applications for the Admission of Patients are made to the Superintendent, and to any of the Board Managers.

MARRIED, on the 5th of 12th month, 1878, according to the order of Friends, at Spring River, Kansas, J. A. CARRER, to DELPHINA STANLEY, daughter of Samuel Stanley.

—, on the 25th of 12th mo. 1878, according to the order of Friends, at Spring River, Kansas, HIR T. PICKETT, of Cottonwood, to SERENA PICKETT, daughter of Benjamin Pickett, of Spring River.

DIED, at his residence in Exeter, Berks Co., Pa., the 11th of 10th mo. 1878, JAMES LEE, in the 83rd year of his age, an esteemed member of our Yearly Meeting. He was firmly attached to the ancient principles and doctrines of Friends, and being of a sober and pleasing disposition, was endeared to a numerous circle of friends. During the decline of his health, he was preserved in patience and tenderness of spirit, and his last days were left his friends the comfort and belief that his end was peaceful.

—, at his residence, near West Grove, on the 1st of 11th mo. 1878, MARTHA H. LINTON, widow of Nathan Linton, an elder and member of New Gate Monthly and West Grove Particular Meeting, in the 63rd year of her age.

—, at his residence in Martin's Ferry, Ohio, on the 14th of 12th mo. 1878, BENJAMIN HOWE, in the 67th year of his age, a member of Short Creek Monthly and Concord Particular Meeting. He was a man of a meek and Christian spirit, firmly attached to the principles of Friends, and during a long and suffering illness, was very patient and cheerful, never being known to complain through spite, but bore his affliction with a composure that assured his family and friends of his work through infinite mercy, prepared to enter into that which remaineth for the people of God.

—, in Camden, New Jersey, on the 31st of the 12th mo. 1878, REBECCA TROTTL, widow of Jacob Trottl, in the 90th year of her age, a member of Haddonfield Monthly Meeting. She was a meek and quiet spirit, and much attached to the principles of Friends. Her surviving relatives believe that she was prepared through faith in a crucified Redeemer, for a place in the mansions of peace and rest reserved in heaven for the righteous.

Monies of Profane Writers to the credibility of the New Testament.

Quoted from Horæ's Introduction to the Holy Scriptures.

(Concluded from page 195.)

Some of the Roman historians, whose works come down to our time, are DEFECTIVE.

This is particularly the case with Livy and Tacitus, from whom we cannot expect any variety of events that have reference to the life of Christ, or to any great occurrence took place about that time. For Livy ceases only to the commencement of Augustus's reign, which was before the time of Christ; and Tacitus, who could not record so memorable an event as that of a census throughout the Roman empire, which did not take place till the thirtieth year of Augustus's reign, can give no notice could be taken of that transaction by Tacitus, because he does not go so far as Augustus. His *Annals* begin with the reign of Tiberius, and continue to the death of Nero; his books of *History* begin where the latter terminate, and conclude with Vespasian's expedition against the Jews. For knowledge of the transactions intervening between the close of Livy and the commencement of Tacitus, we are indebted to Valerius Maximus, Florus, Plutarch, Dion Cassius, and others, who lived long after the death of Augustus, and who compiled their histories from such materials as they could command. Florus, in particular, is only an abridger of Livy, from whom little consistency can be expected. Though Valerius Maximus advances a little further, yet he is only an epitomiser; and as Justin, who lived in the reign of the emperor Anus Pius, only abridged the history of Augustus Pompeius, which he did not continue, cannot, therefore, expect any information but relative to the birth of Christ. Apollonius has altogether omitted Judea in the detail which he has left us of the Roman empire. These facts will account for the silence of the generality of the pagan writers concerning the events related in the Gospel story; while the express, authentic, and plain statement of Tacitus, already given, furnishes an indisputable testimony to the fact that Jesus Christ lived and was crucified during the reign of Tiberius.

The preternatural darkness of three hours which prevailed in the land of Judea at the time of Christ's crucifixion, and which has been recorded by three of the evangelists, is

unnoticed by any profane historian: from which circumstance Gibbon has taken occasion to insinuate that the evidence of the evangelists is not sufficient to establish the truth of facts, unless it is supported by the concurrent testimony of pagan contemporary writers. Speaking of that darkness, he expresses his surprise that this miraculous event "passed without notice in an age of science and history. It happened," he adds, "during the lifetime of Seneca and the elder Pliny, who must have experienced the immediate effects, or received the earliest intelligence of the prodigy."

This miraculous preternatural darkness did not pass without notice. Omitting the supposed attestation of it by Phlegon (a pagan chronologist who wrote during the reign of the emperor Hadrian, and whose testimony is cited by Tertullian, Origen, and Eusebius), and also the supposed mention of it by Thallus (who lived in the second century), which is cited by Julius Africanus, a writer of great eminence and a profane, who lived at the beginning of the third century;—we may remark that there are two other testimonies not found on the statements of Phlegon and Thallus, which unequivocally confirm the evangelical history of the darkness at the crucifixion, viz. those of Tertullian and Celsus. In his Apology for the Christians, which was addressed to their heathen adversaries, Tertullian expressly says, "At the moment of Christ's death, the light departed from the sun, and the land was darkened at noon day; which wonder is related in your own annals, and is preserved in your archives to this day." If the account of this extraordinary darkness had not been registered, Tertullian would have exposed both himself to the charge of asserting a falsehood (which charge was never brought against him), and also his religion to the ridicule of his enemies. It is further particularly worthy of remark, that the darkness and earthquake at the crucifixion are both explicitly recognized and mentioned as facts by that acute adversary of Christianity, Celsus; who would not have made such an admission, if he could have possibly denied them.

In addition to the preceding observations, we may state that many good and solid reasons may be assigned why profane writers have not made mention of the darkness at the crucifixion, which, it is now generally admitted, was confined to the land of Judea. The most obvious is, that they might have no sufficient information of it. The provinces of the Roman empire were very extensive, and we find, in general, that the attention of writers was chiefly confined to those which were nearest to the metropolis. The ancient historians and biographers are remarkably concise, and seldom stop to mention occurrences, which, although they may have happened during the times of which they write, have no relation whatever to their main subject. This was their general rule, and there is no reason for which it should be violated merely

to indulge the caprice of the captious, or satisfy the scruples of the petulant. There is no more reason in the nature of the thing itself why the testimony of profane writers should be called for to support the sacred than the sacred should be called for to support the profane. We may then retort the argument, and in our turn ask the historian, and those who have lately circulated his false account of the progress of Christianity, how they can credit the accounts given by Paterculus, Pliny the elder, Valerius Maximus, and Seneca, when Matthew, Mark, Luke, and John take not the least notice of them? But let it be supposed that the Roman writers had received information of the fact in question, it is most probable that they would have considered it as a natural occurrence, being accustomed to earthquakes and darknesses for whole days together, in consequence of the eruption of Mount Vesuvius. Or, supposing that they had believed it to be a preternatural darkness, would it have been consistent with their principles as heathens to have mentioned it? They must plainly have foreseen what great advantage would have been given to Christianity by it. Their readers would naturally have been led to inquire into the character of the extraordinary person, at whose death the laws of nature were infringed, and this inquiry, as it would have opened a more complete view of the new dispensation, must have led to their conversion. Hence we collect a very satisfactory reason for their silence. Supposing that they knew the fact, and from motives of policy suppressed it, their silence furnishes as strong a proof of its truth, as their express testimony could possibly have done.

In short, there is no history in the world more certain and indubitable than that contained in the Christian Scriptures, which is supported by the concurring testimony,—not to say of so many men, but of so many different nations, divided, indeed, among themselves in other particulars, but all uniting to confirm the truth of the facts related in the Gospels. And, therefore, even though the Christian institution had perished with the apostles, and there were not in the world at this day so much as one Christian, we should have the most unquestionable evidence that the persons and actions recorded in the Gospels, and attested by the concurring voice of all nations, really existed in the country of Judea during the reign of Tiberius, as the evangelists have assured us.

The venerable Dr. Duff once read the Sermon on the Mount to a number of Hindu youths, and when he came to the passage "I say unto you, love your enemies, bless them that curse you, do good to them that hate you, and pray for them that despitefully use you and persecute you;" so deep and intense was the impression produced on one of them that he exclaimed in ecstasy, "O how beautiful, how divine! this is the truth!" and for days

and weeks he could not help exclaiming, "Love your enemies!" constantly exclaiming, "How beautiful, surely this is the truth."

For "The Friend."

Extracted from the writings of Francis Howgil, by James Backhouse, York, 1828, and entitled, "To whom the Spirit bears witness, and seals assurance of the Father's love; and of justification with God."

"None have the witness of God's Spirit, bearing witness to them and in them, who have not believed in Christ, 'the true Light, that lighteth every man that cometh into the world,' whose words are spirit and life; and by whom the new creature is formed in them that believe, and who makes his power manifest unto such: for all power in Heaven, and in earth is committed unto Him, who is the Light of men; and nothing was created without Him, neither is any turned from sin but by Him; without Him is death, in Him is life, and none but those who are born of the Light, can have the Spirit of Christ to bear witness unto them; for only they that are born of the Spirit, and walk after the Spirit, are justified by the Spirit of the Lord; for the assurance of his love is not made manifest to his enemies, but unto them that are born in his image, in his own likeness and nature; to the Holy Seed which is heir of the promise, which knows the living hope that purifies the heart, and brings the answer of a good conscience; to them that witness the washing of regeneration, having known in themselves the clean water poured forth upon them, which hath taken away the stains and defilements; for where these are not washed out, and where the heart is not cleansed, and all that is not believed in, in which God's sufficiency is felt, and his power made manifest, there the assurance of the Father's love cannot be; neither does his Spirit assure the justification of such; but on the contrary, where sin remains unsubdued, the Spirit of the Father condemns the sin, and the creature which is joined to it, and becomes one with it. For no sin is brought forth, but there is an assenting to the instigation of the devil: for when a temptation arises, either within or without, and there is a resisting and a striving against it for a time, yet if the heart be not kept close to the Spirit, the enemy will enter and captivate the understanding; then there will be an agreeing with, and a joining to the adversary, and the Spirit will pronounce sentence of condemnation upon him who joins to the wicked one; and he who has consented to drink his cup, must drink the cup of the indignation of the Lord, and bear the stroke of divine justice, and lie in patience under it, till that be cut down which hath joined in with the deceit, before there can be a remission of transgression, or the creature justified in the sight of God. For sin is not blotted out of the book of God's remembrance till it is repented of, and turned from; neither doth the creature stand clear in the sight of God, when God condemns in righteous judgment, which the Light in every one's conscience shall answer to. Now, 'whosoever is born of God doth not commit sin, for his Seed remaineth in him,' which is Life; and as the creature joins in that Seed, which is heir of the kingdom, and of the crown immortal, he comes to be made partaker of its virtue and operation; which Seed is Christ, to whom all power is committed, and who by his power, as it is be-

lieved in, *limits the seed of the serpent*, and weakens his strength in the creature, and dissolves the covenant which he has made with death; and as the creature comes to be delivered from corruption, and the new man comes to live; the new creature, which is born of God, comes to be framed and fashioned in the image of the Father, and the Father's love is manifested to him, and in him, and he hath the assurance in himself. He that is begotten of the Father in Christ the Seed, through the Spirit, *he and he alone, comes to feel the Father's love made manifest in him, and is justified in the sight of the Father*; and hath His assurance and evidence near him and in him; and when the enemy comes to tempt and assault, and would raise up doubts in the mind of him that hath this evidence, it is near to assure him that he is in the love of God. Blessed and happy are all they that have waited for, and have felt these things, and who are witnesses of them, for flesh and blood hath not revealed them."

This is the way fitly described, whereby the early Friends gained and retained the victory, and our dominion in the Truth, and Truth's dominion in the Society can only be maintained as Friends are brought again to the ancient standard of our early Friends.

SAMUEL CHADBOURNE.

Milville, Orleans Co., N. Y., 1st mo. 24th, 1879.

For "The Friend"

Early Steam Navigation on the Atlantic.

(Continued from page 194.)

"One of the immediate consequences of this discussion was the establishment of a company for starting a line of steamers from the Mersey to New York. It received the title of the 'British and North American Steam Navigation Company.' The formation of the undertaking was somewhat sudden, owing to the ancient rivalry between Liverpool and Bristol. The city on the Avon, ancient home of the American trade, had been bestirring itself for some time to get steam navigation with the United States, and a number of wealthy merchants, it was known, were constructing a ship of extraordinary dimensions to be the pioneers of the new line. The Liverpool shipowners, headed by McGregor Laird, decided to take the field before their Bristol rivals. There was no time to build a steamer in any way like the one constructing for Bristol, and they therefore decided to purchase the best existing one. This was, by unanimous consent, the *Sirius*, belonging to the St. George Steam Navigation Company. Negotiations concluded quickly, the price asked being at once accepted, and so it came that the steamer *Sirius* left London, at the shortest notice, on the morning of 4th month 4th, 1838, bound for New York, but touching on the way at her old destination, Cork. Liverpool had beaten Bristol in sending the first English steamer across the Atlantic.

"But the victory was not one of many days. No sooner became the Bristol merchants aware of the Liverpool project, when the utmost haste was made to start their own steamer, named the *Great Western*. They were duly proud of their own achievement, for it was, beyond dispute, not only by far the most splendid steamer yet constructed, but the only one designed, with all scientific appliances, for Atlantic navigation. The *Great Western* was built by Paterson, of Bristol, after his own design, but assisted by Brunel,

the registered burthen being of 1340 tons, the power of the engines—made by Mauds Sons & Field, London—of 440 horses. The new steamer was 212 feet in length between the perpendiculars, 35½ feet in breadth beam, and 23 feet deep in the hold. To able the *Great Western* to resist the action of the heavy Atlantic waves, special pains were taken to give her great longitudinal strength. The ribs were of oak, on the model of that of line-of-battle ships, and fastened together with iron bolts 24 feet in length. Being such great strength, and of the most symmetrical proportions, the *Great Western* prepared for her first voyage across with the highest hopes of success, and she more than surpassed all the expectations set upon her. By working day and night, she was ready for the start about the same time *Sirius* set out on her voyage. Still a few days elapsed in taking in cargo, as well as passengers, thus giving the rival steamer a good start. It was on the morning of the 7th 4th mo. 1838, that the *Great Western*, commanded by Captain Hosken, finally lifted her anchors, steaming down the Channel, bound for New York, amid the enthusiastic acclamation of the Bristol populace.

"There was now a race across the Atlantic—the first ocean race by steamships which the world ever saw. Close upon two weeks had elapsed since the first steamer had ploughed her way through the Atlantic waters, and, in the meanwhile, the public seemed if asleep on the subject of Atlantic steam navigation, disliking it, or in common with the learned Dr. Lardner, looking upon it as a voyage to the moon—lunatic, in fact. Not all at once, sudden as by enchantment, the public heard that two rival steamers were going from England to America at the same time, and great was the anxiety to know which of them would be the first to arrive. For a week or more nothing else was talked of in all England but the steam race across the Atlantic. The race was altogether an uneven one. Although the *Sirius* had her moorings on the 4th of 4th mo., and the *Great Western* on the 7th, the former was under the disadvantage of going round the whole coast of southern England, and also stopping at Cork, before actually starting her Atlantic voyage, while a still greater drawback, on her part, was that of being much smaller vessel than the *Great Western*, with far less engine power, and not specially constructed for her new duties. The public excitement rose to the highest pitch when a week had elapsed after the starting of the two steamers from Cork and Bristol respectively without their having been spoken with. The captains of both steamers, it was found afterwards, had taken new routes across the Atlantic, somewhat out of the track of established sailing vessels, in order to get quickly to their destination. But this was not known at the time, and the gloomiest forebodings came rife, when at last the happy news came of the safe arrival of both at New York within twenty-four hours of each other. Liverpool had started first, and Liverpool had won the race.

"The historical event of the arrival of the two first English steamers in the United States was thus chronicled in one of the New York papers:—'At three o'clock p. m., Sunday, the 22d of April, the *Sirius* first descended the land, and early on Monday morning

23d, anchored in the North River, immediately off the Battery. The moment the intelligence was made known hundreds and thousands rushed, early in the morning, to the Battery. Nothing could exceed the excitement. The river was covered during the day with row-boats, skiffs and yawls, carrying the wondering people out to get a view of this extraordinary vessel. And the people were yet wondering how the vessel was so successfully made to cross the Atlantic, it was announced about eleven Monday morning, from the telegraph, that the steamer was in the offing. The Great Western! The Great Western! was on everybody's tongue. About two o'clock P. M., the first curl of her ascending smoke fell on the eyes of the thousands of anxious spectators, and a shout of enthusiasm rose on the air.

The reporter then goes on to tell how the Sirius had steamed at the rate of over ten knots, and the Great Western at nearly ten knots per hour during the greater part of her voyage, giving it as his opinion that the grand experiment has now been fairly and fully settled, and has been completely successful. Only one question, he thought, was now left for solution: Can steam packets be made to pay? This was a question also occupying the deep attention of the enterprising traders of Liverpool and Bristol, originators of Atlantic steam navigation."

For "The Friend."

Thoughts and Feelings.

PRAYER.

The fervent feeling of devout prayer, and the lively silent or vocal exercise, is of incalculable importance to beings poor, and wholly dependent as we are upon a Power that is mighty; upon a Fountain that is inexhaustible; upon a love and mercy that are new every morning; upon a help and strength that are perfect in our weakness.

The apostle enjoins, "Continue in prayer, and watch in the same with thanksgiving." I have thought sometimes, that to "continue" in prayer, as Paul here recommends, and as so less commands to in the precept, "Pray without ceasing," was practically carried out in the example of good old Mordecai, when he sat at the king's gate clothed in sackcloth; as fulfilled in the language of the Psalmist when he writes: "The eyes of all wait upon thee, and thou givest them their portion of eat in due season;" and again when, concerning himself, he declares, "As the hart panteth after the waterbrooks, so panteth my soul after thee, O God." It was exemplified in the sighs and cries of those, spoken of by the prophet, upon the forehead of whom the mark "of preservation was to be set; in the experience of the watchman who declares: "I stand continually upon the watch-tower in the day time, and am set in my ward whole nights;" and in the blessing of being "filled," promised to those "who hunger and thirst after righteousness." These, though not all the time offering "the calves of their lips," are nevertheless in a state of watchfulness to prayer; waiting to hear the Bridegroom's voice, and then to obey.

How invaluable the example the dear Saviour has set us relative to this great duty! He He both taught and practised. He says, that "Men ought always to pray and not to inter." Again, "Watch and pray that ye enter not into temptation." It is also re-

corded, that "He continued all night in prayer to God." He interceded for Simon Peter, saying, "I have prayed for thee, that thy faith fail not." The whole of xvii. ch. of John is a prayer of touching pathos, life and power. At His betrayal, it is recorded, that "Being in an agony, he prayed more earnestly; and his sweat was as it were great drops of blood falling down to the ground." His followers—the righteous of every age and generation—have exemplified their fidelity and obedience to Him in spirit, by such filial faithfulness in this great duty. For instance, the Scriptures record prayers of Abraham, of Jacob, Moses, Hannah, Samuel, Elisha, Hezekiah, Jabez, Isaiah, with many others. The Psalmist declares, "As for me I will call upon God;" "Evening, and morning, and at noon will I pray, and cry aloud." The prophet Daniel "kneeled upon his knees three times a day, and prayed, and gave thanks before his God." Jonah testifies: "When my soul fainted within me, I remembered thee, O Lord; and my prayer came in unto thee, into thy holy temple." With much "assurance of faith," and in lively zeal, the apostle Paul directs how this solemn duty is to be performed; and then in his own practice so exemplifies, that he who runs may read. He writes to the Romans, "We know not what we should pray for us; but the Spirit itself maketh intercession for us with groanings which cannot be uttered." Again to the Ephesians: "Praying always with all prayer and supplication in the Spirit, and watching thereunto with all perseverance," &c. Exemplifying his pastoral care for the flock over which the Holy Ghost had made him an overseer, he writes to the Romans, "Without ceasing I make mention of you always in my prayers." To the Ephesians: "I cease not to give thanks for you, making mention of you in my prayers." Again, to the same: "I bow my knees unto the Father of our Lord Jesus Christ, for you, making mention of you in my prayers." &c. To the Thessalonians, he declares, "We give thanks to God always for you all, making mention of you in our prayers," &c. To Timothy, he conveys: "Without ceasing I have remembrance of thee in my prayers night and day." And to Philemon similar language to the above is used.

While these prayers were no doubt among those of the saints that helped to make up the "golden vials full of odors," to be offered "upon the golden altar which was before the throne," how should they stir us up to emulation, not indeed in any formal offering like drawing high unto the Lord with the lips, while the heart is far from Him; but in inclining to introversion, to humility of mind, to watchfulness over ourselves, to wrestling untriflingly, and even to importunity with the true spirit of supplication and prayer, that so due homage—that of grateful hearts and contrite spirits—may be offered as acceptable sacrifice upon his altar, "who is glorious in holiness, fearful in praises, doing wonders."

We are assured, that the more any are engaged to approach unto Him, the Omniscient Holy One, in the true lowliness and meekness of obedient souls, the more will they experience of the calmness and resignation, the repose and peace—as precious fruits of sincere prayer—that flow from Him, who is a God that heareth such intercessions, and can, as that beareth such intercessions, and can, as that in the case of Elias,—"a man subject to like passions as we are,"—give or withhold rain

to or from the earth; showing that "the effectual, fervent prayer of a righteous man availeth much." He can shower down blessings in answer to these petitions, so that there shall not be room enough to receive them.

Then may we through diligence, inwardness, and fervency of spirit, increasingly realize how sweet it is, to pour out the overburdened or sorrowful feelings of the soul into the bosom of a tender and pitying Father. And may the language of each of our hearts more and more be—

"Then to that Fountain's sacred spring,
My thirst be less, my thirst be humbly bring,
And prostrate seek, in earnest prayer,
The streams of heavenly grace to share."

Goals of Fire, and how they Burned.

Ever if we were to tell you whereabouts in England the village of Loekens was situated, you might still fail to find it on the map; so we will say nothing about it, except that it was a good-sized place, not quite so straggling and old-fashioned as many English villages, and with a few neat little shops, as well as a street or two of cottages.

In one of these cottages there lived a laborer and his wife, and their only child, a boy of nine or ten years of age.

Tommy Ruffhead was, we are sorry to say, a most troublesome fellow. His saucy face, with its apple cheeks and twinkling eyes, was known—not alone in his own village, but for several miles round—as the face of the most mischievous, naughty boy in the county.

Even the dumb animals knew Tommy, and this not at all in a flattering way. Widow Brown's cow, that grazed so quietly on the green, and never looked up when other folks went by, became quite angry and active when Tommy appeared; and she frightened him on one occasion terribly, by galloping after him half way down the street.

The cocks and hens ran away as quickly as they could as soon as they saw Tom. The ducks took to the water, the cats climbed trees, the dogs ran to their kennels and growled till he was out of sight; and even the geese stretched out their long necks and hissed as he went by. So from all this we may see that Tom was not a favorite in the village, but that, in fact, he was reckoned the greatest tease and torment in the whole place.

Now, not far from — Ruffhead's cottage stood a small shop, kept by a barber, a good old man, who commonly went by the name of "Father Snip," and who did a pretty fair business upon the thriving heads and beards of the villagers and farmers.

We have said that Father Snip was both old and good, but neither his goodness nor his age could protect him from our Tom's pranks.

The barber had a neat little garden at the back of his house, and a fine apple tree that grew there had long been a great attraction to Tom. Autumn drew on apace, and the fruit with which the tree was laden began to turn rosy and to glisten in the red sunset, whenever Tom came out of school, and glanced up with longing eyes. The temptation grew stronger every day, as all temptations do when they are not resisted, and soon the boy felt that he could not rest until he had secured some of the apples.

One day, when he was quite sure that the barber was busy with a customer, he stole round to the back, climbed over the low fence

into the little garden, and in a moment more was under the apple tree, and filling his pockets with the fruit. His pockets held a good many, and he was so busy stuffing them, and a little bag he had brought with him, that he did not notice that he had dropped his handkerchief, a smart printed one, which his mother had lately bought, and marked with his full name across one corner. When Tom had picked as many as he could carry, he saw that he had nearly stripped the lower branches.

"The barber will never find out who took them," said the boy to himself, as he got over the little fence and set off toward home; but Tom forgot how many secret things are brought to light through the overruling power of God, and how many faults are suffered to lead to their own detection.

"Tom, my boy," said his mother, one morning, a week or two after Tom's visit to the apple tree, "your hair is growing very long and untidy, and you had better step in at the barber's, on your way home from school, and have it cut."

Tom, of course, made some objections, but his mother insisted, and so there was nothing for it but to put a bold face on the matter and do as he was told.

He had not courage, however, to go alone, but after school asked a small boy, a friend of his, to go with him. "I needn't be so afraid," said Tom to himself, as the two boys entered the shop together; "no one saw me take the apples."

Father Snip's manner was just as usual; he was quite as pleasant and chatty as ever, and Tom breathed more freely as the old man clipped the untidy ends of his hair, and talked so kindly to him.

"Just wait one moment," said the barber, as Tom, with his neatly cropped head, was making for the door, after paying his two-pence.

"Wait one moment," repeated the old man, "I have something for you;" and opening a cupboard he took out a little basket and hastily left the room. After a few minutes, however, he returned, and put the basket into Tom's hands.

"I have lately come to know," said he, gently, "that you are fond of apples; please take these home and enjoy them."

Tom stared a moment, but he managed to say "Thank you," and then ran out of the shop, and home, as fast as possible.

He carried the basket up to his room, emptied the apples upon the bed, and with them out fell his handkerchief, of which he had never once thought since the day that he had taken it out. It was quite clean, and neatly folded, with the marked side up, and now Tommy saw how his theft had been found out, and how gentle had been the old man's dealing with him.

A good thrashing would have hurt Tom's feelings far less than this kind action; as it was, he was quite overcome, and sitting down on the side of his bed, he fairly cried, with shame and self-reproach.

"There's only one thing that I can do," cried he, at length, starting up and drying his eyes. "I must go and tell him what a kind man he is, and how sorry I am."

Tom did not wait for second thoughts, but seizing his cap, he ran down stairs and out of the door, and in a few minutes he stood on the threshold of the shop. The old man was alone, and looking up as the boy entered, he saw the flushed, wet cheeks and eager eyes,

look in the whole story of repentance and softened feeling, which Tom could not express, and held out both hands to him.

During the quarter of an hour which followed the barber talked to Tom as the boy had never been spoken to before.

We cannot repeat what passed, but it may be well to state that Tom never forgot the lesson of the apples, but that a change began in his character and conduct which, after a while, made every one love instead of dislike him.—*Child's Companion.*

MY MOTHER.

Selected.

I ought to love my mother;
She loved me long ago;
There is on earth no other
That ever loved me so.
When a weak babe, much trial
I caused her, and much care;
For me no selfish ail,
No labor did she spare.

When in my cradle lying,
Or on her loving breast,
She gently hushed my crying,
And rocked her babe to rest.
When anything has ailed me,
To her I've told my grief;
Her fond heart never failed me
In finding some relief.

What sight is that which, near me,
Makes home a happy place,
And has such power to cheer me?
It is my mother's face.

What sound is that which ever
Makes my young heart rejoice,
With tones which tire me never?
It is my mother's voice.

My mother! dearest mother!
She loved me long ago;
There is on earth no other
That ever loved me so.
I ought to try to please her,
And all her words to mind;
And never vex or tease her,
Nor speak a word unkind.

When she is ill, to tend her,
My daily care shall be;
Such help as I can render
Will all be joy to me.
Though I can ne'er repay her
For all her tender care,
I'll honor and obey her
While God my life shall spare.

The Episcopalian Recorder.

Selected.

AUTUMN.

I love to wander through the woodlands hoary,
In the soft lights of an autumn day;
When Sunbeam gathers up her robes of glory,
And like a dream of beauty, glides away.

How through each leaf, familiar path she lingers,
Serenely smiling through the golden mist,
Tinting the wild grape with her dewy fingers,
'Till the cool emerald turns to auehst.

Warm lights are on the sleepy upland waning,
Beneath dark clouds along the horizon rolled,
Till the slant sunbeams, through their fringes raining,
Bathe all the hills in melancholy gold.

Beside the brook and on the unbarred meadow,
Where yellow fern-tufts fleck the faded ground,
With folded lids, beneath their palmy shadow,
The gentian nois, in balmy slumbers found.

The little birds upon the hill-side lonely,
Flit noiselessly along from spray to spray,
Silent as a sweet wandering thought, that only
Shows its bright wings, and softly glides away.

The scentless flowers, in the warm sunlight dreaming,
Forget to breathe their fulness of delight,
And through the tranced woods, soft airs are streaming,
Still as the dew-fall of a summer night.

So in my heart, a sweet unwanted feeling
Stirs like the wind in ocean's hollow shell,
Through all its secret chambers sadly stealing,
Yet finds no words its mystic charms to tell.

Polygamy Illegal.

The decision of the United States Supreme Court, in the case of Geo. Reynolds, of Utah, is an important and satisfactory one. Reynolds had been convicted of violating law against polygamy, and appealed to Supreme Court, basing his appeal on ground of religious belief, and hoping court would decide that the law was in conflict with the provision of the constitution which says, "Congress shall make no regulating an establishment of religion, prohibiting the free exercise thereof."

Chief Justice Waite, in deciding the law Congress to be constitutional, makes the following sensible remarks:

"Laws are made for the government of nations, and while they cannot interfere with mere religious belief and opinions, they may with practices. Suppose one religiously believed that human sacrifices were a necessary part of religious worship, would it be serious contended that the civil Government and which he lived could not interfere to prevent a sacrifice? Or, if a wife religiously believed it was her duty to burn herself upon a funeral pile of her dead husband, would it be beyond the power of the civil Government to prevent her from carrying her belief into practice? So here, society, under the exclusive dominion of the United States, prescribes a law of its organization that plural marriages shall not be allowed. Can a man excuse his practices to the contrary because his religious belief? To permit this would be to make the doctrines of religions belief superior to the law of the land, and, in effect to permit every citizen to become a law unto himself. Government could exist only name under such circumstances."

For "The Friend"

Having lately met with a small book, entitled, "Meditations and Experiences," by William Shewen, of London. I felt persuaded that some of them would be beneficial to the readers of "The Friend," and accordingly have copied some for insertion, if the Contributors approve of them. And if so, the following account of him would be interesting as he may not be known to many.

George Whiting, who was personally acquainted with him, advertising to the events of 1695, says: "This year died, William Shewen of London, he was a very servicable man on truth's account, several ways, and an elder in the church; of a sound judgment and understanding in the Truth, and had very clear openings in relation to the work of it, and also of Satan's wiles to hurt and hinder the progress in it, having had long experience of both, and therefore could advise and direct the Christian traveller, how to keep in the one, and be preserved out of the snares of the other; and wrote several seasonable and experimental treatises. He died in peace with the Lord, and unity with his people, about the sixty-fourth year of his age."

M. B.

It is a blessed state, to know the eye of the mind, not only opening, but opened; thereby is ability and wisdom witnessed to read in the book of life, wherein all the treasures of wisdom and knowledge are hid; and he or she that knoweth this light shining, this eye opened in them, walks and stumbles not. This Eye and Light within, is that which

istendom too much despise and reject, before walk in darkness and stumble, and so not whether they go. Whilst we ourselves did so, we were darkness, walked in it, our feet stumbled upon the dark mountains.

That which shat and stopped this Eye, and opened this Light within, in the beginning, sin and transgression, whereby mankind the sight and enjoyment of their Creator. I testify that no people upon the face of the earth, come to witness this eye of mind opened again, but as they come to receive the power in themselves which gives sight, and saveth and redeemeth out of transgression, and are also obedient and submit to it.—William Shewen.

For "The Friend."

Incidents and Reflections.—No. 32.

DIVINE GUIDANCE.

Anna Shipton in one of her little books relates an incident, which was the means of receiving spiritual instruction to herself, and she illustrates the manner in which the Lord often leads his obedient children in a way which they know not, and of the results which they had no anticipation.

She says:—"Death fell suddenly on a sweet minister child whom I loved. This event, in certain distressing circumstances connected with it, deeply affected me."

The day before the burial, which speedily followed, I awoke with an indescribable longing to look again upon the little one, so lately breathing my sick chamber with her smiles and pretty ways, and lisping her happy hymn by my side.

I was slowly recovering from a lengthened illness, and it seemed more natural to reserve renewed strength for the living, and avoid one which would only distress me. I did not see any ultimate advantage to be derived from what seemed the gratification of morbid feeling; while I shrank from the thought which I knew would be the result. Yet I felt desirous to go.

Judging myself, and oppressed by conflicting feelings, I prayed for the impression to be removed; and it deepened, and I felt I best go, and that at once.

The sun shone bright and clear, and shined on the first sharp frost of autumn; the ground was dry and crisp beneath my feet, the sky was blue and cloudless; all seemed gladsome, but my heavy heart. As I set forth to take my last look at the dear one, I should behold no more, until the dawn of the morning without clouds, I walked to the carriage stand. There was but one in the neighborhood, and that was at a little distance from my lodgings. When I reached it, there was only the coachman there, who demanded his fare nearly double the sum I had bargained with me, to convey me to my destination. He endeavored to persuade me that the distance was considerably beyond that which I had expected.

Outwardly this appeared a token that I should return, but after some conflict I considered that the object for which I had prayed still unattained, and that therefore circumstances ought not to deter me. Vainly I considered; no expedient came to my mind. I appeared that I must walk as I best could, and submit to some means of conveyance on the road for my return. On inquiry I found that there was a by-

road, which made a shorter route to the place I sought, and receiving my directions to follow it, I went on my way.

"I reached the house where the angel of death had carried the youngest and fairest from the home circle. There was more to sadden me in the living than the sight of the pale placid face and shrouded form laid in its little white coffin.

"The children of the family hung about me, and listened lovingly and tearfully to my words, as I spoke to them of the Saviour of little children.

"I was very weary, and would gladly have prolonged my visit, but I was not invited. I set forth again, understanding better the wisdom and tender love of this sudden and hitherto mysterious dispensation.

"As it was a by-road, I watched in vain for a vehicle of any description to help me on my way; only one passed me, and the driver took no heed of my weak voice.

"I remembered that leading out of the direct route was a pleasant seat, sheltered by the trunks of some old lime trees, which, if I could reach them, would afford me rest until I were able to proceed.

"I approached the spot, and found it occupied by a rough looking wayfaring man, whom at first sight I mistook for a beggar. As I drew nearer I perceived that he had an open book by his side, which he closed abruptly at my approach, as if my presence there had disturbed him. I paused in some uncertainty whether I should proceed, for he turned towards me, and appeared to regard me sternly. It was not really so. His pallid face was drawn with paralysis, and one arm hung helplessly by his side. Lines of thought, and care, and pain, which were graven on his brow and around his mouth, at first sight gave him a repulsive and almost fierce expression.

"I glanced at the book partially covered with his coat. I felt sure that it was a well-worn Bible. My doubts all vanished, and I took my seat beside him.

"You have a good companion there," I said, pointing to the Bible.

"He did not reply immediately, but looked keenly at me, and drawing the book nearer to him he answered, 'Yes; it comforts me.'

"You are better off than I," I continued, showing him a pocket edition of 'God's Promises,' which I held towards him. He looked closely at it, and glanced at its contents, turning over the leaves leisurely. After a moment's pause, he gave it me again, with a kindly smile that lighted up his face like sunshine upon a rugged mountain, as he said—

"Ah, but you have God's promises written in your heart: I know it."

"I wondered how he knew it. However, the words were reassuring, and I inquired what he was reading when I interrupted him.

"I was comparing Acts i. 8; Acts ii. 33; John i. 2."

"And now his whole countenance kindled with delight, and he spoke with that sudden vivacity that wakes up the whole nature when unexpectedly one halts a friend in a land of strangers. And then he said slowly, as if weighing every word—

"Sanctification, the work of the Holy Spirit alone, enables man to walk in holiness of life. 'Believers are expected to be holy, for without holiness no man shall see the Lord.' 'Whosoever is born of God overcometh the world, even our faith.'"

"I listened, not seeing this was the very truth I needed, and that the indwelling of the Holy Spirit in the temple of God was the only way by which fellowship with the Lord could be attained and retained."

"I felt that the Lord had led me there, and I rejoiced in his evident guidance in bringing me into communion with the wayfarer; but it was not until long afterwards that I recognized in him a teacher 'sent from God.'

"I inquired how long he had known Jesus as his Saviour. He replied: 'I was born of God-fearing parents, and I have good reason to believe that I have a father, mother, wife, and six children, waiting for me with Jesus. For twenty-eight years I have known Christ; but I knew I was a sinner before then. And now,' he said triumphantly, as one that findeth great spoil, 'I know why the Holy Spirit was given to us when Jesus returned to the Father: for our sanctification, so that Christ may dwell with us.'"

"The traveller went on to tell me that the preceding day he was discharged from a hospital as incurable. The doctor had recommended him change of air; so he had risen at five o'clock that morning. Partly walking, and assisted by a seat in a wagon, he had travelled more than twenty miles to spend a day in the country, believing, as he said, that by God's blessing it would help him.

"Years before, he had known this spot where we had met, and it was on his mind to rest here, and take his scanty meal. I drew from him reluctantly what it consisted, and found that two stale rolls were his only provision.

"He had formerly been a brush-maker, but paralysis had compelled him to relinquish his trade. He had been a patient in several hospitals without any relief, and long had been the trial of his faith; but he related all with thankfulness for what it had worked out for him.

"The shadows had lengthened when I rose from my rest beneath the old limes. Before leaving I related to my companion the circumstances which had contributed to bring me there, and placed my carriage fare, which was all I had, in his hand. The tears, which had not fallen as he related his sorrows, flowed as he looked at the coin. He saw in it God's careful love over his children, and the guidance of that Spirit of promise whose work and might he had so lately proclaimed."

A Roman Catholic's appreciation of the Bible.

—During last summer the bequest of a thousand dollars, left by the late Bartolomeo Blanco, was paid into the treasury of the American Bible Society. B. Blanco was not only a staunch Catholic during his whole life, but also manifested his firm adherence to the faith in which he had been brought up by bequeathing to each of the Roman Catholic churches in the city and county of New York the sum of \$500, making in the aggregate a very large amount. His sympathies, however, took a wider range than his own church, as was shown by a legacy of \$3000, to be distributed by the mayor to the poor of New York, without regard to nationality or faith, and his bequest of \$1000 to the American Bible Society for its benevolent work.

This legacy will be used in circulating the Scriptures among the adherents of the Catholic churches in this country and in South America and Mexico, as there is an increas-

ing demand for the Bible among the members of this communion.—*Bible Society Record.*

Flying Squirrels.

During my first year in college, I became the owner of three flying squirrels, and soon found that they could afford as much amusement, and do as much mischief as a monkey; and, during the time that I owned them, we were never tired of watching them.

I kept them in the trap in which they were caught, a common wire rat-trap, with a door at each end. This I placed upon a bracket on the wall, between the two windows of the room, so that they could reach it easily, by running up the window-curtains, and jumping from them to the cage. In a short time they became so tame that the cage was fastened open, and left so all the time, and every night about day-break, they would run up the curtain, jump into the cage, and curl up under the cotton with which it was filled, and sleep all day, rolled up with their tails wrapped around their bodies and covering their heads, so that they looked like little round fur balls. If they were disturbed during the day they were very sluggish and inactive, and hunted out another dark corner as soon as they were allowed their liberty; and no one who has seen them only in the daytime can understand what active, wide-awake, mischievous animals they are after dark.

Sometimes they chose very odd places to hide and sleep in, when they were driven out of their nest in the daytime. The pockets and sleeves of the clothes which hung in the wardrobe were favorite hiding-places, and the bed was another. They would crawl in between the pillow-case and the pillow, and sleep there all day, and sometimes I have found all three in bed with me when I awoke in the morning. They would climb up my coat-sleeve while I was studying, and go to sleep under my arm, and they were very angry if they were disturbed, although of course I could not sit still all day for their convenience.

About twilight every evening they would come out of their hiding-place, and play around the room, and were as wide awake all night as they had been sleepy all day. They were fond of playing in my hair, and often the first notice I would receive that they were out for the evening, would be their coming down with a flying leap, from the top of the window, plump upon my head, as I sat reading or talking. When I was engaged in study, such an interruption was rather startling at first.

They were very fond of perching upon the picture-nails, and climbing upon the cord, and would often carry a nut up and sit there and eat it, and then drop the empty shell behind the picture.

They had one great feat which was very amusing. They would run up the side of the door-casing to the top, and then drop down to the door-knob, and try to sit there; but as it was round and smooth, they had great difficulty in clinging to it, and usually slipped off on the floor, one after the other, and raced back to the top of the door to try it again.

Occasionally, one would almost succeed in gaining a seat upon the knob, but before he had time to get fairly balanced, another would drop down and strike him, and both would drop to the floor.

They would eat all kinds of nuts, but they

seemed to be much fonder of insects, and were busy a great part of the evening catching the moths and beetles which are so abundant in the early summer. They would hang by the claws of their hind paws, to the lower edge of the sash of an open window, and watch for an insect to fly past them. If it was near enough to reach, they would seize and eat it as they hung in the window. If it was not near enough for them to reach it in this way, they would sail out into the room after it, and in most cases catch it before alighting.

Their large, projecting eyes, fitted for seeing in the night, and their power of sailing short distances through the air, fit them perfectly for the capture of insects; but nuts must furnish the larger part of their food, for they may be trapped in the dead of winter, when there are so few insects, that they cannot depend upon them.

They have the instinct shared by most of the gnawing animals, such as field mice, striped squirrels and beavers,—of storing up in the fall a supply of food to be used in the winter. One which I kept several years, after those of which I have been telling you, dropped nearly a peck of hickory nuts down a hole which a mouse had gnawed in the floor of my closet, thinking that he was storing up a rich supply, which he could draw upon when he should need them.

They probably live upon nuts and seeds in the fall and winter, and their power of catching insects helps them to gain a living during the spring and early summer, when proper vegetable food is scarce, but insects very abundant.

Of course, I need not tell you that the name "flying squirrel" is a mistake, as they do not really fly, and are not furnished with true wings.

A very thin skin covered with hair, like the rest of the body, joins the fore to the hind leg on each side, and thus forms a broad sail which enables the animal to slide along through the air for some distance. Their legs are very short and weak, and they cannot jump upward more than a foot; but, by climbing up to some high place, such as a tall tree, and then sailing off into the air, they can slide for a hundred feet or more before reaching the ground. The tail is very broad and flat, and is used as a rudder to regulate the slope at which they should fall. The rudder of a boat is used to turn the boat from side to side, so it is flattened vertically, and moves from side to side. The tail of a flying squirrel does not seem to be of very much assistance in turning from side to side, but it regulates their fall, so that they can come almost straight down to the ground, or sail off so as to come down very gradually.

Sometimes they come almost down to the ground very rapidly, then, just before they reach it they bend the tail so as to sail off for some distance close to the ground. After they have sailed down from a high place in this way, and have thus acquired a good supply of force, they are able to change the position of the limbs and tail so as to go up some little distance, in the same way that a sled will slide up a short hill after it has gone down a long one, but of course they are not able to reach a point as high as that from which they started.

They were able to start from the top of the window, and sweep almost down to the floor, and then rise enough to catch the back of a

chair on the opposite side of the room, w was about twenty-one feet deep.

In the woods, where they can start off a very great height, they make much longer flights than this.

The tail is also used to stop them, by bending it down so as to catch the air, when they wish to alight.

All these uses of the tail for a rudder require that it should be arranged on the opposite side to the rudder of a boat, and we why it must be flattened horizontally, move up and down, instead of being flattened vertically, and moving from side to side *Wide Awake.*

"The Kingdom of God is within you."

A female distinguished for her piety, as well as by her eminent station in life, being engaged in her youth to seek earnestly after knowledge of divine things, was introduced to a pious man; he spoke not a word for some time, when she briefly told him her difficulties about prayer. He presently replied because she sought that without which she had within; adding, "Accustom yourself to seek God in your heart, and you will find Him." Having said these words, he left her they operated like the stroke of a dart which pierced her heart asunder. "I felt," said she "at this instant, a wound very deep, smitten with the love of God; a wound so delight that I desired it never to be cured. The words brought into my heart what I had been seeking so many years; or, rather, they made me discover what was there, and which I did not enjoy for want of knowing it. Oh, Lord! thou wast in my heart, and demanded only the turning of my mind inward to make me feel thy presence. Oh, infinite Goodness! Thou wast so near, and I ran hither a thither seeking thee, and yet found thee not. My life was a burden to me, and my happiness was within myself. I was poor in the midst of riches, and ready to perish with hunger, near a table plentifully spread, and continual feast. Oh, Beauty, ancient and new, why have I known thee so late? Alas! I sought thee where thou wast not, and did not seek thee where thou wast. It was for want of understanding these words of Thy Gospel.—The kingdom of God cometh not with observation: neither shall they say, Lo here, or lo there: for behold, the kingdom of God is within you." This I now experienced, since thou became my King, and my heart thy kingdom, where thou reigned as sovereign, and did all thy will."

Writing about the "Western Caves," H. Hovey says, that as the water level is known to be 312 feet below the crest of the hill covering the Mammoth Cave, the subterranean rivers must be at a little less than that number of feet beneath the surface, and must also be the lowest localities possible. Hence, reasonably concludes, no dome in that cavity could exceed 312 feet in height without cutting through to the open air. This affords means of correcting the statements of the imaginative writers whose estimates are nearly double what they should be.

Amid our imperfect utterances let us comfort ourselves with the thought of that real where thought shall speak without need of tongue, and the whole life shall be an anthem of praise.

Thomas Carlisle.

the letters of Thomas Erskine of Linlithgow, a Scotch theologian and philosopher, published, there is the following interesting letter from Carlisle, between whom and Erskine an intimate friendship had long subsisted.

"Chelsea, February 12th, 1869.

Dear Mr. Erskine:—I was most agreeably surprised by the sight of your handwriting in my hands, so kind, so welcome! The letters are firm and honestly distinct as ever; the d, too, in spite of its frail environments, clear, plumb up, calmly expectant, as in best days; right so; so be it with us all, we quit this dim sojourn, now grown so lonely with us, and our change come! 'Our hearth which art in heaven, hallowed be thy name, thy will be done,'—what else can we do? The other night, in my sleepless tossings about, which were growing more and more miserable, these words, that brief and fervent prayer, came strangely into my mind, and I altogether new emphasis, as if written and shining for me in mild, pure splendor, the bosom of the night there, when I, as ever, read them word by word—with a dense check to my imperfect wanderings, such a sudden softness of composure which I much unexpected. Not for perhaps thirty forty years had I once formally repeated that prayer; nay, I never before felt how intensely the voice of man's soul it is; the intense aspiration of all that is high and pious poor human nature; right worthy to be commended with an 'After this manner pray'

I am still able to walk, though I do it on compulsion merely, and without pleasure, except as in work done. It is a great sorrow at you now get fatigued so soon, and have to you your old privilege in this respect; I only hope you perhaps do not quite so indispensably need it as I; with me it is the key to respect, and in fact the one medicine (often ineffectual, and now gradually oftener), that I never could discover for this poor clay tabernacle of mine. I still keep working after the best sort; but I can now do little, often most nothing; all my little 'work' is henceforth private (as I calculate), a setting of my horse in order; which I would fain finish time, and occasionally fear I shan't."

The Strange Sentinel.—"One day," said the Emperor, "I was walking with the Emperor of Russia in the summer garden of Petersburg, when coming upon a sentinel at the centre of the lawn, I took the liberty of inquiring why the man was placed there. He answered me not know. The Emperor said he did not know. The sentinel did not know. I then said that he had been ordered there. The Emperor then dispatched to ask the officer of the watch, whose reply corresponded with the sentinel's—'Ordered.' Curiosity awakened, military records were searched, without yielding any satisfactory solution! At last an old serving man was found, who remembered bearing his father relate that the Empress Catharine II., one hundred years before, had found a snowdrop on that particular spot, and given orders to protect it from being trampled. No other device could be thought of than guarding it by a sentinel. The order since issued was left in force for a century."—*ate Paper.*

Effects of Publicity on Suicide.—The *Philadelphia Medical and Surgical Reporter* states, that an Italian medical society which meets at Pisa, recently sent a request to the various Italian papers to cease reporting suicides, stating after careful study of the subject they had reached the conclusion that such publicity tends, at least in Italy, materially to increase the number of those who destroy themselves. The motive is sometimes imitation, sometimes a morbid thirst for notoriety.

The bad effects of sensational literature upon the juvenile mind, had a fresh illustration in New York City, in the case of a youngster, Charles W. Dufrane, aged nine years, who ran away from his home, 150 West Tenth Street, "to hunt Indians and buffaloes on the plains." When he got as far as St. Paul, Minn., he was noticed by conductors on the railroad, and sent back to that city, the police taking charge of him at the Grand Central Depot till his father came and took him away. The father says his son was "very fond of reading stories, and great exploits in the weekly story papers, and this is what comes of it."

W. W. Jacques, Fellow in Physics of the Johns Hopkins University, contributes to the *Journal of the Franklin Institute* an interesting paper on the effect of the motion of the air within an auditorium upon its acoustic properties. Public speakers generally will find valuable suggestions indicated by it. He has repeated Tyndall's experiments with some modifications, and arrived not only at the conclusion that currents of air of varying density form one of the chief obstacles to the propagation of sound, but that they actually modify the sound wave, and so give rise to great indistinctness.

Laws and institutions are constantly tending to gravitate. Like clocks, they must be occasionally cleansed, wound up and set to true time.

THE FRIEND.

SECOND MONTH 8, 1879.

We have received a copy of the Report of the Bible Association of Friends in America, for the year ending 10th mo. 1st, 1878.

This association was the first of the kind formed among Friends in this country, being instituted in Philadelphia in the year 1829. The depository and office is at No. 116 North Fourth street. John S. Stokes is the Agent. Bibles and Testaments may be obtained for gratuitous distribution among those unable to pay for them, by sending written applications to the agent. We subjoin some extracts from the report. It will be seen that the funds of the Association have been reduced by the late depression in rents, &c. A donation of \$29 will constitute any Friend a life member, and \$2 per annum a member for one year. We would commend this excellent work to those able to contribute to its funds, or share in the circulation of the Scriptures. "There have been issued from the Depository during the year, 3377 volumes; consisting of 1488 Bibles, 1506 Testaments and Psalms, and 383 Testaments.

"The reports for the last ten years show a distribution and sale of 59,809 volumes, of which there were 22,490 Bibles, 11,273 Testaments, and 26,046 Testaments and Psalms. During the ten years preceding there were issued 18,653 Bibles, 16,967 Testaments, and 8,701 Testaments and Psalms; making in that time 44,321 volumes.

"The efforts made by the Association two years ago, to promote the circulation and perusal of the Scriptures within the bounds and neighborhood of Philadelphia Yearly Meeting, by the appointment of suitable Friends to act as agents, to ascertain the needs of their neighborhoods has met with considerable success. The Friends designated have cheerfully accepted the duties assigned them, and have distributed 1132 volumes; viz. 519 Bibles, 67 Testaments, and 546 Testaments and Psalms, and this committee on distribution have been largely looked to, to supply the demand for schools, and other public as well as private donations, within the limits of our own Yearly Meeting; while applications beyond this have been referred to the corresponding members, for their judgment and direction.

"In those localities where Friends do not feel warranted in organizing for the service, we desire they will individually maintain a lively interest in the cause, and see to it, that there are no persons in their knowledge who desire a copy of the sacred writings, who are not supplied through the aid of the Association.

"It is interesting to notice the extent of the territory occupied, and the variety of agencies employed in the service. The field covers our country from Maine, westward to Kansas, and from Canada, southward to Florida and the Gulf States.

"Ministering Friends in carrying out their concerns in visiting distant portions of our country, have proved efficient collaborators with the Association.

"The Treasurer's account shows a balance on hand at this time of \$531.78. He has received during the year \$2,564.17. Last year the receipts were \$3,050.31; showing a falling off in receipts of \$486.14. This was mainly owing to loss and reduction of the rental of the real estate belonging to the Association.

"We repeat what has been written in a former report: 'It is believed that our members would more generally feel an interest in this work, and would more freely contribute to the support of the cause, did they appreciate the extent of the field of labor, and the fact, that at times the condition of the treasury forces us to pause.'

"We feel no hesitation therefore in calling the attention of Friends everywhere to the subject, that all may ascertain the duty resting upon them, either as distributors to the poor and lowly of these sacred writings, or as contributors to the Association in that material aid, which is so essential to carry forward the objects of this organization."

We have received the printed minutes of the Western Yearly Meeting, held at Plainfield, Indiana, in 9th month last; and of that held at Sugar Grove.

From the former of these documents we extract a few paragraphs. The Minute on the State of Society, after speaking of Divine Worship, &c., says:

"If we believe, as we must do, in the im-

mediateness of the operations of the Holy Spirit, it becomes us to see to it that in all our religious meetings, there is full opportunity given for this His immediate ministry, no less than for all vocal utterance that is under His anointing and putting forth."

"It is one of the characteristics of the times, that too many parents are wont to leave the training of their children and the formation of their characters, too much to the teachers of their Bible schools and of their day schools, and to the ministers of the gospel.

"These may all exert a helpful influence, but nothing can excuse a parent from his obligations to train his offspring for the duties of earth and the blessings of Heaven."

"Friends were earnestly exhorted to abstain from the unnecessary use of tobacco in every form, and that those who continue to use it may not be cause of stumbling to others, it is advised, that subordinate meetings, as far as practicable, shall not place such in prominent positions, or appoint them on committees in the service of the church."

The statistical tables are quite elaborate, including among other things the number of those who raise, sell and use tobacco—1215 in all, out of a membership of 12,153—or almost precisely one in ten.

The average age of the 179 members who died during the year, was 73 years 11 months; which indicates a greater rate of mortality than we suppose exists in the settlements of Friends, east of the Alleghany Mountains. To counterbalance this the number of births is proportionally larger. The number of children in the more newly settled agricultural districts of our country, is much greater than in those parts which have been longer inhabited; where an increase of wealth has led to a more expensive manner of living—which discourages the young people from marrying in early life. In Philadelphia Yearly Meeting, the number of children of school age is less than one-sixth of the whole membership; while the tables of Western Yearly Meeting show more than one fourth of their members to be at school.

The R-resentative Meeting had addressed Memorials to the State Legislature on Prison Reform, Capital Punishment and Intemperance.

The extracts which follow are taken from the minutes of the body which convened at Sugar Grove:—

"The meeting was brought under a feeling of humility in the consideration that the epistles issued by this meeting last year, and addressed to each of the Yearly Meetings with which we have been in correspondence, have not been responded to. We feel keenly the loss of this epistolary intercourse; yet as our minds have been renewedly turned to the Fountain from whence comes the Christian's hope and confidence, we have been enabled to repose in quiet trust that He who has thus far sustained us will continue to extend His holy hand for our preservation."

The report of the Committee on Books and Tracts, shows that considerable interest had been felt on that subject, and efforts used to supply libraries of the Yearly Meeting, of the Monthly Meetings, and of members, with the approved writings of Friends.

The report from the Yearly Meeting of Ministers and Elders, contains the following paragraphs:

"Ministers were encouraged to faithfulness,

that all things may be kept in order, giving strict heed to the revelation of God's will concerning us; that all things which He approves may be built up; and that we study to show our selves workmen approved unto God.

"Elders were exhorted to faithfulness, that they keep a strict watch over the ministry, that they may be endowed with wisdom, to keep all clear of that which does not savor of life and power, that our hands may not become weakened, and although we may be accused of much straightness and narrowness, this is no apology for unfaithfulness. We should also remember that there is a time to speak a word of encouragement to a wrestling, earnest servant; thus all may be bound together in that pure love which binds all together in Christ."

The concluding minute reads thus: "As we draw to a conclusion, our hearts are tendered under the remembrance of the Lord's goodness and mercy in permitting us to meet from day to day, and to transact our business in the sweet unity of Gospel fellowship.

"With feelings of thankfulness, we separate to meet at the usual time next year, if the Lord will."

SUMMARY OF EVENTS.

UNITED STATES.—According to the local weather report for Philadelphia, the mean temperature for the past month was 29.9 degrees. Highest, 54 deg., on the 28th; lowest, 3 deg. below zero, on the 3d; this is the lowest record since 1875, when it was 5 deg. below. The average temperature for the past nine days is 31.7 deg. About five inches of snow fell during the month. Frost or freezing weather occurred seven days, according to the report.

In the U. S. Senate on the 31st ult., two reports were presented from the joint committee on transfer of the Indian Bureau. One of them, accompanied by a bill, authorizing the President, when expedient, to temporarily transfer the custody of certain Indian tribes to the War department. The other favors a complete transfer of the same.

The suit for the recovery of the Arlington estate, before the United States court at Alexandria, Va., resulted, on the 30th ult., in favor of the plaintiff for the whole property in fee. A motion for a new trial on behalf of the defence was made.

It is stated at the Treasury Department, that over \$25,000,000 of coin obligations, including \$1,400,000 of United States notes presented for redemption, were paid during last month, yet the stock of coin in the Treasury has steadily increased. The interest for the present month will be paid in coin, if desired, at any sub-treasury.

Subscriptions to the four per cent. bonds amounted during the last month to \$153,851,150, and the calls of five-twenty bonds to \$150,000,000.

The third instalment of the Mexican indemnity, \$300,000, was paid over to the State Department on the 31st ult. It will be speedily distributed pro rata among the claimants.

It is believed that work will soon be resumed at all the mines of the Reading Company at Girardville, Pa., the miners having asked to be allowed to return to work.

The public debt, less cash in the Treasury, amounted on the 1st inst. to \$2,925,896,130—the decrease during last month was \$2,751,980.

A portion of the Indians under Sitting Bull, is reported to have returned into the United States—the reason given is that buffalo was scarce north of the line, and the Indians were in a starving condition. No immediate trouble is anticipated.

The number of deaths in this city for the week ending at noon on the 1st inst., was 391. The principal portion of them were consumption, 69; inflammation of the lungs, 59; disease of the heart, 16; scarlet fever, 13; typhoid fever, 9.

Markets, &c.—U. S. sixes, 1881, 106½; 5s, 105½; 4½ per cent. consols, 105½; do. coupon, 106½; 4 per cent. 1001; 5-20, 1867, 102½; do. 1868, 102½.

Cotton, 9½ cts. per pound for uplands and New Orleans.

Flour.—Minnesota extra, \$1.25 for medium, and for high grades; patent and other high grades, \$5.67 50. Rye flour, \$2.75.

Grain.—Wheat, 1½, \$1.06 for red; \$1.06 a \$1.07 amber, and for white \$1.07 a \$1.08. Rye, 54 cts. western, and 56 a 57 cts. for Penna. Corn, 43 a 45; Oats, mixed, 23 a 29 cts.; white, 30 a 32 cts.

Seeds.—Clover, 6 a 6½ cts. per pound. Flaxseed, \$1.37 per bushel.

Hay and Straw.—Prime timothy, 60 a 70 cts. per 1000 pounds; mixed, 45 a 55 cts. Straw, 55 a 70 cts. per 1000 pounds.

Beef tallow were in fair demand, and prices ruled firmer, 2000 head arrived during the week, and sold 3 a 5½ cts. per pound as to quality. Swine, 4½ a 5½ cts. per pound as to condition. Hogs, 5½ a 6½ cts.

FOREIGN.—The Directors of the City of Glasgow Bank were sentenced on the 1st inst.—two convicted for defaulting the bank and another, for eighteen months imprisonment—the remaining five, convicted of uttering false abstracts of balance sheets, were sentenced eight months imprisonment.

A strike has occurred at Liverpool, of the dock laborers, on account of which, it is said, trans-Atlantic steamers can neither be loaded nor discharged. Efforts are being made to get the laborers from their post, and the magistrates of Liverpool have threatened to punish severely any persons who attempt to intimidate laborers at work.

In the Admiralty Division of the High Court of Justice, the motion to arrest the United States frigate Commodore and her cargo, was argued on the 29th, and decided in favor of the United States. The Court's decision sailed for New York on the 30th.

Dispatches from Cape Town, dated on the 14th last month, stated that no answer having been received from the Zulu King, the British troops had advanced into his territory, and fighting had commenced.

The English troops in Afghanistan are said to be suffering from the want of clothing and food. The commissary officers appear unable to forward supplies to the front.

The pestilence in Russia is said to be spreading, and the panic is very great. All classes have petitioned for the entire cessation of all intercourse, even postal communication between the rest of Russia and the Volga and the railroads, and no longer admission to Germany. Austria is about to send a large number of travellers from Russia to cross the frontier unless provided with passes from the sanitary authorities.

MacMahon, President of the French Republic, sent his resignation to Congress on the 30th ult.; the immense cause of which appears to have been, an unwillingness to change the law, and the certain changes in the commands of the army, which the Republicans felt to be a necessity. Jules Grevy, who has been for several years President of the Chamber of Deputies, was chosen as MacMahon's successor. It is expected the Cabinet will be reconstructed, with only two or three new members. No considerable excitement has attended these changes. There is said to be a general feeling of gratification throughout France at the issue of the resignation.

From the official statistics, just published, it appears that in consequence of the ravages of the phylloxera the area under the cultivation of the vine, in France has decreased since 1874 by as much as 370,000 acres. The decrease is in the south.

In the Southern Provinces of Morocco, it is feared that nearly half the inhabitants will have perished before next year, on account of the scarcity caused by last year's drought.

FRIENDS' ASYLUM FOR THE INSANE, New Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOHN C. HALL, M.D. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DEED, in this city, on the 8th of 5th mo, 1878. ELLEN LEEDS, daughter of Ann and the late Josiah Leeds, in the 30th year of her age. When informed of the near approach of death, she replied, she was not afraid to die, if her Heavenly Father saw best to take her now. She felt all would be well. From the many remarks made during her short illness, her friends have the consolation believed that, through the mercy of her Redeemer, she has entered into everlasting rest.

Incidents and Reflections.—No. 33.

here is much instruction and encouragement to the sincere disciple of our Lord, in account given by Anna Shipton of one she describes as "the handsome, busy, restless wife of a thriving tradesman," living in one of the smaller towns on the coast of England, which was a place of resort for invalids. A Shipton was then a sufferer from disease, she became much concerned for the spiritual welfare of this woman, sent religious works to her, which she misd to read. But her efforts and prayers were fruitless, and she left the place without receiving any evidence of a blessing harvested on her exertions.

Three years afterwards, she returned to the town and was requested to call on an invalid, whose death was daily anticipated. She replied that it was impossible that day-morrow it may be too late," was the answer, with something of reproach in the tone. No anxious thought crossed her mind, he replied; "Not so. If it is really needful to me to see her, she will not die to-day." Another day yet another day passed before could leave the house, but her mind was in peace, knowing that the sick woman not dependent on an instrument laid aside the Lord.

When the day came in which she was free to go to the invalid, she found her very weak and depressed. She thus describes the visit: "I did not ask her a question relative to her case. I listened to what she was disposed to me, which was very brief.

As I sat by her bedside, I simply related grace and goodness of the Lord to myself; assurance" of salvation which he had in me in [the Scripture], and which he enabled me to lay hold of by faith; and fellowship which had arisen out of this grace.

I spoke of Jesus as I was then experiencing, a very present help. My heart was

This "assurance of salvation" applies only to those through submission to the work of Divine Grace their hearts, receive power to become the children of God. This is shown by such texts as these: "He that keepeth me shall not walk in darkness, but shall have light of life." "If we walk in the light, as [God] is in the light, we have fellowship one with another; and blood of Jesus Christ, His Son, cleanseth us from iniquity." "He that saith, I know [Christ] and keepeth His commandments, is a liar, and the truth is not in him."

overflowing with joyful praise, in the remembrance of his love, exhibited in new mercies vouchsafed me. May-be he had delayed my visit until he had put a new song in my mouth. "She listened to me in profound silence, her wistful eyes and intelligent countenance expressed the interest with which she followed the recital.

"A week passed by before I saw her again; she seemed peaceful, but was silent as to herself. In spite of the visible inroad of disease, and the expectation of every one, life was prolonged. She was evidently nearing home, but the body alone exhibited decay; her mind seemed to me to gather power, and her patient trustful spirit proclaimed the source of her peace and cheerfulness. Nor was this all. Some who had visited her when she was first laid low in her sickness held errors in doctrine, which she rejected as contrary to the simplicity of the gospel. She did not shrink from witnessing for the truth, even though she was aware that she should forfeit the favor they had shown her; nor did she withhold her testimony to the light which had shined on her own heart.

"The fogs and frosts of departing winter kept me a close prisoner to my room, but they did not seem seriously to affect my poor neighbor. I had not been able to visit her for weeks. All I heard of her was very cheering, and she often let me know that I was not forgotten. Frequently she sent me flowers for my table, which she loved to arrange herself; and there was always a text unfolded in them, which she had sought for me out of the heavenly treasury, that came freshly and with power to my heart, proving *who* had guided her in the choice.

"Three weeks had passed since I had seen her, and I heard less of her, owing to the absence of a friend who had been in the habit of visiting her. One night I dreamed that she had died at four o'clock that morning, desiring in vain to see me, to bid me farewell; and yet I thought I set off to see her, and arrived too late—she was dead.

"I awoke in great distress of mind and sent to inquire for her, and heard that there was no change in her symptoms.

"I determined, if possible, to go to her that day. It was a dark, gloomy morning, with a chill, steady rain, that gave no hope of clearing away. I waited in vain for some cessation. Satan was busy in suggesting that another day would do as well, when the weather would be better, and I less suffering, and that the dream was folly.

"But I could not rest; my heart was with the sick one whom Jesus loved. Thinking that perhaps owing to the inclement weather she might be lonely, or needing something that I could procure for her, I sent for a carriage, and did not breathe in freedom until I found myself by the side of her bed, in the same place where I had first spoken to her of my precious Lord.

"She had had no visitor, it is true; but she told me that she had needed none, and that she had experienced an intense longing the day before to see me again, feeling that her time was short.

"My hour was come now to listen to her, which I did in silent wonder and praise. She recalled the days to which I had never myself alluded, when I sent her the tracts and books; for before the close of my first visit I had recognized her as the prosperous tradesman's wife.

"She acknowledged the love of the Lord in laying his hand upon her just as the object of her life's labor was within her grasp, and for which she had nearly bartered her priceless treasure.

"One Sunday," she said, "I was pacing the garden path of the cottage where we lived away from the shop, and as I walked I thought to myself, 'We have made more money this year than last, and next year we shall make more. Then we shall take a large house, and have a larger shop; that will bring us more money still. And then we shall be able to build a house for ourselves, and have a garden.' And then"—said a voice—"you will die!" I was so startled that I trembled. It was the voice of the Spirit in my heart, but I did not know it. I had never felt nor heard anything like it before, but it was as clear as my thought, and so distinct that I turned quickly round, thinking that I must have spoken aloud, and a listener have overheard me; but I was alone. It was the hour of afternoon service; I listened, not a footstep could I hear. I said, "This is all fancy! No, I shall not die! Why should I? I am strong and well, and then I have my children to look after."

"But from this time the first symptoms of this terrible malady began to appear, the messenger of mercy, whom the Lord had sent to prepare the way before him.

"The development of her spiritual life was deeply absorbing to me. She spoke with a power such as I had never witnessed in her before. I could but marvel at the growth that the latter rain had produced. She had never given me such outspoken and entire confidence; now it was unrestrained and free.

"And how were you led to this rest in Jesus? I said, longing to trace the course of God's wonderful dealings with her.

"She was silent for a minute, and then turned towards me, and looked fully in my face with intense earnestness. Her cheeks were flushed with the energy with which she had spoken, and her dark eyes glistened with tears. She raised her emaciated hand, and laid it tenderly on my shoulder, while she said in a tone of grateful affection I shall never forget—

"What! and do you really not know?" "No, indeed," I replied. "I thought it was—

"Yourself!" she said, interrupting me. "I thought you knew it long ago, or I should

have told you. The first day you came to me, if you remember, you related to me what the Lord had done for you, what he was to you. I saw that you believed him, and were happy in his love. I was always doubting; and when you left me I was more downcast than ever. At last it came to my mind that all he was to you he was willing to be to me, and it soon became my daily prayer that he would give me all he had given you.

"For the first time I heard her pray, and the fullness and faith of that last petition seemed to bring eternal realities very near. She thanked the Lord again and again for sending me, and said she was longing to see me, and prayed for me in touching supplication. And then I rose to go. She embraced me, as for a long parting, and said,

"The only text I have for you is the one I get so often for when I pray: 'Through much tribulation you must enter into the kingdom of God.' Yes," she concluded slowly and sadly, "*Much tribulation!*" and I believe you will have it." But, after a pause, she added with a bright smile, "You will come in bringing your sheaves with you. I shall be looking out for you *there!*" And she glanced up; "Don't forget me!"

"And so we parted.

"At four o'clock the following morning the Lord sent for her who had thus looked to him for peace and rest; and now she waits with Him."

The Dark Day.

For several days before the 19th of 5th mo, 1780, the air was full of vapors, as we often see it when fires are raging in the woods near us, and the sun and moon appeared red, and their usual clear light did not reach us, especially when rising and setting. The winds blew chiefly from the southwest and northeast, and the weather was cold and clear. The morning of the 19th was cloudy and in many places slight showers fell, sometimes accompanied by thunder and lightning; but as the sun arose it did not increase the light, and the darkness deepened and deepened, until the children standing before the tall clocks could not see to tell the time, and older people peering over the almanac were not able to distinguish the letters. The birds sang their evening songs and flew to their nests in the woods, the poultry hurried to their roosts, while the cattle in the fields uttered strange cries and leaped the stone fences to gain their stalls, and the sheep all huddled together bleating piteously.

The clouds were in some places of a light red, yellow and brown; the leaves on the trees and the grass in the meadows were of the deepest green, verging on indigo, the brightest silver seemed tarnished, and everything that is white in the sunlight bore a deep yellow hue.

The rain, also, was unlike any other rain, and it set all the people to wondering as they dipped it from tubs and barrels; for a scum formed on it resembling burnt leaves, emitting a sooty smell, and this same substance was seen on streams and rivers, especially the Merrimac, where it lay four or five inches thick, for many miles along its shore.

Another peculiarity was the vapor; in many localities it descended to the earth from high in the atmosphere; but at one point a gentleman saw the vapors, at nine o'clock, rising

from the springs and low lands; one column he particularly noticed rapidly ascending far above the highest hills, then it spread into a large white cloud and sailed off to the westward; a second cloud formed in the same way from the same springs, but did not rise as high as the first, and a third formed fifteen minutes afterward.

So unwholesome was this vapor that small birds were suffocated in it, and many of them were so frightened and stupefied that they flew into the houses, adding to the fears of ignorant people, who considered it a bad sign for a bird to enter a dwelling.

The commencement of the darkness was between ten and eleven in the forenoon (when the men were busy in the fields and offices and work-shops, the women spinning, weaving and preparing dinner, and the children at school or helping their fathers and mothers at home), and it continued until the middle of the following night; but the degree of darkness varied; in some places the disk of the sun was seen when the darkness was the most dense.

Lights were seen burning in all the houses, and the people passing out-of-doors carried torches and lanterns, which were curiously reflected on the overhanging clouds.

Thousands of people were sure that the end of the world had come; many dropped their work and fell on their knees to pray, others confessed to their fellows the wrongs they had done, and endeavored to make restitution.

The meeting-houses were crowded, and neighborhood prayer meetings were formed, and the ministers and old church members prayed long prayers, mentioning the nations and individuals of Bible times who had been destroyed on account of their sins, and begged that as God spared the great city of Nineveh when it repented, so He would forgive them, cheer them again by the light of the sun, and give victory to their armies.

It is said that the Connecticut Legislature being in session, the members became terrified when they could not see each other's faces, and a motion was made to adjourn, when — Davenport arose and said: —

"Mr. Speaker, it is either the day of judgment or it is not. If it is not, there is no need of adjourning. If it is, I desire to be found doing my duty. I move that candles be brought, and that we proceed to business."

All the shivering, frightened people began now to look forward to evening, hoping that, as the moon rose full at nine o'clock, her light would penetrate the gloom; but all the children who coaxed to sit up and see her grew very sleepy, their strained eyes were not rewarded by her beautiful beams, for at eight in the evening the darkness was total; one could not distinguish between the earth and the heavens, and it was impossible to see a hand before one's face.

Then all the weary children were sent to bed after the most honest prayers that they had ever prayed, and the older people sat up to watch for the light that never before had appeared so glorious.

And never dawned a fairer morning than the 20th, for the sun that opened the flowers and mirrored itself in the dew drops, brought the color again to the children's faces, and filled every heart with confidence.

After the darkness had passed, several persons traveled about to gather all possible in-

formation concerning this memorable and Dr. Tenney wrote an account of what he learned while on a journey from the East to Pennsylvania. He says the deepest dark was in Essex county, Massachusetts, the least part of New Hampshire, and the eastern portion of Maine (where my great-grandmother lived). In Rhode Island and Connecticut was not so great; in New Jersey, peep clouds were observed, but the darkness — not uncommon, and in the lower part of Pennsylvania nothing unusual was observed.

It extended as far north as the American settlements, and westward to Albany, but exact limits could not be ascertained.

In Boston the darkness continued four or fifteen hours, varying in duration at other places.

As it was impossible to attribute the darkness to an eclipse, the wise people formed many theories respecting it; being convinced that it was due to immense fires in the winds blowing in opposite directions, and the condition of the vapors; but Herschel says: "The dark day in northern America was one of those wonderful phenomena of nature which will always be a matter of interest, but which philosophy is at a loss to explain." — *St. Nicholas*.

For "The Friend"

Thoughts and Feelings.

THE TRAINING OF CHILDREN.

"Train up a child in the way he should go: the duty of every parent — has respect to this life and to that which is to come-time and to eternity. It is so solemn and perative an obligation, and withal so reasonable and expedient, that no parent can, with impunity, shun it off upon, or transfer it any one else. For whether duly discharged or not, as in His sight "whose eyes run and fro throughout the whole earth, to see himself strong on behalf of them whose he is perfect toward him," it will nevertheless be required at the hands of every one, according to the measure of grace and ability given who is placed in such a fearfully responsible position. He who not only is strong, but strength, yea, whose "strength is made perfect in weakness," will give to every one the qualification and ability needed herein, as they engaged in childlike dependence and simplicity to ask it of Him. For how applicable the testimony of the apostle James: "If a of you lack wisdom, let him ask of God, that giveth to all men liberally and upbraids not; and it shall be given him."

Under the old and less perfect covenant the duty of parents, respecting the first commandment, was thus imperatively enjoined upon Israel: "These words which I command thee this day, shall be (first) in thine heart, and (next) thou shalt teach them diligently unto thy children, and shalt talk of them when thou sittest in thine house, and when thou walkest by the way, and when thou liest down, and when thou risest up." Subsequent from the Most High, also through Moses, this injunction: "Gather the people together * * that they may hear, and that they may learn, and fear the Lord your God, &c.; that their children, which have not known any thing, may hear, and learn to fear the Lord your God, &c." Now can any one suppose, under a new covenant of light and life, of which Christ Jesus is the High Priest and Mediator, that parents would, recogniz-

power of His anointing, from any cause exonerated from seeking diligently to impute their tender and susceptible offspring to the Saviour by the still small voice of the in speaking Spirit makes himself known in the way, the truth, and the life as well as to Him manifests himself by the drawing of His love, or that they can in any way be excused from prayerfully interceding with a beneficent and loving Father in heaven for the Light of His dear Son to guide, and their preservation, as for that of their own way? Nay, it is to be asked, can the Scripture be fulfilled, "Train up a child in the way he should go," or the no less comprehensive and important one, "Fathers promise not your children to wrath; but bring them up in the nurture and admonition of the Lord."

Nothing is more true than that parents cannot confer grace. But they can by their lives, their upright, consistent, godly conversation and walk before their children, manifest that they themselves fully believe in Christ Jesus as the Saviour of the world, and that whole-hearted obedience to the revelations of His Holy Spirit to the soul as our guide into all truth, is, as a primary duty, obligatory on all. And when they do this, inasmuch as it is in Jesus dwells daily, and authoritatively in their own hearts in the first place, they cannot avoid, as was required under the Law of Moses, the earnest Christian sire, to teach them diligently unto their children; neither of talking, of what so inimately concerns our salvation, at proper times and under a fresh feeling of their value to their children and families. For as is written: "Of the abundance of the heart the mouth speaketh."

But, on the other hand, if parents fritter away their heavenward influence, their true and their talents upon the gratifications of a poor, fleeting world; if they sadly choose to take up their rest here; if the cares of this life, the deceitfulness of riches, and the love of other things be permitted to choke the good seed sown in themselves, or beguile unadvised care and attention, to the neglect of the more things needful, it is not likely that the dear lambs, with which they have been responsibly entrusted to train up, less for earth than for heaven, will learn to fear the Lord from their early years, because of the want of true hearted faithfulness and prayerfulness in the parents. For then there will be room for grave fears, as is written: "The shepherds have eaten sour grapes, and the children's teeth are set on edge."

That there are well concerned and religious parents who have endeavored to look to the Lord in the training of their dear children; who have asked counsel of Him, that they might be enabled to direct unto the new covenant of life, and to bring them up in His nurture and admonition, but who have not seen as they wish the fruits of their labor and care, is a practical argument that the duty of those entrusted in some measure with the care of immortal souls, as a sort of under shepherds, does not lie in the direction, nor is embraced in the requisitions herewith represented. Children too have their part of the responsibility to bear; and may, through wilfulness and disobedience, become prodigals from the right way of the Lord. We read of the Scripture examples of Eli and Samuel; the children

of both of whom, walked not in the ways of Truth. But while the house of the former was severely judged, because he only advised against wrong, but did not restrain; the other escaped reprimand, so far as we know, though his sons "walked not in his ways;" no doubt in that he endeavored to act uprightly in respect to the Lord.

It is the fervent desire of the writer, to encourage and strengthen the hands of parents, whatever be the discouragements or the difficulties they may have to contend with in the training and restraining of their precious charge. Believing that as they seek diligently after a wisdom better than their own, and which is profitable to direct in every good word and work, firstly for themselves, that they will thus be helped and made instrumental to the godly rearing of their children in the way they should go, unto their becoming useful in their day and generation, as that both may receive the welcome salutation at last, "Well done, good and faithful servant;" "Eat thou the fruit of thy doings."

Lead Poisoning from Tin Dishes.

Attention has recently been called to a new risk of chronic poisoning by the old enemy, lead. What we call "tin" vessels—that is, sheet iron coated with tin—are in daily use in every household in the land. They are cheap, durable, and convenient, and have been considered perfectly safe for the thousand culinary purposes to which they are devoted. They are safe if the tin plate is honestly made; but unfortunately this is not always to be counted upon. Tin is comparatively cheap, but lead is cheaper; and an alloy of the two metals may be used in the place of the dearer one, with profit to the manufacturer, though with serious detriment to the user. The alloy is readily acted upon by acids, and salts of lead are thus introduced into food.

The Michigan State Board of Health has lately been investigating this subject, having been led to do so by a letter from a physician, who found that certain cases of what had been taken for cholera were really *paralysis agitans*, which could be traced to this kind of lead poisoning. Other cases were brought to light in which children had died of meningitis, fits, and paralytic affections, caused by milk kept in such vessels, the lead in the fluid having dissolved the lead. Malic, citric, and other fruit acids are of course quicker and more energetic in their action upon the pernicious alloy. The danger is the greater, because the lead salts are *cumulative* poisons. The effect of one or two small doses may not be perceptible, but infinitesimal doses, constantly repeated, will in the end prove injurious, if not fatal. Analysis of a large number of specimens of tin plate used in culinary articles showed the presence of an alloy with lead in almost every instance, and often in large quantities. It is safe to assert that a large proportion of the tinued wares in the market are unfit for use on this account.

That we may not be accused of exciting fears which may be groundless, we will inform our readers how they can settle the question for themselves by a simple and easy test. Put a drop of strong nitric acid on the suspected "tin," and rub it over a space as large as a dime. Warm it very gently till it is dry, and then let fall two drops of a solution of iodide of potassium on the spot. If lead is present

it will be shown by a bright yellow color, due to the formation of iodide of lead.

It is stated by Dr. Kedzie that a peculiar kind of tin plate, the coating of which is largely made up of lead, is coming into general use for roofing, eaves troughs, and conductors; and it is suggested that much of this lead will eventually be dissolved and find its way into household cisterns. Susceptible persons may be poisoned by washing in the lead-charged water, and all who drink it, even after it is filtered, are in danger of chronic lead poisoning. There is also risk in the use of glazed earthen vessels, if, as is often the case, the glazing contains oxide of lead.—*Boston Journal of Chemistry.*

'Twas only a Bone.—Aye, and only a very small one, too—just a tiny fish-bone, but it well-nigh cut short the life of one of the party at the supper table. Probably the friend of whom I write was talking at the time of eating, which is rather hazardous, during the fish course, at any rate. Feeling there was something amiss, the friend in question hastily left the table, in order, if possible, to dislodge the tiny bone which had stopped in her throat. Not reappearing as expected, those previously seated with her followed, and to their utter dismay, found her in the most pitiable state imaginable. Quite unable to articulate, and at the same time equally unable to free herself of the encumbrance, she was becoming more and more exhausted, so much so that she felt that, unless in some way or other relieved, she would die! To use her own words, she thought that in a few minutes she would fall at their feet a corpse! Under the circumstances no doctor could be obtained, on account of distance. Meanwhile her face and throat swelled to an enormous extent, and became almost black, so greatly was it discolored. It was at this last crisis, and with but one possible resource, she looked up, and the power of speech being gone, mentally cried to the Lord for help. In one moment after that heart-cry, she said, she felt relieved. From that instant a favorable change took place. The crisis had passed.

I confess, dear reader, that I left the house of my friend with a twofold feeling. First, of the Lord's wonderful condensation and goodness, in that He, "the high and lofty One that inhabiteth eternity," should be so merciful and so gracious in lending a listening ear, and so interesting Himself in the mean affairs of His creatures, so sinful, worthless, and undeserving as they are; and secondly, I thought of our extreme folly, in that, with such a friend and deliverer so ever constantly at hand, and with such numberless and encouraging exhortations to betake ourselves to Him at any and all times, we should be so "slow of heart to believe," and so loth to avail ourselves of privileges and advantages so rich, so full, so unspeakably blessed.—*Ep. Recorder.*

Australian Salt Lakes.—An interesting description of the salt lakes of Australia is given by a writer in the *Sydney Empire*, who, speaking of the salt lakes and mineral springs on the Paroo, says: "These wells are a real curiosity. Mounds of earth rise about ten or fifteen feet over the surface, no doubt thrown up by the force of the water; they form a kind of oasis in the wilderness, and have saved the lives of many a weary wanderer.

These mounds can be seen for miles. The water is very clear and soft. It is impregnated with magnesia, soda and alum. It is very palatable to drink, and I think very wholesome. The water does not flow after touching the surface; but, as soon as it overflows the fort-like basin, sinks into the earth. The alum and soda crack under your feet, as you walk around these wells, like frozen snow. Sand storms occasionally set in with great violence, sweeping along and drifting like snow, but in this it differs, that nothing is proof against its penetrating propensity. It enters your eyes, your nose, your mouth, your ears; even your very skin seems gritty from it; and everything is covered with it. It enters all culinary matters, so that while it lasts you are continually eating, drinking and wearing sand. As an instance the first evening I entered the Paroo, one of the sand storms set in, and, after viewing one of those beautiful clear lakes, in which we thought we could quench our thirst, having had nothing to drink since the morning, what was our surprise, I might almost say despair, to find that the water was salt as brine. The driving sand beat with such fury that we could not see each other on the road. Our party numbered five, and I took the bridle and saddle off my horse and let him go to shift for himself. I lay down, putting the saddle between myself and the storm for shelter. The morning at last came, and I found at about five miles distant my party, horse and water."

The precious Light which shineth in the heart, is the everlasting Day of God, in which he walks, and in which he works. Blessed are those that walk with him, and work with him; they can tell of his mighty acts, and speak of his wondrous works. Those that walk in this Light, and are become children of this Day, are witnesses of the true everlasting worship, which is in the Spirit and in the Truth. Such are come to the substance and end of all the legal administrations and temple worship, which consisted much in daily killing, and daily offering of bullocks, and rams, and lambs, &c. Now those that are come to the worship in spirit, witness a daily dying, and a daily offering, till death is known. Such know, that it is easier to kill a bullock or a ram outwardly, than to kill or mortify the beastly nature within; and it is a greater work to witness the will wholly resigned up into the will of the Lord, and the thoughts and imaginations brought down into the obedience of the cross, than to perform the outward part of worship, commanded in the law. I testify to all, that those who know not the beastly nature slain and offered up in themselves, and their thoughts and wills subjected, are not come to the end of the law, nor from under it, nor to the one everlasting offering, Christ Jesus.—*William Sheevec.*

Do not Face the Light when at Work.—Statistics kept by oculists employed in infirmaries for eye diseases have shown that the habit of some persons in facing a window from which the light falls directly in the eyes, as well as on the work, injure their eyes in the end. The best way is to work with a side light, or, if the work needs strong illuminations, so that it is necessary to have the working table before the window, the lower portion of the latter should be covered with a screen, so as to have a top light alone, which does not

shine in the eyes when the head is slightly bent over and downward toward the work. In the schools in Germany this matter has already been attended to, and the rule adopted to have all the seats and tables so arranged that the pupils never face the windows, but only have the side lights from the left; and as a light simultaneously thrown from two sides gives an interference of shadows, it has been strictly forbidden to build school-rooms with windows on both sides, such illumination having also proved injurious to the eyes of the pupils. We may add to this the advice not to place the lamp in front of you when at work in the evening, but a little on one side; and never to neglect the use of a shade, so as to prevent the strong light shining in the eyes. This is especially to be considered at the present time, when kerosene lamps, with their intensely luminous flames, are becoming common.—*Burlington Hawkeye.*

HYMN.

These are all the gifts, O God!
Thine the broken bread;
Let the naked feet be shod,
And the starving fed.
Let Thy children, by Thy grace,
Give as they abound;
Till the poor have breathing-space,
And the lost are found.

Wiser than the miser's hoards
Is the river's choice;
Sweeter than the song of birds
Is the thankful voice.

Welcome smiles on faces sad
As the flowers of spring;
Let the tender hearts be glad
With the joy they bring.

Happier for their pity's sake
Make their sports and plays,
And from lips of childhood take
Thy perfected praise!

John G. Whittier.

GROWING OLD.

And now I know I'm growing old—
I saw to-day my way hair
All mixed with silver, and am told
I shall no more be young, or fair.

As I look back along the way,
Where peace and plenty have been mine,
Through faith I look to Him and say,
"Thy trust and wait by grace divine."

The busy scenes of earthly life,
All filled with plans and hopes and fears;
And earnest toil, and manly strife,
Make up the sum of all our years.

Like floating clouds in summer sky,
Or vapor rising from the sea,
We pass from earth to Him on high,
To spend a long eternity.

And when no more the radiant sun,
Shall shine for me in the past;
With faith complete and duty done
May Christ and heaven be mine at last.

Christian Secretary.

The last German triumph in chemical science is a method of keeping fish fresh by impregnating it, by means of hydraulic pressure, with a weak solution of salicylic acid, a new antiseptic, originally extracted from willow bark, but since found in large proportions in meadow-sweet, (*spiraea ulmaria*). The fish is then packed in boxes and covered with gelatine, to prevent its drying. A short soaking in water restores it to pristine freshness.

For "The Fri

The following document explains the one that called it forth, it therefore needs further explanation than to say, that "Association," I understand, is composed of young members of our religious Society, the southern part of Kansas, who are desirous to improve themselves in literary knowledge and especially in a knowledge of the appropriate writings of Friends. The "conference" held under the sanction and oversight of Quarterly Meeting's Committee.

There is nothing new in the "Address," it is cheering to find such evidence of religious soundness and zeal among a portion of rising generation in the Society, and it justifies the hope that there will yet be witnesses in many places, the "battle ordered" "young men, the princes of the provinces

An Address on Plainness of Speech, issued by The Young Friends' Christian Association of Kansas, held at Spring River, First mo 5th, 1879.

In the Programme of a Bible School Conference, recently held in one of the Quarterly Meetings of Kansas Yearly Meeting, appeared the following as to time: "Dec. 27 and 28 "Fri. Dec. 27," and "Sat. Dec. 28." The Young Friends' Christian Association of Kansas, desiring by this, to call the attention of its own members, of all young Friends, and of elderly Friends, who are concerned for the maintenance of the truth, as held by all our Friends, to this public display of the departures from the Orthodox practice of the Society of Friends. We do this, that we may express our disapproval and condemnation of such departures, and that we may faithfully bear our testimony, that however much the "offense of the cross" may have ceased, such as have gone out into the spirit of the world, yet to such as are of a "pure and tender conscience," there has been no abatement of Truth's requisitions concerning the testimony so long borne by Friends, for "plainness of speech." By the divine call to purity and truth, the entire body of early Friends; they were obedient to the teaching of Christ, were led to adopt that simplicity in the use of language, which for more than two centuries, has been found by experience to be testimony required of all Friends, who not by profession only, but in reality were willing to submit to the teaching of the Holy Spirit.

We present the subject for consideration as follows:

1st. The use of Thee and Thou, and the disuse of you for a single person.

2nd. The disuse of all flattering or complimentary titles.

3rd. The disuse of the names of the days and months, and the use of the proper numbers.

As to the 1st, Friends believe that Thee and Thou to one person, is not only strictly true, but a proper use of language.

In support of this position, George Fox, with the assistance of John Stubbs and Benjamin Furly, wrote and published a book showing that the usage of thirty languages, was in unity with the practice of Friends. Thee and Thou is the language of the Bible; it is the language used in addressing the Deity, by those who do not use it in common conversation. Friends believe that you is not properly singular, as it is always used with a plural verb. To address one person as more

one is not true. As a rhetorical fiction, by long use have lost much of its force, the perpetual repetition of a falsity can make it true. The use of the plural to one individual, had its origin in flattery, as a term of flattery, a corruption (of age) that "entered the world through" and we suggest, that the true measure of pride, the world and the unregenerate takes in it now, is found in the weight of the cross, requisite to maintain the simple and Thou to a single person.

In the 2nd division, there has been no mention by lapse of time of the force of the money of Friends on this point. No objection or excuse should stand for a moment, against the commandments of Christ, "That all no man Father (as a title of complicity), and that we be not called Rabbi or teacher." Mat. xxii. 7-10.

His condemnation by our Saviour, of the false titles of endearment, authority, or honor, has always been justly regarded by Friends as demanding the disuse of all such titles; as Sir, Master or Mister, Madam, Miss, Your Worship, Grace, Reverend, and all titles that imply a situation of authority over others, which is not true. The Friend who submits to the guidance of the Holy Spirit, can adopt the language of Elihu, (Job ii. 21, 22) when "constrained by the Spirit he said, 'Let me not, I pray you, accept man's person, neither let me give flattering titles unto man, for I know not to give titles; in so doing my Maker would take me away.'" The subscription of oneself, as an "humble and obedient servant," is also forbidden by the spirit of our Lord's commands above given.

The ground of the 3rd proposition is, that the names of the days of the week, and of the months, were given in honor of gods, and is a relic of heathenism, needful and indecorous, opposed to the tenor and, as well as to the letter of those commandments addressed to the Israelites, which made the use of the names of false gods, the slightest approach to idolatrous practices. We desire to impress the fact upon the minds of all Friends, that without exception, the objections now urged against the principles, sealed as they were by the merits for conscience' sake by our forefathers, are the objections long ago urged by our Lord against them. We believe that they arise now from the same spirit of enmity against the pure truth, from which they arose first, and that as such they are entitled to weight now. We commend to your consideration, the words of that precious Friend on Barclay, when writing on this topic in 1766. "Truly it is a striking and unanswerable fact, that there has not been one individual who has risen to any eminence for reasons dedication in our Society, but has had to tread the narrow and strait path." We want that there are exceptions to the above at all times, and the desolations and divisions, and down in our land, of which the end is yet, bear ample evidence, that the broadening of the path is scattering more than it gathering to Christ. The lightness and weakness, resulting from the efforts so widely prevalent, to supply spiritual need by carnal expedients, shows "that they are repeating the folly of the priest, who undermined the temple in his eagerness to get coal to keep its fires burning." It is cause for deep re-

gret and sorrow to many Friends, to know that there are those in our Yearly Meeting, in responsible positions, who use the words, "Friday," "Saturday," "you," "Mr." &c., when in the company of those not Friends, as though they had forgotten they had ever been Friends.

Character as a Friend attaches to the use of the Plain Language as the observance of the First day of the week does to the general Christian character, and we are very sure that far more is lost than gained for truth, when Friends so far forget, or shun this testimony as to depart from it. It should always be borne in mind, as of the highest importance by all Friends, who are concerned that the divine purpose in calling us out of the world, to be a separate people may be fulfilled; that all those whom the Lord has most abundantly blessed; who have left a record of their experience; have testified that the bearing of the cross in this matter, was a duty required by a pure conscience. There are many who still feel thus in regard to this testimony. When we call to mind the character, spirituality, integrity, self-denial, ability, and sufferings of the early Friends, and contrast these with that character which is striving to trample down this testimony, we find that nothing is manifest to warrant us in discarding the ancient principles, and following modern innovators.

Dear Friends, you who are tried by the persistent intrusion of innovations and departures, as in the programme referred to, and others equally flagrant, we desire to hold forth a word of encouragement.

We believe the time has fully come, when Friends should calmly, but firmly protest against their further introduction. We doubt not that the effort to maintain the truth with Christian earnestness will bring trials, but they who bear the cross, shall wear the crown.

The more faithfully Friends stand for sound doctrine and practice, the sooner will this trial be past. Stand firm therefore, and earnestly contend for the "faith once delivered to the saints;" and we believe, that we shall yet know our Zion to be a quiet habitation. "Stand fast therefore in the liberty, wherewith Christ hath made us free, and be not entangled again with the yoke of bondage."

Some significant facts were recently brought out in a county court case at Rochdale, England, which suggest some reasons for the successful competition of American cottons with those of English manufacture. A suit had been brought to recover a sum of money "for sizing twenty-seven warps" for the defendant, a cotton manufacturer. The judge did not understand what "sizing" meant. He asked for an explanation. The plaintiff asked that the court might be cleared while he answered the judge. He was evidently ashamed of the business. The judge would not comply with his request, and he had to explain that "sizing" was "loading" or adulteration of cotton goods. The size consisted of flour, China clay, Epsom salts, chlorate of zinc, chlorate of magnesia and glue. This was put into the cotton to the extent of 70 per cent, and he had used the size to as high an average as 130 per cent. Indeed, he confessed that there were manufacturers who adulterated their goods with this size as much as 230 per cent. When the witness first commenced business, twenty years ago, he said flour alone

was used for sizing, in the proportion of 1 to 20, or about 5 per cent. — Jennings, too, writes to the "World" as follows: "A lady friend of mine was told to-day, on inquiring for some calicoes for children, that the 'Americans were the best—they could be worked on the sewing machine more easily than the English.' 'Why?' 'Well, they are softer. The English goods are stiffened up with size, and consequently do not lend themselves very readily to the sewing machine.'"—*Christian Union*.

Facts and Inferences.

We are accustomed to think that there is nothing so simple as a fact, and nothing so easy as to report it correctly. To state what has been seen, heard and known seems so plain and straightforward a matter that if there is any inaccuracy in the statement it must have proceeded from some intention to deceive. It is either true or untrue, and he who utters it knows which, and is responsible accordingly. Such reasoning implies a confusion of mind with regard to facts and inferences. A very large proportion of all statements are mere inferences—that is, men infer from something else that such things are so. They may be perfectly correct, they think they are, and could they be content to leave it just there no harm would ensue. But instead of this, they declare these conjectures to be veritable facts, and insist that others shall accept them as such. If there is hesitation they feel their character for truthfulness impugned, and resent it accordingly.

This is, indeed, the chief cause of all the controversy and disputes that breed so much alienation and ill feeling. From the most simple things in life to the gravest and weightiest, the habit of asserting, as truths not to be questioned, is a prolific source of trouble. Take, for example, an average good humored crowd, all eager to see the same sight, or to enter the same door. Each one would probably believe and declare that he had not pushed his neighbor, and feel injured if his assertion was doubted. Yet this is not the simple matter to determine that it may seem. There are all degrees of pushing, from the smallest pressure to the most violent shove. It may be simply thoughtless; it may be selfishly malicious. Probably every one present has pushed to some extent; not many, perhaps, intentionally; some not even consciously, but from eagerness and sympathetic action, it has been involuntary. In denying the act, therefore, he challenges contradiction and invites dispute, whereas if he confined his statement to the fact of his own unconsciousness of the act, he would be both more truthful and more polite, while the slightly ruffled feeling would quickly subside.

So in all our social relations; by understating rather than overstating, or by uttering the simplest facts alone as facts, and the rest merely as our own inferences, conversation would be purified of much of its heated and unwholesome atmosphere. It is very difficult to keep this dividing line in view, to see clearly where fact ends and inference begins. They seem to merge into one another insensibly, and we claim as much belief for one as for the other. But in proportion to our success in separating them, will be our real trustworthiness. In relating what we have seen and heard, the mingling of these two creates unavoidable distrust. The many

frauds and impostures that have been carried on under the name of spiritualism, have thriven on this confusion. People see wonderful things, and, failing to discern any material agency, they declare there is none. The first assertion, i. e. of what they saw, may be a fact, but the second is only an inference, which they are at liberty to accept for themselves if they please; but they have no right to feel hurt or injured if others, reasoning from the same premises in a different way, prefer a different conclusion.

Sometimes these inferences are so obvious and natural that they appeal at once to the common sense of every one, and are accepted without hesitation. Yet even here the distinction should be borne in mind. A person goes out of doors, for example, and sees that the ground is wet, water is running from the spouts, pedestrians are drenched, and from these facts he infers that it has rained. The inference is so reasonable that no one will dispute it, yet it materially differs in nature from the facts which he saw and which led him to the conclusion. Similar effects have always followed rain, therefore they are at once accepted as proofs of it; yet, were they questioned and other causes assigned for them, it would be fair matter for investigation. On the other hand, if upon going out the same person saw the rain actually descending upon the streets and pattering upon the roofs, his statement that it was raining would not be an inference, but the utterance of a simple fact.

Perhaps nothing would so much tend to change the bitter controversy to amicable investigation as this coming down to first principles in our statements. When anything one says is questioned, the first thing to do is to clear away the inferences that are embodied in it. When that is done the chances are ten to one that the facts, thus simplified, will be accepted, and we can then together compare and examine the inferences that each party draws. No dispute can continue under such treatment; it will be crushed in the bud, but truth may thus be discovered which no amount of wrangling or contention could ever disclose.

Another most important effect of keeping this distinction ever in mind is the safety it guarantees against one's own delusions. When we find out what is fact, and what is inference, we shall know what to accept and what to question. It is he who thus marshals the forces within him for observation and scrutiny that will be the most cautious in his assertions; and the statement of one who is perfectly willing to submit them to criticism will always be the most trustworthy.—*Public Ledger.*

“Come Unto Me.”—A German duke lay dying. Anxious about his soul, he spoke to some around him. One advised him to pray to the Virgin, another to Saint this, and another to Saint that, when a trusty, godly confessor said, “Your Highness, *straight forward makes the best runner!* Go direct to Christ, and turn not aside for Virgin, saint, or Pope. Jesus says, ‘Come unto me,’ and ‘I him that cometh unto me, I will in no wise cast out.’ We need no spokesmen, nor saint, nor angel between us and our Saviour. He who bids us come will bid us welcome. There is no impertinence in coming to the throne when we are called; but rather is it unmannerly

to go to a servant when the Master invites us to Himself.”

It is the standing wonder to every visitor to Pompeii, how the people could live with such narrow streets; or how the carts or carriages, whose ruts he sees deeply worn, in the stone pavement, could find a place to pass each other. But as he comes to the forum, he sees that ample space was provided for an out-of-door mass meeting. At Ephesus one can easily trace out the several forums, and the *agora*, which we commonly translate by “market,” or market place; where Demetrius probably gathered those of his craft, and whence the crowd rushed Paul’s companion into the theatre close by, where they cried “Great is Diana of the Ephesians!” This market of the Greeks, and one sort of forum of the Romans, and one sort of forum of the street, answered to what is here called “street.” It was where the Pharisees loved salutations; where the children sat whom Jesus likened to the men of his generation; where Paul and Silas were dragged before the rulers at Philippi, and where Paul discoursed daily with the men of Athens.

At the present day, those Orientals who have learned English have in their mind so firmly the distinction between an oriental narrow street, and a wide occidental street, where people may assemble in crowds, that they explain the latter sort by the word “market.” The writer has talked with many young Syrians, who knew English tolerably, who could not be readily brought to believe that “street” in English means the same thing as their word for street. The idea of people assembling in the street seemed absurd to them. On the other hand, the English word “market,” to them, meant nothing more than a place of assembly, or place where people were in the habit of going in order to meet the business men of the town; much like a modern club-room, or reading-room. That it is a place to sell provisions or wares seems to be the last idea that enters their minds. Such are the ideas they work out for themselves, from the native use of their own words, and the habits of their country.—*J. H. Hall.*

It is very precious, not only when we meet together, but at all times, to feel our minds exercised by, and meditating in, the law of the Lord, which is spiritual. Those that are exercised in this law of the Spirit of Life, and walk in obedience to it, no evil nor temptation shall prevail against; but they will witness salvation for walls and bulwarks. Some were witnesses of old that the law of the Lord was pure and perfect. Many are witnesses of the same now, and know it so by the operation of it; and know themselves subjects of that law which is spiritual within, which judgeth every vain thought, and every idle word, and bringeth down every vain imagination.

It is a blessed state, to be meditating in this law day and night; for I testify, that this law of the Spirit of Life within, was man’s rule, whereby he walked innocently and uprightly, before transgression entered, and before outward characters were invented, or before any outward law was written or engraved on tables of stone. To this again are many called, and many are coming and come; and for ever blessed are those that walk therein, and are ruled thereby.—*William Shewen.*

Amber.

The following interesting facts in regard to the origin, location and method of collection of that beautiful substance known as “amber” are collated from an article prepared for *Town’s Journal*. From it we learn that it is found on the western half of the coast of East Prussia, and is that immemorial fossil mineral of which the Phœnicians, those old Hebrews of antiquity, managed to keep monopoly up for centuries by spreading false stories about the place of its discovery. This natural treasure, once prized as much as gold, is an extremely fluid resin which was first formed in that period of creation which we call the tertiary, from certain coniferous (varieties of the mighty forest which then covered great tracts of the Northern continent). Continual discoveries of small creatures, imprisoned in amber, and frequently caught in the most animated positions, indicate the flow of the plentifully excreted resin. In their first cradle, the soil of the amber forest, and so, by the agency of some natural process which we do not yet thoroughly understand, these masses of resin were carried some distance off, and deposited at the bottom of the tertiary sea, which, little by little, enveloped them in a stratum of bluish clay marl, completed the gradual process of their preservation. This now eagerly sought “blue clay,” the modern amber gold-vein, covered over the strata of the latter (diluvian and alluvial geological periods, is now supposed to meet the entire peninsula of Samland, which is thus characterized as having risen from the ocean. In the northwestern portion of the peninsula its presence is scientifically demonstrated over, perhaps, one hundred and twenty square miles, and at varying depths, it bestrides the coast hills as much as forty feet or more above the water. Granting to this stratum a moderate thickness of ten feet, we have here a subterranean treasury of stupendous value. Where did the Baltic sea get its provision of loose, floating amber which appeared in the world’s markets before Nero’s famous amber triumph, and which seems even now irretrievably lost? Clearly nowhere else than in this same blue amber stratum, which stretching northward, as also some fifty miles westward toward Dantzic, under the ocean has been, through some grading of the latter, laid bare and gnawed away by the action of the stormy waves. While in some places the process of collecting is carried on by dredging the waves act here on a large scale just as heavy dredges on a smaller scale in the stratum at Schwarzwort, where dredges are used entirely. Here, when the wind is in the right quarter, the mineral which has been torn from its bed is driven toward the land, along with its inseparable companion the sea tar or amber weed, and is fished out with bag-nets by the villagers, whom its appearance calls in haste to the beach. During this operation the men, standing breast deep in the water, shake out the contents of the nets to the women and children, who stay further back to be by them more thoroughly examined, a work which, especially in the late autumn when the sharp northwest wind turns to spray, which often washes over their heads, is icicles, can hardly be called sport. The large pieces of this valuable mineral, however often sink wrapped in masses of tang, far on the side of the surf, stopped by big stones, which latter they get covered through out

of the waves. To get at this booty the hunters wait until complete calm sets in and then begin the other method, hither-stationary—the so-called amber sneering, or long spears with tips of different use, or in case of necessity, heavy, two-edged, crooked forks. One party turn the incumbered stones, while another set, with arched long bag-nets, catch and draw out amber wood. An unusually rich deposit is this kind—in this case, probably amber has been driven up for centuries and red with heavy blocks and rubble—exists in a tract of perhaps six hundred paces in length and four hundred in breadth, at the northwest point of Brustevort, which is exposed to the existing currents of all the seas and winds. To get at this reef or riffer, which is greatly valued on account of beautiful color and quality, all sorts of experiments have been tried. As the above-mentioned manipulation of spearing proved inefficient, on account of the superincumbent weights of stones, rec-course was had to heavy cranes and hand screws, by means of which colossal rocks were heaved out upon rafts, was not successful. But, at last, a simple French mechanism, well adapted, with rigging, were sent to Brustevort, where they formed a corps of skilful divers, and this had proved a success.

Selected for "The Friend."

Account of the Yearly Meeting of Philadelphia, of 1829.

From the Memoir of Hannah Williams.

Seventh-day morning, met at 9 o'clock, shortly after the meeting settled, men Friends attended as that Thomas Shillitoe wished to visit to women's meeting; which being attended with he came, and was favored to address the youth with an earnest call, which he believed would not always be extended to children of this people; but if disregarded, not being willing to deny themselves and come forward in the Lord's cause and righteousness, that the very essence of the street would cry out, and those in high-ways and hedges would be called in to make their ways—even the places of the children of professing Abraham. I thought fervency and earnest travail of this faith-servant did indeed claim the very close attention of all. I did believe it to be a good call. He then addressed the female heads of families; encouraged them so to manage their domestic matters, as to have more quiet for their families. His mind had often been made to see the bustle and hurry many were made to sit down at all; that in consequence of their tables being furnished with such a variety, they were much engaged in cooking; that three times a day to cook no victuals, kept the female head and her up (if she had any) almost all day cooking and washing dishes; that time for retirement and reading was precluded. He gave solid advice respecting silence before meals, that as his practice was carefully observed with parts of gratitude for bodily refreshment, their souls would sometimes be spiritually refreshed. He mentioned, also, his exercises on account of the manner in which mothers dress their children in infant life; though to appear, tolerably consistent themselves, yet, by their conduct in these matters, proved they were not abiding under the power of the cross themselves. Mentioned the little boys,

when at an age to put on buttoned clothes, his feelings had been hurt to see how fantastically their clothes were made, so many needless buttons, &c.

After he withdrew, the way was left open for many exercised minds to obtain some relief. Sarah Cresson strengthened the concern by adding her portion, believing, as she said, the time was coming that the Babylonish garment would be searched out; that though some might say these were little things; yet they were an outward and visible sign of inward want; encouraged heads of families to be faithful to those placed under their care. Take time to sit down in retirement with their little ones, that so a blessing might attend. She expressed a hope, that by discharging their duty in these respects, a little army would be raised up for the Lord, from among the youth in this Yearly Meeting, who would stand faithful for the law and testimony. There was much solemnity over the meeting under these communications; no doubt it was the language of the Spirit to the church, through these instruments.

There was one part of dear T. Shillitoe's concern which I omitted. In speaking of the children's dress,—it prepared the way for departures as they grew up, and often was the means of introducing them into unsuitable company, whereby there were outgoings in marriage.

Power is in its nature indescribable. It is known simply by its results. Gravitation, that greatest of all material powers, ceaselessly active, everywhere potent, is wholly beyond our research, or even our conception. Where are those cords, stronger than steel, which bind the planets to their centres? Where are those unseen ties that like a universal network envelop every atom in the air, and makes it fall to the earth, and not merely to the earth, but in a direct line toward the center of the earth, though it be thousands of miles away, and can never be reached? It seems an emblem of God, filling all space, operating through all matter. If the dream of astronomers be true, that not only secondaries surround their planets, and planets their suns, but that suns revolve around the centre of immense systems, and all these centres through the immensity of space move round one great centre, who can even conceive the magnitude of a force that can thus operate through infinite space with precisely the same law of attraction for vast worlds and for infinitesimal atoms? It is a force never seen, and yet it operates alike in the sunshine and the dark. It is never heard, and yet it sends its myriads of worlds singing and shining on their way. Think of that magnetic power which makes the steel filings, though in a mass of dust and rubbish, and clippings of tin and brass, leave them all and fly up and kiss the magnet. It touches that pivoted needle, and lives and treasure are secure upon the stormy ocean in the darkest night by its unerring guidance. The winds blow ever so fiercely, the cold comes ever so freely, the waves roll ever so furiously, and the vessel pitches and sinks as though it would be submerged, and yet that strange influence, unseen, unheard, unfelt even by the most sensitive nerves, holds the needle in its place. Who can tell what is power? We see it in its effects, we measure it in its results. So with spiritual power. We cannot tell "whence it

cometh, or whither it goeth;" but it breathes upon the human spirit—the stormy passions subside; falsehood, fraud, lust, and avarice disappear; and truth, purity, meekness, and love reign supreme in the soul. It is a transmutation beyond what the philosopher sought in the fabled stone whose touch would transmute into gold. It is a new creation from the breath of Him who created all worlds and breathed into all spirits. Spiritual power is not beauty of presence nor dignity of form. It is not learning, nor rhetoric, nor logic, nor oratory; but it can use these for its one great end. It can burn and shine in the highest periods of the most eloquent speaker, and it can thrill in the accents of the unlettered man. It can invest the words that drop from the mother's lips, and it can wing the lisping of the little child. It can use all there is of a human being, and of his acquirements, for the glory of God and for the advancement of his Church.—Bishop Simpson.

THE FRIEND.

SECOND MONTH 15, 1879.

We have received a letter from one of our subscribers in a distant State, requesting the discontinuance of his paper on the ground of dissatisfaction with its teachings on the great subject of man's salvation. His own views are evidently identical, or nearly so, with those advocated in the Tract called Archibald Boyle, which was commented on in No. 24, of our present volume; according to which salvation is in our reach at any moment we choose to stretch forth our hand and take it, by exercising faith in the atonement of our Saviour, which faith we have in our possession, or it will be given us of God, whenever we choose to use it. He objects to our teaching, that "we must be born again," in connection with the doctrine that "any faith we can put forth is only intellectual and therefore superficial," as including persons "to resign themselves to an unsatisfied, anxious life."

We notice this letter in this manner, because we consider it as a fair exposition of religious views which have largely spread in our Society of latter times. They have caused in ourselves some searching of heart, with a desire not to be found in opposition to anything which bears the impress of the Divine sanction. It is easy to see how attractive they may prove to those who can persuade themselves of their truth. When the Spirit of Christ brings us under condemnation for sin, and we feel the terrors of the Lord for disobedience, and His cleansing baptisms, which are compared in the Scriptures to fire, and are hard to endure; what a relief it would often be to us to believe, not only that a door of reconciliation with the Father was opened to us through the atoning sacrifice of the Saviour, but also that it was not needful for us to submit to such suffering, since Christ had borne all our sufferings for us. Is it wonderful that many, even of those who would not willingly go astray, should incautiously imbibe the doctrine that no such tedious and trying process—no such fiery baptism—was necessary to be endured, as they had formerly supposed; but that that anxiety safely cast it all off, be freed from all might and care, and walk perpetually in a sunny pathway?

We have not been able to find sufficient evidence of the truth of this self-pleasing theory, either in the language of the sacred Scriptures, or in the dealings of the Lord with those who, having come out of great tribulation, have washed their robes and made them white in the blood of the Lamb. Our Society has ever firmly held that all merit and all worthiness is in Christ alone, that our salvation is of pure mercy, and that we have nothing of our own to trust to; but it has held with equal firmness the truth, that all who are saved must be brought into communion with Christ, into a participation in His holy, pure nature, and that this is effected in man by the operations of His own Divine Spirit: that while our sins are forgiven for the sake of Him who died on the cross that we might obtain eternal life, yet that we can have no part in that salvation unless He wash us; that this washing is that baptism which is declared to be "with the Holy Ghost and with fire;" that the corruptions of the heart must be burnt up with His "unquenchable fire."

It was to bear testimony to this practical way of obtaining a sure salvation, that our Society was raised up in the beginning. Its early members endeavored to draw people off from a dependence on outward rites and ceremonies, or on any works of their own, and to fix them on Christ Jesus, both in his outward coming in the prepared body, and in his second coming in the hearts of men as a sanctifier and redeemer from the power of sin. Their experience and the effect of their teaching, were the very reverse of that "unsatisfied life" to which the letter of our subscriber refers. On the contrary, many of them have testified that through patient endurance of the refining operations of the Lord, and obedient following of the guidance of his Holy Spirit, they came to experience a state of peace and settlement, and true satisfaction of mind, looking unto the Lord for preservation from day to day, and knowing their sins to be forgiven through faith in His blessed Son—a faith which was of the operation of God. Yet they were preserved from presumptuous security, fully accepting the warning of our Saviour—"Watch and pray lest ye enter into temptation;" and of His apostle—"Work out your own salvation with fear and trembling." "Let him that thinketh he standeth take heed lest he fall."

We desire that our distant friend, and all those among us who hold similar views, may seriously consider the advice given by Thomas Stride to one of his correspondents in the year 1715: "And now, dear friend, I recommend thee to God; exhorting thee to believe in His Grace given thee through Christ Jesus the Lord; even in the ingrafted Word which is able to save thy soul. * * * For through faith in the true Light, and walking therein, is not only the true church-fellowship, but also there, and not otherwise, doth the blood of Christ the Son cleanse from all unrighteousness."

SUMMARY OF EVENTS.

UNITED STATES.—The total tonnage of anthracite coal from all the regions for the week ending on the 1st inst., was 311,073 tons, against 275,296 tons in corresponding week of last year. For the coming year the trade is said to bear an unusually promising outlook. It is generally conceded the amount of coal in stock is unusually light.

There are 179,294 miles of telegraph wire in this country. Britain has 108,000 miles; Russia, 31,000; France, 25,000; Canada, 20,000; Germany, 19,000.

An elaborate report on Alaska, by a special agent of the Treasury Department, makes it appear that the country is far from worthless, and besides valuable timber, and fisheries, possesses rich mines of gold, silver and copper. In the year 1873, the United States exported paper and stationery, to the value of \$662,332, and the imports amounted to \$1,326,400. In the year 1878, the imports were valued at \$135,487, and the exports increased to \$3,312,341.

Over fifty thousand tea plants have been distributed lately in the Middle and Southern States, by the Bureau of Agriculture. In three or four years, these plants should be large enough to permit a full picking of leaves.

Cotton warehouses are to be built at New Orleans sufficient to accommodate 2,000,000 bales of cotton each season, and a site has been selected with a river front of about half a mile in length. Every bale will be exposed to view, and each one can be taken out, without removing any other; these will be handled by travelling hydraulic cranes. The yards will be covered by glass roofs, and the entire levee, by an iron roof. There will be eight presses, each capable of turning out 2,000 bales of compressed cotton every twenty-four hours.

The citizens of Omaha and vicinity, have shipped a car-load of flour to Scotland for the relief of the destitute people of Glasgow. Free transportation has been furnished to New York by the railroad companies, and to Glasgow by the Anchor Line Steamship Company.

During the past year, 362,314 immigrants arrived at this port from foreign countries; 247,4 males, and 216,3 females. The countries from which they came were: Austria, 69; Belgium, 183; Cuba, 1; Denmark, 32; England, 104; France, 194; Germany, 1,434; Greece, 2; Holland, 44; Hungary, 5; India, 968; West Indies, 4; Italy, 377; Norway, 576; Russia, 104; Scotland, 73; Spain, 1; Sweden, 437; Switzerland, 109; Turkey, 2; Wales, 18.

The statistics of visitors to Fairmount Park during the past year, entering at points where records are kept, aggregate 67,537 one-horse vehicles, 402,696 two-horse vehicles, 69 four-horse vehicles, and 4 three-horse vehicles; equestrians, 67,404; pedestrians, 3,578,917; one-horse sleighs, 6,980; and two-horse sleighs, 3,507.

The total value of exports from Philadelphia, for last month, was \$3,198,499.

During the week ending on the 8th inst., there were in New York 602 deaths; and in this city for the same period 553; 227 of whom were adults.

Markets, &c.—The following were quotations on the 8th inst.: Flour, No. 1, 1881, 106½; do. 5s, 104½; 4½ per casks, registered, 105; corn, 302 1/4; rye, 104; wheat, 100½; 5-20s, 1867, 102; do. 1868, 103.

Cotton.—The demand continues limited, but prices were unchanged.

Petroleum.—Crude 8½ cts. in barrels, and standard white, 9½ cts. for export, and 11½ 1/2 cts. per gallon for home use.

Flour.—Minnesota extra, \$4.25 a \$5 for medium to fancy; Penna. \$4.50 a \$4.75; western, \$4.80 a \$5.50; and for patent \$5.50 a \$5.75. Rye flour, \$2.60 a \$2.75 per barrel.

Grain.—Wheat, prices are firm.—Penna. red, \$1.03 a \$1.05; do. amber, \$1.05 a \$1.06. Corn, 43 a 45 cts. per bushel. Oats, 29 a 31 cts. per bushel.

A half barrel of Standard brand, 100½; for the week: Prime timothy, 60, 70 cts. per 100 pounds; mixed, 40 a 55 cts.; straw, 55 a 65 cts. per 100 pounds.

Beef cattle were in demand this week, and prices firm—3295 head were sold at 3 a 5½ cts. per pound as to condition. Sheep sold at 4 1/2 cts., and hogs at 5 a 6½ cts. per pound as to quality.

A bill for the amendment to practise as attorneys before the United States Supreme Court has been passed by Congress, and goes to the President.

FOREIGN.—Telegrams from London on the 10th, quote U. S. bonds at 106½ for the new 5½, 103½ for the 1867's, 107 for 10-40's, and 108½ for new 4½'s. Silver is quoted at 49½, per ounce.

The Bank of England is nearly 185 years old. It was constituted as a joint stock company, with a capital of £1,200,000, and now employs 800 men. Nothing less than a 45 note is ever issued, and no note is issued a second time.

The excitement which has existed for some weeks in England, on the disease among American cattle, has much subsided. The Government now indicates, that unless future shipments prove the existence of the disease, they have no intention of taking steps toward interference with the trade.

The strike of the dock laborers at Liverpool continues, and they have been joined by some sailors and other classes. It is estimated that the number now on

strike is between 50,000 and 60,000. A military force is on hand to assist in preserving order if need be. Five hundred men were brought from Glasgow 10th, to work on the Cunard docks.

Information has been received from Cape Town a British column, consisting of a part of the 24th regiment, a battery of artillery, and 600 native auxiliaries was utterly annihilated on the 21st ult., by 20,000 Zulus, captured a valuable convoy of wagons, oxen, munitio, provisions, &c. The British force, it is said, has been compelled to recross the borders.

In Russia, the plague is said to have made pearance in a few places outside the previously infested district. Numerous sanitary, municipal, prov and other committees are organizing, with the object of promoting cleanliness among the poorer classes, and of preventing the spread of the disease.

The authorities of Malta have decided to impose a quarantine of twenty-one days on vessels arriving from Russian ports in the Black Sea and Sea of Azoff. A quarantine has also been ordered in all the Spanish ports.

Bismarck's Parliamentary Discipline bill, has so modified by the Committee of the Federal Congress, that it is now to be referred to its offensive character, and in this form passed the Reichstag by one vote.

The new President of France, in his message to Chambers, says: "The National Assembly in virtue to the Presidency has imposed great duties on me. I shall apply myself unremittingly to the accomplishment. Sincerely submissive to the great of parliamentary government, I shall never enter into any quarrel with the authorities, nor with the constitutional organs. In the application of the which give to our general policy its character and the Government will be influenced by the spirit which in those laws were dictated. It will be liberal and towards all—the protector of all legitimate interests and the resolute defender of the interests of the State. Five members of the Cabinet, as now constituted, are Protestants."

Henry M. Stanley, the explorer, has agreed to the Belgian exploring expedition, which is so start for Africa.

The commercial visitors from the United States Mexico, have been received in a most hospitable and friendly manner.

According to the recent report of the Post-Master General of Japan, there are 3792 post-offices now open, and 6455 receptacles for mails. They are street letter boxes in their principal cities, and a system of free delivery. The whole number of newspaper letters, books, samples, &c., carried during the year was 47,828, of which more than 25,000,000 were letters, and 9,761,437 were newspapers. There were 10,036,900 postal cards. The department is sustaining, and earns a surplus for the government. The system has been in use about seven years, and tends completely over the country, and is working parently with as much smoothness and accuracy as own of which it is a close copy.

WESTTOWN BOARDING SCHOOL.

The Committee on Instruction of Westtown Boarding School, meet at the Committee Room in Philadelphia, on Seventh-day, 2d mo. 26th, at 10 A. M.

JOSEPH WALTON, Clerk.

FRIENDS' ASYLUM FOR THE INSANE, Near Frankford, (Twenty-third Ward), Philadelphia. Physician and Superintendent.—JOHN C. HALL, M. D. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, in Friends' meeting, at Spring river, the 25th of 12th mo. 1878, HIRAM PICKET, of Cottowood Monthly Meeting, to SRENA PICKET, of 1st named meeting.

MARRIED, at Friends' meeting, West Chester, Pa., the 6th inst., JONATHAN TOMLINSON and ALYCE BERKE, both of West Chester.

DIED, at her residence, near Barnesville, Belmont Co., Ohio, on the 16th of 1st mo. 1879, PHARISA, wife of Peter Sears, in the 57th year of her age, a member of the Westtown Monthly and Particular Meeting. She was a very earnest and devoted friend of the cause, and her health would permit, and was deeply imbued with the principles of Friends. Her friends have the comforting hope that she is now among the number "who came out of great tribulation, and have washed their robes and made them white in the blood of the Lamb."

PHILADELPHIA.

For "The Friend."

Elizabeth Bathurst.

Among those raised up to bear testimony
to the truth as it is in Jesus, in the early days
of the Society of Friends, was Elizabeth
Bathurst, of London, who deceased in the
early part of the 17th century, while still a
young woman. The information respecting
her which has come to the knowledge of the
Society, is derived from a small volume of her
writings, to which are prefixed some testimo-
nies to her character and worth from such
known Friends as George Whitehead,
Charles Marshall and others.

Her clear religious experience, maturity of
judgment, and mental discrimination mani-
fested in her writings, are quite remarkable;
and fully justify the reference thereto made
by George Whitehead in his affectionate testi-
mony respecting her. As this ancient record
is so clear and instructive, a few paragraphs
of it are here introduced:

Blessed be the Lord our God who hath
pleased to make good his promise in our
of the pouring out of his Holy Spirit so
richly as He hath done, to the enabling
of us and daughters to prophesy, and to bear
witness to his glorious name and living
power, for the stirring up the hearts of many
sons and daughters of men to seek after
Him, and lay hold of Him in his gracious visit-
ation and appearance, by his Light and Spirit,
and their souls for salvation from sin and
death.

I knew this virtuous and pious maid from
my first conviction and receiving the
truth as it is in Christ Jesus, in the
year thereof. * * * The seed of Life and
peace took place and root in her heart, which
retiredly attended upon, after her mind
was directed and turned inward to the mani-
festing and Divine light thereof, and the
Lord blessed and helped her forward in her
true journey. * * * She was divinely
fired, and attained unto an excellent gift
of understanding, life and utterance, to
affecting and tendering the hearts of many
other public assemblies, who were seeking
way to Zion, and astonishing others that
were more remote from the Truth. * * * And
because of the meanness or weakness of her per-
son, some people would not believe that her
name, entitled *Truth's Induction*, &c., was of
any kind; or that such depth of mat-
ure and aptness of expression could be in, or

flow from that vessel; but I am a witness it
was her own, and proceeded from her own
proper gift received: she showed it me in her
own hand-writing before it was printed, and
gave sufficient demonstration of her under-
standing in those subjects she wrote upon.

"Having in a few years faithfully finished
her testimony, after a time of much weakness
of body, she ended her days in peace; and the
Lord whom she served took her to himself
out of all her affliction and labors."

Her father says, that from infancy she "was
attended with great weakness of body, so that
she was four years of age before she could go
alone; but that great weakness of body the
Lord was pleased to supply with large endow-
ments of mind; her memory very great, her
understanding very ripe; and those gifts which
the Lord was pleased to give her, she did em-
ploy to his service again.

"After long walking in profession of reli-
gion, in which she did exceed many of her
equals, she had at last her understanding
opened, and became convinced of God's ever-
lasting Truth [as held by Friends] which was
not above seven years before the Lord was
pleased to take her to himself; in which time
what her labors, travels and sufferings were,
many in this city can testify and bear witness
to; her travels to Bristol in the time of the
hottest persecution there, to bear a public
testimony for the Lord's name and truth; her
public testimonies in her journey thither and
back again, viz., in Windsor, Reading, New-
bury, Marlborough, Oxford, &c. I say, the
consideration having accompanied her in her
journey, and how wonderfully the Lord was
pleased to strengthen her weak body, never
having travelled one-quarter of the journey
before, and how the Lord was pleased to
furnish her with suitable and seasonable testi-
monies for the time and place where she went.
After all this, her imprisonment in the Mar-
shalsea in Southwark, and how wonderfully
the Lord preserved her in her weakness there,
and gave her a mouth and wisdom to answer
her opposers, inasmuch that the Justices that
committed her, thought her to be a person of
great learning and education.

"I could say much more, but my loss of her
after all, I say the deep consideration of it
sets the wound fresh a bleeding."

Charles Marshall describes, in moving lan-
guage, the religious opportunity in which a
visitation of Divine love effectually reached
her heart, and turned her mind to wait upon
and obey the Light of Christ revealed within
her, which she found (as all others have done
who faithfully follow it) to lead her in the
way of salvation. He says:

"When I first knew this young woman, she
was a very zealous professor, and albeit she
had several times opportunities to hear truth's
testimonies, yet that eye was not opened that
saw between things that differed in their root;
but it pleased the Lord in the riches of his
love in great compassion to visit her and

Charles Bathurst's other children at the same
time, at a season not expected, &c.

"The sense of which precious season is with
me, and in the living remembrance thereof I
cannot well pass by hinting something of the
manner of it; she and her dear father and
mother, with his other children; we were sit-
ting together before the Lord, whose presence
was manifest with us, and a visitation in the
living power of the Lord was extended unto
them, and in the world of life was opened to
them, the ancient path of the just, and a testi-
mony that the set time was come for their
being turned from darkness to light, and from
Satan's power to the power of the living God;
and as the way of life was opened to them,
the power of the Lord fell on them, the
youngest daughter being much broken and
trembled, Elizabeth was about to make some
reply to me, but it was said unto her, *The
Joy of the Lord's visitation is over thee, it is
hard for thee to kick against the pricks.* She
burst out into abundance of tears, and all of
us were greatly bowed down before the Lord
in the sense of the majesty of his Divine
power. After some time they retired to their
chambers, where they spent their time in
bowedness of soul, seeking after favor with
God, and as their superfluities in apparel and
other things, became a weight and burthen,
they gave up in obedience to the teachings of
the Heavenly Grace of God; O! that none
might put on that which in obedience to the
Lord, these and many more put off in the day
of visitation; and were stripped of all those
things unto plainness and deep humility, and
were sweetly kept down to the working power
of the Lord, in the revealings of the heavenly
cross of our Lord Jesus, which they found
crucifying them through faith and obedience
to the world, and the world to them; and
they saw the chaffy profession with which
they had endeavored to fill themselves; and
that this was nothing to the Word of Life that
opened to them, that the way to life was
through death; and sweetly did this dear
handmaid of the Lord walk, and the work of
redemption and salvation prospered, and was
cut short in righteousness, so that she became
one of the wise virgins of the day, and holy oil
was poured in her lamp, that shined bright;
she then looked on the mountains of profes-
sion, where she had wandered, and to the
people with whom she had been seeking the
living amongst the dead, and her bowels
yearned to her neighbors, and she called to
them and told them, the *lost piece of silver was
found*, and informed them how she found it,
which was through the divine candle being lighted
at the divine fire, the Heavenly Grace that
came by Jesus Christ, and seeing the heart
foul had been sweeping, and so found that
which made her soul rejoice, and desired the
same for them, and so an increase of wisdom
was given her to speak a word in due season;
and she was drawn in the same love to visit
some counties, and to tell what God had done

for her soul, and had a tender serviceable reception in the assemblies of God's people where she travelled, and was guided to open the way of life and death in print, as ye may see, in which she had pure openings given her, and a blessed understanding, with spiritual skill, and great wisdom to open truth's way, and discover the enemy's ways and wiles, by which he had misled many; and that the reader may discern it so, let the following tracts be read seriously, and considered duly and truly. When they first came forth I was refreshed, and bowed before the great God for his tender mercies, that confounds the wisdom of the wise, and brings to nought the understanding of the prudent, and perfects his praise out of the mouths of babes and sucklings. O! that all young women that read this, may follow this good example, and not through running into, and choosing lying vanities, forsake their own mercies, and so miss of that sweet, heavenly, durable portion this dear virgin enjoyed, who run her course in life's race, and then laid down her head in pure peace, enjoying an immortal Sabbath, and with the virtuous king's daughters, who are glorious within, who rejoice in God their Saviour, and magnify his great and glorious name, for whose work of salvation in our age, and letting us see the travail of our souls, and be satisfied in Him, to whom be all thanksgivings, through Christ Jesus our Lord, and high praises for ever, and for evermore. Amen, amen.

(To be concluded.)

The Golden Eagle.

Frank Buckland, in his "Curiosities of Natural History," gives the following account of a tame eagle which he once possessed: "A few nights after his arrival at his new abode, the whole house was aroused by cries, as of a child in mortal agony. The night was intensely dark, but at length the boldest of the family ventured out to see what was the matter. In the middle of the grass-plat was the eagle, who had evidently a victim over which he was covering with outstretched wings, croaking a hoarse defiance to the intruder upon his nocturnal banquet. On lights being brought, he hopped off, with his prey in one claw, to a dark corner, where he was left to enjoy it in peace, since it was evidently not, as was first feared, an infant rustic from the neighboring houses. The mystery was not, however, cleared up for some days, when a large lump of hedgehog's bristles and bones, rejected by the bird, at once explained the nature of his meal. He had caught the hedgehog unawares, and, in spite of his formidable armor of bristles, had managed to uncoil him with his sharp bill, and to devour him. How the prickles found their way down his throat is best known to himself, but it must have been rather a stimulating feast."

This eagle was the terror of all the pets of the house, for it, in course of time, devoured several cats, and guinea pigs and dogs, while upon one occasion a favorite monkey only saved his life by his agility in climbing. At last he escaped, while living in a courtyard near Westminster Abbey. "He first managed to flutter up to the top of the wall, thence he took flight unsteadily and with difficulty, until he had cleared the houses; but, as he ascended into mid-air his strength returned, and he soared majestically up." After performing numerous gyrations over

the towers of Westminster Abbey, he perched upon one of the pinnacles. There he formed a most striking object, and a crowd speedily collected to behold this unusual spectacle. After gazing about him for a time he rose, and began ascending by successive circles to an immense height, and then floated off to the north of London, occasionally giving a gentle flap with his wings, but otherwise appearing to sail away to the clouds, among which he was ultimately lost. After his disappearance his master said, with a disconsolate air, 'Well, I've seen the last of my eagle'; but, thinking that he might possibly find his way back to his old haunt, a chicken was tied to a stick in the courtyard, and, just before dark the eagle came back, his huge wings rustling in the air. The chicken cowed down to the ground, but in vain. The eagle saw him, and pounced down in a moment in his old abode. While he was busily engaged in devouring the chicken, a shawl was thrown over his head, and he was easily secured."

For "The Friend."

Thoughts and Feelings. CONVERSATION.

Notwithstanding the query and precept of the apostle Peter, "Who is a wise man and endowed with knowledge among you? let him show out of a good conversation his works with meekness of wisdom," there is not perhaps a more obvious departure or lapse from the right ways of the Lord, nor from the true end of this responsible yet fleeting span of existence, than in neglecting to maintain in the "meekness of wisdom" a conversation becoming the followers of Him, who shed His precious blood that He might redeem from every sin-pleasing and corruptible thing. Which is more fully set forth in another exhortation of the same apostle: "Ye know that ye were not redeemed with corruptible things as silver and gold, from your vain conversation; but with the precious blood of Christ, as of a lamb without blemish and without spot." We want more of a separation from the spirit of the world; more watchfulness unto prayer; a more thorough leavening, and vital impress of the Christian life; with a more lively sense that the Omniscient eye is continually upon us, and that every word we speak is known to Him who made us.

Wm. Penn, in writing of himself and contemporaries says: "We acted "as those that believed and felt God present; which kept our conversation innocent, serious and weighty." &c. "Our words," he continues, "were few and savory, our looks composed and fey, and our whole deportment very observable. True it is, that this retired and strict sort of life from the liberty of the conversation of the world, exposed us to the censures of many, as humorists, conceited, and self-righteous persons, &c. But it was our preservation from many snares, to which others were continually exposed by the prevalence of the lust of the eye, the lust of the flesh, and the pride of life, that wanted no occasions or temptations to excite them abroad in the converse of the world."

So manifest, as well as so lamentable is our degeneracy from this ancient standard; so worldly-minded has the conversation of the many become, that, judging by the fruit of the lips, we might almost, however unwillingly, query, whether God is in all their thoughts? seeing so little evidence thereof in their daily

intercourse among men; and, may we say so little also in the social interchange thought at home. It was no doubt in view of this, that the gifted Hannah More greatly wondered; and, in her Allegory titled "The Pilgrims," thus conveyed; listened to every party, but in scarcely did I hear one word about the land to w they were bound, &c. Instead of this, whole talk was about the business, or the fures, or the fashions of the strange but witching country which they were m passing through, and in which they had one foot of land which they were sure of just their own for the next quarter of an ho. And this too, notwithstanding an ap has, for our learning, warning, and obedi written: "Seeing then that all these th shall be dissolved, what manner of per ought ye to be in all holy conversation godliness," &c.

It is by no means the wish of the wr less these remarks, to incite to a formal, less conversation on unfeeling truths. This w be a dangerous error on the other hand. that we would urge it, to have the heart d imbued with the love of Christ in the t place; when, as surely as effect follows cause, out of the abundance thereof, the m would speak. Or, as was said by a heat writer: "Such as a man is, such are his wo. We are assured that did obedience keep w with knowledge, we should not only see t be our duty, but be enabled to "put off, cerning the former conversation, the old n which is corrupt according to the decei lusts; and that we put on the new man, w after God is created in righteousness and holiness." If this were the case, if our ations were deeply set upon heaven and heavly things, and less upon "the bewitch country we are merely passing through," d any one suppose that our conversation w savor so much of the earth and the thing the earth? that there would be so much fo talking and jesting? that time, and mind, talent would be allowed so to run to was instead of, as enjoined by Paul upon the sai at Philippi: "Only let your conversation as it becometh the gospel of Christ."

It is with great deference, as well as m regard and solicitude, that we would pl with professed followers of a world-renoi ing Lord, whatever be the profession of f in Jesus, that we should look narrowly i this wide-spread departure from the holy ample and precepts of our great Pattern a High Priest; and from those of His discip and followers in every age of the world. If Saviour's words are, "Every idle word t men shall speak, they shall give acco thereof in the day of judgment; for by t words thou shalt be justified, and by thy w thou shalt be condemned." The Psalmist from the mouth of the Most High, declar "To him that ordereth his conversation rig will I show the salvation of God." The ap ple rejoices "that in simplicity and godly serty, not with fleshly wisdom, but by the gr of God, we have had our conversation in t world," &c. Again, "If any man among u seem to be religious, and bridleth not his toug but deceiveth his own heart, this man's figion is vain." Again, "Remember th which have the rule over you, who ha spoken unto you the word of God: whi faith follow, considering the end of thei cterisation, Jesus Christ," &c.

ny we all watch and strive to have the
re—the heart—pure. Then will the
ans be also. If the love of God dwell in
chly, we cannot but speak with delight
is own excellent name. Our conversa-
would be more of heaven, and the king-
and power, and grace of Jesus. We
not fail, from contrite, devout, and lov-
spirits to bless and glorify Him: to speak
memory of His great goodness, and utter
glory of His majesty. To declare His
ity acts, and to extol Him king forever
whose lips was found no guile.

For "The Friend."

Incidents and Reflections.—No. 11.

SOURCE OF SPIRITUAL KNOWLEDGE.

Thomas Story relates that when yet young
ligious experience, three small books on
our subjects were sent to him, which, he
"I took kindly, as well intended. But
s favored of the Lord with something to
me understanding and support in time,
more excellent than books; for that
which had been sealed as with seven
was now in measure opened by the
rful voice of the Lion of the royal tribe,
by the holy Lamb of God; even the book
e eternal law of God; the law of the
e of life from the Father, by Christ the
Redeemer of the world; and my delight
to read day and night therein: by which
fitted more, in a short time, in the knowl-
of God, and the things of his holy king-
dom, than if I could have read and understand-
ed written and printed books in the world.
efore declined reading these books till a
proper season; and then I looked into
of the books aforesaid, a small tract con-
g prayer: for it must be allowed, that
eading of good books, especially the Holy
ures, the chief of all, and upon which
ruth of the rest depends, is highly profit-
and commendable."

In the year 1676, Thomas Story unfolded
views of the way in which true spiritual
ledge is to be obtained, in a letter writ-
to an unknown correspondent. He ob-
served:

"None know the Father but the Son, and
whomsoever the Son will reveal Him; and
I can come to the Son unless the Father
reveal him. Men, by their reasoning about
things of God in a natural state, ignorant
of, have made the Gospel, to themselves,
of effect, as the Jews did the law, by their
interpretation."

"Whilst I remained reasoning with flesh
blood, I had no true peace or knowledge
of God; but when it pleased Him to reveal
of his Son *in me*, then I denied myself
of the world, with all the vain pleasures
and glory of it, and likewise my own wisdom,
to the world became as a fool, that from
thenceforth I might be partaker of that wis-
dom and knowledge dispensed by Him, who is
fountain and dispenser of all true wisdom,
wisdom and understanding; by the open-
and manifestation of whose Holy Spirit,
Scriptures were given forth of old; and
matters therein contained being things
of God, are rightly to be understood and truly
own only by the openings and insinuing
of light of the same divine Word, by
the light of which, they were dictated, or
ters therein treated of, made known.
And upon this Word have I ever depended

since I was favored with the knowledge of
God, and not upon my own reason as a man
only; nor upon any supposed natural parts
or acquisitions, which, by themselves, ought
not to intermeddle with the things of God,
how pregnant soever they may be.

"And now, dear friend, know, that I am
not a contemner of the Holy Scriptures, but
do love them, and have searched them from
my youth, and have often been much com-
forted, and my heart has often glowed within
me, whilst the blessed and holy spirit of
Christ, which was in the prophets and apos-
tles, brought the Scriptures to my remem-
brance, and opened the mysteries thereof in
me: And therefore, to the Word of God,
which the noble Bereans received with all
readiness of mind before they searched the
Scriptures, do I refer thee; even to the in-
grated Word, which is able to save thy soul,
if thou believest therein; that, by the light
and power of it, thou mayest read and un-
derstand, and have the Scriptures (as well
the divine law of God written in thy heart, as
the letter of the book) opened unto thee."

A religious writer relates an incident which
occurred to her at a hotel on the continent of
Europe which furnishes some illustration of
this subject. She says:

"Towards the close of the dinner, in re-
ply to some irreverent observations from my
opposite neighbor, I remarked on the evidence
of the truth of Revelation. This was followed
by a lady rising from her seat and taking a
vacant chair by my side. After a conversa-
tion which lasted until the dining-room was
otherwise empty, she rose, and I requested the
number of my room, to enable her to pay me
a visit the next day. She was then proceed-
ing to a reception at the ministers'. I gave
her my card, and was in the act of following
her to the door, when my shawl became en-
tangled in the furniture near, and while seek-
ing to free myself from the embarrassment,
two gentlemen approached me, whom I had
not before perceived in the long and dimly-
lighted room. They had listened to part of
our conversation. The elder stranger, point-
ing to his friend, said that he entertained
doubts as to the truth of what was called
Revelation, partly drawn from geological re-
searches into the structure and formation of
the earth, and that he himself was not satis-
fied. He requested me again to be seated
and reply to a few questions which arose
from the observations they had overheard.

"My faithful God who had thus placed me
in a position I could never have chosen, was
there to sustain and meet my utmost need.

"Jesus! the Living Word, the revelation
of the Creator, and the Father's love to lost,
guilty man, seemed the only key I needed to
solve these questions. Calm and resting on
his promise, that those who trust in him
shall not be ashamed, I took my seat beside
my interrogator, whose countenance betokened
that it was no mere emanation of sentiment
or visionary idea that would satisfy him.
But there is a power promised by the
Saviour when he left his church in the wilder-
ness, and this is not to be confined to the
eloquent orator or the accomplished rhetor-
ician; it is for the least in His Father's house
if they 'only believe.' John xiv. 12.

"I could but repeat—perhaps yet more
briefly and simply—what I had before af-
firmed, that the truth of the [Bible] can be
received only through the power of the Holy

Spirit; that the province of the Spirit is to
give light and to convince of sin, and to re-
veal the value of the grace which had saved
me with an everlasting salvation, and was now
offered to them. This was the object of Revela-
tion, and not to make clear to geologists
the structure of the earth.

"My listeners gave me an attentive and
gracious hearing; and when at length I rose
to retire, they thanked me warmly with ex-
pressions of interest. And so I left them."

"I was too weary to leave the house the
following day, but had it not been so, I had
traced the hand of the Lord, and understood
in part what I shall know hereafter. He did
not leave me without encouragement, but it
was not from without. I could only continue
in prayer that the Holy Spirit might water
the tiny seed with the dew of his blessing,
and that the grace that had drawn me might
become the portion of the stranger."

There appears to have been no further con-
versation between them, till she learned one
evening that the family of which he formed
a part were to leave the hotel by the first
train the following day. She says:

"I prayed that if anything remained for
me to do, I might see it, and that He would
give me light and strength to accomplish his
will.

"It came to my mind that I might incline
a book with a few lines, and that God might
bless it.

"Early in the morning I left my chamber
with the view of delivering the packet my-
self; but it was a trial to seem to force the
truth on one who had not evinced any desire
after it. I waited in silent prayer in the cor-
ridors, not knowing whether to direct my
steps. But the cry for help never ascended
unto the ear of God in vain; and scarcely
could I say I had prayed when behold the
answer.

"Many had passed and repassed me, and
there was a moment's pause, while omnibuses
and carriages rolled to and from the door. A
slow step ascended the stair-case, and in an-
other moment the stranger whom I sought
stood before me. I spoke my last words of
hope and warning to him, and placed my
packet in his hand.

"He listened silently until I paused, and
then — Above the rushing of passengers,
the removal of luggage, the shrill cries
of the porters that accompany the departure
of an early train, these words came low and
distinct to my ear:

"I came to seek you to bid you farewell,
and to tell you that the words you have
spoken to me have attracted my heart to
Jesus."

"At the conclusion of the narrative she makes
this judicious comment: "Far be it from me,
by the narration of this blessing, to draw
others into controversy with the septic, or
to lead them to think that indiscriminate
argument is from God. If the Lord gives the
service, He will not withhold strength and
wisdom for it; but let us beware of going before
Him."

The fiber of the jute plant is capable of
very minute subdivisions, and by a lately im-
proved process by Julius Sachs, a German, it
is reduced to exceedingly fine filaments of a
silky quality, which take dye in a reasonable
manner. A firm in Manchester, England, is
availing itself of the process.

Testimonies in the Way of Salvation.

Let none deceive you any longer with vain words; for the Light of Jesus Christ in the conscience is the *alone way*; and [those] who are not guided by the Spirit of Christ are none of His, but are out of the way, who hate it; so search and examine how it is with you: And furthermore this is witnessed, that [those] who draw you from watching, and taking heed to that of Jesus Christ in you, they shut the way of the kingdom of God against you, and draw you from your guide and strength and resting place: therefore all mind the call of the Lord, which is the Light of Jesus Christ in you that convinces, which is the *alone way* to the kingdom, that which convinces you of sin, and bears witness against the evil of your doings, either when you lie or swear or use any deceit in your callings, or do any unrighteousness, though ye do it never so secretly from the sight of men. * * * Mind the call of the Lord, which is the Light of Jesus Christ in the conscience. Loving this, it will lead thee out of the ways and works of darkness, and it will show thee the vanities of the world: now what will it profit any to gain the whole world, and lose his soul? and loving this Light of Jesus Christ, it will teach you to deny yourselves, and take up the cross daily, and follow the Lord Jesus Christ through the regeneration: and watching to be guided by it, the pure law of God will be set up in thee, and judgment will pass upon the vain, earthly, carnal part in thee, and thou must give an account for every evil deed done in the body, and as the book of thy conscience is opened, thou must give an account for every idle word, and that will cause thee to set a watch before thy mouth, that thou offend not with thy tongue; and if thou do offend either in words or actions, there is a witness within thee that bears witness against thee. * * * Waiting within to be led and guided by it, the Light of Jesus Christ alone, thou wilt come to see the narrow way, and it will lead thee through the sufferings and death of Christ, and to the judging and crucifying of the old man with his deeds, and bring the carnal man to judgment. * * * Waiting within in the way of the judgments of the Lord, till judgment be brought forth unto victory, * * * then thou mayst sing the song of Moses, the servant of the Lord, seeing his salvation appeared, and the righteous seed being raised up and delivered by the manifestation of the mighty power of the Spirit of God. * * *

So all you, dear hearts, who are weary and heavy-laden, seeking rest to your souls, to you in the Spirit, this is the word of the Lord: now return, return within unto the Lord, where a fountain of living love and life is found.

This then is the message that we have heard of Him, and declare unto you, that God is Light, and in Him is no darkness at all, all praises, praises, everlasting praise, honor and glory be unto the Lord God Almighty, to Him it belongs now and evermore; and if we walk in the Light, as He is in the Light, we have fellowship one with another, and the blood of Jesus Christ, His Son, cleanseth us from all sin; therefore mind the seed of God, and the Light in you; this is no other truth but that which was from the beginning, and which the Scripture and the Apostles testified of, and which we have heard, which we have seen with our eyes, which we have looked

upon, and our hands have handled of the Word of Life; for the Life was manifest, and we have seen it, and bear witness, and show to you eternal life, which was with the Father and was manifested unto us.

So, all friends, mind the Light in you in the conscience, every one in your measure, to be guided and led by it. * * * Loving this Light of Christ, it will keep you in the way of peace, and in following Him to have eternal life; but hating it, you run out of the way from God, and the Light is the condemnation. — *From "A Call into the Way to the Kingdom," by Thomas Stubbs. London, 1656.*

THE INCH BEFORE THE SAW.

Only from day to day
The life of a wise man runs;
What matter if seasons far away
Have gloom or have double suns?
To climb the unreal path
We stray from the roadway here,
We swim the rivers of wrath
And tunnel the hills of fear.
Our feet on the torrent's brink,
Our eyes on the cloud afar,
We fear the things we think
Instead of the things that are.
Like a tide our work should rise,
Each later wave the best;
To-day is a king in disguise,
To-day is the special test.
Like a sawyer's work, in life
The present makes the flaw,
And the only field for strife
Is the inch before the saw.

PRAISE FOR PRESENT PAIN.

I thank thee, O my God, who made
The earth so bright;
So full of splendor and of joy,
Beauty and light;
So many glorious things are here,
Noble and right.
I thank thee, too, that thou hast made
Joy to abound;
So many gentle thoughts and deeds
Circling us round,
That in the darkest spot on earth
Some love is found.
I thank thee more that all our joy
Is touched with pain;
That shadows fall on brightest hours;
That thorns remain;
So that earth's bliss may be our guide,
And not our chain.
For thou who knowest, Lord, how soon
Our weak heart clings,
Hast given us joys, tender and true,
Yet all with wings,
So that we see, gleaming on high,
Diviner things!
I thank thee, Lord, that thou hast kept
The best in store;
We have enough, yet not too much
To wish for more;
A yearning for a deeper peace,
Not known before.
I thank thee, Lord, that here our souls,
Though amply blest,
Can never find, although they seek,
A perfect rest;
Nor ever shall, until they lean
On Jesus' breast!

Adelaide Procter.

An eminent critic maintains, that a thought which cannot be expressed in simple words is not worth expressing at all.

For "The Friend."

The following letter of advice, sent by a worthy minister, the late Samuel Leeds, some young persons in whom he was interested, is furnished for publication in "The Friend," in the hope that it may prove interesting and helpful to some such in the present day.

"10th mo. 7th, 1856."

My dear young friends:—The uneasiness that I discovered existing in your minds respecting the state of our Society gave some concern, and as it continues with no venture in the love I have for you, to offer you for your serious consideration, what I opened to me on the occasion.

The Psalmist says: 'The righteous shall be had in everlasting remembrance; he is moved at evil tidings, his heart is fixed, trusting in the Lord'; here the Psalmist in a clear light, sets forth the divine compass and regard of our Heavenly Parent toward the family and household of faith, whose hearts are relying upon the Lord their God for daily aid and holy protection; these comprehend and livingly to feel that the 'Foundation of God standeth sure,' and that the 'Lord knoweth them that are his,' and under these precious feelings there is an evidence given the mind, that the 'grace of God is altogether sufficient for to keep and preserve us upon a sure and immovable foundation, Christ Jesus the Rock of Ages, upon which the righteous of all generations have built and found safe amidst all the storms and tempests from within or without; and have been enabled through holy help to say with Paul, 'Not of these things move me.' And again, 'Neither count I my life dear unto me; but I count things as gross and as dung that I may be Christ.' Oh! that this might be the prayer of our souls, that God, the righteous and impartial Judge of all the earth, would be pleased to bear us and preserve us upon this Foundation through every dispensation of His providence, and give us the victory through our Lord Jesus Christ over the evil propensities of our fleshly nature, and enable us say with the apostle, 'I die daily'; and let never forget the solemn expressions of our Divine Lord and Master, if any man will save his life he shall lose it, but he who is willing to lose his life for my sake and the gospel he shall save it, or nearly so. Now it is very evident that no age nor sex are exempt from temptation, trials and difficulties of various kinds while passing through this world of uncertainty and disappointment to the haven and port of everlasting rest; and as Christ the Captain of our salvation, how necessary it is to keep him aboard of the ship to steer our little bark clear of the shoals, the quicksands, the muddy waters of self, and from right hand and left hand errors, straight forward in the living stream that leads to heaven and happiness; then neither the misses of others nor imperfections of our human nature, would be able to turn us out of the right way, because our hearts would be fixed and our trust would be in the Lord, who is the munition of rock, and whose name continues to be a stronger tower unto which the righteous flee and find safety.

Oh! my dear friends, neither youth nor the misses of others will be any excuse for you if you do not mind the heavenly call within your yourselves and use all possible diligence to keep your tabernacles in the

path unassailed by the evil tales and misstatements; and not tarnished by the weakness of the flesh nor any other thing that you know is wrong, for it is well for us all to remember that our time here is short, when compared to an endless eternity, and that our blessed Lord said, "Blessed is that servant from his Lord when He cometh, shall find abiding."

So in much love to you with living desires of mercy, grace and truth may be multiplied in your hearts, I am your loving friend,
S. LEEDS."

The Great Geysers of California.

R. V. Mattison in a recent article in the *American Journal of Pharmacy*, gives an account of a visit to this interesting locality, from which the following is extracted.

"We reach it by stage from Cloverdale, finding sixteen miles along through the canon, crossing and re-crossing the *Arroyo Pescara*, which the 49ers, or some more modern ranchmen, have rather freely translated to 'Pluton creek.' Passing through the canon, one of the most beautiful we have ever seen, we reach, after a few hours' ride, the junction with Geysers canon, which is situated in a spot of rare loveliness. Upon either side are mountains cutting off the view in any direction, while our feet rush the rapid stream so famous for its sparkling beauties. As we cross the rustic bridge of logs and gain entrance to the geyser trail, there dashes over us the thought that we have been here in years gone by, for it is the same familiar odor with which I long ago became acquainted, while a student in the laboratory of the College of Pharmacy, the fumes of hydrogen sulphide, sulphurous acid, &c., make a combination which I become once acquainted with is to always remember. The earth beneath us is white, as if we were treading the vicinity of an ancient lime kiln, and as we pass up the canon amidst the rumbling and roaring of the escaping steam, we fancy ourselves either treading the refuse of a large chemical laboratory or surrounded by the many-colored productions of paint and color mill. On either hand, the banks stretch away up the mountain side and we place a hand on the hot vermillion, which cuts the face of the serpentine cliff whose heels are now too pale from the magnesium salts so abundantly strewn around. In front of us is a grotto lined with the long, silky, asbestos-like needles of magnesium sulphate, the floor is carpeted with the ferrous salts, the green tint of which is relieved by the yellow and brown of the ferric compounds and the cerulean of the copper salts. Alum crystals are on every hand, and as we touch our lips to the waters of the boiling stream at our feet, we think the taste as familiar as was the odor upon our first entrance; it is that of ammonio-ferric alum, though here the salt is magnesio-ferric one. The rock formation of the whole region is a mixture of stratified and igneous varieties, the cinnabar occurs here, and does usually, in veins among the serpentine; iron and copper, as usual, exist with it and, as the whole undergoes decomposition, the imagination must picture the various tints. A few peaces in front is a circular basin about twelve feet in diameter, where the water boils incessantly year after year. It is called the 'Witch's Cauldron, and we cooked eggs in it after three minutes exposure; just beyond, the steam issues forth in a stream of some six

inches diameter with the regular puff! puff! puff!!! of an exhaust pipe from an ordinary engine. Some idea of the strength of this discharge may be had from the fact that a stout Alp-stick, weighing six pounds, was repeatedly raised from eight to twelve inches by the violence of the puff and thrown to one side, while a handkerchief was carried fully ten feet by the violence of the discharge. Under our feet, and upon every side, are numerous apertures called 'blow-holes,' from which the steam issues with varying force. Most of these blow-holes are lined with the most perfect crystals of the purest sulphur in needle-shaped, oblique, rhombic prisms; steam issues from every side, and, in the early morning, in many places it is scarcely possible to obtain secure footing upon the slippery rocks, so enveloped are we in clouds of steam, while the heat is intense and the ground rumbles beneath our feet, reminding us of the stamp mills of the quartz mining districts. The quartz veins here remain intact, the magnesium silicate being dissolved and the mercuric sulphide disintegrated, leaving the rock of peculiar honeycombed appearance, and by the side of the boiling stream at our feet mingles another stream of the coldest water. To our right, as we pass along we find the fountain of 'eye-water, which is of a slight astringent character, while further on a basin of ink, so called, is discovered, consisting of a finely disseminated mixture of mercurous sulphide with the acidulated water. The water passing through the canon is so distinctly acid as to instantly remove the color from the clothes where it splashes upon them; these spots afterwards easily develop into holes upon very slight inducement after drying. Upon either side of the canon, rising one after another, are brilliant crusts of alum tinged with ferrous and cupric salts, and the rocky basins along the sides of the stream are full to overflowing with boiling, seething, villanous chemical concoctions, their sides decked with various crystal efflorescences. Sulphur, here, is in its element; the whole family is represented, of almost every ending and color. The cause of the violent ebullition is chemical action intensified by the action of water. The ground-work of the geyser patches is an easily decomposed serpentine, holding with it mercuric, ferrous and cupric-sulphides. We believe the heat is generated by their decomposition and not from any volcanic action, as seems the universal belief of the dwellers in and around the region.

Heinrich Heine's Tribute to the Bible.—The witty scholar and literateur, Heinrich Heine, speaking of his return to the Bible and its sources of consolation in the last years of his life, uses this language:

"The re-awakening of my religious feelings I owe to that holy book, the Bible. Astonishing! that after I have whirled about all my life over all the dance-floors of philosophy, and yielded myself to all the orgies of the intellect, and paid my addresses to all possible systems, without satisfaction, I now find myself on the same standpoint where poor Uncle Tom stands—on that of the Bible. I kneel down by my black brother in the same prayer! What a humiliation. With all my science I have come no farther than the poor, ignorant negro who has scarce learned to spell. Poor Tom, indeed, seems to have seen deeper things in the holy book than I. * * * Tom, perhaps,

understands them better than I, because more flooding occurs in them—that is to say, those ceaseless blows of the whip which have aesthetically disgusted me in reading the Gospels and Acts. But a poor negro slave reads with his back, and understands better than we do. But I, who used to make citations from Homer now begin to quote the Bible as Uncle Tom does.—*Vermischte Schriften.*

For "The Friend"

At a recent meeting of the West Chester Microscopical Society, Dr. J. B. Wood exhibited under his instrument, healthy human blood in contrast with the blood of a tobacco user, showing a very observable difference; in other words, a structural change, and containing, likewise, the white corpuscles common to scrofulous or anemic persons.

W. P. T.

The Maine Law in Maine.

The following testimony from Dr. Cyrus Hamlin, of Bangor, Me., will be read with deep interest:—

Maine being my native State, and not having resided in it for forty years, my return to it led me to examine the Maine law and its workings, with great interest. I have been through the State in various directions, from Kittery to Calais; have attended the public meetings in many of the counties, and have had intercourse with men who have known the State all their lives. I am prepared to maintain this proposition with regard to the Maine law. It is an incalculable blessing to all the owners of real estate. It is the chief reason why the State has not been ruined in these hard times.

1. It has almost annihilated drunkenness among the farmers. The farms have prospered, and buildings and roads have wonderfully improved throughout the State. The most intelligent men attribute this largely to the Maine law. In many farming towns you cannot get a drop of liquor for love or money.

2. It is a boon to all manufacturers. Their men work better, produce more, and break and injure less. Manufacturers have told me that they could not get on successfully with rum shops around them, nor would they attempt it. It is nearly an equal blessing to the lumber men.

Now, these embrace the bulk of the property of the State. As to crime, I found the jail of Oxford county empty, and I have been assured the same is often true of other counties. Pauperism is hardly known, except in the cities. I inquired of a man how many paupers he had in his town, and he said there were none. There were people more or less poor, and there might be some so poor as to be helped by their friends; but a town pauper would be a town disgrace. There are certain cities, Portland, Lewiston, Bangor, Calais, &c., wherein the state of things is different. Cities will always have a class that will evade all law. The Maine law is to some extent evaded in the cities, and there are found most of the crime and pauperism. Rum is brought or smuggled in every possible way. Even there, however, the evil is diminished, and as the public sentiment becomes more sound, stronger measures will be resorted to. The whole rum interest has fallen into the lowest and vilest class, who defy public sentiment, and like thieves and tramps, look only at what they can get without too much danger.—*Witchman.*

Music.

For "The Friend."

John Mulliner, a Friend, in a pamphlet published in 1877, tells his experience in regard to music. He says: "And I was a great lover of music, and many times, as I have been thinking of God, and of the condition that I was in, it would have brought trouble upon me, so that many times I have took my cittern, or treble viol, or any instrument as I had most delight in, thinking to drive away these thoughts, and I have been so troubled, as I have been playing, that I have laid my instrument down and have reasoned with myself after this manner, and fell a crying to God: It is true I love this music, but what good can these sounds do me when my soul wants peace with God? and this doth but stir up laughter and lightness of spirit, to make me forget my Maker, and this will last but a little while, and I had better seek my peace with God, and then 'At His right hand there are pleasures for evermore;' and these thoughts I had then. So that my music began to be a burthen to me, and I would fain have sold them, my instruments, but that I had not freedom in my mind to do, for if I did, those who bought them would have made use of them as I did, and I thought I would not be the cause of it; so I took as many as I suppose cost forty shillings and burned them, and had great peace in my mind in doing it, which is more to me than all the pleasures in this world."

Similar was the example in this respect of the late John Jones, of Ruthin, Wales, who was not originally a member of the Society of Friends. An account of him, published in the Annual Monitor, states that he was lineally descended from a family of Welsh bards, and had a natural talent for music, and while yet of tender years was instructed in the use of the harp. Following the example of his father he enlisted, and on account of his skill as a musician was drafted on board a man-of-war. Notwithstanding these adverse influences, he was at times favored with visitations of Divine love, and an ardent longing to know more of the only true God, and Jesus Christ our one Mediator and Redeemer. Under powerful exercise of mind he would, when leisure permitted, take his Bible, and go into some obscure part of the vessel to read and pray; and frequently had to endure the taunts and scoffing jests of his thoughtless comrades. It was a subject for thankfulness with him in after life, that during his nine years of military service in war-time, he had never been called into action; and was thus spared the bitterness of thinking that he had taken the life of any of his fellow-creatures. On returning from the East Indies, he found peace prevailing at home, and obtained a furlough to visit his parents, during which his mind became drawn towards Friends, he obtained a discharge from his former occupation, and after passing through much religious exercise, was admitted into membership with the Society about the year 1827. He steadily maintained his position as a plain, consistent, conscientious Friend, though for a long time alone in his religious profession, and became widely known in North Wales as "the Quaker." Having entered on a religious life through Christ the door, and yielded himself unreservedly to the will and requirements of his Lord and Master, while yet in the full vigor of manhood, he was enabled to take up his

cross, gently answering those who questioned his course, "I have peace in so doing." The giving up of music was a hard task; for it seemed like the rending asunder of a part of his nature; yet he felt it right for him not only to give up the use of it, but to destroy his valuable and favorite instrument.

The Travel of Plants.—Alexander brought rice from Persia to the Mediterranean, and the Arabs carried it to Egypt, the Moors to Spain, the Spaniards to America. Lucullus brought the cherry tree (which takes its name from Cerasus, the city of Pontus, where he found it), to Rome as a trophy of his Mithridatic campaign; and 120 years later, or in A. D. 46, as Pliny tells us, it was carried to England. Caesar is said to have given barley to both Germany and Britain. According to Strabo, wheat came originally from the banks of the Indus; but it had reached the Mediterranean before the dawn of authentic history. Both barley and wheat came to the New World with its conquerors and colonists, and the maize which they found here soon went to Europe in exchange. It was known in England in less than fifty years after the discovery of America; it was introduced to the Mediterranean countries by way of Spain, at the end of the sixteenth century; and the Venetians soon carried it to the Levant. Later it traveled up the Danube to Hungary and gradually spread eastward to China. The sugar cane, which with its sweet product, was known to the Greeks and Romans only as a curiosity, seems to have been cultivated in India and China from the earliest times. Its introduction into Europe was one of the results of the Crusades; and thence it was transplanted to Madeira, and early in the sixteenth century from that island to the West Indies. The original home of "King Cotton" was probably in Persia or India, though it is also mentioned in the early annals of Egypt and had spread throughout Africa in very ancient times. The potato was found in Peru and Chili by the first explorers of those countries, who soon carried it to Spain. It is said to have reached Burgundy in 1560 and Italy about the same time. It appears to have been brought from Virginia to Ireland by Hawkins, a slave-trader, in 1565; and to England in 1585, by Drake, who presented some tubers to Gerard, who planted them in his garden in London and described the plant in his *Herbals*, and it was also introduced by Raleigh at about the same date. But it was slow to attract attention, and it was not till a century later that it began to be much cultivated. In 1663 the Royal Society published rules for its culture and from that time it rapidly gained favor. The Dutch carried it to the Cape of Good Hope in 1590, and thence it made its way to India.—*Independent.*

It is a precious thing to witness that our hearts are upright in the sight of the Lord, or before his eye that runs to and fro through the earth; that that sin may never overtake us which overtook the Jews of old, viz., "to keep the outward form, and lose the power." Our solemn assembling, our form of sound words, and our outward demeanor, which the life of Truth led Friends into at first,—if we feel not the same life accompanying us, and preserving us in it, that we may be a living people, walking uprightly before the Lord,—I say, without this, all is vain and unprofit-

able. It is the honest and upright heart that is the good ground, where the seed of thy kingdom grows and prospers, and brings forth acceptable fruit.—*William Shewen.*

The Stone that Rebounded.—"O boys, boys, don't throw stones at that poor bird," said old, gray-headed man, "I am afraid the stone will rebound, and hurt you as long as you live!"

"Fifty years ago I was a boy like you, used to throw stones, and, as I had no other very near me to play with, I threw the till I became very accurate in my aim. One day I went to work for an aged couple of the name of Hamilton. They seemed very of people then. They were very kind to everybody and everything. Few had so many swallows making their nests under the roof of their barns; few had so many pets; this seemed to love them as they. For several years a bird had come, after the long winter was over, and built her nest in the same place, and there reared her young ones. She had just returned on the day that I went there to work, and they welcomed her back. She hoped about, as if glad to get back. In the course of the day I thought I would try my skill upon her. She sat upon a post near spot where she was to build her nest, and looked at me with all confidence, as much as to say, 'You won't hurt me?' I found a nice stone, and posing my arm, I threw it with my utmost skill. It struck the bird on the head, and she dropped dead! I was sorry, the moment I saw her fall; but the deed was done. All day long her mate flew about, and chirped in tones so sad that it made my heart ache. Why had I taken a life so innocent and made the poor mate grieve so? I said nothing to the old people about it, but through a grandchild they found it out; and, though they never mentioned it to me, I knew that they mourned for the bird, and were deeply grieved at my cruelty. I could never look them in the face afterward as I had done before. They have been dead many, many years and so has the poor bird; but don't you see how that stone rebounded and hit me? How deep a wound it made upon my memory. How deep upon my conscience! Why, my dear boys, I would make great sacrifices to day if I could undo that one deed! For fifty years I have carried it in my memory, and if what I have now said shall prevent from throwing a stone at a poor bird, that may rebound and deeply wound your conscience, I shall rejoice."

The boys thanked the aged man, dropped their stones, and the bird had no more trouble from them.

Cases of Debility.—Nothing is more common when a man gets out of health, from mere overwork, from some improper use of his health, from some misuse of his faculties, or some other thing that ought to be remedied by the rules of hygiene—which ought to be prevented and cured by the removal of its cause—nothing is more common than to tell the man to take a little wine, instead of telling him to look into his surroundings, and get rid of the cause. I find that what is wanted with those cases of debility is regular work, proper hygiene, mental discipline of the individual, and a proper system of diet and regimen; and then I find that they get well better without drink than they do with it. Whenever a man

gills me that he cannot eat his dinner without glass or two of wine, I know the wine has no hold of him to that extent. I know that it is all the more reason why he should let it off, and if he will leave it off, in a week he will eat more than he did before, will digest it better, and get stronger in every way.—*Dr. Thomson.*

Concerning Love.—By Isaac Pennington.

Question. L. What is love?

Answer. What shall I say of it, or how shall I in words express its nature? It is the sweetness of life; it is the sweet, tender, melting nature of God, flowing up through its seed of life into the creature, and of all things making the creature most like unto himself, both in nature and operation. It fulfills the law, it fulfills the gospel; it wraps up all in one, and brings forth all in the oneness. It excludes all evil out of the heart, it perfects all good in the heart. A touch of love doth this in measure; perfect love doth this in fulness. But how can I proceed to speak fit! Oh that the souls of all that fear and wait on the Lord might feel its nature fully! and then would they not fail of its sweet, overcoming operations, both towards one another, and towards enemies. The great healing, the great conquest, the great salvation is reserved for the full manifestation of the love of God. His judgments, his cuttings, his bewarings by the word of his mouth, are but a preparation for, and not to do, the great work of raising up the sweet building of his life, which is to be done in love, and in peace, and by the power thereof, and this my soul waits and cries after, even the full springing up of eternal love in my heart, and in the swallowing of me wholly into it, and the bringing of my soul wholly forth in it, that the life of God in its own perfect sweetness may fully run forth through this vessel, and not be at all tintured by the vessel, but perfectly tinture and change the vessel into its own nature; and then shall no fault be found in my soul before the Lord, at the spotless life be fully enjoyed by me, and become a perfectly pleasant sacrifice to my God.

Oh! how sweet is love! how pleasant is its nature! how takingly doth it behave itself in every condition, upon every occasion, to every person, and about every thing! How tenderly, how readily, doth it help and serve the weakest! How patiently, how meekly, doth it bear all things, either from God or man, how unexpectedly soever they come, or how and soever they seem! How doth it believe, how doth it hope, how doth it excuse, how doth it cover even that which seemeth not to be excusable, and not fit to be covered! How fine is it even in its interpretations and charges concerning miscarriages! It never overreth, it never grates upon the spirit of him whom it reprehends; it never hardens, never provokes; but carrieth a meltingness and power of conviction with it. This is the nature of God; this, in the vessels capacitated to receive and bring it forth in its glory, the power of enmity is not able to stand against, at falls before, and is overcome by.

Whether it be the lawyer or statesman, writer or preacher, no man can be really influential for the truth until the truth is all influential with him. If he is thinking of what he is personally to gain through his advocacy of that truth, he cannot be its advocate with

any such power as if he were willing to sink himself out of sight to win believers to the truth he urges. The argument that is shaped to reflect glory on the advocate, the speech that is framed to show the statesman's learning and eloquence, the editorial that is written to make the paper attractive, the sermon that is prepared to promote the preacher's popularity; or to meet the demand of another day's duties, can never tell on others like the effort to convince those who hear or read, in a matter where he who strives is already convinced beyond a peradventure. When a man is living for the supreme purpose of convincing another of that which he is ready to die for, he has power in that direction. There is no human power comparable with this.—*S. S. Times.*

THE FRIEND.

SECOND MONTH 22, 1879.

For several months past public attention has been turned towards the subject of prohibiting the immigration of Chinese into this country through the Pacific ports. In advocacy of this measure much has been said upon the apparent impossibility of the peaceful mingling of persons of this race with the American people; the injury done to the working man in those States in which they are numerous, by their competition in the labor market; and the danger that they will remain a distinct, and finally, on account of their number, a dangerous element in the body politic, clinging tenaciously to the customs and religious beliefs of their forefathers, and forming a community of heathens in our midst, foreign to the spirit of our institutions and insensible to those influences and sympathies by which a Christian people is professedly actuated. In accordance with these views, a bill has been passed by Congress, providing that no vessel shall be allowed to bring more than fifteen Chinese to this country at one time, excepting under certain specified restrictions.

To us this is a sad commentary upon the Christianity of our country, and we suppose could only have been determined upon under a degree of the same feeling of prejudice and intolerance which has long characterized the treatment of this race in several communities in California, and which we apprehend is largely attributable to the jealousy which has often been manifested in former years against the introduction of labor saving machinery, or the adoption of improvements which threatened to lessen the means of earning a livelihood by the laboring classes. The yielding of a majority of the members of Congress to sympathy with these feelings, in the face of strong testimony to the great value of the Chinese in building up the material prosperity of the Pacific States, appears to us not only ill-advised, but in opposition to the fundamental provisions of our Republican form of government.

The natives of China are as a race docile and intelligent, and proverbially industrious, and we believe instances are not wanting of individuals who having abandoned the usages and maxims of their ancestors, and become convinced of the truths of the gospel of Christ, have returned to their own country to communicate to their less favored brethren a knowledge of

the blessings which they have received. Were the inhabitants of this country the Christian people which they profess to be, we cannot doubt that the instances of this kind would be numerous, and that there would be no need of hostile legislation to repel from our shores a class of our fellow men who, whatever may be the disadvantages under which they have labored, are yet the objects of Divine regard, and from their benighted condition have strong claims upon the interest and the aid of those who are entrusted with mental and spiritual advantage superior to themselves.

The following extract, from a remarks delivered in the Senate during the consideration of this bill, we believe truly indicate the general principles which should govern the action of a Christian people in dealing with the questions which arise from the existence of different races within our borders:

"It is said that this conflict of races is inevitable, and necessarily injurious, and that the difficulties which spring from it are insoluble; perhaps they are to the human heart in its natural and unregenerate state; but there has been a Divine prescription and remedy. There is no trouble—I say it in the presence of all the senators—there need be no trouble to-day within the limits of these States, between the white man and the black man whenever the reign of righteousness becomes as practically applied as we mouth it and profess it. Do right; treat every man, white or black, copper-colored or whatever, as you would have done to yourself in like circumstances; and then any evil is greatly better to be borne than the evil which you inflict by not administering that rule. It is simply to apply in politics, in our social economy, in our personal intercourse, in the institutions of society, wherever human action is called into being, the Christian rule, the law of Divine benevolence and of human brotherhood, and all the difficulties of caste and creed, and all the conflicts which spring up from the apparently irreconcilable and adverse interests of men disappear, vanish away like the mist and the morning dew in the presence of the warm and bright and health-giving influences of the rising sun."

We commence in this number of our journal the publication of a few extracts, mostly from the writings of the early members of our religious Society, under the title "Testimonies to the Way of Salvation." These will show, that the Friends of that day believed in the great doctrine, that the atoning sacrifice of the Lord Jesus Christ for the sins of mankind, is the appointed means for the reconciliation of guilty man to his Creator. And they will evince their firm conviction that it is through obedience to the leadings and teachings of the Holy Spirit that we receive saving faith, and power to become the sons of God; and are enabled to partake in their fulness in the blessed fruits of that offering.

We hope they may be instrumental in confirming the faith of some, who, in reviewing their own experience of the work of Divine Grace in their hearts, cannot trace anything in accordance with the teachings of those who assert, that salvation is at our command at any moment we choose to take it. Let not any be persuaded to think there is any easier path to the Kingdom of Heaven than a surrender of their own wills, a daily bearing of the cross of Christ, and a faithful following

of that Grace of God which bringeth salvation, and which teaches us, "that deuying godliness and worldly lusts, we should liue soberly, righteously and godly in this present world."

SUMMARY OF EVENTS.

UNITED STATES.—In a letter from Bishop Whipple, of Minnesota, recently published, after recounting the injustice which has marked the policy of our Government towards the Indians—referring specially to the recent barbarities attending the treatment of the Cheyennes—this earnest, serious language occurs: "I only no man's head or heart who reads the last fifteen years of Cheyenne history, and does not feel the deepest pity for this hunted and outlawed people. Dark as this tragedy is, it is only a type of our whole history in dealing with the red man. I said all—No, not all. I remember that in 1802, President Jefferson wrote to a friend, that he heard there was one man left of the Peorias, and Jefferson said, if there is only one, justice demands that his rights in their territory shall be respected, and he shall be paid for them a just compensation. Other great and good men have pleaded that we shall deal justly, and many have said in their hearts 'I am unable for my country when I remember God is just.' Why need we go on in this blind path of sin? The night that dying went up from Cheyenne mothers and babes, there also went up from all over this land, prayers for this nation. It was a day set apart by many Christians to ask God's blessing upon the United States. May it not be feared God will answer us? He did his people of olden times. When we make many prayers I will not hear them; your hands are full of blood; cease to do evil; learn to do well."

A heavy snow storm prevailed throughout the eastern portions of British Columbia, Washington Territory and Oregon, during twenty-four hours ending on the evening of the 14th inst., when in the Columbia river were broken down, and great loss of stock is feared. The receipts of the Metropolitan Elevated Railroad Company in New York, for last month, were \$111,965.75. The average fare is 8 cents. About 140,000 passengers were carried.

The Sisters of the Orphan Home, at Xenia, Ohio, was destroyed by fire on the evening of the 16th inst. The six hundred children of the Home had just finished breakfast in the main building and returned to their cottages, when the fire broke out. The loss to the State is about \$75,000.

In the U. S. Senate, on the 15th, the Anti-Chinese Bill, introduced with amendments, which will send it back to the House for concurrence.

The House Committee on Indian Affairs decided on the 14th to report, after considerable amendment, the bill authorizing the Secretary of the Interior to allot lands in severity to Indians residing on reservations, and issue patents therefor.

Senator Bruce, of Mississippi, was called to the chair of the Senate, and presided over its deliberations for a few hours. He is the first colored man who has acted in this capacity.

In New York during the past week there were 155 cases of scarlet fever, and 42 cases of diphtheria. Since the first of 11th month, 22,570 cases of scarlet fever and 884 cases of diphtheria have been reported.

Mortality in this city during the week numbered 349. There is still outstanding about \$16,000,000 in fractional paper currency—which it is estimated there will ultimately be redeemed only \$4,000,000, leaving \$12,000,000 as profit to the Government.

Market quotations, 18th, 1891, do. 5's, 104½; 4½'s, 1891, registered, 105; do. coupon, 106½; 104½'s, 1901; 5's, 208, 1867, 102½; do. 1868, 103.

Cotton.—Sales of middlings at 9½ a 10 cts. per pound for uplands and New Orleans.

Flour.—The demand limited, but prices unchanged. Premium, extra U. S. 25 5/8; Penna. do., at \$4.25 a \$4.75; western, do., at \$4.25 a \$5.50. Rye flour, \$2.75 per barrel.

Grain.—Wheat, market quiet and firm—Penna. red, \$1.06½ a \$1.07; Penna. amber, 1.07½ a \$1.08; western red, \$1.06½ a \$1.06½. Corn, 42 a 45 cts. Oats, 29 a 32.

Seeds.—Clover steady at 6½ a 7 cts. per pound. Flax seed, \$1.40 per bushel.

Hay and Straw.—Average price during the week per 100 pounds: Prime timothy, 60 a 70 cts.; mixed, 40 a 50 cts.; straw, 55 a 65 cts.

Beef cattle were dull and prices favor buyers—Extra Pennsylvania, western, at 51 a 57 cts.; fair to good, 41 a 5 cts.; and 14 cts. per cwt. as to quality.

Sheep sold at 4 to 6 cts. per pound gross, as to condition. Hogs, 4 a 6 cts. per pound.

FOREIGN.—The Dominion Parliament was formally opened by the Governor General at Ottawa, on the 14th inst., the Princess Louise, occupying a seat on the throne. The speech of the Governor General, after the usual acknowledgment of Canadian loyalty, &c., refers to the importance of the development of the trade of Canada with other countries, and the vigorous prosecution of public improvements, due regard being had to the financial condition of the country. He regrets that the receipts of the government continue inadequate to meet its expenses, and hopes they may be able to restore the equilibrium by the application of the strictest economy to the public expenditures, and by the readjustment of the tariff.

The coldest weather of the season in the Ottawa Valley, Canada, prevailed on the 14th inst. At Ottawa City the thermometer marked 21 deg. below zero; at Beaufort, Ont., 35 deg.; at Rockville, Ont., 40 deg.; and at Sisson, Quebec, the mercury froze at 45 deg. below.

London.—The Chancellor of the Exchequer stated in the House of Commons on the afternoon of the 14th inst., that it was not desirable to either exaggerate or depreciate the wonderfully severe blow in South Africa. The Cabinet is resolved to repair and wipe out the disaster. Fifteen steamers have been chartered to carry the gold and supplies to the Cape. It was happily able to congratulate the House and country upon the satisfactory state of affairs in other parts of the world. There is every reason for satisfaction with the Berlin Treaty. The Russians have begun to withdraw from Turkey, and there is every reason to hope for complete evacuation in due time."

Regarding Russia in Asia, he said the Porte has shown earnestness in the arrangements now under discussion, and which it is hoped would prove adequate. In Cyprus, England has taken over the crown lands, paying the Porte £5000 annually, besides the surplus stipulated in the Anglo-Turkish Convention, which is about £100,000 a year.

Regarding Russia in the Cape, Lord Beaconsfield made a similar statement. "The object of the Government's interference in Afghanistan has been completely accomplished. We now hold the three great highways connecting Afghanistan and India. We have secured a frontier which I hope and believe will render India as safe as there ever said to be. We wish to trench as little as possible on the independence of Afghanistan."

Advices from Liverpool on the 12th inst., state, that trade is quite paralyzed by the strike, which has now extended to the carters and the whole body of carpenters. The strike among sailors has become more general, and difficulty was experienced in obtaining crews. There were said to be thirty-five grain laden vessels at the Queenston awaiting shipments. The 15th a delegation of the strikers proposed arbitration to the shipowners, in the meantime resuming work on the old terms. This the owners rejected, but agreed to arbitration provided the men resumed work at the proposed terms.

England has asked permission of Russia to send physicians to investigate the plague.

The German Reichstag was opened on the 12th, by the Emperor William in person. In his speech from the throne he thanked the members for assisting in the suppression of the Socialist agitation, and hoped they would be able to support the Government as far as was necessary for the cure of the Socialist evil. He announced the abolition of article 5th of the Treaty of Prague, and referred with pleasure to the friendly relations with Austria, and the results of the Berlin Congress. He declared that the relations between Germany and other Powers are satisfactory, and that she would continue to use her influence in behalf of European peace.

The fire which devastated the favorite tourists' resort of Meyringen, spread to and destroyed the hamlets of Hausenstein, and Eisenbolgen. A thousand persons are rendered homeless. Interlaken is at one time threatened.

At the hospice of St. Gotthard, between 10th month 1877, and 10th month, 1878, 10,601 travellers were cared for, of whom 107 were sick, or half frozen; 39,170 letters were distributed, and a great deal of clothing. The expenses were 450 francs in excess of the revenue. During last year gross receipts of the Swiss Canal Company were 1,000 francs, and the net amount to 353,153 francs—1,655,000 for 1877.

Advices from Yokohama say, that a separate treaty has been concluded between the United States and Japan, abrogating previous conventions. It abolishes export duties, gives Japan the control of her coasting

trade, and opens Simonaki and one other port. It tries to take effect when the other Powers consent to it.

A Yokohama contemporary states that the Japan Government have authorized the issue, by a Japan publisher, of an edition of the Book of Genesis Chinese, prepared for the Japanese by the insertion of the *kan-ten*, the work of the American Bible Society. This is the first portion of the Scriptures, the portion of which in Chinese had been authorized by means of the Government stamp; and, having in view a great distaste which the authorities have so long entertained to the introduction of foreign religions, the fact is significant and worthy of record.

WESTTOWN BOARDING SCHOOL.

The Committee on Instruction of Westtown Boarding School, meet at the Committee Room in Philadelphia, on Seventh-day, 24 mo. 22d, at 10 A. M.

JOSEPH WALTON, Clerk.

FRIENDS' ASYLUM FOR THE INSANE, &c.

New York, *Grandford, Twenty-third Ward, Philadelphia* Physically Impaired, and C. C. M. C. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, at Friends' meeting-house, New Garden Chester Co., Pa., 24 mo. 12th, 1879, LEWIS P. SHARLES, of London Britain, to RUTHANNA, daughter EVELY BROWN, of the former place.

DIED, 1st mo. 19th, 1879, at his residence in Winonah Columbianna Co., Ohio, BENJAMIN D. STRATTON, esteemed member of New Garden Monthly Meeting Friends, in the 54th year of his age. This dear Frier had long been concerned to live in the Divine life. During his last sickness he was brought under natural exercise of mind, feeling the solemn nature of the changes that might ere long take place. At a time of mental calm, on one occasion said, "I feel nothing but a calm, quiet, trust in a merciful Saviour, He will guide me through the dark valley of shadow of death, and give me a place in one of his many mansions?" And as he drew near the close, but intently sensible, he was enabled to say, not my will but thine O Lord, be done. His bereaved family and friends have a comfortable hope, that through redeeming love and mercy, he has been permitted to enter of those mansions, which his spirit longed for, and which are prepared for the righteous of all generations. He was born at Chester, Pennsylvania, on the 31st of 1 mo. 1879. He was 21 years of age when he became a member of the Monthly Meeting of Friends of Philadelphia. He had been in an infirm state of health for several years, and frequently passed through seasons of much suffering. Two weeks before his decease, he had an attack of influenza, during which he appears to be deeply impressed, and his mind much occupied with serious and elevated thoughts. He had several different members of his uncle's family with whom he was living, several of them being sick, he endeavored to contribute in every way he could, to their help and comfort. A few days before his decease, he expressed in a letter to a near relative as follows: "My health is probably more delicate than it has ever been before. I think it will be necessary to have several of my dear friends which overtake us in the course of our journey through this temporary world, have the effect of drawing our minds to reflect upon the uncertainty of this life, and our responsibility to a higher power;" adding, in substance, "That when we dwell in ease and comfort and have no trials, temptations, and other afflictions that are sowing the seeds of our influence, we think that we will grow and yield good or evil fruit, not only in the present, but also "when the sower's hand is cold," and desiring He who knows all our weakness may best be good seed, that nothing may mar it, grow up as it may, and bear fruit unto life eternal. As he was walking on the railroad, he was struck or struck from Philadelphia, and his head so seriously injured as to cause insensibility immediately, and his death about an hour afterwards. Although the summer season, thus awfully sudden, his friends have the comforting belief, that through the mercy of God in Christ Jesus our Saviour, he has been released from the trials of this life and admitted within the pearl gates. "By grace also ready."

At Chester, Pennsylvania, on the 31st of 1 mo. 1879, HELEN M. THOMAS, the 21st year of his age, but sister of the Monthly Meeting of Friends of Philadelphia.

He had been in an infirm state of health for several years, and frequently passed through seasons of much suffering. Two weeks before his decease, he had an attack of influenza, during which he appears to be deeply impressed, and his mind much occupied with serious and elevated thoughts. He had several different members of his uncle's family with whom he was living, several of them being sick, he endeavored to contribute in every way he could, to their help and comfort. A few days before his decease, he expressed in a letter to a near relative as follows: "My health is probably more delicate than it has ever been before. I think it will be necessary to have several of my dear friends which overtake us in the course of our journey through this temporary world, have the effect of drawing our minds to reflect upon the uncertainty of this life, and our responsibility to a higher power;" adding, in substance, "That when we dwell in ease and comfort and have no trials, temptations, and other afflictions that are sowing the seeds of our influence, we think that we will grow and yield good or evil fruit, not only in the present, but also "when the sower's hand is cold," and desiring He who knows all our weakness may best be good seed, that nothing may mar it, grow up as it may, and bear fruit unto life eternal. As he was walking on the railroad, he was struck or struck from Philadelphia, and his head so seriously injured as to cause insensibility immediately, and his death about an hour afterwards. Although the summer season, thus awfully sudden, his friends have the comforting belief, that through the mercy of God in Christ Jesus our Saviour, he has been released from the trials of this life and admitted within the pearl gates. "By grace also ready."

Women's Ministry.

Extracted from *Thomas Story's Journal*.

Then there appeared one who made his objection at large against women's preaching, saying, that the apostle Paul said to the Corinthians, "I will that women keep silence in the church." I answered, that the apostle Paul, "Your women," only, and not women effectually, without exception; which he denied. Then one offered him a Bible to look to the place; which he refused, and went pretending to go into a house to fetch one; never returned. Then I opened that point more fully to the people, saying, that no interpretation of Scripture ought to be advanced, admitted, which makes it contradict itself, one part of it another; or one apostle oppose another, or contradict himself or any of the prophets, or the matters of fact recorded in Holy Writ, relating to the public ministry of holy women in the church of Christ, or otherwise.

1st. Then, you may observe what Joel the prophet said, many ages before the days of the apostles, relating to the dispensation of the gospel in this point, and the publishers of it. And it shall come to pass afterward, that I will pour out my Spirit upon all flesh, and your sons and your daughters shall prophesy, and old men shall dream dreams, your young men shall see visions: and also upon the servants and upon the handmaids in those days I will pour out my Spirit.

The apostle Peter, being filled with the Holy Ghost, declares this prophecy to relate to the dispensation of the gospel, and to begin the time of the great and glorious effusion of the Holy Spirit of Christ at Jerusalem, saying, "This is that which was spoken of by the prophet Joel, and it shall come to pass in the last days, saith God, I will pour out of my Spirit upon all flesh;" and so repeats the prophecy at large.

Now it is morally certain, by a just and undeniable consequence, that the Spirit of God came at that time upon the holy women present; and that the women, or some of them, preached Christ to the multitude, as well as the men, having been his witnesses as well as they; or otherwise the application or made of that prophecy to that instance, could not have been without exception or a reasonable objection. For if no women had been or preached Christ at that time, it could not have been said that the prophet men-

tions women as well as men, daughters equally with sons, but only sons appear in this dispensation and occasion; and therefore that prophecy cannot relate to it. But no objection of this nature appearing, it strongly follows, that some women preached there as well as the men at that time.

"2dly; If daughters were not to preach as well as sons, handmaids as well as other servants, this prophecy could never be fulfilled, and consequently must be false; which, to say or think, would be profane and blasphemous, and cannot be admitted in any wise.

"3dly; The apostle Paul saith in that place, 'Let your women keep silence in the churches,' (that is, in the meetings or congregations) for it is not permitted unto them to speak; but they are commanded to be under obedience, as also saith the law. And if they will learn any thing, let them ask their husbands at home; for it is a shame for women to speak in the church' (or congregation.)

"4thly; Saith the same apostle elsewhere, on another occasion, 'Let the women learn in silence with all subjection. But I suffer not a woman to teach, nor to usurp authority over the man, but to be in silence.'

"By all which it appears, that the apostle was not prohibiting women in general, when inspired by Christ, and thereby qualified for such services, to preach or pray publicly in the congregation; but such only as were imperious, ignorant, and unlearned in the way of Christ and religion; and also talkative, asking bold and impertinent questions in the congregations, occasioning debates, heats, contentions, and confusion. Such were not to be suffered in such evil work, but to be obedient to their husbands, and learn of them at home in modest and decent silence; it being a shame both to the women themselves, and the congregations of the faithful, that such women should be permitted to speak in that manner in a public way, to disturb them, and hinder their devotion, and the public service and ministry of such of either sex as were duly qualified and sent in the wisdom and power of the Holy Spirit. We, as a people, are of the same mind, that neither such women nor men ought to be suffered in such destructive work; but to be silent, and learn there, behaving therein with modesty becoming their sex, and the nature and end of what they undertake.

"5thly; And as to matters of fact, proving that women preached publicly in the Christian congregations in the days of the apostles, Paul recommended Phoebe, a sister in Christ, to the congregation then at Rome, as a minister, servant, and deaconess of the church at Cœnebrea; and in the same place mentions Priscilla with great respect, as his helper in Christ Jesus, which help can refer to nothing else but the work of the ministry, in which they were jointly and severally engaged.

"6thly; And though Apollus was a man of eloquence, and mighty in the Scriptures, and had been instructed in the way of the Lord in

some measure, and had taught the things of the Lord zealously and diligently, knowing of the baptism of John—Priscilla, as well as Aquila, expounded unto him the way of God more perfectly.

"7thly; These instances wherein that great apostle so much approves the public ministry of these holy and inspired women, plainly demonstrate that he was not against women's preaching; for then he must have written contradictions, in the name of the Lord, which would have destroyed the authority of his own ministry, since no man speaking or writing by the Holy Ghost, the Spirit of Truth, speaketh or writeth contrary things; and they cannot both be true, but the one or the other must needs be false, and suggests a reasonable suspicion that both are so; which cannot be thought of any apostle of Christ, or his ministry.

"Again, Paul directs how women ought to be attired, as well as men, in the time of the public exercise of their ministry or preaching; and if he had been against all women's preaching, and yet given directions how they should demean themselves, he would not have been consistent therein, nor one part of his ministry with another; for he saith, 'Every man praying or prophesying, having his head covered, dishonoreth his head; but every woman that prayeth or prophesieth with her head uncovered, dishonoreth her head;' and more in the same place to that purpose; which still further proves that the apostle was not against women's preaching in the congregations, but fully allowed it.

"And also Philip, an evangelist, one of the seven deacons, and an able minister of Christ, had four daughters, virgins, who did prophesy; that in they preached the gospel. And seeing they were daughters of so eminent a minister of Christ as Philip was, without all reasonable contradiction, not only Philip himself, but the churches of Christ, approved them therein. Then, if Paul had been against women's preaching and praying publicly in the church, and Philip for it, they would, in that case, have contradicted and opposed each other, to the confounding of the people, by a contradictory uncertain ministry; which cannot be admitted by men of truth, and sincere lovers of Christ. Upon the whole, we must needs conclude, that women as well as men, may, and ought to prophesy, preach, and pray publicly in the church and churches of Christ, when thereto called and qualified by Christ, under the immediate direction and influence of his Holy Spirit and power, as those holy women were; without which neither male nor female, under any other qualification or pretence whatsoever, ought to intrude themselves, or meddle, lest that question, under the displeasure of the Almighty, be asked of such, 'Who hath required this at thy hand?' and they incur a just punishment in the end."

During all this time the people were gener-

ally attentive, and seemingly pleased; but just in the close of the matter, I was attacked, all of a sudden, by a person who brake into the crowd behind me on horseback, and by his garb looked like a pastor of the people, and upon inquiry afterwards, I found he was so. His first salutation was after this manner: "Are you not ashamed thus to delude the people, imposing upon them false glosses on the Scripture? I am a stranger on the road, and drawing near this multitude to know the occasion of it, cannot but appear in defence of truth against your perversions." This true, you have a smooth way, a gaining countenance, and advantageous mien; but, sir, you look, in all this, the more like an emissary."

This being sudden, was a little surprising at first; but Truth being uppermost, I quickly challenged him to instance any particular wherein I had imposed upon them.

He instanced only in this, where I had said Phebe was a minister of the church; he said, "She was not a minister, but a servant, as appears by the text itself in that place; and it will not bear to be translated minister, as you say."

I replied, "Servant and minister are synonymous terms, and the word there used may be better translated minister; and if she was a servant, in what other respect to the church, if not in a public ministry, as a preacher? For Theodore Beza, in his Latin translation from the Greek, from which our English translations are made, hath it minister, and not servant, *ministra, ecclesie concensis*; and in the Greek Testament it is *διδασκαλος*; that is, minister or servant." I asked him before the people, if he would say, upon his reputation as a minister, as he professed himself to be, that it might not be properly rendered minister, which he refused; and then, in abundance of assurance, said openly, that I was no Quaker, but in a flattering way, added, I had more sense than to be a Quaker; for I had an ingenuous countenance, and a mien importing a better education. I rejected his flattery, and replied, that he might have had better education, and ought to have had more justice, than falsely to accuse one whom he never saw before, and put him upon his proof in that and several other things, in which he had overshot himself, in the apprehension of most of the people who heard him.

I observed to the people, who did not generally understand the meaning of the word emissary, that it was unduly applied by him; it imported a very high, as well as false charge, and as such I returned it upon him. Then he began to charge Jonathan Taylor, then in England, with being a Jesuit, he having been in that country seven years before, and instrumental to convince many in those parts, and thereby had greatly enraged the priests and their envious company against him, which they had not forgot. There stood up likewise another man, and said the charge was true. But I opposed them, telling the people, I very well knew Jonathan Taylor, and that he was no Jesuit, nor any thing like one in any respect; putting the priest in mind of what dangerous consequence it might be to himself to charge me, or any other innocent person, in that manner, since, by law, it touched the life of the accused, and was highly punishable in the accuser, if not legally proved. Then wheeling his horse about, he said he could not stay any longer, but rode hastily out of the crowd and went off.

The opposition this priest and the others made being for the most part notoriously false assertions and charges, without any proof, exposed him and themselves to the just censure of the people, and rather confirmed them in the truth of what we had delivered, than hurt the cause of Truth; which we, in some measure of the wisdom and power of it, had defended against them.

Yosemite.

This is a valley in Mariposa Co., California, through which winds the Merced river, about 155 miles east by south of San Francisco, unequalled for the grandeur of its scenery and the magnificence of its waterfalls. It is nearly in the centre of the State north and south, and just midway between east and west bases of the Sierra Nevada, here a little more than 70 miles wide. It is nearly level, about 6 miles long by half to one mile wide, and nearly a mile in perpendicular depth below the general level of the adjacent region. Its general direction is N. E. by E., and S. W. by W., nearly at right angles with the general trend of the mountains; its elevation above the sea is 3950 feet. Its granite walls are nearly vertical; their color is a light gray, reflecting brilliantly white in the sunlight, occasionally varied with veins of a brighter or deeper hue. In places stripes of a darker color, gray, brown and black, are produced by the flowing down of water carrying organic matter. Various species of trees and plants occur in the valley. In winter it is inaccessible, except on snow shoes; in summer the nights are cool, but the thermometer almost always rises above 80° in the middle of the day in June and July. There are several hotels for the accommodation of tourists. The valley is reached by stage or stage and horseback (about ninety miles) from Merced, Milton, and Oakdale, on branches of the Central Pacific railroad. The principal objects of interest will be described proceeding up the valley.

The first on the right is the Bridal Veil fall, formed by a creek of the same name, which is precipitated over the cliffs in one leap of 630 feet perpendicular upon a slope, down which it rushes in a series of cascades for a perpendicular distance of nearly 300 feet. The effect from the valley is as of a vertical fall of 900 feet, the base being concealed by trees. The column of water sways to and fro in the wind, seeming in the distance to flutter like a white veil. A little higher up is Cathedral rock, a prominent and massively sculptured pile of granite, the summit of which is 2,660 feet above the valley. Above this are the "Spires," isolated columns of granite at least 500 feet high, standing out from, but connected at the base with, the walls of the valley. Still further up a point of rocks projects into the valley, terminating in a slender mass of granite somewhat resembling an obelisk. This is known as "Sentinel rock." Its entire height is 3,043 feet; the obelisk form continues down for 1,000 feet or more from the summit, below which the rock is united with the wall of the valley. A short distance above is Glacier point, from which one of the finest views of the valley may be obtained. Back of Sentinel rock is Sentinel dome, 4,150 feet above the valley, which commands a fine view of the Yosemite fall. On the left side of the valley, opposite the Bridal Veil fall, is the Virgin's Tears fall, where the creek of that name leaps over the wall more than 1,000 feet. Just above is El

Capitan, an immense block of granite projecting into the valley, and presenting an almost vertical edge 3,300 feet high. Further and nearly opposite Sentinel rock, are Three Brothers, a group of rocks rising behind another, the highest being 3,830 feet and from its summit affording a splendid view of the valley and its surroundings. Above the Three Brothers, is the principal fall, Yosemite, formed by a creek of the same name. The vertical height of the lip of the fall is about 2,600 feet. There is first a vertical descent of 1,500 feet, when the water strikes shelf or recess, whence it makes a series of cascades, a fall equal to 626 feet perpendicular and then gives a final plunge of about 400 feet. The different parts of the fall being nearly in one vertical plane, the effect is described as being almost as grand as, and perhaps more picturesque than if the water were but a single leap from the top of the cliff the level of the valley. A striking feature of the Yosemite fall, believed to be peculiar to it and the Bridal Veil fall, is the vibratory motion of the upper portion under the varying pressure of the wind. The stream at the summit, at a medium stage of water, is estimated to be 20 feet wide to 2 feet in average depth. The Yosemite fall is believed to surpass vertical height all others having nearly the same body of water. A little east of it the cliff rises in a bold peak 3,030 feet above the valley. About two miles above the fall the valley branches into three cañons, forming the Merced river in the centre, the Tenaya fork on the left or north-west, and the Illouette or South fork on the right or south-west, (not to be confounded with the main South fork of the Merced, which is below the Yosemite valley). North of the Tenaya fork near where it enters the main stream, is an immense arched cavity called the Royal Arch and a rounded columnar mass of rock called the Washington column, and back of them the North dome, a domeshaped mass of granite attaining an elevation of 3,568 feet above the valley. Between the Tenaya and the Merced is the Half Dome, an apparently inaccessible crest of granite rising 4,737 feet above the valley, in which it is one of the most imposing objects. Mirror lake, an expansion of the Tenaya fork, is a beautiful sheet of water. In the cañon of the Merced are two falls, the lower, called the Vernal fall, with a perpendicular descent of about 400 feet, and the upper, called the Nevada fall, not quite perpendicular, with a height of about 600 feet. North of the river near the Nevada fall is an immense mass of rock, isolated and near perpendicular on all sides, called the Cap Liberty, which rises some 2,000 feet above its base. In the Illouette there is a fall estimated to be 600 feet high. Only two of the principal falls, the Vernal and Nevada, continue in existence throughout the season; the Yosemite and Bridal Veil almost disappear by the 8th or 9th months. The most favorable months for visiting the valley are the 5th, 6th and 7th, before the creeks are dried up. On the Merced above the Nevada fall is the Little Yosemite valley, about four miles long and from half a mile to one mile wide, 2,150 feet above the Yosemite proper, of which it may be regarded as a continuation. The big Sierra adjaent to the valley abounds in points of interest. About sixteen miles south is the Mariposa grove of big trees, and about eight miles north by west the Hetch-Hetch

ley on the Tuolumne river, smaller than Yosemite, but similar to it in character. The Yosemite valley was first entered by the men in 1851, when an expedition was organized to drive out the Indians who made their stronghold. It was first visited by artists in 1855. The first house was built in 1861. In 1864 an act of Congress was passed opening the valley to the State of California, on condition that the premises should be used for public use, resort, and recreation, and should be inalienable for all time. The Governor soon after appointed commissioners to have the management of the valley, and the State Legislature at its next session accepted the grant. The name Yosemite is an Indian word signifying "grizzly bear," but it does not the name now applied to the valley by the Indians, who call it Ahwahnee or Annonie. For "The Friend."

Thoughts and Feelings.

GOSPEL MINISTRY.

The message of the apostle Paul to Archipus was, "Take heed to the ministry which thou hast received in the Lord, that thou fulfil it." And in writing of himself he declares: "Though I preach the gospel, I have nothing to glory of; for necessity is laid upon me; yea, woe is unto me if I preach not the gospel." By these testimonies of Holy Scripture, with many similar ones, a part of the requisitions those entrusted with a gift in the ministry the gospel appears to be defined. While a man may not overlook what is also written therein by the same apostle, viz: "How beautiful are the feet of them that preach the gospel of peace, and bring glad tidings of good things." But, as continued, "they have not obeyed the gospel. For Esaias saith, and, who hath believed our report?" Is there not cause for the query whether the language, "Who hath believed our report," is not much special application to the present day? because of the very few that appearing to submit to the needful baptisms, and come up to the help of the Lord against the mighty, through a whole-hearted surrender of themselves with their all to His disposal and government? And why is this? Is it at the gospel preached still, in measure at least, "in demonstration of the Spirit and of power?" Or does the difficulty lie, in that the cares of this life, the deceitfulness of riches, and the love of other things' having choked the good seed sown in every heart, so stolen the affections of the people, that there is not room for the Heavenly Guest to come in and abide there? On this subject we recall, that that powerful minister of the gospel, Richard Jordan, in reference to preaching, to graify itching ears without the clearings of duty, says: "I fully believe that temptations of this sort (presuming to preach when He who hath the keys of David is ceased to shut) is the reason of so much lifeless ministry prevailing in the world (even among us as well as other people,) which I believe seldom rightly either opens the understanding or convinces the judgment." And it does not manifest, also, that the hearts of the people need a deeper baptism into Christ through the power of his Holy Spirit? Has not the time fully come when, unless He speak, whose words go forth at once to their effect, man is the help of man? Do we not need, more generally, a washing in the laver of re-

generation, with the renewing of the Holy Ghost? Oh! for more of that gracious influence to be showered upon us, that heavenly quickening power, which can at His bidding, with whom one day is as a thousand years, turn our captivity, make the desert to rejoice, and the wilderness to blossom as the rose.

Valuable and precious as true gospel ministry is, and "beautiful (as) are the feet of them that preach" it, its great aim and end is to direct people to Christ the living eternal Word, by whose atoning blood outwardly shed we are reconciled to the Father, or are put into a capacity for salvation; and by obedience to the quickening, leavening, transforming operation of His all-sufficient grace in the heart, we become "washed, sanctified, and justified in the name of the Lord Jesus, and by the Spirit of our God." Thus that spiritually minded servant of Christ, George Fox, says: "I was sent to turn people from darkness to light, that they might receive Christ Jesus; for to as many as should receive him in his light, I saw that he would give power to become the sons of God." "I saw Christ died for all men, was a propitiation for all, and enlightened all with His divine saving light; and that none could be true believers, but those who believed therein. When the Lord sent me forth to preach this everlasting gospel and kingdom, I was glad that I was commanded to turn people to that inward light, spirit and grace, which would lead into all truth and not deceive any."

Did we witness more thoroughly throughout the length and breadth of the camp a sincere turning to this "inward light, spirit and grace" which, as obedience keeps pace with knowledge, leadeth into all truth, we believe that our religious Society would not only be enabled to put on its beautiful garments and shine to the honor of the Heavenly Lightener and High Priest, independent of all outward or instrumental help, but that in addition to such immediate unction and outpouring from on high, that more anointed messengers and qualified laborers would be raised up, commissioned and equipped, to join those already in the field to the proclaiming the glad tidings of life and salvation. Thus would the strengthening of the walls and the rebuilding of the gates and waste places, go forward with renewed faith and earnestness in all; and especially to the joy of those whose hearts sigh, whose tears flow, and whose harps are hung upon the willows, because so few come to the solemn feasts of Zion.

In view of the low state of things, and also of "Who hath believed our report?" though at the same time there are many who love to have the itching ear filled and gratified, and may had the poor instrument; yet is there not much that is suggestive and instructive in the following by George Whitehead:—"In those days I clearly saw," writes G. W., "that the testimony required of us to bear, was not so much in words, declaration, or ministry, as to stand our ground in faith and patience, and to travel in spirit with secret breathing and earnest supplication unto God." "It was often before me," he continues, "that the Lamb and His faithful followers should have the victory, which was much of secret comfort to me many times: glory be to his name forever."

As gospel ministers, with others in the church as deeply responsible, if not as deeply concerned, get and keep low in the holy seed

of life, breathing and interceding in humility and contrition of soul unto the omniscient Father of the spirits of all flesh, will He not bow the heavens and come down? Will He not be jealous for his land and pity his people? Will He not arise for the sighing of the poor and the cry of the needy? Will He not lengthen the cords and strengthen the stakes of Zion? Will He not restore for what has been lost, and cause, a remnant at least, to eat in plenty, and be satisfied, and praise the name of the Lord?

For "The Friend."

Elizabeth Bathurst.

(Continued from page 218.)

In Elizabeth Bathurst's own account of her religious progress, she says that when she was in a seeking, but unsettled condition, "The whole world seemed to me as a very little thing, my soul desiring nothing but a part in God's kingdom, which made me earnestly entreat him, that He would lead me in the way everlasting"—"that amidst the various forms there are for worshipping of thee, my soul may certainly know how to serve thee aright, and wherewith to bring an acceptable sacrifice unto thee."

"The heart-searching God having then put my soul upon search to find out a people with whom I might join as with a communion of saints; I looked here and there into many assemblies, but alas! still I saw their conversations so much contradicting their professions, that I could heartily join with none of them, * * * still I overlooked this people of whom I am writing [Friends] as if it had been altogether unlikely I should find what I sought for amongst them, although natural affection had laid a bond upon me to judge charitably concerning them;* howbeit at length there was a way made whereby I was brought to search here also, notwithstanding the many false aspersions which my ears were filled with concerning them.

"So that now, I say, upon my search amongst them, I have found those who are guided by the principle of Truth in themselves, very careful to walk worthy of their high and holy calling. And by this their innocent life, I must needs acknowledge, I felt my own conscience powerfully reached for some time before my judgment was fully satisfied. But having those words of our Saviour imprinted upon my mind, 'If any man will do his will, he shall know of the doctrine, whether it be of God or whether I speak myself'; then immediately I consulted with my flesh and blood, but was made willing to give up to the obedience of His will revealed in my conscience; and so I came to receive the faith of that principle which the Quakers do profess, and by it am I joined to them not only in head but in heart."

This is another testimony to the well-settled truth that the holy lives of true Christians are the strongest, the most convincing proofs that can be produced of the reality and efficacy of religion; while the ungodly lives of merely nominal professors tend to bring religion into disrepute and strengthen the ranks of infidelity. How far-reaching is our influence for good or for evil, and what a fearful responsibility rests upon us all!

After she had been thus convinced of the truth, Elizabeth Bathurst speaks of the further

* Her parents appear to have become members of the Society before her own conviction.

work necessary to be experienced—and says: "For this I bow my knee to the God and Father of our Lord Jesus Christ, 'That He would prosper and carry on his own work more and more in every one of our hearts,' yet dare we not be found false witnesses for God in speaking of things beyond our measure, or boasting of that which we have not attained." "I would have none mistake, so as to think that conversion is wrought in an instant, for it is a gradual work, carried on by degrees in the soul, which is not presently complete and perfect; although the very first motion towards it, proceeds from a principle which is perfect in itself; and which will in time perfect the soul, as it follows the leadings thereof; but if any shall sit down by the way, on this side the mountain of true holiness, notwithstanding they began in the Spirit, yet if they end in the flesh, how far soever they have travelled on in their journey, still may their carcases fall in the wilderness."

Our blessed Saviour said to Simon Peter, "When thou art converted strengthen thy brethren." So, after Elizabeth Bathurst became settled in her religious convictions, she found a special injunction laid upon her from "the God of all grace" "to proclaim his free grace and rich mercy" towards her former acquaintance. She says—"So came the Word of the Lord unto me, 'Go invite them to the feast of ingathering, that so they may be allured to turn in unto me, and be gathered by me, in this the day of the stretchings forth of the arms of my mercy.' To this end she not only labored vocally among them, but published a doctrinal treatise called "Truth's Vindication," designed to remove the misapprehensions and prejudices which prevented many from embracing the offers of Divine love.

In this work the views of our Society on many important points of Christian doctrine are clearly stated and upheld with Scripture proofs and much force of reasoning. Of what may be termed the cardinal doctrine, the one most earnestly pressed by our early members, she says—it is a principle of Divine Light and Life of Christ Jesus placed in the conscience; it is the Grace of God that bringeth salvation, and hath appeared to all men; it is the Light of Jesus, who is that true Light that lighteth every man that cometh into the world; it is a measure of the Divine Spirit; it is the incorruptible seed by which we are begotten to God; and that it comes from God through Christ.

It is a precious thing to witness a true waiting upon the Lord. Many great and glorious promises are made to those that truly wait upon Him. "That they wait upon the Lord shall want no good thing;" this, to witness and enjoy, is the substance of all. While we waited upon invented means, men and books, upon our own thoughts and imaginations, our own wisdom and understanding, we wanted the good things: these were not sufficient to lead us to the knowledge, nor the enjoyment of them.

Hereby may all Christendom, so called, be tried and judged; they pretend a worshipping and waiting upon the Lord, but they want the good things, and the evil things abound amongst them: so are hereby found false witnesses, those who say they wait upon the Lord, and that He hath not fulfilled his promises to them.

A remnant are, at this day, true and faithful witnesses, that the Lord is faithful, just and true to his promises, and that He hath fitted and furnished them with the heavenly treasures, the good things of his kingdom, as they truly wait upon Him. This waiting doth not begin when our solemn meetings begin, neither doth it end with them, but remaineth always.—*William Shee'en.*

LETTER TO JESUS.

A postman stood with puzzled brow
And in his hand turned o'er and o'er
A letter, with address so strange
As he had never seen before.
The writing cramed the letters small,
And by a boy's rough hand engraven.
The words ran thus: "To Jesus Christ,
And underneath inscribed, 'In Heaven.'"

The postman paused; full well he knew
No mail on earth this note could take;
And yet 'twas writ in childish faith,
And posted for the dear Lord's sake.
With careful hand he broke the seal,
And rev'rently the letter read;
'Twas short, and very simple too
For this was all the writer said:

"My Lord and Saviour, Jesus Christ,
I've lately lost my father dear,
Mother is very, very poor,
And life to her is sad and drear.
Yet Thou hast promised in Thy Word
That none can ever ask in vain
For what they need of earthly store,
If only asked in Jesus' name.

"So I am writing in His name,
To ask that Thou wilt kindly send
Some money down; that Thou wilt spare
And what is right for us to spend,
I want so much to go to school;
While father lived I always went,
But he had little, Lord, to leave,
And what he left is almost spent.

"I do not know how long 'twill be
Ere this can reach the golden gate;
But I will try and patient be,
And for the answer gladly wait,
The tidings reached that far-off land,
Although the letter did not go,
And straight the King an angel sent
To help the little boy below.

Off to his mother he would say,
'I knew the Lord would answer make
When He had read my letter through,
Which I had sent for Jesus' sake.'
Ah! happy boy, could you but teach
My heart to trust my Father's love,
And to believe where aught's denied
'Tis only done my faith to prove.

—*The Methodist.*

Selected.

THE SUMMONS.

My summons may come in the morning,
Or the deep, peaceful slumber of night;
It may come with a lingering warning,
Or as quick as a flash of sunlight;
It may come while I'm thinking of heaven;
It may come while my thoughts are astray;
While I'm sitting alone in my dwelling,
Or greeting some friend on the way:
But the day or the hour, when the bidding
Comes to me, I never can know,
And I pray, at the call of the Master,
I may answer, "I'm ready to go!"

It may come while I'm working for others,
Or laying out plans for myself;
It may come when I'm laid, as a well-worn
And useless old book, on a shelf;
It may come when my life, full of sweetness
Would fain have it tarry awhile;
It may come when my sorrow's completeness
Makes me welcome to the call with a smile;
Though it fall in the gentler of whispers,
Or sounds with a deep, startling knell,
I pray only that I may be ready
To answer, "Dear Lord, it is well!"

—*N. Y. Christian Advocate*

Testimonies to the Way of Salvation.

One of Edward Burrough's tracts is entitled "The everlasting gospel of repentance and remission of sins." It contains certain propositions which show his view of the way of salvation. These commence with the statement: "None can be saved from the wrath of the Lord but they who are saved from the sins; for sin brings the wrath of God upon the consciences of men, and anguish upon so and body; and [those] who are not saved from sin, cannot be saved from wrath; for wrath pursues the guilty. * * Therefore, who soever will be saved from wrath, must be saved from sin, and Christ must purify his heart, and the blood of the Lamb must sanctify him, and his conscience must be cleansed from the guilt of transgression, and Christ must live in him, and he must live the life of faith, which gives victory over all sin, or else he cannot be saved with the salvation of God eternally."

The succeeding propositions unfold the manner in which these blessed results are attained. "Whoever will be saved with the salvation of God, must own the Light of Christ Jesus in his own conscience, and he must believe in this Light, and walk in it, even the Light in his conscience that convinces him and checks him for his evil deeds, and that lets him see what sin he is guilty of; you must believe in this Light and follow it, and depart from that and forsake that iniquity, which it convinces you of, and do that good which it moves your hearts into, or else you can never be saved. For, if you continue in evil doing, contrary to the Light of Christ in your own consciences, you are in a condemned condition, and you cannot be justified of the Lord while you are accused by the Light within you of such and such sins, and that you are guilty of them, and forsake them not."

"Again, whosoever will be saved, must be born again of the Seed of God, and must be changed and renewed in mind and heart and spirit; and old things must pass away, and all things must be made new; and a new nature must live in you, and the image of God must be brought forth, which is righteousness and true holiness, which is like unto God; and this is the new creation, which every one must witness to be wrought in him that ever enters into God's kingdom. For, saith Christ, 'Except a man be born again he cannot enter into the kingdom of God.' For it is not a profession of religion made with the lips, nor the practice of duties and ordinances taken on and performed in the old nature, and a holding of truth in unrighteousness; this is not the way of salvation, but it is the regenerating and making like unto God, being His image of justice, truth and righteousness; it is this in which men may be saved eternally."

"Again, whosoever will be saved, must receive the Spirit of God, and it must dwell in them, even the Spirit of the Father; and they must be taught by it, and led into all truth, to do the truth, and speak the truth in all things." * *

"Again, all that will be saved, must be sanctified, cleansed and purified from all unrighteousness, by the Spirit and Word of God, whereby every heart must be made clean, and every conscience sprinkled with the blood of the Lamb; and the body of sin and death must be put off, and the bondage of corruption must be broken, and iniquity must be

saken and turned from, and sin must be aged in the flesh, and purity, holiness and righteousness must live and reign in all that I have said." * *

"Again, whosoever will be saved, must be in Jesus Christ, and receive him; and every must take up his daily cross and follow him; and must know Him to mortify and sanctify them to the world; and He must work some things in you by his Spirit spiritually, as He wrought without you in his prison, or else you have no part in Him, nor salvation by Him. For it is not enough to read the law, only to believe that there was such a one as Christ, and that He did and spoke such and such things at a distance about you; for many may make a belief a profession of this, and yet perish; but in that was, of whom you read, without doubt, must you receive and witness within you."

For "The Friend."

Progress of Civilization among the Indian Tribes in the West under the Care of Friends.

The following table contains the condensed statistics of the Indian tribes, committed by the Society to the care of the Society of Friends (Orthodox), and covers the period from 1808 to 1878 (both inclusive). The materials for the table have been collected from various sources, and carefully compared and reduced. Various irregularities in the figures of the several years are fully explained by the history of the tribes for those years, and also confirm the general accuracy of the table. For instance, the crops in the Indian Territory and Kansas, in 1874, were almost wholly cut off by drought and grasshoppers. The season of 1876 was also a very unfavorable one at many of the agencies. The table shows that in the ten years in which Friends have had the care of these Indians:

- 1. The number of children attending school has increased nearly seven-fold.
- 2. The number of acres cultivated by Indians has increased more than five-fold.
- 3. Their corn crop has increased more than ten-fold.
- 4. Their potato crop has increased nearly fold.
- 5. Their hay crop (cut from prairie grass) has increased five-fold.
- 6. The number of cattle owned by Indians has increased fourteen-fold.
- 7. The number of hogs owned by Indians has increased thirteen-fold.
- 8. The number of houses occupied by Indians has increased three-fold.
- 9. The number of ponies owned by Indians decidedly diminished. The chief wealth still resting in Indians lies in their large herds of ponies. As they locate and begin to adopt steps of civilized life, they exchange ponies for cattle and hogs.
- 10. In 1868, more than half of these Indians were dead, roving and hostile—fresh from a war which had cost many lives and millions of dollars—embittered against white people and exceedingly averse to civilization. None of their children had been in school. They do not cultivate the soil, and had neither corn nor herds, except ponies. Most of the tribes have been compelled in these ten years to undergo the loss and retardation inseparable from a removal to the Territory in Kansas.

WM. NICHOLSON,
Late Gen. Agt. Committee of Friends.

This table includes some tribes not included in the table of 1874.

Incidents and Reflections.—No. 5.

SILENT MINISTRY.

The most cogent train of reasoning, and the most earnest appeals that a preacher can make, will have little or no effect in awakening a sinner to true repentance, or in promoting the spiritual welfare of his hearers, unless it be accompanied by a measure of that Divine power which the Lord alone can dispense. Where the preacher is careful to minister only in the authority and under the direction of the Head of the Church, he may safely leave the results in his Master's hand, who has declared that his word shall accomplish that which He pleases, and shall prosper in the things whereto He sends it. We are prone to place too much reliance on words themselves, and to look more to the preacher than to the quickening Spirit which must give force to their expressions. Yet there is a ministry without words—a communion of spirits in which refreshment and consolation spreads from one person to others, without anything being said. Thomas Story describes an interesting occurrence of this kind, when speaking of the first meeting he attended among the Society of Friends. He says: "Not long after I had sat down among them, that heavenly and watery cloud overshadowing my mind, broke into a sweet, abounding shower of celestial rain, and the greatest part of the meeting was broken together, dissolved and comforted in the same divine and holy pre-

sence and influence of the true, holy and heavenly Lord; which was divers times repeated before the meeting ended. And in the same way, by the same divine and holy Power, I had been often favored with before, when alone; and when no eye but that of Heaven, beheld, or any knew, but the Lord himself; who, in infinite mercy, had been pleased to bestow so great a favor.

"And as in the many small springs and streams, descending into a proper place, and forming a river, become more deep and weighty; even so, thus meeting with a people gathered of the living God into witness of the enjoyment of his divine and living presence, through that blessed and holy medium, the mind of Jesus Christ, the Son of God, and Saviour of the world, I felt an increase of the same joy of the salvation of God."

In speaking of his early religious experience, after joining the Society of Friends, the same writer says: "My delight was continually in the Truth, and I desired no company but of Friends, and frequented meetings on all occasions; where my heart was frequently tendered by the Truth, and it often reached and affected others by its medium, and sometimes very much; so that I became very dear to Friends, and they to me; And as that tenderness was, in its nature, an involuntary ministry, being an operation of the Spirit without words, I found, for some time, great satisfaction and safety in it."

Having a desire to visit some other meetings, he went a short journey with Andrew Taylor, a minister of that day. He says, the meeting at Sanderland "proved a very comfortable time of the enjoyment of the good presence of the Lord; with which my mind and heart being plentifully furnished, it moved by its own divine force, greatly to tender me, and bathed me in a flood of tears, from divine, melting love, and had the like effect over the meeting; and this happened in time of silence. After some time Robert Wardell, a ministering Friend, at whose house we lodged, spoke some sentences; by which, I perceived, he thought I should have uttered some words, by way of public ministry, at that time. But I did not apprehend my time was then come for that service; and it had the same effect, and perseverance, more than if I had uttered words: For it was a ministration of the Word, by a more immediate operation, and a great mystery.

"After the meeting many Friends came to me, and expressed so much love and respect as gave me occasion to consider what could be the reason of it; for they were all strangers to me, and I to them; and being but a child in the knowledge of the invisible operation of the Word of Truth, and its effects, by instruments in a way of silence and sympathy, I had looked at its effects only in myself for my own strength and consolation, yet could not but observe, that at the same instance as Truth broke in upon me in an eminent manner, (with which, in other places, I had been often favored before,) it affected the living part of the meeting the same way, at the same time: And it is clear to my understanding by experience, that there is a communication of divine love through the one Spirit, and that unspeakable, among the sanctified in Christ, at this day, as well as in time past; and that in a state of holy silence, as the members of Christ sit together in their heavenly places in Him."

Recent Discoveries and Scripture.

At the recent Church Congress in Sheffield, we find one of the sittings was occupied with discussing the question,—"What definite results as to the interpretation of Scripture have been produced by the discoveries in Egypt, Nineveh, Palestine, and the Catacombs of Rome?" Several papers were read on this important and interesting question: one by Canon Tristram, of Durham, is as follows:—

"When from the historical we proceed to that eye of history, the geographical and topographical details of the early Scriptures, our attention is directed chiefly to the journal of the wanderings of the Exodus and to the allotment of the Land of Promise. These are full of topographical notes on the Sinaitic Peninsula and the various countries east of Jordan; while the book of Joshua describes, with the fulness of a government survey, the various tribal boundaries, and contains long lists of the towns and villages allotted to each tribe. The recent surveys of the Sinaitic Peninsula have shown the most exact accordance of the record of the Exodus with existing topographical facts; an accordance which would be inconceivable unless the history were compiled at the time. — Holland's researches have shown that at that very date the mining region north-east of Suez was occupied by strong Egyptian garrisons, and that the Israelites could have taken no other route than the southern one between Jabel-on-Rabah and the Red Sea. Then, after crossing the Red Sea, we have Ayân Mûsa (Moses' Well), then three days' journey without water; then the bitter springs of Marah; then Elim, with its palm trees and vegetation still existing. From Elim they go back to the sea, and follow down the coast. Then, where a bold headland forbids further progress, they removed from the Red Sea and encamped in the wilderness of Sin, i.e., where the headland Ras Abu Zenneh forbids further passage they turn inland and double it. Thence there is only one road evading Tanjeh, which, with their baggage, the Israelites could have taken towards Sinai, with two halting places by the way. Here — Holland has traced Replidim, and beyond the pass the old circular huts of an extinct race — the Amalekites — with their hearthstones, and the remains of bones and charred wood. In the open space we find every condition required for the delivery of the law from Sinai, and also for the most minute details of the battle of Replidim.

"Eastward from Sinai, again at a distance of three days' journey, Professor Palmer discovered a piece of ground covered for many acres with the stone circles which mark the site of camps, but of a different shape from any now in use. The hearthstones were still there, and pieces of charcoal beneath the surface. Stretching to a great distance round the camps were numbers of grave mounds, said by the Arabs to be the remains of a vast pilgrim caravan which pitched there ages ago, and was afterwards lost in the desert of the Tih. No doubt remained in the mind of the explorers that they were actually on the site of Kibroth Hattannah, and that their fingers as they turned the stone heaps and examined the teeth amongst the dust were grimed with the dust of them that lasted. Exactly a day's journey further on, they discovered the wells and romantic oases of Ain Hudherah, the Arabic equivalent for Haze-roth. If beyond this each halting-place has

not been traced and identified, it is simply because from the nature of the case it is most unlikely that names probably given at the time by the travellers themselves to feature less camping grounds should have been preserved. But the latter part of the wanderings has been traced with the same accuracy as the earlier. A discovery by — Holland only this year of a labyrinth of valleys, slopes, roads, and hilly country in the north of the desert of Tih in the region just south of Ain Gades, recognized as Kadesh Barnea, solves all the difficulties connected with the protracted sojourn of a vast host for many years in this region.

"Proceeding from the watershed of Jebel Tih, northward through Jebel Mugrah, — Holland found what seems to have afforded the road known as 'the way of the spies,' a wide region full of traces of ancient habitations and cultivations. West of this region he has traced an easy, direct, and well-watered route to Egypt, with wells and ancient ruins, and numbers of flint flakes and arrow heads, proving that it was a road much used in very early times, while large tracts of land are still cultivated there. The pass of Akkrabim, the mountain of the Amorites, Tephath, of Hormal — none of these were mere traditional names, but actually recognized sites where the march of Israel can be most distinctly traced. I need not further trace the later history of Numbers and Deuteronomy, the minute details of all the movements of Israel, round Elen through Moab, and to the plains of Shittim, or the high places of Balak and Baham.

"Then, entering into Palestine itself, with the book of Joshua in our hands, we scarce need a further guide. The officers of the Palestine Exploration Fund have laid down in that ordinance map, which in a few weeks will be in your hands, 2770 names, where previously only 450 were laid down. Of all the long catalogues of Joshua, there is scarce a village, however insignificant, which does not retain for its desolate heap or its modern hovels the Arabic equivalent for the name written down by Joshua 3300 years ago. But it is not merely in the continuance by an 'ocult Providence' of the names in the very places where they ought by the record to be, it is the little touches which often startle by the way in which they carry conviction of the time and place of the sacred penman. Thus, when we read that Abraham's second encampment was on a mountain east of Bethel, and that he pitched his tent, having Bethel on the west and Hai on the east, and there he builded an altar; and when, between the site of Bethel and the desolate heap, the 'Tell' of Oi, we observe a valley, and in its centre a lofty hill, with undecipherable ruins on its summit, whence, and whence alone a view of the Jordan valley and the head of the Dead Sea is obtained, we know exactly where Abraham stood, and where the writer placed him. This is proof and illustration rapidly accumulating; the one definite result is certainly this, that hostile criticism must now be subjective and not objective. If there be a corroborated or illustrated history of the world, we have it here. The solvent of unbelief cannot dissolve the sculptured stones and burnt tablets of Chaldea. But scepticism, like other organisms, may still preserve her continuity, while, Proteus like, she develops new forms by a process of evolution; that theory which its

rotaries tell us is universally accepted by: thinking and educated men, while in the substance they admit that the proofs are not forthcoming, nor is it reasonable to expect they should be. The historical assault has been triumphantly repulsed. We calmly await the next charge. For *magna est veritas et prevalet.*" — *British Friend.*

For "The Friend"

Thomas Ellwood, speaking of George Fox says, "Ages to come and people yet unborn shall call him blessed, and bless the Lord I raising him up; and blessed also shall we be if we so walk as we had him for an example for whom this testimony lives in my heart, I lived and died the servant of the Lord."

This prediction has been fulfilled and is being fulfilled in the hearts of many; nevertheless there is a large portion of the members of the Society that he was so instrumental in gathering, that professes to think, although he and other of the primitive Friends were good men in their way, we have nothing to do with their convictions and experiences but are called to take a new "departure, more in accordance with the progress of the age.

If told they are not promulgating the religion taught and exemplified by the early Friends, they appear to think it a quite sufficient reply, that they are not called to preface the belief of George Fox and his fellow-labourers; but Jesus Christ and Him crucified. This may be true if George Fox and other founders of the Society did not preach Jesus Christ and Him crucified; and might be said with equal truth of the apostles, were they deficient respecting those fundamental truths. No one is required to rest his faith, on the belief or teachings of those "Sons of the morning," or to propagate the doctrines and testimonies they impressed upon professing Christians merely because they believed them to be the fruits of the gospel of Christ. But no one can be justified, while remaining a member of the Society of Friends, to hold out the idea that its founders saw but darkly the truths and fruits of the gospel, and that the greater light bestowed on the present generation detects their errors, and leads into a less narrow, more liberal way to life and salvation, and yet claim to be their representatives.

We are told the Society is in a transitional state; the old beliefs and practices are passing away; a new system is taking their place, and therefore it is to be expected that old characteristics and landmarks should disappear. This is obviously correct, so far as it relates to those who assert it and induce others to unite with them; but that does not affect the plain, indisputable truth, that those admitted changes should carry with them an honest relinquishment by those adopting them of their claim to be recognized as Friends. Not that such have not the right to make whatever changes in their faith and usages they may deem improvements, but they have no right to impose them on those who remain attached to the "good old way."

We suppose there are different causes assigned by different individuals for the revolution any results now widely seen and known, and others evidently developing. We can hardly suppose they have originated from a desire to shatter the system of Quakerism merely because it is old, or to reject its anciently established principles because they have been trans

mitted through many generations from the past. If tracked home, we believe it will be found they have sprung mainly from an insidious growth of disbelief in, or depreciation of that fundamental doctrine of the Gospel, of an universal saving Light, bestowed on all men as God's gift for man's salvation; and a corresponding undue exaltation of the Holy Scriptures as the primary rule of faith and practice. The fruit naturally produced by this, has been an exaggerated estimate of the value of the study and exposition of the Bible, and of the instrumentality of bible-schools, or bible-classes therefor.

Friends have ever believed, that "All Scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, or instruction in righteousness; that the *word of God* may be perfect, thoroughly furnished unto all good works;" that "They are able to make wise unto salvation, *through faith which is in Christ Jesus*;" and that they are the only Divinely authorized outward rule and test of doctrine and practice. They have also constantly maintained that as they have God for their author, so his Holy Spirit alone is their rightful and certain interpreter; and that it is only as this Spirit is waited for and its enlightening influence experienced, that they can savingly understand and apply the spiritual truths contained in them.

It was the Light of Christ inwardly revealed, that enabled the apostles and their converts to practically comprehend the offices of Christ, and to have a personal knowledge of the fulness of the blessing of his gospel; as one of them thus testified, "God, who commanded light to shine out of darkness, hath shined in our hearts to give the light of the knowledge of the glory of God in the face of Jesus Christ," gain, "That the God of our Lord Jesus Christ, the Father of glory, may give unto you the spirit of wisdom and revelation in the knowledge of Him; the eyes of your understanding being enlightened, that ye may know what is the hope of his calling, and what the riches of the glory of his inheritance in the saints, and that the exceeding greatness of his power to us-ward who believe, according to the working of his mighty power." The prophet, in view of the falsity of any other acknowledgement of divine truth than that derived from internal conviction by grace, declares of some in his day, "Though they say the Lord liveth, surely they swear falsely." And the apostle, of full confidence in the indispensable necessity of the insinuating of the Light of Christ, to enable any to comprehend and accept the truths of the Gospel, unhesitatingly asserts, "That no man can say that Jesus is the Lord but by the Holy Ghost."

In thus giving the pre-eminence to the revelations of the Holy Spirit in communicating knowledge of the things pertaining to God, and the salvation of the immortal soul; and the necessity of its mediation for the right understanding and proper application of the sacred truths recorded in the Holy Scriptures, Friends do not detract from them as a divinely inspired narrative of the facts, principles, receipts and promises connected with the religion of Christ; nor in anywise discourage their diligent perusal, with the mind turned in humility to wait on the Source of all saving knowledge for their opening on the understanding, which is an incumbent duty. The great error is in attempting to measure the meaning of the text and its application, as

the revelation of the divine will for our own guidance, or teaching it to others by our own intellectual powers alone, however strong or cultivated. "The natural man receiveth not the things of the Spirit of God, for they are foolishness unto him; neither can he know them, because they are spiritually discerned."

There is perfect harmony between the sacred truths contained in the Scriptures and the teachings of the Holy Spirit to the soul; but owing to a lack of waiting for and experiencing the instruction of Him who alone has the key of David, the incapacity of the natural man, the deceitfulness of his heart, and the bias of education, lead him to give false interpretations of, or to draw wrong inferences from the texts; hence wide diversities, and palpable contradictions in doctrines are entertained and inculcated, tending to confusion and blindness. The truths of the gospel are not unsettled or changed by the unauthorized manner in which they are taught or received, but their meaning may be dangerously perverted; and they may be admitted solely from the consent of the understanding; but the knowledge thus obtained, in no sense makes wise unto salvation. The fundamental conviction of their verity and spiritual meaning, is only communicated through the Spirit which first dictated them; and this applies to both teacher and scholar.

There is a danger which comparatively few escape who are habitually engaged in studying and teaching in bible-classes; that is relying on the knowledge thus obtained for the rule of life, instead of close watchfulness for and childlike obedience to the gentle intimations of Divine Grace in the secret of the soul, which alone can bring salvation. The temptation is hardly recognized, as this substitution is not acknowledged or thought attendant upon the professed object for which such schools are instituted, and its insidious influence may obtain ascendancy almost unawares. "Ye search [for search] the Scriptures, for in them ye think ye have eternal life, and they are they which testify of me; and ye will not come to me that ye may have life." Is it not often apparent that the actors, both teachers and scholars, give unmistakable evidence they have not learned to bear the yoke in their youth; to sit alone and keep silence because they have borne it upon them; to put the month in the dust if so be there may be hope? Studying or expounding the Scriptures cannot bring forth the new birth, nor carry on the work of regeneration. That can be done only by the Holy Spirit; a measure of which is therefore given to every man to profit withal. But man in his natural state, when earnestly engaged in things of a religious character, may readily become puffed up with an idea of his own attainments in biblical knowledge, and his capacity to teach others the things that appertain to the kingdom of God; and, among Friends as well as other religious professors, there are many assuming the office of Teachers of the mysteries of the Gospel of salvation, who have never been called thereto by the Holy Ghost.

When George Fox and the early Friends came forth, he says, "All Christendom was on heaps" about the Scriptures, "because they were not led by the same Holy Ghost, as those were who gave forth the Scriptures; which Holy Ghost they must come to in themselves, and be led by, if they come into all the truth of them;" and yet they were great sticklers

for studying and explaining the Scriptures; but slighted or contemned the doctrine of a universal and saving Light in man.

William Penn after speaking of the "Light of Christ within, as God's gift for man's salvation," as the distinguishing doctrine of Friends, says, "This is the root of the goody tree of doctrines that grew and branched out from it." Here was the origin of the various testimonies which Friends were called to maintain before the world, and of the strict, self-denying lives they felt constrained to lead. Not that it begot in them any disesteem for the Scriptures, but accepting the Holy Spirit as the primary rule of faith and practice, and the only reliable exponent and applicator of the sacred truths recorded by holy men under divine inspiration, they held them as a secondary rule, and properly understood, an inestimable blessing, by which the *man of God* might become perfect, thoroughly furnished unto all good works.

The immediate operation of Divine Grace on the soul being the efficient cause of bringing forth the fruits of primitive christianity into which Friends were led, it is a natural consequence that if there is a departure therefrom, and something else substituted therefor, clearness of vision relative to the testimonies which have sprung from it, and which involve cross bearing, will be lost, and the members will be exposed to the danger of deserting many important characteristics of their profession, heretofore esteemed essential to maintaining the position assigned to Friends in the militant church by its glorified Head and High Priest.

Unhappily the tendency of the bible classes, &c., among Friends to detract from the importance of the doctrine of the Light of Christ as the primary rule of faith and practice, and the necessity of attention and obedience to it, is deplorably illustrated by the course of the modern reformers in the Society, who lay great stress upon the support of such agency as a principal means for promoting their *improvements*. How has the testimony to the call and qualification for the ministry been practically lowered, and the character of the preaching consequently depreciated among very many! the beautiful and solemn practice of silent waiting upon God in our meetings for Divine worship, denounced, as unfit for mixed assemblies; and reading the Scriptures, singing, repetition of prayers, and telling experiences introduced in its place, and very generally practised in many meetings. The testimony to plainness of speech, behavior and apparel is very generally disregarded, and even derided by many of them; and there is a close approximation to a paid ministry among not a few in conspicuous positions; who also officiate as "ordained ministers"—as the law pre-scribes—in performing the ceremony of marriage, and receiving their reward therefor.

That man in his fallen and lost state can empower himself to deny his natural propensities, and translate himself out of the darkness of sin into the light of the gospel, seems such a vain imagination that we are staggered when told that any professing to be Friends can believe it; and yet there is no doubt that some of the more advanced among the reformers, in advocating their favorite doctrine that Christ has paid the whole ransom for man, and that we may lay hold of complete salvation whenever we please, by believing in

his atoning sacrifice, and, by appropriating its efficacy to ourselves stand fully acquitted in the Divine sight, declare that we are not to expect to receive the gift of the Holy Spirit until after becoming reconciled believers.

Well did Philadelphia Yearly Meeting declare in its "Appeal" for the ancient doctrines of Friends, in 1847, "Such is the deceitfulness of the human heart, and the subtlety of the unwearied adversary, that man may imagine himself to be a believer in Christ, justified by his blood, and saved by his imputed righteousness, merely because he believes the doctrines of Holy Scripture, while he has never known the flaming sword that keeps the way of the tree of life, to pass upon the transgressing nature, separating between the precious and the vile, and making him a true believer in Christ, from the inward, heart-felt knowledge of Him as the wisdom of God and the power of God." * * * "Not being grounded on the inward work of Christ upon the soul, this religion of sentiment rather than of experience, does not make obedience in the day of small things, the essential condition of greater attainments; but rather reasons away these little requisitions of duty, as things of small account, and so tramples under foot the cross of Christ, and consents to an alliance with the spirit and the pursuits, the maxims and the manners of the world." The History of Skating.—It can only be conjectured when skating was first practised, but it was certainly very long ago. In that ancient collection of Scandinavian songs and legends known as the "Edda," Uller, the handsome god, is described as being the possessor of a pair of skates. This proves that skating is, at least, a thousand years old. It is supposed to have been introduced into England about the twelfth century, and into the central parts of Europe somewhat earlier. It is curious, that although all northern nations possessed the sledge, those of America knew nothing of the skate, while the people of Europe did not have the snow-shoe. The course of invention varied, according to requirements. In America, in high latitudes, the snows are heavy, and open ice is comparatively rare. In the corresponding parts of Europe, there is much more clear ice, and proportionately less snow.

The ancient skates were nothing but the shinbones of oxen or other large animals, pierced with holes to receive the cords or thongs which bound them to the feet. Fitzstephen's "History of London," written in the thirteenth century, is the earliest English book in which skating is spoken of; and we learn, from his description, that the performers upon these bone skates kept themselves in motion by striking against the ice with an iron-shod pole. Sometimes specimens of these bone skates have been discovered, in the progress of excavations, in several European countries; and a very well preserved pair, so found in England some years ago, can now be seen in the British Museum.

It is unknown when or where iron was first employed in the construction of skates. It was probably in Holland; for skates of a pattern very much like that of the ones we have now, not only were known in that country, but were extensively used by all classes of its people, long before the pastime of skating became general elsewhere. Skating is some-

thing more than a pastime in Holland. There it is one of the useful arts, and is universally practised and highly esteemed. It offers a very convenient mode of travel in winter over the canals that almost entirely supply the place of roads in the land of dykes; and people skate from farm to farm, and from town to town, and to church, and to market, often carrying heavy burdens.—*St. Nicholas.*

Humility is a virtue that all preach, few practise, and yet everybody is content to hear. The master thinks it good doctrine for his servant, the laity for the clergy, and the clergy for the laity.

THE FRIEND.

THIRD MONTH 1, 1879.

SUMMARY OF EVENTS.

UNITED STATES.—Of the twelve annual appropriation bills, only five have received final action of Congress. The post-office appropriation bill, passed the Senate on the 20th ult., with the Brazilian subsidy and other amendments. It is proposed to give to two lines, one from New York, for each nautical mile, Rio Janeiro, each \$30 per annum for each nautical mile of distance one way. The service to be monthly. The Anti-Chinese bill having passed the House, is now in the hands of the President. The feeling of opposition to this bill, throughout the country, is very strong, and hopes are entertained the President may veto it. A bill to regulate the pay of letter carriers, adopted by the House last 6th month, passed the Senate on the 19th ult. It authorizes the Postmaster-General to establish two classes of carriers for all cities having a population of 75,000 and upwards. The first class to receive \$1000, and the second \$800 per annum.

It was officially stated before the Senate Committee on Agriculture, that the country is free of pleuropneumonia among cattle.

There were distributed by the railway postal clerks on the line between New York and Pittsburg during last month, 56,800 packages of letters, 11,152 sacks of papers, making an aggregate of 341,160 pieces of letter for routes, and 1,139,446 pieces mail separated and made up for routes and offices. There were 28,000 registered packages; 46 men were engaged in the distribution.

The fourteen Reading Railroad steam colliers made 504 voyages last year, and carried 550,971 tons of coal. One of the fleet, the Leopard, was lost.

Very cold weather is again reported from the north-west of Winnipeg on the 20th ult., at Fort Pelly, 38 deg. The most severe snow storm of this season, in New England, prevailed on the 20th ult. Across Mount Washington the wind is stated to have been blowing at the rate of 114 miles an hour; the buildings are buried to their eaves in snow, and the temperature is frequently 20 deg. below zero.

The average attendance of the Massachusetts public schools, last year, is given at 228,447. There were 1,115 male teachers, and 7,290 females. The salaries of the former were \$75,641; latter \$32,044 per month.

The existence of yellow fever in New Orleans is denied by the President of the Health Board of that city, Mayor Patton, Governor Nichols, and other prominent officials and citizens.

The engine of a new propeller exploded during a trial, in one of the streets of Stockton, Cal., on the 23d ult., killing 16 persons, and injuring 26 in the assembled crowd.

The number of deaths in this city, for the week ending 21 noon on the 22d ult., were 353. Of this number 23 died of consumption; 4 diphtheria, 15; disease of the heart, 11; typhoid fever, 10; and inflammation of the lungs, 10.

Markets, &c.—U. S. sixes, 1881, 106½; 5 per cents, 104½; 4½ per cents, registered, 105½; do coupon, 106½; 4 per cents, 100½; 1001; 5-20s, 1867, 102½; do 1868, 102½.

Trade in most departments is reported as fairly active during the week, but prices unsettled. Cotton was in fair demand, about 1000 bales of middlings sold at 9½ a 10 cts. per pound for uplands and New Orleans.

Fresh Fruits.—Apples were in demand—mixed cars

sold at \$1.90 a \$2.10 per bbl; choice lots \$2.25. Citrus fruit, \$7 a \$8 per bbl.

Seeds—Clover 6½ a 7 cts. per lb. Flaxseed, \$1 a \$1.40 per bushel. Timothy, \$1.10 a \$1.25.

Flour.—Minnesota extra, \$4.50 a \$5; Penna., \$4.50 a \$4.75; Ohio extra family, \$4.50 a \$5; fa \$3.50 a \$3.75; patent, \$7.25; and other higher grades \$7.75 a \$8. Rye flour, \$2.65 a \$2.75. Corn m \$2.55 a \$2.60.

Grain.—Delaware amber wheat, \$1.10 a \$1.11 bushel; western red, \$1.09 a \$1.10; white, \$1.12. 1 54 a 56 cts. Corn, 43 a 45 cts. Oats, mixed, 28 a cts.; white, 30 a 32 cts.

Butter cattle were in demand and prices firm. Fat Penna. and western steers sold at \$5 a \$5.50; fat good, 4½ a 5½ cts.; common, 3 a 4 cts. per pound. Sheep, 4 a 6 cts. per pound, as to condition. H. 6¼ a 6½ cts. per pound.

FOREIGN.—Though there has been no formal act taken by any portion of the workmen terminating strike in Liverpool, the difficulty in securing labor is ended. Some classes of laborers have resumed work reduced wages.

On the night of the 20th ult., six inches of snow fell in London and its vicinity—much impeding rail and other traffic.

Rail reports from Cape Town place the British 1 in the recent contest with the Zulus, much below the first reports. Several vessels have left England during the week, with reinforcements for the army.

At a recent meeting of the Royal College of Physicians in London, it was resolved that the Government ought to appoint a royal commission consisting of eminent statesmen, medical men and specialists, to investigate the plague in India.

A commission is forming in St. Petersburg, special reference to the sanitary condition of the troops, and to watch over the prevailing typhus and plague epidemic.

Dr. Zdekauer, court physician to the Czar, states that the plague is nearly extinct. Similar reports are received from army officers connected with the district in which it has existed. Russian papers, however, continue to report epidemics, especially diphtheria, which they say has 700 persons have died in the village Yakoff.

The *Ruska Mir*, of St. Petersburg, has been obliged to suspend publication for commenting on the deplorable condition of the country and the despotic manner of its government.

In the Reichstag a motion was presented on the 19th ult., contesting the correctness of the Government's interpretation of the Socialist law, and refusing the consent of the Reichstag to the proposed arrests of members. After a long debate, the first part of the motion (disputing the correctness of the Government's interpretation of the law) was adopted by a large majority. The part refusing assent to the arrests was adopted almost unanimously.

The protectionists in France are very active. Several deputations recently visited the Minister of Agriculture and Commerce, and urged sur-taxes in favor of the French flag and manufacturers. They pointed out that the lowering of wages in England compelled a reduction in wages of the French operatives.

The Agricultural Society of France unanimously adopted a resolution requesting the Government to follow the example of England in prohibiting the importation of live American cattle.

A rise in the river Loire is causing disastrous inundation of the country.

The French-Atlantic cable is reported broken 10 miles from Saint Pierre Miquelon, in 500 fathoms of water.

The Italian Government has prohibited the importation of American swine, or any preparation of their flesh, as a precaution against trichinosis.

A petition from the workmen of Austria, asking for universal suffrage, has been presented to the Lower House of the Reichsrath.

The salt mines at Wilkesa are said to have been flooded. The miners were saved.

Reports from Rio Janeiro say that yellow fever there is increasing. The deaths from the epidemic number daily from 5 to 10.

CORRECTION.—On page 219 of "The Friend," first column, 5th line from top, *own* should be *eer*.

FRIENDS' ASYLUM FOR THE INSANE.
New-England, (Twenty-third Ward), Philadelphia, New-York, and Boston.—JOHN C. HALL, M. D.

Selected for "The Friend."

An Account of Margaret Ellis, from a copy left by Lawrence King when travelling on a religious visit in America.

Concerning my experience of the dealings of the Lord with me from my youth. At thirteen years of age the call of the Almighty is to me, when seeing some of my companions carried to their graves, and a concern came over my mind with a consideration either their souls were gone, and where mine would be if then taken away; which I loved me and remained on my mind many years, till my parents observed something more than usual in my countenance. Thereon they sent for a priest to examine the use, which he did. My answer was, that I was afraid of dying lest I should not be saved. He examined me concerning the catechism and sacraments, which I could readily answer to, having learned them several years before, upon which the poor priest was at a stand, and could not direct me what I should say, but at last he would have me come and take the bread and wine, called the sacraments; and when I came to the church (so called) I received upon my knees the bread of his hands. At that instant there came a voice clearly speaking to me in my heart, at that would not do to save my soul, and I came also to the wine. But self pleaded with me, why should not that do; and my parents and good neighbors said that it would do, which pleading followed me several days. I at length, through the inclination of self and being willing to have an easier way, the fitness for God in my breast was suppressed and overcome in me. I making choice of the road way which leads to destruction, through sin and the diversions of the world, forgetting the Lord days without number.

Yet He did not forget me, for in less than seven years afterwards his call was to me again in my soul as before, concerning eternity and how it might be with me hereafter, and when I returned in earnest to look within at my own state, and to the anointing mentioned by the apostle, which opened clearly in my mind, and I concluded not to make known inward exercise to any man, inasmuch as the teaching of the Lord was so near in my heart that there was no need of seeking after him by adhering to man, when they should say, "Lo here or lo there," seeing the kingdom is within. About that time I was under close exercise of mind, and often in secret

prayer to the Lord that he would be pleased to manifest to me my duty, and in what way I should walk so as to please him, still being willing to continue among the people of the Church of England, with whom my heart's delight was. At the same time a voice ran through my soul, that I was seeking the living among the dead and life where it was not; and also the call of the Lord to Samuel came into my mind, that he went to the priest to enquire what the voice meant, who directed him to the Lord himself; but when I went to the priest, he did not do as Eli did, but directed me to the outward elements of bread and wine, where no comfort at all was to be found.

About this time a certain woman being sick sent for me, desiring that I would pray for her, but I was at a loss for want of my common prayer book, which I had forgotten to take with me, yet ventured to kneel down with others, by the bed side, being familiar with the prayers. But all matter of the common prayer was taken from me that I could not express one word but remaining a little while, I was indued with such power and fervency of spirit as I never felt before, and I prayed for a long time to the great admiration of the people present, who were under great tenderness, as I afterwards heard. The report of this was carried to my father's house, and my mother was very inquisitive to know in what book I had met with such prayers, as the people said they had never heard the like before. I answered, that I had learned it in no book at all, for it was indeed through the inspiration of the holy and divine Spirit.

A while after this I went to a place of merriment amongst my companions, where I was used to sing, dance, and play cards, with them. But now I could not do any thing at all at such pastimes, the call of the Lord being expressly to me to depart from them, and when I had given up in obedience there-to, and told them of my uneasiness, they would fain have persuaded me to stay longer, but I signified that I had tarried long enough among them to my sorrow, and I would not come any more, whereupon three of my companions accompanied me home, and in the way I told them it was well if the Lord did not cause the earth to open and swallow us up for our vanity, with more to the like effect, at which they were broken into tenderness. Still it remained very much in my mind concerning our outward and formal worship, and of seeking the living among the dead, and life where it was not. My brother had been among the Quakers a little while, and he living at Dolobran, where was a meeting, I had a mind to pay him a visit. When I came there I went with him to a meeting, at which was a worthy minister, Robt. Griffith, whose testimony very much affected my mind with great tenderness, declaring of the very things that had rested on my mind, as if he had

known of them. But I hid my exercise, not being willing that any one should discover the tenderness of mind I was under. After meeting my brother asked me what I thought of their preacher. I was unwilling he should know how effectually I was reached, so I said he is either a witch or a prophet. When I returned home my mother acquainted me that one of her neighbors had advised her not to let me go to see my brother, lest I also should become a Quaker; whereas I was greatly enraged against that neighbor, for supposing I would turn Quaker, and was in such a passion as to be very unfit to say my prayers, omitting them. That night (my mother sitting up by the fire) I was in a kind of trance (or dream), and heard as it were the sound of a trumpet, with a call to all the ends of the earth. As I was thus terrified, all those things that were on my mind before came into my view with very heavy exercise, so that I was ready to conclude the call to the ends of the earth was directed to me, and that to find peace of mind I was willing to be a Quaker or any thing else that the Lord was pleased to manifest as my duty. After this I went to Friends' meeting, fourteen miles or more from home, as privately as I could. My father seeing my zeal in going to meetings, was willing to have me to their church (so called) to meet three or four priests, to try if they could bring me off from Quakerism before he would give me his blessing. Accordingly I went, but in that conference their deceit and formality was so manifested to me that I very clearly saw their emptiness, upon which I told my father that I would never more come to their church, unless it should be to his or my mother's burial. This resolution was so displeasing to him that ever after he carried himself severe and hard towards me. But my mother commiserated my case, and seeing me resolved to continue going to Friends' meetings, encouraged me to go and live near Dolobran, and furnished me good clothes, and some wool to keep myself employed; also money to pay my board, which I gratefully accepted, and took up my abode with a widow woman.

There was a young man living near Dolobran, lately convinced, with whom I had religious conversation. He being very ill and like to die, I went sometimes to visit him, and asking him how it was with him in regard to his future state, he told me he feared it would not be well with him, and seemed very unwilling to die, desiring I would pray for him, which brought a very heavy exercise over me in consideration of his being joined with Friends, and yet unprepared for his change, and I was constrained to pray for him that he might recover of that sickness; and then it was queried with me what would I give if he might be made whole, to which my answer was, Lord I will give all that I have in the world. Whilst I was attending this young man, a fire occurred at the widow woman's where I lodged, and the neighbors

coming to her assistance carried out all her goods, so that she lost not the value of five shillings, whereas not the least thing was saved of mine but one garment. The young man recovered in a short time, but I being left thus destitute, was obliged to return to my father's, and was soon after taken ill myself of an ague which held me about two months; my father thereupon expressed himself to my mother after this manner, "that there seemed to be a judgment on me for turning my back on the church, and he should not be sorry if I should die of that illness, that he might give me a christian burial." But I prayed to the Lord that I might recover, desiring not to be buried after their form. And as I was nursing upon my bed, it came fresh in my mind that if I would rise at break of day, and take a walk out of doors, I should be well. So in the faith of that I arose early and went out to walk. But my mother hearing me, followed and brought me in again, and thereupon the ague left me, and I was healed that very hour, even as the centurion's servant was, to whom it was said, "As thou hast believed so be it unto thee."

(To be concluded.)

For "The Friend."

Incidents and Reflections.—No. 36. BENEVOLENCE.

In the days when Abraham Lincoln, as an Illinois lawyer, "rode the circuit" of the district in which he practised, an amusing incident occurred in connection with one of those journeys, which gives a pleasant glimpse into the honest lawyer's heart. He was riding by a deep slough, in which, to his exceeding pain, he saw a pig struggling, and with such faint efforts, that it was evident he could not extricate himself from the mud. Lincoln looked at the pig and the mud which enveloped him, and then looked at some new clothes with which he had but a short time before enveloped himself. Deciding against the claim of the pig, he rode on, but he could not get rid of sympathy with the poor brute; and, at last, after riding two miles, he turned back, determined to rescue the animal at the expense of his new clothes. Arrived at the spot, he tied his horse, and coolly went to work to build of old rails a passage to the bottom of the hole. Descending on these rails, he seized the pig and dragged him out, but not without serious damage to the clothes he wore. Washing his hands in the nearest brook, and wiping them on the grass, he mounted his gig and rode along. He then fell to examining the motive that sent him back to the release of the pig. At the first thought, it seemed to be pure benevolence; but at length he came to the conclusion that it was selfishness, for he certainly went to the pig's relief in order (as he said) to the friend to whom he related the incident,) "to take a pain out of his own mind."

Abraham Lincoln's friendly feelings towards all were such, that he never made much money in his business. An unfortunate man was a subject of his sympathy, no matter what his business relations to him might be. A man named Cogdal, who related the incident to Lincoln's biographer, met with a financial wreck in 1833. He employed Lincoln as his lawyer, and at the close of the business, gave him a note to cover the regular lawyer's fees. He was soon afterwards injured by an accidental discharge of powder,

and lost his hand. Meeting Lincoln some time after the accident, on the steps of the State-house, the kind lawyer asked him how he was getting along. "Badly enough," replied Cogdal, "I am both broken up in business, and crippled." "Then," he added, "I have been thinking about that note of yours," Lincoln, who had probably known all about Cogdal's troubles, and had prepared himself for the meeting, took out his pocket-book, and saying with a laugh, "Well, you needn't think any more about it," handed him the note. Cogdal protesting, Lincoln said, "if you had the money I would not take it," and hurried away. At the same date, he was frankly writing about his poverty to his friends, as a reason for not making them a visit, and probably found it no easy task to take care of his family, even when board at the Globe Tavern was only "four dollars a week."

This incident brings to remembrance a similar circumstance recorded in "Lindley Murray's Introduction." As the younger generation of the present day are but little acquainted with the book, the anecdote may here be quoted.

Joseph Rachel, a respectable negro, resided in the Island of Barbadoes, where he kept a retail store. As he was obliging and honest, his business prospered. In 1756 a fire happened which burned down a part of the town in which were houses belonging to a man of his acquaintance, to whose family he had in early life been under some obligations. The man was entirely ruined by the losses occasioned by the fire.

Joseph had his bond for sixty pounds sterling. "Unfortunate man," said he, "this debt shall never come against thee. I sincerely wish thou couldst settle all thy other affairs as easily! But how am I sure that I shall keep in this mind? May not the love of gain, especially when, by length of time, thy misfortune shall become familiar to me, return with too strong a current, and bear down my fellow-feeling before it? But for this I have a remedy. Never shalt thou apply for the assistance of any friend against my avarice."

He arose, ordered a large account that the man had with him to be drawn out: and in a whim that might have called up a smile on the face of charity, filled his pipe, sat down again, twisted the bond, and lighted his pipe with it. While the account was drawing out, he continued smoking in a state of mind that a monarch might envy. When it was finished, he went in search of his friend, with the discharged account, and the mutilated bond in his hand. These he presented to him with the assurance that he was overpaid in the satisfaction he felt from having done what he believed to be his duty.

Many interesting anecdotes are related of the benevolence of "Billy Bray," the Cornish miner. He says: "At one time I had been at work the whole of the month, but had no wages to take up when pay-day came; and as we had no bread in the house, 'Joey' advised me to go up and ask the 'captain' to lend me a few shillings, which I did, and he let me have ten shillings. On my way home I called to see a family, and found they were worse off than myself; for though we had no bread, we had bacon and potatoes, but they had neither. So I gave them five shillings, and went towards home. Then I called on another family, and found them, if possible, in greater distress than the former. I thought

I could not give them less than I had given the others; so I gave them the other five shillings, and went home. And Joey said—

"Well, William, have you seen the captain?"

"Yes."

"Did you ask him for any money?"

"Yes; he let me have ten shillings."

"Where is it?"

"I have given it away."

"I never saw the fellow to you in my life. You are enough to try any one."

"The Lord isn't going to stay in my debt very long," and I then went out. For two or three days after this, Joey was mighty down but about the middle of the week, when I came home from the mine. Joey was looking mighty smiling, so I thought there was something to be said.

Presently Joey said—

"Mrs. So-and-so has been here to-day."

"Oh!"

"And she gave me a sovereign."

"There, I told you the Lord wasn't going to stay in my debt very long; there's the shillings, and ten shillings interest."

To the Senate and House of Representatives of the State of Pennsylvania, now sitting at Harrisburg.

The Memorial of the Representatives of the Religious Society of Friends in said State, respectfully sheweth:

That your memorialists have long been deeply impressed with the deplorable arising from the common use of intoxicating drinks by large numbers of our fellow citizens, and the awful responsibility resting on our Government in permitting their sale without sufficient restrictions as the laws of our Commonwealth impose.

Under a renewed sense of the magnitude of these evils, the fearful inroads they are continually making on the welfare and comfort of individuals and families, also on the best interests of the whole State, we believe it to be our Christian duty to bring the subject before you at the present time for your serious consideration, in the hope that you will be induced to give it the examination its importance demands, and see how far you may be responsible, as legislators, for the support or extension of this desolating vice.

The experience of the past has fully proved that it is incompatible with the public welfare to permit intoxicating drinks to be sold in small measure in public houses and drank at their premises. Surround the license for such business with all the restraints the law may impose or ingenuity invent, many of those engaged in it will still evade or defy them, a continue to render their saloons centres of corruption in the community where they exist. We therefore earnestly request that all laws authorizing such sale and drink may be repealed, and that proper enactments be passed to prohibit them. It is not within our province to prescribe the proper course to be pursued, but we desire to press upon your attention the well-known fact, that where the sale of intoxicating drinks—for other than medical or mechanical purposes—has been forbidden, either by State laws or by the vote of a majority of the citizens of towns, counties or townships, changes for the better have quickly followed, and there has been indisputable testimony to the great benefit conferred on the inhabitants by such legislation. The salutary law, enacted by the Legis-

re of Pennsylvania on the 27th of the Third month, 1872, on the subject of prohibition and total abstinence, was of this character. Under its authority more than half the counties in Pennsylvania rid themselves of the legalized traffic in strong drink, with most beneficial results to the morals and peace of the people. A sufficient reason, so far as we know, has been assigned for the repeal of that law.

The present license laws of Pennsylvania are notoriously discriminative and unfair against Philadelphia, in that they deny to that city the safeguards against an unlimited number of drinking places, which the enactments governing the other counties, in measure, afford. In the country districts a license sell intoxicating drinks cannot be obtained, except through the Judges of the County court and upon the concurrent petition of twelve reputable men of the neighborhood, who must aver that such a house is necessary for the public accommodation; that the applicant is of good repute for honesty and temperance, and has sufficient accommodations for travellers and lodgers. To this application all other persons may object by remonstrance or petition, and they are to be heard by the court, which is to decide the case on its merits, in the discretion of the judges.

Philadelphia had the protection of these nearly similar rules, until the year 1855, when the authority to license "drinking saloons" was delegated to the City Commissioners, without requiring the concurrence or consent of any of the citizens in the neighborhood where the saloon was to be located, and without public notice given, as theretofore required, and no obligation being imposed on the applicant to prove his ability to entertain or lodge the public who might require such accommodation.

The pernicious effects of this sweeping away the wholesome restraints previously existing were soon manifested in a great increase of liquor saloons and tipping shops in that city, so that now there are four thousand even hundred and fifteen (4715) licensed drinking places within its precincts. In some streets there are from five to eight such places in a single square, and intemperance has increased to a frightful degree, as is evinced by the statistics of crime and pauperism in Philadelphia, to which we would call your attention.

It has been computed from the information furnished by the last census that the people of the United States expend annually six hundred millions (600,000,000) of dollars for strong drink. Of this enormous waste Pennsylvania's share was seventy-eight millions (78,000,000) of dollars, expended for liquor, dealt out to her citizens at over thirteen thousand (13,000) licensed taverns.

There were, in 1870, nearly sixteen thousand (16,000) paupers supported by the State, and three thousand two hundred (3200) convicts for crime, three-fourths of whom, the lowest estimates show, were brought into that condition by intemperance. In the year 1867 there were thirteen thousand nine hundred and thirty (13,930) persons committed to prison in the city of Philadelphia for drunkenness, who were unable to pay their fines, and were incarcerated and supported at the expense of the city.

The Report of the Board of State Charities for 1871 says: "The most prolific source of disease, poverty and crime, observing men will

acknowledge, is intemperance. The policy of giving license to certain parties to open taverns where intoxicating liquor may be partaken of and gatherings may be accommodated for their indulgence is now in vogue."

"It would be difficult to name any practical good which results from this system, unless it be that it furnishes a certain amount of revenue." * * * "What economist can fail to discern, without any elaborate calculation, that the State is impoverished by the whole transaction? There is received into the public coffers a small tribute, and the consequence is that there is lost from the Commonwealth the productive labor of thousands, who waste in the licensed haunts of intemperance both the ability to add to her wealth and the accumulations of former thrift."

Judge Allison, in alluding to intemperance as a cause of crime, says: "There are few people who see the practical evil as we see it in the criminal courts of this city. There we can trace four-fifths of the crimes that are committed to the influence of rum."

The grand juries of the several courts in the State make these facts the frequent subject of their notice when presenting the more glaring causes of pauperism, crime and outrages upon the peace and well-being of the citizens they represent; while the courts themselves, through most of the causes tried before them, keep the debasing and destructive fruits of this vice—sanctioned by law—continuously before the public eye.

We have no selfish or political motive in this addressing you. Our desire is, as professors of the gospel of our Lord and Saviour Jesus Christ, and as sincere lovers of the State of which we are citizens, to express our abhorrence of the sin of drunkenness, and of a professedly Christian Government allowing the powerful temptation thereto to be so universally and constantly presented to the weak and unwary, thus often betraying them into guilt and death. Our voice is, therefore, thus raised against the legal sanction given to this prolific source of misery and crime, and against allowing the great body of the people to remain helpless to protect themselves from the grievances and unjust burdens imposed upon them by the vendors and partakers of intoxicating beverages.

The Holy Scriptures declare—*He that ruleth over men must be just, ruling in the fear of God.* And the Apostle James admonishes that—*"To him that knoweth to do good and doeth it not, to him it is sin."* May He in whom are hid all the treasures of wisdom and knowledge so influence your deliberations and conclusions, that laws may be enacted to secure the removal of the evils we complain of, so that the best interests of the Commonwealth may be promoted, and the blessing of Divine Providence rest on your labors.

CHARLES J. ALLEN

Clerk for the day.

Signed in direction and on behalf of a meeting of the said Representatives, held in Philadelphia, 24 mo. 17th, 1870.

Land Transfers in Ancient Babylon.—W. St. C. Boscawen has discovered among the contract tablets in the British Museum two documents of great interest to geometers.

Attached to two terra-cotta tablets containing deeds of sale of estates near Babylon W. Boscawen found two neatly drawn plans of the estates in question. The first of these

is a deed relating to the sale of some land which took place toward the latter end of the reign of Nebuchadnezzar. It represents an estate of about eight and one-half acres in area, and bounded on the northern side by the canal of the goddess of Babilton. The names of the owners of all the adjacent lands are given, and the great care is taken in giving the dimensions of these plots of land. The whole is divided into three pairs of parallelograms, and check dimensions are taken to test the accuracy of the work. A semi-circular portion on the east side is most carefully measured, both radius and circumference being given. The second plan is unfortunately in a mutilated condition, but the remaining portions show the same care and neatness as is found in the perfect one. The deed of sale in this second document is written on the reverse of the tablet, and is dated in the reign of Darius Hystaspes. The value of these documents as bases by which to fix both the lunar and area measures in use in Babylonia is very great. Both these documents form portions of the now well-known series of the Eijhi tablets. W. Boscawen hopes shortly to publish these documents, accompanied by facsimiles of the plans and translations of the deeds relating to them.—*London Athenaeum.*

For "The Friend."

Thoughts and Feelings.

REPENTANCE.

The testimony of the Apostle Paul respecting our blessed Lord in connection with the subject of our present essay, is very strong, viz: "Him both God exalted with his right hand to be a Prince and a Saviour, for to give repentance to Israel, and forgiveness of sins." And again Luke writes: "Thus it behoved Christ to suffer, and to rise from the dead the third day; and that repentance and remission of sins should be preached in His name among all nations." &c. Then while without repentance there is no salvation; because "God now commandeth all men every where to repent," yet at the same time the precious olive branch is extended to us in the assurance that "the goodness of God leadeth to repentance." And also in the exhortation, "Repent ye, therefore, and be converted, that your sins may be blotted out, when the times of refreshing shall come from the presence of the Lord," &c.

Now true repentance involves godly sorrow for sin. "For" as is written, "godly sorrow worketh repentance to salvation not to be repented of," &c. No one can be engrated into Christ, the good olive tree, until cut out of the wild olive tree; or, in other words, cannot be united to Him till divorced from His enemy, which is sin. Here then is work for repentance. And to be brought to see and to become deeply sensible of our sins and transgressions, and at the same time to be humbled and contrited in spirit before the omniscient Holy One on account thereof, is evangelical repentance. But let none mistake the counterfeit for the true. The apostle has, in his epistle to the Corinthian church, set forth some of the fruits of this heart-changing repentance in the strong characters:—"That ye sorrowed after a godly sort, what carefulness it wrought in you, yea, what clearing of yourselves, yea, what indignation, yea, what fear, yea, what vehement desire, yea, what zeal, yea, what revenge! In all things ye have approved yourselves to be clear in this matter."

It is recorded of Esau, that "He found no place of repentance, though he sought it carefully with tears." Again, the angel to the churches was commissioned to say to that of Ephesus: "Remember therefore from whence thou art fallen; and repent, and do the first works; or else I will come unto thee quickly, and will remove thy candlestick out of his place, except thou repent." Though "the Saviour is exalted to give repentance," &c., yet there is a state which through disobedience to the voice of the Lord, and rebellion against His will, in which our condition either becomes imminent, or "there remaineth no more sacrifice for sins, but, instead thereof, a certain fearful looking for of judgment and fiery indignation, which shall devour the adversaries." This state is dreadful; and perhaps more than all things to be avoided on this side the judgment to come. But after such marvellous condescension, such goodness, and mercy, and loving kindness has so long followed us; after the wooings, the warnings, the pleadings, the invitations, both immediately and instrumentally, of the grace of God to repent and to bring forth fruit meet for repentance, is it the terms of "an austere man"—the ignominious language of the abuser of the one talent in the parable of the Saviour—for a God of justice to become as "a consuming fire" to such as "turn away from Him that speaketh from heaven;" saying, either in word or by act, "We will not have this man to reign over us?" Nay, verily. We must reap what we sow. "He that soweth to his flesh, shall of the flesh reap corruption; but he that soweth to the Spirit, shall of the Spirit reap life everlasting." "Righteousness and judgment" are represented to be "the habitation of the throne" of the Eternal one. "The Lord will judge his people." And we are assured that there is a possibility of so resisting the power and the government of the Saviour in our hearts, of so striving against His grace, which when yielded to, and cooperated with brings salvation, as that the Spirit ceaseth longer to strive; and that sorrowful condition comes to be experienced: "Ye have lived in pleasure on the earth, and been wanton," "Ye have condemned and killed the just; and he doth not resist you." "The harvest is past, the summer is ended, and we are not saved."

But oh! let us hope for better things. Let us in consideration of what the Saviour has done for us without us and is waiting and willing to do for us within us—let us in view of the great object of this responsible life, with the uncertainty of its continuance—let us with grateful remembrance and in due appreciation of all the benefits, the privileges, and mercies conferred, in that the Redeemer is exalted to give repentance, and that we have such "a High Priest over the house of God"—"let us draw near with a true heart, in full assurance of faith," &c., for "The Lord is not slack concerning his promises as some men count slackness; but is long-suffering to us, not willing that any should perish, but that all should come to repentance." To the which, by the apostle Peter in the same epistle, is added: "Be diligent that ye may be found of Him in peace, without spot and blameless."

Not that which men do worthily but that which they do successfully, is what history makes haste to record.

THE VOICE FROM GALILEE.

Selected.
"Of His fulness have all we received, and grace for grace."—John i. 16.

I heard the voice of Jesus say,
Come unto me and rest;
Lay down, thou weary one, lay down
Thy head upon my breast.
I came to Jesus as I was,
Weary, and worn, and sad,
I found in Him a resting-place,
And He has made me glad.

I heard the voice of Jesus say,
Behold, I freely give
The living water,—thirsty one,
Stoop down, and drink, and live.
I came to Jesus and I drank
Of that life-giving stream,
My thirst was quenched, my soul revived,
And now I live in Him.

I heard the voice of Jesus say,
I am this dark world's light,
Look unto me, thy mourn shall rise
And all thy day be bright.
I looked to Jesus and I found
In Him, my Star, my Sun,
And in that light of life I'll walk
Till travelling days are done.

—H. Bonar.

THE CITY OF OUR GOD.

Selected.
O city of the jasper wall,
And of the pearl gate!
For thee, amid the storms of life,
Our weary spirits wait.
We long to walk the streets of gold
No mortal feet have trod;
We long to worship at the shrine,
The temple of our God.

O home of bliss! O land of light!
Where falseth neither shade nor bright!
Of every land the brightest, best,
When shall we there find peace and rest?

O city where they need no light
Of sun, or moon, or star!
Could we with eye of faith but see
How bright thy mansions are,
How soon our doubts would flee away,
How strong our trust would grow,
Until our hearts should lean no more
On trifles here below.

O home of bliss! O land of light!
Where falseth neither shade nor bright!
Of every land the brightest, best,
When shall we there find peace and rest?

O city where the shining gates
Shut out all grief and sin,
Well may we yearn amid earth's strife
Thy holy peace to win.
Yet must we meekly bear the cross,
Nor seek to lay it down

Until our Father brings us home,
And gives the promised crown.
O home of bliss! O land of light!
Where falseth neither shade nor bright!
Of every land the brightest, best
Soon shall we there find peace and rest!

Selected.

Testimonies to the Way to Salvation.

"Whoever turns from the light of the Son of God within them, and walks not in it, goes into the error and into the way of perdition; but [he] who walks in the light, stumbles not, because he sees the Light of this world, Christ Jesus, the author and finisher of the faith; and there is no other Saviour than he which was, is, and is to come, the Light of the world; and whoever preaches a Christ to believe in for salvation, who hath not lighted every man with the true light, preaches a false Christ, and not that Christ which the prophets and John bore witness of, and which the apostles witnessed. So that this is truth from the Lord God, there is no other name given for salvation, but the name of Jesus:

nor, there is no other Christ Jesus, but which lighteth every man that comes in the world with the true light; and exceedeth this Christ Jesus as revealed by the Spirit the Father within, salvation is not received by him."—*E. Burrough's preface to G. Fox's Testimony of the True Light of the World* 11th mo. 1st, 1656.

"No man cometh to the glorious Gospel which is the image of God, but [he] who cometh to the light which enlighteneth every man that cometh into the world, and no man receiveth the power to become [one of] the sons of God, but [he] who receiveth the light which cometh from Christ."—*G. Fox's Testimony of the True Light*.

"He that believeth not in the Light which lighteth every man that cometh into the world, believeth not in Christ, but abides condemnation without the door; for is not the Light the door? and he that doth not come to the Light, doth he come to the door the way to the Father? Doth he know that is not come to the Light, for the port to open to him, that he may come to God, and out, and find pasture and life? Do any one come to the vine, but who comes to the Light? Doth any bring forth fruit unto God, but who comes to the Light? or any one's deeds wrong in God, but who are the Light? Is there any justification but the Light, or any condemnation but the Light? Do any become the children of Light, but [those] who believe in it? Do any know the Gospel but such who believe in the Light or do any know the Cross of Christ but who do believe in the Light? Have not men hope, and a belief, and profess the Scripture, but do not believe in the Light which lighteth every man that cometh into the world, by whom it was made, who is the salvator unto the ends of the earth? Now is not the belief false?"—*G. Fox's Professors' Confession*.

"As you love the light that shows you the evil that ever you have done, ye love Christ and the Light is it which gives the knowledge of the glory of God in the face of Christ which shines in the dark heart, and nor comes to the knowledge of God but by the Light which shines in the heart; and the treasure have we in earthen vessels; that the excellency of the power might be of God, and not of man; but if you do this Light hate you hate Christ and remain stumbling, blind and scattered, refusing the Corner-stone whom all the builders stumble at, who are out of the Light; and none come from stumbling to know the words of the Scripture declared from the Life, but such as own the Light.

"To the Light in you I speak, if you go in your evil deeds and unbelief, not believing in the Light, the Light is your condemnation; hating the Light, you hate Christ, for you do not come to the knowledge of God but by the Light. He that comes to the knowledge of God knows His Son: now none come to the Son, but who owns and comes to the Light, which from the Son doth come. And this Light brings to one heart, one mind, one people, one God, one Mediator betwixt God and man; and this Light unites and brings Jew and Gentile together; and he that believes not in the Light, doth not believe in God who is light, nor know His Son, who enlighteneth every man that cometh into the world."—*G. Fox's Visitation to the Jews*."

For "The Friend."

Capital Punishment.

the recent execution of a criminal in Camden, New Jersey, by sentence of a court of law, under circumstances of a revolting character, has again we trust drawn public attention to the barbarity of this method of punishment, and its inherent inability to accomplish the objects which should ever be in view in the administration of justice; and the reformation of the offender and the deterring of others from like offences. Famously with crime begets crime, and the effect in the community, of events such as that which we have alluded, we believe is to render the convictions of individuals in regard to the sacredness of human life and thefulness of death, to lower the standard of morality, and thus to pave the way for the commission of other deeds of violence and blood.

The principles upon which capital punishment is justified we believe are not in accordance with the precepts of the religion of Christ, and in elucidation of this view the following extracts from "Remarks on Capital Punishment," originally published in the seventh volume of this journal, are again reprinted for publication in "The Friend."

One of the most striking peculiarities by which the Christian religion is distinguished from all the systems of policy or morals which have ever been devised by the wisdom of man, is its restorative character. The Founder of Christianity was stigmatized as the friend of publicans and sinners, by the exclusive moralists of his day. His own declaration was that he came not to destroy men's lives, but to save them. The great object of his mission on the earth was to seek and to save that which was lost. And in whatever proportion the principles of Christianity become interwoven into the policy of nations, in the same proportion do the laws, and the administration thereof, partake of the mild and beneficent character of its founder. As Christianity teaches us to regard the interests of a future life as the primary object of attention in relation to ourselves, so it leads us to be particularly tender of the eternal interests of others. Hence the direct operation of this religion is to counteract that exclusive and exterminating policy which so conspicuously marks the penal codes of unchristianized and unbarbarous communities.

"The progress of improvement in the sciences and arts, since the commencement of the present century, indicates a rapid march of intellect. The melioration of our penal code is one of the numerous indications of intellectual advancement which the passing age has furnished. But we have not attained a degree of perfection while the punishment of death retains a place in our system—where this penalty is affixed to any crime, the restorative character of our religion is certainly disregarded. We still adhere, in that respect, to the exterminating policy of barbarous nations. We, in fact, wage a war of annihilation upon a part of our race. If we compare a part of our policy with the precepts of the gospel, with the mild and benevolent character of its founder, and with the spirit which it breathes, we can scarcely find a single point of resemblance between them. If we attempt to defend the existing practice on scriptural grounds, we are compelled at length to seek our authority from other sources

than the precepts or practice of our Saviour. We are driven to the sanguinary code of a former and avowedly imperfect dispensation. Is not this fact an evidence that the doctrine to be supported does not belong to the religion of Christ? And when we attempt to defend this part of our system, by arguments derived exclusively from the Old Testament, do we not implicitly admit that it is incapable of defence upon Christian principles? What then are the grounds upon which the system is to be defended? Not certainly on the authority of the Mosaic law, unless it can be shown that we are bound to keep the whole law, or that there is something in the law itself which binds us to the observance of one part and exonerates us from another. By the laws of Moses the murderer was required to be put to death; but murder did not stand alone, it was but one in the list of capital offences; a transgression of either of the first seven commands of the decalogue was punishable with death. The Israelites had no discretionary authority in the case; the law was absolute. But among several of these capital offences are scarcely treated as crimes. If we are authorized by the precepts of Scripture to punish murder with death, and remit or diminish the penalty upon the other six capital crimes of the decalogue, we must derive the authority from some other source than the Mosaic law. It will perhaps be said that murder is a more heinous offence than either of the other crimes enumerated in the decalogue. The question, however, is not what is the turpitude of the offence, but what is the authority to punish it or any other with death? This I presume must be found in the Mosaic law, or not found at all, in the character of an injunction. As we have renitted the penalty in six cases out of seven, we have sufficiently declared our sense that we are not subject to the laws of Moses. Our authority is therefore an assumed one, founded neither upon the precepts of the Jewish nor Christian Scriptures, but upon the usages of our ancestors, whose maxims we have, in numerous cases, entirely discarded.

"If the practice of punishing criminals, of every description, with death, is totally irreconcilable with the restorative policy of the gospel, we may seriously ask why it is continued? Do we admit the truth and divine authority of the Christian religion, and yet fear to trust it in practice? Do we consider the Christian system as an elegant theory, to be preached up one day in seven, and discarded and despised during the other six? Or do we suppose that its precepts are to be regarded in ordinary cases, and overlooked upon extraordinary ones? Whatever the advocates for expediency may say, I fearlessly announce the belief, that the principles of Christianity are suited to the nature of man, and that every measure which is opposed to those principles will be found eventually impolitic."

"The notion that the execution of criminals operates as a preventive of crimes, seems to be generally abandoned; at least we are led to that conclusion by the legislation respecting it. For public executions are now prohibited in some of the States. In our own State they are effected in private. This change removes one of the objections to capital punishments. They are no longer permitted to brutalize the public mind. But the supposed advantage of their example is in great mea-

sure lost. Still the great and radical objection remains untouched. The punishment is vindictive, not restorative. It is the growth of barbarism, not of civilization or Christianity."

(To be concluded.)

The Dusty Bible.

A worthy Christian mother was left a widow, in the city of Oxford, with only one son. She labored hard to support him and herself; and at last got him apprenticed to a carpenter. He learned his trade; and having passed through his apprenticeship, was able, as a journeyman, to gain bread for himself and his mother. She had diligently sought first the kingdom of God, and His righteousness, both for herself and her son; and God had, according to His promise, added the necessary things of this life; but it did not seem to be His pleasure to add also the things of the life to come for her boy. He grew up a civil lad, but very much like other lads in the world. There was nothing to comfort the widowed mother with the hope that "old things had passed away, and all things had become new," in his heart. While he was a boy he hid as he was hidden; he read the chapter in the Bible every evening, as he was told; but to the anxious and observing attention of the mother, there were no marks of spiritual life. The mother sighed and prayed; and from time to time went into her chamber and wept, and prayed again; and used all she means her heart could suggest to show her dear boy his need of Christ. Yet still there were no signs of life, such as she longed for.

Andrew's mother made many attempts to awaken her son from his dreams of worldly pleasure and forgetfulness of God. At first they were received by him kindly, then coldly, then angrily; and at last the subject was so painful that it was seldom alluded to, and it seemed, as far as Andrew was concerned, to be forgotten. The mother determined to make one more appeal to his heart. She chose his birthday, when he came to the age of twenty-one. She had deprived herself of many little comforts, and had laid by a small sum, with which she bought a very nice, well-bound, convenient Bible, and on the morning of the day he came of age, when she got his breakfast, before he went to his work, she blessed him, and poured out all the fondness of an affectionate mother's heart, while she made him a present of this Bible. After tenderly warning him of his spiritual danger, she earnestly begged of him one special favor, which was, that he would promise her to read a portion of that holy book, if it were ever so little, *once in the course of each day*. She pressed this upon him, as the special desire of his only parent.

Andrew received her present very kindly, thanked her with some warmth, assured her of his affection and gratitude, said he would certainly behave better than he had done, for the future; and at last, upon her repeated request, he made the promise she desired him. The mother had not done all this without prayer; and she retired to her room, and spread her case before the throne of grace, with earnest petitions that, for Christ's sake, God would bless this last attempt to bring him under means that might be blessed by the power of the Holy Spirit.

The mother felt that it would be wise to

leave the matter where she had placed it; and that it might be a snare to him if she troubled him with questions as to whether he performed the promise; but it was the one object of her heart, and she could not rest without some means of finding out whether he read the Bible every day. She lived with her son in a small tenement, which consisted of a kitchen and a wash-house below, and two decent bedrooms above. When she went to his bedroom, she found that he had laid the Bible upon the little mantle piece, which was opposite the door; and finding, day after day, when she went to arrange his room, that it remained in the same place, she bethought her of a means by which she might know whether it was ever used. She was a cleanly, tidy person, and known among her neighbors for the neatness of her house. It was her custom, very frequently to sweep the bedrooms, and she determined always to leave the Bible on the mantel shelf, without letting her duster or brush come near. In consequence of this, her very diligence in cleansing every other part of the room, made the more dust to fall upon this neglected shelf; and she was thereby enabled to see it at any time the Bible had been removed from its place.

Week after week passed, and month after month. When she went each morning into her son's room, as her anxious eye fell upon the Bible, she too plainly saw that no finger had been laid upon it. Her heart sickened, but she lifted it up to the throne of grace. "Merciful Father, for Christ's sake, give the Holy Spirit to turn the heart of my child, that he perish not with the world that lieth in wickedness!" Oh, how often did such a prayer as this burst from her heart! Though the only language by which it was expressed was the silent trickling down of her tears, yet God heard that voice. (Psalm lvi. 8.) He did not, however, seem to her the voice of this widow's weeping, for her son only grew more settled in his worldly course, and showed less attention to the feelings of his poor mother.

The mother had a tender heart—loving by nature, softened by grace. She could not bear the continual agony of hopeless alarm for the eternal condition of one so dear to her. Affliction, while it ripened her spirit, had undermined her strength of mind and body, and this heavy burden broke it at last. She pined even while she prayed; her heart declined. Andrew was sorry, for he soon found his mother's illness very inconvenient, and expensive, too. A heart that gives itself to worldly pleasures empties itself of the feelings of its best affections, and settles into a mass of selfishness.

Andrew was very fond of music, and was a great man among all the club bands in the neighborhood. There happened to be a great fair held, about twenty miles from Oxford, where several young men were engaged, and Andrew was invited to join the party. To be sure his mother was very ill indeed—even dying—but she would live, no doubt, till he returned. Not to distress his mother, he did not bid her good bye when he set out. The indulgence in his worldly amusements had deadened all the feeling which would have made him think much of such a neglect, and it led him to think so much of the musical party, that it seemed to be of the greatest importance to be there.

He had not been gone many hours before

his poor mother's trial of heart was over. She had been left by the attendant woman after breakfast, rather better, apparently. The doors were placed open as usual, and the woman went to wash for her own family. When she returned she found but a corpse. The spirit had left the poor painful clay—the eyes were turned toward the dusty Bible, but they were glazed and lifeless—the broken heart beat no more. The mother had passed through the furnace, purified seven times in the fire; she was safely gone to the "far more exceeding and eternal weight of glory." The neighbors showed great feeling; everything was done in proper order; the coffin was made, the funeral prepared; and very likely they felt that it would only be what Andrew deserved if he had the shame of finding that, when he returned, strangers had shown more respect for his mother than he had, in leaving her in her dying state, to seek his own pleasure.

Three days passed, and the funeral was to take place in the evening, when Andrew arrived. It struck a blow at his heart to find that his mother was dead and about to be buried. He prepared himself for the funeral, and followed the coffin to the grave. The earth was committed to the earth, ashes to ashes. There were still no signs of feeling in him—he said nothing. He looked into the grave when the service was over; the neighbors did so also; there seemed no difference, and a stranger could not have said which was the orphan.

Andrew walked home; and upon entering the house, he went straight to his bedroom. He sat down on his bedside, and remained some time in the same bewildered and benumbed state of feeling. At length his eyes fell upon the Bible on the mantel-shelf, which had lain so long untouched. Its dusty condition brought to his mind the thought how completely it had been neglected; and then came the recollection of his mother's birthday gift, and birthday advice, and birthday blessing; and then his promise to read it every day rushed into his mind; and then its thick coat of dust, which proved that the promise had been broken every day, spoke to his conscience at last, to raise up an agony of shame. It burst the chains that had bound up his feelings, and produced a flood of tears, heartfelt and bitter.

After waiting for some time, Andrew walked to the shelf, took up the dusty Bible, and opened it for the first time since he had received it, with such marks of tender affection, from his departed mother. The pages divided at the third chapter of John's Gospel, and the part that caught his eye was the sixteenth verse. He read that and the two following verses. His heart was pierced effectually. His mother's prayers had been heard from the beginning, even while she was speaking. God's own good time did not arrive till she was ripened, and being ready, was gathered into His garner.

The circumstances here recorded are true. "The Circumstances" is no imagined incident, and is one illustration out of thousands which show the dealings of God in bringing His people out of the world, and in training them for heaven. Christian mothers! do not grow weary, nor faint in your mind; but lift up the hands that hang down, and strengthen the feeble knees. It is heart breaking to watch a worldly child; but cease not to say,

"Though He slay me, yet will I trust Him." Continue in faithful and earnest prayer, and leave the answer to God's good time.—*Mothers' Treasury.*

Diphtheria.—*Ravages of the Disease in rope.*—Diphtheria has always played havoc in Great Britain; but hitherto more attention has been paid to it than to scarlet fever or other acute disease. The death of the Princess Alice has excited general alarm. Not that a daughter of the queen has been carried away by it the disease is being investigated. The papers are full of popular essays and tracts on the subject, some of which are without interest for American readers. Example:

Diphtheria is essentially an inflammation of the mucous membrane of the throat back of the neck, and windpipe, excited by a parasitic organism. Its most remarkable characteristic is an exudation from these membranes of an adhesive character, so that it becomes coated with a layer of tenacious material resembling a very thin shaving of emulsion leather, whence the name "diphtheria"—the "leather disease." This membrane blocks up the entrance to the windpipe; causes suffocation—the most immediate threatening feature of the malady. If, however, the danger of suffocation is escaped there will supervene a specific nervous affection of a paralytic character, which affects the organs of speech and the neighboring parts, accompanied by the most utter prostration of the general system. These latter characteristics distinguish diphtheria from much more common yet less dangerous disease, namely, croup. It is, moreover, of a kind in which flesh is heir the most insidious and has suspicious relations with scarlet fever. The question which has been so often asked as regards the cause or causes to which it can be referred seems likely to receive an answer from the case of the Princess Alice. The lady resided occasionally in the old mediaeval palace of the Grand Duke of Hesse, in the lower part of the town of Darmstadt, in preference to the new palace built for her husband, the present grand duke. This venerable structure is honeycombed with drains, and the most common cause of diphtheria is the influence of the air on sewage products. The remedy which has been found most effectual in England is sulphurous acid, a specific which must not be confused with sulphuric acid, or oil of vitriol. If the patient inhales sulphurous acid constantly, and applies it to the membrane with a spray, the chances of recovery are almost certain, and whenever this specific has failed the result has been obtained by a neglect of using it with sufficient frequency. The effect produced is the destruction of the parasitic germ.—*Phila. Inquirer*

Friends, this rests upon my spirit, to testify that none can enjoy true blessedness, and spiritual consolation to their souls, further than they have a testimony in themselves that they walk in the precious everlasting Light that now shineth. To this Light our minds were, at first, turned, in which God dwells, and in which the worship in spirit and in truth is learned and performed, in this age as in ages past. The way is, and hath been throughout all generations—one and it is plain pathway; the wayfaring man, though fool, cannot err therein.

In this Light many are now witnesses that loved them, even while sinners; and that, the days of their darkness and ignorance, waited upon them, to show himself gracious; though then they had no faith in him, esteem for him, neither could they see any usefulness in him, "his visage being more revered than any man's." Thus He appeared, the light shined out of the darkness, and gave the knowledge of his glory; which as they walked in, they became living witnesses of his power and salvation, redemption, and consolation from darkness and the power of Satan, to the marvellous Light and power of God; out of the corrupt nature and degradation, into the pure divine nature and regeneration; and so became plants and trees of righteousness, bearing fruit unto God, and giving in the glory and praise of all his works, who are worthy throughout all generations, ever.—*William Steinen.*

For "The Friend,"

the Watch Tower, or The Place of Safety for the Newly Convicted.

"And you, young convinced ones, be you treated and exhorted to a diligent and cease waiting upon God, in the way of his blessed manifestation and appearance of himself to you. Look not out, but within, let not their liberty be your snare: neither act imitation, but by sense and feeling of God's power in yourselves: crush not the tender feelings of it in your souls, nor over-run, in our desires and warmness of affections, the holy and gentle motions of it. Remember it is a still voice that speaks to us in this day, and that it is not to be heard in the noises and hurries of the mind; but is distinctly understood in a retired frame. Jesus loved and chose solitudes, often going to mountains, woods, and sea-sides, to avoid crowds and cries: to show his disciples it was good to be solitary, and sit loose to the world. Two enemies lie near your states,—imagination and liberty; but the plain, practical, living Truth, that has convinced you, will preserve you, if you mind it in yourselves, and bring all thoughts, inclinations, and affections, to the test of it, to see if they are sought in God, or of the enemy, or of your selves: so will a true taste, discerning judgment, be preserved to you, of what you should do and leave undone. And in your diligence and faithfulness in this way, you will come to inherit substance; and, as the eternal Wisdom, will fill your assembly. And when you are converted, as I am convinced, then confirm your brethren, and be ready to every good word and work at the Lord shall call you to: that you may be to His praise, who has chosen you to be stalkers, with the saints in light, of a kingdom that cannot be shaken, an inheritance incorruptible in eternal habitations."—*From Penn's "Rise and Progress"—1694.*

Whilst perusing the foregoing affectionate treaty and counsel of William Penn, to the young convinced ones," where, among other things, he exhorts them to "remember it is a still voice that speaks to us in this day, and that it is not to be heard in the noises and hurries of the mind; but is distinctly understood in a retired frame," earnest cravings arose in the heart of the writer to know more of this true inward quietness; and for the safe observation of all the members of our religious Society upon the only sure Founda-

tion, Christ, the Rock. That we might all know our spiritual building to be laid thereupon, because of the winds and storms which at times threaten, and which must, sooner or later, lay waste every habitation that has been erected upon anything short of the true Foundation. But most especially have the yearnings been felt to extend toward those who are in the middle and younger walks of life; that they might be made willing to yield their hearts unto Him who is calling for them; then would He prepare and fit them to take the places in the ranks of the Lamb's army which are left vacant, as one by one those who have stood as valiants in their day for the cause of righteousness, and for the promotion of the Truth as it is in Jesus, are called from the church militant to the church triumphant.

In what direction are we to look for a succession of armor-bearers, unless it be from among the class alluded to, the middle aged and the young? In taking a close view of our surroundings, regarding the portion of the "heritage" in which we are placed, wherein there is great need for true dedication of heart, and faithfulness, are we not constantly reminded of our great weakness? and ready to adopt the language of the apostle, "Who is sufficient for these things?" and will it not tend to the furtherance both of and in the good cause, as we individually feel our own weakness, to bear in mind that our sufficiency is not of ourselves, but that "our sufficiency is of God." And for our encouragement let us not lose sight of the promise of the Most High through the mouth of the prophet Jeremiah, "And ye shall seek me and find me, when ye shall search for me with all your heart;" for He will prove himself to be the helper of the helpless.

None can enlist in this army, or go forth beneath the royal banner, unless they have been brought under the guidance and direction of their Divine Leader, "the Captain of their salvation," by and through that self-subduing, creating and creative power of Him who sitteth as King of kings, and Lord of lords, by whom alone the will of man is laid low in order that he may be brought under His righteous rule and government. Such as these will become loyal soldiers, willing servants, ever ready to follow their Divine Leader, always endeavoring to be obedient to His commands.

They may oftentimes be persecuted; but as they remain faithful, they will not be forsaken; they may be cast down; but they will not be destroyed; troubled, yet not distressed; perplexed, but not in despair; for strength will be given them, and grace extended in every time of need, as their petitions are put up unto the Lord for help, and in true sincerity of heart they are earnestly striving to walk acceptably in the Divine sight. These will learn to know for themselves, as said the apostle, "All things are for your sakes, that the abundant grace might, through the thanksgiving of many, redound to the glory of God."

It will therefore be the faithful and tried soldier in this spiritual warfare, who has followed close beside his Captain, feeling Him to be near as the battle waxed hot, and strengthening him to press forward through every barrier, that will be found forwarding the cause of Truth which he had espoused, and who will, when his warfare upon earth shall have been accomplished, be ready to

adopt the language of the eminent apostle: "I have fought a good fight, I have finished my course, I have kept the faith; henceforth there is laid up for me a crown of righteousness, which the Lord, the righteous judge, shall give me at that day; and not to me only but unto all them also that love His appearing."

Ed mo. 23rd, 1879.

THE FRIEND.

THIRD MONTH 8, 1879.

In reading the accounts of persecution and trial sustained by faithful Friends in the early days of the Society, we often fail to form a correct estimate of the amount of physical suffering very many of them must have endured, and how much that was aggravated by the provocations and indignities heaped upon them by malignant tormentors, who took delight in treating them according to the prompting of their own evil passions; knowing that no protection or redress would be granted them.

What but a sense of the everpresent help of the Master they were serving, could have enabled them to endure their sufferings? what but being clothed with a measure of his meek and patient Spirit, could have prompted them to pray for those who so despitely used them, and to return good for evil to their cruel enemies?

No doubt their faith and constancy were at times sorely tried, and many a bitter cup was drank by them, when Christ, their Master, allowed their allegiance to be proved by the temporary withdrawal of a satisfying sense of the strength and immediate support which He alone could give, and by which administered to the inner man they knew they could endure all things, for his name's sake. But He always showed himself a present help in every time of need, and a rich rewarder of those who faithfully served him, and drew not back from upholding the cause of truth and righteousness.

It may be well for the successors of those Sons of the morning, to observe for what it was they were thus willing to endure suffering and reproach, and for faithfulness in maintaining which, their glorified Head rewarded them openly.

Was it not to uphold before the world testimonies, springing from the Gift of God to their souls, but which the world deemed fanatical or contemptible? For meeting together to perform the worship of the almighty Jehovah, in the plain way in which He taught them He sought to be worshipped? For refusing to acknowledge a hireling ministry or to countenance it in any way: for refusing to be conformed to the world in manners, in language or in garb: for repudiating all oaths: for promulgating on all proper occasions that the Grace of God is a Divine gift bestowed on all men, for effecting their salvation, and therefore the primary rule of faith and conduct; while the Scriptures as secondary are able to make wise unto salvation, only through faith in Christ Jesus in his inward and outward offices: for affirming that no one could be a minister of the gospel, unless first prepared through the baptism of the Holy Ghost and fire, being called of God as was Aaron, and having the gift conferred; and that such could

rightly minister only when and where put forth by the Head of the Church; that taking pay for preaching is a direct violation of the command of Christ? also other testimonies which need not be specified.

Being brought, through obedience to the Light of Christ in their souls, to know the room from which these testimonies spring, and the necessity for them as members of his militant church to maintain them, no suffering could shake their faith in the verity of their Master's command to promulgate them abroad, and to illustrate them in life and conversation; and they took the spoiling of their goods and the imprisonment of their bodies joyfully, rather than compromise any one, even the least of them.

Admitting the gradual development of Christian knowledge in the professing church, has it advanced so far that there is no further need for Friends, as one branch of that church, to maintain these several testimonies; or can they be justified in abandoning any of them, and thus saying practically to other professors, the self-denying religion of Christ no longer requires their observance? Rather have not the carnal ease which so generally prevails, and the spirit of the world with which so many of the members of the Society have become inoculated, deadened their perceptions of the continued obligation to preserve intact all these testimonies, and that their faithful maintenance is essential to the circulation of vital religion within our borders? Are we not, in this day of lukewarmness and unbelief, invoked by the same high and holy calling as were the primitive believers, to show forth these fruits of the Spirit in all lowliness and spiritual-mindedness? Is not the backsliding that exists an indisputable evidence that the principles taught and lived up to by the primitive members of the Society, have lost their hold on the conduct of very many, and can any thing restore from the lapse but coming back to the belief in and practice of those principles?

In a letter from Deborah Bell to Joseph Pike, that mother in Israel thus points out the cause and remedy: "I think I do daily more and more need to cry out with thee, Oh! this inwardness, this inwardness is what has been too much wanting, and is still wanting. For it seems to me, that many are in the high road to ruin, for want of this true inward waiting to know the Spirit of Truth to lighten and subdue their own spirits, and also to open to them such things as might be serviceable and beneficial in the churches of Christ, both with respect to doctrine and discipline."

We reprint in another column, a Memorial of the Representatives of the religious Society of Friends in Pennsylvania, which has lately been presented to the Legislature of Pennsylvania in reference to the evils resulting from the use and sale of intoxicating drinks in this State, and the necessity of further enactments to protect the community therefrom.

This memorial has been read in both branches of the Legislature, and the Friends who took it to Harrisburg, we understand, had interviews with the committees of each body to whom such subjects are referred; with several other members of the Legislature, and with the Governor, by all of whom they were respectfully received and heard. Memorials of like character, prepared by

the Meeting for Sufferings, addressed to the Legislatures of New Jersey and Delaware, have also lately been presented by Friends appointed for that service.

SUMMARY OF EVENTS.

UNITED STATES.—The local weather report for 2nd month gives the mean temperature 29.9 degrees—the average for the past nine years is 32.8 degrees. The highest temperature was 60 deg on the 29th, and the lowest 8 deg on the 5th. The total rainfall melted snow 1.9 inches. About 4 inches of snow fell during the month, and there was freezing weather on every day except the 12th. There were twelve days on which snow or rain fell. Prevailing direction of wind N. W., maximum velocity 36 miles per hour.

Congress remained in session till the 2nd, endeavoring to forward the appropriation bills, but it is thought they can scarcely get through without an extra session. The President has returned to the House the Anti-Chinese bill, with his reasons for not approving it. The veto was sustained by a vote of 109 to 95.

The House has refused to concur in the Senate amendment to the act authorizing the granting a subsidy to steamships for carrying mails to Brazil.

The public debt statement for 2nd month shows an increase of \$311,411.

The excess of exports over imports, for the twelve months ending 1st mo. 31st, 1879, was \$146,781,274, against an excess of \$297,680,063 for the preceding twelve months.

The iron manufacturers of the Atlantic States, at a recent conference in this city, expressed a very hopeful sentiment as to the prospects of the trade for 1879.

Transportation over the trunk railways is stated as large and satisfactory to the railway companies and their stockholders. The Chicago elevators are said to contain 12,394,041 bushels of grain. Vessels in the harbor are laden with 124,756 bushels of wheat, 539,943 of corn, and 25,685 bushels of oats.

About five acres of valuable land, over shaft No. 7 of the Pennsylvania Coal Co., at Pittston, Pa., has caved in; it is said the loss will be serious.

The entire business portion of Reno, Nevada, was destroyed by fire on the morning of the 2d. The loss is estimated at \$100,000.

A large party of Mennonites from Southern Russia is expected to arrive in Canada on the way to Manitoba. The authorities are preparing to establish a quarantine, to secure the country against the introduction of the plague by these emigrants. More than thirty years ago, thousands of emigrants, fleeing from disease and death, arrived on an quarantine island in the Gulf of St. Lawrence, or on their way thither, and this island is again to be fitted up as a quarantine station, through which the Mennonites will be required to pass.

Two thousand six hundred and seventeen immigrants arrived at Castle Garden during last month, in the previous month 21,000. There were 2331 arrivals during 2d month of this year.

The health report of New York city states that scarlet fever and diphtheria are rapidly diminishing. 111 cases of the former and 27 of the latter are reported for the week.

The total number of deaths in Philadelphia is given as a decrease of 10 from the previous week.

Market.—The market for Government bonds continues firm. The subscriptions to the 4 per cents at the Treasury are declining, the amount on the 1st inst. being but \$194,650.

Flour.—Trade continues dull and steady. Minnesota extras, low and finest at \$1.25 a 50; Penna. do., do. at \$1.25 a \$1.75; western, do., do., \$1.75 a \$5.50. Rye, 1st, 100 lbs. \$2.25; 2d, 22.57. Corn meal, \$2.55 a \$2.60.

Grain.—Wheat active and higher. Pennsylvania and western red, \$1.11 a \$1.12; amber, \$1.12 a \$1.13. Corn, 42 a 44 cts. Oats, mixed, 30 cts.; white, 30 a 32 cts.

Fresh Fruit.—Apples, mixed casks, \$1.90 a \$2.40; fancy, 100 lbs. \$2.25 per bbl. Cranberries, \$7 a \$8 per bbl., and \$2.25 a 75¢ per crate.

Seeds.—Clover 6 1/2 cts. per lb. Flaxseed, \$1.40 per bushel. Timothy, \$1.40 a \$1.42.

Hay and Straw.—Average price during the week: Prime timothy, 60 a 70 cts.; mixed, 45 a 55 cts.; straw, 60 a 70 cts. per 100 pounds.

Hog and Cattle.—Market for hogs.—Extra Penna. and western, 5 1/2 a 5 cts.; fair to good, 4 1/2 a 5 cts.; common, 3 a 4 1/2 cts. Sheep, 5 1/2 a 6 cts. for choice, and 4 1/2 a 5 cts. for medium. Hogs, extra good, 7 cts.; good, 6 1/2 cts.; and medium, 6 1/2 cts. per pound.

FOREIGN.—The labor trouble in England continues

to be a source of anxiety. In some cases the men resumed work, generally on the employers' terms; in other branches, fresh strikes are occurring.

A motion was introduced into the House of Commons, that the sum of £100,000 be appropriated to do an important trade, and deprive England of the vantage of cheap meat; but the consideration of it postponed, under the belief that the subject was not for discussion. At a recent meeting of the Mersey Docks and Harbor Board, it was decided to spend £35,000 creating slaughter sheds and lairage, necessary to continue the export of the trade.

The electric light, it is announced, has profited in the great London fish market at Billingsgate. It is stated that 82,000 notes were paid into the Bank of England one day last month, which is the largest number ever paid in one day.

At the close of first month, there were 88,663 persons in London, of whom 47,700 were in workhouse, and 43,954 received outdoor relief.

The southern part of Europe was visited the 1st week by a very destructive storm which lasted several days. In the south of France, hundreds of people thrown on public charity by the inundation and destruction of their houses. In Spain the worst part of four days, with much damage and loss of life. In Italy the accounts are said to be lamentable. Whole coast, from Genoa to Naples, is strewn with wrecks of small craft, and a number of larger vessels received serious injury. The English steamer *Silis* was wrecked at Salerno, and 18 persons drowned.

On the 24th of 1st month, as a strong procession of sledges was descending the mountain Godard Head towards Ariolo, two leaders of the caravan noticed a huge snow mass was breaking from the top of the mountain. The alarm was immediately given, and passengers left their sledges and rushed back the plain in time to escape the huge avalanche, which but horses and sledges in a very short time. All the horses were killed by the fire, and the party returned to the Hospice for the night.

There are published in Sweden 300 papers a periodicals, of which 84 appear in Stockholm. There are only ten daily papers, of which five are published in Stockholm; while in Norway there are 15, in Denmark 70, and in Finland 6.

There is a large sum of money in receipt of infirm from Japan to the effect that the advance of education in that country, during the last five years, is very encouraging. Not only is this true of the colleges, but the general diffusion of knowledge among the people. Normal schools are being established in all parts of the country, and the women are receiving a higher education, largely improving their condition.

An outbreak of yellow fever, of a very severe character, is reported among the shipping at Rio de Janeiro but in the northeast provinces the health of the people is improving. The Government has already expended 30,000,000 miltres to alleviate the distress in the northeast, and has asked an additional credit of 10,000,000 miltres, or \$5,000,000 to provide food for the distressed inhabitants.

WESTTOWN BOARDING SCHOOL.

A NURSE is wanted for the Boys' Department, enter on her duties at the beginning of the Session, and to be in possession of a good English education.

Anna V. Edge, Downingtown, Chester Co., Pa.
Susanna F. Sharpless, Street Road, " "
Deborah Rhoads, Madisonfield, New Jersey.
Elizabeth B. Evans, 322 Union St., Philada.

MARRIED, at Friends' meeting-house, Gunders Greerney Co., Ohio, 2nd month 21st, 1879, EZRA NAYLOR, of Stillwater Monthly Meeting, to RACH E., daughter of David Stephen, of the former place.

DIED, at the residence of her parents, Prairie Centre, Kansas, 11th mo. 23d, 1878, MARGARET L., daughter of Benjamin and Sarah Nicholson, aged 75 years, member of Springfield Monthly Meeting. She had been taught to rely solely on the Lord Jesus Christ for salvation, and that a holy life was well pleasing in sight. An evident change wrought in her during past year, and the calmness that attended her dear last illness, were some circumstances that then convinced her soul yielded the comfortable belief that she made a happy close.

116 NORTH FOURTH STREET, UP STAIRS,
PHILADELPHIA.

Selected for "The Friend."

Account of Margaret Ellis, from a copy left by Lawrence King when travelling on a religious visit in America.

(Concluded from page 234.)

I continued then to keep to meetings, walking to them on foot and frequently on the way at the influence of Divine good on my mind, my great comfort and encouragement, and though the powerful arm of the Lord often mercifully supported me in various trials and afflictions, yet through the whisperings of the enemy I was ready to let in doubts and reasonings, wanting still a further confirmation as to the way I was in, humbly desiring of the Lord, that if it pleased him he would show me a sign for my assurance, that I might see a light in my path. And an ever-able to my petition, on returning one night from meeting, there was in the path a great brightness in my view, very wonderful to behold, which I was not in the least surprised or afraid, but at that instant was filled with a sense of Heavenly enjoyment to my great consolation. Blessed be the name of the Lord or his great favor to me, that he should so condescend to hearken to my request, which has been a great comfort and confirmation to me ever since, when I consider his tender dealings with me in the early days of my conversion.

After a few years I began to be concerned to open my mouth in Friends' meetings, and on a certain time was drawn to go to a little meeting at a considerable distance from my home, and waiting for a horse was at last disappointed, so that it was late before I set out, which was on foot; some would fain have persuaded me that it was too late, still as the concern remained with me, I could not be easy without going, and even when I came to a friend's house within a mile of the meeting, was assured the Friends were coming back; however, as the concern abode with me, I went forward, and found Friends sitting quietly together, save that some persons of note were there, who came out of curiosity, and had made some disturbance before I came, mocking and deriding the Spirit, urging one another of the Friends to preach, saying, "What, does not the Spirit move you yet; now that we came on purpose to hear," with more to the like effect. In a short time I was concerned to declare against people deriding the Spirit and making a mock at it, and said that what people made a mock at, was really

the Spirit of the Lord, and what an unworthy and wicked thing it was to deride the Holy Spirit, with more to that purpose, though I knew not what had been done in that meeting. After meeting one of the principal of them, being one called a gentlewoman, signified she was sorry they had behaved as they did, and confessed that what I said must have been revealed to me or else I could not have known what was done there before I came in, and Friends were glad of my appearance, wherewith they sometimes expressed unity, particularly at the abovesaid meeting. But yet I thought the way was too hard and narrow for me, to be exposed to the censure of every one, thinking I might do all the good I could, and be excused from this service, not duly considering that each one ought to be faithful to the manifestations of their own gift; but I was for choosing and cutting out my own way, thereupon darkness surrounded me, and when I came to a meeting I was under a cloud, and no comfort at all could I meet with, in which condition I continued many months, to my great distress and anguish—no light appearing nor any concern for offering my gift; and then my mother was taken away out of this world which still added to my sorrow, that I may well say disobedience, caused me a long wilderness travel. But at her burial I was highly favored by the showings in of the Divine power, to my great comfort, so that it was observed by people of other persuasions, that I was endowed with power from on high. At this time I had a great burden upon me, both in and out of meetings, and was not able to discern the cause of it, but one night I waked out of my sleep and was filled with tenderness to that degree I could scarce contain myself, and so went out into a private place in the barn, to give vent to my exercise, which indeed was through abundance of tears, and then there was as it were a book opened before me wherein were recorded all the evils I had done, even the vain words I had uttered, and my unprofitable language and behavior to my parents; but I saw that these transgressions were all blotted out, never to come against me. Several hours I was under this exercise, not knowing but I should have died at this time, wherein I was in great tranquillity of soul; but about break of day I saw that I must live longer in this world. Then I returned to the house, washed myself, and went among the family, whereupon a public friend who was there seemed to take more than ordinary notice of me, saying, "Where had Margaret been, for she looked so innocent as if she had been newly born."

After awhile I asked my father's permission to go over to Pennsylvania, where I understood there were many Friends, saying that I could work for my livelihood; to which he answered, "If I chose to live like a fool and be buried like a dog, I might go where I would." This was very hard to bear from so

near and dear a relation, and to part from one's native land; but I presently heard the voice of the true Bishop and Shepherd of souls saying, "If thou goest I will go with thee;" which I have found to be true, and that He was with me over sea and land, blessed be his name forever. In the voyage we had not three days together of fair weather, in a passage of ten weeks, and though the sea was often tempestuous, yet I was through the goodness of God preserved in great quietness and calmness, being entirely resigned to his will, inasmuch that I never wanted to see the land before it appeared. At my landing at Philadelphia, I soon became acquainted with Friends there; the first who noticed and expressed their friendship, were T. Chalkley, H. Hill, S. Preston and S. Powell, and afterwards many more who gave me good counsel and were tender over me, and thereupon I could but be thankful to the Almighty that he had raised me up such good friends who were a comfort and strength to me in a strange land.

After a time I began to be concerned to appear in meetings by way of testimony, but great reasonings filled my mind after this sort: that now it would be harder to me than before, seeing I could speak English but brokenly, and that there were many preachers there already, and so would fain have suppressed my concern, being ready with the prophet to say: I will speak no more in thy name, &c. But the Lord manifested it to me by his Spirit, that He would raise up more ministers and messengers, and send them over sea and land to call the inhabitants of the world to come to repentance and amendment of life, and whether they would hear or forbear, get him honor through his servants and messengers, and be clear of the blood of all; and then I saw clearly that we would be to me if I preached not the gospel.

After I had been sometime in this country, I was in a dream or vision and saw, as I thought, a kinsman of mine who had been deceased several years, who came to my bedside, whom I asked how it was with him, and where he dwelt, meaning where his spirit had a being; he answered, "Come and see." I then followed him to a certain place on the right hand of the way, into which he entered and left me. There I beheld a great number who were the spirits of just men made perfect, whose food was as it were the most delightful dainties, suitable to their being, on which they lived continually; wherein was such excellent glory as was beyond expression of tongue to set forth, with which my heart was greatly ravished, and I asked one of them if I might be permitted to come in there, (which I concluded to be heaven), but the answer was returned "not yet." Then I replied, I would gladly return to the body and suffer whatever the Lord should permit to come upon me, for I thought all the afflictions and tribulations among one could possibly meet

with in this life, would be little to such exceeding joy and heavenly delight as was there to be met with, and I turned back as I thought to the body with a song of joy, expressive of the enjoyment I there beheld. Afterwards when I met with afflictions and troubles, and was ready to query why should these things come upon me, I was rebuked in myself on remembering my former promise of willingness to suffer: so I saw that though the spirit was willing yet the flesh was weak. A sense of this great favor has been an encouragement to me ever since, finding the same peace of the Lord remaining in my heart to this day, blessed be his name forever.

On a certain time there was a debate in our Monthly Meeting attended with a difference concerning some Friends, and we could not discern which was in the right; whereupon I was under an exercise of mind and prayed to the Lord that he would be pleased to manifest to me how the matter really was, and that I might have wisdom given me, and be made instrumental in reconciling the said difference. And that night I saw in a dream an elderly man with white hair and white clothing, who told me exactly how the matter was, and that I should visit those families, which I did. Some endeavors being used, the persons who were in fault confessed, and the whole affair was clearly manifested. And in the course of my life I have found it my place to transact the affairs of truth with plainness and uprightness; and when on my sick bed, I examined into the account of my life, and how it was with me. I had great peace of mind in that I had endeavored to act in the discipline without favor or affection; which practice I recommend earnestly to all Friends, that they also may have peace in such a trying hour. My sickness being very severe, I was desirous to know whether I should die at that time, upon which I saw, as it were in a vision, a clock at the foot of the bed, the weights of which were quite run down, and while I was musing upon it, I saw a hand come and wind up the weights for the clock to go for a longer season, which I took to be a just representation of my case, and from that time I mended and grew entirely well. These things, and many more too tedious to enumerate, the Lord has been pleased to show me, and if people will but be faithful and obedient in what they know, they will see things more clearly than they do, and know that miracles have not ceased.

The substance of the foregoing relation was taken down from her own mouth in a journey from London to Wales. Copied by Lawrence King, who says it was without date, but that she was at Skipton, 10th mo. 1753.

Dying Expressions of James Naylor.—There is a spirit which I feel, that delights to do no evil, nor to revenge any wrong, but delights to endure all things in hope to enjoy its own in the end. Its hope is to outlive all wrath and contention, and to weary out all exaltation and cruelty, or whatever is of a nature contrary to itself. It sees to the end of all temptations. As it bears no evil in itself, so it conceives none in thought to any other; if it be betrayed, it bears it; for its ground and spring are the mercies and forgiveness of God. Its crown is meekness, its life is everlasting love unfeigned; it takes its kingdom with entreaty, and keeps it by lowliness of mind. In God alone it can rejoice,

though none else regard it, or can own its life. It is conceived in sorrow, and brought forth without any to pity it; nor doth it murmur at grief and oppression. It never rejoiceth but through sufferings, for with the world's joy it is murdered. I found it alone, being forsaken. I have fellowship therein with them who lived in dens and desolate places of the earth, who through death obtained this resurrection, and eternal holy life.

For "The Friend."

Capital Punishment.

(Continued from page 137.)

In addition to the foregoing considerations upon the incompatibility with the principles of Christianity of the death penalty, the following observations upon its expediency, as judged by its practical effects, are well worthy of notice. These are taken from a carefully prepared examination of the subject published in London in 1815, based upon a treatise of Prof. Mittermaier, of Heidelberg, who has devoted a large portion of his time to its investigation. The volume in which the following passages occur, was edited by John Macrae Moir, a barrister of London. He remarks:

"Whoever impartially inquires into the subject must be struck with the observation, that fifty years ago a great number of crimes were threatened with death, regarding which now-a-days no legislator could make up his mind to menace the extreme penalty. In consequence of this legal threat, thousands were slaughtered on the scaffold, while now we are ashamed that such a barbarity ever obtained the sanction of the law. The question may fairly be asked, whether such a fact ought not to raise suspicions against the penalty in general, and to make it incumbent upon us, conscientiously to inquire into the necessity of maintaining it. This serious question is more and more being forced upon our attention, by daily occurrences. The advocates of abolition are not merely theoretical writers who take a one-sided view of the world—not merely men who, in their antipathies to everything existing, are desirous of shaking the foundations of civil order, or of seeing Death Punishment abolished: that it may no longer be inflicted upon themselves and their partisans; but we find among them distinguished men of a practical turn of mind, who have long been engaged in humane and generous endeavors. History teaches that in ancient times the menace of Death Punishment was considered to be justified by three ideas, viz:—

1. *Lex talionis.*
2. Belief in the necessity of criminal law as a deterrent.
3. The notion of making atonement to an offended Deity.

"The Germanic nations have inherited these ideas from the ancients; but as soon as a nation attained that degree of culture on which the legislator learns to appreciate the moral nature of man, these ancient views regarding Capital Punishment gradually disappeared. It was at this stage, that Christianity manifested its influence by propagating the sublime idea of a loving God, who does not desire to see the death of the sinner, and sets before the legislator the task of reforming the criminal. All inquiries on the subject lead to the conviction that none of those theories, by which learned jurists endeavored to justify

Death Punishment, are sufficient for attaining this purpose. An inquiry into the various arguments, by which the members of legislative assemblies have attempted to justify the preservation of Death Punishment, has shown how weak the alleged reasons are, and that the defenders of the penalty in their despair were compelled to have recourse to the right of necessity. Hence it appears, how weak the foundations are on which the penalty is based."

"Death Punishment is not so effective in protecting society from criminal offences, and imprisonment. A penalty is so much the more effective, the more certain its infliction. Now experience teaches, that in crimes legally threatened with death, the offender has much more probability of escaping, than in those menaced with another penalty. When imprisonment for life is threatened, the criminal has no hope of escaping the penalty—but discovery and condemnation being certain and no pardon-likely to be granted. There is no excitement on the part of the public—such as often follows the passing of a capital sentence—and the sovereign is spared the painful position in which he, as a rule, is placed, whenever called upon to perform the difficult duty of confirming a capital sentence. Hence it can be understood, why practical lawyers in England have voted for the abolition of Death Punishment. The menace of imprisonment for life, in their opinion, has greater power of repression, and is certainly more to be relied upon.

"Experience has irrefutably proved, that in no country has the number of capital crimes been diminished by the re-enactment of Death Punishment, or greater strictness in its execution. On the contrary, after the abolition of the penalty, both for certain crimes and generally—the number of crimes decreased in a greater ratio than before, and the assertion often made, that after the abolition of Death Punishment, the number of capital crimes has increased—is either decidedly untrue, or at any rate, evidence of wanting that abolition was the cause of this increase.

"In Insanity, where Death Punishment has legally or actually been abolished for almost a century, the conviction gains ground every year, that Capital Punishment is an unequalled, useless, and even pernicious barbarity. The great majority of the Tuscan jurists agree in thinking, that Capital Punishment never ought to be re-enacted."

"We have endeavored to show, that the science of jurisprudence, legislation, and experience combined tend to the abolition of Capital Punishment. When this result will be brought about, we do not presume to say. But as soon as the persuasion has become general, that Capital Punishment is neither necessary nor expedient, it will disappear as withered leaves fall in autumn. A great result will have been attained, when in the minds of all well-intentioned citizens the conviction gains ground, that with a well-arranged prison system, calculated to secure the moral reform of the prisoners, Capital Punishment can be replaced by an imprisonment which, as it has been shown, is capable of facilitating the reformation of the most obdurate criminals. We conclude by quoting the words of an American statesman, distinguished by his position, character, and experience,—viz., the Governor of Massachusetts, who,

his official message referring to Capital punishment, said:—

"I regret that Death Punishment still holds place in the Code of Massachusetts, while gradually disappearing from the legislations of all civilized nations since it has been recognized to be not necessary, but even dangerous, by operating on some persons injuriously, and on others perniciously. The study and execution of a series of years confirm the conviction, that this punishment must disappear on the number of penalties deemed lawful by the best governed and most civilized States, proceeding natural in the administration of justice among savages during ruder forms of lower conditions of society, a rigid necessity sometimes subsequent to times of war.—This penalty in a State like ours causes a scaffold only to be erected to serve as a terrible spectacle, exciting the imagination of pursuing sensitive men in their dreams a not yet abolished remnant of ages of barbarity, whilst it appears to the hardened criminal to be only another disease by which torture pays the unavoidable debt of mortality."

(The following statements taken from a recent publication of the English Howard Association, which has for one of its objects the abolition of capital punishment, are also interesting and valuable.

"One of the longest experiences which can be adduced, as to absolute abolition, is that of the American State of Michigan, which repealed Capital Punishment in 1817. Thirty years later (in 1847) the ex-governor of the late Prison of Michigan, Z. R. Brockway, now governor of the New York State Reformatory at Elmira, in a letter to the Howard Association, wrote that, having had occasion to investigate the question statistically, he found that:—"The number of committals to the State prison, annually, for crimes involving killing, is no more now, and has not been more in any year, since the death-penalty was abolished, than it was at the beginning; and the population has increased fourfold. I consider this a very strong fact, especially when taken in connection with the circumstance that in the absence of the death-penalty, convictions and committals to prison are much more easily obtained."

"The security of human life demands that the crime of murder shall be adequately punished. Short terms of imprisonment, or the systematic granting of pardons, are wholly unwarrantable in the case of murderers. King Oscar II. of Sweden and Norway, well exemplified a sound principle in this respect, in a remark addressed to some of the delegates to the Stockholm Prison Congress of 1878. Alluding to a man who, for murder, has been imprisoned at Christiania for thirty-eight years, but who continues in good health of body and mind, the king said:—"I have not laid my hand upon God's gift of life to that man, but I have not felt warranted in pardoning him." Sweden and Norway very rarely resort to executions. They render secured permanent imprisonment effectually deterrent. So does Belgium. At Ghent prison are many prisoners who have been from twenty to thirty-five years expiating the terrible crime of murder. They are treated mercifully; their health is, in the whole, good; but the heinousness of their crimes is recognized by the severity of their punishment. It is the same in Holland, where, after nearly twenty years without

executions (since 1800), murders have not increased.

For "The Friend."

Thoughts and Feelings.

THE TALENT OF INFLUENCE.

The right use we are making of the talents committed—that of influencing others by the force of practical example, as well as by gentle instructive precept—is one of immense weight and importance to us, both as respects the life that now is, and that which will endure when all things else shall vanish away. Unless we have seriously reflected on the subject, we can scarcely be aware of the amount of influence we are continually, though perhaps many times unconsciously, exerting upon those around us, either as respects being way-marks unto obedience and holiness; or as stumbling-blocks unto lukewarmness and worldly-mindedness. If, as the apostle represents, we are all called to "adorn the doctrine of God our Saviour in all things," then surely the inward adorning of meekness and lowliness, of righteousness and quietness of spirit, should manifest themselves as fruits of the Heavenly anointing, in the daily consistent life and conversation; causing us to be as epistles known and read of all men. If "the King's daughter"—the obedient follower of Christ—is to be "all glorious within," then unquestionably the proof that we have in any wise attained, must lie in the unequivocal, uniform, consistent practice; and in the wakeful solicitude to guard against every thing which would bring reproach upon our Christian profession.

The words of our blessed Lord and Saviour give himself are—"Whoever shall confess me before men (in word, in act, in outward demeanor, in Christian gravity, 'in all thy ways,') him shall the Son of man also confess before the angels of God; but he that denieth me before men (in life and conversation, in self-denying and cross-bearing, in baptism and suffering,) shall be denied before the angels of God." In carrying out the Divine requisition of confessing Christ before men, and thus improving the talent so responsibly lent us, it is so opposed to the prevailing maxims and pursuits of the world, that it need be no cause of surprise, if such should be hated and set aside for their singularity. No wonder if a striking language used by some of the ungodly of old towards the righteous, should be again the experience of such as these, viz: "He is not for our turn, he is clean contrary to our doings; he was made to reprove our thoughts; he is grievous unto us even to behold; for his life is not like other men's, his ways are of another fashion." But what if such reproach and humiliation should happily be the means of bringing us, in our little measure, into greater conformity to the life of reproach and suffering as followers of Him who said, "I gave my back to the smiters, and my cheeks to them that plucked off the hair: I hid not my face from shame and spitting?" Yea, it hath often been a cause of wonder and apprehension to the writer, that Christ's professed disciples, in this and in every age, should not participate more generally and evidently in His baptism and suffering cup; when it is written, "It is enough for the servant to be as his Master." "As He is, so are we in this world." "If they have persecuted Me, they will also persecute you." And, "If the world hate you, ye know that it hateth Me before it

hated you. If ye were of the world, the world would love his own; but because ye are not of the world, but I have chosen you out of the world, therefore the world hateth you." Oh! the preciousness, on these terms, of being hated by a world that lieth in wickedness. Can there be any question respecting our duty to bear cheerfully for the dear Master's sake, whatever hardships or even contumely, faithful compliance with His will may expose us to? Can we refuse to suffer shame for His name, in an honest confession of Him within the whole sphere of our influence, who endured the cross, despising the shame for us, the Just for the unjust? Should we not rather rejoice in being counted worthy to suffer with a suffering Lord in consideration of the promises:—"If we suffer, we shall also reign with Him." "Blessed are they which are persecuted for righteousness' sake." And again, "Blessed are ye, when men shall revile you, and persecute you, and shall say all manner of evil against you falsely, for my sake."

Then if we aim, in the obedience which is of faith to Christ our Lawgiver, to let our light shine; if we duly appreciate the value of the talent entrusted to "occupy" with till He come; if we humbly desire to "walk worthy of the vocation wherewith we are called;" let us not be cajoled by the smiles, nor awed by the fears, neither be too tremblingly alive to the opinion of our fellow-worms. But, after the example of the Psalmist who said, "I have set the Lord always before me," may we "count all things but loss for the excellency of the knowledge of Christ Jesus," and so become preachers of righteousness in our daily lives and conversation. Thus will the talent of influence, as set forth in the parable of the Redeemer, yield approving increase; and be as precious incense to His ever excellent name. Remembering, as saith the apostle, that "Of Him, and through Him, and to Him, are all things: to whom be glory forever. Amen."

Selected.

Testimonies to the Way to Salvation.

"All the world lies in darkness. * * * And this is the cause of condemnation, and it rests upon all who are out of the life of God. And no other way there is appointed of the Father, to come out of this condition, but Christ Jesus, the light and life of men, who is the Light that is in the world, though the world know Him not; which Light shines in darkness, but cannot therewith be comprehended; which light is the revealer of darkness, and manifests the deeds thereof; and the first appearance of this in the creature shows the darkness, and captivity that is in the darkness; till which the creature never comes to see the wretched condition that man is in, who is without God the life; nor till then will the creature be willing to stand still to see God's salvation; but is full with vain hopes, conceits and imaginations, and the veil is over the heart, and what God hath there written is not seen, and so being whole, needs not the Physician. * * *

"But when the Light is minded, the creature comes to see death reigning, and self alive without the Law, with that Light which was given to keep out of the pollution and defilements; and so to keep the life clear and unspotted. With that Light, that is seen and judged which hath passed over the life and

defiled it; and that which hath gendered to bondage is seen, and the hardness of heart comes to be felt, and the cause seen, even the great transgression of the pure law; and so comes the fear of God to take hold of the man that hath lived out of the life of God, and taketh pleasure in unrighteousness, and the creature then finds trouble within, even where the strong man did keep the house in peace; and abiding in the Light, the cause and end of it is seen; and, dwelling in the fear, wisdom is received from above to depart from the iniquity; and in departing from the iniquity, there is a coming nearer to God; so the Light grows and springs, as there is a coming near the just paths of life. And as the light ariseth the creation is seen, and how the enmity hath spread over, and how the lust hath defiled it, * * so that God walks not there because of the great abomination; and that is the cause of all your woe, even His absence.

"And when you see this, the lamentation begins in the house of laughter, even after Him from whom you have fallen; and as you follow the Light, and come nearer to the Lord, from whence it comes, you will see that [it] is only your own wills and ways that have separated you from the Holy One. And with the Light you will come to see how often you have been moved by the Spirit of light from your evil ways; and that the cause why you have been thus long in the fall, hath been in self will and worldly pleasures, whereby the life hath suffered; never till then comes any to see Him whom you have pierced, nor to lament over Him, nor to see what it is that oppresseth the just, nor to hate that which God hates, and love that which He loves in any measure."—*J. Naylor's "Love to the Lost,"* 1656.

"The Word is that which was in the beginning, and was the beginning of all visible things, and that by which all things were made. * * Whosoever have the Word, with it are washed and cleansed and translated from the world, and conformed to God, so far as they have it, and it reconciles to God all that have it. * * Man being gone out into the world, the light of the Gospel is preached to turn man again to know the Word, that coming to the knowledge thereof in his heart, and having his mind stayed thereto, in the light, he may come to see the power of the Word working in spirit, working out the unclean nature and the rebellious will, and working in the pure nature in the cross, slaying the carnal man with all his affections."—*Id.*

"The living faith sees Him that is invisible, and lays hold on the measure of God made manifest in spirit, which measure of the spirit is that which in the faith worketh out the *old*, and worketh in the *new*, both will and deed, whose work is perfect to kill and to make alive.

"But the world's faith is not of this nature and power, who hear a thing with the outward ear, and so set themselves to believe, or not to believe it, in their wills, or outward persuasion from others, or in their own imagination. * * True faith is the gift of God, which none can receive but in the Spirit, * * that faith which stands in Christ, believes in purity and in perfection, and holiness, and slays sin; and by that faith alone the just live, and justice and righteousness is brought forth to fight in the godly conversation; but that faith which stands in the imaginations and wisdom of man, which believes salvation

without holiness of life, that slays the just, and keeps alive the unjust. * * * *

"That faith that is the gift of God, believes in the Light and follows it, and so leads to the life, and this faith that stands in the Light and life, is the living faith and never without works, * * in the obedience to which the soul is purified, and victory witnessed over the world, sin and death. But you who believe not in the Light, are enemies to this faith, and yet you get the words of the Scripture, given forth from the Light; and so your faith stands in the wisdom of words, into which you have been searching with your wisdom, but not in the power of God and His word."—*Id.*

A HYMN OF THE SEA.

Selected.

The sea is mighty, but a mightier waves
His restless billows. Thou, whose hands have scop'd
His restless gulls and built his shore, thy breath,
That moved in the beginning o'er his face,
Moves o'er it evermore. The obedient waves
To its strong motion roll, and rise and fall.
Still from that realm of rain thy cloud goes up,
As at the first, to water the great earth,
And keep her valleys green. A hundred realms
Watch his broad shadow warping on the wind,
And in the morning shower, with gladness hear
Thy promise of the harvest. I look forth
O'er the boundless blue, where joyously
The bright crests of innumerable waves
Glance to the sun at once, as when the hands
Of a great multitude are upward flung
In acclamation. I behold the ships
Gleaming from cape to cape, from tide to tide,
Or stemming toward the east, or hastening home
From the old world. It is thy friendly breeze
That bears them, with the riches of the land,
And treasures of dear lives, till, in the port,
The shouting seaman climbs and furls the sail.

But who shall bid thy tempest, who shall face
The blast that wakes the fury of the sea?
Oh, God! thy justice makes the world turn pale,
When on the armed fleet, that royally
Bears down the surges, carrying war, to smite
Some city, or invade some thoughtless realm,
Descends the fierce tornado. The vast bulks
Are whirled like chaff upon the waves; the sails
Fly, rent like webs of gossamer; the masts
Are snapped asunder; downward from the decks,
Downward are slung, into the fathomless gulf,
Their cruel engines; and their hosts, arrayed
In trappings of the battle-field, are whelmed
By whirlpools, or dashed and upon the rocks.
Then, when the waves are still, the storm is o'er,
A moment, from the bloody work of war.

These restless surges eat away the shores
Of earth's old continents; the fertile plain
Washes away, and leaves the mountains to show,
And the tide drifts the sea-sand in the streets
Of the drowned city. Thou, meanwhile, afar
In the green chambers of the middle sea,
Where broadest spread the waters and the line
Sinks deepest, while no eye beholds thy work,
Creator! thou dost teach the coral worm
To lay his refuge round the storm-driven bird.
He builds beneath the waters, till at last,
His bulwarks o'ertop the brine, and check
The long wave rolling from the southern pole
To break upon Japan. Thou bid'st the fires,
That smoulder under ocean, heave on high
The new-made mountains, and uplift their peaks.
A place of refuge for the storm-driven bird,
The birds and waiting billows pluck the rifts
With herbs and reed; sweet fountains gush; sweet airs
Ripple the living lakes that, fringed with flowers,
Are gathered in the hollows. Thou dost look
On thy creation and pronounce it good.
He valleys, glorious with their summer green,
Praise thee in reeds for beauty, as the dove
Swept by the murmuring winds of heaven,
Join
The murmuring shores in a perpetual hymn.

Bygone.

The truest self-respect is not to think of self.

Incidents and Reflections.—No. 37.

MARRIAGE.

There are few subjects on which people are more disposed to indulge in pleasantry with one another than that of marriage; and yet there is perhaps none more serious and important in its results, reaching through time and even into eternity; none in which there is greater need to know that we have Divine guidance and sanction.

John Richardson's father died when he was quite young and his mother inclining to marry again with one who was of a different religion, persuasion and was considered to be wealthy. John felt uneasy with the prospect, and to her, he "was afraid she had too much of a eye to what he had," "but if she thought it augment our portion in so marrying, the hand of the Lord would be against her, and a blasting or mildew would come upon eve that which we had got through industry and hard labor, and what the Lord had intended to have blessed to us, if we kept faithful to the Truth, and contented ourselves with our present conditions."

Notwithstanding John's caution, the marriage took place, and the result was as he had foreseen. The difference in their religious views was destructive to the family harmony and his father-in-law would not permit him to remain in the house, unless he would give up the attendance of his religious meeting and conform to his own manner of worship. John had been very faithful and diligent in his attention to business, and appears to have received no wages for his labor, being still a minor; but this availed not. He thus describes his expulsion from home.

"Notwithstanding I pleaded with my father to let me stay until I could hear of a place he would not, though I was scarce fit for service, being almost like an anatomy (as the saying is), so that most who knew me said I would pine away in a consumption; but turn out I must, and did, though I was weak, poor and low in body, mind, pocket and clothes; for I think I had but twelve pence in my pocket and very ordinary clothes upon my back. Thus I took my solemn leave of the family with my heart full, but I kept inward to the Lord, and under Truth's government; many tears were shed in the family, especially by my poor mother, when I left them; my father said little, but appeared like one struck with wonder, to see so much love manifested toward me by the family, and so much wishing that I might not go away. But out I came on the great common, where I had had many solitary walks, but none like this, for this reason, that I knew not where to go."

When his step-father died, he left by his will five shillings to John, which was all the share he received of the family estate; confirming his prediction, that the marriage would bring a blasting and mildew upon even that which they had got n through hard labor. John Richardson makes the following judicious comments upon these occurrences:

"I write this in part, that all who do marry, may take special heed that it be done with great caution, and under due consideration, and the Lord sought to in it, that it may be done in his counsel, and not only nominally but truly in his fear; and then no doubt but it will be well with both husband and wife; and being equally yoked, such will not only be met and true helpers in all things belonging

his life, but more especially in things appearing to the world that is to come, and good of the immortal soul, which to the full people of the Lord is of great value, now happily and peaceably do such live in the Lord, as they keep to that which thus joined them."

Federick Smith relates in his Autobiography that he married young in life, when he was far from living in obedience to the Divine will. As years passed on, he was brought to submit himself to the grace of God; and withdrawn towards the Society of Friends, and with them in religious fellowship. This was very distasteful to his wife, who seemed to be alienated from him, and carried her attention so far as to threaten to leave him altogether. His prudent behavior in some degree softened her feelings, though it failed to bring about that unity which was desired.

Whilst matters remained in this state, his wife was compelled on account of her health to take lodgings out of London, and which remained in town to attend to his business. He says, "One day, while serving customer in the shop, I felt the sweet influence of heavenly love in a remarkable degree, and at the same time, such a powerful influence with my dear wife, that I was overcome with the sensation; and having dismissed the customer as speedily as I could, I went up stairs to give vent to my feelings. There I continued the greater part of the day. Under this influence I felt an inclination either to speak or write to her, on the subject of a nearer religious fellowship. I was not however in haste to put it in practice, but waited till the next day, that I might, in my mind become more settled, judge of propriety of such a step. The next day, sitting down before Him by whom I felt to be rightly instructed, I again felt the same sweet impression; when, without writing, I wrote a few lines to her, expressing what I felt. I took the letter that evening, and soon found that the Master had taken before me. She read what I had then several times over, but said nothing at a time, I ventured to begin the conversation, though in much fear and brokenness. I told her all that I had felt. She was highly affected at the relation, and asked me what time of the preceding day it was. I felt the impression I spoke of; I read that the clock struck eleven as I was going up stairs, on leaving the shop. She said it was very remarkable, for just at that time she felt the same impression towards me, which had continued with her ever since, to her comfort and consolation. We mingled our tears of real joy together, and sense of the gracious dealings of our heavenly Father to our poor souls; and we to admire that our present union had not been effected by any human means, but by the power of the Lord alone, *He having given wife to me.* Great, I believe, were our desires that we might in no respect know a separation from each other, but that we might talk before Him as to experience a continuance of his love and regard. I believe both considered this extraordinary manifestation of Divine love, through which we were so sweetly united, as our spiritual marriage; for what we had before known of love, far short of that which we now felt towards each other—nay, appeared as nothing in comparison of it."

For "The Friend"

A Colored Woman Awarded Damages for Kidnapping.

In the United States Circuit Court in Cincinnati, within a few days, Judge Baxter read the decision of the Court, overruling the motion filed by the defendant for a new trial in the somewhat famous case of Henrietta Wood against Zeb Ward, and awarding judgment on the verdict for \$2,500.

A few extracts from the opinion, confirming the award of damages to the injured woman will explain the case and give an insight into some of the oppressions of slavery.

"The plaintiff is a woman of color. For several years prior to her removal to Cincinnati, she resided with Mrs. Cerode, in Louisville, Ky., as a slave. About 1847 she left Louisville, taking the plaintiff with her, and settled in Cincinnati, where she executed and delivered to the plaintiff a formal instrument of manumission. Thus the plaintiff became, so far as her apparent owner could confer the boon, a free person, with all the rights and immunities incident to freedom. And from that time until the restraint imposed by the defendant, to be hereinafter fully stated, the plaintiff remained in Cincinnati, in the undisputed and undisturbed enjoyment of personal freedom.

"We infer, however, from the depositions given in another suit (but which are not evidence in this case), to be hereafter mentioned, that the children of Mrs. Cerode claimed some title to or interest in the plaintiff, as a slave conjointly with or adversely to their mother's title; and that they repudiated their mother's action in the premises, and desired to regain possession of her. But no active steps seem to have been taken to effect that object until the spring of 1853. At or about this time they united in a conveyance, in and by which they professed and assumed to convey the plaintiff as a slave to the defendant in consideration of \$300 to be paid in the event he succeeded in obtaining possession of her. The defendant then resided in Covington, Ky. Shortly after said conditional sale, the plaintiff was inveigled by one Rebecca Boyd, in whose service she was then employed, across the Ohio River and into the State of Kentucky, where, by chance or prearrangement, they were met by defendant, who claimed the plaintiff as his slave, forcibly restrained her of her liberty, and sent her back to Lexington, and had her there confined in a private slave prison belonging to one Lewis C. Roberts.

"While thus imprisoned, on the 10th of June, 1853 a petition was filed in the Fayette County Circuit Court in plaintiff's name, for the purpose of regaining her liberty. In it she averred that she was a free woman. To this petition Lewis C. Roberts, the proprietor of the prison in which she was detained, was made a defendant. But at defendant's instance an interlocutory order was soon after entered in the cause, substituting the defendant Zeb Ward as a defendant in the place of Lewis C. Roberts, and dismissing her petition as to Roberts. The defendant, Ward, then answered, and in his answer alleged that the plaintiff was not a free woman, but his slave." Upon the issue thus made proofs were taken and the case regularly heard."

The Court in Kentucky ruling she was a slave gave her over to Ward.

"Here the litigation between these parties

in Kentucky terminated. Whereupon the defendant, soon after its termination, sold the plaintiff to one Wm. Pulliam. He caused her to be conveyed to Mississippi and sold to one Girard Brandon. Brandon continued to subject her to his service in the State of Mississippi and Texas until the latter part of 1865, and until she was emancipated by the 13th amendment to the National Constitution. On being then the second time emancipated from slavery, the plaintiff began preparations to return to her home in Cincinnati, but owing to various hindrances, not necessary to be enumerated here, she did not get back to Cincinnati until some time in the year 1869. During all this time, from 1853 to 1870, the defendant resided in Kentucky and Tennessee. He visited Cincinnati in 1870, when this suit was instituted. Plaintiff's petition, which, under the practice in Ohio, is filed as a substitute for a declaration, embodies substantially the facts herebefore stated—except those connected with the Kentucky litigation. The defendant's answer interposed three defenses: First, a general denial of the facts charged; second, the statutes of limitation, and, thirdly, the adjudication of the Kentucky court herebefore referred to. The plaintiff replied, and the issues thus made came on and were tried at the last April term, 1877, before the honorable the District Judge and a jury, resulting in a verdict for the plaintiff and an assessment of \$2,500 damages. The defendant then moved for a new trial, and it is this motion that is now before us for determination. * * * "The real contest, as we think, arises out of the defendant's third defence, to wit: 'Is the plaintiff, by reason of the decree rendered in her suit, by the Fayette County Circuit Court of Kentucky, precluded from a re-examination in this court of the same question decided in that case?' If she is, then that judgment is a full and complete defence to this action. The question is an important one, and deserves as it has received, the most thorough consideration.

"The facts as we have detailed them, present a case of peculiar and complicated oppression. The plaintiff was quietly, and, as she believed, securely domiciled, under the protection of the laws, in a community friendly to her aspirations and within a jurisdiction which prohibited slavery, and presumed everything in favor of freedom. But while thus reposing in confidence she was, by false pretences, decoyed into Kentucky, and there enslaved by violence. It was a most grievous wrong to have been thus betrayed into a distant and unfriendly jurisdiction, in which her color was prima facie evidence of her servitude, and forced to submit to the deprivation of liberty, or litigate in a tribunal where the presumptions of law, supposed public policy, and established prejudices of long standing, combined to defeat her claim. And when to these we add that, pending the controversy, the plaintiff was prima facie under the law of slavery with all attendant disabilities, left in defendant's custody, subject to his unrestrained will and amenable to his punishment, and without the means necessary to defray the expenses of litigation, her wrongs appear more and more obvious, and appeal strongly to the sympathies of the court for redress.

"But these considerations can not prevail with the court unless a remedy can be found within recognized legal principles. A judge does not know any code of morals higher than

the Constitution, and laws enacted in pursuance of that instrument. These, as they then existed, not only recognized, but protected the slave owner in the enjoyment of that species of property, and we must administer the law as it then existed, uninfluenced by the subsequent change in public sentiment on this interesting subject.

"By the National Constitution—the instrument under and in virtue of which we hold our offices—we are required 'to give full faith and credit to the records, public acts, and judicial proceedings of the several States.' It follows that the decree of the Kentucky court is entitled at our hands to the same force and legal effect that ought, under the laws of Kentucky, to be accorded to it in that State. The question, therefore, narrows itself down to the single inquiry, Does the decree rendered by the court of Kentucky and here pleaded and relied on as a bar to this action, forever preclude the plaintiff from a re-examination of the issue decided in that case? If it does, as we have already said, it is a complete defence to the plaintiff's present suit."

After quoting many authorities relative to the laws on the subject of slavery, the Judge says:—

"From these authorities, which might be indefinitely extended, it will be seen that although slaves are protected as persons against the destruction of life and limb, they are in all other respects treated as property, and subjected to all the disabilities incident to that condition. They are without power to contract, to acquire or hold property, sue or defend a suit. And being without capacity to sue or defend, no valid judgment can be rendered against them. It would be an anomaly to hold that any one could be concluded by a judgment or decree rendered in a judicial proceeding while he had no legal capacity to prosecute or defend. It is true that such a suit was brought by the plaintiff, and prosecuted in her name, and that the Kentucky court did entertain, sit in judgment upon and decide it. Similar suits were not infrequent in the courts of the slave States. But these suits were always entertained upon the allegation that the plaintiff was free. If free, the plaintiff had the right to sue; but when the question of freedom was traversed, and put in issue, it was equivalent to a plea denying the plaintiff's right to sue, and whenever the court reached the conclusion that the plaintiff was a slave, the litigation, whatever its scope, necessarily ceased for the want of a competent plaintiff. In other words, the courts held that there was no suit pending, and dismissed the proceedings without further inquiry. In *Bentley vs. Cleveland*, the court ordered the allegation that complainants were slaves to stand as a plea to be first disposed of before it would take cognizance of the other parts of the complaint. The same principle, as we understand the record, was applied by the Kentucky court to the proceedings instituted by the plaintiff against the defendant. Plaintiff alleged her freedom. This, *prima facie*, gave jurisdiction. But as soon as the court reached the conclusion that plaintiff was a slave, it found itself without jurisdiction for the want of a plaintiff competent to sue, and did the only thing which, under the circumstances, it could have done—struck the case from the docket. The decree simply dismisses plaintiff's petition. There is no declaration of facts, no special findings, no judgment for

costs, and no execution awarded. In the opinion of the court the plaintiff was defendant's property. She, and all she had, and all that she might afterward acquire, belonged to him. To permit such a decree, obtained under such circumstances, against a human being, for the time treated as a chattel, and without legal capacity to sue, to operate as a bar, or an estoppel, and conclude the plaintiff in a matter of such vital importance as is involved in this case, would be a great reproach to the jurisprudence of any country.

"On the trial of this case in this court, the plaintiff offered full and satisfactory evidence of her freedom at the time of the committing of the several grievances complained of, while defendant offered no opposing testimony. He rested his case wholly on the judgment pleaded and relied on by him. As the judgment does not, in our opinion, conclude the plaintiff, the verdict of the jury must stand. The damages are not excessive, the motion for a new trial will be disallowed, and judgment entered thereon in plaintiff's favor."

Barbara Bevan.

For "The Friend"

The following account is published in the hope that the early dedication of this young woman, her call to the ministry about the age of sixteen, her zeal and industry in the cause of Truth, with her exhortations to those about her sick bed, might take hold of, and tend to stir up some young minds to follow in the footsteps of the flock of Christ's companions.

"Barbara Bevan, daughter of John Bevan, of Treveryg, in Wales, was an honest, sober, virtuous young woman, zealous for the holy name and truth of God, and greatly desired and travailed for the exaltation and spreading thereof, laboring that all might come to love and live therein, and order their lives and conversations by it, which she came to know and experience in her own heart, by the divine power of God. Though she was before soberly educated by her parents, and when she was but six years of age, diligently kept to Friends' meetings, and was dutiful to her parents, loving to her relations and neighbors, and for her orderly behavior in meetings, well beloved by the faithful who were acquainted with her; yet as she grew up, the enemy labored very often to draw her mind to delight in vain objects, and at times prevailed, to her great grief and exercise of mind.

"But it pleased the Lord to visit her with sickness of body, when about sixteen years of age, and to show her state and condition to her, and let her see, as she afterwards declared, that the form of truth, and the profession of it only, would not satisfy without possession; and that she had great need of a Saviour; and that the pleasures and delights here below were but as dross and dung in comparison to God's salvation and life-giving presence; and that there was but one way to obtain it, and that is, as she said, by giving up in obedience to the Lord, that He might work and operate in her heart, who had many times begged desires and breathings in her soul after him.

"She came to receive a dispensation of the gospel about the sixteenth year of her age, and travelled in the work of the ministry, and was concerned to visit Friends in West Jersey, and some parts of East Jersey, and her service she zealously performed, being concerned

for the honor of God, and her labor was acceptable, and well received.

"She afterward returned with her father into Wales; and though she was weak in body in the year 1704 she travelled in North South Wales, about six hundred miles, her service and labor of love were well received, and effectual to many.

"She was sound in doctrine, and the spirit of life attended her declaration, and she a good pattern and example in her conversation amongst those she conversed with; at Monthly Meetings she exhorted Friends faithfully in their testimony against it, and to keep clear of the world's spirit, and fashions thereof.

"After she sickened, she had some meetings in the family where she was, and especially exhorted to beware of an easy state, lukewarm condition; and admonished to watch often upon the Lord, that they might do something in store against a trying time.

"She was sensible her time here was to be long, and declared she was not afraid. Seeing some of her relations weep, said, 'Why weep ye on such an occasion? The day before she departed, she spoke in this manner to her father, mother, and relations about her, 'I love you all, and have a blessing to the family.'

"She had an easy passage, and departed this life the Seventh-day, in the evening being the 26th of the Eleventh month, 17 and on the 28th of the same month, her body was accompanied by relations, friends, and neighbors, to the meeting-house at Treveryg, where there was a good meeting, to the satisfaction and comfort of many then gathered, and after meeting she was buried.

"Aged about twenty-three years; a minister about seven."

Our Forests.—A writer who has been making a study of forest trees, their rapid destruction in this country, and their effect on climate and health says, that since 1835 the forest area of the Western Hemisphere has decreased the yearly average rate of 7,600,000 acres about 11,000 square miles, and that this in the United States alone has advanced 61,600 square miles in 1835 to 7000 in 18 and 8400 in 1876, while the last two years have scarcely been less exhaustive.

Statistics for eighty years previous to 18 show that we have been wasting the supply of moisture to American soil at the average rate of seven per cent. for each quarter of a century during the last 125 years, and that we are now approaching the limit beyond which any further decrease will materially influence the climate of the entire continent. Many Eastern regions, such as Afghanistan, Persia, India and Asia Minor, once possessed of a fine climate and abundant harvests, are now often scourged by pestilence and famine, and it is altogether probable that their misfortunes began with the disappearance of their native forests.

It is quite likely that we shall suffer in mate, fertility and health before a great while if we continue to destroy our trees as recklessly as we have done, and it behooves us to be warned in time. What has happened elsewhere may certainly happen here. Indeed there is greater danger of it, for we know experience that fertile lands have grown sterile by loss of trees, and that sterile lands have in turn become fertile by systematic planti-

tain proportion of well-wooded, as well of arable and pasture lands is essential to material prosperity, and this proportion never be kept up unless regular treeing be adopted as a set-off to the excessive destruction incessantly going on. For years we have been felling the forest; yet next 150 we should try to restore what have taken away.—*Phila. Inquirer.*

is a blessed state, always to live in the ease and feeling of that love which first drew us, wherein our minds were turned to Light, which shined in the darkness; for were then darkness; which Light then manifested and revealed unto us the gift of God given to us, which is compared to a pearl, to a grain of seed, to a pearl hidden in the field. It is precious to know the leaven sown, the seed to grow, the field to be sown, and the pearl found, bought and sowed. This is more than talk and pronouncement.

One can many say, as was witnessed of old, are come unto him, as unto a living stone, and precious, and we are kept by the power of him unto salvation, and we are in whom there is no condemnation; thus bad and witness the scriptures, is beyond the talk and notions that are in the world, which lies in wickedness, where the guilt and damnation is.

As we continually live in the sense and feeling of that precious love which at first sought out, and pulled some of us as brands out of the fire, and others as swine wallowing in the mire, as we remain sensible of this love, we feel our hearts more and more engaged in talk worthy of it; and not only profess, but live under it; not only profess, but walk in it, that we may be perfect in it; for if we live not the life of that we profess, sorer judgments will pursue than many others who are called as we are, have not tasted of the heavenly power as we have. Therefore it concerns us to be careful, and retain our first love; for it is sible, after the house is swept and garned, and the unclean spirits cast forth, that they may return and enter again. Therefore we return, not only to know that seed power that casteth forth the unclean, and sweepeth and garnisheth the house in heavenly treasures; but also to dwell in the same, and by it to be preserved from being defiled again. This is the stance of the Christian religion. This is the end of all mini-stering, speaking and writing.

Let us always remain in the feeling of, obedience to, this power, and we shall never fall.—*William Steeven.*

Some of the Marvels of London.—From the reputations of authorities, it appears that London (with all its suburbs) covers a thin fifteen miles' radius of Charing Cross, being 700 square miles. It numbers within its boundaries over 1,000,000 inhabitants, contains more country-born persons than counties of Devon and Gloucester combined, or 37 per cent. of its entire population. In every four minutes a birth takes place in the metropolis, and every six minutes a death, when the circle already named there are added to the population 205 persons every day, and 75,000 annually. London has 7000 streets, and on an average 28 miles of streets are opened and 9000 new houses

built every year. One thousand vessels and nine thousand sailors are in its port every day.

Its crime is also in proportion to its extent. Seventy-three thousand persons are annually taken into custody by the police, and more than one-third of all the crime in the country is committed within its borders. Thirty-eight thousand persons are annually committed for drunkenness by its magistrates. The metropolis comprises considerably upward of 100,000 foreigners from every quarter of the globe. It contains more Roman Catholics than Rome itself, more Jews than the whole of Palestine, more Irish than Belfast, more Scotchmen than Aberdeen, and more Welshmen than Cardiff. Its beer shops and gin palaces are so numerous that their frontages, if placed side by side, would stretch from Charing Cross to Chichester, a distance of sixty-two miles. If all the dwellings in London could thus have their frontages placed side by side they would extend beyond the city of York.

London has sufficient paupers to occupy every house in Brighton. The society which advocates the cessation of Sunday labor will be astonished to learn that sixty miles of shops are open every Sunday. With regard to churches and chapels, the bishop of London, examined before a committee of the House of Lords in the year 1840, said: "If you proceed a mile or two eastward of St. Paul's you will find yourself in the midst of a population the most wretched and destitute of mankind, consisting of artificers, laborers, beggars and thieves, to the amount of 300,000, or 400,000 souls. Throughout this entire quarter there is not more than one church for every 10,000 inhabitants; and in two districts there is but one church for 45,000 souls." In 1839, Lord John Russell stated, in Parliament, that London, with thirty-four parishes and a population of 1,170,000, had church accommodations for only 101,900. These and other statistics furnished led to the "Metropolis Churches Fund," established in 1836, which has been followed by the 15-hop of London's Fund. It is still computed, however, that at least 1000 new churches and chapels are required in the metropolis.—*Late Paper.*

The fields are white unto harvest; but how few are the rightly qualified and faithful laborers! Many there are, particularly among the poor and lowly of this world, who are asking the way to Zion, and whose hearts God hath opened in some measure to receive and embrace that seed or germ of Divine life which He hath caused to be sown there; but alas! how often is its growth hindered by its unfavorable surroundings. May we, who have (through no merit of our own) been made bountifully to partake of many spiritual blessings, not become forgetful or ungrateful receivers of them, but as good and faithful stewards, be willing to occupy with *all diligence* that which hath been so abundantly bestowed upon us, in whatever way He may appoint; that the cause of Him, the great bestower thereof, may be said in very truth to prosper in our hands.

Unless thou knowest a dying to the world, and a being crucified with Christ, thou canst not have a well grounded hope of everlasting happiness.—*Wm. Penn.*

The experiment in the manufacturing city of Eberfeld near Cologne is instructive. In 1853, one in twelve of its inhabitants was helped from the poor fund. Then visitors were appointed from the best families in the city to visit all these beneficiaries once in two weeks, distribute this aid, and seek to prevent future pauperism. No visitor was assigned more than four families. At or twenty years beheld the result. In 1873 only one in eighty required help—nearly seven-eighths of the growing pauperism wiped out.

A self-chosen ministry is without power, and brings neither fruit nor glory to our Lord.

THE FRIEND.

THIRD MONTH 15, 1879.

In the 27th number of the present volume, there are some editorial remarks called forth by the reception of a letter from a subscriber declining to take "The Friend" longer, on account of the doctrines inculcated in it. We have received another letter from the same person, in which he puts two queries to us, to which he desires direct answers. While averse to occupying our columns with personal matters, we are willing to meet our friend's request, on the present occasion, and hope he may thus be satisfied in relation to the two important points queried after.

First Query. "Take a person that has lived to self, and not yielded to any Christian influence; he has become convinced of sin, either by the preached word being sent home to him by the Holy Spirit, or by the convicting power of the Spirit: he is under deep conviction. What would thee tell him to do? How would thee tell him he could get rid of his burden of sin, and be a saved man, or be saved?"

Answer. The conviction for sin, and sense of his lost condition, is the first effect produced by the Grace of God, which bringeth salvation. We would therefore tell him, to give diligent heed to its further manifestations to his soul: to let it open his sins before hand and bring them to judgment, so that he might receive the gift of true repentance, and living faith in Him whom he had pierced, as the Lamb of God that taketh away the sin of the world, and thus know his sins to be forgiven for the sake of that most acceptable sacrifice which He made on Calvary. We would point him to the declaration, that if he thus walked in the Light, as God is in the Light, he would come to have fellowship with His true born children, and know the blood of Jesus Christ His Son to cleanse him from all sin, and to forever perfect them who are sanctified. We would endeavor to impress upon him, that it was only by this Holy Spirit that he could say Jesus is the Lord, and that it is He alone that can take of the things of Christ, even those recorded in the Holy Scriptures, and apply them availingly to his soul.

Second Query. "Our Saviour tells us, Except we eat the flesh of the Son of Man and drink his blood, we have no life in us; and he that eateth his flesh and drinketh his blood hath everlasting life: now it would seem all depends on that. What is it to eat his flesh and drink his blood?"

Answer. In speaking on this subject we feel that we are treading on holy ground, and

in offering our views, we desire to do it in becoming diffidence and reverential awe. It is a Divine mystery far beyond the grasp of man's natural intellectual powers, and can be measurably comprehended only as the mind is enlightened and instructed by the Spirit of Christ.

To correct the impression his words had made on his carnally-minded hearers, that He meant the outward body in which He was moving among them, Christ told his disciples, his words were Spirit and life: that it is the Spirit that quickeneth, the flesh profiteth nothing. "I am the living bread which came down from heaven." This could not be said of the body born of the virgin Mary, by the offering of which He opened the door of reconciliation for lost man, and made the propitiatory sacrifice for the sins of the whole world. As the bread of life, He had been fed spiritually by all in every generation of the world who had obtained eternal life. Every one saved since the fall of Adam, must have been in Christ—must have fed upon Him: every branch in Him, before and after his outward coming, must have been grafted into Him and drawn all its life and sustenance from Him, and being in Him and He in them,—the source of their spiritual life,—they reize the fulfillment of his declaration, "He that eateth my flesh and drinketh my blood, dwelleth in me and I in him;" and so "He that eateth me, even he shall live by me." This is true, whether they have ever heard of Christ's coming in the flesh or not.

The apostle, speaking of the Israelitish Church, says, They "did all eat the same spiritual meat, and did all drink the same spiritual drink: for they drank of that spiritual Rock that followed them, and that Rock was Christ." "Behold I stand at the door and knock, if any man hear my voice and open the door, I will come in to him and will sup with him and be with me." This is the true supper of the Lord, partaken of by those whose spiritual life is maintained by the bread from heaven, figuratively described as eating the flesh and drinking the blood of the Son of man. Blessed is he to whom it is given to partake of the "hidden manna," by which alone the soul can be nourished up unto eternal life: he will receive "the white stone, and in the stone a new name written, which no man knoweth, saving he that receiveth it."

SUMMARY OF EVENTS.

UNITED STATES.—The Forty-fifth Congress closed at noon on the 4th inst., leaving the Legislative and Army appropriation bills unpassed. The President has therefore issued a proclamation calling an extra session, to meet on the 18th inst.

The total number of bills and joint resolutions introduced at the session just closed, was 8761, of which 1936 were introduced in the Senate, and 6826 in the House. The principal measures which became laws, in addition to ten general appropriation bills, were the Internal Revenue, Census, Payment of Pension Arrears, and National Health bills, and the bill for the issue of certificates in aid of refunding the national debt.

The commissioners of the city sinking fund, in their annual report, give a decrease in the city funded debt, during 1878, of \$928,990, the first decrease since consolidation in 1854. The debt on 1st mo. 1st, 1879, was \$61,092,641. Of this debt, there is held in the sinking fund \$15,499,870, whilst the bill for the issue of certificates in aid of refunding the national debt with the report, give the funded and floating debt of the city at \$71,835,101, and the assets at \$22,203,455.

The official statement from the United States Treasury Department, makes the balance of trade in our favor for the last calendar year \$207,689,063.

The total number of immigrants who arrived in the

United States during last year, was 153,297, against 130,563 for the preceding year. Of the 3,772,707 who have arrived since 1875, the greatest number, nearly half or 1,521,556 was New York city and State; Pennsylvania, 387,603; Illinois, 234,803; Ohio, 193,507; Massachusetts, 174,296; New Jersey, 118,563; Michigan, 105,222; Connecticut, 68,726; Iowa, 81,955; Missouri, 69,369; Indiana, 47,687; Rhode Island, 35,890; California, 31,863; Minnesota, 67,240, and Utah 38,792. The territories, Alaska and the Territories took for the Southern States attracting a far smaller number than the northern.

Heavy rains and serious floods are reported in the interior of California. The North Pacific Coast Railroad has been washed out in several places, and many bridges swept away. Los Angeles was deluged by the having of a reservoir containing 100,000,000 gallons of water; but owing to the distance of the reservoir from the town, the damage was chiefly confined to the filling of streets and cellars. At Summit Station, in the Sierra Nevada, on the 9th the snow was sixteen feet deep and still falling.

The annual report of the Health Officer of Philadelphia, gives the general sanitary condition of the city during the past year has been good. The total number of deaths being 15,743—261 less than previous year. Estimating our population at the middle of the year to be 876,118, the death ratio is 17.97 per thousand living persons, or one death in every 55.65 of the population—a lower ratio than for many years. There were 6,247 marriages, 18,345 births.

The vessel, the "lost and found," has been 311.

Eliza Burri, the "learned blacksmith," died in New Britain, Connecticut, on the 6th inst.

It is stated there is considerable exportation of silver quietly going to Europe. Last week of nearly 500,000 specie exported from New York, all but about 88,000 were American silver bars, and Mexican dollars. The remainder went to England, and the great exception of \$5,000,000 to Havana. The movement of silver to the United States from Europe seems to have stopped since the Federal Treasury ceased making its silver purchases there, and began buying in the United States.

On the 10th inst. the Treasury Department paid to Captain Cook \$750,000, the sum given to him in the sundry civil bill on account of his improvement of the South Pass of the Mississippi.

Markets.—The quotations on the 8th for Government bonds were, for 6's of 1881, 106½; 5's, 104½; 4's, registered, 105½; do. coupon, 105½; 7's, registered, 99½; coupon, 100½; 5-20's, 186½, 102½; do 1868, 102½.

Wool.—Sales at 9½ a 10½ per lb. for uplands and New Orleans.

Petroleum.—Crude 8 cts. in barrels, and standard white, 9 cts. for export, and 11 a 12 cts. per gallon for home use.

Floor was in fair demand, and prices steady. Penna. extra family at \$4.50 a \$4.75, and choice 35's; Minnesota choice, \$5 a \$5.25; Ohio fancy, \$5.20 a \$5.25; patent, \$5.25.

Grain.—Wheat was in demand—red, \$1.14 a \$1.15; amber, \$1.15 a \$1.16; white, \$1.16 a \$1.17 per bushel. Rye, 54 a 57 cts. Corn, 43 a 44 cts. Oats, mixed, 29 a 30 cts.; choice white, 32 a 33 cts.

Hay and Straw.—Prime timothy, 60 a 70 cts. per 100 pounds; mixed, 45 a 55 cts.; straw, 65 a 75 cts. per 100 pounds.

Cattle market was dull, and prices rather low; 3500 head arrived and sold at 31 a 6 cts., as to quality. Sheep, 4 a 5½ cts. per lb. Hogs, 6 a 7 cts. as to condition.

FOREIGN.—The exports of Great Britain to all other countries during the first month, 1879, were valued at \$2,108,281, in the first month of 1878, \$2,423,911.

The total imports during the same periods were \$26,367,046; \$20,609,556.

A motion in favor of female suffrage has been rejected in the House of Commons by a vote of 217 to 103.

The first consignment of cattle, subject to the new regulations, arrived at Liverpool on the 7th inst., 201 head, and were landed by the special barge, leased by the Privy Council at Birkenhead. Every animal was apparently sound and healthy, and it is anticipated will find a ready market in London and Liverpool, as dead meat, within the ten days allowed for slaughter.

A telegram from the Viceroy of India states, the Lieutenant Governor has recently visited a great part of the Punjab. He reports there is no present apprehension of famine. The present situation of the autumn harvest is fair. Winter rains were very scanty and spring crop prospects are thereby affected.

In Cashmere, where death is expected, the Government have arranged to send four thousand tons of grain.

Security will probably be felt in Agra and adjacent districts.

France.—In the Chamber of Deputies, a report submitted on the 8th, setting forth the charges against the De Broglie Cabinet, and contained a resolution favoring their impeachment before the Senate, motion of the Minister of Justice, the debate on it port was postponed till the 13th inst.

In view of the alarming increase of small pox, by the means of the infected persons of the Sanitation Federal Council have appointed a commission to enquire on measures of prevention.

Advices from Berlin on the 7th, state the Prussian Discipline Bill was rejected in the Reichstag.

A Vienna dispatch to the Standard says, the Russian Government has discovered a plot for forcibly liberating the Transcaucasus, and that it has proofs of revolutionary designs of the conspirators.

The U. S. Consul General at Cairo furnishes an interesting article on the Suez Canal; the facts of war are stated to be from authentic sources. The cost of the canal was \$72,921,799 francs, or \$92,273,500 francs each. These shares have sold as low as 2 francs. They are now quoted at 7½ francs, and probably worth more. In 1875 the British Government bought 176,992 shares at about 568 francs. The great purchase, aside from its political and commercial advantages, thus yields a profit of 25,000,000 francs. The balance of stock is largely held in France.

The revenues of the canal have increased from 5,000 francs in 1859 to 100,000,000 francs in 1878. The expenses have been a little over 17,000,000 francs. While the revenues steadily increase, the expenses are decreasing or stationary. The cost of carrying the canal is about 2,000,000 francs per annum. A small comparative cost of maintaining the canal is from the fact that there are no locks or lateral embankments to be broken up, as is the case with the Suez, or less, pass through the canal. The saving of this to British ships going to India, is nearly 5,000,000 francs. Two-thirds of all the vessels passing through the canal carry the English flag. F. Lesseps, who has been the head of the enterprise since its beginning in 1859, expressed the opinion that the Panama canal must be constructed without locks to be successful or remunerative.

Recent advices from Japan report the total wreck of the steamer Queen, between Shanghai and Nagasaki on the 29th of 1st month. The captain and twenty of the crew were drowned. Foreign trade in Yokohama was temporarily paralyzed at the beginning last month, owing to the scarcity of Mexican gold, which had been spent by the Japanese. The market held at a premium, the native merchants decline transactions in which they would serve as a medium. Great preparations were making for the receipt of the General Grant. The Japanese express much satisfaction with the nullifying clause in the treaty with the United States.

Chinese prices report the ill-feeling against Russia was increasing in Government circles. In official circles the result of the negotiations at Washington eagerly awaited, especially in the southern provinces where emigration is most numerous.

TRACT ASSOCIATION OF FRIENDS.

The annual meeting will be held on Thursday evening, the 26th instant, at 8 o'clock. Friends are invited to attend.

E. MARIS,
31st month, 1879. (Clerk)

ANNUAL MEETING OF THE CONTRIBUTORS TO THE ASYLUM.

A stated Annual Meeting of the "Contributors to the Asylum for the Relief of Persons Deprived of their Reason," will be held on Thursday, 19th of Third month, 1879, at 3 o'clock, P. M., at 22 Street Meeting-house, Philadelphia.

Thoughts and Feelings.

THE HOUR AND BED OF DEATH.

The Psalmist's words are very appropriate in his short lived existence or little span on earth: "Make me to know mine end, and the end of my days, *what it is*; that I may w know frail I am." "Behold thou hast led me my days as an hand-breadth, and mine end is as nothing before thee: verily every one at his best state is *altogether vanity*," said a serious writer has well expressed: there is no happy death but that which conducts to a happy immortality—no joy in turning off the body, if we have not put on Lord Jesus Christ—no consolation in escaping from the miseries of time, till we have attained a well-grounded hope of a blessed eternity." One thing is certain, that as death enters, judgment will find us; for "There is work, nor device, nor knowledge, nor wisdom in the grave," &c. Again, the solemn language of the angel in the Revelations was: "I will come quickly; and my reward is with me, to give every man according as his work shall be." And, "He that is unjust let him be unjust still," &c.

That "the carnal mind is enmity against God," is a truth of Holy Scripture which would come closely home to us in this frail and uncertain state of existence; and should tempt to earnest watchful solicitude to be preserved, through obedience to the all sufficient grace of God, from the power of darkness, and be translated into the kingdom of our dear Son. This "carnal mind" with ourself besetting sins, like the native product of the soil, are very congenial to the dark, unenlightened, and wicked heart. While one of its lovable effects upon us, a strange infatuation and servile bondage, which, like the hallucination of the maniac, causes us to be blind to our true condition, and to hug more closely chains that bind us, even when, through the illumination of the Day-spring from on high, light is vouchsafed and seasons of relief and release presented. Oh! what an unexpecting anxious period for us is that, when, through the visitations of Heavenly love and anointing eye-salve of the kingdom, we are enabled to see our fallen and truly lost state without a Saviour's blood and a Saviour's grace; and thence

Sick of the service of a world that feeds its patient drudges with dry chaff and weeds, We seek to escape from custom's idiot way, To serve the Sovereign we were born to obey."

Happy indeed are we when, through illuminations of the Spirit of Christ, the washing of regeneration and the renewing of the Holy Ghost, our ever tender and merciful Father fulfils in the experience of the penitent, the humble, and the contrite. His ancient promise, viz: "A new heart will I give you, and a new spirit will I put within you; and I will take away the stony heart out of your flesh, * * * And I will put my Spirit within you, and cause you to walk in my statutes, and ye shall keep my judgments, and do them." To which may be added from the same chapter of the prophet: "Then shall ye remember your own evil ways, and your doings that were not good, and shall loathe yourselves in your own sight, for your iniquities, and for your abominations."

We are assured that one of the first lessons in the school of Christ, after the inward eye has been opened, is, the bathing sense of our wicked hearts, our lost and deplorable condition, our foolishness, waywardness, and nothingness, manifested to us through the operation of the light of Christ with the spirit of judgment and of burning upon the transgressing nature. It is such a humiliating spiritual experience, that prepares to say with the Patriarch of old in the submission of himself to God:—"I know that thou canst do every thing, and that no thought can be withholden from thee." "I have heard of thee by the hearing of the ear: but now mine eye seeth thee. Wherefore I abhor myself, and repent in dust and ashes." And again, to the awakened penitent: "Thou shalt be confounded, and never open thy mouth any more because of thy shame, when I am pacified toward thee for all that thou hast done, saith the Lord God."

Obedience to the universal and saving Light of Christ in the heart, which shows us our sins, and brings into godly sorrow on account of them, is the precious and only medium of our deliverance from the snare of the cruel fowler; and, while humbling and sorely distressing it, at the same time perhaps, one of the first hopeful symptoms of the sinner's reformation and availing cure. "Zion shall be redeemed with judgment, and her converts with righteousness." Again, "Every battle of the warrior is with confused noise, and garments rolled in blood; but this (the baptism and redemption of the soul), shall be with burning and fuel of fire." And no matter how hot the purifying furnace be made for us, nor how severe the trial of our faith, patience, and allegiance, He to whom all things are open and known, and without whose notice not a sparrow can fall, will not allow, in the consuming away of the brass and tin—the careless life without godly repentance and amendment, and therefore without practical piety or the changed heart—the least portion of the pure gold to be destroyed or injured. What is needed is a giving up of ourselves wholly to His all wise government and direc-

tion, who is the Alpha and Omega of souls; who seeth the end from the beginning; and who, waiting to be gracious, can crown the returning repentant prodigal with everlasting mercies.

Whatever be the state of the case with us; whether we are among the number of those who have endeavored in humility, sincerity, and contrition of soul to love and obey the Lord, and to serve their generation according to His blessed will; whether they have helped to fill the ranks of the mere professor, or those who with some hopeful desires after the Truth, have nevertheless allowed the good seed of the kingdom in them to be too much choked by the cares, the riches, or the pleasures of a deceitful world to bring forth fruit to the praise of the Heavenly Husbandman; or whether we must be classed with the wholly impatient and wicked, the language of whose conduct, if not lips, has been with unfaithful stewards before, "We will not have this man to reign over us," an account of our respective stewardships must soon be rendered to an omniscient, a just, and all-wise Judge, whose award will be alike equitable and final. "The days of our years," saith the Psalmist, "are threescore years and ten; and if by reason of strength they be fourscore years, yet is their strength labor and sorrow; for it is soon cut off and we fly away." Yea, "The grasshopper shall be a burden," "the silver cord" must "be loosed" and "the golden bowl be broken;" because, "the dust shall return to the earth as it was; and the spirit unto God who gave it."

At the hour and bed of death, at our final separation and farewell from all we have known, and loved, and cherished here, how sweetly consoling to the Christian must be the reflection that he has endeavored, through Holy Help, to give up his heart and affections to the government of the Prince of Peace, in days of health and strength, as well as those of precious visitation; and that, though in much humility of mind and a profound sense of great unworthiness, he nevertheless feels the sustaining grace of God in his soul, alike to bear up over the waves of Jordan, and to give the victory over sin and death. On the other hand, how stung with sorrow, anguish and remorse must be the feelings of those who, from not giving themselves to the Saviour of sinners, have thence not been enlightened by Him to see the deep depravity, the desperate wickedness of the fallen unrepented heart; who had not obeyed the mandate, "If any man thirst, let him come unto Me and drink; have not experienced "the love of Christ which passeth knowledge;" and hence are not experimental witnesses of that repentance unto salvation, without which none can be saved.

Well, time and opportunity, with all-availing grace and help are yet mercifully held out to us. The Holy Spirit is authoritatively promised to those who, with the *whole heart* seek it. And, as has been said, it may be that

"The sect of the seekers is next best to that of the finders." Oh! then, may there be a diligent interceding, wrestling and begging for help from on high; remembering what is promised, even to be "Strengthened with might by Christ's Spirit in the inner man" unto becoming "a habitation of God through the Spirit." Then may there be a being "baptized with the Spirit." "A praying always with all prayer and supplication in the Spirit." A being "filled with the Spirit." And as the apostle no less enjoins: "Quench not," nor "grieve not the Spirit." But "be born of the Spirit." "Be led by the Spirit." "Walk in the Spirit,"—"A manifestation of which is given to every man to profit withal." Hereby we shall be preserved from fulfilling the lusts of the flesh. Be enabled to work out our soul's salvation with fear and trembling. Be strengthened to perfect holiness, without which none shall see the Lord. Be helped to repent, so that our sins shall go beforehand to judgment. By this be converted and brought to the state of little children. By this be born again, without which we cannot see the kingdom of God. In a word, it is the Holy Spirit of Christ Jesus that "searcheth all things;" which "leadeth into all truth" without which, "No man can call Jesus Lord;" neither know the things of God. For "the natural man receiveth not the things of the Spirit of God: for they are foolishness unto him; neither can he know them, because they are spiritually discerned."

How imperatively rests the obligation, that while time and access to the throne of grace and mercy are lengthened out, we diligently see to it whether our lamps are trimmed, and that we have saving oil with them! Not the lamp of outward profession only of Christ, but whether the inward oil—the spiritual life and anointing—has become dimmed or is gone out! Time, as with a "dove's wing" it rapidly steals away, is of inestimable value to us. Not given to waste in sloth, to be consumed on amusements, or lost amid the absorbing cares of life. But remembering our accountability, the inestimable price paid for us, with the solemnities of the dying hour, we should

"Pay
No moment but in purchase of its worth;
And what its worth, ask death-beds; they can tell!"

It has been truthfully said, "Every argument against an irreligious death is equally cogent against an irreligious life." The hour and bed of death, unless precipitated by a hasty stroke, most surely awaits all the living. Death's mighty mysterious river must be passed. That which must come may come soon. Conditional are heaven's covenants. We have no lease-hold upon life. May we be wise in time. Who thinks himself secure is perhaps in greatest danger. It was a good man's declaration from the bed of death: "Oh! this soul is an awful thing; I feel it so; you that hear me mind it is an awful thing to die; the invisible world, how awful!" Especially is it awful to meet great changes unprepared. Death, judgment, and a never-ending eternity are awful realities. May we seek the Lord while He may be found. May we live now, as we shall wish we had when we come to die. To all, that period fast maketh haste. For

"They who the longest lease enjoy
Have told us with a sigh,
That to be born seems little more
Than to begin to die."

The Ingrateful Old Woman.

For "The Friend."

Some time since I listened with interest to a friend describing a visit she had recently paid, and the reception she met with. About a mile from her home, resided a colored family, living in a humble dwelling on a small piece of land. The father of the family was advanced in years, and nearly blind; so that he could do but little to supply their wants; and if it had not been for the help extended by their neighbors, they would have found it difficult to procure the necessaries and comforts of life.

In the present instance our friend had felt her mind drawn towards the family, fearing they might be in want; and filling a basket with provisions, till the load was as heavy as she could comfortably carry, she set out on foot, and trudged along the muddy roads to the home of the old people. No doubt she was encouraged and animated by the thought that she was on an errand of mercy, and that the gift she was carrying would add to the comforts of her fellow-creatures, equally precious with herself in the sight of our common Father. On arriving at her destination, she was received in a very ungracious manner by the mistress of the dwelling. It appeared that she had been irritated by some advice given to her on a previous occasion by one who wished to befriend the family; and she poured out her ill-humor on her present visitor. She would receive the present then brought, but told the donor that she must never come inside of her house again; with other ill-mannered and angry speeches.

As I listened to the graphic, though good-natured recital of her experience, which the aggrieved visitor gave me, the thought arose, that I was not myself clear of showing a similar ingratitude; and that many of my acquaintance, if they would closely look at their own conduct, would be compelled to plead guilty to such a charge. Our Heavenly Father, who is spoken of in the Scriptures as the Author of every good and perfect gift, showers down upon us unnumbered blessings. Not only does He bestow upon us life, and health and outward comforts, but He has given us noble intellectual faculties, by which we may in large measure know and appreciate the countless wonders of His visible creation, and can comprehend those connections and sequences which we recognize as the laws by which He governs the physical universe. He has also sweetened our existence by implanting in us the social and moral affections, which add so largely to our happiness, and form the great charm of the domestic circle. But above and beyond all this, He has placed before us an eternity of unspeakable happiness, which we may all attain; and has given us his own Holy Spirit, to lead the willing and obedient disciple into this promised land.

In return for all these inestimable blessings, He requires our love and obedience; and surely every consideration of gratitude as well as of interest, should impel us freely to yield them. But alas, what rebellious, ungrateful children we are; sometimes wilfully disobeying His commands; receiving His favors, but not willing to open our hearts to Him; at others, through carelessness and negligence, forfeiting the sense of His favor, and the precious peace which flows from it, and settling down into a state of coldness and indifference!

As these reflections arose in the mind, I little disposition severely to censure the natured old colored woman; but, in a consciousness of partaking in measure of the wrong spirit, was reminded of the declaration of our Saviour, "He that is without amongst you, let him first cast a stone."

Selected

Testimonies to the Way to Salvation.
RIGHTEOUSNESS OF CHRIST—HOW IMPUTED.
"That righteousness which God accepts, but one, which is His own; perfectly fulfilled and manifest in the world in Christ Jesus, our Light and Saviour thereof; which righteousness is not of the world, nor manifest in the world, nor in the world received, but by the world ever judged as unrighteousness; and can the world inherit it, but only they who believe in the Light of Christ, which God has given into the world to lead out of the world to Christ, where God's righteousness is; there are many talkers of this righteousness, but none inherit it further than by faith, to receive the Son of righteousness, and with Him, his righteousness is freely imputed *put into* the creature, a free gift from the Father; and with this righteousness the creature made righteous, even as He is righteous, even as the measure of Christ is received and no further. * * *

"This righteousness is wrought into the creature, in that obedience which is contrary to the will of the flesh; and in the faith of the eternal Spirit is the new begotten birth of the will and the deed; and so the new born of the spirit and life. And so far as we have this righteousness he doth not lie under sin, nor give place to the devil. * * *

"To cover your wickedness, pride and covetousness, have your teachers invented this faith. That it is sufficient to believe in a righteousness you read of in the letter though you not obedient to it in spirit." But you that are not servants of righteousness are not servants of Christ and His works; and your faith without His works, will be little worth to salvation; and even as it saves you out of sin, will it save you out of condemnation, and further. And this, that your conscience witness, if you take counsel at it, No further than you find the power of His righteousness working in you, and you owning it in obedience and subjection, and joining to it again, all unrighteousness, no more of it you can inherit, nor be made the righteousness of God in Him."—*Jas. Naylor's "Love to the Lost."*

Hope.—This is the living hope, which hopes to the end; That Christ and His righteousness may be revealed to take away sin and save from it, and out of it; and in hope of this the children and babes of Christ wait in the obedience of the Spirit, not fashioning themselves after the lusts of ignorance; but as He who hath called to that hope is holy so in His holiness is their conversation, who are in His hope.

"But the devil hath begotten another hope as like this as may be, in his servants, who believe him and are acted by his spirit; who stands in another ground, and brings forth another fruit. And that is, That though the servants to sin * * * yet there are hope of salvation; and such hopes as may not be judged false, nor questioned, although the witness of God in the conscience doth testify to the contrary, yet it must not be heeded lest they be deluded. So that where he is b

no teacher, a tender conscience is to be re-
deemed as the greatest error and foolery in the
old; and that, to wait for the testimony or
ness within, is to deny Christ at Jeru-
salem, and the greatest blasphemy that can
be spoken of; and, to wait for that mystery
which hath been hid from ages, (to wit) Christ
in the hope of Glory, is to deny the per-
form of Christ, and His blood and sufferings.
I many such imaginations hath he begot
people's brains, to scare them from mind-
the Light within, that so he may keep
heart in darkness and his seat there un-
covered.

So he sets them to look for the kingdom
Christ without them, and a spirit without,
a light without, and a word without, and
a meekness without, and in that to hope;
he dwells in the heart, and there in
kness, upholds his kingdom of sin, and
of unrighteousness, all their life. * *

That is the devil's hope, which hopes not
redemption from sin as much as freedom from
sin.—*J. Naylor's "Love to the Lost."*

The Light is come, and therein have we
and Christ Jesus, the guide of His people,
the leader of ages, even the Spirit of
truth, which leads into all truth, even into all
that God requires; the obedience to which is
ter than sacrifice. And to direct people
this Spirit are we sent; that Christ may be
in all, who gives power in the creature to
reform in what He leads into; that thereby
who believe in the Light may learn Him
o begets the will and the deed also, who is
a author and finisher of their faith who
k to Him alone and to His Light, that that
see their righteousness to be of Him
ne.—*Id.*

Redemption.—"This is that which many
rest on and glory in, who never knew what
is to be redeemed further than in words,
and imagination thereof. * * There is a seed
which the promise of redemption is; but
who takes delight in sin and pleasures
art not he. Thou that can't take pleasure
the flesh and fashion thyself thereto, art
of other seed; who art at liberty in the world
conform thyself thereto, in thy own will
day and time, who hast power in thy
ind to do what thou list, and when thou list,
as thou list; Thou needs no redemption
art at liberty, nor physician who art not
k; and so a talk of redemption little changes
y condition in that state, who art of this
world, and obtains that thou loves, and there-
takes pleasure; building a seat, and bless-
g thyself therein, laying up thy treasure
re below; He that redeems Israel is no glad-
dings to thee, who speaks woe to all in that
ate. But if thou find something in thee,
at, in all these worldly delights, cries vanity
d emptiness, and can find no satisfaction
erein, nor can conform to this world, nor
ke pleasure in wickedness, that cannot plead
sin, but cries woe to thee because of thy
ickedness, and mourns because of the abom-
inations of thy times, wherein thou hast fol-
lowed the world's customs and foolish fashions;
thou find that in thee that cannot take de-
light in decking the outside with pride, nor
worship the creature, nor bow to any but God
one, but condemns thee if thou so do; If
ou find that which breathes in thee towards
od for life and strength against all these
unities, and all other evils; that which would
flow God out of all the world, if it had
ower; I say, if such a seed thou find in thee,

though it be the best of all seeds in thee, yet
that is the Seed of the Kingdom, to which
the promise is; and no further than that prin-
ciple is raised to reign in thee above all that
is contrary to it; no further art thou redeemed
by Christ Jesus; for that is the plant of God's
renown, the Lily among the thorns, which,
with the cares of this world, and the deceit-
fulness of riches and pleasures, is choked, that
it cannot bring forth to God, who hath placed
it in thee for Himself, that therein He might
teach thee to profit, and from thence thou
might receive wisdom and strength, yea, all
that is needful for thee in thy measure to
which thou art called.—*Id.*

Christ Jesus "—is the eternal Word, before
all time, glorified in the heavens with the
Father, who in time was manifest, which
Word became flesh and dwelt among us, and
took upon Him the form of a servant, and
was made in the likeness of men; and being
found in fashion as a man, He humbled Him-
self and became obedient to the death, that
He might become a living example to all
generations, which no creature could be,
the whole creation being in the fall, and having
finished the work of redemption given Him
of the Father to do, and for which He was
begotten. He ascended far above all heavens,
to prepare a place for all that follow Him
by faith in his light; and that from thence
all such as wait for Him may see his appearance
as a Saviour; and only such know Him for
their Redeemer, who know Him for their
Judge and Lawgiver, who love Him and keep
his commands; to such He comes, and the
Father also, and make their abode with him."
—*Id.*

Tobacco and the Diseases it Produces.

Dr. Drysdale, writing to the *Times*, says:—
The enormous consumption of tobacco in
all European States makes it, in my opinion,
very important to examine whether it, in any
form, is sanctioned by medical experience.
In the forms of the raw and the manufactured
article we probably pay some £15,000,000 a
year in this country for tobacco.—*i. e.*, the male
population does. In Holland more money is
said to be spent on tobacco than on bread.

In my opinion, all this consumption is far
worse than waste; it is a real vice; *i. e.*, a
practice deleterious to health and vitality
has, in little more than three centuries, in-
vaded the whole of civilization. The alkalis
contained in tobacco, whether chewed,
snuffed, or smoked, are extremely poisonous.
Chewers absorb a small quantity of an alkali-
nicotine, so poisonous that the amount
of it contained in the infusion of one cigar
would suffice to kill two men; and smokers
absorb in the saliva and by the mucous mem-
branes of the mouth small quantities of a
variety of poisonous alkalies not much less
fatal to life than nicotine. The smoker or
chewer who uses tobacco for the first time
exhibits symptoms of acute poisoning in the
form of nausea, vomiting, vertigo and pro-
stration, which have been known in some re-
corded cases to produce death. Custom makes
the system tolerate the poison just as it tol-
erates opium or arsenic. Smoking accelerates
the pulse from the paralyzing effect of nicot-
ine on the nerves, which affect the calibre of
the small arteries. It will raise the pulse
from 74 to 112 beats per minute, and accelerate
the number of respirations. Dr. Blatin gave
small doses of opium to dogs in their food

daily; and this caused the poor animals to
lose appetite, to have diarrhæa, swelling of
the gums, and loosening of the teeth, which
was followed by palsy of the hind legs,
blindness, deafness, and death from asthma.
Smokers and chewers of tobacco, in my ex-
perience, have many of such symptoms. They
are subject to most annoying palpitations of
the heart, to hoarseness, to blackening of the
teeth and swelling of the gums, to weakness
of sight, going on to blindness (*amblyopia*),
and to various forms of dyspepsia, with or
without diarrhæa. I have seen several well-
marked cases of nicotinic blindness in young
men, under 30, who have chewed; for chew-
ing is, of course, as it respects nicotine, the
blood, much more rapidly poisonous than
smoking; but the long-continued smoking of
tobacco, or above all, of Cavendish tobacco,
in quantities of from half an ounce to an ounce
daily, very frequently causes blindness in
men of 40. The irritation of tobacco on the
tongue, and of pipes on the lips, causes a form
of cancer. There are many diseases noticed
among the factory workers in the Royal
Factory near Vienna. Dr. Kostral observed
a certain number of deaths among the boys
and girls in that establishment which were
due to nicotism. Of 109 boys from 12 to 16
years, 72 fell sick in the first six months of
their stay in the factory. The infants of the
factory women were frequently poisoned by
the nicotine in their mothers' milk.

For "The Friend."

A few days ago, while taking a walk by a
large well-filled farmer's barn, my attention
was arrested by a flock of from one to two
hundred tame pigeons belonging to the owner
of the barn: rising in a circle and then set-
tling down again so quietly that the sound of
their wings was scarcely heard. An observer
could but notice and admire the enjoyment of
these gentle birds, as they appeared to appre-
ciate the warm sunshine, after many a cold,
dark day. Pausing more than once to gaze
at them, I felt it were a pity to kill one even
for an invalid. Only a few days after, a crowd
of men were seen going across large fields to
a wood of tall trees. There was to be a shoot-
ing match. For a few pennies each, the sports-
men had the chance of sending the deadly
shot to kill or maim the birds, as one by one
they were let out of the hand. Many were
only wounded.

That evening one of the pigeons rested
upon our porch, but moved away so that it
could not be seen. The next evening four
more disabled ones came: holding up their
heads with dove-like innocence, yet shrinking
as far as possible to evade the grasp of man.
On the same day, at another place, four more
had rested on their weary way. Others were
found past further suffering.

"Taught by the Power that pities me,
I learn to pity them."

The cruel men have had their sport: the
birds their sufferings; the pangs of the latter
are over, but the former may at a future time
have their's mingled with shame and remorse.

We read that the angel of the Lord sharply
reproved the man that smote his beast that
was apparently stubborn, and would not go
forward. Surely the voice of the reprover
will sooner or later be heard by the cruel
sportsman.

Chester Co., Pa., 2d mo. 18th.

It is written in the Holy Scriptures, "that the kingdom of heaven stands not in meats and drinks, and outward washings; but in the power and joy of the Holy Spirit." The bare profession and knowledge of the powers is little worth, but a being preserved by it; for if any enter into evil and temptation, such grievance the Holy Spirit, so cannot have the joy of it, wherein the kingdom stands.

It is written in the Holy Scriptures of truth, that Jesus Christ, the second Adam, when he was tempted by the devil with sore and grievous temptations, eat nothing; but by the power of his Father, that dwelt in him, withstood the devil and all his temptations; and when he departed from him, angels ministered unto him. This same power which preserveth in temptations, and keepeth from eating or receiving the bait of the enemy or tempter, we are all to witness in the time of trial, and hour of temptation. It was the first Adam that eat when he was tempted; now his eating implies a taking or letting in something, a giving place to the devil's bait, whereby the temptation entered. He did not stand in the power wherein the heavenly kingdom stands, which is able to preserve, as did the second Adam; so departing from this, he lost the joy of the Holy Spirit, which the kingdom stands in; as all the children of the first Adam do, who have not faith in that power that saveth out of temptation.

This is the substance of the Christian religion, which we are called to the profession and possession of, viz: the power and joy of the Holy Spirit, in which the kingdom stands; which power strikes at the root of all the wickedness and evil in the world, and is the axe that is laid to the root of the evil tree. This is that by which Christendom must be reformed,—no sound reformation, but by this in the particular and in the general. The bread of the kingdom is the joy of the Holy Spirit, felt and known within, which satisfieth and refresheth the soul. This is the bread which comes down from heaven.—*William Shewen.*

Character.—It is said of man, as he thinketh in his heart, so he is. A man's thoughts form his character. A man may, to all public appearance, be a pure man, and yet, if he is indulging unclean and unholy thoughts in his mind, he is forming a base character and is becoming a base man. If a man be intending to do wrong, though he may not utter it with his lips; though he may not communicate the conception to his dearest friend,—he is destroying his own true character. The world is oftentimes astonished by base actions on the part of men supposed previously to have been good. It is an old saying that men do not become suddenly base. It is by entertaining wrong conceptions, by indulging wrong thoughts, by familiarizing himself with improper scenes, and by harboring wrong purposes, that the barriers against sin are finally broken down, and he is led to the commission of evil; and wherever there are influences favoring such thoughts, society is unsafe.—*Bishop Simpson.*

Watchfulness over Self.—Men and women who feel themselves disposed to act and to speak crossly, and contrary to the judgment of those among whom they move, if they have not sufficient self-control to enable them to restrain the public exhibition of this dis-

position, had better retire. The universal fault-finders—the persons determined to have their own way in everything—have no right to mingle in social society, the comfort and enjoyment of which they seriously disturb, even when they do not wholly destroy it. The disposition they manifest is contrary to Christianity, and, however great their profession may be, they are not living in the spirit it inculcates.—*Musings and Memories.*

For "The Friend."

Incidents and Reflections.—No. 35.

We have recently read an account of an active business man, residing in the interior of the State, who was accustomed to visit the city of New York from time to time for business purposes. "Before coming on a certain occasion, he had observed a swelling slowly forming on his person, which, though not troublesome as yet, occasioned him some anxiety; and after attending to the matters for which he came, he went to submit the case to the judgment of an eminent surgeon. He was frankly told that it would prove a malignant tumor, and would probably terminate his life by the end of six months. This was, of course, a stunning blow. He was an intellectual believer in Christianity, and a man of upright life, but was without a Christian hope. Before leaving the city he called on a Christian lady—a sister, we believe—and told her what the surgeon had said. On parting from her she placed in his hand a printed leaflet, which he accepted and put in his pocket. Then he took the cars on the Hudson road, and when seated, sank into profound thought on his position. He recalled his past life, so filled with divine goodness; his sinful neglect to return this with love and obedience, and his failure to receive the Saviour of the world into his heart." Some hours, perhaps, had passed in this way, and his heart had become full of tender feeling, when he remembered the leaflet and took it from his pocket. It contained the following hymn:

My faith looks up to thee,
Thou Lamb of Calvary,
Saviour divine;
Now hear me while I pray,
Take all my guilt away,
Oh, let me, from this day,
Be wholly thine.

May thy rich grace impart
Strength to my fainting heart,
My zeal inspire;
As thou hast died for me,
O may my love to thee,
Pure, warm and changeless be,
A living fire.

While life's dark maze I tread,
And grief around me spread,
Be thou my guide;
Bid darkness turn to day;
Wipe sorrow's tears away
Nor let me ever stray,
From thee aside.

When ends life's transient dream,
When death's cold sullen stream
Shall o'er me roll;
Blest Saviour, then, in love,
Fear and distress remove,
O, bear me safe above,
A ransomed soul.

The work of the Holy Spirit on his heart during his hours of silent musing had prepared him to feel his need of forgiveness for sin, and of turning to the "Lamb of Calvary," who still says to those who are weary and heavy-laden with the weight of their sins,

"Come unto me and I will give you rest. Therefore the language of the hymn was peculiarly sweet and comforting to him. He retired through slowly and many times over. The account states that the prediction the surgeon was fulfilled, but that the sufferer was enabled to die joyfully; having, we trust, through the mercy of God in Christ Jesus, experienced the washing of regeneration and the renewings of the Holy Spirit, which alone prepare any to partake of joys of God's salvation.

For "The Friend."

William Bayly.

The experience of that valued minister, William Bayly, as to the way in which he comes to partake of (the cup of) salvation in full accord with that of the faithful members of our religious Society, and we believe of all true Christians.

To show the esteem in which he was held by his brethren a few extracts are introduced from the affectionate testimonies of his friends prefixed to his collected works, published 1876.

John Crook says: "His zeal for God and his blessed Truth was known to many witnesses; for as he was a true Boanerges Son of Thunder to beat down deceit and falsehood, so was he also a son of consolation comfort the weak and tender.

"He had a way to thresh the swollen mountains till they became as dust before him; and yet at the same time with his art to take up the meek and lowly, and bear the as in his bosom.

"When his countenance was set against the wicked, his face was filled with majesty and the terror of his words pierced their inward parts.

"He measured not his time by the glass, nor spared not his pains for fear of spending himself; but what he undertook for God, he did it with all his might.

"And as he was bold and zealous in preaching, being willing to improve his time as he had known it was not to be long among us; so was he as valiant in suffering for his innocent testimony, when called thereunto. Methinks I see, how once I saw him stand the bar, to plead his innocent cause, like our Stephen in the senate-house, when the threats of his persecutors resembled the shower-stones falling upon that blessed martyr crying out with a hideous noise, 'Take him away; receive him dungeon; stop his mouth; executioner,' &c. Yet all this while he changed not his countenance, except by the addition of ornaments of some innocent smiles; but followed the example of the Lord, who set his face as a flint against all opposition to the blessed testimony his Father had given him to bear."

John Taylor, of Barbadoes, testifies that he was "a very glorious instrument in the hand of the Lord, and many were convinced by him, and turned from darkness to light, and from the power of Satan to God." Further I have to say concerning this man of God, as he had been at the Barbadoes four or five times, he always used my house more than any other, and can testify concerning him, that he was of an innocent and blameless life and conversation; I can truly say and affirm that his conversation did adorn the Gospel, and that his words administered grace to the hearers; yea, in his very common commun-

on his words were seasoned, and had vivified in them."

The reference to the frequent visits which William Bayly made to Barbadoes is explained the fact, that for some time he followed a faring life in order to provide for the maintenance of his family. It was while on board that the summons came to him to leave this world, and enter upon that state of existence of which we can have but imperfect conceptions while clothed upon with our carnalities of clay. The path by which he was led out of sin and corruption into the glorious spiritual liberty of the children of God, and prepared for admission into the heavenly abodes of everlasting blessedness, is described by him in a brief tract, entitled "A short relation or testimony of the work of the Light of Christ in me from my childhood; by one who is now a witness of the Spirit of Truth (whom the world cannot give), which doth convince of sin, of righteousness and of judgment, and brings all things to remembrance, and showeth me things to me; Glory to the Lord forever." From this tract the following narrative is condensed. It opens with the following declaration written under that animating assurance which is the product of true faith. "In the eternal Light and Life of God (wherewith I and all mankind are lighted), do I now stand and rejoice over the world and all its glory and vanity, over the Beast and False Prophet within and without, having received Promise from the Father of life (in the way of his judgments), after which my soul had long laboured and thirsted, even from a child, though then I knew not what my soul panted for; but now know the mysteries of God's everlasting Kingdom are revealed to the babes at their fair; but to others, in parables."

He then relates his experience. "When I was about ten years old, I do remember that sometimes I desired to go and sit alone quiet in some desert place, where I might bemoan myself, and weep in secret; even until my heart was broken, not knowing wherefore; and I did begin to pray in fear to God with tears, though I knew not who or where He was, but had little to speak, only something led in me, and breathed, confidently believing that God heard me wherever He was, and would pity me and save me, at which angels did arise unto Him; not knowing it was a seed in me, which was and is beloved of God (contrary to the course of this world), which the blessing and promises are, that I did arise in the quiet of my mind to break through that which the serpent and my own will had wrought in my heart contrary to God, that thereby I might enjoy peace in the everlasting covenant of light. For at any time when I had done or spoken that which was contrary to God, I was soon checked for it, and judged and condemned and put in fear, by his kindness in my conscience, which beheld all my ways and words, though never so secret, and did is the same that Job speaks of which set print upon his heels, and marked his steps, which Light I can see all that ever I have done, and do remember the first oath that ever I swore (being provoked by another lad), and that I was smitten with trembling, scarce able to stand on my feet, by the witness of God in my conscience, which I knew not then that it was, but could have fled any way from it, being put in such horrible fear, and condemned by it when I had done any evil: so

there is no place at last where the worker of iniquity may hide himself from the dreadful presence of God, as David saith.

"So, about fifteen years old I went among the soldiers (being the time of war), not heeding the true Guide, the light and Spirit of God, which strived often with me, to lead me in weakness and fear out of all strife, which comes from the lust that was against the soul." By the evil company to which he was here exposed, he says, "the honest principle in me was betrayed and even murdered, and I began to be hardened from the fear of God. Now I could swear and vapour among them and drink till I was sometimes drunk, and grew in it until I even took delight in sweating and drunkenness; yet oft times when I was gone from my company alone and quiet, fear and dread from the witness of God in me would seize upon me in great and horrible terror, and in the night in dreams was I often fearfully scared and tormented with fearful sights and visions of hell and devils, death and damnation, which indeed (in that state) was my just portion; and so in the cool of the day I heard the voice of God and was afraid, like Adam in the transgression; and though I would have hid my sin like him, yet the Lord did search it out."

(To be continued.)

Selected.

Lines found in the pocket of Cowper's friend Unwin, after his decease:—

What doest thou, O wandering dove,
From thy home in the rock's riven breast?
'Tis fair! But the falcon is wheeling above,
O, fly to thy sheltering nest!
To thy nest, wandering dove, to thy nest!

Frail barque, on the bright summer sea,
Which the breezes now curl but in sport,
Spread cheerily the sail, for though pleasant it be,
Ye'er finger bill safe in the port,
To the port, little barque, to the port!

Tired roe, that the hunter dost flee,
Which his arrow has not in the wing,
In you deep green recess there's a covert for thee,
Go rest by that clear limpid spring,
To the spring, panting roe, to the spring!

My spirit still hovering, half blest,
And objects so fleeting and dim,
Ah! knowest thou thy rock, and the haven of rest,
And the pure spring of joy, then to Him,
Fluttering spirit, to Him!

STANZAS.

As down in the sunless retreats of the ocean
Sweet flowers are springing no mortal can see,
So deep in my soul the still prayer of devotion,
Unheard by the world, rises silent to Thee.
Thy God, — silent to Thee,
Pure, warm, — silent to Thee.

As still to the star of its worship though eluded,
The needle points faithfully o'er the dim sea,
So dark as I roam in this wintry world shrouded,
The hope of my spirit turns trembling to Thee
My God, — trembling to Thee,
True, fond, — trembling to Thee.

—Hood.

Let us all come to Christ, and let none deceive themselves and live in their sins, and yet think to come to Heaven. Be not deceived (saith the apostle), God is not mocked; for whatsoever a man sows, that he shall also reap: He that sows to the flesh, shall of the flesh reap corruption; but he that sows to the Spirit, shall of the Spirit reap life everlasting. Labor for a sure-grounded hope, a just hope in the mercy of God for pardon and salvation: then you must, know a work of Christ upon

you, and the power of the Spirit of Christ within you, subduing your will to a holy subjection to the Divine will; that you may say with the apostle: "I am crucified with Christ; nevertheless I live, yet not I, but Christ liveth in me, and the life which I now live in the flesh, I live by the faith of the Son of God, who loved me and gave himself for me.—W. Penn.

Reward of Honest Industry.

In the earlier years of my experience as a printer in Chicago, more than twenty years ago, our firm did a good deal of printing for the Chicago, Burlington and Quincy Railroad, and because of this I came to know a young man who is the subject of my story.

He came from Massachusetts; he was poor, and had no influential friend to even give him a letter of recommendation. He sought employment on the Chicago, Burlington and Quincy Railroad, and after waiting a time, at last secured a position as brakeman on a freight train—salary thirty dollars a month. He was faithful in this position, and being both intelligent and industrious, he was soon made a conductor on the train, with wages nearly doubled. He soon attracted the attention of his superior officers, who saw in him an honest, faithful, conscientious conductor, one not seeking his own ease or pleasure, but constantly devoted to the interests of the company that employed him, so that not many months elapsed before he was made conductor of a passenger train—a more comfortable position, and one yielding a somewhat higher salary. Here I first knew him, and I saw in him a modest, quiet, unassuming young man, free from the popular vices, and one who tried to be just as faithful, and true, and devoted to his work as a conductor as though the position had been that of general superintendent.

He did not apparently have a high opinion of his own abilities; there was a total absence of that swagger and strut so often seen in those who come to similar subaltern positions. It seemed as though he thought that to properly conduct his train—to secure the comfort of his passengers, and rightly serve the interest of his company—required the full exercise of all his powers.

One of the sternest and most exacting, and yet one of the noblest, ablest, and most conscientious men who ever filled a similar position, was then General Superintendent of the road. This man (Col. G. C. Hammond) watched every employee of the road with an eagle's eye. He measured every man, knew the ability of each, and seemed intuitively to know which were the faithful workers and which the lazy shirks. Our young conductor did not escape his keen eye. When he least thought of it, his chief was measuring and sounding him, and finding out what kind of metal he was made of; but none ever knew whether he was approved or not for the chief's look was always stern and cold.

One night, train number four moved slowly out of Chicago under the care of my young friend, who only intent on doing his work as well as he knew how, seemed to have no higher ambition than to be a good conductor—salary nine hundred dollars a year. About noon, when he stopped at the station, he found a telegram from the head office, ordering him to "leave the train in care of —, and take the first train for Chicago."

This was an unusual thing. Wondering what could be the matter, conscious that he had tried to do exactly right, and yet remembering how exacting was the General Superintendent, he feared that unintentionally he had fallen under his displeasure. Reaching Chicago, with a fearful heart he presented himself at the office of the Superintendent.

"Good morning, Mr. Hammond; I've answered your telegram, and come to see what it means."

"Good morning," growled the chief; "I see you have, sir. I have concluded to take your train away from you."

The conductor's heart sank lower than ever. What before was only fearful foreboding, was now painful truth. He had served the company to the best of his ability; he had kept the affairs of his train in complete order, his reports had been carefully and correctly made, and yet, after all, he had lost his position; he knew not why, and felt that his case was sad indeed. He inwardly resolved, that having missed his calling, he would quit railroading and try some other service, where faithful work would be appreciated. He dared not hope to reverse the decision of the all powerful official, yet in as calm a voice as he could command, he politely asked the reason for his summary dismissal.

Colonel Hammond waited a while before he answered. Then the muscles of his face relaxed a little, and he said, "I want an assistant superintendent in my office, and I have called you to take the place."

True worth is always modest, and our thunder-truck conductor could only stammer, "but I am not competent, sir, to fill the position?"

"You can do as I tell you; you can obey orders, can't you? That's all you have to do, sir. You will begin work this morning. That is your desk."

The new duties were not as difficult as he expected. At first he had only to obey orders, and carry out the details of work laid out by the chief, and to these duties he brought the same faithfulness and thoroughness that had made him noticeable as a conductor. His elevation did not spoil him or make him vain. He was as plain, and modest, and hard-working as before—the salary at first was one thousand eight hundred dollars.

After a few years of service under Col. Hammond, and an advance of salary to two thousand and five hundred dollars, the plain young man was invited to take the office of General Superintendent of a young road, at a salary of four thousand dollars. Distrusting his own ability but determined to do his best, he accepted the call, and succeeded, until the Chicago, Burlington and Quincy Railroad, realized how much they had lost in parting with him, invited him to resume his old position by the tempting offer of six thousand dollars a year.

In the meantime Col. Hammond had become Superintendent of the Union Pacific Railroad, running from Omaha to Ogden, where it connects with the Central Pacific road. This latter road was owned by four or five millionaires, who had built it, one of whom was its General Superintendent. However good a business man, he knew but little about railroading, and under his care the road was anything but prosperous, until the owners and directors resolved upon a radical and sweeping change.

But where could they find a general superintendent who had the ability, and would dare to re-organize the road and put its affairs upon a better basis? They consulted Col. Hammond and other railroad men, and the result was that, most unexpectedly, our whilom modest and hard-working conductor one day received a telegram, asking him if he would undertake the duties of General Superintendent of the Central Pacific Railroad at a salary of ten thousand dollars. He was satisfied with his appreciation by the Chicago, Burlington and Quincy Railroad, who proposed to increase his pay to seven thousand dollars, and as he preferred to remain in Chicago, he declined the princely offer made by the California road. Then another telegram asked at what salary he would become the chief of the Central Pacific. Almost hoping to discourage his tempters, he telegraphed, "Thirteen thousand a year in gold." At once came the answer, "Accepted." So, taken in his own trap, he had nothing to do, but to bid adieu to the city that had served him so well, and turn his face toward the land of gold. My story would be too long if I should try to tell you the unexpected difficulties he encountered from the old officers of the road, who had determined that they would not be superseded, and that the new superintendent should never enter upon his duties; how they, before his arrival, set the whole press and people of California against him; how, supported by directors of the road, he quietly took control, disarmed prejudice, conquered submission, and earned success.

This was nine years ago. He is still General Superintendent of the Central Pacific Railroad, one of the most important railroads in the world. With its connections with California, this quiet man, not yet forty-eight years old, now superintends 2734 miles of railroad, and over fifty connecting steamers, besides dictating the tariffs of the China, the Australian, and the Panama line of steamships. While other young men preferred present ease and comfort to the interests of their employers, wasted money and time in billiard halls, and theatres, and drinking saloons, Albion N. Towne was at work, building up a character as well as reputation, and now fills one of the most important positions in California, and instead of three hundred and sixty dollars a year as brakeman on a freight train, he now draws the salary of twenty thousand a year in gold.

His untiring faithfulness in the humbler duties not only attracted the notice and won the appreciation of his superiors, but fitted him for the higher positions which, without his seeking, he was called to fill.

I have long desired to tell this story of a young man's faithfulness, and consequent success, for I consider it a lesson that boys and young men of the present day can study to advantage.—*Alfred L. Sewell.*

Life is very critical. Any word may be our last. Any farewell, even amid glee and merriment, may be forever. If his truth were but burned into our consciousness, and if it ruled as a deep conviction and real power in our lives, would it not give a new meaning to all our human relationships? Would it not make us far more tender than we sometimes are? Would it not oftentimes put a rein upon our rash and impetuous speech? Would we carry in our hearts the miserable suspicions and

jealousies that now so often embitter fountains of our loves? Would we be so proud of the faults of others? Would allow trivial misunderstandings to build strong walls between us and those who ought to stand very close to us?

For "The Friend"

"Stand fast therefore in the liberty wherewith Christ hath made us free, and be entangled again with the yoke of bondage."

Dear young Friends,—Perhaps there never was a time in which the observance of this junction of the apostle to the Galatian Church was more necessary than the present, particularly amongst the members of the city of Friends. It is especially adapted to those who have been brought under the power of Divine Grace, and have tasted of the growth of life, and of the powers of the word to come, and been made partakers of the Holy Ghost, to stand fast in this liberty; for, brethren, ye have been called unto liberty, or use not liberty for an occasion to the flesh, but by love serve one another. How many there are at the present time, who are claiming to be the disciples of Him who was harmless, undefiled and separate from sinners, that are indulging in things which are contrary to the teaching of the pure Spirit of Truth!

Therefore, dear Friends, let us beware that we partake not of their sins. For God has not called us unto uncleanness, but unto holiness and virtue. There are many voices in the world crying, "Lo here is Christ, and lo He is there." Believe them not, neither go ye after them; but minding the pure witness for God in your own hearts, stand fast in the liberty it gives. For, as said the apostle, "If any man preach any other gospel unto you than that ye have received, let him be accursed." If it was needful to warn the Galatians against unsound doctrine, it is less so at the present time? Wee be unto pastors that destroy and scatter the sheep in my pasture! said the Lord through His prophet.

Dear Friends, it is a day in which we, as a Society, need to dwell very low, many of the discouragements that are thrown across the path of the sincere seekers after truth; but the language of Him who was touched with a feeling of our infirmities, is yet applicable to all His little ones: "Fear not, little flock, it is your Father's good pleasure to give you the kingdom."

Oh how many are the snares of the enemy, if he cannot effect the church's overthrow by sowing the seeds of infidelity amongst his members, he will change his tactics and will transform himself into the appearance of an angel of light, and will draw a veil of spiritual darkness over the minds of those who are grounded in the unchangeable truth, and maintain in their minds the idea that they have reached a high point of Christian perfection and may lead them on from one step to another under this veil of darkness, with a zeal that is not according to knowledge.

Dear Friends, keep your ranks in righteousness, for the Captain of our salvation was never foiled by the enemy; and He is able to keep all his trusting ones from the attacks of him whose work it is to lay waste the heritage of God. Behold what desolations the enemy hath wrought in the sanctuary: "A man was famous according as he had lifted u

s upon the thick trees; but now they lack down the carved work at once with axes and hammers." When the Psalmist saw the prosperity of the wicked, he said, "I was foolish at the foolish. But when he thought know their course, it was too painful for me until he went into the sanctuary of God. An understood I their end. "Surely thou shalt set them in slippery places, thou shalt cast them down into destruction."

When we look at our religious Society in present distracted condition, we may see many things that are calculated to shake the faith of the young and inexperienced. So many innovations, and such wide departures in the simplicity that adorned the church in early days. But the truth is the same: though all men should forsake it; it changeth not.

Therefore, dear Friends, look not at the shortcomings or failings of others; that blessed Spirit of Bethlehem which hath shined upon in the perfection of beauty, has lost none of its lustre. It was the blessed inshining of that Spirit in the heart, that led the pioneers of our Society out from under the empty forms and ceremonies of a lifeless profession; and to rise up the cross and follow Him who is the delight that lighteth every man that cometh to the world. They bore an undying testimony to the blessed efficacy of that grace and truth which came by Jesus Christ; and it becomes us, who profess the same faith, to stand in the liberty which it gives. Inasmuch as they were divinely constrained to proclaim the unsearchable riches of Christ, for the inhering in of those that were scattered, as sheep without a shepherd, it behoves us to give the more earnest heed to the things that we have heard, lest at any time we should let our testimony slip. For if the word spoken by angels is steadfast, and every transgression and disobedience received a just recompense of reward; how shall we escape if we neglect so great salvation; which at the first began to be spoken by the Lord, and was confirmed to us by them that heard him? God hath, the economy of His wisdom and grace, decreed that His Church should be a pure church, without spot or wrinkle; washed in its own precious blood, and made meet to be adorned to himself in an everlasting covenant.

How many there are who turn back on the day of trial, and have shrank from the operation of such a washing; so that the church might well say, I have brought up children and they have rebelled against me; they have turned every one to his own way; they have transgressed the laws, changed the ordinance, broken the everlasting covenant. Let it those with whom the testimony is signed up and the law sealed, are only faithful to Him who hath called them out of darkness into his marvellous light, the time will come when the church's children will be saying again in her ears, the place is too straight for me, give place to me that I may dwell. When the Lord bringeth back the captivity of his people, Jacob shall rejoice and Israel shall be glad. Thou shalt no more be termed forsaken: neither shalt thy land any more be called desolate; but thou shalt be called Ephzibah, and thy land Beulah; I will no more give thy corn to be meat for thine enemies; and the sons of the stranger shall not drink thy wine for which thou hast labored; but they that have gathered it shall eat it and praise the Lord, and they that have brought it together shall drink it in the courts of my

holiness. "Behold, the Lord hath proclaimed unto the end of the world. Say ye to the daughter of Zion, behold thy salvation cometh; behold, his reward is with him, and his work before Him. And they shall call them, The holy people, The redeemed of the Lord; and thou shalt be called, sought out, a city not forsaken."

Cornwall, Orange Co., N. Y.

THE FRIEND.

THIRD MONTH 22, 1879.

It is not needful in the present day to enter into any argument to prove the advantages conferred by literary education, for there must be few who would hazard opposition to the prevailing sentiment in its favor. But we fear that some of the members of our religious Society are not sufficiently thoughtful as to what constitutes a good education, or are not properly impressed with the evils resulting from an early education deficient in the inculcation of correct principles, whether in reference to the acquisition of knowledge, or the conduct of life.

The "Public Schools" of the Commonwealth are popular with the community, as a noble effort to bestow literary instruction on all classes, and we wish not to disparage whatever benefit they may confer. But it is of great importance, before Friends place their children in these seminaries, to ascertain how far the instruction imparted and the habits formed there, are fitted to give a well-grounded expectation that the result will be permanently valuable. A parent can hardly inflict a more grievous wrong upon his child, than to oblige him to spend the most exposed period of life where he is daily exposed to the danger of imbibing erroneous ideas of mental training, or principles inimical to the true object of life and the means for attaining it.

Of course there are differences in our public schools, answering in measure to the capability of those having the oversight of them, to adapt the mode of teaching and the course of study, to the object all profess to aim at,—imparting a competent knowledge of the branches intended to be taught; but with many who are acquainted with the system pursued in the majority of these schools, and who have watched the general character of those who have been trained in them, there are grave doubts entertained as to the thoroughness of the teaching, even in the elements of a rudimentary English education, much more as respects the benefits conferred by the system embracing so many of the more showy branches, in which but a medium of learning is likely to be obtained.

In this age of invention and progress, it is quite natural there should be not a few new theories and schemes of education; most of them better adapted to chime in with the popular admiration of labor-saving machinery, than to secure and strengthen the foundation on which all effective knowledge must rest. No doubt there have been improvements made, in modern time, in the art of teaching, and there are appliances introduced into the school-room for facilitating the imparting of knowledge, both by books and apparatus, which contribute directly to the end in view. But the modern schemes of school-instruction

are too generally infected with the spirit of "learning made easy;" with disregarding the old-fashioned practice of *hard work* in the study room, and of beginning by completely mastering the first principles of comparatively few of the more important branches; in order to substitute therefor, dabbling in the elements of various departments of literature and science, and thus giving the appearance of great educational achievements by both master and scholar.

We think it does not require unusual opportunities or powers of observation, to discover that it is much too common an evil among those who have grown up, or are now growing up under the influence of our public school training, to ignore or discard the opinion that success is to be attained by "the sweat of the face," and therefore that "patience and perseverance in toil, whether mental or physical, become a duty, and that by them only can intellectual development and fair culture be carried out."

But it is not alone in the irreparable loss sustained from not properly drawing out and applying the mental faculties during the formative season of youth, and the consequent shallowness of literary or scientific knowledge attained, that the defects in the "public school" training manifest themselves; the evil results are not all left behind in the school-room. With the smattering obtained in what are called the higher branches of learning, it is not unusual to meet with those about to enter on the active duties of life, inflated with the notion that they must not belittle themselves by engaging in occupations which require hard work; that they are fitted to move about what they are pleased to look on as the grovelling efforts of daily routine toil, and—if they engage in any fixed employment—they must take a position where their time and abilities will not be too much encroached on, to prevent due attention to self and its imperious demands. With far too many, their pupillage has impressed them with the erroneous belief that success does not generally require close attention and wearying efforts; and they shrink from the task of searching out, by application and diligence, the first principles of whatever they ought, or may desire to know, and of overcoming the difficulties that may present by patient study and reflection. In other words, they are still ignorant that labor, though not desirable in itself, is to be cheerfully undergone for the fruit it produces.

What can compensate for the loss sustained by the absence of all religious instruction in these schools, and the hurtful bias given to the immature mind of the scholar, by knowing that this kind of instruction is banished, because of disagreement about form, and the belief that the whole subject may be safely discarded? Are the parents themselves sufficiently alive to the duty of early instilling into the minds of their children correct religious principles, to give stability and strength in the after-battle of life? Where the mental training is defective, the absence of all attempt to imbue the mind of the child with reverence for religion and the course of conduct it enjoins, adds greatly to the unhappiness of the loss sustained.

Even where the disposition has been fostered, or the habit formed of depending on short and easy methods of acquiring knowledge, which though superficial may pass for in-

tellectual cleverness, sound religious principles may overcome aversion to exertion, stimulate to vigorous efforts to unravel primary principles, to understand how to apply them, and the result of their correct application. Well it is where such is the case. It inlines willingness to enter with alacrity on the toils and perplexities of life, and brightens the future with the prospect of success; labor is cheerfully endured not because it becomes agreeable or amusing, but from the conviction that in the present state of the world, nothing great or good can be attained without it.

We cannot but think there are radical defects in what may be called the educational administration of our "public schools"; and it might not be unworthy of close examination, as they have been in operation long enough to produce a decided influence on the community receiving education in them, and that influence to react on those delegated to carry the system into practical effect, whether those defects are not showing their hurtful character, in many of the disreputable phenomena that mark so many actors in the social, civil, official and political world immediately around us. It is admitted that in the city a low state of morals pervades large numbers of the pupils, and it is a sorrowful reflection that any Friend can be willing to allow his child to mingle with them.

SUMMARY OF EVENTS.

UNITED STATES.—The report of the Life Saving Service, for the year 1877-8, makes a very good return. The most thoroughly guarded coasts, those of Rhode Island, Long Island and New Jersey, although the least many wrecks, show a clean record as to lives lost: the 406 persons on board of wrecked vessels having all been saved. There were thirty-five wrecks on the coast of New Jersey, involving property valued at over half a million dollars,—three-fourths of which was saved. In all the districts (including the lakes) there were 172 disasters to vessels, having on board 1557 persons, of whom 1361 were saved. Of 143 men, 185 were on board the Huron and Metropolis, wrecked on the coast of North Carolina. The entire expenditures of this service for the year 1878, was about \$225,000, the value of property saved is estimated above \$1,000,000.

The Cape Ann Advertiser, of Gloucester, Mass., states that thirteen vessels are supposed to have been lost in the storms of last month, carrying with them 143 men, and causing 53 widows, and 137 orphans. The total capacity of the vessels lost is 8,358 tons, and their value \$50,000.

The remains of Bayard Taylor, U. S. Minister to Berlin, arrived in New York on the 14th, and were interred in Kensico cemetery on the 15th inst.

The Mahoning powder works, near Danville, Pa., were destroyed by an explosion; three lives were lost.

It is stated there are in the South 1,579,097 negro children of school age. Of this number the schools reach 660,000.

The San Francisco Bulletin says that the total arrivals of Chinese at that port, in 1878, were 16,675, the departures 6,071. The excitement in San Francisco, on account of the President's veto of the Chinese bill, appears less than was first reported; it is said his action has the approval of many of the better class of citizens.

Destructive prairie fires have occurred in Southern Dakota, along the line of the Dakota Southern Railroad, telegraphic communication has been stopped by the burning of the telegraph poles, and several villages are in danger.

The report of the pork-packing operations in Chicago for the year ending 1st inst., gives the whole number of hogs packed 1,911,913. Of these 1,908,798 were slaughtered, 2,948,115 were winter packed.

Reports received in Chicago from all points in the wheat growing districts of west and north-west, indicate a yield of 30,000,000 bushels, against 27,000,000 last year.

There were 384 deaths in Philadelphia during the past week. Of these 48 were from consumption; con-

vulsions 13; debility 11; diphtheria 5; disease of the heart 10; scarlet fever 12; inflammation of the lungs 30.

The total tonnage of anthracite coal from all the regions during the week ending on the 8th inst., amounted to 411,435 tons, against 297,965 tons in corresponding week last year. Notwithstanding the increased demand for coal, prices seem on the decline; 50,000 tons were sold at auction during the week at prices averaging \$2.35 per ton, which is $\frac{7}{8}$ cts. below previous sale, and \$1.08 below corresponding sales last year.

Markets, Dec. 14.—Wheat, 1881, 106 $\frac{1}{2}$; do, 57, 104 $\frac{1}{2}$; 41 $\frac{1}{2}$; red, for export, 104 $\frac{1}{2}$; corn, 99 $\frac{1}{2}$; do, 100; do, 101; do, 102; do, 103; do, 104; Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,
PHILADELPHIA.

For "The Friend,"

Incidents and Reflections.—No. 39.
PLAINNESS.

Jacob Green, an Irish Friend, who nearly years ago paid a very acceptable visit to America, as a minister, related on one occasion, that when he was a young man, before he had joined our religious Society, he entered a grave-yard, where he beheld the skeleton of a human being. This made so deep an impression on his mind that he never after felt the least inclination to adorn his person.

Thomas Story relates, that when he was in Cork, in Ireland, in the year 1716, "It was the time of the Assizes, many of the gentry rank were in town on that occasion, and divers of our friends being acquainted with several of them, one day came to my friend John Pike's to dinner, the young Countess of Ulster, and her maiden sister, and three or four of lesser quality of the gentry. Upon this occasion we had some free and open conversation together, in which this lady and the other ladies commended the plain dress of our women, as the most decent and comely, wishing it were in fashion among them. Upon this I said, 'That she and the rest of her quality, standing in places of eminence, were the fittest to begin it, especially since they saw a beauty in it; and they would be sooner followed than we of lower degree.'" To this she replied, "If we should dress ourselves plain, people would gaze at us, call us Quakers, and make us the subject of their discourse and talk; and we cannot bear to be made so particular."

"I answered, 'The cause is so good, being at root of truth and virtue, if you will espouse it heartily upon its just foundation, a few of you would dash out of countenance, with a steady and fixed gravity, abundance of the best side, who have no bottom but the vain customs of the times; and you will find satisfaction in it, an overbalance to all you lose, since the works of virtue and modesty cry in them an immediate and perpetual reward to the worker.'" This seemed not unanswerable, being said in an open freedom; but, oh, alas! it was quenched by this; they all then alleged, 'That our own young women, as they are, about London and Bristol, went as any note, with the finest of silks and laced shoes; and when they went to Bath, made as great a show as any.'" Not knowing but some particulars might give too much occasion for an allegation, it was a little queuing; but,

with some presence of mind, I replied, 'I have been lately at London and Bristol, and also at the Bath, and have not observed any such; but at all these three places generally indifferent plain, and many of them, even of the younger sort, very well of that account. But such among us who take such liberties, go beside their profession, and are no examples of virtue, but a dishonor and reproach to our profession, and a daily and perpetual exercise to us; and I hope you will not look at the worst, since, amongst us everywhere, you may find better and more general examples of virtue and plainness.'

When Thomas Story was in America, he had a meeting in the year 1699, at Misspillion, in Delaware. Here he met with a man named Joseph Booth, who asked him many questions on religious subjects, all of which were answered to his satisfaction; and after the meeting, he expressed his full conviction in what he had heard. "But," says T. Story, "I found he stuck at the cross; he could not submit to the plain language of thou and thee to a single person, nor become unmodish in keeping on the hat, and declining the customary ways of address, nor break off that heathenish custom of calling the days and months by the names of their imaginary gods; which he thought too low for matters of religion; concerning all which we discovered next morning, as he set us on our way; and in some of these points he was better satisfied before we parted. Yet the cross was hard for him to bear in these small things; and why? Because submitting to the practice of them, immediately subjects a man to all the scoffing and contempt with which we are treated by the world at this day; no way agreeable to the natural and carnal mind. And that which rendered things harder to him was, the station and character he supported in the world; for he was a justice of the peace, and the most sober and knowing person in these parts."

The author of "The Church's Broken Unity," a member of the Church of England, of the ultra school, in his article on the "Quakers," attributes their rapid spread in a great measure to their peculiar testimonies. He says: "To oppose the Church [of England] tradition and antiquity, was nothing. The Quakers did more. They opposed the world also. In opposing the Church, they would not in those days have suffered; but when not only the customs of religion but the customs of society also fell under their interdiction, when the common courtesies of life in language and conversation were refused, and the courts of law in demanding the oath of a Christian man, set at naught; then came such a collision with all that was around them, that persecution and suffering were the immediate results; and with persecution and suffering, their sure fruit, notoriety and increase of numbers."

John Richardson bears this testimony as to the effect of the work of the Holy Spirit on

his heart: "Whereas there had been an aversion in me to the people called in scorn Quakers, and also to their strict living and demeanor, plainness of habit and language, none of which I learned from them; for when the Lord changed my heart, he also changed my thoughts, words and ways; and there became an aversion in me to vice, sin and vanity, as there had been to the ways of virtue."

In the life of William Bray, the Cornish miner, it is stated that he liked those who were converted "in and out," in allusion to the excessive outward adorning of some, which he strongly condemned. In his public addresses, he sometimes referred to the artificial flowers which many women wear, and would say, in his homely but striking style, "I wouldn't mind your having a wagon-load of them on your heads, if that would do you any good; but you know it wouldn't, and all persons know that flowers grow in soft places."

At those favored seasons in the history of the Church, when the Lord has been pleased in a remarkable manner to pour forth his Spirit on the hearts of the people, and to cause them to turn with sincerity and earnestness to Him, the revival of true religion has been accompanied with a corresponding simplicity in life and dress, in accordance with the precepts of Holy Scripture. It was so with our early Friends. Without any formal regulations on the subject, they soon came to feel that it was beneath the dignity of one whose affections were set on Heavenly things, to follow the varying fashions of the day; and the plainness and simplicity they manifested in their apparel as well as conduct, were the legitimate fruits of their devotion to the cause of Christ.

The early Methodists were also a plain, self-denying people, and this was manifested in their personal appearance, as well as in other things. As their congregations have increased in wealth they have come more under the influence of pride and fashion; and their places of worship are now often very expensive and ornate structures, especially in the large cities. This is greatly to be regretted, as it evinces a decay of spirituality, and must lessen the influence for good of that people.

The change that has taken place has affected their dress, as well as their meeting-houses. A few years since, as a Friend who was from home on a religious visit, was standing at a ferry in company with his companion, he was accosted by a stranger who remarked that he supposed they were ministers of the Gospel, and that he also was one, though they would not suppose it from his appearance. He was a Methodist preacher, and he further said, that in former times a person would be known to be a member of their Society by his appearance, but now they had become ashamed to bear this open testimony to religion in the face of the world.

Alas! of how many of our members must it be acknowledged, that they too have "be-

come ashamed" of the unmodish dress of Friends.

The writer was greatly interested some months ago in meeting with an aged woman of another religious profession, who was evidently green in old age. She informed us that she had become deaf, and could hear nothing save the still small voice in the inmost recesses of her soul. She dressed much in the manner of a plain Friend of the last generation; and some allusion being made to it in our intercourse (by means of a slate and pencil), she said she had been asked whether she was a Quaker, and when she replied in the negative, the question was put, Why did she dress so plainly? To this she answered, that when she yielded to the power of Divine Grace and became a Christian, she took up the cross in all things, dress as well as others.

William Flanner.

For "The Friend."

The following reminiscence of that gifted minister of the Gospel, was related by the late Jacob Albertson, of Plymouth, and may prove interesting to some of the readers of "The Friend."

"I remember William Flanner being at my father's, when I was a lad of about eighteen. At meeting that day he sat from 11 o'clock to nearly one in solemn silence; when he arose, keeping his hat in his hand, saying, I have felt in this meeting the prevalence of a spirit very hard to be reached; so that I would much rather undertake to cut down one of the loftiest cedars of Lebanon, or one of the sturdiest oaks of Bashan, than to contend with this lofty and self-righteous spirit. He then sat down and soon after broke up the meeting.

"After dinner he felt his way closed up. A number of Friends being present, he asked their sympathy and advice. The first they freely accorded him; but none of them were willing to proffer him advice, except as one said, It might be safer for him to lie by until more light was vouchsafed to him. William said, If I must lie by, I would rather return to Philadelphia for that purpose. I was then requested to saddle and bring out the horses. As soon as I had them ready, I went into the house, and found Friends sitting together in solemn silence, which was broken by William, in asking if there was not a meeting of Friends within ten or twelve miles in that direction, pointing towards Providence. He was told there was such an one. Then, said he, that is the place to which I must now go.

"John Jacobs and father Livezey accompanied him to that meeting. Sometime after I heard John Jacobs give an account of what transpired therein. He said, William was much shut up for a time, as he had been in our meeting at Plymouth. But towards the close of the meeting, he arose, saying, "There is a spirit among you, Friends, which has the eye of an eagle; and which strikes with the beak of a hawk. Some of you are much disposed to carry your neighbor's faults in the fore-end of the wallet; while you are very careful to stow away all your own in the hinder end of it."

"He then was led to speak on the subject of self-righteousness in such a close and powerful manner as to bow the hearts of the people as the heart of one man, into much contrition and brokenness. John said, I never shed more tears in any one meeting than in this.

"At Richland, William's way was again shut up; but after a time of much conflict, he pointed in a certain direction, and asked if there was not a family of Friends living in that direction? When Friends queried how far he supposed that family lived, he said, some five or six miles. He was then informed there was a family residing about five miles off. "My next business," he said, "is there." It was a rather intricate road to their residence; but the Friends who accompanied him said, that William led them by the most direct road to the Friend's house to which he felt himself drawn.

"He was here made instrumental in bringing up the woman Friend of the house out of the very pit of despondency, in which she had so long dwelt that she had not been to meeting for several years. It was not long after this visit that this long sorely-tried one came forth in the ministry, to the satisfaction of her friends."

The Friend who transmitted to the writer the foregoing narrative, and who has since passed away from this state of existence, accompanied it with some remarks, a part of which are subjoined.

"Oh! where are we to look for a succession of such ministers? Such servants of the Lord as William Williams, Thomas Scattergood, Jacob Lindley, Arthur Howell, Richard Jordan, Christopher Healy, Ezra Comfort, Robert Scotton and a few others, all within my own recollection, have no successors to fill their places in the church in this day.

"There are indeed many younger men who have gifts; but not one that I know of seems to be prepared to take the place of those anointed ones, who have been removed from works to rewards.

"How long we are to be a declining people, I am unable to see, but I much fear we are not yet reduced to that littleness in our own eyes to which we must be brought before we will know, as a religious Society, that growth in the Truth which our fathers once knew."

For "The Friend."

Conversion of the Indians.

Thomas Story, in his journal, thus gives his views of the manner in which the conversion of the Indian races to Christianity would be effected:

"As to the conversion of the Indians of all, or any nation and nations, to the Truth, I believe the Lord will call them, after the power of antichrist is overthrown; but it seems to me, that learning, or the historical part of religion, or their own language (which is very barren of pertinent words), will not be much instrumental in it; but the Word of life, whose divine and life-giving intellectual speech is more certainly known in the mind, will tender their hearts, in a silent state and retirement, by means of some instruments that the Lord will raise up and qualify for that purpose; who shall not confound them with a long fruitless history of needless things. But when the Lord shall send forth his Word, the *Light of the Gentiles*, the quickening Spirit of Jesus, into and upon any of them in holy silence, or in prayer, their minds shall be directed to the Spirit himself, as the present object of their faith, obedience and love, and author of their present joy and salvation; and so, believing in the Light shall become children of that light and day of God, and heirs of eternal life in Him. And then the histories

in the Bible, the prophecies of the Prop of God, and the fulfilling of them; the e-geological account of the conception, birth, doctrine, miracles, death, resurrection, ascension, glorification, mediation, intercession, judgment of Him, who is the substance of and that true Light which lighteth every that cometh into the world, will be the clearly received by the Indians, when Almighty shall think fit to acquaint th therewith."

For "The Friend."

Thoughts and Feelings.

DAYS OF FAMINE.

There is much instruction and consolation conveyed in the promises of the Lord through his servant David: "They (the upright) shall not be ashamed in the evil time; and in days of famine they shall be satisfied." Again: "The eye of the Lord is upon them that fear him, upon them that hope in mercy; to deliver their soul in death, to keep them alive in famine." While righteous, or those who sincerely endeavor to serve their Father in heaven, are by means exempted from the vicissitudes and varied tribulations which ever attend citizens of earth through this probationary pilgrimage, such are, nevertheless, under special guardianship of Israel's tender Shepherd, who sleepeth not by day nor slumbereth by night; and who is ever watchful of his dependent servants and children, to feed them with food convenient for them, and to keep them alive in famine:—seasons when He, the Beloved of souls, for the trial of their faith, patience, and allegiance, sees meet to withdraw himself from them.

How trifling, comparatively, and "but for a moment," are all the exercises of spirit, trials of faith, the days of want, the proving the fastings, the baptisms, that the chastened meek, and lowly disciple—yet one who "hoped in His mercy"—may have to endure, if the eye of the Omnipotent is but upon them: "deliver their soul from death and to keep them alive in famine!" What matter if they feel as lonely sparrows upon the housetop, if they have to "stand continually upon the watchtower in the day time," or to sit in the "ward wale nights?" What even, should be their lot spiritually, with faith tried out of old, to be "deserted, afflicted, tormented if, at the end of the race, the crown of victory be but obtained? "Who (or what) writes the apostle, shall separate us from the love of Christ? Shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword?" "Nay," he continues, "in all these things we are more than conquerors through him that loved us. For I am persuaded that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord."

How much is embraced in the words, "More than conquerors, through Him that loved us! Oh! the exceeding riches of His grace and mercy! Oh! the inimitable power of His illimitable majesty and might! Oh! the precious parental nearness of the High Priest of our profession, and Captain of our salvation! Oh! how He makes willing and obedient! How He gives to will, and to do, and to suffer for his blessed name's sake! How He lead

times into green pastures beside the stillers! How He preserves through every consolation of His providence, whether it be chastenings of His love, the corrections of His rod, or the support and consolations of His staff! How in and over all, He makes us stand in famine! How He, in every strengthening to endure "as seeing Him who is invisible!"

With all the tribulations, crosses, baps, sufferings, persecutions, perils, or even death's oft," that the followers of a world-ficified, yet risen and glorified Lord Jesus have to endure, how exceedingly surpassing all the pleasures and fascinations of this world, are his or her enjoyments whose affections are set upon a King immortal, invisible; whose hopes are upon a kingdom which cannot be moved; whose treasure is laid up in a reservoir that neither moth, nor robber, nor riler can ever invade. What encouragement is there in that scripture, "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love Him." On the other hand, one unanswerable argument against indulgence in the vanities of the world and the satisfactions of time and sense is, that while the satisfactions of a quickened and immortal soul, as the waters of Jacob's well became the Samaritan woman after talking with Jesus, that at the same time with all their truthfulness and adaptation to the carnal and the heart, can, at the longest, last but not the least, and very uncertain span of existence. While, and how uncalculated to strike a permanent impression into every pleasurable and world-enslaved heart, are the solemn words of the apostle: "Whoever man soweth, that shall he also reap. For that which is sown of his flesh shall of the flesh also bring forth." &c. Alas! what will thousands of worlds be to us if, at the great reckoning of the door be shut against us, and heaven's eternal joys be lost? What shall it profit a man, if he shall gain the whole world, and lose his own soul? or what shall a man give in exchange for his soul?"

It is the earnest solicitude coupled with the tender sympathy of the writer, that the poor spirit, the mourners, the humble, the bowed down and often discouraged and feeble little ones, might be animated to hold on their dependent, prayerful way in patience, and in faith and faithfulnes upon and been received by you? so that you have been enabled to enter into covenant with Him, and to take—it may seem to yourselves—apparently feeble, yet straight steps in the narrow way of His cross leading unto the eternal crown? Have ye not at seasons had to rejoice for the help extended from the sanctuary, even the light of the Redeemer's countenance? Have ye not under a fresh feeling of his love and mercy, been helped to say, "Whom have I in heaven but Thee? and there is none upon earth that I desire besides Thee." And again, "I love the Lord, because he hath heard the voice of my supplications. Because he hath inclined his ear unto me, therefore will I call upon his name as long as I live." If thus ye have been fresh anointed, at times, to see of the things which belong to your peace; to set up the "Ebenezer" with the thankful acknowledgment, "Hitherto hath the Lord hath helped;" let not your hands hang down, nor your souls faint in the day of adversity, or in the day

when the Bridegroom and Comforter may withdraw himself for the exercise of your faith and love to Him. But remembering the promise of the Most High to them that hope in his mercy, even "To deliver their soul from death, and to keep them alive in famine," may you put on fresh hope and strength, and, through the power of the Eternal, press after the prize immortal—the one thing needful—the fitness of the blessing of the gospel of Christ."

William Bayly.

(Continued from page 253.)

He continued in the army until his company was disbanded; about which time, he says, "I was so smitten by God's witness, the Light in my conscience, that I began to leave off my swearing, &c., and my profane company became even loathsome and burdensome unto me; and I never swore an oath from that time to this day, which is about ten years ago. So at length I became a little zealous to hear the priests, and began to look into the scriptures to get them to talk of, as many profane ones do now, to make a covering; and then I thought I must be guided by the priests, who had the learning and the tongues, which they called the *original*, not knowing then that their original began at Babel, where God confounded the languages.

"So for a season, these merchants of Babylon I traded with, receiving and buying their wares, hoping it had been good, durable stuff I had got of them, being it was prized so high; and people cried, 'They had the original, and could give the meanings of the Scriptures and none else.'

"At length something in me began to be more and more awakened, and hungered after true bread, yet thought I should be still fed at their table, and did, until I was near starved with the husks that the swine did eat, for a stirring word in me was, *Give me food or else I perish*; and I went to hear them even with tears for hunger many times, until I perceived they spake not out of the mouth of the Lord the word of life, the true bread that came down from Heaven; but had studied and patched up something from the Scriptures without them, mixing their meanings and Babylonish wisdom and serpent's subtlety with it, and bid us 'Hear the word of God.' And so we looked for light, but behold darkness and dust we were fed with; and that was made sad in me by them which the Lord God proclaimed joy and liberty to.

"And thus I can truly say and do testify in the Lord; that when a true hunger and thirst in me did arise after the living God, it was often hurt, darkened and spoiled by the earthly wisdom, philosophy and vain deceit, which came out of the priests' mouth, which beguiled me of my reward, drawing out my mind from the pure measure of God within, inasmuch that the simple, honest and meek principle which stirred in me was weary to hear them any longer.

"So, in those days my soul was awakened by the witness of God, feeling the burden of sin, and was often afraid of death and misery without end, but knew not how to get out from under the power of sin and death, nor to escape the wrath to come, being ignorant of Him that saveth from it, which is Christ, the Power of God, that lighteth every man which cometh into the world, which con-

demns sin in the flesh. But now I see, that people perish for lack of knowledge, and that the leaders of the people cause them to err, and they that are led of them are destroyed. For nothing will help or satisfy the longing soul immortal, but the eternal true bread of life, the Power of God, which He giveth to as many as receive Him, that condemn us for sin and destroys the works of the devil.

"Having in measure begun to leave the priests, I kept at home, not desiring for a season to hear any, but to be private and quiet alone, which was a great cross to my parents, wife and relations. I found it hard to break the customs that I had lived in, and to become contrary to all my neighbors, and to become contrary to the love of them acquaintance, and to lose the love of them therein hammering down the hardness thereof, and rending the veil that separated me from peace with God; not knowing [it was] Christ within the hope of Glory, which lighteth every man that cometh into the world, whose name is called the Word of God, the Lamb slain from the foundation of the world, the Holy One in the midst, whom my soul loveth, which hath been pierced, wounded, and as it were slain by that which was against the soul, but now is Lord of lords and King of kings.

"Now in those days, when I had ever resolved never to hear the priests, as to be a follower of them any more, yet being out of my outward employment, and for fear of their losing all, I, through persuasions of the serloping all, and of others without, did hear them again, lest I should anger me; but I went to employ me and condemned by God's witness in me, which before had let me see the deceit of the priests, and the vanity and error of their worship and ways. So in process of time I went into France, two small voyages, where having time, the serpent led out my mind wholly to delight in the art of arithmetic and the study of navigation, which I saw I might in short time attain (being acquainted with number, things which is the ground of many arts,) which things took me up into an exceeding high mountain, showing glorious promises of the preferment, riches and love of the world, and respect among men. The spirit of the world I let in again like a flood, and shaken, and the had been in some measure removed the earth that lay upon the precious seed removed by the power of God, and gross darkness again covered my soul, and veiled its life and peace from it, which formerly it had felt and breathed after. Yet in that time I was in France I was so much in the fear of God kept, by his pure witness, the Light in my conscience, which showed me sin and evil, that I dared not act such wickedness as the Temple would have led me to. After a while, when I was in the midst of my vain thoughts and imaginations, how to build great things in the earth (to become rich, knowing and honorable therein, in praise of men), a sudden stroke like a cloud came upon it, and I was struck with a still silence in my mind, where-

in I saw that I strived and wearied myself for every vanity that would perish with the using, and that I like a fool might leave them in the midst of my days. So, as I gave heed to that which let me see these things to be but as a shadow, and that it was folly so eagerly to pursue that which made themselves wings, and thereby to be beguiled of an eternal crown of rest to my immortal soul; my former condition came fresh into my remembrance, and I began to be troubled and condemned in myself.

"Then not knowing what to do for life, I went among the people called Baptists. Yet I was no more bettered nor satisfied by the water, after I came to God's witness in me in the cool of the day. I had no true peace, when all was performed and done by which I thought to obtain. So, after a season, in this my breathing and longing condition, it happened that I heard a book read of the sufferings of some of the people of God (who were called Quakers) in a dungeon at Suesham, whose name and sufferings were strange to me at that time; yet, at the hearing of it, something in me did arise, with much tenderness and pity toward the innocent, suffering people, which drew tears from mine eyes, believing that they did suffer for conscience sake; and the same thing in me even said, 'That God would avenge them on the bloody persecutors (which hath been performed by his mighty hand of power on some of them, even to the cutting them off the earth, as briars and thorns for the fire); but did not know all this time what it was that let me see these things, and knew not light from darkness, as is the state of thousands who profess Christ (as I did in words).

"But not long after came one, a minister of the Word of life, and preached to the spirit in prison, which rejoiced much at the sound of his words, to which I gave diligent heed, and was eternally convinced, that it was the very truth he declared, and that there is no other way to know God (or to be saved), but as I walked in the Light which I was lighted withal, which did let me see all my ungodly deeds and hard speeches, that ever I had committed; which light comes from Christ, the Saviour, and leads all that follow it out of the evil that is in the world unto Him that was before the world was, by whom it was made.

"So, as to the true Light in my heart my mind was turned, many scriptures came fresh unto me, confirming the truth of which he spoke, and the power of the Word in my heart began to stir and work, and condemnation was administered upon all my former profession. I was made to weep and lament, seeing all the religion in the world to be but a fading leaf without the pure life and power of God, which saveth from sin and brings into unity with Him; so that I could no longer be satisfied nor live in a talk of God and Christ, and not enjoy the eternal rest, even the sincere milk of the immortal Word of life, which my soul breathed after, even from a child, though I knew not what it was, nor where to find it. But in this my troubled condition many Baptists followed day and night to persuade me out of it, looking upon me to be deluded, telling me, that I was fallen from grace and was become under the law, and making the blood of Christ of none effect: who by their many words drew out my mind from God's witness in me, and from the law

written in the heart, to which I should have kept and been faithful. I joined again with them in more zeal than before, and encouraged others to follow their strong imaginations from the letter of scripture looking for a Saviour without us, though the Scripture saith 'Christ within the hope of glory;' and 'Know ye not that Christ is in you, except ye be reprobates,' &c.

"When I, being unsatisfied, came from the Baptists again, resolved with purpose of heart to wait on the Lord, whatever became of all the world, their glory, profession or emnity, for a word was powerful in me (seek first the kingdom of God) to which I gave heed, and turned my mind again to the Light which had checked me for sin from my childhood; all that ever I had acted or spoken out of the Light was judged, cursed and condemned, unto Zion [was] redeemed with judgment.

"Therefore all people upon earth, turn your minds to the Light wherewith you are enlightened by Christ Jesus the Saviour. This is He who hath led me out of the world through great tribulations, unto the good land of rest; glory to Him that sits upon the throne and unto the Lamb forever and ever!"

(To be continued.)

"FAITH."

Restless, and oft complaining, on his bed
Tossed a fever child, as burned along his veins
The fire of fever with consuming pains;
And ever and anon he raised his head
From the hot pillow, and beseeching said—
"Water; oh, give me water!" By his side
The healer stood, and tenderly replied—
"Wait yet awhile—this potion take instead."
"No," cried the child—"tis poison and will kill!"
His father took the cup—"My son, be sure
This is a noxious draught; but if my cure—
"Will it not do you good?" Then said he—"I will—
I'm not afraid 'tis poison now—I know
Thou would'st not give it, father, were it so."

Oh, trusting childhood! I would learn of thee
This lesson of pure Faith, and to my heart
So hid it that it never may depart.
Therefore shalt thou henceforth my teacher be;
For in thy perfect trust the sin I see
Of our own doubts and fears. The cup of Life
Dugged with the bitterness of tears and strife
Shall I not drink it when 'tis proffered me?

Yes—for 'tis mingled by a Father's hand
And given in love, for, rightly understood,
Trials and pains tend ever to our good.

Hearing the soul that for the better land
Thirsts with a deathless longing! Welcome pain,
Whose end is bliss and everlasting gain!

The same everlasting power which preserved the righteous in all past ages out of evil, and from falling into temptations, is now revealed and witnessed in this our day and age. Therefore it is a blessed thing to be truly acquainted with this power, and always to live in the sense of it; for it is possible for people to come to the knowledge of this power, and make a profession of it, and witness salvation and redemption by it, in a great measure; yet, if they wait not low in their minds, till it has fully wrought the work of salvation and redemption in them, or wholly brought every thought and imagination into the obedience of Christ, subdued their own wills and selfish spirit, and known self made of no reputation and nailed to the cross; I say, without this, they may fall into the snare of the devil again, be captivated and led into temptation again; for it is about such the tempter and destroyer goes, like a roaring lion seeking to devour, even those, out of whom he hath been cast and dispossessed. It is written, "He

rules in the hearts of the children of disobedience." He needs not go about such, he got within them: there he is on his throne.

But it is about the righteous, out of whom he hath been cast, he goeth, who are redeemed from under his power, and translated out his kingdom; it is against such he appears not only like a roaring lion, but as a serpent, and angel of light.—William Shew

Reward of Truth Telling.

Employed by a large commission firm New York city, during the late civil war, was a young man, to whom the following incident relates:—

The firm sent the young man to negotiate with a certain party for a large quantity of damaged beans. The beans were purchased, delivered, and spread out upon the upper floor of the building occupied by the firm. Men were employed to turn them over and over, sprinkle them with a solution of soda, so to improve their appearance and render the more salable. A large lot of the first quality of beans was then purchased; some of the good beans were first put into the barrels then the barrels were nearly filled with the poor ones; after this the good ones were again put on top, and the barrels headed up for sale.

The employer marked the barrels "Beans—A 1." The clerk, seeing this said: "I you think, sir, that it is right to mark those beans A 1?"

The employer retorted, sharply, "Are you head of the firm?"

The clerk said no more. The barreling and heading went on. When all was ready, the beans (many hundreds of barrels) were put on the market for sale. Specimens of the best quality were shown in the office, to buyers.

At length a shrewd purchaser came in (a man so sharp in business but he will often meet his equals), examined the sample in the office, inquired the price, and then wished to see the stock in bulk. The clerk was ordered to go with the buyer to the upper loft and show him the stock. An open barrel was shown, apparently of the same quality as the sample. The buyer then said to the clerk, "Young man, the sample of the beans show me are of the first quality, and it is impossible to purchase such beans anywhere in the market for the price at which you offer them. There is some wrong here. Tell me, are these beans the same quality throughout the barrels as they appear on the top?"

The clerk now found himself in a strange position. He thought, "Shall I lie for my employer, as he undoubtedly means I shall or shall I tell the truth, come what will?" He decided for the truth, and said, "No, sir they are not."

"Then, said the customer, "I do not want them," and he left.

The clerk entered the office. The employer said to him, "Did you sell that man those beans?"

He said, "No, sir."

"Why not?"

"Well, sir, the man asked me if those beans were of the same quality through the entire barrel as they appeared on top. I told him they were not. He then said, 'I do not want them,' and left."

"Go to the cashier," said the employer "and get your wages; we want you no longer."

received his pay and left the office, reeling that he had not lied for the purpose of fitting the sordid avariciousness of a degrading and unprincipled employer.

Three weeks after this the firm sent another young clerk, entreated him to come back into their employ, and offered him three hundred dollars more salary per year than had before given him; and this was his wisdom rewarded. The firm knew and that the man was right, although they apparently lost largely by his honesty, wished to have him again in their employ, because they knew they could trust him, never suffer through fraud or deception. They knew that their financial interests would lie in his custody. They respected, they loved that young man.

And thus we learn from this authentic and true the power of truth; how it puts to flight those who despise it; while it gives all power, elevation and refinement to those who practise it.—*Little Gleaner.*

Selected.

Testimonies to the Way to Salvation.

The epistle issued to our members by the Society for Sufferings of Philadelphia, in 7th mo. 1827, designed to put them on their feet against the efforts then being made to separate in the Society of Friends, as from William Penn to show what kind of people the early Friends were, and goes on as follows:

Thus through unreserved obedience, and in mere notion and profession, but having experienced the saving efficacy of that which lighteth every man that cometh into the world, they were prepared and sent forth to proclaim the mighty day of the Lord to turn people from darkness to light, and to the power of Satan unto God. They did not forth or preached in their own time will, but in the will of God; and spoke not their own studied matter, but as they were moved and moved of His Spirit, with which they were well acquainted in their own conviction. "The bent and stress of their ministry was conversion to God, regeneration and holiness." And, as the blessed means provided for this end, they directed people, according to George Fox's own language, "To Divine Light, which Christ, the heavenly spiritual man, enlighteneth them withal; that with that Light they might see their hearts, and that they were in death and darkness, and without God in the world, and might see Christ from whom it cometh, their Father and Redeemer, who shed His blood and died for them; who is the way to God, Truth and the Life; 'their Mediator to peace between God and them; their prophet to feed them, and their Prophet to rebuke them.'"

In an epistle issued by Philadelphia Meeting for Sufferings, 8th mo. 15th, 1834, to guard members of Society against being engaged in the political commotions of the day, it occurs this passage:

"We believe the call of the Lord to the members of our religious Society is, to withdraw, in a greater degree, from the pursuit, even from the desire of accumulating wealth—from the surfeiting cares and pleasures of the world, its maxims and policy, and to assemble to gather to the teachings and reproofs of His Spirit, clearly made known in His heart. To this Divine Leader our primi-

tive Friends were gathered; by it they were made quick of understanding in the fear of the Lord, and wise in things pertaining to the heavenly kingdom. It was this which opened the Scriptures, and prepared them, from living experience, to bear those precious and unchangeable testimonies to the truths of the Christian religion, which have exerted an extensive and salutary influence in the world."

An epistle of Philadelphia Meeting for Sufferings, 8th mo. 15th, 1834, thus refers to an English work entitled "A Beacon to Friends."

"In one particular, it presents a perverted view of the doctrine of this Yearly Meeting, in saying, 'We unite with the Yearly Meeting of Philadelphia in believing that the *unscriptural notion of the Light within*, being the primary rule of faith and practice, lay at the very root of Hieckism; and that the depreciation of the Scriptures (or as it was artfully termed, setting them in their right place), followed as the baneful and inevitable consequence.'"

"No such sentiment has been entertained or promulgated by our Yearly Meeting; on the contrary, we have always held, firmly believed and fully stated in our several declarations, that in the Word or Son of God, was life, and the same life was the light of men; and that He was the true Light which enlightens every man coming into the world; and therefore that men are to believe in the Light, that they may become the children of the Light. That where the least degree or measure of this Light and life of Christ within is sincerely waited in, followed and obeyed, there is a blessed increase of light and grace known and felt; as the path of the just, it shines more and more until the perfect day; and thereby a growing in grace, and in the knowledge of God, and of our Lord and Saviour Jesus Christ, hath been and is truly experienced. That to follow this holy Light in the conscience, and to turn our minds, and bring all our deeds and thoughts to it, is the readiest, nay the only right way, to have true, living and sanctifying faith in Christ, as He appeared in the flesh; and to discern the Lord's body, coming and sufferings aright, and to receive any real benefit by Him, as our only sacrifice and Mediator. And in the year 1829, we united with all the other Yearly Meetings on this continent, in the testimony that 'The Light of Christ in the heart, is an unerring guide, and the primary rule of faith and practice—that it is the only medium through which we can truly and livingly attain to the knowledge of God, and the mysteries of His heavenly kingdom.'"

For "The Friend"

These lines were written by a man in New Jersey that had read George Fox's Journal. His feelings were so reached by it as to go to a neighboring town, Newark, and inquire where he should find the followers of George Fox. They directed him to Rahway; he went and sat with Friends three silent meetings, returned home, and sent the following:

To the little Rock of Christ in the town of Rahway, greeting.

There have fears arisen in my mind that there are some who are unfaithful in the time of your silent waiting before the Lord. There is a careless silence which is easily attained; but the silence that God requires is attained by great wrestling against every motion of the enemy, wherein he striveth by every art

and cunning to keep Christ out of our hearts, and like the flaming sword turns every way to keep the way of the Tree of Life.

The Apostle Paul exhorts Timothy to stir up the gift that was in him, and if we would have the gift of the Holy Ghost stirred up in us, we must strive constantly and earnestly against every unnecessary thought. "Ye have not resisted unto blood, striving against sin," saith the apostle. This striving, wrestling, and resisting of sin, and all the powers of darkness, must be kept up till sin be slain, keeping the eye of our mind steadily towards God, till he graciously please to bind the strong man, and our minds become the peaceable habitation for God alone to dwell in. And finally, I exhort you all to be faithful with all diligence, and in so doing (if you so continue), I make no doubt God will bless you with an increase of heavenly treasure, which is the earnest desire of your sincere friends,

JOSHEP SAMIS.

For "The Friend."

The Chinese in California.

[A subscriber to this journal, residing in California, not a member of the Society of Friends, has forwarded the following article, which we publish in the belief that the observations upon the conduct and character of this people, as they have come under his notice during a residence of ten years among them, will be of interest to our readers.—Eds.]

"The Friend" of 2nd month 22d, reached here in due time last night. I was pleased to read the editorial therein on the Chinese question, and thereby to find that Friends still continue to stand firm in the defence of the poor and the oppressed everywhere. "Blessed is he," saith David in the 41st Psalm, "that considereth the poor." * * * "The Lord will preserve him and keep him alive, and he shall be blessed upon the earth."

The first Chinese that I ever saw at work was a gang of them on the railroad, near the summit of the Sierra Nevada Mountains, in 1869; these men seemed to be the very embodiment of patience; a fire had got into the snow-sheds and had burned down two miles of them. As soon as the passengers who were stopped on each side could venture across for the smoke and heat, they did so; but the Chinamen were ahead of us with pick and shovel, removing pieces of burnt ties and crooked rails, with an apparent coolness that I was not used to see among such laborers, and especially under such circumstances. To this day, my first impression as then received in regard to their patience and docility has not been altered. It appears that the Central Pacific Railroad Company finds them more profitable employes than white men, notwithstanding the fact that much of their property is burned yearly by incendiaries on account of this preference for Chinamen. The fire above-mentioned was thus occasioned.

A Chinaman and a white man should not generally be put to do the same piece of work; their notions are not alike, and they do not pull together. The style of cooking and manner of eating of the Chinese are very different from ours. They sleep in their clothes, on a board, with a blanket, and sometimes a block of wood for a pillow. This kind of a bed they prefer, as they use it where hay, straw, and shavings are plenty. In houses where they are hired to cook (and many of them can prepare the best dishes) they still prefer to cook

in their own way what they eat themselves, and to sleep in their own style—completely wrapped up in the blanket.

It is apparent from the above facts that there will be a disagreement between the two races in regard to their mode of eating, drinking and sleeping. As regards drinking they differ widely in the use of intoxicating drinks. I have never seen a drunken or even a slightly intoxicated Chinaman.

In the laundry business there is no doubt that the Chinese excel. Were you to go into one of their wash-houses on an afternoon when the articles to be washed are collected and lying together on the floor (and they for quantity might be measured by the cord) and hand to the man in charge some wearing apparel or a pocket handkerchief, he will put a small tag of cotton cloth on each, call them off to the book keeper, who notes them down with his stick (they use no pen), and then, if you wish, will give you a ticket, a very small piece of paper, with a Chinese character or two on it. They never ask for your name. Your clothes are then thrown on the heap. On the day appointed, if you call, they will be immediately handed you, nicely done up. I have known several instances in which articles of considerable value, such as gold buttons and pins, went through the wash and were again returned with the clothing.

In this neighborhood, at present, there are many more Chinamen than white men. There is quite a village of them within half a mile of the mill; yet so secure do we feel that we never think of locking up a tool at night; axes, crowbars, saws, and even workmen's clothing are all left in the open mill, when work for the day is stopped. This I have witnessed for about three years, and I have never yet heard of any thing being lost, and we keep no night watchman. Yet there is no doubt but there are dishonest Chinamen, and men who are guilty of every crime, even murder, and many of them are inmates of our State prison. But such are greatly in the minority among them; and I am led to believe from casual observation, that a much smaller percentage of these heathen are incarcerated in our prisons, than there are of our Christian, civilized white men. And if the former were as ably defended in our courts of justice, when indicted for crime, as are the latter, there would be fewer still.

The Chinaman is naturally social with his white neighbor, on points where both agree. Our children when going into their stores, will generally be treated with candy, or if a man comes in where cigars are kept, they will offer him a cigar. On their New Year's day the laundry men have a present for all their patrons. Families for whom they wash will generally get something really useful. They are not a stingy people by any means.

I know not to what extent opium smoking is carried on among them, having never witnessed any evil which might have been caused by it, but no doubt, from what we read, it has a deadly grip on many of them, and it is sad to think that a Christian nation has entailed this curse upon them.

In a town I have had occasion to pass through they had an idol temple or Joss House, and had come into possession of good houses, built by white men, which, I am sorry to say, soon went to decay in their hands. Clean and neat as these people are in the white man's kitchen, or in washing and iron-

ing the white man's clothes, yet their own houses are very dirty and badly kept.

The Chinamen are generally anxious to learn our language and read our books. On this account many well-meaning people undertake to teach them gratuitously in our Sunday-schools. One teacher generally takes two scholars, and sits down between them. In such a case it is always best to have two who are equally advanced, then one book held by the teacher and all look on the one lesson, and study that during the hour or so thus devoted to that kind of school. Both men and women in our cities and towns engage in this kind of work, and I doubt not but many are led, even through this simple exercise, to find their way to the true Teacher, who teacheth as never man taught.

I was led to visit one of these schools some three years ago, in the City Hall, Marysville. There might have been twenty or thirty present. At the close of the lessons, one Chinaman, dressed in complete Chinese costume of the lower rank, stood up in front, and took a New Testament from the pocket of his blouse and read some therefrom in Chinese, and then commenced to preach to us, and as he proceeded his countenance seemed to become illuminated with a glow not easily described. Yet methinks the Christian reader has often witnessed such an appearance on the countenance of such as the Lord has anointed with his holy oil, and sent forth on his errands of love and mercy. As the preacher went on every eye was firmly fixed on him, and I think that every heart was moved. Although I understood not a word of the language in which he spoke, yet was my spiritual ear opened so that I understood him well, and felt a union with him, which I have seldom felt in my former years; although, according as men judge, I have heard many better gifted. Truly this man spoke in the demonstration of the Spirit and with power. Here methinks is the mystery somewhat cleared of the multitude on the day of Pentecost each hearing the gospel in his own tongue wherein he was born. I have often thought that this was the best sermon I have heard since coming to this coast. At the close we both shook hands, but as he understood but a very little English we could not hold any conversation.

Another day, when in Marysville on coming home to dinner, my wife said that a Chinaman had shortly left the house who had called to see if any Chinamen lived with us. He could speak English well, and told her that he was visiting every house in the city in order, if possible, to stimulate his countrymen to seek their souls' salvation, through that one only medium between God and man, Christ Jesus, or words to the same effect. I told her that I believed it must be the same man that I passed on my way home, who looked me so straight in the face in such a pleasant way that I felt almost impelled to speak to him. After dinner I went back to try to find him, but he was gone.

At another time in the same city, I met another whom the Lord had called and sent forth to gather his countrymen into the fold of the Good Shepherd. From him I could learn that these devoted men were almost constant sufferers for the cause of Christ. Beware are they truly of a daily cross, which the natural man surely would shrink from. They are hated by their own countrymen

because they have become Christians, they are hated by the white people because they are Chinamen. And thus they have come as the offscouring of all things to men, save to those few who travel the narrow way with them, being baptized into the Spirit. "Truly the seed of God is a sower seed."

Let these instances suffice to show that the Lord hath raised up a living ministry among these despised heathen of their ownset men who count not even their lives dear unto them, that they may win souls to Christ. Often have I desired to have a few numbers of Friends' Tracts translated into Chinese circulation amongst this people, for the measure told, can all read. These tracts would be the only ones I would feel free to circulate, as they all go to show a need of a change of heart, a death unto all within us that hinder the full insinuating of the Holy Ghost, the Spirit of Him who created us, and died to redeem us, and renew our bodies for his temple and place of abode. A head knowledge of which truths, and an outward faith can never avail to the sanctifying of the soul. Should any reader of "The Friend" or other feel inclined to furnish such publications, the writer would be well pleased to assist in the circulation of them gratuitously to the utmost of his ability, as the Lord may be pleased direct.

It is to me no wonder that the Chinese their natural and unrenewed state should be led to hate those of their own people who embrace the religion of those who so cruelly persecute them. See what cruel threats were made against them in our public prints: from the stands of political speakers, as well as in the halls of our Legislative assembly. Our last Legislature passed a law that the dead bodies should be disinterred for removal to another country without a license, which costs many dollars. This strikes directly the Chinese, as all their dead are removed after a certain time to China.

When the Foreign Miners' License Law was in force, the sheriff, with his deputies used to sally forth, each armed with a revolver, and what is called a black-snake which through the many districts of their count they went to the poor Chinaman who had license with him, nor money to buy one.

I remember seeing a wash-house on one of the principal streets of San Francisco, whose front windows were closely boarded up, excepting about six inches from the top, in order to keep the workmen from being struck with missiles. Also, on another principal street passed a store where the whole glass front, all appearance, was riddled with stones, a yet inside at the time I passed, there were perhaps ten or fifteen Chinamen at work making shoes.

One Sunday afternoon, in August, 1875 was on Second street, in the same city. A ship had just arrived from China with passengers. The poor helpless creatures were finding their way along this street to the Chinese part of the city. They were coming along in groups of a dozen or so; each with his bamboo stick and his baggage swinging from each end. But as they passed a certain alley, about a dozen boys and young men would rush out upon them, pelt them with missiles, knocking many of them down, depriving them of their little bundles of clothing, and scattering it to the wind that was blowing a stiff gale at the

all this would be done in less time than would take me to write it, when they would eat to the alley to get ready for another race, leaving the poor creatures to pick up after they could of their little property, and so on. Let this suffice to show what appears to be the reason why the Chinese not, in their natural state, form any favorable opinion of a religion whose professors do as deeds.

It is to think that we, as Christian people, should allow such things to be done amongst us. As a State and as a nation, we have to answer before a tribunal from which there is no appeal, for our treatment of the poor Indian and the Chinaman. Why that we will not learn a lesson from what so lately befallen us because of our opinion of the negro.

T. D.

Upper Mills, Cal., March 5th, 1879.

Selected.

is of one nature all the world over; for though a liar is not a drunkard, nor a swearer a thief, nor either properly a murderer; yet you are all of a church; all branches of the wicked root; all of kin. They have but one father, the devil, as Christ said to the fessing Jews, the visible church of that time. He slighted their pretensions to Abraham and Moses, and plainly told them, he committed sin, was the servant of sin, why did the devil's works, and therefore he was the devil's children. The argument I always hold upon the same reasons, and before is good still. "His servants you" saith Paul, "whom you obey;" and John to the church of old; "Let no deceive you, he that committeth sin, is the devil." Was Judas a better Christian crying, Hail, master! and kissing Christ? no means. These words were the signal of his treachery; the token given by which bloody Jews should know and take him, called him Master, but betrayed him. He sed, but sold him to be killed. This is the lot of the false Christians' religion. If a ask them, is Christ your Lord? they cry; God forbid else. Yes, he is our d. Very well, but do you keep his commandments? No, how should we? How an are you his disciples? It is impossible, they. What! would you have us keep commandments? No man can. What! is nossible to do that, without which Christ h made it impossible to be a Christian! Is rist unreasonable? Does he reap where as not sown; require where he has not bled? Thus it is, that, with Judas, they him Master, but take part with the evil he world to betray him; and kiss and orace him, as far as a specious profession s; and then sell him, to gratify the pas- they most indulge. Thus, as God said of they make him serve with their sins, and their sins too.

Let no man deceive his own soul; grapes not gathered of thorns, nor figs of this- "a wolf is not a sheep, nor is a vulture ove. Whatever form, people, or church an art, it is the truth of God to mankind, at they who have the form of godliness, by their unmortified lives deny the power of, make not the true, but false church: igh though she entitle herself the Lamb's ie, or church of Christ, she is that mystical ysterious Babylon, fitly called by the y Ghost, "the mother of harlots, and all

abominations;" because degenerated from Christian chastity and purity, into all the enormities of heathen Babylon; a sumptuous city of old time, much noted as the seat of the kings of Babylon, and at that time a place of the greatest pride and luxury. As she was then, so mystical Babylon is now, the great enemy of God's people.

True it is, they that are born of the flesh, hate and persecute them that are born of the Spirit, who are the circumcision in heart. They cannot own nor worship God after her inventions, methods and prescriptions, nor receive for doctrine, her vain traditions, any more than they can comply with her corrupt fashions and customs in their conversation. The case being thus, from an apostate she becomes a persecutor. It is not enough that she herself declines from ancient purity; others must do so too. She will give those no rest, who will not partake with her in that degeneracy, or receive her mark. * * * * So that though the unrighteous latitude of their lives be matter of lamentation, as it is of destruction to themselves, yet the false notion, that they may be children of God, while in a state of disobedience to his holy commandments; and disciples of Jesus, though they revolt from his cross; and members of his true church, which is without spot or wrinkle, notwithstanding their lives are full of spots and wrinkles; is, of all other deceptions upon themselves, the most pernicious to their eternal condition. For they are at peace in sin, and under a security in their transgression. Their vain hope silences their convictions, and overlays all tender motions to repentance; so that their mistake about their duty to God, is as mischievous as their rebellion against him.—H. Penn.

How Raisins are Prepared.—A strip of land bordering on the Mediterranean, somewhat less than 100 miles in length and in width not exceeding five or six is the raisin producing territory of Spain. Beyond these boundaries, the Muscatel grape from which the raisin is principally produced, may grow and thrive abundantly, but the fruit must go to market or the wine press. When the grapes begin to ripen in August, the farmer inspects the fruit as it lies on the warm, dry soil, and one by one clips the clusters as they reach perfection. In almost all vineyards shafts of masonry are prepared, looking like unglazed hot-beds, and covered with fine pebbles, on which the fruit is exposed to dry. But the small proprietor prefers not to carry his grapes so far. It is better, he thinks, to deposit them nearer at hand, where there is less danger of bruising, and where bees and wasps are less likely to find them. Day by day the cut branches are examined and turned, till they are sufficiently cured to be borne to the house, usually on the hill-top, and there deposited in the empty wine press, till enough have been collected for the trimmers and packers to begin their work. At this stage, great piles of rough, dried raisins are brought forth from the wine press and heaped upon boards. One by one the bunches are inspected, those of the first quality being trimmed of all irregularities, and imperfect berries, and deposited in piles by themselves; so in turn are treated those of the second quality, while the clippings and inferior fruit are received into baskets at the feet of the trimmers and reserved for home consumption. A quantity

of small, wooden trays are now brought forward, just the size of a common raisin box, and about an inch deep. In these, papers are neatly laid so as to lap over and cover the raisins evenly deposited in the trays, which are then subjected to heavy pressure in a rude press. After pressing, the raisins are dropped into boxes for market.—Scientific American.

Concerning Love.

Question. Which is the true love?

Ans. The love which ariseth from the nature which God begets, and from this circumcising the heart from the other nature. Love is the beautiful thing. What can be higher expressed concerning God himself, than to say He is love? Love is greatly commended and admired, and there are many pretenders to it; but none have the true love, but only those that are born of God, and circumcised by him. "The Lord thy God will circumcise thine heart, and the heart of thy seed, to love the Lord thy God with all thine heart, and with all thy soul, that thou mayest live." Dent. xxx. 6. Mark; the true love ariseth from the true circumcision; and the more a man comes to have his heart circumcised from the fleshly nature, and to grow up in the pure and heavenly nature, the more he loves. God is love; and the nigher any one comes to him, and the more he partakes of him, the more he becomes love in the Lord, and the more he is taught of God to love the Lord his God, and his brethren in the Spirit, and all mankind, who are of his blood (for of one blood God made all mankind) according to the flesh, or according to a natural consideration.—Isaac Pennington.

My heavenly Father has been pleased of late in retirement, to clothe me more and more with ability to pray, not only on account of the many evils that are in the world, but for His little ones wherever scattered; and for ever blessed be His great and adorable name, to pray for one who seemeth to need help more than they all—even for myself; whose backslidings cannot be numbered for multitude, and whose sins and transgressions are more than the hairs of my head, twice told; whose day's work is drawing fast towards a close,—yea, the shadows of the evening are beginning to appear. Can it be anything but Almighty love, that thus awakens and makes sensible a poor frail mortal? "As an eagle stretcheth up her nest, fluttereth over her young, spreadeth abroad her wings, taketh them and beareth them on her wings,"—thus preparing them for flight; so doth a compassionate and ever merciful Lord God nourish, cherish, and strengthen in the tenderest manner, his unworthy and often ungrateful children. How often would He gather them;—but oh! they will not. How often in love unutterable doth He strive to save, by convincing their understandings in the most indubitable manner, that "There is a reward for the righteous, and a God that judgeth in the earth," and, unwilling "that any should perish, but that all should repent, return, and live;" how often doth He alarm and shake the false rest of those, who are dwelling carelessly and at ease, and thus warns them of the uncertainty of their continuance here. By His judgments, all in mercy and in truth, how often doth He fill our hearts with sorrow, which worketh repentance never to be repented of, to reduce

and bring us into humility; that He may draw us nearer and nearer into acquaintance with Him, in whom humility and meekness are personified;—who said "No man cometh unto me, except the Father, which hath sent me, draw him;—no man cometh to the Father, but by me;—him that cometh to me, I will in no wise cast out."—*D. Wheeler.*

In general those whom God intends for the service of others, he gives to feel, as they are able to bear it, the bitterness and the desert of sin, before he shows them his salvation, that being feebly acquainted with the wretchedness of an unregenerate state, they may be the better capable of sympathizing with, and counselling others in like circumstances; and be quickened in their endeavors of saving souls from death.

There are diversities of operations, but the same Spirit, and these operations are proportioned to the different capacities of His children, and various circumstances of time, age, and education.

THE FRIEND.

THIRD MONTH 29, 1879.

SUMMARY OF EVENTS.

UNITED STATES.—The extra session of the Forty-sixth Congress commenced on the 18th. In the House Samuel J. Randall was re-elected Speaker. President Hayes sent in his message, which was brief, simply stating the purpose for which the session had been called, viz., to pass the necessary appropriation bills, which the previous Congress had failed to do. At a conference of the Democratic committee, held on the 22d, it was decided that the political legislation desired by the majority, should be incorporated in the appropriation bills. The question of restricting the business of the session on these bills was discussed but not decided.

The bill making Wilmington the capital of New Castle county, was finally passed by the Delaware Legislature on the 20th inst.

From the annual report of the Secretary of the Connecticut State Board of Education, it appears the amount expended for the public schools last year was \$1,509,158.85, being a decrease of less than \$4,000, while the amount received from all sources was \$1,509,158.81, or an increase of nearly \$3,000. There are 1,947 public schools in the State. An indication of the rapid growth of the school system in Connecticut is shown in the fact that the amount raised by taxation for schools ten years ago was \$628,151.12, while that raised last year was \$1,252,248.63.

The total value of cotton goods manufactured in New Hampshire in 1878, was \$9,688,500; of woollen goods \$9,222,000; of boots and shoes \$11,700,000; of leather, \$6,174,900. The grand total of all manufactures was over \$96,000,000.

The total "log cut" of Michigan this winter aggregates 2,404,267,465 feet.

The largest oil still in the world is said to be the Amoco Oil Refinery, at Titusville, which has a capacity of 3500 barrels.

Serious prairie fires have recently devastated a tract ten miles long and three miles wide, in Republic and Cloud counties, Kansas. One hundred dwellings were destroyed, besides out buildings, grain, farming implements, &c., and the people had to seek refuge from the flames in cellars and excavations.

An enterprise has been begun in the State of Colorado, which, if successful, is expected to irrigate and make productive 70,000 acres of land. For this purpose a ditch is to be constructed from a point in the Poudre river, in a north-east direction, to Crow creek a distance of seventy miles; the ditch will be thirty feet wide and five feet deep. The soil of this desert, as it has been called, is said to be well adapted to growing small grain, when sufficient water can be obtained.

A panic having been threatened in New Orleans, following the suspension of the Southern Bank, the Mechanics and Traders' Bank, and two savings banks, all the other banks of that city, thirteen in number, com-

posing the Clearing House Association, agreed on the 20th not to pay out on checks more than \$200 to any one depositor, on any one day until the 29th inst. A large amount of currency is on the way from New York to New Orleans, which is expected to relieve the embarrassment. Accounts from Memphis and St. Louis state there has been no serious disturbance of business in those cities.

The *New York World's* estimates of the shipment of American wheat to Europe during six months previous to the 31st of the amount yet retained, are interesting. Taking its estimates as approximately correct, they give us cause almost to wonder at the great strides this country has made in competing with other nations in supplying bread for the hungry of Europe. Its estimates are that we have shipped 75,000,000 bushels, reducing flour to the bushel measure; and that we have yet 45,000,000 bushels for export. Of the amount shipped 32,000,000 went to the continent, and 20,000,000 to England. Reports are that the promises for the coming crops are not very flattering. Accounts from Great Britain and Western Europe are called indifferent; while the progress of the plague catches alarm, and if it progresses westward to any considerable extent, must inevitably sweep off from European markets much of the supply usually received from Russia. From these circumstances it appears probable that American wheat will be in demand at satisfactory prices.

The mortality in New York the past week was 623. In Philadelphia 278. Of whom 159 were aged and 119 children—52 being under one year of age.

Markets, &c.—W. sixes, 183, 104; do. 3's, 104, 4 1/2; registered, 104; do. coupon, 104; 4's, registered, 98 1/2; do. coupon, 99; 5-20, 1867, 102; do. 1868, 102.

Cotton.—Sales of middlings at 104 1/2 cts. per lb. for uplands and New Orleans.

Petroleum.—Crude 8 & 1/2 cts. in barrels, and standard white, 9 1/2 cts. per cwt; and 10 1/2 a 11 cts. per gallon for the best. Lard, 25 a 26 cts. per lb.; Lined, 61 a 62 cts. from American seed, and 62 a 63 cts. from Calcutta seed. Crane sperm, 85 a 88 cts., and refined \$1.02 a \$1.05 per gallon.

Flour.—Minnesota extra, \$1.50 a \$1.75; Penna. and Ohio extra family, \$4.50 a 5; fancy, \$5.20 a \$5.25; patent, \$7.25 a \$7.75; other high grades, \$7.75 a \$8.25; Fresh Fruit (No. 1), \$1.87 1/2. Corn meal, \$2.50. Bran sells at \$1.50 a \$15 per ton.

Grain.—Wheat was a fraction lower—Delaware winter, \$1.14 a \$1.14; western red, \$1.13 a \$1.13; white, \$1.16, 1/2. Eye, 55 a 57 cts. Corn, 43 a 43 1/2 cts. Oats, mixed, 31 a 32 cts., choice white, 33 a 33 1/2 cts.

Seeds.—Clover 3 a 6 cts. per lb. Flaxseed, \$1.42 a \$1.48; Timothy, \$1.40 a \$1.50 per bushel.

Fresh Fruit.—Chestnut, \$2 a \$2.25; Apples, \$1.65 a \$1.80; choice Greenings, \$2 a \$2.25; Rox. Raisins, \$1.75 a \$2. Cranberries, \$7.50 a \$9 per bin, and \$2.25 a \$2.75 per crate.

Hay and Straw.—Average price during the week:—Prime timothy, 60 a 70 cts. per 100 pounds; mixed, 45 a 50 cts. per 100; 70 a 80 cts. per 100 pounds.

Beef cattle were in better demand, and prices a fraction higher: 2400 head arrived and sold at prices a fraction for extra Pennsylvania and western steers: 41 a 51 cts. for fair to good, and 3 a 4 cts. per lb. gross for common Sheep were in fair demand, selling at 31 a 4 cts. for common, and 51 a 6 cts. for good to choice. Hogs, 6 a 6 1/2 cts. per lb. as to condition.

The *Commercial Bulletin* of the United States bonds were quoted on the 31st inst. at 109 1/2 for the 5's, 103 1/2 for 1867's, 102 1/2 for the 10-40's, 107 for the 4's, and 101 1/2 ex coupon for the 4's. The *Pall Mall Gazette* says, "Trade generally is notoriously dull. The Eastern trade in particular has been in collapse for years."

The tariff bill lately passed by the Canadian Government, is very similar in its details to the House of Commons on the 29th, John Bright introduced a question whether the instructions to the Marquis of Lorne omitted the clause requiring that bills imposing differential duties should be reserved for royal approval. The Colonial Secretary replied, that the financial policy of Canada, subject to treaty obligations, rested with the Canadian Government. He, however, stated the policy severely, saying, "The tariff that has been proposed in obedience to the call of the general election, is as wise as it can be. There is no branch of industry that will not be crippled by it."

The British Government has chartered the Dominion line, consisting of Ontario and Borussia—the former to sail on the 21st for the United States to take on board 5000 mules for Natal. The latter to take cavalry from Portsmouth to South Africa.

The correspondent of the *Daily News* at Cape Town says: "There is much suspicion as to the loyalty of the

Fingoes, who constitute a large and powerful element among the soldiers of the garrison of Makarar is deplorable.

The Minister of Natal, Africa, informs the cabinet of State that the trade of the colony is not increasing. The imports in 1878 were \$313,705, a \$245,605, in 1877, under some unfavorable circumstances.

A conference of representatives of the German pig-trading trade was recently held at Rostock. Del. representing twenty-five of the principal seaports present. It was unanimously agreed that the shipping business was more depressed in 1878 than for a generation. The absolute deficiency was estimated at \$900. A large number of owners of wooden vessels announced their intention to allow their vessels to remain in port this spring.

Accounts from Szegedin attest the gradual, if slow improvement in the situation. The weather sometimes dry, and has grown much milder, thereby viating the sufferings of those who are still cut out. The waters are steadily but slowly subsiding. The Theiss river has fallen ten feet.

The Pope has sent 500 lire to Szegedin for the relief of the sufferers.

The British State Council, by a vote of 27 to 1, resolved to restore capital punishment in Switzerland. The expenses of the late International Expo were 55,000,000 francs, and the receipts 30,000 francs.

Intelligence received at Calcutta from Burnah, that the king is constructing fortified works and doing other warlike preparations. The king also asserted, his immense army of British residents of good to return to their own country.

The steamer City of Peking, from Hong Kong Yokohama, arrived recently at San Francisco with Chinese men. In China the successes of Lu Yang Yu in Tonquin, continued. The rebellion in Hainan is not yet suppressed, though considered near its termination. For two Adams, in Japan, he announced that he authorized the concluding clause of the new treaty with the United States. A Japanese lady in the southern province had protested against paying taxes unless allowed the privilege of wearing the local authorities referred her case to the Government for a decision.

For "The Friend"

An Indian's View of Indian Affairs.

Under this heading there has been published in the last number of the *North American Review*, a touching statement recently made at Washington by Chief Joseph, of the Nez Percé Indians, of the history of his people and the causes which led to the late war with his band, by which they have been expelled from their country in the Wallawalla valley, the border of Oregon, and become unhappy in the Indian Territory. An account in the manner in which this war was brought out was published in "The Friend," vol. 41, 158, 159; but it is rarely we have the opportunity of hearing from the Indians themselves a narrative of their wrongs such as is presented in the simple language of this statement, and its concluding appeal for justice at the hands of a nation from whose people they suffered so deeply.

Omitting many of the details, the statement is as follows:

"My friends, I have been asked to show to my heart, I am glad to have a chance to do so. I want the white people to understand my people. Some of you think an Indian is like a wild animal. This is a great mistake. I will tell you all about our people, then you can judge whether an Indian is man or not. I believe much trouble and blood would be saved if we opened our hearts to them. I will tell you in my way how the Indian sees things. The white man has more words to tell you how they look to him, but does not require many words to speak the truth. What I have to say will come from my heart, and I will speak with a straight tongue, cum-kin-i-ma-me-hut (the Great Spirit) is king at me, and will hear me.

"My name is In-mut-too-yah-lat-lat (Thunder-travelling over the Mountains). I am chief of the Wal-lam-wat-kin band of Chute-lu, or Nez Percés (nose-pierced Indians), was born in eastern Oregon, thirty-eight years ago. My father was chief before me when a young man, he was called Joseph by Mr. Spaulding, a missionary. He died a few years ago. There was no stain on his hands, the blood of a white man. He left a good name on the earth. He advised me well for my people.

"Our fathers gave us many laws, which they had learned from their fathers. These laws were good. They told us to treat all men as they treated us; that we should never

be the first to break a bargain; and that it was a disgrace to tell a lie; that we should speak only the truth; that it was a shame for one man to take from another his wife, or his property without paying for it. We were taught to believe that the Great Spirit sees and hears everything, and that he never forgets; that hereafter he will give every man a spirit-home according to his deserts; if he had been a good man, he will have a good home. This I believe, and all my people believe the same.

"We did not know there were other people besides the Indian until about one hundred winters ago, when some men with white faces came to our country. They brought many things with them to trade for furs and skins. They brought tobacco, which was new to us. They brought guns with flint stones on them, which frightened our women and children. Our people could not talk with these white-faced men, but they used signs which all people understand. These men were Frenchmen, and they called our people 'Nez Percés' because they wore rings in their noses for ornaments. Although very few of our people wear them now, we are still called by the same name. These French trappers said a great many things to our fathers, which have been planted in our hearts. Some were good for us, but some were bad. Our people were divided in opinion about these men. Some thought they taught more bad than good. An Indian respects a brave man, but he despises a coward. He loves a straight tongue, but he hates a forked tongue. The French trappers told us some truths and some lies.

"The first white men of your people who came to our country were named Lewis and Clarke. They also brought many things that our people had never seen. They talked straight, and our people gave them a great feast, as a proof that their hearts were friendly. These men were very kind. They made presents to our chiefs and our people made presents to them. We had a great many horses, of which we gave them what they needed, and they gave us guns and tobacco in return. All the Nez Percés made friends with Lewis and Clarke, and agreed to let them pass through their country, and never to make war on white men. This promise the Nez Percés have never broken. No white man can accuse them of bad faith, and speak with a straight tongue. It has always been the pride of the Nez Percés that they were the friends of the white men. When my father was a young man there came to our country a white man (Mr. Spaulding) who talked spirit law. He won the affections of our people because he spoke good things to them. At first he did not say anything about white men wanting to settle on our lands. Nothing was said about that until about twenty winters ago, when a number of white people came into our country and built houses and made farms. At first our people made no complaint. They thought there was room enough for all

to live in peace, and they were learning many things from the white men that seemed to be good. But we soon found that the white men were growing rich very fast, and were greedy to possess every thing the Indian had. My father was the first to see through the schemes of the white men, and he warned his tribe to be careful about trading with them. He had suspicion of men who seemed so anxious to make money. I was a boy then, but I remember well my father's caution. He had sharper eyes than the rest of our people.

"Next there came a white officer (Governor Stevens), who invited all the Nez Percés to a treaty council. After the council was opened he made known his heart. He said there were a great many white people in the country, and many more would come; that he wanted the land marked out so that the Indians and white men could be separated. If they were to live in peace it was necessary he said, that the Indians should have a country set apart for them, and in that country they must stay. My father, who represented his band, refused to have anything to do with the council, because he wished to be a free man. He claimed that no man owned any part of the earth, and a man could not sell what he did not own.

"Mr. Spaulding took hold of my father's arm and said, 'Come and sign the treaty.' My father pushed him away, and said: 'Why do you ask me to sign away my country? It is your business to talk to us about spirit matters, and not to talk to us about parting with our land.' Governor Stevens urged my father to sign his treaty, but he refused. 'I will not sign your paper,' he said; 'you go where you please, so do I; you are not a child, I am no child; I can think for myself. No man can think for me. I have no other home than this. I will not give it up to any man. My people would have no home. Take away your paper. I will not touch it with my hand.'

"My father left the council. Some of the chiefs of the other bands of the Nez Percés signed the treaty, and then Governor Stevens gave them presents of blankets. My father cautioned his people to take no presents, for 'after a while,' he said, 'they will claim that you have accepted pay for your country.' Since that time four bands of the Nez Percés have received annuities from the United States. My father was invited to many councils, and they tried hard to make him sign the treaty, but he was firm as a rock, and would not sign away his home. His refusal caused a difference among the Nez Percés.

"Eight years later (1863) was the next treaty council. A chief called Lawyer, because he was a great talker, took the lead in this council, and sold nearly all the Nez Percés country. My father was not there. He said to me: 'When you go into council with the white man, always remember your country. Do not give it away. The white man will

cheat you out of your home. I have taken no pay from the United States. I have never sold our land.' In this treaty Lawyer acted without authority from our band. He had no right to sell the Wallowa (*winding water*) country. That had always belonged to my father's own people, and the other bands had never disputed our right to it. No other Indians ever claimed Wallowa.

"In order to have all people understand how much land we owned, my father planted poles around it and said:

"Inside is the home of my people—the white man may take the land outside. Inside this boundary all our people were born. It circles round the graves of our fathers, and we will never give up these graves to any man."

"The United States claimed they had bought the Nez Percés country outside of Lapwai Reservation, from Lawyer and other chiefs, but we continued to live on this land in peace until eight years ago, when white men began to come inside the bounds my father had set. We warned them against this great wrong, but they would not leave our land, and some bad blood was raised. The white men represented that we were going upon the war-path. They reported many things that were false."

(To be concluded.)

For "The Friend."

Incidents and Reflections.—No. 10. CONVINCEMENTS.

John Richardson relates that at a meeting in Virginia, he said something which offended a young woman, a Presbyterian, who was present. "Not having, as she said, a suitable opportunity while I was there, to discourse with me, being busy in her master's affairs, (for she was the Friend's housekeeper), she desired liberty of her master to go to the next meeting, that there she might ease her mind to me about the offence I had given her in the first meeting; (it was something about Election, and they told me what it was, but not writing it down, it went from me), and accordingly she came to the meeting, where the Lord's mighty power broke in upon us, to the tendering of many hearts, to Friends mutual satisfaction, and it proved a good day to the aforesaid young woman; her heart was as if it had melted within her, and she shed many tears, and I am satisfied went from the meeting in fear and in great joy; in fear, how to walk as not to offend Christ the elect, which before she could talk of, but now she had met with, and he had opened her state to her; and joy, that she had met with the Messiah, the elect of the Father, his choice and beloved Son; so that she could now say, Where are the disputer of this world? All her brisk, talkative qualities were swallowed up in the feeling of the internal, enlightening presence of Christ." He adds, "The manner of the working of the Truth is to humble the creature, and bring it into contrition, tenderness and fear, with true self-denial."

It is related of John Ashton, of Killeenmore, Ireland, in the early days of our Society, that when a member of the Church of England, being desirous of further discoveries of the knowledge of God and way of salvation, he, with his wife, went to a meeting at Birr, when both of them were convinced by the powerful ministry of Thomas Wilson; and

were obedient to the manifestation of truth in their hearts. On coming out of the meeting they said to each other, "The way of everlasting happiness has been clearly laid down before us, and we are resolved to walk in it, come life or come death."

Not long after, he was thrown into prison for his Christian testimony against tithes, where he was kept six months, and bore his confinement with exemplary patience and resignation; and being accustomed to industry and averse to idleness, he learned to make gartering and laces for his support during his imprisonment.

When at liberty, he and his wife constantly attended the meeting at Birr twice a week, generally going on foot about seven miles of a very bad road, and having a river to wade through both going and returning. When crossing this river in winter, they sometimes had to break the ice, and John frequently went to see the blood on his wife's limbs in coming through it.

When Friends travelling in the service of the gospel, came to his house, his zeal for the propagation of the truth and love to the souls of his neighbors was manifested in the great pains he took to invite them to come and partake of the benefit of their labors; for which purpose it was his frequent practice to ride several miles round, and this in the night, as well as day, and even in the depth and severity of the winter season; and though some returned scoffs and abusive speeches, yet many came and were well satisfied; several were convinced, and among the rest some of his own servants.

We doubt not that many in this day are convinced by the Spirit of Truth of what the Lord requires of them. Happy would it be for all such, if like this Friend and his wife, they would resolve, when the way of life and salvation is set before them, "to walk in it, come life or come death."

Where any are turned to righteousness, it is the Lord's doing. Many are the ways he takes to awaken the sinner and instruct the ignorant, but in them all the Christian traces the operations of the Holy Spirit as the moving cause. We have met with the experience of an aged widow woman, who recently died in the City of Lyons. Her parents were very poor, and her husband had nothing but his industry to depend on. As long, however, as he was able to work, they honestly gained their daily bread, though they were never able to put anything by for a rainy day; but, when the old man died, leaving his poor widow childless and infirm, want entered her desolate dwelling as an armed man. She sold everything but what was indispensable, and removed to a miserable garret to spend the remainder of her days.

One day, as she was sitting alone in her comfortable, half-empty room, it struck her that there was a singular outline on the beams of the wall. The walls had been whitewashed, but she thought it looked as if there had been a square opening in one of them, which had been carefully closed with a kind of door. She examined it closely, and the thought occurred to her, "Perhaps there is some treasure hidden there;" for she remembered as a child the fearful days of the Revolution, when no property was safe from the men of liberty and equality. Perhaps some rich man had concealed his treasure there from rapacity, who had himself fallen a victim to the Revolu-

tion before he had time to remove it. She tapped with her finger, and the boards turned a hollow sound. With beating heart she tried to remove the square door, and succeeded, without much difficulty; but, instead of the gold and silver she hoped see, she beheld a damp, dirty, mouldy book! In her disappointment she was resolved to fix in the boards again, and leave the book to moulder and crumble away; but a sense of impulse induced her to take it out, and as there were any bank-notes or valuable paper in it; but no, it was nothing but a book mouldy book!

When she had a little recovered from vexation, she began to wonder what book could be that some one had hidden away carefully. It must surely be something extraordinary. So she wiped it clean and herself to read. Her eyes fell upon the words "Therefore I say unto you, Take no thought for your life, what ye shall eat, or what shall drink; nor yet for your body, what ye shall put on. Is not the life more than meat, and the body than raiment? Behold the fowls of the air; for they sow not, neither do they reap, nor gather into barns; yet do heavenly Father feedeth them. Are ye much better than they?" And the words she read appeared to her so sweet and precious that she read on and on. The next morning she sat down again to the damp book, the words of which made a deep impression on her soul. Her little chamber longer looked so desolate. Her food, which had so often seemed to her as the bread of tears, now appeared to be more like bread from heaven; and her solitude was relieved by the presence of the great King.

She had the book cleaned and bound, and it was to her as meat and drink, until she was permitted to close her eyes and enter into the joys of her Lord. She related this history the latter days of her pilgrimage, to a beloved pastor in Lyons, in whose hands the book now is. It is Amelotte's edition of the New Testament, of the time of the Huguenot persecution.

For "The Friend"

Parts of the following observations I have always heard attributed to William Penn, father, but David Holt, in his "Extracts" says they were made by an American envoy to William Allen, at his house in London. Perhaps the Editors of "The Friend" can tell who the author really was.

"I admire your Society: its principles contain all of Christianity that I have any idea of, but I am sorry to see that some of you are losing your badge, and I don't see how you can retain your principles, and forego your little peculiarities, your marks of self-denial, and difference from the rest of the world. You are lights; the world should come to you, and not you go to the world. You must gather them, but they will scatter you."

[We believe the above remarks have been wrongly attributed to W. Penn, but we know not who was their author.—Eds.]

It is very precious to walk in this Light, which doth reveal the love and kindness of God, and brings to the knowledge and experience of the means of salvation which he has appointed; and to the feeling of that power which saveth from falling into temptation, even the same power which preserved Jesu-

en he was tempted in the wilderness. Now they that are come to the knowledge and possession of this power, are not preserved by reason falling into temptation, and delivered from evil, such are not obedient nor faithful, so do not adorn their profession: such do not glorify the power, but are as spots in the feast, and a scandal to the gospel of God, and enemies to the cross of Christ, who is the power of God to salvation. Now those that live in, and are obedient to this power, are the wisest, happiest, and best people in the world; blessed above all families of the earth; blessed with an adored fold in this world, and in the world to come everlasting. Such are as the salt of the earth which seasoneth all things; as a key on a hill which cannot be hid, and as the light of the world indeed.—William Shewen.

For "The Friend."

The Pitcairn Islanders.

The island inhabited by these interesting people is a very small piece of ground, covering a space of about one and a half squares, in the midst of the mighty expanse of the Pacific Ocean, and separated by hundreds of miles from the nearest land.

The story of its settlement is familiar to any of us from childhood, and we can recall it in the latter part of last century, a mutiny took place on board the English ship *Bounty*; and nine of the mutineers with a few native men and women from Tahiti, took refuge in this lonely spot, to escape the punishment that awaited them if they fell into the hands of the British Government. This was in the year 1790.

Most of these mutineers perished in a few years by disease or violence, but a new generation grew up; and Alexander Smith, the first survivor of these, who assumed the name of John Adams, began to feel a degree of responsibility for the welfare of the colony, who looked up to him as its oldest member and knowledgeable head. He accordingly devised a very simple system of laws which was accepted by the people, and under which they thrived and prospered.

By the year 1831, they had grown to be eighty-seven in number, and as their little land was beginning to be over-crowded, they were removed to Tahiti, but being dissatisfied with their new home, they soon returned to their former habitations.

In 1856 they were transferred to Norfolk Island, but a portion of them subsequently went back.

Pitcairn Island was visited in the fall of last year by the English Admiral DeHorsay, whose report to the British Admiralty is subjoined.

"I request you will acquaint the lords commissioners of the admiralty that as Pitcairn Island lay in my track from Esquimaux to Valparaiso, and the weather being sufficiently favorable for landing, I took advantage of the circumstances to visit that island for the purpose of ascertaining the condition of the inhabitants, and also to obtain refreshments on this long voyage. Having sighted Pitcairn at daylight on the 8th instant, we arrived at Bounty Bay at 8 A. M., and remained off the island until noon the following day, when we proceeded on our voyage. A few particulars as to the present condition of this small and almost inaccessible island, the only spot of British territory lying in the vast triangle

between Vancouver, Falkland and Fiji Islands, may not be uninteresting to their lordships, and are therefore made the subject of this letter. The population at present numbers 90, of all ages, of which 41 are males and 49 females, a nominal number of whom is furnished in Appendix No. 1.

"By this return it will be observed that there is but one survivor of the generation which immediately followed the mutineers; namely, Elizabeth Young, aged about 88, daughter of John Mills, gunner's mate of the *Bounty*, and of an Otaheitan mother. The oldest man on the island is Thursay O-tober Christian, aged 59, grandson of Fletcher Christian, master's mate of the *Bounty*. The population may be further described as consisting of 16 men, 19 women, 25 boys and 30 girls.

"The deaths on the island have numbered about 12 in the last 19 years. No contagious diseases visit the island, nor are the animals subject to disease. A few medicines which were sent from Valparaiso, in her Majesty's ship *Reindeer*, are administered, as required, by the pastor. Pitcairn Island is governed by a magistrate and chief ruler, in subordination to her Majesty the Queen of Great Britain, who not only administers the laws, but also enacts them. There are two councillors to advise and assist the chief magistrate, besides which the 'heads of families' are convened for consultation when required. In Appendix No. 2, I furnish a copy of the laws. They bear no date, but were, I am informed, drawn up by the present chief magistrate on accession to office, and are evidently copied from former ones now destroyed. The almost puerile simplicity of the laws is perhaps the best evidence of the good conduct of the people. The law is, in fact, merely preventive, no case of theft, fornication, or use of profane language (apparently the only three crimes contemplated as possible) having been known to occur since the laws were drawn up. The chief magistrate is elected annually on New Year's day, and is open to re-election. Both sexes of and above the age of seventeen have a vote. The office is at present filled by James Russell McKay, who is also steersman of the whale-boat, which he built, and which is the only boat on the island. I have addressed a separate letter to their lordships relative to certain questions concerning the government of the island raised by the chief magistrate. Divine service is held every Sunday at 10½ A. M., and at 3 P. M., in the house built and used by John Adams for that purpose until he died in 1829. It is conducted strictly in accordance with the liturgy of the Church of England, by Simon Young, their selected pastor, who is much respected. A Bible class is held every Wednesday, when all who conveniently can, attend. There is also a general meeting for prayer on the first Friday in every month. Family prayers are said in every house the first thing in the morning and the last thing in the evening, and no food is partaken of without asking God's blessing before and afterward. Captain Beechey, writing fifty-three years ago, says: 'These excellent people appear to live together in perfect harmony and contentment, to be virtuous, religious, cheerful, and hospitable: to be of an amiable conjugal and parental affection; and to have very few vices.' I have ventured to quote these words, as they hold true to this day, the children having followed in the footsteps of their parents.

"The observance of Sunday is very strict; no work is done; but this is not in any pharisaical spirit, as shown on the occasion of our visit, which chanced to be on a Sunday, when everything consistent with not neglecting divine service was done to supply us with refreshments for the crew, the chief magistrate arguing that it was a good work, and necessary, as the ship could not wait. Of these islanders' religious attributes no one can speak without deep respect. A people whose greatest privilege and pleasure is to commune in prayer with their God, and to join in hymns of praise, and who are, moreover, cheerful, diligent, and probably freer from vice than any other community, need no priest among them. The pastor also fulfils the duty of schoolmaster, in which he is assisted by his daughter, Rosalind Amelia Young. The instruction comprises reading, writing, arithmetic, Scripture history, and geography. The girls learn sewing, and hat-making as well, and the whole are taught part-singing very effectively. Every child and unmarried woman at present has to attend school from 9 to 12, and from 1 to 3 P. M. Schooling is conducted in the church-house, one end of which is used as a library open to all. English is the only language spoken or known.

"The Pitcairn Islanders are of course entirely dependent upon their own resources. They grow sweet potatoes, yams, plantains, &c., and formerly plenty of bread-fruit, but these are nearly all dying out. They have also beans, carrots, turnips, cabbages, and a little maize; pineapples, fig-trees, custard-apples, and plenty of oranges, lemons, and coconuts. Clothing is obtained alone from passing ships, in barter for refreshments. There are no springs on the island; but, as it rains generally once a month, they have plenty of water, although at times in former years they have suffered from drought. No alcoholic liquors, except for medical purposes, are used, and a drunkard is unknown. The houses are well ventilated, and furnished sufficiently for their simple wants. There is no money on the island except such few coins as may be kept as curiosities."

Testimonies to the Way to Salvation.

Thomas Story, in conversation with an acquaintance, explaining to him the nature of silent meetings among Friends, told him: "That we had been as other men, subject to common infirmities and ignorant of God, as to any experience of his presence and divine working in us, till it pleased Him, in his own goodness and mercy, to visit us by the Spirit of His Son, Christ; through which we had known a time of condemnation and humiliation for sins past, and true repentance and forgiveness; and, believing in Him, through the work of his spirit and power in our minds, He, with the light and life of His Son, became the object of our faith; by which also He sanctified our hearts, and reconciled us unto himself; so that the enmity being slain, and we made temples of the Holy Ghost, we now worshipped the Father through the spirit of His Son, in a state of faith and obedience; whereby we draw near unto Him, even through that blessed medium which himself hath appointed, partaking of the nature of man; not of flesh and blood only as the Son of man, but also being clothed with a holy human mind, by Him we are made partakers of the divine nature as the sons of God; as it is written,

'He shall take of mine, and give it unto you; And the Father being made manifest in Him, we have instructions in wisdom, and enjoyments in the divine and blessed presence, of which the world, in a state of nature, is not aware; and not more so than in a state of truce; where all the passions, affections and natural desires of the heart are silenced by the all-commanding voice and power of the Divine Word; who hath said, 'Let the world be and it was so.'

Thomas Story describing a meeting in Virginia, in 1678, says: "We preached to them the free and universal Grace of God, through Christ, for life and salvation; and endeavoring to turn them thereunto; that through faith therein they might come to know the full end of the sacrifice of the blood of Christ shed at Jerusalem of old! And how that such as reject the grace and spirit of Christ in their own hearts at this day, have not the benefit of that work and sacrifice of Christ there made manifest, but cruelty to themselves the Son of God afresh."

When Thos. Story was in Nantucket, in 1704, he had some controversy with a woman whom he met with there. He says: "The first thing she began with, was an expression of mine, she said I uttered in some former meeting, viz: 'To say that man may be saved in his sins, by a bare belief of Christ's outward coming in the flesh, is a doctrine of devils.' I did not remember the expression, but owned the thing to be true; and proved to her before the company, that without the inward work of the Spirit of Christ, nothing else can complete our salvation."

In a letter written in 1715, Thomas Story gives this advice to his correspondent: "And now, dear friend, I recommend thee to God; exhorting thee to believe in his grace given thee through Christ Jesus the Lord; even in the ingrafted Word which is able to save thy soul. * * * For through faith in the true Light, and walking therein, is not only the true church fellowship, but also there, and not otherwise, doth the blood of Christ, the Son, cleanse from all unrighteousness."

"The Almighty, through his infinite and superabundant mercy, declared by Christ the Lord, hath given saving grace, and a sufficiency of it, to all mankind."

"Though saving grace is here declared to be given unto all, as a gift from God; yet that salvation is not obtained but by faith in that gift, and obedience thereunto, through the sensible operation of it in the heart: 'For by grace are ye saved, through faith; and that not of yourselves, it is the gift of God.' Again: "As by the offence of one, judgment came upon all men to condemnation; even so, by the righteousness of one, the free gift came upon all men to justification of life."—*Thos. Story*, folio edition, p. 355.

"It is not our embracing true principles and notions doctrinally, and so sitting down under these, and an imitation of good and godly men, that will bring us to Heaven, unless we be also in the same life and virtue in which they were; nor can any inherit the kingdom of heaven, unless they be in the nature of heaven; which cannot be but by regeneration by the Word of God; the same that was made flesh and now appears a quickening spirit."—*Id.* p. 514.

"That which reproves sin in mankind is sufficient for salvation, provided it be believed in and obeyed."—*Id.* p. 203.

"Simon Magus's believing and being baptized, demonstrates that a bare belief that Christ is the Messiah, or person of whom Moses and the prophets prophesied, neither sanctifieth or qualifies for receiving the Holy Ghost, in a gospel sense; but that men may be in a state of gross sin and uncleanness notwithstanding. And therefore let all such superficial believers beware; for true faith is the gift of God, and comes into the heart by the operation of the Spirit of Christ; which is the Holy Ghost."—*Id.* p. 295.

NO CONCEALMENT.

Selected.

Think'st thou to be concealed, thou little stream,
That through the lowly vale dost wend thy way,
Loving beneath the darkest arch to glide
Of wren branches, bent with hillock gray?
The mist doth track thee, and reveal thy course
Unto the dawn, and a bright line of green
Tinting thy marge, and the white flocks that kaste
At summer noon to taste thy crystal sheen,
Make plain thy wanderings to the eye of day—
And then thy smiling answer to the moon,
Whom beas so freely on thy bosom sleep,
Unfold thy secret, e'en to night's dark moon—
How could'st thou hope, in such a world as this,
To shroud thy gentle path of beauty and of bliss?

Think'st thou to be concealed, thou little seed,
That in the bosom of the earth art cast,
And there, like cradled infant, sleep'st awhile,
Unmoved by tramping storm or thunder-blast?
Thou bid'st thy time; for herald Spring shall come
And wake thee, all unwilling as thou art,
Unloos'd thine eyes, unfold thy clasping sheath,
And stir the living pulses of thy heart;
The living rains shall woo thee to thy heart;
Weep of thy bed, and ere thou art aware,
Forth steals the tender leaf, the wiry stem,
The trembling bud, the flower that scents the air,
And soon, to all, thy ripened fruitage tells
The evil or the good that in thy nature dwells.

Think'st thou to be concealed, thou little thought,
That in the curtained chamber of the soul
Dost wrap thyself so close, and dream to do
A secret work? Look to the hues that roll
O'er the changed brow—the moving lip behind,
Linking thee unto speech—the feet that run
Upon thy ground, and the beads that stamp
Thy lineage plain before the noon-day sun;
Look to the pen that writes thy history down
In those tremendous books that ne'er enclose
Until the Day of Doom, and bluish to see
How vain thy trust in darkness to repose,
Where all things tend to judgment. So beware,
Oh, erring human heart! what thoughts thou lodgest there.

William Bayly.

(Concluded from page 260.)

After William Bayly had thus, through deep experience, come to that state of religious settlement which he had long sought, he became a zealous laborer for the spread of the Redeemer's kingdom, both by word of mouth, and by writing. Some of his tracts which have been preserved are controversial in their character, defending the truth of those doctrines which he professed. But the larger part of them consist of warnings, invitations, and tender appeals, encouraging his readers to turn from unrighteousness and to heed the Light of Christ in their hearts, which would lead them in the way of salvation. The titles of some of these, as was the practice in that day, are long and comprehensive. One of them is styled—A warning from the Spirit of Truth unto all persecutors and enemies of the dear children of God who follow the Lamb, and are the meek of the earth. And a plain information and direction for the ignorant, who know not the way of God, nor the voice

of His true prophet, who is the Light and Life of man. With a tender visitation of God to the inhabitants and County of Po. And a call and warning of love unto the people called Anabaptists. With some queries to be answered with God's witness in the professors of the Scriptures, who have denied the Light and Life that gave them for. Also, a terrible word to such as live in riot and drunkenness and unclean practices. With a true voice and revelation of God unto all sons and daughters of the fallen Adam."

Many of these treatises were written in prisons, to which he was from time to time committed, like many others of his brethren in those days, for faithfulness to their religious principles. The one whose title is given above has this subscription: "From a lover of the Seed of promise, a witness to the eternal Light and power of God, and a friend of the everlasting peace of all mankind; who have forsaken all to follow the Lamb in the paths of righteousness, truth and peace; for whose eternal testimony I now suffer bonds and afflictions, and am numbered among transgressors at the House of Correction, the common goal at Winchester."

Another treatise styled—"The blood of righteous Abel crying from the ground &c., mentions that he had been in prison; Winchester nearly a year, kept close "in a unwholesome, stinking hole, not fit for beasts. This was about the year 1655. From this time to 1670, a prison was his frequent place of abode; and when thus separated from his family and friends, he appears to have been careful to employ his time industriously in providing for his own wants and the wants of those dependent on him, so far as he could. Among his writings is a letter to the magistrate who had committed him to prison, complaining of the jailer, who had refused him coals, without which he was unable to work at his trade, though he had proceured wool to work upon; and requested a written order to the jailer to give him room and liberty to work at his lawful calling. A few extracts from this letter will show the honest sincerity, with which the prisoner addressed his persecutor "Thou alone art the cause of my imprisonment almost these nine weeks, in which I have almost suffered to the death of my body (being also sick when I was brought to prison), among those in whose company wert thou but one night, it would make thy flesh tremble, and grieve thy soul (if thou feardest God), to hear and see the filthy conversation of the wicked from day to day; the like wickedness, I do believe, was not found in Solomon, nor in the old world, whom God destroyed with an utter overthrow. Oh! consider a little in the fear of the righteous God, who is the righteous judge of all mankind, whether thou hast done unto me as thou would'st be done unto, who am a sufferer under thy hand of oppression, for righteousness sake, both in body and soul, being grieved and vexed with the abominations that I daily hear and see." "We are deprived of all outward liberty without cause, which in the day of visitation, the witness of God in thee for me shall witness; and this action of thine against the Innocent, in that day, will be as a millstone about thy neck."

As might be anticipated from the thorough character of William Bayly's religious experience, his writings are practical and deeply spiritual. One of his pieces is entitled "A

overy of the way to everlasting peace with" from which the following is condensed. There is no other way or name given whereby men shall be saved, but by the power of the holy child Jesus, who is the life of all things, by whom the world was made, whom God hath given into the world, to all men through Him might believe; when He sent Him into the world said, "His is my beloved Son, hear ye Him;" which saith, "I am come a Light into the world, that whosoever believeth on me should not be in darkness, but have the Light of life." Therefore, all people upon the face of the earth, consider this a measure of the truth of life, the Lord God of infinite mercy hath given unto you, that you should not perish, but that by it you should be led into royal life and peace."

Now this is the true Light of the Son of God, Christ Jesus (who lighteth every man that cometh into the world), which manifesteth or showeth secretly unto you your evils and unholiness, your lightness of vanity of mind, and letteth you see the true strings of the pride and envy of your hearts, and checketh and reproveth you many ways secretly for your unsavory words and speeches, and vain and wicked thoughts." Let none think within themselves, that they all be covered or hid by talking of [Christ's] words or professing his name, which is terrible and dreadful to all the ungodly, and that a hopes of forgiveness of sins without departing from iniquity will save them, and that He will not bring all your hidden things to the Light, and every secret thing into judgment, but cry out, He will be merciful unto you and your infirmities, who live in ungodness, hypocrisy and wickedness: I say, Wo, unto the Lord God of life and power unto all them that make anything their hope, covering or hiding-place, but the Light, Life, and pure Spirit of the living God. No man cometh to the Father, but by Him who is the true Light that lighteth every man that cometh into the world; whose Light is in the conscience and hearts of men, bearing witness against all unrighteousness by them committed, and reproves and condemns the righteous grounds from whence it ariseth, and striveth with them to lead and guide them in the way of holiness unto Christ the Saviour, from whence it comes."

William Bayly appears to have been twice married. His second wife was Mary Fisher, who, under religious concern, had visited the Sultan of Turkey, in his camp near Adrianople, and delivered to him the message which the Lord had given her in charge; and who had suffered much at the hands of the intolant Puritans of Boston.

His death occurred on the 1st of Fourth month, 1675, whilst on the sea. The master of the vessel preserved the following simple record of the closing scene:

"After some words spoken to me concerning his outward business, he desired to be remembered unto his dear wife and little ones; and said, 'I have left them no portions, but I endeavor hath been, to make God their Father: Well, shall I lay down my head in peace upon the waters? God is the God of the whole universe; and though my body sink, I shall swim atop of the waters.' And after he had lain a little while still, he called me, and desired me to remember his dear wife to George Fox, Alexander Parker, George

Whitehead, and to Friends in general; and immediately sang, being filled with the power of God, saying, 'The Creating Word of the Lord endures forever,' and spoke several precious words to them that sat by him, and took several by the hand and exhorted to the fear of the Lord, and not to fear death; for death was nothing in itself; for the sting of death is sin: and said, 'Dear Friends at London that would have been glad to have seen my face, tell them, I go to my Father and their Father, to my God and their God.' 'Remember, said he, 'my dear love to my dear wife; she will be a sorrowful widow; but let her not mourn in sorrow, for it's well with me,' and took his leave of Friends, saying, 'I see not one of you, but I wish you all well.' Samuel Bender (a New England Friend) asked him how it was with him? He said, 'I am perfectly well;' and desired him to mind his love to Friends in Rhode Island and New England. He also said, 'Any of you remember my love to Friends in Barbadoes;' and said, 'I went freely in tender love to them.'

"He uttered many more sensible words, and about half an hour past four in the morning he departed, as if he had gone to sleep; and is at rest with the Lord, who hath given him an everlasting crown of glory."

The passage which follows from William Bayly's works, addressed to those who had any share in the persecution of the Lord's people, shows the noble spirit that animated our early Friends in bearing the cruel and unjust usage to which they were subjected:

"This we would give you to understand, That as for us, who fear and obey the Lord, your prisons and cruel unjust dealings, and your long furrows ye plough up on our backs therein, is very little to us, except to the more raising and strengthening of that life in us which will never bow to your wills, or any will of man, by transgressing the commands of Christ Jesus; for our eyes are not at what ye can, or will, or have power permitted you to do, or at the length of time in which we suffer bonds under your ambitious wills, or at any other temporal thing whatsoever; but to the Lord our God alone."

For "The Friend."

Thoughts and Feelings. YEARLY MEETING.

The time for holding our Annual Assembly in Philadelphia is drawing near. These are important occasions; and should not fail to bring every one of its very responsible adult members under a deep religious concern that the Lord may in the first place be honored; that the "candlestick" through our unfaithfulness, be not "removed out of his place;" and that the solemn duties devolving upon such a body may be resulted not only in harmony and sweetness, but in every way to the honor of the Great Head of the Church.

It is written, "The eyes of the Lord run to and fro throughout the whole earth, to show himself strong on behalf of them whose heart is perfect toward him." This conditionally promised strength will no doubt be meted in proportion to the sincerity of our hearts in His sight, and the earnest application of our souls unto Him, who, it is declared "giveth liberally" when properly sought unto, "and upbraideth not." Remembering at the same time, that "He that cometh to God must believe that he is, and that he is a rewarder of them that diligently seek him."

We hope none will presume to account the Lord a hard master; or that there is or can be any deficiency on His part toward the workmanship of his hand, when also we are assured that "God so loved the world, that he sent his only begotten Son," the second Adam, the Lord from heaven to suffer and die for us; "to be the propitiation for our sins," and "that we might live through him." Oh! the accountability then of a life so given us—of talents so bestowed upon us—of time and opportunity so vouchsafed us—to work out a salvation, through obedience to the Lord's quickening Spirit within us, which involves no less than the eternal happiness or misery of a never dying soul.

How much to be desired is it, that in going up to these solemn feasts, each should endeavor to bear upon our minds and hearts the obligations we owe to the Lord Jesus who has bought us; the grave responsibilities resting upon us, both as respects faithfulness to Him, and our duty to each other; with the fearful realities of a life no less uncertain as to its continuance, than "the spider's most attenuated thread" is frail. How should these considerations of our own transitoriness and nothingness induce humility of mind, gentleness, forbearance, with such regard and deference for and towards each other, as practically to exemplify the exhortation: "Love as brethren, be pitiful, be courteous." From the same high authority comes the precept—"The servant of the Lord must not strive; but be gentle toward all men, apt to teach, patient, in meekness instructing them that oppose themselves; if God peradventure will give them repentance to the acknowledging of the truth," &c. Here, or in such a state of things, we should be indeed a "Society of Friends;" a city set upon a hill. The lion and the lamb would lie down together. Ephraim would not envy Judah, nor Judah vex Ephraim; nothing should hurt nor destroy in all the Lord's holy mountain.

Now is not such a state attainable, notwithstanding the diversity of sentiment there will almost of course be where so many are assembled? While we in no wise claim that such coveted results could arise from any inherent power or begetting of our own, we nevertheless are persuaded that He, the Prince of Peace, the God of love, the compassionate Shepherd, the Healer of breaches, and who is able to still the troubled sea, and to subdue all things unto himself, will, as He is looked unto, and prayerfully sought, so bring the spirits of those assembled into subjection to Him even as the heart of one man, that the acknowledgment might be made now as it was aforesaid: It is good for me to be here. Truth and peace reign. The Lord our God is glorified. "The horse and his rider hath he cast into the sea."

The whole is made up of, and is equal to the sum of all its parts. Would that we as individuals—and I write by no means as one that hath attained—might so grow in the groundwork and root of religion, might so build over against our own houses, might so experience the life and power of godliness each for himself, that when assembled in a Yearly Meeting capacity we might each, through power from on high, help to edify the body in love; that thus we might, as lively stones, be built up a spiritual house, acceptable to God through Jesus Christ.

The angel, as recorded in Revelation, ad-

dressed the churches formerly very differently. Ephesus, with many good deeds noted, had laid to its charge this sad lapse: "Thou hast left thy first love." This they were required to remember and to repent of, lest chastisement and loss should quickly come upon them. Smyrna had those who said they were Jews, but were not. While some of this church were to be cast into prison, and to have tribulation, the following language was encouragingly addressed to it: "But thou art rich;" and, "Fear none of those things which thou shalt suffer:" "Be thou faithful unto death, and I will give thee a crown of life." Pergamos is represented as dwelling "where Satan's seat is;" with having Balaamites among them, and those holding the doctrine of the Nicolaitanes, which the Lord hated. Of these they were to repent. To this church is the assurance given: "I know thy works;" and that "Thou holdest fast my name, and hast not denied my faith." Thyatira, it is stated, had "that woman Jezebel, which calleth herself a prophetess, to teach and to seduce my servants," &c. To it was communicated the testimony: "All the churches shall know that I am he which searcheth the reins and the hearts; and I will give unto every one of you according to your works." While unto the faithful therein it was added: "I will put upon you none other burden. But that which ye have already hold fast till I come." The angel of the church of Sardis was admonitively addressed with: "I know thy works, that thou hast a name that thou livest, and art dead. Be watchful, and strengthen the things which remain, that are ready to die; for I have not found thy works perfect before God." Nevertheless, to this church are the relieving words: "Thou hast a few names even in Sardis which have not defiled their garments; and they shall walk with me in white; for they are worthy." The church of Philadelphia was commended for its patience, its Christian fidelity, its steadfast endurance of suffering. It was told, "I have set before thee an open door, and no man can shut it: for thou hast a little strength, and hast kept my word, and hast not denied my name." Those who said they were Jews and were not, were to be made "to come and worship before thy feet, and to know that I have loved thee." And how encouraging is what follows: "Because thou hast kept the word of my patience, I will also keep thee from the hour of temptation, which shall come * * to try them that dwell upon the earth. Behold I come quickly: hold that fast which thou hast, that no man take thy crown." To Laodicea, "The Amen, the faithful and true Witness," employed the same words that were used to each of the churches, viz: "I know thy works." Which works, in the present case, were sorrowfully defective; their grapes were those of gall, their clusters were bitter. Because lukewarm, and neither cold nor hot, it was rejected as extremely offensive in the Divine sight. More denunciations words could hardly be used than those addressed to this self-exalted, rich and full in their own eyes, but very apostate church. "Because thou sayest, I am rich, and increased with goods, and have need of nothing; and knowest not that thou art wretched, and miserable, and poor, and blind, and naked; I counsel thee to buy of me gold tried in the fire, that thou mayest be rich; and white raiment, that thou mayest be clothed; * * and anoint thine eyes with eye-salve,

that thou mayest see." To which is affixed the impressive and instructive lessons: "As many as I love, I rebuke and chasten: be zealous therefore and repent. Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me."

In the churches severally, the promise is encouragingly sweet and full to the overcoming ones: viz.—They shall "eat of the tree of life;" they "shall not be hurt of the second death;" they shall partake "of the hidden manna;" they shall have given "the morning star;" they shall "be clothed in white raiment;" they shall be made "pillars in the temple of my God;" they shall have the grant "to sit with me on my throne," &c.

It may be well to ask, How would the churches bearing our name, stand now the Omniscent scrutiny of Him whose eyes are as a flame of fire, and who searcheth the reins and the heart, such as the seven churches in Asia were subjected to? Would, that we might lay these things to heart *individually*. Would, that we might not only submit to be searched, as we must all sooner or later be; but that we might *ask it now* as David did: "Search me, O God, and know my heart; try me, and know my thoughts; and see if there be any wicked way in me, and lead me in the way everlasting." If this were more the case throughout the length and breadth of Philadelphia Yearly Meeting, we believe that a stir would be witnessed in the camp, and that the fruits of the Spirit would be more seen among the one's, the two's and the three's of our heritage. The query would more be, "Tell me, O Thou whom my soul loveth, where thou feedest," &c. Also, in humility and contrition of soul, "Lord, what wilt thou have me to do?" Then would the church be strengthened by the co-operation of more of our middle-aged and younger members, like to the princes of the provinces formerly coming up to the help of the Lord against the mighty. Then would her brightness again, as in earlier days, break forth "as the morning; fair as the moon, clear as the sun, and terrible (to the man of sin) as an army with banners." And then also, would she increasingly become as the "garden enclosed," represented in Canticles, upon which the north wind and the south were to blow, to bring out the spices, whereupon the Beloved would "come into his garden, and eat his pleasant fruits."

May the Lord of hosts "be for a crown of glory and a diadem of beauty" unto our approaching annual assembly; may He be "for a spirit of judgment to him that sitteth in judgment, and for strength to them that turn the battle to the gate;" and may His will be done.

If you reject the counsel of God against yourselves, and refuse to be crucified with Christ, and to be baptised with his baptism, you will never have life: but by his baptism, and through the heavenly operation of his Spirit, if thou hast faith in Christ's name, thou shalt be married to Him in everlasting righteousness.—*W. Dewsbury.*

The Lord's ways are not as the ways of men, who mark the failings of their fellow-creatures with a rigorous severity, and often exact from them the utmost farthing.—*S. Scott.*

For "The Friend"
Some Extracts from the Diary and Letters of Ebenezer Worth.

The character of Ebenezer Worth, marked by meekness, patience, and humil happily blended with firmness in the support of what he believed to be right. He was son of Samuel and Sarah Worth, and born in East Bradford, Chester Co., Pen the 28th of 8th mo. 1803. He died in house in which he was born, 6th mo. 16 1877. A member of the legal profession Philadelphia, in writing to the compiler these notes, not long after the decease E. W., used this expressive language: "I was made acquainted with his character from labors in behalf of the Indians, and from *living within the atmosphere of his life for several summers*. He appeared to me like Abraham as a prince among men, who humbly 'walk with God.' He seemed to me one who claim no deference, yet was one to receive it blessings pronounced upon 'the poor in spirit the meek, the thirsters after righteousness the merciful, the pure in heart, and the peacemakers.'" Whilst thus enumerating the characteristics of a fellow man, let us bear in remembrance that he was what he was, Grace, not by nature. In the Memorial issue by Bradford Monthly Meeting respecting him it is said, "He possessed naturally a strong w an active mind, and a resolute disposition. There is little doubt but that he had much overcome, and how encouraging it is to know that the Power which so effectually wrong in him to bring into subjection a strong w is still able and willing to help us, if we only be as faithful and obedient as he was yielding our hearts unreservedly to its seen yet effectual operations. The expression the above extract, from one who was comparatively a stranger; "Having spent several summers within the atmosphere of his life is remarkable. It would appear that the ight walk of our dear friend had been su as to affect the moral atmosphere around residence, bringing to mind the declaration George Fox, that one honest Quaker would shake the country for ten miles around him.

Sitting in silence by his quiet death-bed sid he expressed in substance his satisfaction having the company of those who loved t Truth; and after a little time of silence, a dressing the writer by name, said, "I *now* b lieve that my trials have been my great blessings." Not much conversation passe but what he did say, has been remember with encouragement in times of trial since.

A day or two, perhaps the day before h departure, he desired to be undisturbed b visitors of any kind, and shortly prior to t close expressed his wish that when the sp left the body all should remain silent for th space of one hour.

He was a successful farmer, his farm bein noted for its fertility and good managemen. He was one who loved retirement, and was frequently engaged to wait upon his D vine Master for right direction, and for th consolations of His Spirit. It was a gratificati on his numerous friends and relative to find, after his decease, in his own hand writing, some account of his exercises an engagements whilst residing among the I ndians and after his return home. They a ppear to be written in much simplicity. Per mission has been kindly granted to mak some selections from the diary as well as from

the letters that have been preserved. It has been found necessary to make some verbal alterations, but a care is exercised to preserve simply and sense of his expressions. A memorandum commences 9th mo. 12th, 33. He remarks:

"I have thought for some time of keeping little account of my getting along, but as I am about to commence it, I feel it to be a good thing. May I be favored to do it unobtrusively, that covering of His life-giving presence which alone can qualify for any good work; and with humility, and gives unto us life and faith; blessed forever be His great and efficient name.

"Being this morning favored with a good degree of comfortable feeling, I commence to take some account of the dealings of a kind and merciful God to me, a poor sinner. Some time before leaving home, I was residing on Friends' meeting at Tanassassa, to assist and instruct the Indians living on the Allegheny reservation. I think after I was pretty well settled in the belief that it would be required of me, it was respectfully permitted that I should be attacked with a disease of a singular character, which was remarkably calculated to humble me and my faith. I felt at times much humbled and tried, fearing it might not be understood, I cast a reproach on my character and relations to the blessed Truth, of which I had made some profession; but I was at times so comforted and strengthened, that I could most rejoice in my afflictions, being wonderfully favored with His life-giving presence. My trial was wisely ordered, being in many respects a blessing to me. By it I was much humbled, and at times given up to serve my weary Master, and was enabled to lay my heart before my friends; they having sympathized with me, I think, were better prepared to give me up. I was favored during my trial with faith to believe that the Lord would preserve me if I kept my eye single. I gave up all unto Him, which I have experienced greatly to my comfort since I left my friends. It has been very strengthening and comforting to me, and may I ever remember it with feelings of gratitude to the great Giver of all good, that my little meetings have for the most part, I trust, been blessed by His life-giving presence.

"10th mo. 1st. Had my sitting by myself, which was pretty comfortable. In the afternoon, feeling as if it might be right to do so, I did a visit to John Watt and family; his wife is unwell, the visit appeared to be kindly received, I thought I was favored; left them and went to Owen Blacksnake, paid a visit to his family, and returned home feeling comfortable; Blessed be the name of Israel's Shepherd, for he fails not to be with those who love Him.

"10th mo. 3rd. Of the past week, I kept school on Second and Third-days; had my meeting on Fourth-day. On Fifth-day went to eat Valley to start the school. Attending meetings over which I think I had no control, I was well directed, and although I labored under discouragements, I was mercifully favored with a degree of faith which seemed to bear me up, feeling in my proper case, and a comfortable dependence on Divine Providence.

"On Fifth-day night, the 5th of the month, I did at George Titus'; spent the evening in conversation with George and other Indians; part of the time on the subject of religion,

in which I thought I was mercifully favored, and in a good degree comforted. I think George was in measure affected.

"10th mo. 18th. I have been writing two letters, in which I thought I was favored, and feel comforted in the evidence of His loving-kindness, who is the Helper of them that put their trust in Him."

THE FRIEND.

FOURTH MONTH 5, 1873.

When education is spoken of in common conversation, it is usually understood to apply only to scholastic study of literary and scientific subjects; and we fear the restriction of the term to these limited ideas, has been attended in the minds of many parents with a very inadequate appreciation of the duty they owe to their children, in training them for future usefulness and the fulfilment of the object of their existence in the Divine sight. Taken in its true and broad sense, education begins with the infant at its birth, through the example of the parents, associates, or caretakers, and they lead the child to imitate their own actions, as its capacity of body and mind expands to grasp them. The tones of voice, the expression of the countenance, the sympathy or indifference of the mother, may all form an important element in moulding the future character of her child. The Scriptures inform us that the four-and-twenty elders who sat around the heavenly throne, when they bowed in adoration before the Almighty, exclaimed, "For Thou hast created all things, and for thy pleasure they are and were created." What an exalted view does it give us of the importance of life and the education of an immortal being, to reflect on this solemn truth, and that for the pleasure of the Omnipotent One the helpless infant has been called into existence, and so many years of its early life are committed to the necessary and fostering care of the parents. It was declared of Abraham by the Lord, that "All the nations of the earth shall be blessed in him, for I know him that he will command his children and his household after him, and they shall keep the way of the Lord, to do justice and judgment; that the Lord may bring upon Abraham that which He hath spoken of him." A just and appreciative consideration of the parental obligation, and the probable influence for good or evil which their own temper, conduct, and precepts will exercise over the future of their children, will surely lead them to seek earnestly for Divine grace to fit them for the high office they have assumed; and the primary stages of childhood prior to their attendance at school, will not be neglected as unimportant. It is at this early stage of life, that we fear many parents lose the best opportunity for moulding the plastic character of their offspring to the ways of religion and truth. The father may be much engrossed in providing for the physical wants of his increasing family. The evening hours may be spent in relaxation, reading, or business, in which the children do not share. The mother, perhaps, thinks the attendance at a place of worship twice a week, and family reading in the Bible on First-days, all that duty calls for at her hands in the way of religious instruction. The children see that the chief concern of

their parents, is to obtain the comforts and perhaps elegancies of life, and the affairs of eternity are evidently subordinate to those of temporal existence. Can the tendency of such education fail to lead the youth into the same unmindfulness of Him for whose pleasure they were created? We answer annually in our disciplinary meetings the question relating to reading the Holy Scriptures in our families. A jealousy has often arisen on these occasions, lest a mere formal compliance with the advices of our discipline on the subject, by reading once a week or so with the family, should satisfy the consciences of parents and caretakers; and also, that overseers in framing these answers, should assume as true what is merely surmise, in regard to the frequent reading of the Holy Scriptures by the members of their meetings. Some observation in visiting in Friends' families, has led to a feeling of regret, that the daily assembly of the household for this purpose is not customary with all. If the children see that their father so far values spiritual things over temporal, as to spare a half hour in the morning from his farm or shop to peruse a chapter in the Bible, and wait in spirit on their heavenly Father for Divine help and guidance during the day, we believe it will have an educating tendency in the highest sense, on both parents and children.

When religiously concerned parents send their children away from the paternal roof to boarding schools to acquire their literary education, it involves the serious consideration of a relinquishment on their part of that personal influence on them which home and its associations previously afforded. The officers and instructors in these institutions are therefore to be the examples most prominently before the youth both as to precept and conduct; whilst the companionship of many children of their own age, and of various characters, may have a powerful influence for good or evil not hitherto felt. The means of scientific and literary culture may be all that the anxious parents could wish, but the new elements brought to bear on the moral and religious education of the objects of their solicitude, may be such as to overthrow the teachings of the home circle. It is quite impracticable for each pupil in a large school to receive that parental care which is bestowed at home; and teachers often feel that they have full occupation if they keep pace with the demands of modern education in imparting scholastic instruction; yet, there are opportunities for conscientious instructors to instil Christian sentiments incidentally in the course of their secular teaching, as well as to exhibit in their daily lives and manners those Christian virtues which form a powerful means of leading young persons to value and imitate their example. There are few situations in life, perhaps, where there is more need for grace in a sanctified heart to preserve a just balance of conduct than that of a teacher of a large school. The occasions of irritation to the temper are frequent and strong, and its display by him generally disastrous, both to his good moral influence over the children and the efficiency of his tutelage. The importance of becoming a learner in the school of Christ, preparatory to entering upon the onerous and serious service of governing and guiding the youthful mind, cannot be too strongly felt by those who seek or occupy such stations. If the heart has, by the insin-

ing of Christ the true Light, been led to see its own defects and corruption, and under the burden of a sense of its sins to come unto Him for reconciliation and a new life, such will experience the fulfillment of his promise to receive all such, in order that they may take His yoke upon them and learn of Him. To these He imparts meekness and lowliness of heart, and they find rest to their hitherto dissatisfied spirits. This is the true training-school for teachers of youth, who would enter that vocation not merely to gain a livelihood, but to live to his glory who created them for that object. And may we not say, no more honorable calling or sphere of usefulness, no loftier ambition than this to fill it, could be proposed to the youthful mind.

The Committee who have charge of Westtown Boarding School, we believe, have long felt the importance of these considerations, and have evinced it by having a sub-Committee under appointment for two years past, to give special attention to the religious care of the children placed in that institution. This concern on their part has doubtless been a relief to many of those parents who have parted with their children for some years, in order to give them the benefit of the course of instruction taught there, and we trust it may be fostered in future with sedulous care.

Education, as it does not begin with the school, so it does not end there; nor indeed with the period of adolescence. What errors of judgment and mistakes in management have many young persons made on setting out in life, from the conceit that having arrived at years of legal majority and holding the diploma of a school, a college or academy, they were fully prepared to guide their own course, without the advice of their more experienced relatives or friends! Those who have become the most eminent for their wisdom have realized the truth, that life is a continuous and daily school, in which humility and docility in receiving its varied lessons are the necessary avenues to true knowledge; and that a readiness to unlearn the false, and relinquish unsound conclusions, when the Light of truth reveals their errors, is an essential condition to progress in wisdom, even to the close of life. "A wise man feareth and departeth from evil; but the fool rageth and is confident."

SUMMARY OF EVENTS.

UNITED STATES.—Professor Andrew Dickson White, President of Cornell University, has been appointed by President Hayes, Minister to Germany.

In the United States Senate a general change of officers has been made. The Committee on Privilege and Governor of New Hampshire to fill a vacancy, was not entitled to a hearing. Senator Hear introduced a joint resolution, declaring that the refusal by one House of Congress to make necessary provision for the support of the departments of the Government, except upon condition that the other House and the President shall assent to legislation which they disapprove, is unconstitutional and revolutionary. The resolution was laid on the table by a party vote.

The House is engaged on the Army Appropriation bill; the sitting on the 29th being occupied with the 6th section, which repeats the statute authorizing the use of troops at election polls.

The Tennessee House of Representatives have amended the Senate bill to adjust the State debt, by striking out "forty" and substituting "fifty" cents. It is believed the Senate will agree to this rate, but it is not known whether the bondholders will accept the figure.

The Governor of Louisiana has signed the bill repealing the charter of the Louisiana State Lottery. The officers of the lottery company say their business

will not be affected, as they have taken steps to test the constitutionality of the act in the U. S. courts.

The Texas cattle-drive, for 1879, is estimated will be from 175,000 to 200,000 head; the greater proportion of these yearlings and two-year olds. The margin in this business is now so close, that buyers hesitate before buying. Profits are estimated by cents almost where they were formerly counted by dollars. Cattle in Western Texas are scarce, and with the fall crop now made, there are many advocates of stopping the drive for a few years, in order to restock the country, and thereby reduce the supply, and consequently increase the demand in the North. The competition from Kansas would prove, however, a drawback to this course.

The total tonnage of anthracite coal from all the regions in this State, for the week ending on the 22d ult., amounted to 496,205 tons, against 132,349 tons in the corresponding week last year. Of bituminous coal there were 96,156 tons, against 32,594 of last year. The auction sale of 100,000 tons of Scranton coal in New York on the 26th, realized lower prices than at any public sale in that market for a long time.

The exports from Philadelphia during the past week amounted in value to \$216,746. Of this amount the steamship *Castello*, for Liverpool, took out a cargo valued at \$125,948.00. Of the whole amount there were \$19,910 in wheat; \$137,282 in corn; \$138,400 in petroleum; \$12,009 in sugar; \$138,257 in miscellaneous goods. There are now in port 175 steamships engaged in loading and unloading. Of that number 21 are steamships, 18 ships, 54 barkas, 23 brigs and 60 schooners.

A private letter received in New York from Rome, containing the following: "The American locomotive that was on exhibition at Paris last year, has been making a tour through France, Italy and Switzerland, with the most brilliant success. She attracted great attention at all the places where we stopped, and drew large crowds."

The trade in American coal is growing steadily. A negotiation is now pending for 100,000 tons. The first cargo arrived in Marseilles in 1st month of 1878, and most of it was sent from the Genoa. Since that cargo, there have been twenty-one shipments. All who have tried American coal are well pleased with it, and the indications are favorable for a fine trade. The Paris Exhibition did a great deal towards popularizing American coal in Europe.

Reports from different sections of Pennsylvania indicate that the manufacturing industries are improving. The rail factory of the Pottstown Iron Company is working on double time. The Lackawanna Iron and Coal Company have doubled their steel mill force to meet the increased demand for steel. At Danville, Erie and other points, work is being resumed.

There were 309 ships reported in Philadelphia during the past week. Of whom 188 were adults and 121 children—50 being under one year of age.

Markets.—U. S. Sines, 184, 106½; 5-20s, 1068, 102½; 10-40s, 102—U. S. 8's, 101; 4½ per cent, 1043; 4's, 1007, 995.

Cotton—Sales of middlings at 14 a 10½ cts. per lb. for uplands and New Orleans.

Petroleum.—Crude \$ a 8½ cts. in barrels, and standard white, at 9 a 9½ cts. for export, and 10 cts. per gallon for home use. Refined cotton-seed oil, 41 a 42 cts; Linsed, 61 a 62 cts. from American seed, and 62 a 63 cts. per gallon from crushers' hands; sperm, crude, 85 a 90.

Flour.—The market is quiet and steady: Minnesota extra at \$4.50 for medium, to \$4.90 for fancy; Pennsylvania \$4.75 for good, to \$5.00 for fancy; western, \$4.75 a \$5.50; patent and other high grades, \$6.25 a \$7.50. Rye flour, \$2.75 per barrel.

Grain.—Wheat dull and unsettled. Penna. red, \$1.17 \$1.15½; Penna. and southern amber, \$1.16 a \$1.17. Corn, 40 a 43 cts. Oats, mixed, at 30 a 31 cts; white, 31½ a 32½ cts.

Seeds.—Clover is dull and weak at 4 a 6 cts. for fair and choice. Timothy and Flaxseed unchanged.

Hay and Straw.—Average price during the week:—Prime timothy, 60 a 70 cts.; mixed, 45 a 55 cts.; straw, 70 a 80 cts. per 100 pounds.

Beef cattle are in fair demand, and prices set higher. Extra Pennsylvania and western steers; 5½ a 6 cts. for fair to good, 4½ a 5 cts.; and common, 3½ a 4 cts. per pound. Sheep, good, 6 a 6½ cts.; medium, 5½ a 6 cts.; common, 4½ a 5 cts. per pound. Cows were dull, and sold at \$25 a \$35. Hogs were in fair demand and sold a 6 a 6½ cts. to quality.

FOREIGN.—The Bank of England, at the half yearly meeting of the proprietors on the 12th inst., announced the net profits for the half year to be \$4,167,275, and

the "rest," or surplus, \$17,281,410. It was determined to dividend for the half year of 25 1/2 per cent., which would take \$4,833,855. This dividend compares to a 4½ per cent. rate of distribution, of England stock, for £100 par, sold at the time commencing at £262½. The total capital is \$72,765,000.

The five leading English railways paid the aggregate sum of £101,507 during the last half year, for personal injuries and loss and damage of goods to accidents on their lines.

Much distrust has been caused in financial circles the open avowal of the Oriental Bank Corporation's losses. A depreciation in the value of all shares has followed.

The Under Secretary for India has introduced into the House of Commons, authorizing the raising of £10,000,000 for service in India for the Turkish expenses of the current year.

It is reported the financial difficulties of Turkey become so pressing as to alarm the English Government, and a serious effort is about to be made for help.

The House of Lords on the 29th ult., while the proposition of agriculture and commerce was under consideration, Lord Beaconsfield acknowledged the decision in agriculture was unprecedented, but the decision was anticipated when protection was abolished, was estimated that the public wealth had diminished £80,000,000, and the area of land under cultivation diminished one million acres. He suggests that inquiry as to the change in value of the precious metals and its effect on English industry, might be desirable and useful.

A Vienna dispatch to the *Daily News* says, the new fields in Hungary have covered 12,000 acre land which has already been sown, and the live 12,000 people are endangered.

Correspondence of the *Times*, dated Arment, U. S. Egypt, Second month 24th, gives a heartrending account of the condition of the people of the Nile. The scenes described resemble those in India in the recent famine. In some villages the people past help, eating roots, and suffering with the endurance of despair.

The 10th Annual Meeting of the "Indian Aid Association of Friends of Philadelphia Yearly Meeting will be held at the Street Meeting-house, Philadelphia, on Fifth-day, Fourth month 2nd 1879, at 7½ Friends generally are invited to attend.

RICHARD CADBURY, Cler.

WESTTOWN BOARDING SCHOOL.

The Summer Session opens on Second-day, the 6th of Fifth month. Parents and others who intend to send pupils, will please send application to BENJAMIN PASSMORE, *Sup't.*, (address: Street East, P. O., Chest. Co., Pa.), or to CHARLES J. ALLEN, Treasurer, Arch St., Philadelphia.

Early application is requested when convenient.

TO RENT.—The dwelling house connected with Haddonfield Monthly Meeting School. A Frier family is desired. Apply to

SAMUEL NICHOLSON,
CHARLES L. WILLITS,
Haddonfield, N. J.

A WESTTOWN BOARDING SCHOOL.

A NURSE is wanted for the Boys' Department, under the supervision of the Superintendent of the Summer session. Application may be made to

Anna V. Edge, Downingtown, Chester Co., Pa.
Susanna F. Sharpless, Street Road, " Jersey."
Deborah Rhoads, Haddonfield, New Jersey.
Elizabeth R. Evans, 322 Union St., Philada.

DIED, at her residence in Germantown, on the morning of the 1st of Second mo. 1879, ELIZABETH, widow of the late James R. Greaves, in the 75th year of age, a member of Germantown Particular and Frier Monthly Meeting.

—, at her residence in Tulcruta, Burlington Co., N. J., Third month 22nd, 1879, ZILBERTA SHINN, in the 75th year of her age, an esteemed member of Little E. Harbor Monthly Meeting, Friends. Her early and humble life was such, that her relatives and friends have a comfortable hope that through redeeming love and mercy she has been gathered into everlasting rest, and that it may be said, "Blessed are the pure in heart, for they shall see God."

Selected.

On the Resurrection of Jesus Christ.
BY OLIVITIUS GREGORY.

Several of the facts recorded in the Christian Scriptures have this to distinguish them from others, that they are intimately connected with doctrines; so intimately indeed, that the doctrine grows out of the fact, and not, consequently, the denial of the fact causes the annihilation of the doctrine, and prevents the springing forth of those happy facts which the doctrine is calculated to produce.

Thus the resurrection of Jesus Christ is a fact; *his* resurrection is a doctrine founded on that fact. The denial of one requires the renunciation of the other. "If," says Paul, "there be no resurrection of the dead, then is Christ not risen: and if Christ be not risen, then is our preaching vain, and your faith is also vain." And again, "If we believe that Jesus Christ died, and rose again, even though we also sleep in Jesus, will God bring us with him." Thus, also, the ascension of Jesus Christ to heaven is a fact; *his* return thence to judge the world is a dependent doctrine. Thus spake the angels to the disciples at the ascension of our Lord: "Why stand ye gazing up into heaven? This same Jesus, which is taken up from you into heaven, shall come again in like manner as ye have seen him go into heaven." "Shall come to be adorned in his saints, and to be glorified in all them that believe."

Hence, since the most exalted hopes of a Christian, the most animating doctrines of his religion, have, for their basis, the fact of the resurrection of Jesus Christ; it is requisite that his faith in that fact be firmly "rooted and grounded." And, happily, the general evidences in confirmation of so important an event flow from various and satisfactory sources. As from the predictions of Jesus Christ, that at a certain time he should raise himself from the dead. From the fact that, at this precise time, his body was not to be found in the sepulchre, although the most careful precautions had been taken to prevent its removal. From the positive testimony of many, that after this time they saw Christ, conversed with him, the most incredulous touched and felt him, to remove their doubts, and all received from him those instructions on which they acted in promulgating his Gospel. From the clumsy and self-contradictory story invented by the Jews in contradiction of this fact. And from the suc-

cess which attended the preaching and declaring that he was "crucified and raised from the dead."

It is not my intention to enlarge upon these various sources of evidence; but merely, as assuming (as I may now, I trust, fairly do) the genuineness of the first four books of the New Testament, to describe, briefly, the leading circumstances of Christ's resurrection, and several appearances previous to his ascension; and then to adduce a few general, though, I hope, unanswerable arguments, in favor of this extraordinary event.

The circumstances of the Resurrection of Jesus Christ, and the subsequent appearances, as they may be collected from the accounts of the several Evangelists, have been related with slight variations by different authors. The order I shall adopt appears to me as free from objection, and as little exposed to the cavils of unbelievers, as any I have met with. To render this history the more perspicuous, it may be proper to begin with reminding you, that, when Jesus Christ was led to be crucified, a great company of his friends and acquaintance followed, bewailing and lamenting him. Among the rest was his own mother, who, with two mors of her name, and the apostle John, stood so near him, that he could speak to them. While he was nailed to the cross, he consigned his mother to John's care, it appearing that she was then a widow. This beloved disciple, probably, took her immediately to his own house, before the three hours' supernatural darkness, that she might not be there to see him expiring. But the other two women continued there still, as well as many more who stood farther off. When the darkness was over, and our Lord had yielded up his spirit, they were there still; and all of them attended till he was buried; it should seem, also, that the two Marys waited later than the rest, till all was over, and he was laid in the sepulchre. A considerable company of the women seem to have agreed to embalm their Lord's body early on the third day; they therefore that evening prepared what time and circumstances would admit, and rested on the sabbath, conformably with the commandment.

Not so the priests and pharisees. With all their pretended zeal for the Sabbath, they were very busy on that day; consulting, agreeing, preparing an address, waiting with it on Pilate, obtaining a guard, sealing the stone, and setting all safe. This was their sabbath-employment. By the end of the day all was as safe as they could make it. But very early on the following morning, the first-day of the week, *i. e.* about the break of day, or a little earlier, an angel descended from heaven, came and rolled back the stone from the entrance of the grave, and sat upon it, regardless of either seal or guard. The keepers or guards were terrified at his appearance, and became as dead men. Recovering themselves a little, however, some of them went to the chief

priests, and related what had happened: the chief priests and elders "gave large money to the soldiers," saying, "Say ye, His disciples came by night, and stole him while we slept."

About the time of the earthquake which occurred on the descent of the angel, the two Marys were preparing to go very early to see whether all about the sepulchre was safe, before the rest of the company could go. Either they called on Salome, or met her in their way; and as all three passed on towards the sepulchre, being desirous, probably, to begin to embalm the body before their friends arrive, "they said among themselves, Who shall roll away that way the stone from the door of the sepulchre?" All this time they knew nothing of the guard, or of the opening of the grave; but as they came near the sepulchre "at the rising of the sun," they looked forward, "and saw that the stone was rolled away," for it was very great." This, as was natural, caused a multiplicity of varying emotions in their minds. Mary Magdalene, being at once warm in her affection, and anxious in her disposition, concluded that the body was stolen; and would therefore go no farther, but hastily ran back to tell Peter and John what she had seen, and what she thought; those two zealous disciples, therefore hastened thither to ascertain the truth of her relation. But while she ran back, the other Mary and Salome approached nearer to the sepulchre. The angel, who formerly sat on the stone to terrify the guard, had by this time moved into the sepulchre; for Christ rose and went out as soon as the stone was rolled away; and though the women were near enough to see the stone, they could see no angel upon it before Mary Magdalene ran back. Mary and Salome thus advancing they found no obstruction, and resolved to ascertain whether the body was taken away or not. Just entering, therefore, into the sepulchre, they saw the angel, who invited them farther in, to "behold the place where the Lord had lain." But they were affrighted; so the angel told them "the Lord was risen," directed them to go and inform his disciples, and Peter; and to tell them, moreover, that they should see him in Galilee; as he had assured them previous to his crucifixion. The women, under the joint influence of fear, joy, and amazement, ran away, saying nothing to any one, but fled trembling. They were just going when Mary Magdalene arrived the second time, with Peter and John, though it was yet early. The two disciples, before they reached the sepulchre, ran quicker than Mary; the angel having now disappeared, the two men went into the sepulchre, found the body was not there, but saw the grave-clothes lying folded up, indicating that there had been no indecent haste. *John believed* "the Lord was risen;" but they both soon went away home without seeing him. Mary Magdalene now hurried behind, to wrap alone, appearing in much doubt as to what had become of the body of Jesus. While in this mournful, anx-

ious state of mind she stooped down and looked earnestly into the sepulchre, where she saw two angels, one at the head, the other at the feet, where the body had lain. They asked why she wept: she replied it was because she had lost her Lord; and as she made the answer, she in haste looked another way and saw Jesus; but not knowing him, being half blinded by her apprehensions and her tears, she supposed it was the gardener who cultivated the garden in which the sepulchre was, and therefore said to him, "Sir, if thou hast borne him hence, tell me where thou hast laid him, and I will take him away." Then Jesus made himself known unto her. This therefore was his first appearance after his resurrection, to any of his people; and it was early. Mary Magdalene departed immediately, "and told the disciples that she had seen the Lord, and that he had spoken to her." Thus, as some of our old divines have remarked, woman, who was first in the original transgression, was first in proclaiming the fact of the resurrection, and laying the grand corner stone in the Christian edifice.

The other Mary and Salome, full of fear and amazement, had turned aside into some retired place; and needed time to recover themselves before they could carry any tidings. But while they were in this consternation, their compassionate Lord met them, and said, "All hail: be not afraid," proceed cheerfully on, and deliver to my disciples the message you have received from the angel, "that they go into Galilee." This was the second appearance of Christ; and it was to two women.

(To be continued.)

Margaret Ellis to Mary Pemberton.

Radnor, the 31st day of the First month, 1761.

Respected Friend,—I have a pretty deal of thought about thee since I saw thee last, and a concern that thou mayest dwell in the furnace that the dross may be done away; for when I am in a deep consideration of thy afflictions, I see it will work for thy good and [that of] thy family, provided thou wilt keep down in thy mind, and [in] as little company as thou can, for there are but a few in our time that go down to the depths, although they make a high calling of religion. I find there is need to dwell close with the mind anchored upon God, that we may get through the trials and the trouble that the Lord suffers to come upon us; I would not have thee to be discouraged, but keep thy mind to thyself, and dwell under the weight of the work; for this thou hast met with has not come out of the dust; but it will be for thy good, if thou wilt keep near to the gift of God in thyself: then thou shalt see the way will be made through the great sea, that thou may sing upon the bank of deliverance, but not yet: don't forget it, there must be a time to do the work well, that it need not be done again. I am clearly of the mind that the Lord loves thee, and will have thee become His follower in sincerity, to know Him more and more in thyself, that peace may remain to the end, and an answer of well done, good and faithful servant, enter into the joy of thy Lord. I have nothing in view but the honor of God, and the good of thy soul.

This from thy sincere friend,

MARGARET ELLIS.

The approbation of men is not the standard of the child of faith.

An Indian's View of Indian Affairs.

(Continued from page 266.)

"The United States Government again asked for a treaty council. My father had become blind and feeble. He could no longer speak for his people. It was then that I took my father's place as chief. In this council I made my first speech to white men. I said to the agent who held the council:

"I did not want to come to this council, but I came hoping that we could save blood. The white man had no right to come here and take our country. We have never accepted any presents from the Government. Neither Lawyer nor any other chief had authority to sell this land. It has always belonged to my people. It came included to them from our fathers, and we will defend this land as long as a drop of Indian blood warms the hearts of our men."

"The agent said he had orders, from the Great White Chief at Washington, for us to go upon the Lapwai Reservation, and that if we obeyed he would help us in many ways. 'You must move to the agency,' he said. I answered him: 'I will not. I do not need your help; we have plenty, and we are contented and happy if the white man will let us alone. The reservation is too small for so many people with all their stock. You can keep your presents; we can go to your towns and pay for all we need; we have plenty of horses and cattle to sell, and we won't have any help from you; we are free now; we can go where we please. Our fathers were born here. Here they lived, here they died, here are their graves. We will never leave them.' The agent went away, and we had peace for a little while.

"Soon after this my father sent for me. I saw he was dying. I took his hand in mine. He said: 'My son, my body is returning to my mother earth, and my spirit is going very soon to see the Great Spirit Chief. When I am gone, think of your country. You are the chief of these people. They look to you to guide them. Always remember that your father never sold his country. You must stop your ears whenever you are asked to sign a treaty selling your home. A few years more, and white men will be all around you. They have their eyes on this land. My son, never forget my dying words. This country holds your father's body. Never sell the bones of your father and your mother.' I pressed my father's hand and told him I would protect his grave with my life. My father smiled and passed away to the spirit land.

"I buried him in that beautiful valley of winding waters. I love that land more than all the rest of the world. A man who would not love his father's grave is worse than a wild animal.

"For a short time we lived quiet. But this could not last. White men had found gold in the mountains around the land of winding water. They stole a great many horses from us, and we could not get them back because we were Indians. The white men told lies for each other. They drove off a great many of our cattle. Some white men branded our young cattle so they could claim them. We had no friend who would plead our cause before the law councils. It seemed to me that some of the white men in Wallowa were doing these things on purpose to get up a war. They knew that we were not strong enough

For "The Friend"

to fight them. I labored hard to avoid trouble and bloodshed. We gave up some of our country to the white men, thinking that thus we could have peace. We were mistaken. The white man would not let us alone. We could have avenged our wrongs many times but we did not. Whenever the Government has asked us to help them against other Indians, we have never refused. When white men were few and we were strong, could have killed them all off, but the Nez Percés wished to live at peace.

"If we have not done so, we have not been to blame. I believe that the old treaty I never been correctly reported. If we were sold the land we own it still, for we never sold it. In the treaty councils the commissioners have claimed that our country had been sold to the Government. Suppose a white man should come to me and say, 'Joseph, like your horses, and I want to buy them,' say to him, 'No, my horses suit me, I will sell them.' Then he goes to my neighbor and says to him: 'Joseph has some good horses. I want to buy them, but he refuses to sell.' My neighbor answers, 'Pay me the money, and I will sell you Joseph's horse.' The white man returns to me, and says, 'Joseph, I have bought your horses, and you must let me have them.' If we sold our land to the Government, this is the way they would bought.

"On account of the treaty made by the other bands of the Nez Percés, the white men claimed my lands. We were troubled greatly by white men crowding over the line. Some of these were good men, and we lived at peaceful terms with them, but they were not all good.

"Nearly every year the agent came over from Lapwai and ordered us on to the reservation. We always replied that we were satisfied to live in Wallowa. We were careful to refuse the presents or annuities which he offered.

"Through all the years since the white men came to Wallowa we have been threatened and taunted by them and the treaty Nez Percés. They have given us no rest. We have had a few good friends among white men, and they have always advised my people to bear these taunts without fighting. Our young men were quick-tempered, and I have had great trouble in keeping them from doing rash things. I have carried a heavy load on my back ever since I was a boy. I learned then that we were but few, while the white men were many, and that we could not hold our own with them. We were like deer. They were like grizzly bears. We had a small country. Their country was large. We were contented to let things remain as the Great Spirit Chief made them. They were not; and would change the rivers and mountains if they did not suit them.

"Year after year we have been threatened but no war was made upon my people until General Howard came to our country two years ago and told us that he was the white war-chief of all that country. He said: 'I have a great many soldiers at my back, am going to bring them up here, and then will talk to you again. I will not let white men laugh at me the next time I come. This country belongs to the Government, and I intend to make you go upon the reservation.'

"I remonstrated with him against bringing more soldiers to the Nez Percés country

had one house full of troops all the time at Lapwai.

The next spring the agent at Umatilla Agency sent an Indian runner to tell me to let General Howard at Walla Walla. I did not go myself, but I sent my brother I have other head men to meet him, and they had a long talk.

General Howard said: 'You have talked right, and it is all right. You can stay in allowa.' He insisted that my brother and company should go with him to Fort Lapwai. When the party arrived there General Howard sent out runners and called all the Indians in to a grand council. I was in that council. I said to General Howard, 'We are ready to listen.' He answered that he would not talk then, but would hold a council next day, when he would talk plainly. I said to General Howard: 'I am ready to talk to you. I have been in a great many councils, but I am no wiser. We are all sprung from woman, although we are unlike in many things. We can not be made over again. You as you were made, and as you were made we can remain. We are just as we were made by the Great Spirit, and you can not change us; then why should children of one mother and one father quarrel—why should we try to cheat the other? I do not believe at the Great Spirit Chief gave one kind of men the right to tell another kind of men that they must do.'

General Howard replied: 'You deny my authority, do you? You want to dictate to me, do you?'

'Then one of my chiefs—Too-hool-hool-suit rose in the council and said to General Howard: 'The Great Spirit Chief made the world as it is, and as he wanted it, and he made a part of it for us to live upon. I do not see where you get authority to say that we shall not live where he placed us.'

General Howard lost his temper and said: 'Shut up! I don't want to hear any more of such talk. The law says you shall go upon the reservation to live, and I want you to do so, but you persist in disobeying the law (meaning the treaty). If you do not move, I will take the matter into my own hand, and make you suffer for your disobedience.'

'Too-hool-hool-suit answered: 'Who are you, that you ask us to talk, and then tell me sha'n't talk? Are you the Great Spirit? Did you make the world? Did you make the sun? Did you make the rivers to run for us to drink? Did you make the grass to grow? Did you make all these things, that you talk to us as though we were boys? If you did, then you have the right to talk as you do.'

General Howard replied, 'You are an impudent fellow, and I will put you in the guard-house,' and then ordered a soldier to arrest him.

'Too-hool-hool-suit made no resistance. He asked General Howard: 'Is that your order?' 'No,' said he. I have expressed my heart to you. I have nothing to take back. I have spoken for my country. You can arrest me, but you can not change me or make me take back what I have said.'

'The soldiers came forward and seized my friend and took him to the guard house. My men whispered among themselves whether they should let this thing be done. I counseled them to submit. I knew if we resisted that all the white men present, including General Howard, would be killed in a moment,

and we would be blamed. If I had said nothing, General Howard would never have given another unjust order against my men. I saw the danger, and, while they dragged Too-hool-hool-suit to prison, I arose and said: 'I am going to talk now. I don't care whether you arrest me or not.' I turned to my people and said: 'The arrest of Too-hool-hool-suit was wrong, but we will not resent the insult. We were invited to this council to express our hearts, and we have done so.' Too-hool-hool-suit was prisoner for five days before he was released.

'The council broke up for that day. On the next morning General Howard came to my lodge, and invited me to go with him and White Bird and Looking-Glass, to look for land for my people. As we rode along we came to some good land that was already occupied by Indians and white people. General Howard, pointing to this land, said: 'If you will come on to the reservation, I will give you these lands and move these people off.'

'I replied: 'No. It would be wrong to disturb these people. I have no right to take their homes. I have never taken what did not belong to me. I will not now.'

'I rode all day upon the reservation, and found no good land unoccupied. I have been informed by men who do not lie that General Howard sent a letter that night, telling the soldiers at Walla Walla to go to Wallawala Valley, and drive us out upon our return home.'

'In the council, next day, General Howard informed me, in a haughty spirit, that he would give my people thirty days to go back home, collect all their stock, and move on to the reservation, saying, 'If you are not here in that time, I shall consider that you want to fight, and will send my soldiers to drive you on.'''

(To be continued.)

James Alford.

Selected.

James Alford was born near Rahway, in the province of East Jersey, of parents who were slaves. We have no certain information of the time of his birth, but he is believed to have been at least eight years of age at the breaking out of the American revolution. Whilst remaining in the family to which his parents belonged, he was treated with great kindness. One of the daughters of his master marrying, he was given to her; and she not reneeding his services, sold him to a man residing in Rahway, who was both a farmer and tanner. Here he began first to experience the bitterness of slavery. His new master was passionate and cruel, and for trivial faults often treated his servants with great barbarity. At one time, whilst James was suffering under a severe headache, he kicked him down the stairs. At another time, being in the field ploughing, his master, because he had not clearly understood one of his orders, knocked him down, jumped over him with great violence, and beat him on the body, and with a large stone beat him on the head until he was nearly blind. He would, in all probability, have killed James on the spot, had not some of the neighbors, by force, dragged him away.

When the sufferer, in after life, recurred to the many wrongs he had endured, he manifested no resentment or hard feeling towards the individual who had oppressed him. He believed that all these afflictions had been permitted to befall him by his kind and gra-

acious Lord, for his eternal well-being. When about fifteen years old, whilst rambling on a First day about the tan-yard, he fell into one of the pits, which was full of foul water, very cold. Being unable to extricate himself, he would have perished but for the assistance of others. When taken out life was nearly extinct. Regarding this circumstance as a merciful dispensation of Divine Providence, in showing the necessity of a present preparation for another state of existence, he became very earnest in seeking for help and strength from above. He turned from the path of thoughtless folly, and was truly concerned to perform his duty faithfully to his master.

It was fully impressed on his mind that the Lord, in his own good time, would open a way for his freedom; and in this assurance he rested contented. He was very anxious to learn to read; but the privilege of going to school not being allowed him, he was obliged to seek for instruction elsewhere. As he was remarkably civil and obliging, those who visited at his master's house, generally on going away, gave him something for his care and attention in waiting upon them. This money he carefully preserved, and paid over to his master's children to induce them to instruct him in the evenings when the hard bodily toil of the day was over. He was allowed no other light but that of the kitchen fire. This, however, answered his purpose, and by close and persevering application he became a tolerable reader. Having a taste for knowledge, he, without an instructor, acquired the art of writing and a sufficient acquaintance with arithmetic to be able to manage money matters both for himself and his master. His industry, good management and strict integrity, gained him the perfect confidence of his master, who now treated him with kindness, and left the entire control of his concerns in his hands. He afterwards said that if he could have been happy in slavery, he might have been so at this period, for he had nothing to complain of.

About the time that he was, as supposed, twenty-eight years of age, he frequently spoke with his master concerning his freedom. He was willing, although he thought he had served unrequited long enough, to pay a reasonable price for his freedom. His master, however, would listen to no terms; and James, with great frankness, informed him he should leave him. Believing that the proper time had come for his departure, he left Rahway, and proceeded directly to Philadelphia, where he arrived in safety, not having been challenged on the road. He immediately found employment at hay-making in the meadows below the city; and soon after obtained a situation in North Wales. His master, who was incensed at his departure, used many endeavors to search him out, but never was able to obtain the least trace of him. James said, that as for himself, he never suffered the least uneasiness at the thought of his master's finding him, for he was well assured that the Lord would never suffer him to be taken again into slavery. He continued faithfully serving his different employers,—denying himself everything that he could possibly do without,—until he had saved two hundred dollars of his earnings. In unshaken confidence in the protecting providence of his divine Master, he did not hesitate to take this money with him, and proceed at once to Rahway. There he went to the house of a Friend, who undertook to

negotiate for his legal freedom. His master, having no hope of ever seeing him again, gladly manumitted him in due form of law, for the two hundred dollars.

James now returned to Pennsylvania, where he was generally favored to find employment amongst kind and respectable people. Amongst others, he lived for a considerable period with that able minister of the gospel of Christ, James Simpson. He frequently remained for many years in the same service. In one situation he continued fifteen years, and having allowed most of his wages to remain in the hands of his employer, he lost through his bankruptcy nearly \$1500. This was a serious loss at this time of life; but he did not discover any bitterness towards those who had thus injured him. He seemed to pity and feel for them more than he did for himself. He said it was all permitted for his good; he might have been led to trust in earthly riches if he had met with no losses; that he felt firm unshaken faith that the Lord would take care of him, and never suffer him to want. According to his means, he was liberal; and had always something to spare for the destitute. In his personal appearance he was always neat, plain, and clean, and his clothes lasted longer, and looked better than those of most persons in his condition. His economy, as to personal expenditures, was from principle, that he might have the more to bestow on those who needed.

To the end of life he was every way comfortably provided for. He had many friends,—an affectionate wife for his nurse,—and, above all, a humble, yet unshaken confidence in the watchful regard of his Almighty Care-taker. He died of paralysis, the 24th of 8th month, 1843, aged about 73 years. Having been careful, faithfully to fill up his various duties in this life, he won the love and esteem of his employers and acquaintance, whose sorrow at his loss was relieved by the firm belief that he was gathered home, in mercy, to the rest prepared for the righteous.

True Religion.—True religion is the true rule and right way of serving God. And religion is a pure stream of righteousness flowing from the image of God, and is the light and power of God planted in the heart and mind by the law of life, which bringeth the soul, mind, spirit, and body to be conformable to God, the Father of Spirits, and to Christ; so that they come to have fellowship with the Father and the Son, and with all his holy angels and saints. This religion is pure from above, undefiled before God, leads to visit the fatherless, widows, and strangers, and keeps from the spots of the world. This religion is above all the defiled, spotted religions in the world, that keep not from defilements and spots, but leave their professors impure, below and spotted; whose fatherless, widows, and strangers, beg up and down the streets.—*Epistle of George Fox.*

The members of our Society are too generally "unconcerned in heart and ear;" yet to the posterity of a people once highly favored "is the dew of heaven" frequently diffused, both in a ministerial and immediate manner, in their assemblies; from whence I am persuaded, did not their goodness pass away "as the morning cloud and the early dew," the Lord of infinite mercy would make of them

as polished shafts in his quiver; and in his quiver would he hide them.—*S. Scott.*

III. LEADETH ME.

The clouds hang heavy o'er my path,
The way I cannot see;
But through the darkness well I know
My God is leading me.
'Tis sweet to feel my hand in His,
When all around is dim;
To close my weary, aching eyes,
And trustful, follow Him.

Through many a thorny path below,
He leads my weary feet;
Through many a vale of tears I go,
But still I feel 'tis sweet
To know that God is with me still,
My hope, my strength, my guide;
That still he leads, and so I walk
In safety, satisfied!

In duty, strength—in conflict, power
My God! thou givest me;
And in temptation's darkest hour,
Support I draw from thee.
In earthly care, for earthly need,
Thy grace doth still provide;
And ne'er despondent do I fall,
For thou art by my side.

In every joy, its highest joy
My soul doth find in thee;
If sorrows come, on darkest cloud
The bow of hope I see.
Through all the devious path of life,
Thy hand my steps doth guide;
And when through death's dark vale I pass,
I'll feel thee near my side.

Up to the very gate of heaven,
Thy hand my guide shall be,
Till in the sunlight of the throne
Thine unveiled face I see.
In life, in death, in heaven above,
My songs of thanks I raise;
And through eternity my soul
Shall never cease thy praise!

SPRING.

O green, up-springing grass, your tender freshness spreading

By many a narrow pass where way-worn feet are treading,—

O lightly waving trees, whose swelling leaf-buds render
Undoubted promises of the full summer's splendor,—
O dainty daffodils, whose lovely sunlit faces
Brighten the barren hills with unexpected graces,—
O all ye blossoms, set the fells and meadows over,
Wind-flower and violet, and columbine and clover,—
Bless ye the Lord on high; by wood, and field, and river,

Praise Him, and magnify His holy name forever!

Now when the budding spring escapes from winter's durance,

Hope hath its flowering, and Faith its sweet assurance;
How shall our hearts be sad when Nature's face rejoices,
And earth and air are glad with her tumultuous voices?
Ears that His message seek, and doubt not in possessing,

To them the winds shall speak in undertones of blessing;

And to the seeing eyes, His gracious works beholding,
No little Bird that flies, no small green thing unfolding,
But shall His love express who doth our souls deliver—
Whose holy name we bless and magnify forever!

Praise Him, O soul of mine! nor ever cease from praising,

Though olive-tree and vine be blighted in the raising;
Though flood and frost and fire assail me in one morning

And though my heart's desire shall perish without warning!

Still shall His rivers flow, the heavens declare His glory;

Still shall His green things grow, His winds repeat their story;

And I, who sit to-day beneath the cloud of sorrow

And see no opening way to sunshine for the morrow,
Still by His mighty word upheld for fresh endeavor,
Will magnify the Lord, and bless His name forever!

Selected.

From London Yearly Meeting to Friends, Tortola, 1759.—"Dear Friends, though so among you have departed from their first love, and to their own hurt have fallen in with the enticements of the enemy of man's happiness who seeks to destroy the precious life; entreat you in the bowels of that love which our Heavenly Father hath mercifully sent abroad in your hearts, and which reaches for unto you at this time, that it may be your care to wait daily for, and inwardly in faith and patience feel after that Power, which I have visited your souls, and hereby you will keep meek and humble, and experience the teachings of Divine Wisdom, whose promises are yea and amen forever; and whose grateful care and support fails not those who are given up to serve the Lord with full purpose of heart. We much desire, beloved friends that you may increase with the increase of God; and as you still find Him striving with you and working for you, close in with His Power, that you may grow in the Truth as the saving knowledge of our Lord and Saviour Jesus Christ, so will you come to bring forth fruits of righteousness and true holiness to the praise of Him who hath called you."

Good Books.—Next to a good associate a friend, in all good influences, is a good book. And as multitudes are led to ruin by evil associates, so are multitudes by bad books. There are few things about which parents and friends ought to be more careful than about the books read by the young, and yet there are few things about which they are more careless, though one good book may be their salvation, and one bad book the ruin of a reader.

Baxter, as he tells us, was converted through the influence of a book. The pungent truth of his books, led to the conversion of Doddridge. Doddridge's "Rise and Progress," led to the conversion of Wilberforce. Wilberforce's "Practical View," was the means of Leigh Richmond's conversion. And Richard Mowbray's "Dairyman's Daughter," has been the means of converting hundreds is if not thousands. And so, books like "Foster's Essays," Bunyan's "Pilgrim's Progress," Doddridge's "Rise and Progress," and the "Advice to Young Christian," and many others that might be mentioned, have shaped the character and moulded the destiny of thousands, both in time and eternity.

On the other hand, it is officially stated that of 177,396 volumes issued to readers from the New York Mercantile Library, 108,856 were novels; showing that nearly 70,000 more works of fiction were read than of other works—history, poetry, travels, &c., all put together. A large part of the readers were doubtless, comparatively young persons, and a large part of the novels, not doubtless, were such as to give unreal and false views of life of society, of human responsibility, of virtue and religion, while not a few are licentious and immoral in their teachings. And the fruits of such reading are seen, all over the land, in the easy morality, the loose and fraudulent business courses, and the outbreaking crimes that disgrace and alarm society. And the large proportion of these evils found in what are counted the upper classes, may have originated, to some extent at least, from the reading of books giving low and false views of morality, and of personal duty and religion.

more thought, then, be given to the
ing of the young. See that good books
not only published, but commended, and
reading encouraged. Look to the books
family, in the Sunday-school library,
heads of your children—to those of
own reading. And see that no com-
position of books be encouraged or allowed,
character that you would disapprove in
associates for yourselves or others.—
nal Baptist.

Testimonies to the Way to Salvation.

omas Story in a dispute with a man in
England, quoted that passage, "Every
which confesseth that Jesus Christ is
in the flesh, is of God; and every spirit
doth not confess that Jesus Christ is
in the flesh, is not of God." &c. On it
takes this comment: "A verbal acknow-
ledgment only, of the coming of Christ in
of flesh in that day, is not intended in
place; for the devils also believe that
remble, and yet remain devils still: But
confession must arise from experience of
working, revelation or manifestation of
pirit of Christ in the heart and mind of
who thereby believeth in Christ to pre-
valvation; according to the same apostle
e below, where he saith, 'Henceby know
at we dwell in Him, and He in us, be-
He hath given us of his Spirit.' Again
the apostle Paul, 'The Spirit itself
t witness with our spirit, that we are
children of God.' And again, 'If any man
not the Spirit of Christ, he is none of
—Thos. Story, folio edition, p. 321.

omas Story, in a sermon at Cambridge
17, says: "Christ being offered on the
is a propitiation for the sins of the whole
l, so far as they are acts against the Law,
pplicable and effectual only as men be-
in that Light, and walk also in Him;
is, in obedience to the rule of his Light
Grace, inwardly made known and re-
d: For, saith the apostle, If ye walk in
light as He is in the Light, then (that is,
at case) ye have fellowship one with an-
er, and the blood of Jesus Christ, his Son,
seth us from all unrighteousness. And
also shows, that the stain and pollution
is done away by the inward appearance
Christ by his Holy Spirit. And again, as
the prophet Malachi, 'He shall sit as a
ter and purifier of silver; He shall be as a
s soap:" all which signify a perfect and
ugh cleansing, as well as pardon; and
out which cleansing, men cannot enter
s kingdom, for there is no unclean thing
pter there.—*Id.*, p. 580.

am the Light of the world, (said Christ
Lord), whosoever followeth me shall not
e in darkness. And again, this is the
emnation of the world, that light is com-
e the world, but men loved darkness rather
light, because their deeds are evil. And
b, Whosoever things are reprov'd are
e manifest by the Light; for whosoever
s manifest is light. All this is said of
st, who is that one propitiation for the
not of the apostles and those that had
ly believed only, but also for the sins of
whole world, who at that time had not
believed, but were still in unbelief; which
ing being on God's part, in discharge of
promises before by his prophets, the way
the promises become effectual unto us,

to believe in this Light, that we may be
the children of God in Him. And first believing
in this Light and walking in Him, (that is,
in obedience to his manifestations and dis-
coveries), then the blood of Christ cleanseth
from all sin, and the promises are so applied;
but the unbelieving and disobedient are under
condemnation still."—*Id.*, p. 627.

"If you are lovers of the Light in your
consciences, that reproveth sin, then you love
God. * * I say if thou art obedient and
subject thereunto, then art thou in the way
of God, which is the way of holiness, without
which no man shall ever know peace with
God. * * If thou hatest that in thee which
leth thee see thy sins, which breaks thy peace,
and sometimes makes thee afraid and troubles
thee for it (which is God's witness), then thou
hatest God and Christ and the Spirit and
ways of God, and the people of God; and to
all such Jerusalem is become a burdensome
stone, as it is to many at this day, who are
lovers of pleasure more than God, and love
darkness rather than light, because their
deeds are evil. But this I testify in the name
of the Lord God of hosts: The Light is the
way, and there is no other to eternal life and
peace; and all that hate it wherewith they
are enlightened, shall be condemned with it
as enemies to God and their own souls."—
Wm. Bayly's Works, p. 21.

Cutting a Tiger's Claws.—An interesting
operation was recently performed in the Car-
nivora house at the Zoological Garden, that
of cutting the claws of the tiger "Jim."
"Jim" was among the animals purchased in
Europe by Barnum after the fire in New York
in 1874, and came into the possession of the
Society about two years ago, when he was
purchased at one of Barnum's sales at Bridge-
port, Conn. "Jim" is 9 years old, and is said
to be the largest tiger in this country.

For some months past it was noticed that
the animal's claws were growing into the
flesh, causing him great pain, and it was de-
cided to have them cut. After the animal
had been securely fastened, the cutting was
done with a pair of sharp wire cutters. It
was at first thought it would only be neces-
sary to cut the claws of the hind feet, but
upon examination it was found that unless
the claws of the other feet were also cut they
would in a short time cause the same trouble,
consequently the claws of all four feet were
cut. After the operation, burnt alum and
balsam of fir was applied. At 3 o'clock, feed-
ing time, "Jim" took his rations with evident
relish, and afterwards took a good nap. The
hickory club which was placed in the animal's
mouth during the operation was cut into
splinters by his teeth. The operation occu-
pied 20 minutes.—*Ledger.*

Watchfulness.—The older I grow, the more
needful I find the watch: there is no other
safe dwelling place; there is no cessation
of arms; the warfare is continual, and must
be continually maintained, or there is no
standing fast in the faith. But to such as
endeavor, through watchfulness and prayer,
to quit themselves like men, strength will be ad-
ministered in due time, not only to stand fast in
the faith, but to become strong; yea, that we
be "strong in the Lord and in the power of
his might." So that I very much desire, that
the minds of all may be clothed with the in-
vincible armor, wherewith they will be "able

to stand in the evil day, and, having done all,
to stand."—*Daniel Wheeler.*

For "The Friend"

Diary and Letters of Ebenezer Worth.

(Continued from page 271.)

In the last extract, allusion was made to
two letters, one of which, as it gives some in-
sight into the course of life of E. W. among
the Indians, is thought to be of sufficient in-
terest to insert.

Tuesassa, 10th mo. 10th, 1843.

Dear friend:—Thou hast frequently allu-
sion been the companion of my mind, and I think I
can say the love I once had for thee and the in-
terest I felt in thee, have not in any degree
abated, but have increased, and the desire of
my heart is, that thy time and talents may
be employed in the blessed Master's service;
that thy day's work may be going on in the
day time; that thou mayest be favored at
seasons to feel a comfortable evidence that
thou art journeying forward in the strait and
narrow way; thou wilt then be cheered with
the prospect, that as time is swiftly passing
away, thou art approaching the mansions of
everlasting rest.

In relation to the difficulty between —
and thyself, and in the trial and trouble it has
occasioned, I have felt sympathy with thee,
and a desire that if it is not settled, thou mayest
rest the burden on the shoulders of thy
friends and —, and there leave it. I fear if
thou shouldst not do so, the loss to thee in
the best things will far outweigh all that can be
gained. Suffer, dear friend, in a Christian
spirit, and I think if thou shouldst continue
faithful thou wilt be rewarded for it, and the
example be of great value to thy children, for
whose growth in the Truth I feel interested.

16th. Thou queried whether I had not time
to write? I may answer, I have for the most
part of the time found plenty of business to
occupy me, and particularly so of late. I
have now two schools in operation, one at
Cold Spring, the other about fifteen miles up
the river and about seventeen from Tuesassa.
I have been spending part of my time at each
place; three days of the forepart of the week
at the school at Cold Spring, on this part of
the reservation, excepting the time I have my
mid-week sittings, which have been on Fourth-
day, since I have been attending to both
schools. Whilst I taught only at Cold Spring, I
had my sitting on Fifth day with the Indian
children, who, poor little creatures, scarcely
know what it meant, I suppose; their quiet,
orderly behavior has been, for the most part,
rather surprising, and I have been comforted
in their company. I understand it was Jos.
Elkinton's practice, but in my weakness, it was
at times, a trial to commence it. Fifth, Sixth,
and Seventh days I have spent in visiting the
schools at Horse Shoe Bend; I carry my pro-
visions and horse-feed with me, cook and sleep
in the school house, except one night I slept in
the house of Geo. Titus, an Indian. I started
on last Fifth-day morning; my horse having
lost a shoe, I expected to get a horse of Owen
Blacksnake and leave mine; his horses pasture
in the woods; he told me I might take his
pony, which he thought was two or three
miles up the river on my way to the school.
B. Williams, who was going to hunt a horse
of his, and I, travelled together; we met some
children going to the school at Cold Spring.
B. W. inquired of them, in Indian, if they had
seen any horses; he told me, they said, "there

were lots of them on the flats just above." We called at Wm. Patterson's; his son Samuel, who is a smart active young man of an obliging disposition, kindly offered me one of their horses, and to keep mine. He accompanied us to where the horses were; we did not find any we were looking for, but caught a young horse of Owen Blacksnake's; after getting him on the road, found he was a little lame, so concluded to take my own. I rode slowly and arrived at the school a few minutes after it closed, unloaded my possessions, tied the halter to the leg of my horse, and let her pasture for a time about the school house, the grass being good,—then went to getting supper; boiled some potatoes, had bread and butter and some cakes. The teacher, who was an Indian, having some cheese and onions, we made use of a broad bench for a table, and ate a comfortable supper. After feeding my horse and putting her away in a small inclosure, I paid a visit to an Indian family, which was agreeable to me. The teacher and I then went to the school house and built a good fire, the Indian had a "comfortable," and I a buffalo robe; he fixed our bed and laid himself down. He is a man about twenty-two years of age, clean and well dressed, of light complexion for an Indian, dark keen eyes, black hair and good features. After a time I laid down on the buffalo robe along side of him, with all my clothes on, even my boots, and drew part of the comfortable over me, having my overcoat about my head and shoulders in addition; I think our feet were within three or three and a half feet of a good warm fire. Feeling comfortable in mind I slept pretty well; the next day assisted to teach; the children turned out pretty well, although it rained and snowed. On Seventh-day morning the pines and hemlocks were loaded with snow. I assisted in the school until noon, then adjourned until Second-day, the teacher wishing to go home to his family. I left the school house a little after twelve, and got home about dark.

The pagan party have had what they call a green-con dance; as I understand it, a meeting of prayer and thanksgiving. Their last at Cold Spring was conducted with much more order [than usual.] A part of the time, as I was informed, [it was] more like a meeting of Christians than had been common. In that meeting, an aged chief who is called Governor Blacksnake, said in a speech that he made to them, "he believed all that the blessed Saviour had said, who was crucified by the hands of wicked men."

I have not been at "Collins" (a Friends' meeting), since I took Robert Scotton there, on his way home about the 1st of Sixth month, when I attended their meeting on First-day. Since that time I have attended no meeting except my own, and some councils and meetings of the Indians; yet I think I may humbly acknowledge, I have been as much favored with the life-giving presence of the blessed Master in my sittings since I have been here, as when I attended our meetings at home.

In sincere love, I remain thy friend,

E. WORTH.

Diary resumed.

1843, 10th mo. 19th. Went in company with Ariel Wellman, to view two pieces of land at the request of Benjamin Pierce who wished to have our judgment which was the best, and which he had better improve for a home for himself.

26th. Attended Collins Monthly Meeting, with a degree of satisfaction, though not exceeding what I have often been favored to feel, through unmerited mercy, whilst sitting alone waiting on the Divine Master for his life-giving presence, at Tanassasa. After meeting, heard that a Friend who stood in the station of an elder, had come on from Rochester to assist in surveying the boundary lines of the Cattaraugus and Allegheny Reservations, and to run them off in lots; the hearing of which has been trying to me, thinking that no consistent member of our Society could have anything to do in the business.*

31st. Visited George Killbuck; from there went, accompanied by George, to see an Indian, whose name I think was William Oapeto. I felt comforted and thankful for the opportunity, and the strength afforded. May I, whilst engaged in instructing the Indians, labor to keep my spiritual eye single to the blessed Master, and humbly prostrate before Him, who speaketh as never man spake; may I be taught of Him, and be preserved near unto Him and feel his blessed wing to be spread over me.

The Palm and the Heath.—"Thus saith the Lord: Cursed be the man that trusteth in man and maketh flesh his arm, and whose heart departeth from the Lord. For he shall be like the heath in the desert, and shall not see when good cometh; but shall inhabit the parched places in the wilderness, in a salt land, and not inhabited. Blessed is the man that trusteth in the Lord, and whose hope the Lord is. For he shall be as a tree planted by the waters, and that spreadeth out her roots by the river, and shall not see when heat cometh, but her leaf shall be green; and shall not be careful in the year of drought, neither shall cease from yielding fruit: Jeremiah xvii. 5, 8.

We saw this brilliant figure as a literal fact, on our way to the Pyramids in 1866. All along the journey from the banks of the Nile clear on, the eye ranged over reaches of sand, white and waveless, interminably, till it touched those masses of masonry on the Ghizeh temple. Near the river the soil is wonderfully prolific; but before long, the rich black mould begins to show the force of the fiery sun it scorches under. Deep seams and wide cracks are discovered in the surface. Along the banks tall palms shoot their stems up into the serene air. Most exquisitely have these been compared, knobbed and fluted as they are, to the shafts of Moorish architecture. From their summits droop the graceful green plumes of foliage, hanging listlessly in the windless sunshine.

But now, looking in the other direction, and pushing our tedious beasts along, we found

* In 1838, the consent of a number of the chiefs of the Seneca Nation, was obtained, in several cases fraudulently, to a "treaty," by which they sold all their Reservations in the State of New York, amounting to about 120,000 acres to the Ogden Land Company. Notwithstanding the objections of President Van Buren and many of the Senators, this was ratified, and was proclaimed a law in 1840. In 1842, what has been called a compromise treaty was made, by which the Allegheny and Cattaraugus Reservations were restored to the Senecas. The attempt to run the boundary lines of, and divide the Allegheny Reservation into lots was made by the Ogden Land Company, under pretence of carrying out the provisions of the last named treaty. With the advice of Friends, the Indians forbade the surveyors proceeding in the business, and by firm but gentle measures succeeded in putting a stop to it.

the sea of sand closing in around us entire and far as our vision could reach only stretch of verdureless and waste which could be discerned. The latest vestige of vegetation is a little hard, dry plant, waxy star-like radiate of yellow prickles all its head, so horny and so keenly acute even the leanest kind of Pharaoh's kine were not persuaded to browse upon it. Very donkeys passed it superciliously. This is the loneliest, most desolate, lean and sorrowful caricature of a flow ever saw. Yet that is the "heath in the desert," and those glorious palms just behind indolently sweeping the sky with their lank branches, are the "trees planted by waters, that shall not see when the heat cometh." Ah me, how fresh they seemed in the hot air!—C. S. Robinson in *S. S. T.*

Norristown, Pa., 3d mo. 30th, 18

TO THE EDITOR OF "THE FRIEND."

Esteemed Friend:—The history of Wil Flanner, in last week's issue, as related to writer by Jacob Albertson, needs a little recting.

It was in Plymouth Meeting-house, that "seeing with the eagle's eye," and "striking with the hawk's beak," "carrying neighborly faults in the fore-end of the wallet, and to own behind," was said, not Providence mingling.

As the story was told in my hearing, "William Flanner came very late to the meeting house on horse-back, had crossed the Schkill River at Matson's Ford, the particle ice formed a water line on his horse's side and if ever a man had a message to deliver had."

The last three paragraphs, in the first which some names are mentioned, should as a whole be given for my father's sentiment.

J. M. ALBERTSON.

[The last three paragraphs, above referred to, are given as the remarks of the Friend who transmitted the narrative, and it was designed to convey the impression that they were written by the father of our friend J. A.—Eds.]

Rocks.—A gentleman was once, when sailing down the East River, near New York, which was then a very dangerous channel. He watched the old steersman with great interest, and observed that whenever he came near to a stick of painted wood he changed his course.

"Why do you turn out for those bits of wood?" asked the boy.

The old man looked up from under shaggy brows, too much taken up with task to talk, and simply growled out "Rocks!" "Well, I would not turn out for those bits of wood," said the thoughtless boy; "I would go right over them."

The old man replied only by a look which that boy has not forgotten in his manhood. "Poor, foolish lad," it said, "how little you know about rocks!"

So, children, shun the rocks as you would the way of death. There are plenty of buds to warn you where they lie hidden, and wherever you meet one turn aside, for there danger lies.—*Lute Paper*.

Many who make profession of the Christian faith, yet live as if "the Lord had forsaken the earth, and the Lord seeth not."

Selected for "The Friend."

embraced the principles of Friends from conviction in his own mind, and held sacred to the latest period of his life. I sought them at a great price, and they were precious to him. He often expressed an unshaken belief, that if the principles professed by our early Friends were not true on this, there was no true religion in the world. His ministry was sound, clear and convincing. He was concerned to turn the eyes of mankind from a dependence on men and books, to the inspeaking word of Divine life in their own hearts. He was not at all of outward learning; but being learned in the school of Christ, and disciplined under the cross, there was at times given him "the word of the learned," whereby he was enabled to speak a word in season to him that was weary, and to bring out of the great treasures both new and old; and so far was from seeking the applauses of men, that he would rather shrink from them.—*From a Sermon at New Garden Monthly Meeting of Friends, N. C., concerning Dougan Clark, deceased.* 1856.

Though few and evil have been the days of pilgrimage, yet few lives have been more varied with vicissitude and variety, since upon the wide world an orphan boy; then led on a boisterous element and nursed in the school of iniquity, with sinners my companions,—but myself the chief! Oh! Divine mercy, signally displayed!—in saving from the fire a burning brand, and following from time to time with judgment's rod, far-faded wanderer!—flying still, and still farther, until overtaken, and in matchless—obliged to yield, and reluctantly to retrace step by step destruction's mazy track,—to stop at many a place; and, I hope in true repentance, manage to dwell on scenes despicible time and sinful deeds innumerable beforehand! (I humbly pray) to judgment;—not to "follow after," or where would I now hope at this late hour, if forsaken that gracious Lord;—who in so great condescension, wrought the miracle, and in the strength of his love and strength, has led my weary feet beside the still waters, and made me to lie down in the green pastures of life;—I brought me amongst the assemblies of people, with whom I now feel precious rays of spirit in the bond of sweet consoling love;—and though far separated from them, am at this day, I trust, "sitting and clothed in my right mind," under a sense of my own unworthiness, and of such great and unmerited mercy.—*D. Wheeler.*

One part of rectified oil of turpentine, seven parts of benzine, and five drops of oil of valerian to each ounce of the mixture, is said to be a superior disinfectant for hospital and general use. Each of the ingredients possesses the power of absorbing the oxygen of the atmosphere, and of converting it into peroxide of hydrogen, a substance similar in its effects to ozone. Books, letters, newspapers, cloth, wall-paper may be treated with this sort of disinfectant without injury. Its action is very persistent.—*Late Paper.*

All are not placed in the same position of vice, but all are commanded to obey Him who has called them to walk in uprightness before Him.

A Will and a Way.—Several years ago, an effort was made to collect all the chimney-sweepers in the city of Dublin, for the purpose of education. Among others came a little fellow who was asked if he knew his letters.

"O, yes, sir," was the reply.
 "Do you spell?"
 "O, yes, sir," was again the answer.
 "Do you read?"
 "O, yes, sir."
 "And what book did you learn from?"
 "O, I never had a book in my life, sir."
 "And who was your schoolmaster?"
 "O, I never was at school."

Here was a singular case: a boy could read and spell without a book or master! But what was the fact? Why, another little sweep, a little older than himself, had taught him to read by showing him the letters over the shop doors which they passed as they went through the city. His teacher, then, was another little sweep like himself, and his book the sign-boards on the houses. What may not be done by trying? "Where there is a will, there is a way."—*Late Paper.*

THE FRIEND.

FOURTH MONTH 12, 1879.

We have received from the Secretary of the Pennsylvania State Temperance Union, a printed "Call" for a State Convention of those interested in suppressing intemperance; to which the representatives of "Churches, Colleges, Seminaries, Sons of Temperance, Good Templars, Temples of Honor, Women's Christian Temperance Unions, Reform Clubs, Prohibition Alliances, Law and Order Associations, Prohibitory Party Clubs, Young Men's Christian Associations," &c., &c., are invited to send delegates.

The object appears to be to devise some plan of legislative relief from the evils of the liquor system; probably, by the passage of a Local Option Law similar to that enacted in 1872, and since unwisely repealed.

We heartily sympathize with this object, or with any wisely digested plan of lessening the crime and poverty that so conspicuously flow from the use of intoxicating liquors as a drink; and we sincerely desire that the proposed convention may be useful in further awakening public attention to this subject, and in exerting an influence for good on the members of our State Legislature.

Yet we believe it is the safest course for the members of our religions Society generally to refrain from entering into such Conventions, when they are liable to be made participants in formal devotions, or else to mar the harmony of the gathering by an expressed dissent; and where means may be advocated, or measures be adopted, which are not in accordance with the principles and testimonies we are called upon to uphold. While we may get other men as co-laborers in the cause of righteousness, yet experience shows that in pursuing our own line of service we have often been able to do more good than would be indicated by our relative numbers or political influence.

In one of the short selections contained in our last number, is a sentence which speaks of the Power which saveth us from falling

into temptation, as "the same power which preserved Jesus when He was tempted in the wilderness."

This expression has awakened a little uneasiness, lest any of our readers should suppose, that the author of it regarded Him whom God hath exalted with his right hand, "to be a Prince and a Saviour, for to give repentance to Israel and forgiveness of sins," to be nothing more than an ordinary man endowed with an unusual manifestation of the Holy Spirit. We do not suppose such was his meaning; for the true members of the Society of Friends have ever recognized in our Blessed Saviour the fulfillment of the prophecy of Isaiah, who speaks of Him as "The Mighty God, the Everlasting Father, and the Prince of Peace, of the increase of whose government and peace there is to be no end;" and have accepted the Scripture declaration, that "to the name of Jesus every knee shall bow, and every tongue confess that He is Lord, to the glory of God, the Father."

We have received a copy of the Report of the Committee who have charge of the Free Library and Reading Room, under the care of Friends at Germantown.

It appears from this, that the number of volumes in this valuable institution, on the first day of the present year, was 8,710; of which 526 had been added in the past ten months.

Though thrown open to the general public, with but few restrictions, and averaging more than 400 visitors weekly, yet very few of the books are reported to be lost or unaccounted for; and but little defacement or mutilation of them has been observed.

The same care in excluding works of fiction has been practised as heretofore. The new additions are largely of works relating to Science, History, Biography and Travels; and many of them were selected with special reference to the needs of the more intelligent mechanics and artisans, by whom the Library is frequented.

SUMMARY OF EVENTS.

UNITED STATES.—The average temperature of Third Month, for Philadelphia, was 41.3 degrees. Highest 60°. The average for the past nine years is 39.6 deg. Total rainfall and melted snow 2.28 inches. Prevailing direction of wind, northwest; maximum velocity 43 miles per hour. There were fifteen days on which rain or snow fell.

On the morning of the 6th, there occurred one of the most destructive fires that has taken place in this city in several years. The fire originated in a large five-story brick building on the north side of Race street, above Fourth, and extended from one to two hundred yards on both sides of Race St., and from Fourth to Crown St. About thirty buildings were destroyed or damaged, and the loss is estimated at over \$500,000. One man was killed, and several injured.

The Baldwin Locomotive Works turned out forty locomotives last month. At present they are engaged on an order from Australia for twenty-six engines of the consolidated make. They are to be used upon Government roads in Queensland, New Zealand, and New South Wales.

The twenty-fifth annual report of the Commercial Exchange shows, that during the year there were received at this port 973,380 barrels of flour, 11,976,250 bushels of wheat, 290,730 bushels of rye, 23,385,000 bushels of corn, 3,798,350 bushels of oats, 913,400 bushels of barley, 207,000 of malt; making the total receipt of grain 40,577,650. The arrivals and sales of beef cattle were 188,600 head; cows, 12,325; hogs, 252,000, and sheep 650,400. The production of lumber in Pennsylvania within the past two years, has been about 200,000,000 logs (1000 feet) per year. Previous to 1873,

the annual product was about double that amount, the falling off being attributed to the hard times.

Out of a State prison population of 29,197 throughout the United States, but 130 are employed in mechanical industries, earning on an average 40 cents per day.

A severe storm prevailed along the New England coast on the night of the 3rd, causing many disasters. The American ship Lancaster, with 1770 bales of cotton, was burned at Galveston on the morning of the 4th.

The weather in Canada during the past week is stated to have been intense and dry. A train arrived in Montreal for Quebec on the 1st inst., was snowed up at Port Rouge, and the passengers and mails were forwarded to their destination in sleighs. Three feet of snow were reported at North Troy, Vermont. On the 4th the temperature at Atlanta, Georgia, was one degree below freezing point. The fruit crop is said to be ruined, but vegetables not seriously damaged.

The Great Western railway passenger station at Suspension Bridge (Canada side), including Bainfield's refreshment saloon and the American Express Company and Montreal Telegraph Office, were burned on the morning of the 2nd. Loss \$30,000.

Legislation.—The U. S. Representatives ended on the 5th inst., and the Army Appropriation bill was passed, with the repealing section, by a vote of 148 to 122. The Senate has passed a bill appropriating \$200,000 for the construction of a refrigerating ship for the purpose of disinfecting cargoes from yellow fever ports.

The debt statement, issued 4th mo. 1st, show the following: Increase of debt for 3rd month, \$892,734.19; cash in the Treasury \$420,787,458.29; gold certificates, \$16,304,700; silver certificates, \$2,826,530; certificates of deposit, \$27,680,000; refunding certificates, \$58,070; legal tenders out-standing, \$346,681,016; fractional currency outstanding, \$13,925,662.14; United States notes held for redemption, fractional currency, \$8,458,991; called bonds not issued, \$1,700,413.41; 4 per cent. bonds have been issued, \$208,447,700.

There have been 21,061,274 Bland silver dollars coined, of which 6,605,076 have gone into circulation, leaving 15,956,198 in the Treasury.

The Secretary of the Treasury received on the 4th inst. subscriptions to the 4 per cent. loan, to the amount of \$296,502,750, and the 5 per cent. loan, to the amount of \$1,041,000 for the entire remainder of the outstanding 5-20's. Subscriptions to the 4's at the Treasury are now temporarily stopped; but subscriptions to the \$10 refunding certificates will go on as heretofore.

The number of deaths in Philadelphia the past week was 286. In New York for the same period 534.

Markets, &c.—U. S. gold, 104 1/2; 100 registered, 104 1/2; do. coupon, 105 1/2; 41 per cents, 105 1/2; 4 per cents, 99 1/2; 10-40s, 101 1/2.

Trade is reported as moderately active in most departments during the past week, but prices unsettled. Cotton, 11 1/2 to 1 1/2 cts. per pound for uplands and New Orleans.

Petroleum.—Crude 8 cts. in barrels, and standard white, at 9 1/2 cts. for export, and 10 to 10 1/2 cts. per gallon for home use. Lined oil, 61 a 63 cts.; Lard oil, 54 cts.; Neatfoot, 75 cts. per gallon.

Seeds.—Clover—seed, 4 to 5 1/2 cts. lb.; Flax—seed, \$1.12 to \$1.45, and Timothy \$1.40 to \$1.50 per bushel. Fruit.—Apples, Redwins, 52; choice Greenings, 52 to \$2.25; Roxs, Redwins, 52 to \$2.25. Cranberries, \$7.50 to \$9.00 per bbl.; per crate \$2.25 to \$2.75. Strawberries, 75 cts. a \$1 per quart.

Flour.—Minnesota extra, \$4.37 to \$4.75; do. choice, \$4.30 to \$4.50; Ohio extra family, \$4.50 to \$4.50; do. fancy, \$4.50 to \$4.55; patent, 87 to \$4.75. Rye flour, \$2.75 to \$3.00. Corn—No. 2, \$2.00. Bran, \$1.50 to \$1.55 per ton.

Grain.—Red wheat, \$1.14; Delaware amber, \$1.15; \$1.16; white, \$1.17. Rye, 57 to 58 cts. per bushel. Corn, 42 to 45 cts. Oats, mixed, 30 to 31 cts.; white, 32 to 33 cts.

Hay and Straw.—Prime timothy, 60 to 70 cts. per 100 pounds; mixed, 50 to 60 cts. per 100 pounds; straw, 75 to 90 cts. per 100 lbs.

Beef cattle.—The market has been in better condition, and prices were from 1 to 1 1/2 higher. Extra steers 61 cts.; medium, 5 to 5 1/2 cts.; common, 4 to 5 cts. Hogs, extra choice, 61 cts.; good, 61 cts.; medium, 61 to 61 cts. per pound. Sheep, extra 61 cts.; good, 61 cts.; medium, 60 to 61 cts.

FOREIGN.—The total receipts from the various sources of revenue of the United Kingdom, for the financial year, were £83,115,972, which amount is \$114,028 below the estimate. The receipts from customs show a decrease of £14,000,000 from excise £299,000, and from stamps £260,000. The other branches of revenue show

an increase of receipts. The net increase of revenue, as compared with the last financial year, is £3,352,673.

The statistical tables relating to emigration and immigration from and into the United Kingdom, for the year 1878, show 147,663 emigrants in the year, an increase of 27,692 on the preceding year; but of these only 112,992 were of British and Irish origin. This total is one of the lowest since 1853. Of immigration the corresponding numbers are, in 1877, 81,848, in 1878, 77,351, of whom 54,944 were of British and Irish origin. The conclusion is given that the tide of emigration, which was at its ebb in 1876 and '77, has again begun to flow. Of persons of British and Irish origin, 54,944 went to the United States in 1878, as compared with 45,481 in 1877. There was also a great increase in the emigration to Australia and to British North America.

It has been decided to erect a new tower for the Eddy-stone Lighthouse, about 127 feet from the present site. The focal plane will be raised to an elevation of 130 feet, and the range of light extended 17 1/2 nautical miles. The new tower to be constructed entirely of granite. The height will be 138 feet above the rock, to the top of cornice. The estimated cost is £78,000.

Information from Cape Town has been received, to the effect that the Zulu king is desirous of peace. The English, however, are disposed to regard this a mere pretence to gain time until the harvest is gathered. Only an unconditional surrender will be accepted.

The British forces under Captain Gough, have had an engagement with 5,000 Afghans, in which the latter were defeated with heavy loss.

The returned Bosnian refugees have appealed to Austria for increased relief. It is stated that 20,000 of them have died by privation since their flight from their homes.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Application may be made to

John W. Biddle, No. 726 Buttonwood St.
Ephraim Smith, No. 410 Pine St.
Rebecca W. Kite, No. 1159 North Fifth St.
Hannah Evans, No. 322 Union St.

WESTWON BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westwon, will be held in Philadelphia on Seventh-day, the 19th inst., at 2.30 P. M.
SAMUEL MORRIS,
Philada., 4th mo. 8th, 1879. Clerk.

FRIENDS' FREEDMEN'S ASSOCIATION OF PHILADELPHIA AND ITS VICINITY.

The Annual Meeting of "The Contributors" will be held in the Committee Room of Arch Street Meeting-house, on Second-day evening, 21st inst., at 8 o'clock. Friends who are interested in the cause and others are invited to attend.

JOHN B. GARRETT, Sec.

The 10th Annual Meeting of the "Indian Aid Association of Friends of Philadelphia Yearly Meeting," will be held in Arch Street Meeting-house, Philadelphia, on Fifth-day, Fourth month 24th, 1879, at 8 P. M. Friends generally are invited to attend.

RICHARD CADBURY, Clerk.

WESTWON BOARDING SCHOOL.

The Summer Session opens on Second-day, the 5th of Fifth month. Parents and others who intend to send pupils, will please make application to BENJAMIN W. PASSMORE, Supt., (address, Street Road P. O., Chester Co., Pa.) or to CHARLES J. ALLEN, Treasurer, 304 Arch St., Philadelphia.

Early application is requested when convenient.

TO RENT.—The dwelling house connected with Haddonfield Monthly Meeting School. A Friend's family is desired. Apply to

SAMUEL NICHOLSON,
CHARLES L. WILLETTS,
Haddonfield, N. J.

WESTWON BOARDING SCHOOL.

A NURSE is wanted for the Boys' Department, to enter on her duties at the beginning of the Summer session. Application may be made to
Anna V. Edge, Downingtown, Chester Co., Pa.
Susanna F. Sharpless, Street Road, " "
Elizabeth Evans, Haddonfield, New Jersey.
Elizabeth R. Evans, 322 Union St., Philada.

FRIENDS' ASYLUM FOR THE INSANE Near Frankford, (Twenty-third Ward,) Philadelp. Physician and Superintendent—JOHN C. HALL, Applications for the Admission of Patients may be made to the Superintendent, or to any of the Box Managers.

DIED, at his residence in North Norwalk, On 7th mo. 19th, 1878, ISRAEL D. TITUS, in his 74th a member and minister of Norwich Monthly Me. of Friends. In his early manhood, while disregarding his religious training and the convictions of Truth took license in sinful pleasures; but through the profound influence of the Holy Spirit upon him, he was able to yield to divine requiring. He esteemed himself as a brand plucked from the burning; and attributed his escape to "the Grace of God that brings salvation." Having gained a turning point, his life gave evidence of a true conversion to God. Soon came forth in the ministry of the Word to satisfaction of Friends, and in a proper time was acknowledged as a minister. He was faithful in the exercise of his gifts of home and performance of his labors abroad in the service of his Divine Master. He sound in the doctrines of the Gospel of Christ, firmly attached to the testimonies that Friends have ever held forth as the outgrowth of right principle. He approached his end with peaceful calmness, and with a heavenly expression of evidence to survive his prospect of happy inheritance hereafter.

—, at Coal Creek, Keokuk Co., Iowa, the 4th 2d mo. 1879, after a short but severe illness, MARY wife of John N. Miller, in the 51st year of her age, a beloved member of Coal Creek Monthly Meeting. Her sufferings being extreme, she fervently desired for religious comfort and fortune to enable her to endure all that her heavenly Father might please to permit; and that He would still be to her as her father in heaven, and in former times, and on her willingly to submit to his most holy will, should it please Him in mercy to raise her up, that would condescend to strengthen her to endure and perform all that might be required at her hands, according to His righteous commandments. "What an a thing to put off a preparation for death to such a time as this. I know not how it may turn with me. I do nothing in my way. If it is the dear Master's will take me to himself I feel that my work is done." Next morning, about 36 hours from the first attack, peacefully passed away.

—, in Westborough, N. Y., on the 6th of 2d mo. 1879, MARY ANN, wife of David Peckham, in the 7th year of her age, a member and elder of Westmore Monthly Meeting. In the death of this dear Friend the Society has lost one of its faithful and upright tars. Her meek and forgiving spirit, her sympathy for those in affliction, together with her charity for sinners, greatly endeared her to all who knew her. Fully convinced of the principles of the Society Friends, she was concerned faithfully to maintain doctrines and testimonies, and was grieved over departure from or innovation upon them. A short time before her close she said, "I see nothing in my way, and feel that I am almost home."

—, at West Chester, Pa., on the 8th of 2d mo. 1879, SUSAN K., wife of John J. Peckham, in the 6th year of her age, a member of Smyrna Monthly Meeting Friends. Though enduring great suffering, her work was preserved clear to the last, and after much exertance of herself, she was permitted to feel a full assurance of happiness hereafter.

—, on the 10th of 2d mo. 1879, MARY, with Caleb Engle, in the 60th year of her age, a member Plymouth Monthly and Southland Particular Me. of Friends. This dear Friend endured much bereavement through a protracted illness, which she bore with a remarkable degree of patience. Her relatives and friends have the consoling hope that their loss is eternal gain.

—, at West Chester, Pa., on the 1st of 2d mo. 1879, JANE C. GAMBLE, a member of Parkerville Particular and Kennet Monthly Meeting of Friends.

—, at the residence of her son, in Philadelphia, the 31st of 3d mo. 1879, ANNA, widow of the late Joseph H. Adams, in the 88th year of her age. Her early redeemed from the world, she manifested her faith and hope in Christ; and her long life was marked unobtrusive usefulness. She was beloved by her relatives and friends to whom her memory will be precious.

PHILADELPHIA.

For "The Friend"

Errors.

The vital welfare of religious bodies depends on the healthy condition and right guidance of their members.

The temptations to err from right, produced from an enemy who seldom presents himself in his true character, but by his transformations, often appears as an angel of light; whereby he betrays the unwatchful and guarded into a belief that his suggestions are the dictates of Divine Wisdom. As these are accepted and acted upon, the work is not of true peace, nor the effect that of quietness and assurance; but partakes more of the character of "the troubled sea, which cannot be stayed." This unrest may unhappily be mistaken for an increase of zeal for God, and a mark. The more the enemy can indoctrinate the mind with error, the more successful he is in laying waste the heritage of God. His attempt at seduction consisted in finding it with God's law, and proposing to our parents the violation of it as a means of entering their condition. The deception was such as induced them to look upon him as a friend. Therefore they believed him, and acted upon his advice. Since that day many have been beguiled by the same enemy, and by following his devices become ministers of unrighteousness.

But in the work of righteousness there is a warning, both to choose the good and to re-ent the evil; to resist the devil, to draw nigh to God, and to distinguish the Shepherd's care from that of the stranger.

There have been since the Christian era so many different ideas put forth, professedly under the name of Christ, that it is not easy to get up an entirely new scheme. Those which appear new mostly prove to be some error in an apparently new dress; which, the skill of talented and ambitious men, is presented in a way that begets a response in the unthinking and inexperienced, and affords food for that disposition which is chiefly desirous of hearing and telling some new thing, names which embrace much error and but little truth, are commonly short-lived. Those schemes are the most hurtful that are put forth as religious truth, but are so but in part; and whose advocates, in presenting them, so rely in their methods, as at one time to dwell largely on the truth that is in them, and at other times on the errors they include, dis-

guising the error in such a way as to conceal its real character.

The religious Society of Friends have ever held as a cardinal Christian doctrine, a belief in the only begotten Son of God; even in Him who was conceived of the Holy Ghost, and born of the Virgin Mary, "the Word (that) was made flesh and dwelt amongst us." Him who was crucified on Calvary, died and was buried; who rose again (his flesh saw no corruption), ascended up into heaven, where He now sitteth at the right hand of God the Father, our Mediator, Advocate, and Intercessor with the Father. They believe that He is the Lord from Heaven, the Quickening Spirit, who is now come the second time without sin unto salvation, by his own Holy Spirit, the manifestation of which is given to every man to profit withal.

But the Society has had its trials. Larger or smaller bodies of persons have been drawn away from the simplicity of the truth as it is in Jesus.

A half a century since, many by the name of Friends, under the profession of greater light, denied the divinity of Christ Jesus. In endeavoring to establish their theory, they misinterpreted many Scripture declarations. They held that He who was conceived of the Holy Ghost, and born of the virgin Mary, was an eminently good man, the highest type of Christian character, but was only man, and therefore his sufferings on the cross on Calvary could be of no avail for us. They dwelt much on the work of the Spirit, and in some respects with considerable clearness. But in other parts there is an ambiguity of expression, caused by their making improper spiritual application of many portions of Scripture in order to sustain their positions above referred to. Their theory was based upon *fundamental errors*, and was productive of sad results.

In the year 1830, the Yearly Meetings of Friends in America issued a united testimony to the Truth, which was evidently the result of right religious concern and labor, and which clearly and fully sets forth the doctrines of the Gospel of Christ as they have ever been held by Friends; together with the testimonies which are the true outgrowth of right principles.

Friends having passed through deep trials, and witnessed the painful separation that had taken place, as the result of the errors above described, were vigilant in watching and detecting such errors, perhaps without sufficiently considering the possibility of a reaction. Doctrines of an opposite character were soon introduced, and cautiously propagated, with, for a time, but little apparent effect. The seed thus sown ultimately took root and produced fruit after its kind with a large increase. In its fuller development may be seen a compound of "Antinomianism" and "Rant-erism." A summary of the leading or ultra ideas, may be presented as follows:

That a full and free salvation for men has been wrought out by Jesus on the cross on Calvary. That He then and there finished the work. That all we have to do is to accept Him as our Saviour, to believe in Him, and appropriate that finished work to ourselves. A distinction is made between Father, Son, and Holy Spirit. That the Holy Spirit is not Christ, but only testifies of Him. That the Holy Spirit does not work in the heart of the sinner. That the Spirit never cleanses, the literal blood of Jesus being the only cleanser. According to the above, the sufferings of Jesus, the shedding of His blood on the cross on Calvary, does all the work. One of the "Dablin Dolier Street Tracts" reprinted at Richmond, Indiana, says that "Christ has done every thing for the sinner, and man has nothing to do to obtain remission of sins but to believe in what Christ has done for him." It would exceed the proper limits of this essay to name all the crudities of these errors. But its advocates do not confine themselves to the utterance of those extreme views, but work upon a sliding scale, from truth to error, and vice versa. These errors are frequently presented in such a mixture as very much to conceal the counterfeits. All this is done under profession of greater light and higher attainment, accompanied with a profession of more efficient work for Jesus. Much labor has been bestowed in their propagation. Means have been employed to bring an influence to bear upon the mind from without, in order to awaken the emotional feelings. And when, by reason of these influences, vocal expression has been given to a belief in the Lord Jesus Christ, such speakers are considered as having been converted to Christ. Conversions of this kind have been largely heralded to induce the belief that much good has been done.

An easier way has been opened to membership in the religious Society of Friends, than that of self denial and the daily cross. Such language as follows: "Hide behind the cross," "Looking to the middle cross," &c., has been used as showing an easy and sure way to the kingdom. It is no marvel that adherents should be gained to such a system, inasmuch as there are persons who still prefer not to bring their deeds to the light. But it is strange that it has obtained so large a place in the Society of Friends. It will not help us to shut our eyes to the fact that changes have come over us, for the last few years, more rapidly than is often known in religious bodies; and that new principles and practices have obtained the predominance in many places. Wherever they have gained the ascendancy, the way is greatly closed against those who are sound in the faith in the right exercise of their gifts. It is therefore a time of suffering to the true Israel of God, who have great need faithfully to ponder the paths of their feet; and not only to hear but to do the commands of our blessed Lord, so as to know a firm establishment upon the Rock, Christ Jesus;

and so keep the word of His patience, with the assurance that the foundation of God standeth sure, having this seal, the Lord knoweth them that are His.

The doctrines and testimonies which were committed to our early Friends, and are no less than primitive Christianity revived, have descended to us as a precious legacy; and we shall be held accountable to the great Governor for the way in which we preserve and transmit them. Let none, therefore, shrink from present suffering, for surely "Great is our God above all gods," and He is able to bring his purposes to pass; and happy will it be for those whom He is pleased to own as his faithful servants. A. S.

Ontario, 3d mo. 1879.

For "The Friend."

The Gabelle.

In "A Short History of the French People," written by Paul Lacombe, there is given an explanation of the causes which led to the great French revolution, which overthrew the existing government, and swept away many of the hindrances to the happiness of the citizens which had before existed.

After speaking of other forms of taxation, the writer says:

"Of all the taxes the *gabelle* was the most detested, and well deserved so to be. The *gabelle* was the tax on salt, or, to speak more accurately, a tax with salt as the medium. The State alone had a right to sell it; alone possessed salt-factories. Naturally, the State sold it at a price above its worth; but this was not all: had it been, the people would have submitted with patience; but the State forced each subject to buy a fixed amount. This amount varied in different provinces, as did also the price; and there were even some provinces which did not pay this tax at all. We shall presently see the result of this diversity. So each man was obliged to go to the State magazines, and buy the quantity of salt assessed to him whether he needed it or not. He received, at the same time, a ticket called *gabement*. This salt was called *sel de denoir*, and, curious to relate, had to be kept for daily consumption: it could not be used for salting down; another supply must be bought for that, even though the purchaser had already more than he could use.

"It resulted from all this, that, as the price of salt varied much in different places, and was everywhere dear beyond reason, there was a great profit in selling contraband salt, or in buying *sel de denoir* from particular people, in places where it cost least, and transporting it where it was most expensive. Of course this was prohibited, and called *salt-smuggling*; but, in spite of that, a large number of men devoted themselves to this industry, and, in certain cantons, the larger part of the peasantry deserted agriculture for salt-smuggling. Even priests and soldiers were implicated; and thus the mal-administration of the time, by making laws which all were tempted to break, and which a great number did break, caused political depravity among the people.

"The profit accruing from this smuggling multiplied the frauds so excessively, that their frequency and the difficulty of suppressing them led to an atrocious penalty. The salt-smuggler was sentenced to a heavy fine for the first offence, punished with the galleys for a second, or, if he were armed and belonged to a union, he was condemned to the galleys

for his first offence, and hung for his second; and this latter often happened. There were three thousand five hundred imprisonments and fifteen hundred sentences to severe or capital punishments every year, for salt-smuggling. There were executed in France seven or eight or even ten times as many salt-smugglers as assassins, in the same time. The *gabelle* had a regular army of guards and soldiers; and, putting together all the spaces over which watch had to be kept in the provinces, we find the *gabelle* had to guard twelve hundred leagues of barrier."

On the Resurrection of Jesus Christ.

BY OLINTHUS GREGORY.

(Continued from page 274.)

These three women and two of the apostles having been at the sepulchre, and Mary the last of them having departed, it being yet early: just as she was going Joanna came, and a considerable company with her; bringing the spices, &c., in order to embalm the body of Jesus, as they had agreed before the sabbath. They spent no time in reasoning about the removal of the stone, as the others had done; being a sufficient number to effect it, and expecting to meet the other three women at the place: for they knew nothing of what had passed at the sepulchre in the earlier part of the morning, before they arrived. When they got there, they found the stone rolled away: so they went into the sepulchre, and immediately perceived that the body was not there: but when they went in they saw no angel, as Mary and Salome had seen, sitting at the right side; nor did the two angels, who spake to Mary Magdalene, now appear. Joanna and her companions, like the other women, were full of amazement: and while they were in this perplexity, behold two angels stood by them and said, "Why seek ye the living among the dead? He is not here, but is risen," &c. Then the women returned from the sepulchre, and told all these things to the eleven, and to others, who, it seems, were now gathered together, by reason of the report Peter and John had made on their return from the sepulchre an hour or two before. When Peter and John were at the sepulchre, they had seen no angels; nor had they heard any report that Jesus was actually risen: but on Joanna's relating what she had seen and heard, Peter, evincing the ardor which marked all his actions, ran a second time to the sepulchre; and some others either along with him, or soon after him: they all found that the body was not in the grave; but they saw not Jesus.

Soon after this, two of them went a journey as far as Emmaus, about seven and a half miles from Jerusalem. We have no account of any more persons going to the sepulchre. But Peter, soon after the departure of the two disciples for Emmaus, retired to a place alone to meditate upon what had occurred, where his Lord appeared to him. This was the *third* appearance of Christ; but the first to any of his apostles. Jesus, having conversed a little with Peter, left him; and soon coming up with the two disciples who were journeying to Emmaus, conversed with them a good while, and afterwards revealed himself unto them. This was the *fourth* appearance.

While those two disciples were from Jerusalem, those who continued at that city were in great concern; for though Joanna had told

them, from the angels, that Jesus was risen yet her "words were as idle tales." Some time after, Mary Magdalene brought the tidings that she had "seen the Lord; she found them mourning and incredulous notwithstanding the cheering tenor of the news she communicated. The other Mary and Salome likewise conveyed their tidings as they were directed, first by the angels, a then by Christ himself. Late the same evening Peter came and informed them that he had seen Jesus. And as his disciples were discussing the evidences of his resurrection, some believing, others doubting, the two returned from Emmaus; and while they received, on the one hand, the joyful intelligence "that the Lord is risen indeed, and hath appeared Simon;" they in their turn confirmed the account, telling "what things were done in that way, and how he was known of them in breaking of bread;" by this insignificant act reminding them of his last supper with the Still, however, "some of them believed though Jesus had now appeared *four* times first to one woman, then to two; after that one man, and then to two.

Our Lord's *fifth* appearance after his resurrection was much more public than any of the preceding ones; for while they were earnestly conversing upon this most interesting topic still on the evening of the first day of the week, just after the return of the two from Emmaus, "Jesus himself stood in the midst of them, and said unto them, Peace be unto you." Though Thomas was at this time absent, yet there was a considerable number of the disciples gathered together, besides the apostles, in order to inquire and learn more about Jesus Christ. Besides this, the guard having said that they had seen an angel at the sepulchre, the Jews were enraged at their precautions to detain the body were defeated, circulated the ridiculous story that was stolen by the disciples of Jesus while the guards slept, and began to threaten the disciples; they, therefore, being "afraid of the Jews," dare not sleep in their own lodgings, but had assembled together, and shut the door previously to this appearance of Jesus. His sudden and unexpected appearance and address to them terrified them, so that they thought "it was a spirit," and not their Lord in the same identical body that was crucified and buried. But the Redeemer, to remove their distressing unbelieving thoughts, directed them to behold him steadfastly, to feel and touch him, and observe his late wounded and pierced hands and feet. They he ate before them, still farther to confirm their faith; and "opened the Scriptures to them," showing them that "thus it behooved Christ to suffer, and to rise from the dead the third day." After that, conversing still farther with them, he gave them another sign of his real existence and life, by *breathing* upon them; of his divine power, by conferring upon them the Holy Spirit; and then departed. Presently after, Thomas came in; but while the disciples told him they had "seen the Lord," he refused his assent, and replied, "Except I shall see in his hands the print of the nails, and put my finger into the print of the nails, and thrust my hand into his side, I will not believe." Such was the incredulity of this apostle, although Jesus had then been seen at *five* distinct times in the course of the one day.

At the close of the feast of unleavened

and, that is, on the succeeding first day of the week, Jesus again appeared unto the *pen*, Thomas being with them: he upbraided him for his unbelief, allowed him the tests wished for, and extorted from him the confession, "My Lord and my God!" On this occasion, which was the sixth time of Jesus Christ's appearing, there does not seem to have been much conversation. The appearance was probably for the especial purpose of convincing Thomas.

(To be continued.)

A Bird-Lamp.

Now the very first thought with all the little readers will be, "I know, I know, it must be one of those pretty bronze arrangements one sees in the china and hardware stores, for sale." But no, it is not; really, you'll hardly believe me when I tell you that it is a bird—a small creature covered with feathers, and only a little while before, was singing its way over the waters, as blithe and gay as any living thing could be.

Well, children, to tell you the truth, I must confess that a great cruelty seems apparent, and the poor Stormy Petrel is the sufferer; holding up its little life in the strange service of giving light to its captors. Yes, many dwellers of sea girt islands have no other pleasures; and to them, no doubt, a great necessity flows out that feeling of pity and tenderness should lead them to find less painful methods of personal convenience. This is the way the cruel deed is done: A bit of soft cord, that we call "wicking," is ruthlessly drawn through the delicate frame of the bird, in such a way that it may become saturated with the contents of a tiny oil-tank, secreted for the special nourishment of baby-birds; the twisted threads are then set aflame as unconcernedly as if it were only a lantern made of tin wood.

Somehow, the poor Petrel has many enemies, both on land and on sea; it is raved at and denounced as a creature of ill omen and ill luck, a screaming, rampant thief, always reshadowing evil or engaged in petty larceny; but truly, a brave and gallant sailor is *Thelassidroma pelagica*, having also many careful thoughts touching the comforts of the home-nest, and the one puffy little nursing wherein most tenderly reared. In settling household affairs, the Petrel has ever "a downward eye," and looks very comical peering about, as is their custom, among rocky cliffs and into cliff-riven ledges, noting with various exactness all possibilities of comfort; wherever desirable quarters are found, there is no delay in preparing for family enjoyment. If, however, no secure nook can be found, then our busy bird at once settles himself to digging in the earth, and a famous burrower is he; the house-place is made to accommodate a party of three only, and down a foot or more below the surface, they find themselves delightfully situated. Adroit builders are these cunning workmen; and when the solitary egg is laid, feel that their treasure is secure—the one egg small and white, from which, in due time, emerge the child of their affections.

Off Cape Sable, many thousand Petrels congregate, the low-lying islands presenting rare chances for such housekeepers; during the day, the busy providers are of necessity away, sometimes skimming distant waves, often riding upon stormiest billows, pursuing with un-

daunted energy "the calling" of their lives. But they are not forgetful of home cares, and with unerring certainty returning, each to its own special home, to feast and coddle the lone baby, soothing it, too, after the fashion of their kind, with oddly-intoned nursery ditties, expressive of deepest affection.

Much business falls to the lot of the greatly abused Petrel—following ships in their course, screaming out warnings of coming danger, and remembering, as well, to gather many fragments of floating food, all this must our lively Petrel do, in the furtherance of God-given instincts, and with great injustice are many hard and cruel epithets heaped upon his head; the sturdy mariner is his determined foe, and landsmen, as well, are not slow to denounce him as "a creature unworthy noble company." They forget that the "prophetic wailer" was been given "an inner gift," whereby it can apprehend the war of elements, and with uplifted voice pipe out in mournful numbers an earnest song of warning; and calling him "The Devil's Bird" is a reproach not to be borne.

The Petrel has "its mission," no creature made by God is useless, or to be scorned or shut away from our tenderest forbearance.—*E. P. Chaplin in Nat. Baptist.*

The Story of Colbert.

Stories of real life are oftentimes more startling than fiction. Such is the story of Colbert, the woollen-draper's apprentice, who became the Prime Minister of France.

One of the most wonderful manufactures the world has ever known is that of the celebrated Gobelin tapestry, the founder of which was the great French statesman, Colbert, whose genius brought renown upon the reign of Louis XIV. The glass works of the Faubourg St. Antoine were also established by him; it was he who planned the erection of the Hotel des Invalides, the triumphal arch of the Rue St. Denis, and many more of the adornments of the great French city; and yet this man, so renowned, so admired, and so powerful, had risen to his high position by his own merit and his own ability.

In a certain sense he was the maker of his own fortune, although we know that it is God's blessing only which can really bring us success, and that it was God who enabled Jean Baptiste Colbert to perform the honorable action which was his first step to prosperity.

We read that he was a thoughtful boy, loving nothing so well as his books, and prompted only by duty to his parents when he was willing to be bound as apprentice to Certain, a woollen-draper of Rheims. One day the youth was sent to the house of a banker of Paris, to show him some cloths which he required for the hangings of a country house he had recently purchased, and having been duly apprized of the price of the different qualities, he started on his errand.

Being ushered into the presence of the young gentleman, Baptiste laid the goods before him, and he chose one of the pieces. "I like this best; what is the price?" he said, carelessly.

"Fifteen crowns a yard," replied young Colbert, believing himself correct; and the banker, opening his desk, handed him four hundred and fifty crowns, the price of the thirty yards required.

Baptiste wrote a receipt and took the

money; the shop-boy who had accompanied him rolled up the goods and they went back to the shop.

The sharp old woollen-draper asked if he had made any mistake, declaring that he should return for the surplus money if he had charged too little. To Baptiste's dismay, however, it was found that he had charged fifteen crowns for the cloth, which was worth but eight. The master was delighted, and embraced Baptiste, declaring that he would be an honor to his family; but the boy seized his hat, exclaiming, "I will return to the gentleman, and give him back what I have received in mistake;" and with a bound he cleared the threshold, and was out of sight before his knavish old master could hinder him.

Arrived at the hotel, Baptiste asked for Cenani, and was so persistent in his demand that at length the valet went to his master, who was dressing.

"The young woollen-draper, sir, wishes to speak with you."

"I cannot see him now," was the reply. "Oh, please, sir, one word," said a voice at the door. "It was Baptiste, who had ventured to follow the servant, and who now stepped into the room, told his tale, and laid down two hundred and ten crowns upon the table. "That is the sum you overpaid me, sir. I beg your pardon, and have the honor to wish you good morning."

But the young banker called him back, and asked him how it was he had not kept the money himself.

"I never thought of it, sir," was the simple reply.

"Suppose I were to make you a present of it?"

"Sir, I would not take it," and the fair young face flushed crimson.

"Well, good by. We shall meet again;" and the banker dismissed him.

When Colbert reached the street, the first person he met was the angry woollen-draper, who ordered him to return to his home, and never venture again into his presence.

That evening Baptiste walked into the little room where his parents were eating their frugal supper, and told them what had happened, and that he had lost his situation. There was only one feeling in the hearts of the good people—Baptiste had acted rightly, and God would not desert him.

While they were talking a visitor was announced, a stranger to his parents, but not unknown to Baptiste. It was the young banker, who had been to the woollen-draper's shop, and then traced the boy to his home, that he might offer him a situation in his own banking-house. His strict and conscientious application to business led to rapid advancement, and Baptiste was at length made traveller to the firm.

His mind and taste developed in the course of his journeys, and when he was about thirty years of age he was placed with Letellier, the Secretary of State, who introduced him to Mazarin, and the Cardinal begged him from Letellier, and made him privy councillor. When Mazarin became disliked and mistrusted he retired to Cologne, and then Colbert remained in Paris as comptroller-general, acquitting himself with zeal and prudence.

But now that he was a great man, Baptiste did not forget his home. He procured good appointments for his brothers, and advanced them by every means in his power.

His great work was to found a chamber of commerce, to establish naval schools, and to open the harbors of Brest, Toulon and Rochefort; in fact, nothing seemed beyond the range of the great and active mind of this gifted man.

At the age of sixty-four years he died, leaving behind him nine children, who all occupied high and distinguished stations. This ended the life of Jean Baptiste Colbert—the slight, fair boy who, with silken curls falling upon his shoulders, once peered over his favorite books in the woollen draper's shop at Rheims.—*Child's Companion.*

Those that love the law of God are converted, and made wise unto salvation by it; and though their enemies are very many, and very high also, yet they cannot prevail against them that love this law. They are the happiest people of all the families of the earth. No evil prevails against such; and, as hath been witnessed of old, viz: Great peace have those that love thy law. So those are living witnesses of the same great peace in this age, who love the law, which is light. Thy law is light, said one. He that loves this light, brings his deeds unto it, by it to be tried and judged; and after this the great peace is witnessed. Peace is the reward of those that love the law of God; peace in the inward parts, even the peace of God, which the world cannot give nor take away.

It is good not only to know the law of God, but also to live in the sense and love of this law at all times, when about our common occasions in the world, as well as in our solemn assemblies before the Lord. The love of this pure law of the Spirit of life, which judgeth every appearance of evil, makes wise unto salvation.—*William Shewen.*

Our own Way.—In a large monastery in Tuscany, now emptied of its former occupants and falling into decay, there remains one solitary monk, the cicerone of the traveller who may be attracted to the spot by the loveliness of its site, or the magnificence of the ruined structure. He complained of the tyranny that had destroyed their ancient habitation and scattered the brotherhood, and ended in lamenting that so many holy men could now no longer serve God!

"Is there then no sphere of holiness but in a monastery?" inquired his visitor. "Are there no means by which God can be served out of it?"

The Carthusian looked confused, and after a moment's pause replied apologetically, "It is pleasanter to serve God in the place and way one likes best."

Thus it is with all who speak their own thoughts and do their own wills, and who, finding a way easy to nature, escape the cross. The Lord in love destroys the work that seems so fair, and scatters the possession not laid up in Heaven; teaching us that we are pilgrims and strangers, and not citizens of this world.

There is a natural delight in the success of our own schemes, which is not delight in the Lord. The promise is in "not doing thine own ways, nor finding thine own pleasure, nor speaking thine own words; then shalt thou delight thyself in the Lord." Isaiah lviii. 13, 14. Let those say who have been educated with much serving, without seeking counsel and strength from Him who is wisdom and

understanding,—have they not walked in their own light, and in the sparks that they have kindled lain down in sorrow?—*The Lost Blessing.*

WRITE THEM A LETTER TO-NIGHT.

Selected.

Don't go to the theatre, grange or ball,
But stay in your room to-night;
Deny yourself to the friends that call
And a good long letter write—
Write to the sad old folks at home
Who sit when the day is done,
With folded hands and downcast eyes
And think of the absent one.

Don't selfishly scribble "excuse my haste,
I've scarcely the time to write,"
Lest their brooding thoughts go wandering back
To many a by-gone night.
When they lost their needed sleep and rest,
And every breath was a prayer—
That God would leave their delicate babe
To their tender love and care.

Don't let them feel that you're no more need
Of their love or counsel wise;
For the heart grows strongly sensitive
When age has dimmed the eyes—
It might be well to tell them believe
You never forget them, quite;
That you deem it a pleasure, when far away,
Long letters home to write.

Don't think that the young and giddy friends,
Who make your pastime gay,
Have half the anxious thought for you
That the old folks have to-day.
The duty of writing do not put off;
Lest sleep and pleasure wait,
Lest the letter for which they looked and longed
Be a day or an hour too late.

For the sad old folks at home,
With locks fast turning white,
Are longing to hear from the absent one—
Write them a letter to-night.

Olyette Ellis.

Selected.

"A LITTLE WHILE AND YE SHALL SEE ME."

"A little while," oh, words of tender meaning,
That fill our souls with longings and with joy,
That bid our thoughts rise upward, very gladly,
To that bright land where bliss has no alloy.

"A little while," and then in that fair country,
All of our tears God's hand shall wipe away;
All pain and sin, all earthly we shall vanish,
When we behold, with joy, the perfect day.

And is this all? that we no more shall sorrow,
That we shall find no sin within the place?
Ah, no! the promise thrills with new, sweet meaning—
"A little while," and we shall see his face.

"A little while," and we shall see his glory,
Who, for our ransom, shed his precious blood,
That all our sins, though scarlet, might be whitened
Even washed away beneath the crimson flood.

"A little while," and Christ shall lead us gently
Up to the many mansions of the blest,
And all the hungry shall be fed with manna,
And all the weary shall he give sweet rest.

For in that land he giveth joy for sorrow,
He giveth peace to those by earth long tried;
And each soul findeth there its chief desire—
For in Christ's likeness all are satisfied.

"A little while," oh true, sweet words of comfort!
Fill thou the souls with Christ's own living grace,
That we may wait with gladness, always knowing,
"A little while," and we shall see his face.

Millie Calvert.

An Ohio man, who had been seen two successive days paing up and down in front of his saloon, as if in deep thought, was asked by a friend if the crusaders had been after him. His reply was, "No; but I have received a postal, signed by three ladies. The

husband of the first is one of my customers and is rapidly becoming a drunkard. A second of the second, one of my customers, is just starting in the drunkard's course. The husband of the third was one of my customers and died a drunkard. It cuts close, and can't stand it."—*Illustrated Weekly.*

When Frederick Hoffmann discovered carbonic acid gas and traced its effects on animal life, he was denounced by more than one German university as hostile to religion and veering towards atheism! Three or four students at the University of Jena, in the attempt to raise a spirit for the discovery of a supposed hidden treasure, were strangled or poisoned by the fumes of the charcoal they had been burning in a close garden house of a vineyard near Jena, while employed in their magnum fumigations and charms. One only was restored to life; and from his account of the noises and spectres in his ears and eyes as he was losing his senses, it was taken for granted that the bad spirit had destroyed them. Homann admitted that it was a very bad spirit that had tempted them, the spirit of avarice and folly; and that a very noxious spirit—"goat" or "geist"—was the immediate cause of the death. But he contended that this latter spirit was the spirit of charcoal, which would have produced the same effect had the young men been chanting psalms instead of incantations, and acquitted the devil of all direct concern in the business. The theological faculty took alarm; even physicians pretended to be horror-stricken at such audacity.

The idea that any discoveries in the sphere of the natural sciences can undermine the foundations of Christianity is losing its hold gradually; indeed, but certainly and finally "The mistakes of scientific men have never injured Christianity, while every new truth discovered by them has either added to its evidence or prepared the mind for its reception."

"A Right Spirit."—On one occasion a father found it necessary to punish his little daughter. But Mary climbed up into his lap, and, throwing her arms around his neck, said, "Papa, do love you."

"Why do you love me, my child?" the father asked.

"Because you try to make me good, papa." It is in this spirit that God's people should accept the chastisement he sends, remembering it is in love he rebukes and chastens; not for his pleasure, but for their profit, that they may be partakers of his holiness.

Russian Autocracy.

The power concentrated in the Russian Czars is without precedent in history, and has at all times exerted a most fatal influence on public life in Russia as well as on the personal character of the Czars themselves. Trained to a slavish obedience and to the belief that the personal will of one man and not the law, was the guiding principle of their whole existence, the people gradually sank into that political and intellectual apathy from which even now the mass of the Russian peasantry has not yet awakened. Not only to the people, however, but to the Czars themselves, has their power become a curse. Feeling the awful responsibility weighing on them, they naturally sought to alleviate it by giving their power a divine character. Every

of their acts they began to consider as the God, themselves as his instrument, and a man who dared to oppose them as an atheist not recognizing the dictates of heaven, for whom no punishment could appear cruel and severe. In a certain sense opinion is well founded, that all Russian were more or less maniacs. A human cannot bear the strain put on it by the rise of an almost divine power. It naturally acquires a morbid disposition, which in different forms, according to the character and energy of each individual. A man an undaunted will and energy becomes a man of his own power, a cold-blooded tyrant, in whose eyes the strict maintenance of "divine" rights becomes a religion, and it is his duty to uphold: The prototype is species of "Caesarean" majority is to be found in our century in the person of Nicholas, the present Emperor's father. He exercised his power not only as a right, but as a duty, imposed on him by Providence, crushed his enemies, not from personal animosity, or out of governmental interests, but only as a work of heavenly justice.

An episode which happened in 1848 with a member of my own family, will best serve to illustrate this feature in the character of the Emperor. A relation of mine, who was a student at the St. Petersburg University, with a few friends, formed a literary society, in which the works of contemporary liberal economists, publicists, and philosophers, were read and debated. One of the meretricious spies of the secret police detected the society as a "secret revolution-organization," and my relative, as president thereof. The latter was of course arrested, locked up in one of the underground cells of the St. Petersburg fortress, and summarily condemned by a special military court, and transported to Siberia for life. The influence which our family possessed in high quarters was brought to bear on the Emperor, but all in vain. At last the mother of the prisoner, meeting the Czar one day during one of his solitary walks in the Summer garden, threw herself at his feet, averring her innocence, and imploring his pardon. The Czar seemed to be profoundly touched, raised the old lady with the most chivalrous and pitying deference, and promised her to consider her son's case, and to have a personal interview with him. Nicholas was true to his word. The very next day the young man was brought out of his cell, and, a few days later, he stood before the Emperor. The latter took him by the hand, led him before an image of the Saviour suspended in the center of the room, and, forcing him down on his knees, exclaimed:

"Can you swear before Almighty God that you are not your associates had any criminal design against my life? Can you swear you believe in the holiness and eternity of the Russian autocracy?"

As soon as the prisoner had recovered from the unbounded surprise, he answered:

"I can swear to your Majesty that neither for any of my friends had the remotest design against your safety. As to the autocratic nature of government, I cannot conscientiously say that I believe in its eternity. The history of other countries teaches us that the same must come, even in Russia, when the people itself will take part in its government." The Czar answered not a syllable, embraced

the young man with almost parental tenderness, and drawing a ring from his own finger, he gave it to him, saying:

"This is a token of respect from your Czar. You have been sincere and truthful to me; and there is nothing I hate so much as a lie."

He then approached his writing-table, on which the sentence of the court concerning my relative was lying, and with one stroke of the pen—signed the paper!

"I pity you from the bottom of my heart," he said; "you are an honest man, and an honest man, true to his convictions, is more dangerous to autocracy than an unprincipled rascal. Therefore I must punish you, though never was this duty more painful to me than now. God bless you, my son, and judge me mercifully if I should appear to be in the wrong."

And, once more embracing his victim, he led him to the door.—*N. Am. Review.*

For "The Friend."

An Indian's View of Indian Affairs.

(Continued from page 274.)

"When I returned to Wallowa I found my people very much excited upon discovering that the soldiers were already in the Wallowa Valley. We held a council, and decided to move immediately, to avoid bloodshed.

"Too-hool-hool-suit, who felt outraged by his imprisonment, talked for war, and made many of my young men willing to fight rather than be driven like dogs from the land where they were born. He declared that blood alone would wash out the disgrace General Howard had put upon him. It required a strong heart to stand up against such talk, but I urged my people to be quiet, and not to begin a war.

"We gathered all the stock we could find, and made an attempt to move. We left many of our horses and cattle in Wallowa, and we lost several hundred in crossing the river. All of my people succeeded in getting across in safety. Many of the Nez Percés came together in Rocky Cañon to hold a grand council. I went with all my people. This council lasted ten days. There was a great deal of war-talk, and a great deal of excitement. There was one young brave present whose father had been killed by a white man five years before. This man's blood was bad against white men, and he left the council calling for revenge.

"Again I counselled peace, and I thought the danger was past. We had not complied with General Howard's order because we could not, but we intended to do so as soon as possible. I was leaving the council to kill beef for my family, when news came that the young man whose father had been killed had gone out with several other hot-blooded young braves and killed four white men. He rode up to the council and shouted: 'Why do you sit here like women?' The war has begun already!" I was deeply grieved. All the lodges were moved except my brother's and my own. I saw clearly that the war was upon us when I learned that my young men had been secretly buying ammunition. I had heard then that Too-hool-hool-suit, who had been imprisoned by General Howard, had succeeded in organizing a war-party. I knew that their acts would involve all my people. I saw that the war could not then be prevented. The time had passed. I counselled peace from the beginning. I knew that we were too weak to fight the United States. * *

"I would have given my own life if I could have undone the killing of white men by my people. I blame my young men and I blame the white men. I blame General Howard for not giving my people time to get their stock away from Wallowa. I do not acknowledge that he had the right to order me to leave Wallowa at any time. I deny that either my father or myself ever sold that land. It is still our land. I may never again be our home, but my father sleeps there, and I love it as I love my mother. I left there, hoping to avoid bloodshed.

"If General Howard had given me plenty of time to gather up my stock, and treated Too-hool-hool-suit as a man should be treated, there would have been no war."

It is not necessary to republish the particulars of the war which immediately followed. It lasted but a few weeks. The Indians finally surrendered to General Miles upon the assurance that their lives should be spared, and they should be sent upon the Reservation. This promise that they should be sent to the Reservation has never been fulfilled. Chief Joseph says:

"General Miles turned my people over to another soldier, and we were taken to Bismarck. Captain Johnson, who now had charge of us, received an order to take us to Fort Leavenworth. At Leavenworth we were placed on a low river bottom, with no water except river-water to drink and cook with. We had always lived in a healthy country, where the mountains were high and the water was cold and clear. Many of my people sickened and died, and we buried them in this strange land. I can not tell how much my heart suffered for my people while at Leavenworth. The Great Spirit Chief who rules above seemed to be looking some other way, and did not see what was being done to my people.

"During the hot days (July, 1878) we received notice that we were to be moved farther away from our own country. We were not asked if we were willing to go. We were ordered to get into the railroad-cars. Three of my people died on the way to Baxter Springs. It was worse to die there than to die fighting in the mountains.

"We were moved from Baxter Springs (Kansas) to the Indian Territory, and set down without our lodges. We had but little medicine, and we were nearly all sick. Seventy of my people have died since we moved there.

"At last I was granted permission to come to Washington and bring my friend Yellow Bull or our interpreter with me. I am glad we came. I have shaken hands with a great many friends, but there are some things I want to know which no one seems able to explain. I can not understand how the Government sends a man out to fight us, as it did General Miles, and then breaks his word. Such a Government has something wrong about it. I can not understand why so many chiefs are allowed to talk so many different ways, and I promise so many different things. I have seen the Great Father Chief (the President), the next Great Chief (Secretary of the Interior), the Commissioner Chief (Hay), the Law Chief (General Butler), and many other law chiefs (Congressmen), and they all say they are my friends, and that I shall have justice, but while their mouths all talk right, I do not understand why nothing is done for

my people. I have heard talk and talk, but nothing is done. Good words do not last long unless they amount to something. Words do not pay for my dead people. They do not pay for my country, nor overrun by white men. They do not protect my father's grave. They do not pay for all my horses and cattle. Good words will not give me back my children. Good words will not make good the promise of your War Chief, General Miles. Good words will not give my people good health and stop them from dying. Good words will not get my people a home where they can live in peace and take care of themselves. I am tired of talk that comes to nothing.

It makes my heart sick when I remember all the good words and all the broken promises. There has been too much talking by men who had no right to talk. Too many misrepresentations have been made, too many misunderstandings have come up between the white men about the Indians. If the white man wants to live in peace with the Indian, he can live in peace. There need be no trouble. Treat all men alike. Give them all the same law. Give them all an even chance to live and grow. All men were made by the same Great Spirit Chief. They are all brothers. The earth is the mother of all people, and all people should have equal rights upon it. You might as well expect the rivers to run backward as that any man who was born a free man should be contented when penned up and denied liberty to go where he pleases. If you tie a horse to a stake, do you expect he will grow fat? If you pen an Indian up on a small spot of earth, and compel him to stay there, he will not be contented, nor will he grow and prosper. I have asked some of the great white chiefs where they get their authority to say to the Indian that he shall stay in one place, while he sees white men going where they please. They cannot tell me.

"I only ask of the Government to be treated as all other men are treated. If I cannot go to my own home, let me have a home in some country where my people will not die so fast. I would like to go to Bitter Root Valley. There my people would be healthy; where they are now they are dying. Three have died since I left my camp to come to Washington.

When I think of our condition my heart is heavy. I see men of my race treated as outlaws and driven from country to country, or shot down like animals.

I know that my race must change. We cannot hold our own with the white men as we are. We only ask an even chance to live as other men live. We ask to be recognized as men. We ask that the same law shall work alike on all men. If the Indian breaks the law, punish him by the law. If the white man breaks the law, punish him also.

Let me be a free man—free to travel, free to stop, free to work, free to trade where I choose, free to choose my own teachers, free to follow the religion of my fathers, free to think and talk and act for myself—and I will obey every law, or submit to the penalty.

Whenever the white man treats the Indian as they treat each other, then we will have no more wars. We shall all be alike—brothers of one father and one mother, with one sky above us and one country around us, and one government for all. Then the Great Spirit Chief who rules above will smile upon this land, and send rain to wash out the bloody

spots made by brothers' hands from the face of the earth. For this time the Indian race are waiting and praying. I hope that no more groans of wounded men and women will ever go to the ear of the Great Spirit Chief above, and that all people may be one people.

In-mut-too-yah-lat-lat has spoken for his people.
YOUNG JOSEPH.

Washington City, D. C.

THE FRIEND.

FOURTH MONTH 19, 1879.

Some weeks ago, copies of the following minutes were handed to us by a Friend who had received them from a member of the Body known as the "Binns Yearly Meeting," to distinguish it from the Ohio Yearly Meeting, from which it separated in 1854.

As they purport to be official documents, expressing the belief of the body issuing them, we returned them to the Friend from whom we received them, informing him that before publishing them in our Journal, we would require their correctness to be vouched for by some reliable authority.

Within a few days, the Friend who had handed the minutes to us, has returned them, and sent us a letter written to him by the member of the "Binns" meeting who first supplied them, to whom he had stated our requisition. The writer of that letter says—

"I am willing to be responsible for the minutes sent, so far as their being correct copies, as taken from the minutes of the Select and Quarterly Meetings. * * * The minute issued in 1877, originated in the Select Meeting, and by it was sent down to its subordinate meetings by a special committee. That issued in 1878 by Select Meeting, was sent down to the branches of the same, but no farther."
Minute of 1877.

"This meeting was brought into deep exercise and travail concerning unsound and mystical views and expositions which appear here and there in certain of our members, in opposition to the plain scriptural doctrines of man's darkness and deadness in sin by nature, and his redemption therefrom by the Lord Jesus Christ, whose shed blood is the alone means of cleansing the soul from all the guilt of sin; it was directed, that a non-acceptance of this doctrine, is a manifest disqualification for the station of Minister or Elder."
Minute of 1878.

"This meeting renewedly feels the importance of purging itself from all unsoundness in doctrine, and we hereby re-affirm the substance of the minute of last year, and subordinate meetings are directed to carry out the instructions therein given, in reference to such cases. We do not believe that there is any principle or quality in the soul of man, innate or otherwise, which, even though rightly used, will ever save a single soul; but that it pleased God, by the foolishness of preaching, to save them that believe; and the Holy Spirit is sent to convince the ungodly of sin, who upon repentance towards God, and faith in Jesus Christ who died for us, are justified by his blood. And we repudiate the so called doctrine of the inner light, or the gift of a portion of the Holy Spirit in the soul of every man, as dangerous, unsound, and unscriptural."

The italicising is by us.

It is right to state, that the writer of letter observes, that these minutes were approved by several in the Quarterly Meeting of which he is a member, but they were ruled by the "controlling element."

The unsound, anti-scriptural doctrine contained in the concluding paragraph of last minute, has been promulgated by per in the station of ministers in the different Yearly Meetings for years past; but, so far as we know, this is the first time it has been officially avowed by any organized body of calling themselves Friends. It is as a departure from the doctrine of "naive saving Light," as always held by Friend though in an opposite direction,—as was heresy of E. Hicks and his followers.

Of what worth is the expression, "The Holy Spirit is sent to convince the ungodly of sin when made by those who thus publicly declare they repudiate the so-called doctrine the Inner Light, or the gift of a portion the Holy Spirit in the soul of every man dangerous, unsound, and unscriptural; enact, that the non-acceptance of this doctrine is a manifest disqualification for the station of minister or elder. Must not the quarrel in every fair-minded Friend, what it have a body of people to pass themselves as Friends, while repudiating one of the fundamental and distinguishing doctrines of the gospel, as ever held by the Society? Geo. Fox declares, "The Lord God opened to by his invisible power, how every man enlightened by the Divine light of Christ. I saw it shine through all, and that they believed in it came out of condemnation, to Light of Life, and became the children of God; but they that hated it and did not believe it were condemned by it though they had profession of Christ." Again, "I saw Christ died for all men, and enlightened all men women with his divine, saving light, and none could be true believers but those who believed therein. I saw that the Grace of God which brings salvation, had appeared to men, and that the manifestation of the Spirit of God was given to every man to profit withal."

With this declaration, correspond all standard writings—approved by the Society—of those Friends who have expounded to the world the doctrines and testimonies truly held by Friends. But the departures from the doctrines of the gospel and the testimonies springing from them, are constantly becoming wider and more numerous, among those who have long been making innovations upon them, and disrupting the bonds that held the Society together for more than two centuries yet those who adhere to the original faith and testimonies, are disowned by meetings claiming to be sound, because they are conscientiously bound to withdraw from where they are continually exposed to have themselves and their children taught such heresy.

If we remember aright, part of the deposition sent out by London Yearly Meeting 1 year were in attendance at the meeting who issued the last minute. Nothing is said, believe, in the account published of their hours, of any opposition to, or disapproval of, the doctrine contained in the minute, being manifested by them. As London Yearly Meeting was the first to accept that body of secederists as a meeting in unity with it, and it opened the way and encouraged other Yearly Meetings to follow its lead, we would suppose

it does not endorse the salient opinion set in the minute sent down by its Select Committee Meeting to its subordinate branches, which were not prepared to believe—it would be as much cause to send a deputation to indicate this apostasy from Quakerism, as to send it to send out its committee to advise Friends who had withdrawn from their members of Western Yearly Meeting, to turn into fellowship with those they had Time will make manifest.

The discussions which have lately taken respecting the proposed transfer of the Indians to the War Department, a thoughtful observer can hardly fail to have detected the little acknowledgment that was made of the inherent rights of the Indians, and how slightly the violation of the obligations of the nation towards them on the part of its official representatives or by private individuals, appears to have affected the public mind, as well as the little disposition that appears to exist to prevent that most fruitful source of disturbances with the Indians—the oppression of lawless and designing whites, to which cause it has been recently alluded by a member of the Commission appointed to report on the propriety of the proposed transfer, nine-tenths of the wars with the Indians may be attributed. Had a right sentiment prevailed in the community at large in reference to these important subjects, a heavy load of responsibility which now rests upon it on account of the treatment of the aborigines of this country, would not have incurred.

In judging of the action of the Government in bargaining with the Indians for the sale of their lands, it must be remembered that in many instances, on account of the wandering life of the tribes, no strong partiality for particular regions existed, and that the acquiescence rendered was to them an adequate compensation, but it is also true that in other cases, when the Indians have been unwilling parted with their land, its cession has been demanded by force, and they have been treated, with a ruthless hand, to a distant exile, although their attachment to their native lands was of the strongest character. The sad history of the Nez Percé Indians, which has recently been spread before our eyes, and the forcible removal of the Apaches and Cherokees, in a former generation, are among the instances which might be cited, in which arrogant demands of white rulers upon the coveted home of the red man, were permitted to overrule considerations of right and justice, and to precipitate Government into deeds of violence and oppression. In other cases the promises of Government for substantial support, the payment of stipulated moneys, and the fulfillment of other conditions of treaties entered into, have been shamefully disregarded.

It is to be feared that the frequency with which solemn pledges of this character have been violated on the part of the United States, not only stained our history with many marks of injustice, but has also weakened among ourselves the sense of national honor, and created the feeling that treaties are to be abated at the will of the stronger party, or that restrictions removed notwithstanding the faith of the nation has been guaranteed their observance, whenever the demands become urgent on the part of our own people.

In an "Appeal on behalf of the colored race," addressed to our fellow citizens by the Yearly Meeting, in 1858, the following solemn language occurs, which although referring especially to the oppression of the blacks, and which may be regarded as having received in great measure its illustration during the sufferings which this nation shortly afterwards underwent in liberating them from slavery, has yet, we believe, an application to the treatment of the "remnants of the tribes," in the language of the appeal, "who once possessed the soil upon which we have grown rich," and whom "every principle of religion and humanity dictates should be treated with kindness and liberality," viz :

"It is one of the fixed laws of [God's] moral government, attested by experience and by Holy Scripture, that wickedness and oppression are sooner or later followed by his just judgments. The annals of those that have preceded us furnish abundant evidence that national sins have ever incurred national calamities, and that a course of iniquity and violence, however prosperous for a time, has eventually terminated in disgrace and ruin. History abounds with instances of governments which have risen to a height of power and influence which seemed almost irresistible; and arrogantly presuming on the strength of their position, and trusting to their skill and management, have sought to aggrandize themselves by encroaching on the rights of others, until at length, in the righteous retribution of Him who has declared 'Vengeance is mine—I will repay,' the measure they have meted to others has been returned upon themselves, unlooked for calamities have befallen, they have sunk into moral and political degradation, and their very existence has been blotted from the earth." "However improbable, in the day of outward prosperity, a reverse may appear; however it may seem to us for a time that God regardeth not the iniquity of the oppressor, nor lieth to the groaning of the down-trodden, it is unalterably certain that the day of recompense will sooner or later arrive."

SUMMARY OF EVENTS.

UNITED STATES.—The U. S. Senate has decided by a vote of 35 yeas to 25 nays, to admit Charles H. Bell, appointed by the Governor of New Hampshire as Senator. The Army Appropriation bill was reported without amendment, and placed on the calendar. The House is engaged in consideration of the Legislative Appropriation bill. The amendment directing that the ten millions of legal tenders kept in the Treasury for the redemption of fractional currency, be issued in payment of arrears of pensions has been adopted. An amendment making an appropriation for the eradication of the cattle disease, was debated on the 12th inst., and finally referred to the committee on agriculture.

The report of the Directors of the Union Pacific Railroad for 1878, shows there were 104,275 miles of road in operation. The total net income for the year was \$7,361,072. The local business of the railroad is an encouraging increase over previous years. The sales of land amounted to 318,903 acres, at an average price of \$4.88 per acre.

A telegram from Port Eads, at the mouth of the Mississippi, says there is now a navigable channel, 27 feet deep, from the light-house to the waters of the gulf, and 25 feet clear for the same distance with a width of 230 feet.

Telegraphic communication is now open between New York and Antofagasta, in Bolivia, South America. At an auction sale in New York on the 9th inst., by the Delaware and Hudson Canal Company, of 50,000 tons of the several sizes of coal, the average price realized was \$2.53 per ton, which is 13¢ less than the prices for the previous month. This is said to be considerably below the cost of production.

The five steamers which left New York on the 12th, carried 225 cubic passengers for Europe. The most valuable features among the cargo were five cases and 100 bags domestic dry goods for Liverpool, and 50 tons agricultural machines for Germany.

The farmers of the Wyoming Valley are said to be alarmed at the prevalence of "pleuro-pneumonia" in that region.

A severe snow storm is reported in the Lake Champlain region on the 11th,—about eight inches of snow fell.

A large number of colored people are leaving the South, and emigrating to the West. At a meeting of colored citizens held in New York, resolutions were adopted recommending the emigrants not to settle in the cities and towns, but permanently on lands, and develop that higher manhood which they are known to possess.

Markets, &c.—U. S. sixes, 1881, 106½; 5s, 1881, registered, 103½; coupon, 104½; 4½ per cent, 105½; 4 per cent, 99½; 10-10s, 101½.

Cotton, 11½ a 11½ cts. per pound for uplands and New Orleans.

Petroleum.—Crude 8½ cts. in barrels, and standard white, at 9½ cts. for export, and 10 a 10½ cts. per gallon for home use. Lined oil, 60 cts. from American seed, and 61 cts. from California. Lard oil, 50 a 53 cts.; sperm, crude, 83 cts., natural, virgin, 92 a 95 cts.; neat-foot, 75 cts. for prime, 60 cts. for No. 1, per gallon.

Fresh Fruit.—Apples scarce and in demand—Baldwins, \$2.25 a \$2.37½; choice Greenings, \$2.50; Russets, \$2 a \$2.25. Cranberries, 87 a 88 per bushel; \$2.25 a \$2.75 per crate. Strawberries, 35 a 40 cts. per quart. Flour.—Choice brands firmly held. Penna. extra, \$4.37 a \$4.75; choice \$4.90 a \$5; Ohio extra family, \$4.50 a \$5; fancy, \$5.20 a \$5.25; patent, \$7.25 a \$7.75. Rye flour, \$2.75 a \$2.85. Corn meal, \$2.50 per barrel. Bran, \$13.75 a \$14 per ton.

Grain.—Wheat was in better demand at an advance, Delaware and Jersey amber, \$1.15 a \$1.16; red, \$1 a \$1.14; white, \$1.17. Rye, \$7 a 8 cts. Corn, 42 a 43½ cts. Oats, mixed, 30 a 31 cts.; white, 32 a 32½ cts. Seeds.—Clover-seed, 4½ a 5½ cts. per bushel; Flax-seed, \$1.42 a \$1.45 per bushel; Timothy, \$1.40 a \$1.50 as to quality.

Hay and Straw.—Prime timothy, 65 a 75 cts. per 100 pounds; mixed, 50 a 65 cts.; straw, 75 a 85 cts. per 100 pounds.

Beef cattle.—Extra steers, 6½ cts.; medium to good, 5 a 6 cts.; common, 4 a 5 cts. Cows, \$2.75 a \$2.75 per head. Sheep, 4½ a 6½ cts. per lb. as to quality. Hogs, 6 a 6½ cts. per pound, as to condition.

The number of deaths in Philadelphia for the week ending at noon on the 12th, was 286. Of this number 180 were adults and 106 children: 32 being under one year of age.

FOOTNOTES.—In the Dominion House of Commons, a member for British Columbia moved for leave to introduce a bill providing for a peaceful separation of that Province from the Dominion. The motion was not seconded, and the speaker declared it out of order, so the matter dropped.

The Parliament of the British Columbia has adjourned until the 10th inst., to await definite information from Ottawa regarding the railway question. This action is approved by the public, who are opposed to sectional strife. Since the adjournment, telegrams have been received in Victoria from Ottawa, saying that the construction of the railway will be commenced this year, and the railway policy of the government will shortly be announced.

The City of Glasgow bank liquidators have decided to call for 2250 pounds on each 100 pound share.

The Times correspondent at Lahore, says: "Major Cavanagh will probably go to Cabul, with a small escort, to endeavor to quell the disturbances. His duty of 'futility of resistance.'" It is said Yakob is inciting the frontier tribes against the British.

Information from South Africa has been received to the effect that a convoy of supplies proceeding from Derby in the Louisa district, to Murchison, was attacked by 4000 natives, and that at least twenty wagons containing supplies were lost, and but few men escaped.

Russia.—Reports from Kieff state that the political prisoners there are most cruelly treated. Many have been shot while attempting to escape.

On the 14th inst., while the Czar was taking his usual morning walk, an attempt was made to assassinate him. Four or five shots were fired at him, but he escaped uninjured. The would-be assassin was captured, and is undergoing examination.

It is reported that Prince Melikoff and all the foreign doctors have quitted Astrachan.

From Valparaiso, information is received that Chili has formally declared war against Peru.

BOOKS FOR SALE AT FRIENDS' BOOK STORE, No. 304 Arch St., Philadelphia.

Friends' Library, in fourteen volumes, super-royal octavo.
 Complete sets of fourteen volumes each, bound in sheep, can be had for \$35.00 per set. There are now on hand a number of old volumes, bound in cloth, which will be furnished at fifty cents each.

"For The Friend"
Some Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 278.)

1843. 11th mo. 1st. This being the day that I have generally had my mid-week sitting, and not feeling willing to omit it, I explained to the teacher and he interpreted to the scholars, my reason for having them sit in silence. Their books were put away, and their quiet orderly behavior was rather surprising. I thought the sitting was owned by the life-giving presence of the dear Master; there were very few of them, probably, who had ever attended anything like a religious meeting before. Left there the next day with feelings of gratitude, as I think I have generally done, whilst I have mostly gone up with envy, discouraging feelings.

12th mo. 3d. I had the company of Silas Jorrell and three of Ariel Wellman's family that meeting; my mind was, I think, more steady than is usually the case when I have had the company of strangers.

Second day. Feeling less weakness and discouragement than has frequently been the case when about to visit the school at Horse-bone Bend, I left home for that purpose Fourth-day, the 6th. I again felt it something of a trial to have a sitting with the scholars; the teacher being absent this forenoon made it a little more so, as I wished to tell them what was about to do, and have some opportunity of talking with them before we commenced, but when the time came, by mind seemed strengthened. I got one of the scholars to interpret a few words and we commenced our sitting. I know not when I have been more favored with strength to perform what I think my Divine Master was pleased to require of me, in silence. The scholars generally behaved well; I think I have reason to be very thankful for the great favors of this day, and take courage. I visited Jos. Shongo, a sick Indian, and gave him some cloth which I had been directed by Thos. Evans to purchase for the benefit of the poor, aged and sick Indians; he said he had some money in his hands which I might dispose of in that way. This, I think, will increase the comfort of some of the poor Indians, who seem thankful for the help given them.

Whilst I have been thus favored, I have also felt much weakness and discouragement, which are in their turn, if the mind is kept single to the Divine Master, blessings, making

us sensible that in Him is our strength, increasing our love to, and confidence in Him, in whom there is strength and true peace.

13th. From the preceding up to this time, I think I have been favored at seasons with a degree of faith which has been strengthening and comforting. This day attended the school at Cold Spring; it being my meeting day, although it was a trial, I thought it would be right for me to sit with the scholars; their behavior was not, I think, so good as at some other times, but my mind was mercifully favored and borne up over my trials. In the afternoon the behavior of some of the larger scholars was very trying, at which I felt a good deal discouraged, fearing their influence would be a serious disadvantage to the school.

Fifth-day, the 14th. The school was pretty well attended and the behavior better. I feel comforted and thankful in believing in times of trial it is best for us to keep near to our Blessed Master, and when ability is given, supplicate for his blessing and help, that He would, in his overruling Providence, remove the difficulties which are in our way, and cause that our labors may praise His great and excellent name. This has felt to me to be much more availing than all that can be done in the wisdom and strength of the creature.

20th. Went up to Horse Shoe Bend, to visit the school; found neither teacher nor scholars at the school-house, at which I felt quite distressed, not knowing the cause, and fearing the teacher was sick or indulging in the use of ardent spirits. I made inquiry at some of the Indian houses near, but could get little information. After taking some care of my horse, I went to the school-house to eat some provisions I had with me; I felt very lonely, think I never felt more sympathy with the true suffering sinner; I thought of the sufferings of the Blessed Master who suffered for us, and of the sufferings of some of our early Friends; their being shut up in dreary dungeons, particularly females. I thought there was nothing but the life-giving presence of the Blessed Master that could have supported them under their privations and trials, and enabled them in the end to rejoice and say: The Lord was our helper, He is worthy in all things to be obeyed, and unto Him is due all honor, praise and thanksgiving both now and forevermore.

1844. 1st mo. 4th. Went to pay, as I suppose, my last visit to the Cornplanter reservation, before leaving to visit my friends in Chester county. On my way, felt some discouragement; after getting there, King Pierce, my interpreter and myself, called at Moses Pierce's, where we left our horses and went to Charles Obole's. I expressed a wish to see some of the Indians. William Obole started out and soon had a number collected. I had a comfortable opportunity with them, and have reason to believe it was satisfactory to them. Charles Obole expressed his satis-

faction with what had been said, and that he was always willing to hear what "Friends" had to say to them; he believed they had always given them good advice. I then came back to Moses Pierce's; had a satisfactory opportunity with Moses, his wife and part of his family: they expressed their satisfaction with what was said to them. On my way home I think I may say, I felt thankful for the great favors of that day, feeling clear, as I thought, of the Indians of that reservation, excepting one old woman whom I met with on my way, and was relieved of uneasiness on her account; before reaching home my enjoyment was great, at the same time desiring that I might be preserved and enabled to leave the other reservation with the same kind of feelings. I reached Owen Blacksnake's I think near 8 o'clock in the evening, where I had a stable erected; found they had retired for the night; put away my horse and crossed the river in a canoe; my mind was so comforted that I think I might say, lonesome, fearful feelings were almost removed from me. It was a moonlight evening.

1st mo. 5th. On my way to the Post-office, thought I did not feel clear of F. A., a retailer of liquor, living near the reservation, who I had been told has sold a good deal of liquor to the Indians, to whom I had before spoken on the subject. I also thought of calling to see J. J., an Indian, who has been, I understand, in the practice of drinking a good deal of late. The thought of attending to these services was for a time something of a trial, but it was in mercy made easy by my meeting with F. in or near the road; he did not appear to be offended at what I said, and bid me farewell, apparently with friendly feelings. I then went towards J. J.'s, met him on the road and spoke to him on the subject of drinking; he told me he did not intend to drink any more for a time; he is said to be a quarrelsome, rough-dispositional man. I think I may acknowledge it is a great favor from a kind and merciful Master, whom I desire to reserve, that these two men treated me with respect; giving up to these services seemed harder than performing them. May these, with many other like favors, be remembered with feelings of gratitude to Him who has been my strength and may they be blessed to the increasing of my faith in, and faithful-ness to, my Heavenly Master. I have had two visits from Charles Obole, and have been comforted in believing he was favored with a sense of right feeling both times; the way he expressed himself in regard to our Saviour was comforting to me. As the time draws near for my leaving, notwithstanding I have many mercies I have experienced, I have feared I should not get through to my peace, but this I believe to be a discouragement but I think I believe to be a discouragement but I have thrown in my way by the enemy. I feel the fault very reason to believe should. I concern will be entirely my own. The account continued with me that I might be faithful, de-

siring very much to be favored to feel myself as clear of my Indian brothers and sisters on the upper end of the reservation, and in the neighborhood of Cold Spring, as I have, though unmerited mercy, been favored to do on Complanter's reservation, having returned from there with sweet peace of mind, and I think I may say with feelings of gratitude to my Divine Master, whose mercies and favors I desire never to forget, but that at all times when they are brought to my recollection, my heart may bring forth fruits of thanksgiving and praise to His great and excellent name, that my situation may never be comparable to the unfruitful fig tree.

That evening, when I came home, I was informed of the sudden death of Jarvis Dodge, who was killed by the falling of a small tree; the news was truly sorrowful as he had been, and it was to be feared, a careless-living man, and at times intemperate. May such sudden deaths serve as a solemn warning to those that are left.

(To be continued.)

On the Resurrection of Jesus Christ.

BY OLINTHUS GREGORY.

(Continued from page 283.)

After this, the feast being now over, the eleven travelled to Galilee, being encouraged, by promises both before and after the resurrection, to expect the sight of their Lord there. The distance was more than eighty miles from Jerusalem to Tiberias, and more still to Bethsaida and Capernaum. Thither, however, they went, inspired by these hopes; and shortly after their arrival there, Jesus appeared again at the sea of Tiberias, or, as it was sometimes called, the sea of Galilee. Here were seven of the disciples, probably of the eleven, following their occupation of fishers; they had been "toiling all night, and caught nothing," when Jesus appeared, whom they knew not at first. In consequence of following his advice, they had a large and miraculous draught of fishes in their net; which was succeeded by a long, familiar, and interesting conversation, related pretty fully by the apostle John, who was one of the disciples present. This was, as John terms it, the *third* time he had appeared to the body of the apostles; but it was his *seventh* appearance since his resurrection.

Probably it was at this familiar interview by the sea of Tiberias, that Jesus told these seven disciples when and where they might expect to see him in a very public manner, agreeably to the promise made them before his death. And thus it might be that they gave notice of it privately to as many disciples as might be thought proper; for even then, though he was to appear openly yet it was not to a great variety, but "to chosen witnesses, who ate and drank with him after he rose from the dead." Pursuant to this previous notice, as it should seem, there was a most numerous and public meeting upon a mountain in Galilee, where Jesus made his *eighth* appearance. Matthew says expressly Jesus had appointed the mountain. The number assembled there was between five and six hundred, called emphatically *brethren*, denoting that they were all chosen witnesses, as Peter observed in the house of Cornelius. Here as he found "some" still "doubted," and gave infallible proofs of his resurrection, and

"spake much of the things concerning the kingdom of God;" being now about to take his final farewell of the greatest part of them on earth. It is worthy of observation, that the majority of the witnesses of this appearance were living, and appealed to as such, twenty years afterwards, when Paul wrote his first Epistle to the Corinthians.

The *ninth* appearance of Christ recorded in the Scriptures, was to James. This, Paul informs us, was after that to the five hundred. Probably it took place in Galilee, as well as the two last mentioned; but the evangelists give us no particular information about it. Paul, however, mentions it as a fact *well known*; otherwise he would not have adduced it in proof of the resurrection, denied as it was by some, and little understood by many who believed in the fact.

The *tenth* and last appearance of the risen Saviour was at Jerusalem, "to all the apostles," that is, to the eleven remaining ones, Judas being "gone to his own place." It was about six weeks after the passover, and about forty days after the resurrection, when several of the disciples from Galilee repaired again to Jerusalem, in order to keep the approaching feast of weeks called the *Pentecost* by the Grecian Jews. Being assembled together with the disciples at Jerusalem in one house, probably the same as that where Jesus had kept the passover, and the same in which they met on the day of the resurrection, and on that day week, and where they worshipped till the day of Pentecost; there they had the conversation with their Lord recorded in the first chapter of the Acts. There he gave them commandments, and spake more "of the things pertaining to the kingdom of God." There he delivered to them the commission to go forth into all the world, to preach, and baptize, and gave them animating promises of his presence with them while their life continued, and with their successors "to the end of the world." There he commanded them not to depart into Galilee again, but to tarry at Jerusalem till they should "be baptized with the Holy Ghost," which he assured them would be in the course of a few days. This last interview would doubtless be very endearing, affecting, and instructive. And, as if to impress the circumstance with all its important lessons, and all its solemn tendencies, more deeply on their minds, he led them out towards Bethany or *Mount Olivet*, conversing as they went, according to his wonted manner. Often had he retired with his dear and beloved disciples to that secluded spot; and thither he now for the last time conducted them. There,—near the place whence he commenced his triumphant ride into Jerusalem,—where he had frequently conversed, expounded parables, and prayed with his disciples,—where, in so much agony, he had recently prayed, and sweat as it were "drops of blood,"—where he was betrayed with a kiss, taken by his enemies, and forsaken by his disciples, there he once more assembled them, "lifted up his hands and blessed them," and "while he blessed them," he was taken up gradually from them into heaven, "a cloud receiving him out of their sight." Thus then it appears, from apostolic testimony, that Jesus Christ not only rose from the dead, but rendered himself manifest to many after his resurrection, removing the doubts of the incredulous by "the most infallible proofs," and confirming the faith of the weak by the most consoling and cheering

promises: promises which speedily after were amply fulfilled.

"Twice twenty days he sojourn'd here on earth,
And shew'd himself alive to chosen witnesses;
By proofs so strong, that the most slow-assessing
Had not a scruple left. This having done,
He mounted up to heaven." B.

Such, in few words, is the history of our Lord's resurrection from the dead, and of his various appearances after that important event. I have drawn this account not only from the writings of any one evangelist, but from a collection and comparison of their separate stories; for the relations of these four historians, though not discordant, do not comprise all the circumstances. This, however, is by no means to be regretted. Such a complete coincidence between four narratives relating to the same events, as shall extend to every minute circumstance, would argue collusion, or, at least, dependence; whereas, four narratives, each exhibiting the grand outlines of the story, but varying in minutiae matters, some mentioning one, and some another, according to the particular subject or individual feeling of each respective writer, naturally suggest the ideas of honesty and independent narration, and exclude the possibility of contrivance and forgery.

Admitting, then, the genuineness and authenticity of the historical books of the New Testament (both satisfactorily established in trust in my fifth letter), the resurrection of Jesus Christ cannot be denied. Yet, as is extraordinary fact is of the greatest moment in the Christian system, you will naturally expect that I will not quit the subject merely with this summary argument in its favor. I shall, therefore, devote the remainder of the present letter, to the consideration of two or three such particular evidences as in themselves force our assent; and to a cursory view of some of the difficulties that spring from a denial of the fact.

(To be continued.)

For "The Friend." Religious Responsibility of the Young.

There is an opinion among many in the younger walks of life, (often assented to by those older than themselves,) that there is not the same necessity in young people seeing the Lord, as when they become older. Now this opinion is incorrect; and is founded more upon natural inclination, than upon self-thoughtfulness or the testimony of the Scriptures.

The wise man said, "Rejoice, oh young man, in thy youth," &c., but adds this warning, "know thou that for all these things God will bring thee into judgment;" and he also makes use of the language, "Remember not thy Creator in the days of thy youth." From these and many other passages of Scripture we infer that young people are under the same obligation to do the Divine will as a those of mature years; and that according to their ability, as much is required of them as a religious sense as from individuals of ripe age and experience. How sad then is it to find them, what a great mistake do they commit and what a terrible risk do they run, who they deliberately stifle the good feelings within them, and enter into the frivolity and self-indulgence incident to youth; for by so doing they not only risk their immortal souls, but they also barter real happiness in this world for uncertain and less satisfying pleasures.

Youth has been called the spring-time of life; and at no other period of our existence does the world look more beautiful, and its enjoyments seem more harmless and attractive. Strength of mind and body are then at their prime; the pulse beats high with hope, and the untried mind sees everything in its most promising aspect. All this is perfectly natural and right; but the fact must not be overlooked, that youth is also the time when character is formed, and habits created which frequently last a lifetime. It is then that religious impressions are received, which, as they are prized or neglected, mould the course of their years.

When young men and women reach an age to think for themselves, they find two paths opened to their view; one of these, a path of fidelity, with religion for its safe-guard; the other, one that permits greater freedom of action, but which we are assured leads to destruction. If they choose the broad way, a responsibility they incur is very great; for not only do they slight Him who has given them everything they possess, but their eyes become insensibly blinded, and their hearts deadened to sin, until they adopt religious opinions, which before they could not have entertained; or are guilty of acts, from which they would previously have shrunk with horror. Their good resolutions to do better in after years will then avail but little, and before they know their danger, they may be unable to retrace their steps. Neither will it do for the young to imagine, that some day or other, they will repent of their ways, and amend. They forget that the opportunity to do so may never be afforded; and that if in mercy it is, they will find repentance to be exceedingly difficult. Lukewarmness as regards religion, is also a very dangerous condition to be in; and we may depend upon it, that easily ignoring our accountability to God will in no wise justify us in his sight.

Such being the case, we see that there is no more safe or desirable time than youth, in which to cultivate self-control and religious principles, which, as they are fostered, yield lessened fruits to their possessor, besides greatly influencing surrounding individuals. In this connection it may be said, that force of example among the young is very great, and that often the least effort to do right has such influence; while, on the other hand, a departure into unrestrained liberty, is frequently imitated by others, with most sorrowful results.

The history of the Christian religion, and in particular that of the Society of Friends, tells of many very young in years, who were living examples of piety and zeal in the Lord's service, often in the midst of bitter persecution and ridicule. The good condition that they attained, can also be reached by the youth of this generation, if they are willing to be led by the same infallible Guide that animated them; and certainly just as much is required of us, as was of those who lived two centuries ago. The world at large, never more demanded a society consistently upholding the testimonies of Friends than it now does; and there never was more need that young men and women should prove, by conduct and example, that with their duty to their Maker takes precedence over love of self, or fear of the cross.

To you who are young in years, and who may read these lines, I would also add, that

being greatly favored by the Lord in almost every respect, the commonest ties of gratitude alone should induce you to do whatever He may require at your hands. He has given you much, and has the right to expect much. Many to whom I would thus appeal, are endowed by nature with most excellent abilities, and have the advantage of superior education; while upon a considerable number worldly wealth has been liberally bestowed. Each one of these are blessings that place you under deep obligations to the bountiful Giver; and for each one a satisfactory account must be rendered in the day of judgment; which day we have continual evidence, may come to even the very young in years almost before they are aware. At that awful time there will be no excuse to make, for not only have earthly advantages been granted, but you have also felt the strivings of the Holy Spirit within your breasts, offering the salvation of your immortal souls; and secretly reproving when you have done evil, or commending when you have done well. If you are faithful to its teachings, it will lead you to eternal happiness; but if you despise its admonitions, you cannot fail but endanger that hope of salvation which it so freely offers. You may accept it as the experience of the writer, who is also young, and who desires to be one with you in the effort to tread the narrow path whereof he speaks, that there is a reward and a happiness in endeavoring to do right, far transcending the enjoyments that worldly pleasures can give.

Selected.

Testimonies to the Way to Salvation.

As Adam lost the dominion, the peace and the blessing of God, going from God into transgression; so must all that ever enter the kingdom again (which is righteousness, peace and joy in the Holy Spirit), come to the Light which Christ Jesus hath enlightened them without (which shows them sin), and believe in it and obey it, to be led out of transgression by it, up to God again.—*W. Bailly's Works*, p. 88.

You cannot repent when you will or in your own appointed time, but when the inward Light of God stirred, with discoveries and reproofs of the evil ways, words and actions, which by you are brought forth; that is the time, when He calleth, to turn at his reproofs.—*Id.* p. 139.

Therefore beware and turn your minds to the Grace of God, which hath appeared unto you and to all people, which shows you the evil of your ways, and secretly reproves you for the same; and this is sufficient to save you, and keep you from the evil, and to give you an entrance into his everlasting kingdom, where no unclean thing or worker of iniquity can enter; for it will lead you and preserve you out of all iniquity and vanity, pride and enmity (the ground of the curse and condemnation), as you give diligent heed unto it and obey it; and it will teach you to live soberly, tenderly, righteously and godly in this present evil world.—*W. Bailly's Address to Young People*, p. 528.

It having pleased the Lord, whose I am, and whom I serve, to call me by his Grace, even in my tender years, by which Grace He put me upon early seekings after himself, that so I might know Him the only true God, and Jesus Christ whom He hath sent, whom savingly to know is life eternal; many

sore and weary steps hath my anxious soul trod, in finding out the path that leadeth thereunto, that so I might come to a certain knowledge of what God is, and how He ought to be worshipped. And this made me go about from one watchman of the night to another, inquiring after my soul's beloved, to hear if they could tell where his dwelling was, and where He maketh his flocks to lie down in rest.

But O! the uncertain sound which they gave; some said, "Lo, here," and others said, "Lo, there is He whom thy soul desireth;" but alas! when I went out to seek Him there, I could neither see his shape nor hear his voice. Then used I to retire into my chamber to supplicate Him in secret, whose presence I could not meet with in those public assemblies; but yet still I looked for that at a distance, viz. the appearance of the Son of God, which was to have been had near at hand; sometimes searching over the records of Scripture, if there I could find Him substantially, whom my soul greatly desired to see: but then I found Him not, although I daily read the reports which his ancient primitive servants have left there upon record, concerning how they witnessed Him, by virtue of the effectual working of his mighty power in them. But what was this to me, whilst I knew Him not myself experimentally working down sin and iniquity in me, and removing that that did let, and would let, till it was taken out of the way, that so his own righteous sceptre might bear rule over me?

And thus as I sought Him sorrowing, in an acceptable time was He pleased to appear unto me, magnified by his name for ever, and to cast up a living way to me, though much contrary to the way I walked in formerly, yet by his good Spirit He so instructed me, that I certainly knew this to be the way that leadeth to everlasting life.

And now I say, this was the grace by which I was called, and by which I am in measure saved, even that grace of which the apostle speaks.—"The Grace of God that bringeth salvation hath appeared to all men, teaching us that denying ungodliness and worldly lusts, we should live soberly, righteously and godly in this present world; looking for that blessed hope and glorious appearing of the great God and our Saviour, Jesus Christ, who gave himself for us, that He might redeem us from all iniquity, and purify unto himself a peculiar people, zealous of good works."

And now [I am] taught by this grace, which is the only principle by which every one may learn to know God savingly, which principle God hath raised up in me to publish and declare to others, where they should look for the appearance of this saving arm and grace of God, which alone can burst the bonds of death, and set the soul at liberty.—*Elizabeth Bakstr.*

I see by the light of this spiritual pillar of fire, that though the sea, with the waves thereof, roar, yet is there a way for the ransomed of the Lord to pass over; and this way is Christ, the Light, the Lamb, the Grace, the Gift of God, given by the Father to bring out of the fall, which all mankind are in by nature, that whosoever believeth in Him, layeth hold on Him, and continueth to be led by Him, should be brought into fellowship with himself, and abide therein forever.—*Id.* p. 163.

"This life is a passage, not a port."

For "The Friend"

The following extract appears to be more in accordance with Friends' views, than some of the noted revival preachers who hold up the idea that a state of acceptance may be instantaneously attained, and that new converts should commence teaching others with little or no previous preparation.

"Extract from Hannah More's Practical Piety."—If we do not strenuously labor for our own illumination, how shall we presume to enlighten others? It is a dangerous presumption to busy ourselves in improving others, before we have diligently sought our own improvement. Yet it is a vanity not uncommon that the first feelings, be they true or false, which resemble devotion, the first faint ray of knowledge which has imperfectly dawned, excites in certain raw minds an eager impatience to communicate to others what they themselves have not yet attained. Hence the novel swarms of un instructed instructors, of teachers who have no time to learn. The act previous to imparting knowledge should seem to be that of acquiring it. Nothing would so effectually check an irregular, and improve a temperate zeal, as the personal discipline, the self-acquaintance, which we have so repeatedly recommended."

Modern Extravagance.—In the face of the terrible distress so widely spread which has come upon us, is it quite useless to appeal to the English as a nation to repent of and amend the shameful extravagance which has been growing upon us now for many years, which threatens to rival, if indeed it does not already do so, the shameless luxury which has been the ruin of one nation after another from Babylon downwards? It is not confined to one class, but pervades all, creeping in often under the euphonious name of "aestheticism," and the specious pretence of encouraging "art," till between them they confuse and at last destroy all idea of right and wrong, whether in religion or morals. Each class as to its houses, equipages, dress and table, is living beyond its means. Who can say how far the desire to provide for these fictitious and dangerous "wants" may have led to the gigantic frauds now unhappily so common? Is it quite useless to entreat English people to study their Bibles, not for the purpose of criticism leading to a sad amount of sophistry, destructive alike to morals and religion, but for the purpose of earnestly and seriously laying their precepts to heart and reforming their lives? The sum that forty years ago was deemed amply sufficient as pin money for a nobleman's wife with £30,000 or £10,000 a year, is now often considered insufficient for a woman whose husband has not a tenth part of that income, and so on in proportion. About ten years ago it appeared in the bankruptcy case of a grocer in Chelsea, that having an income of £300 a year, he allowed his wife £100 a year for her dress, but that she had been spending at the rate of nearly £200, and when indignation was expressed at this, his counsel assured the court that the proportion was considered not at all unusual. But there is another form of extravagant expenditure of money which dares to assume the garb of religion. How can any one persuade themselves that while there is one soul to rescue, one body to relieve, one part of the earth in which to spread the Gospel, that that God who has said, "I will have mercy and

not sacrifice;" that Saviour who has said, "Forasmuch as ye did it unto one of these little ones, ye did it unto Me," will look on in anything but anger at the hundreds of thousands wasted on two or three churches when hundreds of churches and thousands of missionaries and schools are wanted? And what shall we say of the immense amount of money squandered on church decorations, on the "man millinery" of those men who ape an apostate Church, and of all the other ways in which they make away with money? Conceive St. Peter and St. Paul coming to witness such things! Would they recognize in them the religion they were sent to preach?—*Selected.*

Faithful Testimony against War.

During the war of the American revolution, a young man named Moses Sleeper, who resided in Maine, was ordered to join a militia company on a certain day. He believed that war was wrong, and on this account refused to obey the order. For so doing, he says, "I was taken by an officer and file of men to Fort Halifax, eighteen miles up the river, and there shut up in a loathsome fish room in an old blockhouse, with a bunch of straw thrown on the floor to sleep on, the room being entirely dark, except what light shone through a chink of the door and window shutters. After laying there a few days, I was taken to the headquarters in that section; here a court-martial was called, consisting of six or seven officers, and I was examined. At the end of the trial, I was delivered to the care of a sentinel, who placed me a few rods under the side of a barn, within a few paces of the skirt of a wood. The court were not long in making up their judgment—when they went to the commander's quarters for him to approve the sentence. Soon after, I being under the care of the same sentinel, and in view of every part of the encampment, one of the captains came up to me, and the following interview took place, aside from the sentinel.

"Captain.—Moses, I can inform you that the court have made up their minds upon the several charges exhibited against you; and though it is against martial rules for a court to divulge their verdict until it is declared publicly, yet I can inform you, that they have found you guilty of several crimes; such as non-compliance with orders, absenting your self at roll-call, which is termed desertion, and for which they have pronounced sentence of punishment; and I have been soliciting the commander to have the punishment taken off, knowing it is in his power so to do, but can not prevail; but if you will take my advice you may evade punishment."

"Prisoner.—Captain, thou tellest me that I am to receive a punishment, and that thou canst not me in a way to evade it. Thou wilt be so good as to point out a way by which I can escape a punishment, though justifiable by martial law, yet unjust in the sight of God; if I can with peace of mind, I will naturally accept thy proposal."

"Captain.—The way I propose is this; the wood you see is but a few paces off, do you step out into those woods, which are very thick, continue there secreted until dark; you may then retire to the barn, if you please, till to-morrow morning, then your time is out and they cannot touch you." (It was then about three o'clock, p. m.)

"Prisoner.—It is with feelings of gratitude,

that I have noticed thy kindness me during my confinement, and more especially in these thy efforts to get me released from punishment to be inflicted by martial law; but how am I to get to these woods?"

"Captain.—I will call off the sentinel."

"Prisoner.—Thou canst not do that without thyself becoming responsible!"

"Captain.—Moses, if you will consult your own safety, you will take my advice. I will call off the sentinel and risk the consequence."

"Prisoner.—Captain, I thank thee heartily for thy kindness to me in this affair, but cannot with clearness accept thy proposal (Upon which he shook his head, turned about went direct to the colonel's quarters, and in about twenty minutes came back to again.)"

In the second interview, Moses told the captain, "It is from the pure conviction that war and bloodshed are contrary to the Gospel dispensation, that I have thus far encountered thy privations and sufferings attendant through my present state of confinement. But through the mercy and goodness of Him who hath called me thus to suffer, I have been preserve in an unshaken faith, that the cause for which I had contended was his: that the testimonial for which I suffer are testimonies of Jesus. And now, captain, thou proposest making me escape easy; but only consider for a moment my so escaping would by the public be considered desertion, and fleeing from justice and though I am not a member of the Society of Friends, yet I am one with them in profession, and by my acquaintances am considered as one of their number, that in so escaping I should bring disgrace upon that body, a stigma upon my relations, and everlasting infamy on myself—I should act that for which I should never expect to be forgiven. But as I have now acted my part conformably to the dictates of conscience and the law of my God, my mind is perfectly tranquil therefore as I have not the least doubt of the purity of thy motives, yet let the sentence of the court be what it may, whether the severest punishment, or even death, I most cheerfully submit, not without a hope and belief that thou, my dear captain, wilt have thy reward for thy kind interference."

"With a tear of regret he again turned from me, saying, 'Moses, you wound me to the heart—farewell.' He went directly to the commander's quarters, and in less than an hour after, the drums beat, the regiment formed a semi-circle on the green, and the sentinel was ordered to bring me into the circle—when one of the clerks read the doings of the court, with the sentence to receive forty-five lashes on the naked back. And after a pause, read—'and the above punishment is taken off, and the said Moses Sleeper is therefore discharged.'"

I have, since the above transaction, been informed that when the president of the court-martial presented their verdict to the commander, he confirmed the sentence, refused to grant a pardon, and ordered the adjutant (then present) to see that the punishment was inflicted; but that the adjutant utterly refused, telling the commander it was his opinion the young man acted from real scruples of conscience; and rather than be necessary in inflicting a punishment in such a case, he should give up his commission. Upon which the commander and the other officers present formed the plan of sending the captain to use

influence to get me to absent myself, and prevailing, the commander thought best take the punishment of as related.

Training Imbeciles.—Shortly after schools the imbecile were commenced in Europe, young man, moved with benevolence, crossed ocean to examine their mode of operation success. Assured of their utility, he returned and commenced a similar institution. Advertised for the most idiotic and helpless child that could be found. Among those brought to him was a little boy of five years of age. He had never spoken or walked, had never chewed any hard substance, or given a look of recognition to a friend. He lay on the floor or a mass of flesh, without even ability to turn himself over. Such was the student brought to this school. The teacher fruitfully made effort after effort to get the highest recognition from his eye, or to prove the slightest intentional act. Unwilling to weaver to yield, at the hour of noon he had a little boy brought to his room, and he laid him beside him every day for half an hour, hoping that some favorable indication might occur. To improve the time of his rest, he read aloud from some author. One day, at the end of six months, he was unusually weary, and did not read. He soon discovered that the child was uneasy, and was trying to move itself a little, as if to turn towards him. The thought flashed upon his mind: it misses the sound of my voice. He turned himself closely to it, brought his mouth near the child's head, and after repeated efforts the little fellow succeeded in placing his finger on the teacher's nose, as if to say, Make that sound again. The teacher said, that moment he felt he had the control of that boy. He gained his attention, and by careful manipulation of his muscles, succeeded in teaching him to walk, and then to read, and when I saw him at the end of ten years he stood on a platform, read correctly, recited the names of the Presidents of the United States, and answered accurately a number of questions on our national history. I looked with astonishment, and said to myself, Was there ever such patience and such devotion? and how strong should be the love of that little boy for his teacher? I said, Was there ever an instance of one stooping so low, and waiting so long? Then I said, Yes, there was one instance—The Son of God came down from heaven, infused into me of his own life, and waited for nearly twenty years before I reached my finger to his lips and said, "Speak, Lord, for thy servant heareth."—*Bishop Simpson.*

Self-Control.—We know of a man who bought, at a low price, a blood horse, because the animal was so much in the habit of balking as to be useless. The buyer was noted for his great firmness and self-control, qualities, whose temper the horse severely tried, as he was driven to the farm, some twenty-five miles distant. Horse and man were twenty-four hours travelling those twenty-five miles, but not a word of anger, not a stroke of the whip, did the horse receive. Hundreds of times he balked, and was met with a patient firmness, which at last, conquered. The horse never balked after that memorable drive. The man did not take a liberty, but he captured a horse by ruling his own spirit.—*People's Comrade.*

CALL ME NOT DEAD.

He who dies at Azim sends
This to comfort all his friends.

Faithful friend, it lies, I know,
Pale and white, and cold as snow;
And ye say, "O Abdallah's dead!"—
Weeping at the feet and head.
I can see your falling tears;
I can see your sighs and prayers;
Yet I smile and whisper this:
I am not the thing you miss!
Cease your tears and let it lie;
It was mine, it is not I.

Sweet friends, what the women leave
For the last sleep of the grave
Is a but which I am quitting,
Is a garment not more fitting;
Is a cage from which, at last
Like a bird my soul has passed.
Love the inmate, not the room;
The wearer, not the garb—the plume
Of the eagle, not the bars
That kept him from the splendid stars.

Loving friends, Oh rise and dry
Straightaway every weeping eye:
What ye lift upon the bier
Is not worth a single tear.
'Tis an empty sea-shell—one
Out of which the pearl is gone.
The shell is broken, it lies there;
The pearl, the all, the soul is here.
'Tis an earthen jar whose lid
Allah sealed, the while it hid
The treasure of his treasury—
A mind that loved him, let it lie,
Let the shards be earth once more,
Since the gold is in his store.

Allah glorios! Allah good!
Now thy world is understood—
Now the long, long wonder ends;
Yet we weep, my foolish friends,
While the man whom you call dead
In unbroken bliss instead
Lives and loves you—lost, 'tis true,
In the light that shines for you;
But in the light you cannot see,
In undisturbed felicity—
In a perfect paradise,
And a life that never dies.

Farewell, friends, yet not farewell,
Where I go, you too shall dwell,
I am gone before your face—
A moment's worth, a little space,
When you come where I have slept,
Ye will wonder why ye wept;
Ye will know, by true love taught,
That there is all and there is naught.

He who died at Azim gave
This to those who made his grave.

—From the Persian.

THE CHRISTIAN LIFE.

Life to the Christian is no bed of roses,
Where mid the perfume he may sit and sing;
But for each hour until probation closes,
Living for Jesus is a serious thing.

Filled with high aims, with prayer, with toilsome labor,
Fresh duties to us every day do bring;
To God, to self, to every one "our neighbor,"
Making our life an earnest, serious thing.
Onward and upward, ever heavenward pressing,
Yet ever tireless as an angel's wing,
Trusting, believing, doing, blest and blessing,
Thus is our life on earth a serious thing.

Help us, O Lord! assisted by thy Spirit,
Offerings accepted every hour to bring;
And when life ends receive us to inherit
Life that is endless, there thy praise to sing.

To do the thing that the Lord would have
us do, and to do it in the way the Lord would
have us do it, may involve much patient
waiting and diligence.

Selected.

The "Merry Purim."—There is something very impressive, even from an antiquarian point of view, in the festivities and almsgiving of the Jews in their annual feast of Purim. Over two thousand years ago Mordecai, a Jew of independent bearing, incurred the enmity of Haman, who occupied a seat "above all the princes" that were with King Abasuerus, and the latter was induced by him to condemn all the Jews in his dominions to death; but through the bravery of Esther the massacre was prevented, and Haman and his sons met the fate which his arrogance had led him to plan for the Jews. Of Mordecai, now in the king's favor, this simple record has come down: "And Mordecai wrote these things, and sent letters unto all the Jews that were in all the provinces of the King Abasuerus, both nigh and far, to establish this among them, that they should keep the fourteenth day of the month Adar, and the fifteenth of the same, yearly, as the days wherein the Jews rested from their enemies, and the month which was turned unto them from sorrow to joy, and from mourning unto a good day; that they should make them days of feasting and joy, and of sending portions one to another, and gifts to the poor."

This injunction has been carried out to the letter. By Israelites the world over these two days are observed as faithfully as their religious days. One side of the Purim observance has fallen into disfavor. It was at first customary, during the reading of the Book of Esther on the eve of the fourteenth (that is, the night before the fourteenth), to hiss and make other audible demonstrations of hate, whenever the name of Haman was pronounced. The services in this regard are now more peacefully conducted in many synagogues; but the dramatic entertainments and feasts, and giving of presents, are remembered now as of old.

The Jewish Messenger, in speaking of the spirit with which "Merry Purim" is now celebrated, says that it is the most popular festival among the Jews, "because it has no ceremonies save charity, no litany but benevolence."—*The Examiner and Chronicle.*

Natural History, Science, &c.

The Cicadas of Labuan.—Certainly the most remarkable insects for noise are the Cicadas. There are several species in Labuan and Pulo Daat, which make the woods resound. One of the most extraordinary of these singing insects utters a sound by no means unmusical. Just as the sun goes down, a loud, ringing whistle strikes up among the fern, or in some spot near the house, sometimes apparently almost in the verandah, which I can best compare to one smartly rubbing on very sounding musical glass, and keeping up for a long time a very loud and uninterrupted musical note. You may search in vain for the origin of the ringing sound, though it appears to spring from the very spot on which you may be standing, for a quiet approach will not disturb the insect, which, sitting in the mouth of its hole in the ground, whistles its monotonous and loud song, which is probably intensified by reverberation in the cavity. This insect seems to affect the neighborhood of houses, and can only be seen by a patient and, without, fortunate watcher.

But there are two or three species of Cicada which are no whit inferior in noisy powers to

the insect just mentioned (which I have been assured was a locust), though their notes have a different character. One of these makes a simple chirp, chirp, all night long, like our crickets. But there are two others which I will designate respectively the *scissor-grinder* and the *saw-whetler*. I shall never forget the first time of hearing the scissor-grinder in the jungle at Pappan when approaching the island in a boat, the noise being distinctly audible for at least a quarter of an hour before we reached the shore, and when there the resounding whi-r-r—whi-r-r—whi-r-r of the insect awakening the echoes of the forest was truly astonishing. After continuing this deafening sound for some time, it winds up with a protracted whizz-z-z-z, which dies away just like the scissor-grinder's wheel when the treadle stops. Another which I heard at Coalpoint closely resembled the whetting of a saw, but was not so common as the last; and a third always began with a sort of warbling note, like a person blowing in water with a bird-whistle, very long and somewhat melodious wital. These sing all day, even during the hottest hours.—*Collingwood's Nat. Rambles.*

Pure Air.—We are glad to see that a scientific lecturer has reminded people that nature gave them their noses to use, and he advises them to employ this picket guard of the body to see if the air of their bedrooms is right. "When you get up," he says, "leave your bedroom just as it is; go out into the pure morning air and breathe that till your nose is wide awake, then go back and take a few snuffs of your bedroom air; if it smells fresh and sweet, like out-door air, you have good ventilation, and have breathed the breath of life all the night. If, on the contrary, it smells close, musty, 'thick,' sickening, your nose will have told you what your senses ought to have made clear without the test."—*Golden Rule.*

The first Ice to Calcutta.—It is half a century since Tudor, an enterprising merchant of Boston, thought that he might make money if he forwarded a cargo of ice to Calcutta. Before that gentleman undertook the venture, a little natural ice was obtained at a place about forty miles from the capital of Bengal. Shallow troughs were dug in the ground, pans of porous earthenware were placed therein, a layer of straw being interposed between the bottom of the pan and the ground, and a little water was poured into each pan. If the wind blew from the north-west during the night, the water in the pans would be frozen before the morning. This ice fetched a high price in the market. In 1833 there was no longer any necessity for resorting to this process for getting it, as in that year Tudor's first ship sailed up the Hooghly with a cargo of ice on board; the cargo was sold in the market for three-pence per pound. Since that day the export of ice from Boston has become a regular and most profitable branch of trade. In the warehouses there, as many as 300,000 tons of congealed water are stored away at a time. Many thousand persons are engaged in the ice traffic throughout the United States.—*Good Words.*

Fatality of a Saad.—An Egyptian desert snail was received at the British Museum on [31mo] 25, 1846. The animal was not known to be alive, as it had withdrawn into its shell, and the specimen was accordingly ginned, mouth downward, on to a tablet duly labeled and dated, and left to its fate. Instead of

starving, this contented gastropod simply went to sleep in a quiet way, and never woke up again for four years. The tablet was then placed in tepid water and the shell loosened, when the dormant snail suddenly resuscitated himself, and began walking about the basin, and finally sat for his portrait, which may be seen of life-size in Woodward's "Manual of the Mollusca." Now, during those four years the snail had never eaten a mouthful of any food, yet he seemed as well and flourishing at the end of the period as he had been at its beginning.—*Belgravia.*

A new explosive has been discovered which is said to possess far greater explosive power than any other substance hitherto discovered. It consists of nitro-glycerine, gun-cotton, and camphor. The cotton is dissolved in nitro-glycerine, the product being a gelatinous and gummy substance. To this is added a little camphor, the proportions being 96 per cent. of the former (which consists of 90 per cent. of nitro-glycerine and 10 per cent. of fulmi-cotton) and 4 per cent. of the latter. This explosive gelatine is said to be as manageable as ordinary powder, with less danger, and far greater expansive force.

A fragment of the gray substance of the brain, not larger than the head of a very small pin, contains parts of many thousands of commingled globules and fibers. Of ganglion globules alone, according to the estimate of the physiologist Meynert, there cannot be less than 600,000,000 in the convolutions of a human brain. They are, indeed, in such infinite numbers, that possibly only a small portion of the globules provided are ever turned to account in even the most energetic brains.

If you have jugs, kegs or cans that have become stale or mouldy in the inside, wash them out clean, and fill up with warm water; drop in a little carbolic acid, and let it stand a few hours: empty the water and rinse thoroughly, and it will be as sweet as if it had never been tainted.—*Country Gentleman.*

Retribution.—The *Christian Statesman* of this city states, that when Mayor Stockley of this city arrested a man sometime ago for opening a low variety theatre on First-day night, on the pretence of a necessary dress rehearsal, one of the witnesses against the criminal was a leading politician who, in great distress, stated that his only son, a lad of sixteen, had been debauched through the influence of this theatre, and in consequence had become a drunkard, vicious and dissolute in every way. The Mayor heard him in silence and replied: "I am sorry for your son, but I have small sympathy for you. Five years ago I introduced into our Legislature a bill to abolish these places. It passed the S-nate and was defeated in the House by your single interposition."

These facts have been stated in the papers, and now a lady of this city, devoted to the temperance cause, has called on the Mayor and been informed that the statement as we give it above, is strictly correct.

A farmer in New England has sixteen harvests of grain and hay rotting in the stacks. At the breaking out of the war he held his crop for higher prices, and with each year and additional advances he waited for more, until at last the current set in the other way, which disgusted him so that he refused to sell, and, continuing to stack and stack, he has now on hands \$20,000 worth of produce. His

neighbors say he is crazy, which is probably true, but how much wiser are those who have gifts which might be of use in society, as the church fail to employ them. A talent in a napkin is of no more use than grain stacked up to rot. Or how much wiser is the man who does nothing but add each year to a pile of silver or gold or bonds, which in his hands are of no value to society during his life, and perhaps are the ruin of his family after he is gone.—*Nat. Farmer.*

THE FRIEND.

FOURTH MONTH 26, 1879.

PHILADELPHIA YEARLY MEETING.

The near approach of the Yearly Meeting brings with it much labor as well as solitude, to those who are actively engaged in the service of the Society. In the week preceding it, are convened the Meeting for Sufferings, the Indian Committee, the Committee having charge of Westtown Boarding School and the Yearly Meeting of Ministers and Elders. In addition to these, there are frequently held during the same period, meetings of other important committees or boards of trustees. Many friends feel that it is a light matter properly to discharge the various duties connected with these several concerns and that for the right performance of them they must look for help to the Source of a spiritual good, and seek to have their minds clothed with a measure of his Holy Spirit, so that their labors may tend to the promotion of his blessed cause in the earth.

The principal subject claiming attention at the Meeting for Sufferings,—which met on Sixth-day, 18th inst.,—was the examination of some extracts from the minutes of the Yearly Meeting issued at various times in the past twenty years, and which it was designed to introduce into the Book of Advices. The latest edition of that valuable compendium of the concerns of the Yearly Meeting for its members, was issued in 1859, and as no more copies remained for distribution, it was thought best to issue a new edition, and to introduce a few additional paragraphs. In some cases, there were similar in substance to those of older date; and their introduction at this time was thought desirable, to show that the Yearly Meeting of Philadelphia still adheres to the principles and testimonies which our Society in by-gone years so zealously maintained. There were other paragraphs designed to point members on their guard against practices and tendencies which have arisen in later times, and against which there had been no occasion to issue a warning in former years. In this class, was the minute adopted in 1877, cautioning our members not to use floral decorations on the occasions of burial. The proposed additions were sanctioned.

In the Yearly Meeting of Ministers and Elders on Seventh day; there were present some visitors from a distance, who mentioned that they were liberated by their friends at home for religious service; but they did not present their minutes to the meeting, knowing that it had not been the practice to read such credentials therein of latter time.

During the course of the meeting, one of our Friends, after alluding to those who were prevented from attending by sickness, ad-

ose absence was sensibly felt, and referring the uncertainty of his own attendance on such occasion in the future, bore a full testimony to the truth of those doctrines which were proclaimed to the world by George Fox and our early Friends, and which Wiln Penn declared to be Primitive Christianity revived; and he expressed his conviction, that if the Society of Friends ever detected them, it would dwindle.

The Yearly Meeting itself opened on Sunday, the 21st inst. A few words of caution and affectionate counsel were followed a season of deep silence, which was refreshing to many. The first business entered upon after the opening of the meeting, was the reading of the minutes of the Meeting for Sufferings, showing their labors for the past year.

Among the more important of these, was a concern growing out of a proposition to transfer the care of the Indians to the War Department. This resulted in the preparation of a memorial to Congress, strongly protesting against such transfer; pointing out the demoralizing effects which uniformly attend the contact of military forces with the natives; owing the inconsistency of the proposed measure with the natural rights of the Indians as men; bringing to view those moral and religious considerations which ought to lead to a just and benevolent treatment of these wards of the nation; and referring to the solemn truth, that national crimes, as well as those of individuals, meet with retribution from the Ruler of the Universe, in whose hands we are powerless. This memorial had been placed before Congress, through a Committee, who had obtained personal interviews with several of the officers of the Government, and labored to promote the cause trusted to them. Information was given, at Congress had adjourned without making any change memorialized against.

A concern on the subject of intemperance, alluded to the preparation of separate memorials to each of the Legislatures of Pennsylvania, New Jersey and Delaware, which had been presented to those bodies by Committees of the Meeting for Sufferings. These memorials refer in strong terms to the evils resulting from the use of intoxicating liquors as a sink, and bring to view the re-ponsibility resting upon legislators for the use of their power in such a manner as to repress crime and promote the good of the community.

The meeting had been brought under exercise for the promotion of vital religion in our own Yearly Meeting, and elsewhere in the society of Friends; but no definite action had been taken thereon.

The Address on Education, which was read in the Yearly Meeting one year ago, had been revised and printed for circulation. Appropriations had been made out of the Charleston Fund, to assist in repairing a meeting house at Mount Holly, New Jersey, and one at Toledo, Kansas, and in building a house at Stillwater, Ohio, and Deep River, North Carolina. The fund thus made use of the accumulated product of a small rental received from a portion of the meeting-house property in Charleston, South Carolina, which is been carefully husbanded and kept at interest for a long series of years by the trustees of the property. The original property itself still remains under the control of the trustees; and the meeting house on it, which

was burnt down, can be replaced at any time, when occasion requires.

The books and papers belonging to the Meeting for Sufferings had been carefully arranged by a committee. This laborious work had required the handling of the accumulated documents from the first institution of that body. These had been placed in order of date; those for each year being put between boards, properly labelled, and the whole enclosed in a series of pasteboard boxes for preservation. An index of all the papers had been made, so that any of them that might be required for examination could easily be found.

The Trustees of the Pemberton Fund had made a report of their receipts and expenditures for ten years past, showing an average surplus of expenditure during that period of about \$100 per annum, and indicating the need of a slight curtailment on the part of those who have charge of distributing it. This fund, as many of our readers are aware, is principally used in paying the travelling expenses of persons attending the Yearly and Quarterly Meetings of Philadelphia, and of committees of the Meeting for Sufferings or of either of those bodies.

The Report of the Book Committee showed, as heretofore, a wide distribution of the approved writings of Friends in various localities. Many of these, it was stated, had been sent to individuals who were desirous of circulating them in parts of our Society where the doctrines of Friends had been latterly misrepresented or departed from.

The proceedings of the Meeting for Sufferings were fully approved.

An extract from the will of Ruth Anna Cope, was read, containing a bequest from this dear friend of \$5,000, to be used in publishing and distributing the writings of Friends. It was accepted and placed at the disposal of the Meeting for Sufferings, to be used as indicated by the will.

A committee of two Friends from each Quarterly Meeting was appointed, to examine the Treasurer's account, and report the amount proper to be raised for the use of the meeting.

The Report of the Westown Committee was considered to be a favorable and satisfactory one; and the two propositions contained therein were adopted, viz: one to reduce the charge for board and tuition to \$75 per session, to commence with the next winter term; and the other to reduce the annual appropriation of the Yearly Meeting to the school from \$3,000 to \$2,000. It being the usual time for making a new appointment, some Friends were set apart to nominate Friends to serve as a committee for the next three years.

We propose to finish our report of the proceedings of the Yearly Meeting in the next number of our journal.

We have recently received two communications from distant Friends, residing widely remote from each other, each of whom appears to be concerned that the Society of Friends should maintain its ancient testimony to the Divinity of our Lord and Saviour Jesus Christ, and to the benefits derived from His atoning sacrifice on the Cross; as well as to the necessity of all who would obtain salvation knowing Him by his Holy Spirit to purge their hearts by His baptism, which was de-

clared to be with the Holy Ghost and with fire.

In this concern we cordially unite.

Attention has often been called to the tendency in the human mind to run into one extreme whilst endeavoring to avoid the opposite. In view of this, it need not be a surprise, if the superficial teachings of those, who say that nothing more is needed for salvation than simple belief in what Christ did for us in the prepared body, should gradually lead others equally superficial, to undervalue His sufferings and death, and consider them as of little importance beyond furnishing an example of faithful devotion to the cause of truth and righteousness. We sincerely desire that Friends everywhere may be on their guard against this tendency; and may adhere to the plain declarations of Scripture, and to the doctrines repeatedly put forth to the world by the early members of our Society, who declared in unequivocal language their faith in Christ, both in His outward and in His inward appearance. John Banks, who was one of those worthies of a former age, says on behalf of the Society: "We as truly believe in that same Christ, who laid down his body, and took it up again, as in his Light within; and we have benefit to salvation, by the one as well as the other; and of both, they being one."

One of the communications above referred to, has appeared in our columns, the other is from a Friend in Iowa, who after referring to his own faith in the Divinity of Christ, and in His Light revealed in the heart, suggests the republication of a letter of Isaac Pennington treating on these subjects, as expressing his views in better language than he could himself use. The letter is of considerable length, and it may be sufficient, therefore, to extract from it a few paragraphs, which show the soundness of the faith, and the spiritual views held by the writer, in common with other Friends of that day.

"Christ is made unto us righteousness, by faith in his blood, and by faith in his Spirit; and he that doth not believe in his Spirit, and receives not instruction and help from his Spirit to believe, cannot believe aright in his blood. All that is of Christ is righteous; all that is of Christ, the righteous and holy root, is righteous and holy, wherever it is found. And, by Christ, that which is truly holy and righteous is brought up in us, and we are forgiven and washed from our sins and iniquities for his name's sake. And the receiving of the pardon of sins is precious, and the bringing forth in the new life is precious also."

"That charge of thine on us, that we deny the person of Christ, and make Him nothing but a light or notion, a principle in the heart of man, is very unjust and untrue; for we own that appearance of Him in his body of flesh, his sufferings and death, and his sitting at the Father's right hand in glory; but then, we affirm, that there is no true knowledge of Him, or union with Him, but in the seed or principle of his Light in the heart; and that therein He appears, subdues sin and reigns over it, in those that understand and submit to the teaching and government of his Spirit."

"Oh! pure, spotless Lamb of God, how precious was thy sacrifice in the eye of the Father! How acceptable a ransom for all mankind! For, in the free, full, and universal love of the Father, 'He tasted death for every man.'"

Since the issue of our last number, Dr. Charles Evans, who for many years had been connected with the editorship of this Journal, closed his useful life.

His health had long been very frail, and on the night of Third-day last, (the 15th inst.), he was taken alarmingly ill, and after a sickness of about five days, was removed from this scene of existence, on the night of the 20th.

He was a man of much intellectual ability, and very decided judgment, whose conclusions were often expressed with great clearness and force. Sincerely attached to the principles of the Society of Friends, the doctrines in which he had been educated, became his by conviction; and he was zealously concerned to uphold them both by pen and tongue—often in our meetings for discipline bearing testimony to them with much power, and exhorting his fellow-members to a life and conversation consistent therewith.

He edited the Journal of his beloved brother, William Evans; and subsequently prepared a History of the Society of Friends from its rise to the close of the Seventeenth Century—a work of great merit, and requiring much research. It is valuable, not only for its clear statement of the events connected with that period, but also for the insight it gives into the doctrines held by those worthies of whom it speaks.

Among his later publications, was a defence of the Society of Friends against the surmises of the late Robert Barclay, who had imbibed the idea that George Fox derived his religious opinions from the members of the sects with whom he came into contact. This is an able and convincing tract.

As the end of time to him drew near, he was very sensible of the frail tenure by which he held possession of this life, and occasionally referred to it, with expressions of his desire to accomplish all that his Divine Master might appoint for him to do; and near the close, he remarked in allusion to his own feelings, "I have nothing to trust to, but the mercy of God in Christ Jesus." Thus, with loins girt and his light burning, we believe he was ready when the summons came, to enter into one of those heavenly mansions prepared for the redeemed of the Lord.

He was in the seventy-seventh year of his age.

SUMMARY OF EVENTS.

UNITED STATES.—Every alternate life saving station on the New Jersey coast was closed on the 15th inst. The same will be closed on the 1st of next month.

The General Superintendent of the Railway Postal Service, after having dismissed 150 of the employees in that service, and reduced the compensation of the remainder since the beginning of Twelfth month last, now finds it necessary to again reduce their pay, so as to keep within the congressional appropriation. The salary of many of the route clerks has been reduced one year.

After a brief lull, the immigration of colored people from the South has again begun. More than 6000 have thus far arrived at St. Louis, only 2000 of whom were able to pay their way to Kansas. Those who have already reached their destination are reported in a suffering condition.

An explosion of sulphur occurred in a mine in Schuylkill county on the 17th, from which the coal caught fire, and was still burning at dark of some evening. One man was fatally, and several others seriously injured.

A violent rain storm prevailed in the Carolinas on the night of the 16th. In the lower portion of South Carolina it began with a tornado which caused great destruction of life and property. In the village of Waverly more than one hundred dwellings were demolished, leaving the inhabitants homeless. Fifteen persons were killed and a number injured.

The negotiations between Secretary Schurz and chief Moss have been completed, and a large reservation in the northern portion of Washington Territory has been set aside by the President for that chief and his people, with such other Indians as may affiliate with them.

Two "tidal waves" occurred in the harbor at Gloucester, Mass., on the 18th inst., one at 12.30 P. M., the second at 3.30 P. M. The water rose 2½ feet above the wharves, sweeping vessels at anchor against the wind, and floating off vessels that were grounded.

Snow and sleet fell on the 18th inst. in parts of Pennsylvania, New York and New England. At Honduras, Carabonde, and other points in this State, six to ten inches of snow fell.

The east bound freight business from Chicago during the past few days is reported unusually heavy, all the roads being taxed nearly to their full capacity.

In Congress the Senate is engaged with the army appropriation bill, and the House with the legislative. The House has adopted the Senate bill authorizing the construction or purchase of a refrigerating ship for the disinfection of ships and cargoes.

The Secretary of the Treasury has issued a call for the redemption of \$100,000,000, 10-40 six per cent. bonds, interest to cease three months hence. The entire balance of 4 per cent. bonds has been subscribed for; also \$40,000,000 ten dollar funding certificates. The annual saving of interest by the funding operation is estimated at \$15,000,000.

Markets, &c.—U. S. sizes, 1881, 107; do. 5's, 1881, registered, 104; coupon, 105; 1/4 per cent, 106; 1/2 per cent, 107.

Cotton.—Sales of middlings at 12 a 12½ cts. per pound for grade and New Orleans.

Petroleum.—Crude 83 cts. per barrel, and standard white, 93 cts. for export, and 9½ cts. per gallon for home use.

Flour.—Extra family, \$4.50 a \$4.75; fancy, \$5.20 a \$5.25; patent, \$7.25 a \$7.50. Rye flour, \$2.75 a \$2.85. Corn meal, \$2.45 a \$2.50.

Grains.—Wheat, red, \$1.13; a \$1.16; amber, \$1.14 a \$1.15; white, \$1.14. Corn, 43 a 43 cts. Oats, 34 a 35 cts. for mixed, and 33 a 34 cts. for white.

Seeds.—Clover, 4½ a 6 cts. per pound; Flax-seed, \$1.42 per bushel; Timothy, \$1.40 a \$1.50 per bushel.

Fresh Fruits.—Apples, Baldwins, \$2.50 a \$2.75; Greenings, \$3; Rox Russets, \$2.50 a \$2.60 per barrel. Cranberries, \$7.50 a \$9 per box, \$2.50 a \$2.75 per crate. Strawberries, \$1 a 25 cts. per quart.

FOREIGN.—A dispatch from New Castle states that a number of the striking miners, who are possessed of a little means, appear determined to quit the Durham Collieries. The main tide of emigration seems to be toward the mining districts of the United States.

Additional conflicts between the British and Zulus, in South Africa, are reported, attended with considerable loss of life on both sides, but no very decisive results. A force of 6,000 men, with provision, &c., are on march for the relief of Col. Pearson's command at Ekowe. A large number of his men are said to be sick, and his provision nearly exhausted.

A Berlin dispatch states that General Zroff, the Prefect of St. Petersburg, has resigned, because of threats to assassinate him. Martial law has been proclaimed at Odessa, as a precaution against expected outbreaks.

In consequence of the revolutionary feeling manifested in Russia, a ukase has been published ordering the appointment of Governors-General for six of the most populous districts, with special despotic powers.

Another flood is reported in Austria-Hungary. The rivers Maros and Karos have again broken their dams, destroying one town and endangering others. Some hundreds of square miles of fields are again submerged.

An explosion of fire-bellamy has occurred in the Agency coal pit near Mass, Belgium, from which the wood work of the shaft caught fire. At that time there were 240 men at work in the mine, and there appeared but little hope of rescuing many of them.

After a long debate in the Dominion House of Commons on the 17th, a motion was carried for the appointment of a select committee to consider the question of Chinese immigration. It is reported that there were 6,000 Chinese in British Columbia, in a total population of 25,000, exclusive of Indians.

WESTOWN BOARDING SCHOOL.

A NURSE is wanted for the Boys' Department, to enter on her duties at the beginning of the Summer session.

Anna V. Edge, Downingtown, Chester Co., Pa.
Susanna F. Sharpless, Street Road, " "
Deborah Rhoads, Haddonfield, New Jersey.
Elizabeth R. Evans, 322 Union St., Philada.

WESTOWN BOARDING SCHOOL.

THE SUMMER SESSION of the School will commence on Second-day the 1st of Fifth month.

Pupils who have been regularly entered and will go by the cars from Philadelphia, can obtain tickets at the depot of the West Chester and Philadelphia Railroad at the corner of Thirty-first and Chestnut streets, by giving their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. In such cases the passage, including the stage fare from the East Station, will be charged at the School, to be paid with the other incidental charges at the close of the term. Tickets can also be obtained of the Treasurer, Arch street. Conveyances will be at the STREET ROAD STATION on Second and Third-days, the 5th and 6th of the month, for the purpose. In such cases Philadelphia at 7.45 and 10 A. M., 12.30 and 2.30 P. M.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at another place, it must be put under the care of H. Alexander & Son, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who have not had their baggage paid sent for to any place in the built-up part of the City, by sending word on the day previous (through post-office or otherwise) to H. Alexander & Son, No. corner of 18th and Market Sts. Their charge in such a case for taking baggage to Thirty-first and Chestnut streets will be 25 cents per trunk. For the same charge they will also receive their baggage from the other railroads, if the checks are left at their office corner of 18th and Market Sts. Baggage put under their care, if properly marked, will not require any attention from owners, either at the West Philadelphia depot, or the Street Road Station, but will be forwarded direct to the school. It may not always go on the same train as the owner, but it will go on the same day, provided notice to H. Alexander & Son reaches them in time.

DURING THE SESSION, passengers for the School will be met at the Street Road Station, on the arrival of the first train from the City, every day except First-day and small packages for the pupils, if left at Frier Brook Station, No. 304 Arch street, will be forwarded every Sixth-day at 12 o'clock.

Fourth month 22nd, 1879.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Applicants may be made to

John W. Biddle, No. 726 Buttonwood St.
Ephraim Smith, No. 1110 Pine St.
Bessie Evans, No. 322 Union St.
Hannah Evans, No. 322 Union St.

WESTOWN BOARDING SCHOOL.

THE SUMMER SESSION opens on Second-day, the 1st of Fifth month. Parents and others who intend to send pupils, will please make application to BENJAMIN PASSMORE, Sup't., (address, Street Road P. O., Chester Co., Pa.), or to CHARLES J. ALLES, Treasurer, 3 Arch St., Philadelphia.

Early application is requested when convenient.

CORRECTION.—On page 287 of last number "The Friend," 2d column, 21 line, "Appeal on behalf of colored races," should be "Appeal on behalf of the colored races."

JOURNAL OF WILLIAM EVANS.

Joseph and Sarah Pool's Testimony concerning their son Joseph, who died the 25th of 12th mo. 1785, aged 16 years 4 months and 8 days.

Being nearly afflicted with a sense of the great loss we, as well as the church in general were sustained, by the removal of our dear and beloved child, we cannot but consider it our duty thus to pay a tribute of love to his memory, as well as hand down to posterity a true account of his pious life and happy conduct, in order that one more living witness may be added to the many that have gone before, of the sufficiency of the saving grace of God who in the multitude of His tender mercies hath been graciously pleased to fit me for a place in His heavenly kingdom, even in the very morning of his day; so that a heart was inclined to love and reverence its Creator, and by attending to the manifestations of the divine light, which enlighteneth every man that cometh into the world, he became very solid and orderly in his whole deportment among men. It may, comparatively, said grey hairs were upon his head, though young.

He was born at Groustown, Ireland, in the county of Wexford, the seventeenth day of the 8th mo. 1769, and from his very infancy was of an innocent disposition, and not addicted to those foolish plays and pastimes, which the generality of children are prone to, being from his favored early to hear the divine voice to his comfort; as he mentioned in a book journal left behind, and would often speak in so sensible a manner as to excite admiration in those who conversed with him. He was truly obedient unto us; and we can truly say, we never detected him in a lie, being fond of learning, he made a considerable progress in the mathematics and other arts of useful literature, for which he had a natural talent, which did not seem to exhaust him. He was remarkably diligent in reading the Holy Scriptures, and greatly delighted in the company of faithful Friends, and the attendance of religious meetings. About a year and a half before his decease, it pleased the Lord in an eminent manner to visit his soul with a more clear discovery of the day spring coming on high, and to attract him nearer to Himself by the cords of his love, even to wear his affections from all sublunary things, and by the operation of his Holy Spirit, as a refiner's fire, to purgify and purify him thoroughly in body, soul, and spirit, whereby we think

it may with propriety be said, to the praise of the Almighty's goodness, he was made a new creature, even a vessel of honor fitted and prepared to serve his Lord and Master, and to testify unto His saving power, whose service was his soul's delight. During this short period, he was enabled to make an extraordinary progress in the heavenly race, and was at length constrained to declare unto others, what the Lord had done for his soul, by appearing in public testimony in several meetings of Friends, much to their satisfaction and edification. In consequence of this requisition, we think the exercise of his mind cannot be more feelingly expressed than it is by himself in the following words, which were found since his decease in his own writing, dated the 7th of 8th mo. 1785, viz: "Divers perturbations and trials have been the lot of mine inheritance—may the Lord sanctify them to me, so as to render acceptable those things which seem to the taste bitter; qualifying me to labor in His vineyard, to his honor, praise and glory, of which He alone is worthy; not man nor men." He was weighty and fervent in spirit, as well in religious meetings as at other times, his very deportment conveying instruction to others. He seemed careful to wait the motion of life before he would speak either in meetings for worship or discipline, so that it may be truly said, his words were few and savory, tending to administer grace to the hearers. His declarations in public were short, connected, and free from affectation. He was remarkably abstemious in eating and drinking, and seldom using any liquid stronger than milk and water, so that his moderation in all things appeared. He had a near sympathy for the poor, and those in affliction, whom he often visited and would administer to them pertinent counsel and advice. He greatly delighted in retirement, appropriating a part of almost every day for religious contemplation, of the fruit of which solitude, the following ejaculation, found in his own writing, amongst other valuable papers, may serve as a specimen, viz: "How precious is Thy presence, O God!—how sublime are Thy delights! How beautiful is Thy Majesty, excelling that of all outward prizes—placed far above all principalities art Thou! Thou delightest those who humbly seek Thee with refreshing well-springs from Thy divine fountain. Thou hast reserved delightful pleasures for them, O Lord! I have heard Thy voice, which is sweet, and Thy countenance which is comely have I beheld—keep me in an humble, reverent, watchful state, knowing the enmity there is between Thy precious everlasting seed which thou hast sown in our hearts, and that Satan who is an enemy and a destroyer. O Lord, give me power to overcome, that so, when time here shall fail, I may be received into Thy everlasting rest." Thus he journeyed with us, following the Lord in the exercise of the daily cross and self-denial, until it pleased Him, whose ways are all in infinite

wisdom, to call him from works to rewards. He was visited with the small-pox on the 10th of the 12th mo. 1785. After they came out he was sorely afflicted, which he was enabled to bear with great resignation to the divine will: being evidently supported by that animating power, which, in time of health, was his comfort beyond all other enjoyments.

During this dispensation of bodily conflict he uttered many weighty expressions, signifying his confidence in the Lord, and assurance of favor with Him: several of which not being immediately noted, cannot now be exactly remembered; however, the following remain fresh on our memory. The first day of his illness he said to his mother to this effect: "I am very sick, but I have sweet peace, and is not that well?" One morning, about three or four days before his departure, his father going to his bedside, asked him how it was with him? He said he was but poorly as to the outward; his father then enquired how it was with him as to his inward state; after some time of silence he thus expressed himself, "I have not an angry God to look in the face. I have been obedient to all the manifestations He hath been pleased to communicate to me. I know not whether I shall die or not, for if I were to die, I think I should feel more of the incomes of divine love than I do now feel—come life, or come death, I have abundant more satisfaction than if I had been inoculated." Another morning he spoke thus, "I have had a hard night of it, but I have felt so much of the love of God, that it makes amends for all my hardships." One morning being in much pain, he prayed in a melodious manner thus: "O Lord! why am I thus afflicted? seeing thou knowest the integrity of my heart;" and then desired of the Lord that He might grant him a little ease, if it was his will, immediately after which he fell asleep. When he awoke he seemed finely refreshed, and acknowledged the Almighty's goodness in graciously answering his petitions, saying, "I am fine and easy; I know the Lord hath heard my prayer, the Lord hears the prayers of the innocent," another time he said to his mother, he "hoped she would be enabled to say with Job, 'the Lord gave, and the Lord hath taken away, blessed be the name of Lord.'" A few days before his departure, his spirit seemed singularly drawn in sympathy towards several American Friends, who had been lately on a religious visit to this nation, with whom he had contracted an intimate acquaintance, and desired his dear love might be remembered to them, and particularly John Pemberton and George Dillwyn and companions. He zealously cautioned a woman Friend who came to visit him a few days before he died, not to suffer her daughter to dress in the manner she did, signifying that it exposed such to temptations, by laying them open to the world; adding this reason, "for first the eye goes out, then the ear goes out, then the beam

comes down, and after that the house comes down." The morning he departed there were several in the room with him, to whose states he was led to speak in a lively manner, rightly dividing the word amongst them; and the last words he was heard to utter were, "I have tried it, I have proved it, and nothing will do, but what has the Master's stamp upon it." In a few moments after this dropped into a sweet sleep, in which he continued about half an hour, and then finished his course without sigh or groan.

Selected.

On the Resurrection of Jesus Christ.

BY OLIVANTHUS GREGORY.

(Continued from page 297.)

Both the Jewish and the Gentile opposers of Christianity, in the primitive ages, admit that Jesus Christ suffered death by crucifixion, was buried, and that his tomb was found empty on the third day. Either, then, the body must have been taken away, or he rose from the dead. If the body were stolen, it must have been either by the enemies, or by the friends, of Christ: of these alternatives the former cannot be assumed for a moment; and I shall soon show that the latter, though rather more specious, is utterly untenable. The disciples of the Saviour affirm that he rose from the dead, and often appeared to them, as I have already related. They also, immediately after the event, set apart a solemn periodical day, and instituted a ceremony founded upon it, and commemorating it; the returning day, and the significant ceremony, having been observed regularly from that time through all succeeding ages to the present. Thus, with regard to the day, it appears from various passages, to two or three of which I refer you,* that the apostles, very soon after the death of their Lord, set apart the first day of the week, being that on which they affirmed he rose from the dead, as a day of religious worship, of Christian rejoicing on account of that important event; it appears, too, that the Christian converts in general, both at Jerusalem and at other places, united with them in solemnizing this day, and for the reason just specified. Farther, the most ancient writers in the Christian church, after the apostles, agree in assuring us that the observation of the first day of the week prevailed early and constantly.

Now, on the day of Pentecost, when Peter addressed the multitude then collected together, he reasoned principally upon the fact of the resurrection, and affirmed that Jesus, whom they had crucified, was thus raised up in proof that he was "both Lord and Christ." So convincing were his arguments within that short distance of the date assigned to the resurrection, that on this one day three thousand believed, and were baptized, that is, baptized in token of their belief that Jesus died, rose again, and instituted baptism after his resurrection. Here, therefore, in like manner, the reasoning is conclusive.

But, as arguments in favor of this great fact flow from various quarters, let it be farther considered, that, if the account of Christ's resurrection had been false, the imposture must necessarily have been detected. For the advocates of Christianity may argue, and its opponents cannot with any appearance of reason deny,—that the apostles immediately

after the resurrection declared it:—that they made this declaration upon the very spot where the thing was pretended to have occurred:—that they did not disseminate their story covertly; but proclaimed it in the most open and public manner possible:—that they did not begin to circulate their report in some secret and obscure corner; but in one of the most celebrated and public places then existing in the world:—that they made choice of a season in which there was the greatest concourse and resort of all sorts of people thither, that they might gain the greatest number of hearers and of inquirers into the truth of their extraordinary narration:—that the professed adversaries of the Christian doctrine then at Jerusalem had many cogent reasons to stimulate them to exert their utmost efforts to prove it false:—that they had as much time and opportunity as could well be desired to devote to the detection of the imposture, had there been any:—and, that they had likewise power in their hands, by which they were enabled to examine all persons and things that might in any way conduce to throw light upon this remarkable and highly interesting subject.

Under circumstances so favorable to refutation, there can be no doubt that the Jews would have refuted the story of the apostles and disciples of Jesus Christ, had it been in their power: and besides this, the Jews had an additional motive arising from the injury sustained by their moral character, unless they could prove the statements of the Christians to be intentionally and wickedly erroneous. It will be readily granted, I suppose, that, when two parties of men are directly and strongly opposed to each other, if the one asserts and publishes a statement as to matter of fact which is of the highest moment, and absolutely destructive of the interest of the other, and is not so palpably false as to carry with it plain indications of malignity and revenge, or of studied slander and scandal; that then, if the other party, upon whom this charge is made, does not in as solemn and public a manner refute it, or do something in their own vindication, which will, in the opinion of unbiassed and unprejudiced persons, bear some proportion to the attack made upon them,—in such case, the accused party tacitly acknowledge the truth of what the accusing party have alleged against them, and thus, of consequence, relinquish the cause. Now this is exactly the state of the case between the early Jews and Christians. The evangelist Matthew publishes to the world in unequivocal terms, that the Jews bribed the soldiers to report that the body of Christ was stolen by his disciples when they (the guard) were asleep; and the early Christians uniformly asserted the same thing. To record thus in the evangelical history that the Jews were guilty of this ridiculous and self-destructive, and yet horrid and abominable, piece of forgery and bribery; to tell the world that they acted so foul and sordid a part as to tamper with the soldiers, and get them to circulate a story which in their hearts they knew to be notoriously false, as well as absurd, since no man can accurately ascertain what is carried on near him when his senses are locked up in sleep; to do this, was to depict the ruling Jews to the world in the very worst colors in which men could be drawn, and to expose the cause of these enemies of Christ, as desperate and forlorn to the last degree.

Is it not natural to conclude that the Jew would in some signal manner have vindicated themselves from this charge, if they had known and felt that vindication was impossible, the thing being notorious? and is it not an equally necessary inference, that the Jew at that time were fully persuaded that Jesus Christ was indeed risen? otherwise, would they offer bribes, and invent an absurd story, to conceal it?

(To be concluded.)

The Story of Belleville and the Mission to the Ouvrier of Paris.

Under the above title Horatius Bonar published a very interesting little tract, giving an account of the remarkable mission-work among the inhabitants of Belleville in the siege of Paris was followed by the communist outbreak. A person named M/ has been the principal agent in this movement during the last six or seven years.

Belleville was originally a *faubourg* or suburb on the northeastern side of the great city of Paris, but is now included within the circle the fortifications, and contains a population of about 100,000 of the poorest classes. It is, however, situated on an elevation which makes it one of the healthiest quarters in the French metropolis, and commands extensive views. A little to the south is the famous cemetery of Père la Chaise, while the fine new park of the Bateau-Chaumont is one of the monuments of the Emperor Louis Napoleon's costly efforts to embellish and improve the comforts of Paris. But Belleville had become notorious as the abode of poverty, misery, and crime. From these Atheist dens went forth the Socialistic Communists or levelers, who, like the Democrats of St. Antoine in the first Revolution, with liberty, equality, and fraternity on their banner, afterwards burst out as murderers or incendiaries, burning the palaces of the nation and seeking to sweep away both rank and property.

Dr. Bonar gives a short but harrowing sketch of the horrid atrocities committed by the Communists when soured against the wealthy and enraged against the priesthood who never approached them but for money "but were feeding luxuriously during the great siege, when they were starving, or sustained in life by the vermin of the common sewers." One of the mission stations is near Haxo, where, within a large garden with an iron gate, a blackened wall records the massacre of numbers of the priests of Paris. Other places are to be seen where the arm of Versailles, bursting in upon Belleville, inflicted a terrible but indiscriminate retribution, and men and women were shot down by hundreds in the streets. We are told that "five hundred were, in one mass, placed upon the edge of a long, deep ditch, shot down by soldiers, and buried there."

"No excuse," says Dr. Bonar, "can be offered for the Communists save the ignorance and the provocations received in days past from an unsympathizing aristocracy and an unfeeling priesthood."

Happening to be in Paris soon after the war (of 1870-1), M/All went into a cafe shortly before leaving. He was distributing tracts at the door, and his wife inside. A workman grasped his hand, and said, "Will you come and tell us the true religion?"

These words were true. They clung to

* Acts xx. 7. 1 Cor. xvi. 2. Rev. i. 10.

as he journeyed home; and as he pondered them, he could not help recognizing in them a message from God to come over and help these poor Parisians. He severed his ties, and with his zealous and indefatigable partner, took up his abode in Belleville, the very midst of these strange Communists, whom everybody dreaded. He was educated not to throw himself into danger; he was warned against Communistic violence; was told that his life was not safe. But he had, in the strength of God, resolved to be the great work, and he had counted the cost; so he took up his abode in that poor district, among those men and women whose hands were yet red with the blood, and smell of the petroleum with which they had set the Tuileries on fire. He took a room for a cell, sent out his invitations, and gathered around him soon a goodly number of these outcasts.

But soon there came openings in other parts of the city, which were one by one entered; and calls, unmistakably from God, were readily responded to year after year, till the station at Belleville has grown into twenty, scattered like forts, or rather like beacons, over the city. These twenty-two stations are not all of the same size; some of the rooms will seat about 200, others 400, and some 550; if crowded, as they sometimes are, considerably more. In all, there is accommodation for 4652. The average weekly attendance of adults is about 8000, and that of juveniles about 3000. Most of the meetings are twice a week, others oftener; one, that of volu, every night. The majority of the audiences are of the poorest class; but the better classes drop in, and there is a singular mixture of both rich and poor in all of them; the workmen in their ordinary working clothes, and the women without bonnets; all them reverential in demeanor, and gazing intently on the speaker.

The softening and refining influence of all this evangelistic work, apart from its deeper results, is most remarkable. The people have learned to love the stranger, and to love one another. They wonder what can induce the English thus to come and care for them; and many of the Parisians of the better classes express the same wonder—"What can make the English so love and care for our poor?" The feeling thus engendered toward Great Britain is of the most beneficial and brotherly kind. This seems all the more remarkable inasmuch as they are nearly all Roman Catholics. Their own co-religionists take no interest in them.

The Government has been all along not merely neutral, but friendly, not hesitating to speak privately of the wonderful improvement on that wild, rude faubourg. Government officials, though Roman Catholic, have befriended when some partisan of the priesthood tried to stir up opposition, on the ground of illegality.—*Record.*

A Slim Percentage of Missionary.—A ship sailed from Boston the other day bound for the African coast with a cargo of eight hundred thousand gallons of rum, and a passenger list of one missionary. The *Presbyterian Journal* calls this a slim percentage of missionary, and asks: "How long will it take to convert the world with such a fearful disproportion between the *spiritual* and the *spirituous* agencies at work?"

The Plain Dress.

For "The Friend."

Our Saviour has said, No man can serve two masters. And I have been reminded of this saying, in considering those members of our Society who follow the vain customs and fashions of the world. For, who is the author of those fashions? The author of them is the prince of this world, that ruleth in the hearts of the children of disobedience. And are not they, who follow those vain fashions, followers of him, their author, whatever they may profess?

Our Saviour said, If any man is ashamed of me before men, of him will I be ashamed before my Father and the holy angels. Those who are afraid, or ashamed, to be known to the world as his followers: known, that is, by their life and conversation, their dress and address, may find Him ashamed of them at that day, the great day of judgment, when we must all appear before the judgment seat of this same Christ, to give an account of the deeds done in the body.

Our early Friends seem to have seen this inconsistency with great clearness, and advised their fellow-members to come out of these things. George Fox, in his Epistle (No. 104 of Epistles, p. 113,) says: "Run not after every new fashion the world inventeth and setteth up: keep in your plain fashion," &c. So that the *peculiar plainness* of Friends seems to have been conspicuous even at that day (1657), which is not to be wondered at considering how frequently the fashions of the world change from year to year. So that even then, the dress, more or less, distinguished consistent Friends, from the rest of the world, and to all who saw them, proclaimed them the professed followers of Christ, and rejecters of the prince of this world, with his vain customs and changeable fashions.

Yet in our day (1879), some even stand up in our religious assemblies as *ministers and leaders* of the Society of Friends, who are manifest followers of vain and changeable fashions and customs.

C. C. C.

A Syrian Lawsuit.—At half-past one the Kadi made his appearance. Having been informed of the disclosure which had been made, he ordered the court to be cleared of all bystanders, and our case to be tried. Our five witnesses were at hand; only one at a time being admitted into the court-room. The first was Saiyid (this means his Lordship) Abu Mustapha. "What evidence have you to offer to the face of Allah?" asked the clerk. "I know," was the answer, "that somewhere about thirty years ago, Ameer Effendi came to Beyroot to lay out the city streets, and took a piece of land from the American Cemetery, and gave the Americans a piece in place of it, and ordered them to build upon it: they went on at once and built the existing foundations, and my brother was superintendent of the work." "Is that all?" asked the clerk. "That is all." "Call the next." Our four other witnesses testified to substantially the same effect.

Yusef smiled triumphantly, and his truculent old uncle Moosa poured forth a defiant volley of Turkish, demanding that his battalion of witnesses, Hajjis and Saiyids, should be heard at once. The Kadi smiled and beckoned to the clerk. Another Kadi, a friend of the Beyroot dignitary, happened to come in, and the three consulted together; Yusef and

his uncle all the time keeping up their clamor. I expected, of course, that our five witnesses would be outsworn by the twenty or fifty of our opponents. But I was yet to learn a point in Mohammedan law.

The Kadi silenced the clamor of Yusef, and announced the decision of the Court; "The case is closed," he said. "Respectable witnesses have testified before the face of God to the validity of the American claim. Any testimony to the contrary must be false. It is impossible to receive the witnesses of the defendant. The police may dismiss them all, and the legal settlement of the case is referred to the Mufti."—*Dr. Jessup, in Frank Leslie's Sunday Magazine.*

Mathematical Evidence.

Dr. John Mason once, while travelling in a stage-coach, had an argument with a young officer who objected to religion, that it could not be supported by absolute proofs, like the propositions of mathematics.

"But," replied the doctor, "suppose I could prove that objections can be urged against mathematical demonstrations more puzzling and unanswerable than any objections against moral evidence?"

"I shall yield the cause; but I am sure that the condition is impossible."

"Let us try," said the other. "I begin with a common case. The Newtonian system of the world is so perfectly settled that no scholar presumes to question it. Go then, to a peasant who never heard of Newton, nor Copernicus, nor the solar system, and tell him that the earth moves round its axis, and round the sun. He will stare at you to see whether you are not jeering him; and when he sees you are in earnest, he will laugh at you for a fool. Ply him now with your mathematical and astronomical reasoning. He will answer you, that he believes his own eyesight more than your learning; and his eyesight tells him the sun moves round the earth. And as for the earth turning round upon her axis, he will say, that 'he has often hung a kettle over the kitchen fire at night, and when he came back in the morning it was hanging there still; but had the earth turned round, the kettle would have been turned over, and the mash spilled over the floor.' You are amused with the peasant's simplicity, but you cannot convince him. His objection is, in his own eyes, insurmountable: he will tell the affair to his neighbors, as a good story; and they will agree that he fairly shut the philosopher's mouth. You may reply that 'the peasant was introduced into the middle of a matured science, and that not having learned its elements, he was unacquainted with the principles of correct judgment.' True: but your solution has overthrown yourself. A free thinker, when he hears some great doctrine of Christianity, lets off a small objection, and runs away laughing at the folly or railing at the imposture of all who venture to define a Divine revelation; he gathers his brother unbelievers, and they unite with him in wondering at the weakness or impudence of Christians. He is in the very situation of the peasant. He bolts into the heart of a grand religious system; he has never adverted to its first principles, and then he complains that the evidence is bad. But the fault in neither case lies in the ignorance or obstinacy of the evidence, it lies in the ignorance or obstinacy of the objector. The peasant's ground is as firm as the infidel's.

The proof of the Newtonian system is to the former, as distant, subtle, and cloudy as the proof of revelation can be to the latter; and the objection of one as good as the objection of the other. If the depravity of men had as much interest in persuading them that the earth is not globular, and does not move round the sun, as it has in persuading them that the Bible is not true, a mathematical demonstration would fail of convincing them, although the demonstrator were an angel of God!

"But with respect to the other point, viz., that there are objections to mathematical evidence more puzzling and unanswerable than can be alleged against moral reasoning, take the two following instances:

"It is mathematically demonstrated that matter is infinitely divisible; that is, has an infinite number of parts. A line then of half an inch long has an infinite number of parts. Who does not see the absurdity of an infinite half inch? Try the difficulty another way. It requires some portion of time to pass any portion of space. Then, as your half-inch has an infinite number of parts, it requires an infinite portion of time for a moving point to pass by the infinite number of parts; but an infinite number of portions of time is an eternity! Consequently it requires an eternity, or something like it, to move half an inch!"

"But, sir," interposed the officer, "you do not deny the accuracy of the demonstration, that matter is infinitely divisible?"

"Not in the least, sir; I perceive no flaw in the chain of demonstration, and yet I perceive the result to be infinitely absurd."

"Again. It is mathematically demonstrated that a straight line, called the asymptote of the hyperbola, may eternally approach the curve of the hyperbola, and yet can never meet it. Now, as all demonstrations are built upon axioms, an axiom must always be plainer than a demonstration; and to my judgment it is as plain, that if two lines continually approach, they shall meet, as that the whole is greater than its part. Here, therefore, I am fixed. I have a demonstration directly in the teeth of an axiom, and an equally incapable of denying either side of the contradiction."—*Ep. Recorder.*

"For The Friend"

Some Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 290.)

"2d mo. 6th. Went to take my leave of the Indians at Cold Spring; they were at the time holding what they called a New Year's Meeting, which gave me an opportunity of seeing a number of the chiefs. I was favored to feel my own weakness, and at times, notwithstanding I had been much favored at other times, I think felt discouraged. I had talked a good deal with some to satisfaction; there were others whose feelings I thought I had scarcely ever been able to reach. After conversing with them for a time on other business, my mind was much favored, and I was enabled to talk with them on religious subjects to satisfaction; their reply to me was comforting, for which I have reason to feel thankful, and I left them, I think, with feelings of rejoicing.

Visited Geo. Jacob; he had been sick. I thought the visit was satisfactory to us both. Called a short time and expressed a few words in great weakness, to the Indians who were met in the Council House, then returned

home, I think I may say, thankful for the favors of the day.

On Fifth-day, the 8th of 2d mo. 1844, I left to pay a visit to my relations and friends in Chester county. On my way home I experienced a good degree of preservation and comfort, but the thoughts of saying 'thou' to my relatives and friends when it would be proper, felt quite a trial to me, and was much in the cross, although I have, for a long time made a plain appearance and said *thee* to a single person; but when my mind was stayed upon Him who alone can support us, this trial seemed small, and my strength increased."

[It may appear strange to some, that one so dedicated as Ebenezer Worth, should find it difficult to take up the cross in what appears so small a thing as the use of the pronoun *thou* instead of *thee*. But it will not appear so surprising, when we reflect that persons of a different disposition naturally shrink from going counter to the customs which prevail in the circle in which they move; especially, when their so doing may be looked upon as making a profession of greater conscientiousness and strictness than their friends and associates practise. Few who have not tried it, can tell how much such a change involves. May the exercise in regard to it increase and spread among us, for it does comprise much more in its effects than appears at first sight.]

Diary continued.

"Arrived at home the evening of the 14th, found my relatives pretty well, feel I trust in measure thankful for the favor. On Fifth-day the 15th, attended the Quarterly Meeting of Ministers and Elders to a degree of satisfaction.

16th. Attended Quarterly Meeting (Calm). Whilst I esteem it a great privilege to sit with my friends in their meetings, I think I have experienced that the true qualification for worship and enjoyment is alone from our Divine Master, and is oftentimes felt in our smallest meetings, greatly to our comfort and refreshment, when we are in our proper places given up to wait upon Him, with a desire to serve Him, in the ability which He in his wisdom and mercy is pleased to give.

20th. Attended Concord Quarterly Meeting, in which I had much satisfaction. Dongan and Asenath Clark attended this meeting, on their way to pay a religious visit to Friends in Europe. Sarah Emson was also set at liberty to attend to a similar concern, which I thought was feelingly united with by the solid part of the meeting."

On the 12th of the 3d month following, he left his home to return to Tanesassa, in relation to which he says: "Parting with my friends was, I think, as trying as when I left a year ago. Although much humbled and tried, I was mercifully supported, and was enabled in faith to lean upon that, which has hitherto been to me strength and support in the time of trial; may all my dependence be on the Lord.

15th. Left Philadelphia and got to New York; staid at the Battery Hotel; called to see John Hancock. At the hotel in the course of the evening, I heard a man, who I suppose to be Captain Cheyne, say, he that day saw a ship purchased by an eastern man, and paid for in eastern money, for a slave. When I thought of this it was distressing to me.

16th. Left for Albany—went by the way of Bridgeport. The wind blew hard, making considerable waves on the water, the steam-

boat was so tossed as to make it at times difficult to walk about. I stood for a time on the hind part of the boat, and I think I can say was comforted in viewing the waves, and remembering that this great water was the work of Him, in whom we believed, and desired serene. I have not language to express solemn, comfortable feelings with which was favored in beholding this portion (as I suppose I may call it) of the sea.

19th. Got to Abr'm Gifford's, where I kindly received; after paying a short visit went to Jos. Battey's, where I staid all night.

20th. It has the appearance of being protracted sleighing to-morrow, and feeling my mind drawn towards attending their meeting, I concluded to stay and do so; it was to me a comfortable one.

21st. Jos. Battey was so kind as to come fourteen miles on my way to the river, that evening I got to Nopole Corners, the public house there is kept by Ashball Bunell, apparently a religious man; I should be glad if other public houses were kept like this.

21st. Got to the reservation, and was kindly received by the Indians. The chiefs had council to-day. I was glad of the opportunity to present a letter which I had from the Committee—Moses B. Pierce being there to interpret.

The Adventures of an English Christian Name.

—The name of John, though now so common in our midst, was not a favorite with our early English forefathers. With a few rare exceptions, it does not occur before the Norman conquest. And when we look at the masses of our familiar names, we shall see that this the case with every one of them. Robt. Thomas, William, Henry, Richard, James, Mary, Ellen, Eliza, Emily, Catharine, Margaret, Jane; none of these are commonly found as native names until after the invasion of Duke William. In fact, we may say, in certain sense, that truly English Christian names are now all but unknown in England. Our whole modern nomenclature is almost entirely foreign or scriptural. In early English times, however, before the Danes and the Norwegian from Scandinavian lands, or the Norman had overflowed the country, even English men or woman bore a name which once conveyed a meaning to the hearer in his own tongue. A few examples of these truly English names will suffice to show their general character. Most of the best known which are really royal names, are compounded of *æthel*, "noble"; *Æthelbald*, *Æthelbert*, *Æthelred*, *Æthelstan*, and *Æthelwulf*; or *æa*, "rich," *Eadwald*, *Eadberit*, *Eadward*, *Eadmund*, and *Eadric*; or of *ælf*, an "elf," *Elfred*, *Elfhæg*, *Elfric*, and *Elfwine*. (Course there are many other common elements which enter into such names. Many of them have undergone sad havoc at the hands of historians and latinizers. For example, *Godfrith*, the gift of God, has degenerated into *Godiva*; *Eadgith*, the name of the Confessor queen, has taken the forms of *Edith* or *Editha*; and *Æthelthryth*, after passing through its intermediate stage of *Eth-reda*, has finally settled down into *Audrey*. A little later, the Scandinavian colonization introduced a number of new Northern names. Of these, *Harold* alone still holds its place; *Cnut*, *Swend*, *Sweden*, *Tostig*, and others of like character find frequent mention in our history.—*The Cornhill Magazine.*

From "The British Friend."

Week-day Meetings.

From my earliest childhood (I am now in my 64th year), it was my father's practice to see his shop in order that his family and assistants might attend the week-day meetings. I believe no pecuniary loss resulted from this practice; but an certain of one thing, at it was a salutary refreshment to mind and body, and this was also my own experience during more than twenty years of business life on my own account. Our late honored friend, Joseph Sturge, said—"It was the blindest testimony that could be borne by any society," thus to devote a portion of time for worship during the business hours of the day. Doubt, too, whether evening meetings, on the note, would be better attended.

In reading a memoir of James Gough, I find the following notice of John Ashton, of Kilmore, Ireland, in the early part of last century—"He and his wife were both concerned at one meeting at Birr, through the powerful ministry of that able and eminent minister of the Gospel, Thomas Wilson. Coming out of that meeting, they said to each other,—The way of everlasting happiness had been clearly laid down before them, and they were resolved to walk in it—come life or death." Not long after, John was thrown to prison for his Christian testimony against an oppressive and anti-Christian yoke of laws. * * * When at liberty, he with a wife constantly, twice a week, attended a meeting at Birr, generally walking on to thither, being about seven English miles, passing through a river on the way, both going and returning. In winter on crossing the river, they had the ice to break; and John said he had wept to see the blood on his wife's face in coming through it. In those days faith was precious to its professors, who also assessed it; and no difficulties or dangers could prevent them from getting to their religious meetings to enjoy the renews of their love and life with their brethren."

These worthies proved the truth of the apostle's words,— "It is good to be zealously affected always in a good thing." We cannot receive a full blessing without a full surrender, and the remedy for our shortcomings lies in the whole-hearted dedication and consecration of ourselves to the service of Christ. I will conclude with an extract of a letter received about twelve months since from a primitive Methodist minister in Sussex, in reference to the duty and privilege of devoting a portion of time to similar purposes,— "You have also reminded me that my aged and now afflicted mother observed a similar course whilst training her fourteen children, of whom I am the youngest. She had never any large means (temporal) to look to, but every day she closed her shop for about twenty minutes to worship with her children and any customers that might happen to be at the shop at the hour of prayer. The neighbors got to know her habit and would quietly wait at the shop door until they were admitted; this exerted an influence for good on them, and laid principles in us her children we cannot easily depart from."

It may be added, that with one exception, the whole of the twelve surviving children were engaged in various ways in promoting the spread of the Redeemer's Kingdom.

Thy friend sincerely,

JOHN M. ALBRIGHT.

[The following piece was sent for insertion in our columns by a correspondent, who says:—"A few days ago I was in a very low spot, and being engaged in putting some things in order, a scrap of newspaper lying on the floor attracted my attention, and on examining carefully was surprised to find this beautiful piece."]

It seems to have been comforting to herself, and she has sent it to us in the hope that some others "who are fettered, earth-bound and awestruck, can appreciate this little outburst of feeling."—Eds.]

SOMEHOW OR OTHER.

Life has a burden for every man's shoulder,
Some may escape from its troubles and care;
Mis it in youth and 'twill come when we're older
And fit us as close as the garments we wear.

Sorrow comes into our lives uninvited,
Narrowing our hearts of their treasures of song;
Lovers grow cold and friendships are slighted,
Yet somehow or other we worry along.

Every-day toil is an every-day blessing,
Though poverty's cottage and crust we may share;
Weak is the back on which burdens are pressing,
But stout is the heart that is strengthened by prayer.

Somehow or other the pathway grows brighter
Just when we mourn there are none to befriend;
Hope in the heart makes the burden seem lighter,
And somehow or other we get to the end.

Selected.

LITTLE RAG-TAG.

A curly, bright head, and perched upon it
A little rag-tag of a brown sun-bonnet;
A pair of old shoes forever untied,
Whose soles have holes, whose toes grin wide;
Come sun or come shade, come shine or come rain,
To little Rag-Tag it's all the same;
With an air of the most supreme content
She paddles and plays till the day is spent.

Why people complain she never can see,
When God is as good as ever can be,
She talks to herself, and laughs and sings,
About the world and its beautiful things;
But, though He is good to all the rest,
She is very sure that He loves her best.
Oh, how much better this world would wag
If we all had hearts like little Rag-Tag!

By the Roadside.—As one walks along the roads in the country, if he is an observant man, he may learn many lessons of value. The dwellers along the roadsides may not suspect that their character may be read very plainly by the condition of the road in front of their homes, and the appearance of their surroundings. But it is so, and every man has a certificate of character exhibited at his door, or upon his fence, for the passers-by to read. For instance, in summer we may see roadsides white with the wild carrot or other pestiferous weeds. This shows that the owner is careless and thoughtless, because he is suffering injurious weeds to multiply, and lay up future trouble for him; that he is selfish and regardless of what is due to his neighbor, because he is actually injuring the latter's property by stocking it with weeds, and laying up trouble for him as well as for himself; also that he is not a law-abiding, or at least, that he is a thoughtless citizen, because he observes neither the written law which, in nearly every State, obliges every owner or occupier of property to destroy injurious weeds upon his premises; nor the unwritten law of justice and kindness to his neighbor, which would impel him to "do as he would be done by." So it is with everything about his house, the gardens, the yards, barns, stables, and fields. A man's character is set forth by these as plainly

as if it were printed in the largest type, and hung up for public inspection upon his front fence. Actions speak louder than words, and by our works we shall be judged.

The moral of this little homily is so plain that nothing further need be said as to its application. Let every man judge himself by it however, and not his neighbor. Then some good may result. And this is the very time when action in this regard will be most effective.—*Late Paper.*

Natural History, Science, &c.

Radiate Animals of the Indian Ocean.—Some magnificent Feather-stars (Comatulæ) presented themselves, which I much regretted could not be preserved in some way. Their forms were so complicated, however, that time did not permit of my drawing them with such accuracy as to be useful for scientific purposes, and I was not successful in preserving them entire. One of them was of a rich carmine, and 6½ inches in diameter, breaking very easily; and even in the fresh sea water it discharged its color very rapidly, pouring it out like blood, staining the hand, and strongly tinging the water; and itself passing from carmine to a rich yellow, and thence to crimson, until nothing was left but a quantity of dirty fragments, which gave no indication of what it had been. A second species was of a rich olive green, with the distal ends of the arms white for 1½ inch, the whole diameter being 9½ inches. This splendid specimen did not show any special inclination to break up, but discharged its color to some extent into the water; and in the attempt to dry it, lost it all.

I have found the directions given for killing these animals entire quite ineffectual. In the case of a Comatulæ which came up on the anchor in Haitian Straits, I was successful in preserving a record of it, by drawing and description; but upon adding the minute quantity of corrosive sublimate, the animal rapidly discharged its color, and broke up into minute fragments. This species also showed no inclination to break itself up while in health, even when handled; and, indeed, this peculiarity, usually supposed so characteristic of the feather-stars, is by no means universal. Two large sized and remarkably beautiful specimens of different species, obtained at Singapore, I handled with impunity without breaking the smallest portion of them; but, unfortunately (and this well illustrates the difficulty of doing all one would wish, even under apparently advantageous circumstances), these specimens were obtained so late in the day that it was impossible to do anything with them till daylight reappeared. But, alas! the bucket which in the evening contained two healthy and splendid feather-stars, held in the morning only an offensive mass of small fragments, the color of the water and of the remains being equally unattractive.—*Collingwood's Naturalist's Rambles.*

Stone Wells of Arizona.—A wonderful place is Tinajas, about thirty miles south-east of Mission Camp. The mountains have one face of hard, smooth granite. All the water falling upon this basin has to flow through nine tanks, one above the other. The lower tanks are of easy access, and are often drained of their contents by men and animals travelling between Yuma and Sonora. The upper tanks are approached only by circuitous and diffi-

cult climbing over rocks. To one standing below they afford no indication of their existence, nor does climbing the smooth, steep mountain side seem possible to one unacquainted with the way they do it. In the upper tanks water has never been known to fail. To this water comes game of all kinds in great number from the great waterless country around Tinajas. Antelope, mountain sheep and deer of several kinds come in herds. Rabbits and hares are as plenty as anywhere, and are prey for many coyotes and beautiful little rock foxes. One would think that all this game would be thinned out by the Papago Indians who inhabit the country. But these Indians are superstitious, and avoid Tinajas with abject horror. Within two miles of this water are certainly one hundred and fifty graves, and probably more, each marked by rows of stones laid in the form of a cross. Scores of men famished for water have expended their last strength in reaching Tinajas, only to find the lower tanks dry, and ignorant of the upper ones, have lain down in despair to die. The remains have been buried by later travellers, and the graves marked, Mexican fashion, by a cross of stones. During the rush to the gold fields of California, cholera attacked travellers on the road from Mexico, as it did American immigrants along the Platte; pestilence combined with thirst to produce corpses at Tinajas. Recollections of the bleached bones and grinning skulls protect the game from Papago arrows and flintlocks. After passing through its usual fermentation the water becomes clear and pure as any in the world; it comes from the clouds only, and, flowing into the tanks over insoluble granite, it carries no mineral matter. Every heavy rain pours a whirlwind torrent through the tanks, washing them out to the very bottom; no organic matter stays behind. The number and variety of birds here is marvelous, many of them appearing to be of new and undescribed species. At morning and evening the din of their song, confined by the sides of the mountains, is almost deafening. All around Tinajas is the remarkable vegetation of the desert: near its tanks are many curious plants nourished by their moisture.—*Arizona Sentinel.*

Fishing for Smelts.—On the coast of Maine smelts visit the rivers about the 20th of December, and remain almost all winter. For about two months they take the hook readily, and are caught in considerable numbers through holes cut in the ice. Formerly, on cold days, it was very severe fishing, without shelter, except by piling up cakes of ice, evergreen boughs, &c. Last winter one of the fishermen made a canvas tent, and it proved so comfortable that it has now become the universal custom to fish in them. There are now on the ice, above the bridges, two villages of these canvas houses, much resembling an Indian encampment in winter quarters. A light wooden frame, with a sharp roof, is put together, and the whole covered with a light canvas or cotton cloth. In some instances the covering is painted, the better to resist the piercing north-west winds. The ordinary tent is about six feet square; occasionally one is larger, for two persons. The interior is provided with a stove and a bench, upon which the angler sits while fishing. The whole rests upon runners, and can be easily moved from place to place. When the fisherman reaches the grounds he cuts a hole

through the ice, places his tent over the same, builds a fire, closes the door, drops his lines through the hole and waits for bites. Each man uses four lines. The bait used in this vicinity is the clam worm, which is found in the clam flats. The upper end of the line is fastened to a rack above the fisherman's head, while the hook is from six to ten feet below the surface. The fisherman sits on his bench beside the stove and patiently waits for the fish to bite. There is not much skill in this kind of angling, for when a smelt takes the hook the motion of the line conveys the fact to the fisherman, and he quickly hauls him in. The fish bite better on cold, stormy days. From ten to fifteen pounds is a fair day's work for one man.—*Leader.*

Indian Subscribers.

The last number of "The Council Fire," a Monthly Journal devoted to the interests of the Indians of this country, contains the following letter:

"Shoshone and Bannock Agency, Wyoming Territory, April 12th, 1879."

Friend Meacham:—The Arapahoes were so pleased with their papers, on seeing their names and hearing articles read, that twenty-two more came forward, unsolicited, and requested me to have the *Council Fire* sent to them. Ten paid \$1.00 cash, each, to wit: Broken Horn, Bill Friday, Bear Robe, Tallow, Sitting Bear, Red Hoop, Wolf Travels, Yellow Bear, Head Warrior, and Bear Creeper.

Gave paid fifty cents and a bead case, and the following persons being unable to raise the money send moccasins, sheaths, &c., which I hope the friends of those who are trying to help themselves will be prompt to purchase. You will find each man's name attached to his merchandise. Please sell them for what you can, and credit each individual accordingly. Some of the things are worth more than \$1.00. Please return the difference in change or picture books to the proper person to my care. Some of the scabbards perhaps won't sell for \$1.00,—send them *Council Fire* to the amount you receive. The following comprise this list: Broken Horn, moccasins; Yellow Eye, tobacco pouch; Medicine Plume, moccasins; Big Moccasin, moccasins; Yellow Owl, moccasins; Slabby Face, scabbard; Seratcher, scabbard; Covers his face, scabbard; Little Ant, a little case; Doc, a little case; Gets Away, needle case.

The following white men paid me \$1.00 each: F. G. Burnett, Lander, Wyo., Chas. J. Allen, Miner's Delight, Wyo. I think there are a few more here who will send before long.

Is it not astonishing that men will still fight for the transfer of the Indians to the War Department in the face of the protest of nearly all the Indians who have made some advancement in civilization, and against the protest of the greater portion of the Christian people of the nation?

Very respectfully,
E. BALLOU."

[It is a pleasing illustration of the increasing civilization of the Indians, that the editor of the paper can say he has one hundred and twenty Indian subscribers to it, from one agency. He states that he had received the articles referred to in the above letter, and that they are beautiful—the work being done on elk and buffalo skin, and with thread made from sinew.]

Does Temperance Pay?—In the following significant facts, submitted by the clerk of the circuit court of Edwards county, Illinois, the economy of temperance is strikingly illustrated:

"There has not been a licensed saloon in this county for over twenty-five years. During that time our jail has not averaged an occupant. This county never sent but one person to the penitentiary, and that man went up for killing his wife while drunk with whiskey obtained from a licensed saloon in adjoining county. We have but very few paupers in our poorhouse, sometimes on three or four. Our taxes are 32 per cent lower than they are in adjoining counties where saloons are licensed. Our people are prosperous, peaceable, and sober, there being very little drinking, except near Grayville, licensed town of White county, near our border. The different terms of our circuit court occupy three or four days each year, and the dockets are cleared. Our people are well satisfied with the present state of things that a very large majority of them would bitterly oppose any effort made in favor of licensing under any circumstances."

Self-Reproach.—As I was driving to-day, in advance of me were two coal or coke carts, the drivers of which were sitting listless upon their loads, quite indifferent to everything but their own personal diversion, for they drove they chatted to one another, and threw of the contents of their carts at each other. A little girl, taking advantage of their carelessness, ran behind one of the carts, and seizing a large lump of coke, hastily withdrew. I reproved her for the act, as I drove past; and in my mind followed her home with her ill-gained booty, and thought of what would be her reception.

The reader may ask, "But whence the self-reproach?" Why, here: in that I had no presence of mind, in the event of time or opportunity not allowing me to follow her to her destination, at least to have stepped off my conveyance, and gently, but earnestly and faithfully, have remonstrated with the child. I might have told her of what perhaps she was ignorant of, even in this land of Bible talk, that though the lads in charge of the cart saw her not, yet that there was One above who sees everybody and all things; and that He will "bring every work into judgment with every secret thing, whether it be good or whether it be evil." Alas! alas! in how many ways do these after-thoughts present themselves, reminding me of the numberless grounds for self-reproach.—*Ep. Recorder.*

THE FRIEND.

FIFTH MONTH 3, 1879.

PHILADELPHIA YEARLY MEETING.

(Continued from page 265.)

The sitting Third-day, (22nd ult.), was occupied in reading and considering the answers to the Queries. The state of Society as the spread before the meeting, evinced several weaknesses and shortcomings on the part of our members, calling forth affectionate counsel from concerned brethren, that we might individually be faithful in our allotments.

Among the subjects thus referred to was the obligation to attend our religious meet-

gs, and to exercise an earnest travail of soul therein, for ability to perform Divine worship. Any of the answers to the Queries acknowledged that some of our members had attended at places where a hireling ministry was reported. This departure from the ancient testimony of the Society as to the true ground of Gospel ministry was deprecated, and countenanced as such as had given way to it. In connection with the subject of plainness of speech, behavior and apparel," remarks were made by several Friends on the impropriety of persons travelling as professed ministers in our Society, who did not evidence by their example in these respects, that they had fully come under the government of the laws of Christ in themselves. A caution was extended against assisting such in their movements, and the belief was expressed that the agency of their labors was to spread discord among the members.

Earnest and affectionate appeals were made to our members, especially to the younger ones, to submit themselves to the government of Christ. One of those who thus addressed a meeting, alluded to his own education as a hindrance, by parents who endeavored to train him up in the nurture and admonition of the Lord; to the unsettlement of mind caused by the diversities of opinion and the contention within our own borders, so that he was led to look of joining in membership with some other religious society; and to the visitation of Divine love to his soul, by which he was so wrought upon, that the religion of his education became the religion of his conviction, and saw it right for him to conform to the plain appearance of a consistent Friend.

Those who were in the middle ranks of life were tenderly exhorted, by one of their own, to faithfully perform that share of labor service which was falling upon them for the Church's sake, so that, following in the footsteps of those worthies who had gone before, they might be able lay down their heads in peace.

The meeting as a whole may be considered to have been a profitable one, in which some strength was granted from the Head of the Church, to labor for the preservation of its members from evil influences, and for stirring them up to greater faithfulness and dedication of heart, which were evidently needed. It is comforting and strengthening renewedly to see, that as those were being removed from works to rewards who had long borne the burden and heat of the day, there were others appearing to take their places in the militant Church; and a degree of faith was revived, at the Lord would not suffer his glorious cause to be without its advocates and defenders in the earth.

On Fourth-day, the 23rd ult., the first subject taken up was the report of the Yearly Meeting's Committee on Education, which had been engaged in endeavoring by advice and pecuniary assistance where needful, to provide family and other schools taught by members, for the instruction of our children. Their labors were satisfactory. A committee is appointed to nominate Friends to perform a similar service during the coming year. At the Yearly Meeting appropriated \$1200 to be used at their discretion for educational purposes.

A question of discipline, brought up from Philadelphia Quarterly Meeting, as to where the right of membership belongs, of an infant

whose parents were members of different Monthly Meetings, was referred to a committee.

The Reports from the Quarterly Meetings on Education, showed the whole number of children of school age within our limits to be 893, which is 36 less than last year, of whom about three-fourths were being educated under the teachership of members of our Society.

A concern for the right training of our children, as to school education, and in all other respects, so that they might truly be brought up in the nurture and admonition of the Lord, took deep hold of the meeting, and earnest exhortation was given to parents to dwell under that religious concern which would qualify them for the responsible duties of their position. The duty of *restraining* as well as *advising* the young was forcibly presented by some who expressed their thankfulness that their own fathers and mothers had so dealt with them in the days of their childhood.

A proposition to resume the correspondence which had long been suspended with Ohio Yearly Meeting, was met by an expression of unity from many. Others were not prepared to take that step at this time. Of this latter class, some expressed their unqualified unity with the body to which it was proposed to send the epistle, believing that the separation in Ohio had been made in the interests of modified Quakerism, and that this was corroborated by the developments which had since taken place in that country,—official avowal having recently been made of doctrines at variance with our principles, by meetings connected with that who separated under the clerkship of Jonathan Bunn. Reference was made to those members of *all* the Yearly Meetings who retained their attachment to our original doctrines and usages, and a desire was manifested to do nothing which would in anywise discourage these, or close the way for our exerting an influence to be panned and strengthened them. Some of our members believed that the proposed correspondence would be a step in the direction of opening the door for the extension of that helpful sympathy to our brethren, which had long found but little room to manifest itself. Some thought that when correspondence was renewed, it should be in a more general way. Amid the variety of views thus called forth, it was evident the meeting as a whole was not prepared to move forward at this time. No disposition was manifested to press points unduly, and after a free, interesting, and dispassionate comparison of sentiments, the meeting passed from the subject. It may be noted, as an indication of the prevailing feeling among us, that whatever may have been the opinion on this point of some of its members, no one expressed unity with that body in Ohio, which Philadelphia Yearly Meeting, more than 20 years ago declined to recognize.

Fifth day, 24th ult. A meeting for worship was held in the forenoon, according to usual custom, in three of the meeting houses of Friends in the city. In the sitting for business in the afternoon, the first subject that claimed attention was that of spiritual light. The reports from the Quarterly Meetings showed that thirty-five of our members had used them as a drink during the year—the most of these only occasionally. The number reported the previous year was forty-two. This diminution was felt to be encouraging, and subordinate meetings were again

recommended to use faithful efforts in disuading their members from continuing this practice.

The evil effect of the kindred habit of using tobacco, was referred to by several Friends, but the subject was not fully entered upon. One cause of this probably was, the fear (for which there were some grounds) lest the dignity of the meeting, and consequently the Divine authority which alone could give weight and value to its decisions, should be dissipated by ill-advised remarks.

The report of the Indian Committee was unusually interesting. The working of the school at Tane-assa, and the efforts used by its officers to promote the moral and intellectual progress of the Indians, were satisfactory. Reference was made to the political disputes among those people as to the Presidency of their nation, and to the necessity of having a competent and trust-worthy man to superintend for them the leases of the villages, authorized by act of Congress. The Committee's labors were fully approved by the meeting, and an appropriation of \$1000 made out of the common stock for their use.

Sixth-day, 25th ult. The principal business that was transacted in this the closing session, was the appointment of a new committee to have charge of the Boarding School at Westtown, and of one on Education; the adoption of the report from the Friends appointed to examine the Treasurer's account, who proposed the raising of \$3500, which with \$2200 previously directed by the Yearly Meeting, makes \$5700 for the coming year; and the adoption of the report of the Committee on the membership of Infants, who proposed that where the father and mother of a child were members of different Monthly Meetings at the time of its birth, its name should be entered on the register of the meeting to which its mother belonged. A Friend proposed for consideration, the propriety of issuing a general Epistle to Friends everywhere—but way did not open to enter upon the service at this time.

The committee to assist the clerk in preparing a minute expressive of the exercise of the meeting whilst considering the answers to the Queries produced one which appeared to be quite satisfactory to Friends. This referred to the deficiencies brought forward in the reports from the Quarterly Meetings; and expressed the conviction, that in proportion as our members individually were brought under earnest concern for their salvation, and became of the number who are hungering and thirsting after righteousness, these defects would disappear. Our various testimonies were stated to be the out-growth of true and vital religion; and this if allowed to operate, would produce the same fruits in us as in our early Friends. It would lead to the diligent assembling for Divine worship, to a fervent exercise in the meetings for spiritual food, to the avoidance of all breach of our testimony to the character of true Gospel ministry, to "plainness of speech, behavior and apparel," to an upright walk in all the business relations of life, and to a care not to involve others in a loss or risk on our account. The minute referred to the comfort which had been felt from the presence of a number of our young Friends who had recently put on the plain apparel peculiar to our Society, and whose behavior was consistent with their appearance; and the desire was expressed, that none

might be turned aside from yielding to their own convictions in this respect, by the example of those professing to be ministers of the Gospel, whose appearance did not indicate full assension to the restraints of the cross.

Several Friends were engaged in earnest and loving exhortation to different classes present, and thanks were offered to the Lord for His preserving care and gracious help during the several sittings of the meeting. A sweet and solemn quiet, with which we have often been favored at such seasons, and which is better than any words, overspread the assembly, and under this covering the concluding minutes was read.

SUMMARY OF EVENTS.

UNITED STATES.—The U. S. Senate passed the Army appropriation bill on the 25th ult. It now goes to the President for his consideration. The legislative appropriation bill passed the House on the 26th ult, by a vote of 149 to 118.

The President issued a proclamation on the 26th, warning all trespassers from the Indian Territory. The Post-office Department has approved a design for the new international two cent postal card provided for by the Universal Postal Union, and the recent act of Congress.

The quantity of logs and sawed lumber lying along the upper waters of the Delaware, is said to be the largest since 1873.

The total number of visitors at the Zoological Garden during the past year was 280,730, which is 76,990 increase on the previous year. The receipts were \$49,258.14.

The New York Bible Society distributed 89,854 volumes last year.

In 1856 the translation of the Bible into the Russian language was begun; and completed in 1877. The first edition of 24,000 copies was exhausted last year.

The Colorado State Board of Equalization places the value of the 1218 miles of railroad in the State at \$7,637,458, an increase of \$2,712,383 over last year.

A few minutes were taken in Boston on the 24th ult, at which steps were taken for the relief of colored men, grants to Kansas. An organization has also been formed in this city with the same object in view.

On the morning of the 23rd ult., a portion of a coil mine of the Lehigh and Wilkesbarre Coal Co., at Sugar Notch, caved in, imprisoning six men and one boy. The mine was not very unskillfully set at work to rescue the prisoners, and after five and a half days work, succeeded in getting them out alive.

Heavy rains have fallen in Texas within a few days, causing serious floods. In Houston, on the 23th, the water rose to a depth of four to ten feet in the streets, flooding buildings and driving many families from their homes.

The number of deaths in Philadelphia for the week ending on the 26th ult., was 311. Of these 195 were adults and 116 children.

The returns to the Department of Agriculture, for the Fourth month, show that the average of winter wheat is about 14 per cent. greater than last year. The wheat in the ground, taken as a whole, is about 2 per cent. below average.

Markets.—U. S. sixes, 1881, 106½; 5's, registered, 105½; coupon, 104½; 4½ per cents, 106½; 4 per cents, 101½.

Cotton.—Sales of middlings at 11½ a 12½ cts. per lb. for uplands and New Orleans.

Proteins.—Crude 7½ to 8 cts. in bbls, and standard white, 8½ cts. for export, and 9½ to 10 cts. per gallon for home use. Lard oil, 48 to 49 cts.; linsed, 50 to 50 cts.; sperm, crude, 82 cts.; bleached winter, 97 cts.; \$1.00; neat-foot, prime, 75 cts. per gallon.

Fresh Fruits.—Apples continue dull. Baldwin's, \$2.65 a \$2.50; choice Greenings, \$3; Rox Russets, \$2.90 a \$2.35 per barrel. Strawberries, 30 a 40 cts. per quart.

Flour.—The market is fairly active and firm for choice grades. Minnesota extra, \$4.50 a \$4.75; Penna, \$4.75 a \$5.12½; western, \$3.25 a \$5.50; patent and other high grades, \$6.25 a \$7.50. Rye flour, \$2.75 a \$3.87½.

Wheat—Wheat active and higher—western red, \$1.11 a \$1.14; Penna. and southern amber, \$1.11 a \$1.15. Corn, 42½ a 43 cts. Oats, mixed, 32 a 32½ cts.; white, 33 a 35 cts.

Hay and Straw.—Pruise timothy, 70 a 80 cts. per 100

pounds; mixed, 55 a 65 cts.; straw, 85 cts., a \$1 per 100 pounds.

Beef cattle.—The market about the same as last week. Extra, 6 cts.; medium, 5 a 5½ cts.; common, 4 a 4½ cts. Cows and calves, \$25 a \$35 per head. Sheep, 5 a 6 cts. per lb. as to quality. Hogs, extra, 63 cts.; good, 60 cts.; medium, 57 cts.; common, 55 cts.

Notice is given by the cable company in New York that code and cipher messages may now be accepted for Hungary.

FOREIGN.—Recent intelligence from South Africa, give particulars of additional battles between the British and Zulus. The natives in all cases being defeated and the slain. Lord Chelmsford had succeeded in removing the main force from Eshowe, which place was secured by the Zulus soon after its evacuation.

Dispatches from India state that negotiations continue between the Amerer of Afghanistan and the British commander; and it is hoped they may agree upon terms of settlement without further fighting.

In St. Petersburg, one horse after another is searched at night, and every one whose passport is found regular is arrested; two thousand persons have been arrested within a few days, and assassinations and murders continue to be reported.

The cost of elementary instruction in Prussia amounts to \$3,100,000 annually; the sum being covered by legacies and a half million of marks from property and legacies of the Emperor and Queen from State subscriptions, and the balance from communal grants. Gratuitous instruction is given in seventeen out of the sixty towns in Prussia, which count over 20,000 inhabitants.

The population of Romania is estimated at five and a half millions. The religion is Greek-orthodox. The Jews are numerous, and there are about 14,000 Protestants. In Roumanian males between the ages of 21 and 46, are liable to four years of active military service. The public debt is about five million francs. Roumania exports grain, valued at one hundred and five million francs, and imports cotton goods to the extent valued at fifteen million francs. Agricultural implements and machinery are imported from Germany and France.

The semi-annual report of the foreign commerce and trade of the Empire of Japan, states the imports for that period amounted to about \$15,000,000, and the exports to \$14,000,000. Of specie and bullion there were exported over \$3,000,000, while less than half that sum was imported. On the whole, the report of the foreign commerce of Japan is moderately encouraging. The exports have increased proportionately more than the imports, compared with the previous six month's reports.

San Domingo advises to the 10th ult., say trade is paralyzed by the news of the German import tax on tobacco. Germany is the principal consumer of Domingo tobacco, which being of common quality, cannot stand a heavy tax.

Our Minister to Mexico gives information to the Department of State, of a great surplus of labor of all kinds in Mexico. He discourages in an emphatic manner, the idea that employment can be found here by persons from the United States, either in manual or intellectual pursuits. He describes the distressing condition in Mexico of the students, teachers and clerks especially, find themselves after their fruitless search for situations.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Application may be made to

John W. Biddle, No. 726 Buttonwood St.

Ephraim Smith, No. 1110 Pine St.

Anna S. Edge, No. 459 North Fifth St.

Hannah Evans, No. 322 Union St.

WESTTOWN BOARDING SCHOOL.

A NURSE is wanted for the Boys' Department, to enter on her duties at the beginning of the Summer session. Application may be made to

Susan F. Sharpless, Downingtown, Chester Co., Pa.

Dorrah Roberts, Hadfield, New Jersey.

Elizabeth R. Evans, 322 Union St., Philada.

FRIENDS' ASYLUM FOR THE INSANE.

New Bradford, Twenty-third Ward, Philadelphia.
Physician and Superintendent.—JOHN C. HALL, M.D.
Applications for the admission of patients may be made to the Superintendent, or to any of the Board of Managers.

WESTTOWN BOARDING SCHOOL.

THE SUMMER SESSION of the School will commence on Second-day the 5th of Fifth month.

Pupils who have been regularly entered and who by the cars from Philadelphia, can obtain tickets a depot of the West Chester and Philadelphia Railway corner of Thirty-first and Chestnut streets, by getting their names to the Ticket-agent there, who is furnished with a list of the pupils that purpose. In such a passage, including the stage fare from the Fair Station, will be charged at the School, to be paid with the other incidental charges at the close of term. Tickets can also be obtained of the Treasurer, 304 Arch street. Conveyances will be at the FRIEN BOOK STATION on Second and Third-days, the 5th and 6th of the month, to meet the trains that leave Philadelphia at 7.45 and 8.15 a. m., and arrive at 2.30 p. m.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at latter place, it must be put under the care of H. A. Under & Son, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who prefer can have their baggage sent to their homes, either at the corner of City, by sending word on the day previous (through post-office or otherwise) to H. Alexander & Son, corner of 15th and Market Sts. Their charge in such cases for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. For the same charge they will also collect baggage from the other railroads, and will deliver it at the depot of the Fair Station and Market Sts. Baggage put under their care, if properly marked, will not require any attention from the owners, either at the West Philadelphia depot, or the Street Road Station, but will be forwarded direct to the School. It may not always go on the same train the owner, but it will go on the same day, provided the owner has been in time.

DURING THE SESSION, post-offices, corner of the Street Road Station, on the arrival of first train from the City, every day except First-day and small packages for the pupils, if left at Frien Book Store, No. 304 Arch street, will be forward every Sixth-day at 12 o'clock.

Fourth month 22nd, 1879.

DIED, at her residence in Media, Delaware Co., Pa. on Seventh-day, 12th mo. 14th, 1878, JANE P. JOHNSON, wife of Robert Johnson, in the 71st year of her age, a member of Media Particular and Chester Monthly Meeting. Her friends and relatives have the consoling belief that her soul was peace.

Friend N. J. 4th mo. 19th, 1879, MARY ANN, wife of Isaac Henline, in the 62nd year of her age, a member of Trenton Particular and Chester Monthly Meeting of Friends. "The meek will I guide in judgment, and the meek will He teach I way."

—3rd mo. 29th, 1879, at the residence of his father, near Kennett Square, Chester Co., Pa., ABEL T. DUNN, daughter of Robert and the late Sarah S. Wainwright, in the 22d year of her age, a member of New Garden Particular and Monthly Meeting of Friends. His affectionate disposition and innocent life endeared him to a large circle of relatives and friends, to whom s was a good example in the attendance of her religious meetings, as well as in her daily walk and conversation; giving evidence from time to time of her conviction that her day's work might be done in the day. Near the end of life she spoke with condemnation some departures in her childhood from that which was right in the sight of her Heavenly Father, saying "This has given me the most trouble." Before his close, however, she was favored to experience, through the mediation of her Heavenly Father, a sense of acceptance and reconciliation. In taking leave of the dear life which was done with much calmness and resignation she said to her father that he was the strongest tie, or added, but "I have had the arm of Divine Power support me. I am now going to rest and to my dear mamma." To a beloved cousin, she remarked, "No, I have given up my fighting, and I want you all to be good and look to Him who alone can guide us in our day's work, uttered with almost her latest breath, were "Happy, happy, happy;" and her purified spirit passed away as one falling into sweet sleep. "Blessed are the pure in heart for they shall see God."

at his residence, in Fishing, Ohio, 4th mo. 24th, 1879, ISAAC HENLINE, in the 75th year of her age, a much esteemed member and elder of Fishing Monthly Meeting.

For the Friend.

Letters of James Emlen.

A valued correspondent has sent to us some extracts from letters written by our late dear friend James Emlen, who deceased the 23d of Feb. mo. 1866.

The Friend to whom they were originally addressed, says: "In reading them over lately, I seemed to me some poor tried minds might be comforted and encouraged by them, and that they might also prove a watchword to others. Surely, he was a *nursing father* in the truth."

With this last expression, many still living cordially unite, who have partaken of his counsel and encouragement, or cautionary advice. The remembrance of one such occasion, at this time freshly revives in the mind the writer. An unpleasant duty had been laid upon him, which it was greatly in the press to his own inclinations to perform. James Emlen's mind was dipped into sympathy with him; and he sent or handed him a little scrap of rough paper, on which one or two sentences had been written with a lead-pencil. Though more than thirty years have passed, the gush of tender feeling and heaven-sweetness that accompanied the reading those sentences, is still impressed on the memory.

We have often remembered with instruction his remark to one who was greatly enquiring and often contrited in the reading of the "Friends' Library," which was then being used in monthly numbers. This enjoyment and tenderness of spirit, he intimated, were costly money, "which our Heavenly Father pleased to dispense to the young and inexperienced, to give them a little taste of the good things He has in store for his faithful servants; and to encourage them to enter into service, and labor therein. But after a while, they would find that they would have to work for their wages." His own experience was in accordance with this. For several years after he had yielded up his heart to the government of the Spirit of Christ, he was in remarkably tender condition; but the time came in which other food was dispensed, and he had to learn how to want as well as how to abound.

The extracts from the letters follow:

"4th mo. 8th, 1851, * * * * I have often had reason to think, that the baptisms are needful for almost any important situation in the church of Christ, but especially

for those of minister and elder, most be very similar; and therefore I am not surprised that we should all be prepared for our proper places under the discipline of many doubts and fears and of much carefulness. The effect of these must be, if we do not yield to improper discouragement and distrust, to deepen our foundation, as it is said, 'Dig deep and lay the foundation upon the rock,' for we are made partakers of Christ if we hold fast the beginning of our confidence steadfast unto the end; and although it is permitted and ordained that our salvation should be wrought out 'with fear and trembling,' yet in the end 'the work of righteousness will be peace, and the effect of righteousness quietness and assurance forever.' I hope thou wilt not be unduly discouraged by the doubts and fears and misgivings that have assailed, and possibly may continue to assail. Of one thing I have little doubt, that all who are rightly called into the ministry, will first be instructed to see and to feel that of themselves, they can know and do nothing. This weans from all dependence upon ourselves and prepares the humbled mind to have 'faith in Christ'—that although with the poor contention we can adopt the language 'I am not worthy that thou should come under my roof, neither thought I myself worthy to come unto thee, yet speak the word only, and my servant shall be healed'—a very humble view of himself, but such confidence in Christ as to gain for him the encouraging language, 'I have not found so great faith, no not in Israel.' Therefore however thou mayest be brought to distrust thyself, suffer not this to weaken thy confidence in Him, who, I trust, in his own time will make thy way plain before thee. In reference to the opportunity at J. Newlin's, the language I used was that addressed by Paul to the elders and teachers in his day, 'It is more blessed to give than to receive,' and he quotes it as, 'the words of the Lord Jesus,' Acts xv. 35. I thought at the time I was permitted to partake with thee in a feeling of that sweet peace which is the reward of dedication to apprehended duty—the blessed effects of *giving* even the 'widow's mite.' It seemed as though the little offering savored the precious life, which is more to be prized with but few words, than much expression without this—indeed I can say, I have a very friendly feeling for a brief and lively ministry; and in this view of the subject, no one has any occasion to plead their lack of eloquence and their stammering tongue, for it is not so much the words, how good, or how many, but how lively—feeding the hungry with the true bread, and not with pictures and descriptions and dry doctrines—nay, is it not true that even 'a word, *filthy* spoken, is like apples of gold in pictures of silver'; and I have not any doubt but the time will come when a very few words, with right weight and authority, will be more valued than much eloquence without this. The rehearsal of a text with right au-

thority, may have the effect to gather an assembly unto Christ, the invisible teacher, and to settle them upon Him and upon his teachings, which is all any minister should desire—so that the calling, if rightly understood, is a very simple one, if we are only careful to suppress every desire either to exceed or fall short of what is given us in the life. My impression has long been (though without reference to thy appearances in public) that thou hadst more to contend with from undue discouragement, than from over confidence, and if this is a weak point with thee, no doubt the enemy will avail himself of it, and it require a double watch. It is the altar that sanctifies the gift, and if the heart is really changed, and humility and love felt to abound there, thy offerings, whatever they may be, will no doubt be accepted, and thou wilt be sensible of it by the incomes of peace. If the sanctifying be followed by an increase of solid religious experience, it must be supposed to be of the right kind. If thy religious exercises obtain relief in some other way, thou wilt feel sensible of this also, and will no doubt be content and thankful.

"It has felt to be a serious thing to me to write to thee with so much freedom, on the occasion; but I hope if any part of what I have written seems to be uncalled for, thou wilt not be hurt by it."

The day of Pentecost wrought great changes in the character of the apostles, and manifests the same elements in the hearts of true ministers everywhere. First, it imparted to the apostles a high degree of moral courage. Their timidity was changed to bravery. They no longer fled from persecutors or assailants; but, standing in the temple, proclaimed the power and the glory of the Lord Jesus. They feared neither prisons nor death, though their preaching necessarily aroused the strong antagonism of the Jewish authorities. They proclaimed him to be pure and spotless whom they had crucified as a malefactor. No marvel that the Jewish council said: "Ye intend to bring his blood upon our heads." Reproved, and even scourged, they received the punishment with joy that they were "counted worthy to suffer for the Lord Jesus." Imprisoned for the night, they spake as boldly the next morning, and men were astonished when they saw their heroic firmness in giving their testimony to the truth. It is supposed that all of them but one suffered a violent death for their attachment to Christ. The clear conviction of his divine mission still gives the minister a foundation for his heroism. He hears the voice which said to Abraham: "I am the Almighty God; walk before me, and be thou perfect." The same conviction of duty which sent the patriarch from Mesopotamia to Canaan, which sent the prophets on a holy mission, and inspired the heroes of Israel, works in the heart of the true minister.

For "The Friend"

Turkish Superstitions.

One of the books recently issued in London, is "The People of Turkey," being an account of the customs and character of these people, as seen by "a consul's daughter and wife," who had resided for twenty years among them.

As the superstitions which largely prevail in semi-civilized countries exercise an important influence over the habits and mode of life of the different races residing in the Sultan's dominions, some passages have been selected from the book illustrating this subject:—

"Magic plays a great part in Turkish affairs. Christians and Moslems, Greeks and Bulgarians, Turks and Albanians, implicitly believe in the power possessed by evil-minded persons of casting spells upon their enemies or rivals, and extraordinary means are resorted to with a view to removing the baneful influence.

"Most of the spells east upon persons are aimed at life, beauty, wealth, and the affections. They are much dreaded, and the events connected with this subject that daily occur are often of a fatal character. A Turkish lady, however high her position, invariably attributes to the influence of magic the neglect she experiences from her husband, or the bestowal of his favor on other wives. Every Hanoum I have known would go down to the laundry regularly and rinse with her own hands her husband's clothes after the wash, fearing that if any of her slaves performed this duty she would have the power of casting spells to supplant her in her husband's good graces. Worried and tormented by these fears, she is never allowed the comfort of enjoying in peace that conjugal happiness which mutual confidence alone can give. A *buyu bogheha* (or magic bundle) may at any time be east upon her, cooling her affection for her husband, or turning his love away from her. The blow may come from an envious mother-in-law, a scheming rival, or from the very slaves of whose services the couple stand daily in need. A relative of Sultan Abdul-Medjid assured me that on the death of that gentle and harmless Padishah, no fewer than fifty *buyu boghehas* were found hidden in the recesses of his sofa. All these were east upon the unfortunate sovereign by the beauties who, appreciated for a short time and then superseded by fresh favorites, tried each to perpetuate her dominion over him.

"The *buyu bogheha* is composed of a number of incongruous objects, such as human bones, hair, charcoal, earth, being a portion of the intended victim's garment, &c., tied up in a rag. When it is aimed at the life of a person, it is supposed to represent his heart, and is studded with forty-one needles, intended to act in a direct manner and finally cause his death. Two of these bundles of a less destructive nature were thrown into my house; on another occasion two hedgehogs, also considered instruments of magic and forerunners of evil, were east in. All these dreaded machinations had, however, no other effect on me beyond exciting my curiosity to know their perpetrator; but they occasioned great fear to my native servants, who were continually expecting some fatal calamity to happen in consequence.

"Belief in the evil eye is perhaps more deeply rooted in the mind of the Turk than

in that of any other nation, though Christians, Jews, and even some Franks regard it as a real misfortune. It is supposed to be cast by some envious or malicious person, and sickness, death, and loss of beauty, affection, and wealth are ascribed to it. Often when paying visits of condolence to Turkish harems, I have heard them attribute the loss they have sustained to the *Nazar*. I knew a beautiful girl, who was entirely blinded and disfigured by small-pox, attribute her misfortune to one of her rivals, who, envying in her the charms she did not herself possess, used to look at her with the peculiar *fena guz* (bad expression) so much dreaded by Turkish women. When the misfortune happened the ignorant mother, instead of reproaching herself for her neglect in not having had her daughter vaccinated, lamented her want of foresight in having omitted to supply her with the charms and amulets that would have averted the calamity.

"A lady who had lost a beautiful and valuable ring that had attracted the attention of an envious acquaintance, when relating to me the circumstance with great pathos, attributed her loss solely to the evil eye cast upon it by her friend.

"I knew a lady at Broussa whose eye was so dreaded as to induce her friends to fumigate their houses after she had paid them a visit. She happened to call upon my mother one evening when we were sitting under a splendid weeping willow-tree in the garden. She looked up and observed that she had never seen a finer tree of its kind. My old nurse standing by heard her observation, and no sooner had our visitor departed than she suggested that some garlic should at once be hung upon it or it would surely come to grief. We all naturally ridiculed the idea, but as chance would have it, that very night a storm uprooted the willow. After this catastrophe the old woman took to hanging garlic everywhere, and would have ornamented me with it had I not rebelled.

"Croup is cured by amulets procured from the Hodjas and hung round the neck of the child. Turkish women have often assured me that this remedy is never known to fail, and consequently they resort to no other. Square pieces of paper, bearing written inscriptions, are given for a few paises by learned Hodjas to persons whose dwellings are infested with vermin. These are nailed on the four walls of an apartment, and are believed to have the power of clearing it of its obnoxious tenants. Going into the room of one of my servants one day at Adrianople, I found a cucumber-boat occupying each corner. On inquiring why they were placed there, an old servant answered that, being inconvenienced by the too plentiful visitation of vermin, she had appealed to a person at Kyik, whose magical influence, conveyed in cucumbers, was stated to be infallible in driving the creatures away. I tried to analyse the contents of these receptacles, but finding them a mess composed of charcoal, bones, bits of written paper, hair, &c., I soon desisted, hoping that it would prove more efficacious than it promised.

"The Bulgarian remedy for this pest, although simpler in form, can hardly be more effective. It consists of a few of these insects being caught on the 1st of March, enclosed in a reel, and taken to the butcher, their credentials being coached in the following terms:—Here is flesh, here is blood, for you to deal

with; take them away and give us something better in exchange."

"Another means of getting rid of serpents, venomous insects, and vermin, is made use of by the Bulgarians on the last day of February; it consists in beating copper pans all over houses, calling out at the same time, 'with you, serpents, scorpions, fleas, bugs, flies!' A pan held by a pair of tongs is outside in the courtyard.

(To be continued)

The Strange Assertion.

"I have come to one conclusion," said B. to her son; "I will pray for you no longer."

Let us inquire into the circumstances that gave rise to such strange language.

Dr. B. of Gosport, Hampshire, had a family, mostly sons, who, at the time we wrote of, had grown up to be fine stalwart young and young men. One of these had unfortunately fallen into dissipated habits, and the prodigal son, wasted his substance riotous living. Health, character, temporal interests and spiritual interest, were all sacrificed at the shrine of vice. The admittance of his father and the entreaties of his mother were of no more avail than the call of the Gospel and the prickings of conscience, when him from his evil courses. More than once Dr. B. set out in search of his poor erring boy when missing, to find him in some of the lowest haunts of the neighborhood, revelling in the society of abandoned characters. All the time the sorrowing parents were continually bringing his case in prayer to the throne of grace. But matters grew worse and worse. It was at such a juncture that the above startling expression was used startling because seemingly unnatural for mother—a Christian mother.

For some days previous, a mysterious gloom oppressed her spirit, for the power of prayer concerning her son, was taken away, so that she could no longer supplicate the Lord in his behalf. Reading his doom in that of Elsons, who would not be restrained, because the Lord would slay them, she felt compelled to bow before the secret will of God; though in her apprehension, that will dashed his hopes to the ground. With that awful truth on her mind, "he that, being often reproved, hardeneth his neck, shall suddenly be destroyed, and that without remedy," the distressed mother one day called her son into room apart, and there told him all her heart. After laying before him the disgrace and trouble brought upon the family by his licentiousness, she said that a greater grief to his father and herself was the wickedness of his conduct in the sight of God, who would render to every one according to his works. "You know she went on to say, while her eyes rained tears of sorrow and pity, "how we have remonstrated with you, warned you, advised you, and endeavored to allure you into the paths of rectitude; but you have turned deaf ear to all our persuasions. You know how constantly and earnestly we have prayed for you; but the Lord has not been pleased to grant our petition. And now I have come to one conclusion—I will pray for you no longer!"

"Retract that expression, mother!" exclaimed the son.

"I cannot," was the answer.

"I beseech you, retract that expression!"

"I cannot; I dare not!"

astonishment and exasperation seemed to mark his countenance as, after a pause, he rushed hastily out of the room, violently slamming the door behind him.

Let us leave the afflicted mother for awhile, to follow him up to his own chamber. There flings himself upon the floor, and burying his face in his arms, lies prostrate in deep grief, broken only by occasional mutterings and disjointed sentences of bitter words which pierce and anon escaped involuntarily from his lips, revealing an agony of mental distress. "Most lost!" "Given up by my own mother!" "Mercy, Lord, mercy!" "Alone, about a friend!" "Oh, what blackness of wickedness!" Such were his passionate exclamations. And now he begins to feel that he is alone with God. Laden with sins, the consciousness of the fact fills him with awe. Yet, of the great black cloud that overshadows him, a tiny ray of hope glances and catches the eye of his mind. The character of God, merciful and gracious, as revealed in the Gospel of Christ, comes to his remembrance. But the enormity of his guilt presents itself, and again he is involved in gloom. Still the recollection of that short glimpse of light remains. He has seen whence deliverance must come, if it came at all. On the ground of justice, he is lost; on the ground of mercy none there is hope. But is he not beyond the reach of mercy? How long his rebellion! How willful his obstinacy! how desperate his wickedness! Yet has not the Lord said, "Let the wicked forsake his way, and the unrighteous man his thoughts: and let him return unto the Lord, and He will have mercy upon him: and to our God, for He will abundantly pardon?" And did not the penitent publican obtain mercy? Did not Christ come into the world to save sinners? Cannot His blood cleanse from all unrighteousness?

Thus despair and hope fought together in his soul, making it like the battle ground of contending armies. Just as from a corn of wheat the blade springs up, we know not how, in that heart, from the incorruptible seed of the Word, a hope of salvation grew in strength and confidence, because nourished by the invisible power of the Holy Ghost. Gradually, and yet rapidly, the thick cloud of his transgressions was dispersed by the glad beams of the Sun of Righteousness, which had risen upon his soul with healing in his wings. The gracious invitations of the Gospel, the precious promises of God to returning backsliders, Christ's declarations of his willingness to receive and ability to save every coming sinner, kept falling upon his mind from above, like rain upon the parched ground, until he could no longer doubt, and his spirit rejoiced in God his Saviour. The "garment of praise was given to him for the spirit of heaviness, and the oil of joy for mourning," and his heart language was, "Into Thine hands, O Lord, I commit my spirit: Thou hast redeemed me, O Lord God of truth."

When his mother received from him the assurance that "God has shown me my wickedness and folly, and He has shown me Jesus Christ as my Saviour," she (like the disciples, when assured of the resurrection of Jesus) believed not for joy. The penitent proceeded to confess, in broken language, his deep sorrow for the iniquity of his past conduct, to beg her forgiveness, and to express his trust that the gracious God who had removed his transgressions as far as the east is from the

west, would also keep him in future from the dominion of sin.

Now she began to realize the joyful fact, which at first she could scarcely allow herself to believe, that the wanderer was brought back into the fold of Christ—the lost was found—and both mother and son wept together tears of gratitude and joy.

The restored wanderer lived only a few years on earth after being, by the Good Shepherd, thus plucked from the detouring jaws of that roaring lion, the arch enemy of souls; and having finished his testimony below, was taken home to glorify the God of grace eternally.

Reader, have you been saved by the washing of regeneration? Whether your outward conduct has been moral or immoral in the eyes of fellow-creatures, there is an absolute necessity of being born again of the Spirit, before you can enter into the kingdom of heaven. "Verily," saith the Lord Christ, "ye must be born again." If still in a state of nature, you are in the kingdom of darkness—the kingdom of Satan. May the Father of mercies translate you into the kingdom of His dear Son—the kingdom of His marvellous light—and work in you by His Spirit a heart abhorrence of sin, and a heart-trust in the Lord Jesus Christ, the only Saviour from sin! "Blessed are all they that put their trust in Him." "Look unto Me," He says, "and be ye saved;"—"O Israel, He hath destroyed thyself; but in Me is thine help."

Little did the mother imagine, when her mind was brought to such a crisis that she could no longer pray for her erring son, that the time was coming for her to praise the Lord on his behalf. She looked for judgment, and beheld mercy! "Blessed be the Lord God, the God of Israel, who only doeth wondrous things." And in this marvellous conversion, how strikingly was the truth verified: "Salvation is of the Lord!" When it was abundantly manifested that no human arm could deliver, then His own arm brought salvation, and His omnipotent grace made the rebel into a child. Ascribe, then, "salvation to our God that sitteth upon the throne, and unto the Lamb."—*Abridged from Ep. Recorder.*

The Pale-faced Abstainers.—Dr. Richardson says: "Under the action of alcohol the resistance to the current of blood through the vessels is diminished. This is indicated in the flush of countenance that is caused by wine in those who are unaccustomed to its use, in the flush which is permanently seated on the faces of so many who indulge in something more than its moderate use, in the purple uniform of features which is worn by so many of what are called the hard drinkers of society. We see in all these the external sign of that diminished resistance in the blood vessels to the entrance of blood which alcohol induces in different degrees.

"Those who laugh at abstainers for being pale would be warranted in laughing if it were the fact that the red face they so much admire was a face indicative of health, and the pale face indicative of disease. Unfortunately for their side of the case, that suffused face, that jolly red face, that dark red face is the face of disease, while the pale face is the face as Nature meant it to be. Unfortunately, also, for the laughers, is the fact that the red face is not simply skin deep, and confined to the face. The same redness extends to other

and more vital surfaces. The surfaces of the brain and of the other vital organs are congested in like manner, according to the degree of injury that has been inflicted on the blood vessels by the paralyzing drug that is accredited with so much usefulness.

"There is an immense population living from day to day in this semi-paralyzed condition of the circulation. They are already, in the midst of their laughter, half wrecked. They are easily overbalanced by slight causes, and they almost inevitably fall prematurely into death if they continue in their course. Sometimes, they fall from failure of the heart; sometimes, under a little extra excitement, a vessel gives way in the brain, and they become partially paralyzed, if they do not succumb immediately. Sometimes they get organic kidney or liver disease, or consumption of the lungs. Physically, the condition of the whole of the members of this great population is very bad."

Selected.

On the Resurrection of Jesus Christ.

BY OLINTHUS GREGORY.

(Continued from page 298.)

Thus much may suffice to establish the truth of the momentous fact of the Resurrection of Jesus Christ from the dead. From this outline of arguments, for it is indeed nothing more than an outline, you will perceive that the evidence in favor of this event is both forcible and satisfactory. To believe it, then, is reasonable; and it is freed from absurdity, because resurrection from the dead is manifestly as much within the power of God as creation; and every consistent theist admits the latter. But the adoption of a contrary opinion is pregnant with absurdities and natural impossibilities; with the mention of a few of which I shall close this letter.

He, who denies the resurrection of Jesus Christ, must believe,—That twelve poor fishermen and tentmakers, without power, and (all except Paul) without human learning, were able to deceive the wise, the learned, the prudent; and to lay their plot so deep, that neither their cotemporaries, nor any succeeding generation, should be able to detect and expose the cheat.

—That those very persons who but a few hours before were trembling with timidity and fear, whose want of courage (even according to their own account) overcame their fidelity, and caused them to forsake their master in his greatest extremity, notwithstanding their various professions, nay, protestations, of inviolable attachment and zeal; being so terrified with apprehensions that they dare not acknowledge themselves to be his disciples, but secreted themselves by day for fear of the Jews;—yet that these timid, irresolute, creatures should all at once not only form the plan, but execute the bold, hazardous, and useless undertaking of conquering the guards, forcing the sepulchre, and carrying off the body of their crucified Lord.

—That men thus rash and desperate, engaged in an enterprise of so much danger, an enterprise which therefore required all possible expedition and despatch, should waste time in unaccountable niceties and ceremonies (such as divesting the body of its burial-clothes, disposing them in separate parcels, &c.) which could be of no manner of use; but evidently exposed them to the danger of being surprised by the guards, and taken into custody.

—That these timid, yet desperate men, who constituted a company of the greatest impostors that ever existed in the world, and who, therefore, must necessarily be the worst men that ever were, did, notwithstanding, furnish mankind with the most comprehensive and exact system of morality extant, teach such rules of living as were infinitely superior to any of the productions of Greek or Roman philosophers, and though their whole business was only to promote and disseminate falsehood and deception, yet denounced the severest eternal punishments upon all who indulged in such wicked practices.

—That these impostors, having themselves no correct notions of God, should notwithstanding impart the most rational and becoming opinions respecting him to the rest of mankind; and, by no other principles than those of delusion and irreligion, kindle a flame of desire in the breasts of thousands to serve and worship God.

—That they took far more pains to expose themselves to all the world, as the most abandoned sinners that ever came into it (for that they should deceive themselves so as to believe Jesus was seen ten distinct times after his resurrection, when he was not seen at all, can not be imagined,) than they need have done to have established the best reputation among their contemporaries, and have procured an immortal fame in all succeeding ages.

—That these impostors, after spending their lives in promulgating falsehood, died, not to testify their belief in a speculative doctrine respecting which they might be deluded by others, or self-deluded; but in attestation of a pretended fact, while they knew it was no fact; and all this under the strongest declarations of devotedness to God, and of adoration to their risen Saviour, who, they pretended, was now sitting in heaven to receive them.

Hence you will perceive that, as a general denial of revelation leads to numerous gross absurdities of which a few were detailed in my first letter, so a denial of individual topics of revealed truth brings each its appropriate and dependent string of difficulties. He who denies the truth of Scripture prophecy must admit that things have occurred, although there was an infinitely great probability against their occurrence. He, who disbelieves the miracles recorded in Scripture must believe in other miracles. And he, who denies the particular miracle of the resurrection of Jesus Christ, in consequence involves himself in the particular class of absurdities to which I have just adverted: besides which he voluntarily excludes himself from the only strong consolation a rational creature can possess at the hour of death, that which flows from a full persuasion of the resurrection to eternal life. "I am the Resurrection and the Life," said Jesus Christ: "whosoever believeth in me shall not die eternally." and his own resurrection fully establishes the truth of this consolatory declaration. But the proud philosopher who rejects this doctrine, so suited to the wishes and the wants of man, not only places himself below the Christian, but below the Indian, in point of prospects of futurity. The poor untortured, despised Indian,

"Thinks, admitted to that equal sky,
His faithful God shall bear him company."

While many of those who pity the stupidity of the Indian, and sneer at the credulity of the Christian, live and die under the embasing

conviction that at death themselves and their dogs will be alike extinct, alike free from responsibility, alike unconscious of all around them, alike excluded from pleasure, alike liberated from pain!

[Among the earlier poems of Henry W. Longfellow, is one entitled "The Village Blacksmith," whose smithy stood "Under a spreading chestnut-tree." The children of Cambridge presented the poet with an arm-chair made from the wood of "The village blacksmith's chestnut-tree," on the occasion of his 72nd birth-day, which occurred on the 27th of the Second month in the present year.

The poet responded to the gift in the following pleasant lines, addressed "To the children of Cambridge.]"

FROM MY ARM CHAIR.

Am I a king, that I should call my own
This splendid ebony throne?
Or by what reason, or what right divine,
Can I proclaim it mine?

Only, perhaps, by right divine of song
It may to me belong.
Only because the spreading chestnut tree
Of old was sung by me.

Well I remember it in all its prime,
When in the summer time
The affluent foliage of its branches made
A cavern of oak shade.

There by the blacksmith's forge, beside the street,
Its blossoms white and sweet
Enticed the bees, until it seemed alive
And murmured like a hive.

And when the winds of autumn, with a shout,
Tossed its great arms about,
The shining chestnuts, bursting from the sheath,
Dropped to the ground beneath.

And now some fragments of its branches bare
Shaped as a stately chair,
Have by my hearstool found a home at last,
And whisper of the Past.

The Danish king could not in all his pride
Repel the ocean tide,
But seated in this chair I can in rhyme
Roll back the tide of time.

I see again, as one in vision sees,
The blossoms and the bees,
And hear the children's voices shout and call,
And the brown chestnuts fall.

I see the smithy with its fires aglow,
I hear the bellows blow,
And the shrill hammers on the anvil beat
The iron whet with heat!

And thus, dear children, have ye made for me
This day a jubilee;
And to my more than three score years and ten
Brought back my youth again.

The heart hath its own memory, like the mind,
And in it are enshrined
The precious keepsakes, into which are wrought
The giver's loving thought.

Only your love and your remembrance could
Give life to this dead wood,
And make these branches, leafless now so long,
Blossom again in song.

The original poem is subjoined:—

THE VILLAGE BLACKSMITH.

Under a spreading chestnut-tree
The village smithy stands;
The smith, a mighty man is he,
With large and sinewy hands;
And the muscles of his brawny arms
Are strong as iron bands.

His hair is crisp, and black, and long,
His face is like the tan;
His brow is wet with honest sweat,
He earns what'er he can,
And looks the whole world in the face,
For he owes not any man.

Week in, week out, from morn till night,
You can hear his bellows blow;
You can hear him swing his heavy sledge,
With measured beat and slow,
Like a sexton ringing the village-bell,
When the evening sun is low.

And children coming home from school
Look in at the open door;
They love to see the flames fast forge,
And hear the bellows roar,
And catch the burning sparks that fly
Like chaff from a threshing floor.

Toiling,—rejoicing,—sorrowing,
O'er all through life he goes;
Each morning sees some task begin,
Each evening sees it close;
Something attempted, something done,
Has earned a night's repose.

Thanks, thanks to thee, my worthy friend,
For the lesson thou hast taught!
Thus at the flaming forge of life
Our fortunes must be wrought;
Thus on its sounding anvil shaped
Each burning deed and thought!

This is my testimony, that none can receive the joy of God's salvation, enter into the Sabbath rest, or keep holy-day to the Lord further than they know a ceasing and be saved from thinking their own thoughts, following their own wills, and obeying their own wisdom; for the selfish thoughts that arise within are the root of evil, and as the foundation of the kingdom of darkness; and the light of this day of salvation, is as the axe laid to the root of the evil tree.

So it is a blessed thing for people to meet and wait together, and walk in this heavenly light and day of salvation, which discovers and judgeth every vain thought and foolish imagination, subdueth them, and bringeth them down into the obedience of Christ. This, as they walk and abide, they truly differ from all other families of the earth; for in this heavenly gospel light, which judgeth every appearance of evil, stands the true fellowship and true unity. As they walk therein and dwell there-in, the power of death an hell shall never break them, but they shall remain as Mount Zion, which can never be removed. In this stands their happiness and safety. Out of this, they are as weak as other people.—William Sheeven.

Some of the men of largest brain, of most varied talents, of the richest intellectual acquisitions, and of the grandest opportunities of the present generation, have utterly failed to do a great life work, and to secure a permanent place in history, through their lack of absorbing convictions. They may have shown themselves familiar with law and diplomacy and literature; they may have held high office, and been much sought as counselors; they may have been on the right side of the main questions of the day, and never suspected of lacking personal integrity, of being dishonest and corrupt; yet because they were never identified heart and soul with any greater truth, were never so full of conviction on either side of any moral issue that it possessed, and inspired them to the uttermost, they lived and died without being aroused to their fullest energy, without even undertaking the best work for which they were otherwise capable. And on the other hand there are examples before us of men who have wrought wonders, and themselves been wonders, through the overwhelming power of their supreme convictions.—S. S. Times.

"For The Friend."

Friends' Library.

It is well known that the shelves of our libraries generally are largely occupied with works of fiction and light literature, much of it highly pernicious in character; the result of which, when habitually indulged in, tends to destroy the taste for solid and instructive reading, and leads to an enervation of the mental faculties, calculated greatly to unfit for the sober realities of life. It is believed that if the attention of parents could be seriously turned to the subject, they would more generally appreciate the importance of a library that may be frequented by their children without danger from the contaminating influences that may surround them in public reading rooms.

The number of volumes in the Library 1st. 29th, 1879, was 7775, an increase of 469 volumes since 1st mo. 30th, 1875; of these have been donated, the balance purchased. The average yearly increase of the Library has been 115 volumes.

The number of books loaned during the year 1878 was 2512, against 2552 loaned in '75. The average number loaned yearly during the past four years has been 2498. These figures indicate a steady use of the Library about the same number of readers for the last four years.

The annual income arising from the funds held by the Committee for the use of the Library has been about \$310—in addition to which the Committee has received \$60 yearly from the Monthly Meetings, making the total annual receipts about \$370. The principal expenses (outside of books and binding), are the salary of librarian \$180, and the annual cost of fire insurance, about \$45. The average expenditure for books and binding has been about \$206.

The Library room continues to be open for the distribution of books on Fourth and seventh day afternoons, and on Fifth day mornings for a half hour prior to the time of holding Arch Street Meeting. The Committee have endeavored to be careful to place the shelves, only such works as would be proved by the careful judgment of Friends, and believe they have given to the readers a fair proportion of what is valuable in the literature of the day. In addition to the purchases of the Committee, valuable books have been added to the collection by the liberality of some interested Friends who have donated them.

The Library is believed to embrace the most valuable collection of Friends' writings in this country; many of the works having been out of print, and some are probably inaccessible elsewhere. We have occasionally been able to increase the number of volumes of this character, as opportunities have presented of procuring them; our purchasing committee have authority to secure any of the approved writings of Friends that are not already on the shelves.

The collection of general literature embraces such a selection of interesting and instructive works, as should make the Library attractive to our members; and we believe that if its advantages were better known among Friends of this city, its usefulness could be greatly augmented.

The number of volumes having increased so as to render additional shelf room necessary, the Committee have had a neat case,

with glass doors, placed in the room just above our present quarters; in this case have been placed such books as are seldom called for.

American Goods in England.

A "Travelled Englishman" writes to the *London Standard* in the following manner as to the intrusion of American goods on the British markets:

How is it, I want to know, that my wife's maid, when she went at Aix les Bains, at Homburg, and at Florence, to buy calico, found in shops where two years ago nothing but English goods were kept, that the calico or cotton in stock was of American manufacture? I am not a judge of this article myself, and I really do not pretend to know whether the American goods are better or worse than those formerly supplied from the English markets. What I do know is that in this, one of our own staple manufactures, we appear to have been fairly beaten out of the field upon the Continent, and that in each case the shopkeeper, when applied to for an explanation, declared that he preferred American to English materials because he got a larger profit upon the former than upon the latter.

How is it, again, that here in England, if I want tools for my garden or my workshop I am constantly being invited by my ironmonger to try new American "notions" in the shape of spades and hammers and saws and chisels and axes? Some months ago I read a letter of—Gladstone's upon a subject on which his authority can hardly be contested. In it he gave his opinion upon the common American woodman's axe, and described—I happen to know quite accurately—the difference between it and the English article manufactured at Sheffield. The comparison, I need hardly say, was all in favor of the Yankee production. Sheffield is too conservative—in its manufactures, I mean, not in its politics—to make an axe of the best shape. So the sharp American comes in and wins. And he does this not merely in axes and in the other tools I have mentioned, but in locks, bolts, stoves, lamps and a thousand-and-one other household requisites which a dozen years ago were the peculiar production of this country. You have only indeed to cast your eye over your own household, in order to see to how large an extent the English manufacturer has been beaten, even in articles of domestic use. Nor is it in the hardware trade only that we seem now to be getting flooded with American goods. American leather comes here to be made up into shoes; and our famous English carriages are, to a large extent, built out of materials which have crossed the Atlantic, and for which the American has been duly paid. "Glue, hair and sand paper," are mentioned in a recent copy of the *Pennsylvania Ledger* as being now among articles largely exported to this country; and even slates—shales of the Welsh magnates!—are now quarried in the United States in order to roof in our English homes.

Can any of your readers tell me how all this is brought about? And is not the fact alone sufficient to account in a large measure for the present depression in our manufacturing industries? I do not grumble because, if I want tomato sauce with my cutlets at this season, it is probably made out of American fruit; nor can I complain because my grocer,

my butterman, and probably my butcher also, deals so largely in American goods of all kinds, for I freely admit that as a source of food supply the United States is naturally infinitely superior to our limited and overpopulated country. But what I want to know is why, in the special manufactures which were once entirely ours and which only a few years ago belonged to us more largely than to any other country in the world, we now seem to be running a bad second to the United States. Why, sir, even the cigarettes which I smoke are made in Richmond, Va., and the pen with which I write comes, not from Birmingham, but from an American manufactory.

"For The Friend."

Some Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 300.)

1844. 21st of 4th mo. Since my return, I think I may say for the most part of the time, I have been wonderfully favored with true peace of mind. * * * * *

28th of 4th mo. I think it is my desire, the week now commencing may be spent as comfortably as the one just ended.

5th mo. 5th. The favors of the past week have been more than I have words to express. Oh! that I was sufficiently humble, and a (more) grateful receiver of the many mercies bestowed upon me.

5th mo. 12th. The last week was spent in a good degree comfortably; thanks to the Great Giver of all good for His unmerited mercies to me a poor, unworthy sinner.

15th. Returned from Great Valley, although I felt much weakness. He who has ever been the helper of His people, in mercy made way for me and strengthened and enabled me to (do my duty) and return with peace.

26th mo. 2nd. I have been favored to feel that of my own righteousness (that which is of the creature), is as filthy rags, but that which is of Christ our blessed Saviour, is pure, and administers peace and consolation. The weakness that I have at times felt was humbling and I trust profitable. I have in unmerited mercy felt that which can raise the drooping spirit and qualify for the service required. May the eye of my mind be kept single, and my whole dependence be upon Providence.

6th mo. 4th. Yesterday in going up the river I had an evidence of considerable improvement in (the) habits of industry among the natives, which was gratifying; may their greatest improvement be in spiritual things, and experience a living concern to lay up treasure in heaven.

6th mo. 17th. The last week I have experienced considerable weakness, and I feel bound to acknowledge, that when I feel humbled under a sense thereof, things seem to prosper best, furnishing a renewed evidence that it is not dependent upon our own natural abilities, nor the great performances of the creature to promote the glory of our Heavenly Father. I believe the example of a good Christian is more powerful to convince others of the excellency of the Christian religion, than all the arguments of the worldly wise. May I ever be willing to be anything or nothing, as it may please the Blessed Master, and make a proper use of my time and talents in His service, and (may) all the glory

be to Him, who is forever worthy, with the Son of His bosom. Notwithstanding my weakness, I have at times been much favored in conversation with some of the Indians.

6th mo. 19th. Some days (since) in going up the river I met with an Indian who is a deacon in the Presbyterian society; he said he wished to ask me some questions. After talking with him for some time, I inquired of him "how he got along in regard to religion?" He said, when he read the scriptures at home he had no doubts, but when at meeting hearing preaching, he had doubts; said he had heard preached, "that if a child died without being baptized it went to punishment;" this he did not believe. I endeavored to explain to him Friends' views in relation to water baptism and some other things, with which he expressed satisfaction, and said it was according to scripture. May the spiritual eye of these poor people be anointed with the eye salve of the kingdom, that they may have a saving knowledge of Him who is the only true God, and Jesus Christ whom He has sent.

7th mo. 21st. I have great reason to be truly thankful for the long suffering and great loving kindness of my Divine Master to me a poor sinner. May I be more given up to serve Him in all things that He may be pleased to require of me and in His own blessed way. I have this day been refreshed and comforted in feeling. Love to God! how sweet, how comforting is the feeling. In my sitting (which was alone), I was strengthened; may I ever remember (that) the sacrifice, which is due unto Him, is the whole heart, and may I offer mine freely without reserve. Such as make this sacrifice, I believe are favored at times to feel their peace to flow as a river, and their righteousness as the waves of the sea.

8th mo. 20th. I have again in unmerited mercy been in some degree favored with a sense of my situation. Oh! the corruption of the human heart, and our proneness to forget Him who is the Great Giver of all good, so as to be indifferent about knowing daily that we are in our proper places, serving Him faithfully in the way that would be most pleasing unto Him; our greatest happiness is dependent upon it. I think I may say, I have been aroused, comforted and encouraged; what a favor it is that He continues to visit us in His loving kindness—accompanied by judgments in order to keep us near unto Himself, who is worthy to be obeyed in all things, honored and praised.

25th. Although (during) the past week I have met with trials, I have been much favored, and at times comforted. In our meeting to-day my mind for the most part was preserved in the quiet and strengthened. May I be thankful for it. I had the company of Asa Jones, Emily Plagg and Ariel Willman.

9th mo. 8th. Through the unmerited mercy of the Great Head of the Church I have been spared to enter upon my forty-second year. May this year of my life be spent more consistent with the will of my Divine Master than those that are past. What I desire, I feel sensible cannot be effected in the wisdom and strength of the creature, but by an entire surrender unto Him, who is the life, light and strength of His people.

10th mo. 10th. I may again record the mercy and goodness of the Lord to me a poor unworthy sinner. Oh! for a greater, yea, an entire surrender of my own unregenerate

will, and an unflinching faithfulness in the discharge of all the duties which my Master is pleased to require. I think I have been much preserved in assisting the Indians in their late difficulty with some men who came on to divide this reservation, I suppose for the Ogden Company. The day the chiefs held their council, I was favored to feel composure of mind, and after they had got through, to express my views to the surveyor in relation to the discussion of the chiefs, and their tried situation on account of the way they had been treated by the Ogden Company. The next morning I left for Buffalo, in pursuit of the last treaty and other information in relation to the proceedings of the surveyors. On getting to Buffalo, I called first to see Thos. C. Love, who had been appointed an arbitrator to act on behalf of the Indians. He treated me kindly, and gave me all the information that I seemed to require. I think it likely he was the only person in the place who could have given me the information that appeared necessary; it was of such (a nature) as I think would be likely to put some of the Indians' anxieties and troubles to rest. I think I can say, I felt in a degree thankful that I had been so much favored in getting along with the business, and could turn my face toward home with consoling news to the poor Indians.

11th mo. 7th. Spent part of the forenoon in drawing boards from the mill down to M. Snow's new house. After dinner took a walk up to the mill dam, then through the woods to a part of the farm where I had not before been; it was truly a comfortable time and worthy to be remembered.

11th mo. 27th. I cannot but look back with a degree of sorrow, thinking my heart has not been enough given up to serve a kind and merciful God. Great has been the long-suffering and infinite mercy of the Lord to me, a poor sinner. He has from time to time made way for me where there appeared no way.

(To be continued.)

Church Sleepers in Ye Olden Time.—A journal kept by one Obadiah Turner, in Lynn, Mass., and bearing date "1646, June ye 3d," describes the "method" of a special officer in a church of which Samuel Whiting was pastor:

Allen Brydges bath bin chose to wake ye sleepers in meeting, and being much proud of his place must need have a fox tail fixed to ye end of a long staff, wherewith he may brush the faces of them yt will have naps in time of discourse; likewise a sharp thorne wherewith he may prick such as may be moste sounde. On ye last Lord his day, as he strutted about ye meeting house he did spy — Tomlins sleeping with much comforte, his head kept steadie by being in ye corner and his hand grasping ye rail. And so spying, Allen did quicklie thrust his staff behind Dame Balloud and give him a grievous prick upon ye hand. Whereupon — Tomlins did spring upp much above ye floor, and with terrible force strike his hand against ye wall, and also, to ye great wonder of all, prophesie exclaim, in a loud voice, "Cuss the wood-huck," he dreaming, as it seemed, yt a wood-huck had seized and bit his hand. But on coming to know where he was, and ye great scandall he had committed, he seemed much abashed, but did not speake. And I

think he will not soon againe go to sleep meeting. Ye women may sometimes sleepe and none know it by reason of their enorm bonnets. — Whiting doth pleasantlie say from yt pulpit he doth seem to be preach to stacks of straw, with men joting here there among them.—*Christian Advocate.*

Different Effects of Prosperity.

It would be a curious and instructive investigation that should bring to light just how far the comforts and pleasures which are earnestly desired and sought for really answer their expected ends and where they result in failure and disappointment. That there such a limit is very evident. That money well earned and well spent, brings real happiness to many people, is undeniable. The gradual ascent of a family from poverty to substantial comfort is accompanied by a keener sense of enjoyment, and the gloomiest ascension can hardly close his eyes to the positive satisfaction and innocent gladness which emanate from the temporal benefits which he professes to despise.

On the other hand, it is no less manifest that wealth, with its accompanying social system, is often a source of care, anxiety, weariness and disappointment. The things that have been ardently wished for, when obtained, brought perplexity and suffering. The painful cravings, instead of being allayed by possession, have simply changed their base, and are felt with even greater intensity for further luxuries. Frequently the most bitter complaints fall from the lips of those who have all that money can bestow. The capitalist is harassed by the fear of unsafe investments, is overworked by the constant attention his affairs demand, is vexed with the importunities of those who would prey upon him. The woman of fashion, with the amplest means at her command, is wearied with the constant round of ceremonious forms which her position demands, is burdened with the cares of an expensive household, and wearied by the constant shortcomings of a retinue of servants. Thus, much of the life of wealth and fashion that is so greatly longed for, passed, "not in being happy, but in playing at being happy."

How is it that the same cause can produce such dissimilar results? Clearly it is not the amount of gain that draws the line, for we find discontent in every grade, while some of our wealthiest citizens are undoubtedly among the happiest. It is rather traceable to certain principles of human nature which can never be averted, but which prosperity inclines us to overlook. One of these is the full exercise of the faculties is necessary to happiness. Those who regard labor only as a means of gain are naturally disposed to lay it down as soon as the end is fulfilled. They have striven hard to become rich, which should they continue to strive afterwards. Thus a large part of the nature remains inactive, and the happiness of life is to that extent diminished. The efforts that are put forth in the pursuit of pleasure will not answer this end. The appetite palls, and leave us still unsatisfied. Pleasure, to preserve its zest, must be ministered to only occasionally, and must be in strong contrast to the major part of life. Like food, it cloy and disgust unless the proper intervals of abstinence have been observed.

Beside this, happiness requires a sense of

personal value. Hardly anything is more essential to the true enjoyment of life. He who is forever chasing pleasure, and seeking his own interest, must forego the satisfactions which come from worthy achievement. Though he labor hard in the search, though he succeed in each endeavor, he has no significance in the world; he has done it no service, given it no lustre, and when he departs will leave no trace behind. Unless a man goes for something out of himself, unless he receives that such a life alone is honorable, and that it is really disgraceful to produce no more than he consumes, and to pursue pleasure as an end, he must forever forfeit the highest and only permanent happiness that he has to offer.

It is not, then, the effect of prosperity, as such, to produce discontent, weariness and unhappiness. It is the spirit which sets up prosperity as the one aim of life, which recognizes nothing higher, nothing nobler, nothing better—which sees no other use in labor, no better employment of the faculties, no grander outlook of the soul. It is this spirit which will always turn comforts into discomforts, pleasure into weariness, delight into pain, opportunities for good into instruments of evil. On the other hand, he who regards pecuniary success as a means to some higher end, who values labor for its developing power, as well as for its immediate gain, who learns to enjoy at another's expense, or to be mere consumer of other's produce, who pursues to make his life worthy and valuable to the world, and his influence a blessing to those around him, will reap, from whatever prosperity may fall to his share, the true and permanent happiness that is its rightful result.—*Editor.*

For "The Friend"

A Thought on the Resurrection.

In 7th month, 1876, the writer was on the grand jury for Philadelphia county, and during a recess asked the following question of number of them. The soldiers who were at to watch the tomb of Christ, reported that his body was stolen away *whilst they slept*. Now, as jurymen, if those soldiers were to appear before you and give such testimony, could you believe their testimony, as to facts *that took place while they were asleep*? The verdict was, No; we would ignore the bill!—*C.*

Natural History, Science, &c.

Flying Squirrel and Flying Lizard of *Borneo*.—Sitting in the verandah about sunset, I had an opportunity of observing the habits of the flying squirrel (*Galeopithecus*), the *Kubong* of the Malays. The animal came streaming through the air from a distant clump of trees, its flank membranes extended, and its long tail stretched out behind, and with a graceful billowing motion at length arrived at a tall tree trunk which had been left in the midst of the cleared jungle, on the lower part of which it alighted. The animal then began to ascend the trunk in a spiral direction, running a little way at a time, and then stopping. Having reached the branches, it selected one, along which it crept until it had reached the extremity, when it suddenly leaped itself into the air, and glided away on outstretched wings, in the direction of another tall tree about 150 yards distant, gradually descending as it proceeded, and finally alighting upon the

lower third of the trunk. Again it crept up to the branches, and again it cast itself off—making this time for a more distant tree, when it was lost to view in the jungle. At the same moment, another *Galeopithecus* arrived at the first-mentioned tree, which, standing alone, offered a good mark, and a convenient resting-place for these singular animals. This one repeated the same process, only going in the opposite direction. Every evening at the same hour these animals, probably the same individuals, might be seen making use of the same trees in their flight, so that it was easy to say when they had alighted anywhere, what would be their next flight. Having reached the highest part of the tree, they sailed steadily away to the next with grace and swiftness, in a gradually falling line, with no apparent movement of their flank-membranes, but with the evident power of accurately guiding their flight to the next stage in their progress, which may thus be described as a vertical zig-zag. The skins of these animals are much valued, and they are very abundant in many places. Coal Point, in Labuan, is called by the Malays *Tanjong Kubong*, or the Cape of Flying Squirrels, from the number of them which formerly existed there; but since the cutting down of the jungle in the progress of the works, they have very materially diminished in numbers.

Near the same spot, in the heat of the day, I saw the little flying lizard (*Draco volans*) alight upon a tree by the road-side. It flew quickly along, and straight, like a bird, without any butterfly like fluttering, and suddenly settled upon the bark just as a Creeper (*Certhia*) would do, for which at the first moment I mistook it. Then it ran a little way up the trunk in a spiral direction, and presently stopped to look at me. I approached in order to watch it, when the little creature stood still, and twisting its head completely round, regarded me with a stare, while its little conical pouch, which hung flaccid beneath the throat, was from time to time momentarily distended, assuming a semi-conic form, pointing forward in a menacing manner, and then falling again. I clapped my hands, and tried to make it fly, that I might observe its movements, but it remained looking at me imperturbably; and although I threw sticks and stones up, it only ran a little higher up, and then stopped and watched me again. The heat was so intense, that I was fain to go on my way—and none too soon—for I found afterwards, to my cost, that I was at that moment qualifying myself for an attack of fever. I saw the little *Draco* again in the interior, and afterwards in the neighborhood of Singapore.—*Collingwood's Naturalist's Rambles.*

While a travelling menagerie was recently holding its exhibitions for a few days at Le Mans, France, a lion escaped from its cage through the negligence of an attendant. The animal paced up and down the tent quietly, but naturally excited great alarm. The proprietor of the collection had a luminous idea of satisfying the appetite of the king of beasts to prevent him from doing any mischief, and accordingly threw to his majesty an abundant supply of raw meat. The plan succeeded admirably, for the lion, after gorging himself with an unusually ample meal, walked quietly back into his cage and went to sleep. Of course, he was at once effectually

secured, but as soon as the occurrence became known the municipal authorities ordered the menagerie to be removed from the town without delay.

W. H. Preece, of the Postal Telegraph Department, a high authority on practical telegraphy, in a lecture last night before the Society of Arts, said there were 10,000 miles of underground wires in Great Britain, but the known facts which tell against the extension of the underground line are: there is an increase of three or four times their cost; their capacity for carrying currents is reduced three or four times; the gutta percha coating is attacked not only by rats and mice, but very largely by an insect called the *Peupletoria crustallia*, and is also influenced by a fungus.

The Empress of Brazil has presented Queen Victoria with a dress woven from the webs of South American Spiders.

Pennsylvania Forest Fires.—Destructive forest fires are raging in the northern and western end of Pike county and northwestern part of Monroe county, Pennsylvania, and a large amount of damage will result. Fires in these counties occur almost every spring, and are caused generally by the carelessness of hunters or fishermen who camp in the forests at night and leave their camp-fires smouldering in the morning. In the spring of 1877 this entire region was visited by the most destructive fires ever known, and thousands of acres of the most valuable timberland in Northern Pennsylvania were burned over and the timber destroyed. Many buildings situated in the remote districts were swept away. Thus far the fires are confined principally to the townships of Lohman, Delaware, Dingman and Shohola, Pike county. The inhabitants continue to battle with the flames, both night and day, but thus far they have made little progress, and only a heavy rain will stop the spread. Forest fires at this season of the year not only destroy thousands of dollars worth of valuable timber and other property, but the eggs of pheasants and other birds, for which this region is noted, are also destroyed.

THE FRIEND.

FIFTH MONTH 10, 1879.

The accounts which reach us from Great Britain indicate that there is much and widespread suffering in that country from a general depression of business, similar to that through which our own country has been passing for some years.

Recognizing, as we do, that all mankind are the children of one common Father, and that in proportion as we are imbued with His Spirit, we will rejoice with those that rejoice in the right sense of the word, and weep with those that weep, the world over, we cannot but feel a sense of sadness and depression at the trials and sufferings of our fellow-men, even though separated from us by an intervening ocean. Depression of business and reduction of wages or loss of work, have a fearful significance to the many thousands whose previous earnings were barely sufficient to supply the food, clothing and shelter necessary for existence.

There have been frequent references in the newspapers of latter times, to the extent to

which articles of American manufacture, as well as the products of our soil, have entered into competition with English goods in the markets of the world, and in some measure have supplanted them. We naturally feel a warm interest in the growth and prosperity of our own country; and we believe it is in the ordering of Divine Wisdom, that a healthful competition should exist, which tends to the general benefit of mankind, by developing in every section those industries to which the character of the people and their surrounding circumstances are best adapted. But it is very desirable that we should be so elevated above merely local feeling, as to regard all nations as members of the same great family, and to have an interest in the prosperity and happiness of all.

The wide extension of commerce, the exchange of commodities from all parts of the earth, and the facilities for rapid intercourse and interchange of thought by modern improvements, all tend to unite the inhabitants of the world together, and to make us feel our mutual dependence. We are gradually learning, that if one member of the world's household suffers, the others suffer with it.

These remarks have been suggested by an extract from a recent paper relating to the introduction of American goods into England, sent to us for insertion, and which will be found in another portion of our columns.

SUMMARY OF EVENTS.

UNITED STATES.—According to the local weather report for the fourth month, the average temperature was 48.1 degrees. For the past nine years the average was 49.7. The highest was 80° on the 26th, and the lowest 25° on the 5th. The temperature fell to freezing on the 3rd, 4th, 5th and 6th. About 11 inches of snow fell on the morning of the 4th, but melted soon after sunrise. The total rainfall and melted snow was 4.21 inches. Prevailing direction of wind north-west. Maximum velocity 50 miles per hour.

A weather record kept in the northern part of Vermont shows that there were no less than 120 days of sleighing the past season, and that 42 inches of snow fell on the morning of the 4th, but melted soon after sunrise. The total rainfall and melted snow was 4.21 inches. Prevailing direction of wind north-west. Maximum velocity 50 miles per hour.

Destructive forest fires are raging in the northern and western parts of Pike county, and northwestern part of Monroe county, Pennsylvania. Fires in these counties occur almost every spring, and are generally caused by the carelessness of hunters or fishermen. Forest fires at this season of the year, not only destroy thousands of dollars worth of valuable timber and other property, but also the eggs of pheasants and other birds, for which the region is noted.

In response to a call, a meeting was held in this city on the 2nd inst., for the purpose of devising means for the relief of the colored people of the South, now seeking homes in the North, to relieve the immediate necessities of the emigrants—\$760 have thus far been subscribed.

The public debt statement for 4th month, shows an increase of \$19,952.

The San Francisco mint coined \$2,540,000 in double eagles, and \$1,000,000 standard dollars during the past month.

During the year ending the 30th ult., the city of Boston decreased its debt \$97,704, which now amounts to \$4,235,931.88.

The President returned the army appropriation bill to the House, on the 29th ult., with a message giving reasons for not signing it. On the following day the question was taken on the passage of the bill, but failed for want of the necessary two-thirds; the vote stood 120 yeas and 110 nays. It is now believed that the Democratic members have agreed upon a bill, to be passed separately, in lieu of the 9th section of the vetoed army appropriation bill, so modified as to avoid the President's chief objection to the vetoed measure.

The Treasury Department is advised that the Norwegian Government has prohibited the importation from the United States of live cattle, sheep and goats. This is done because of the cattle diseases in this country.

It is reported from south-eastern Kansas, that notwithstanding the President's proclamation, at least 2000 whites have entered the Indian Territory within a week. The discovery of rich silver mines is said to be the cause.

The number of deaths in this city for the week ending on the 31st, was 319. Of this number 62 died of consumption. The mortality of New York for the same period was 543.

Markets, &c.—The principal feature in the Government's bid, on the continued demand for 4 per cent, and the price has been advanced by the syndicate to 102 1/2. The demand for \$10 certificates continues great. The entire supply in this city was quickly taken, on the 5th, by the eager public.

Cotton.—Sales of 1300 bales 12 1/2 cts. per lb. for uplands and low Orleans.

Fresh Fruits.—Apples dull. Baldwin, choice, \$2.35 a \$2.50; Rox Russets, \$2.20 a \$2.35; fancy lots, \$2.50 per barrel. Strawberries, 30 a 40 cts. per quart.

Seeds.—Clover, 5 a 6 cts. per pound; Flax-seed, \$1.40 a \$1.50, and Timothy \$1.35 a \$1.40 per bushel.

Flour.—Penna. extra, \$4.25 a \$4.50; Ohio extra family, \$3.75, \$3.25 a \$3.75; patent, and other high grades, \$7.25 a \$8, as to quality. Rye flour, \$2.75 a \$2.87 1/2.

Grain.—Red wheat, \$1.37; amber, \$1.14 a \$1.15; white, \$1.16. Rye, 56 a 57 cts. Corn, 42 a 44 cts. Oats, mixed, 32 a 33 cts, and choice white 35 cts.

Petroleum.—Crude 7 1/2 cts. in bills, and standard white, 8 1/2 cts. per quart, and 3 1/2 10 cts. per gallon for home use. Lined oil, quoted by crushers at 50 a 60 cts.; Lard oil, 48 a 49 cts.; crude sperm, 82 cts., and bleached winter, 97 cts. a \$1.00; neat-foot, 75 cts. prime, and 60 cts. for No. 1, per gallon.

Hay and Straw.—Prime timothy, 70 a 80 cts. per 100 pounds; mixed, 55 a 65 cts.; straw, 85 a 95 cts. per 100 pounds.

Beef cattle were in good demand—about 3000 head arrived and sold at 4 a 6 cts. per pound, as to quality. Hogs were dull, and sold at 4 a 6 cts. Sheep, 4 1/2 a 6 1/2 cts. as to condition. Spring lambs, 8 1/2 a \$5 per head.

FOREIGN.—It is stated that the London and Westminster Bank, on the 2nd inst., took \$5,000,000 of the United States 4 per cent. bonds at 41 per cent, making in all \$5,000,000 U. S. securities that this bank has recently purchased.

At Sunderland, 3000 persons connected with the export trade are now idle, in consequence of the coal market strike.

Intelligence from South Africa is, that the king of the Zulus has sent representative, to treat with the British, and it is hoped that an early settlement of their differences may be effected.

A serious riot is reported in Cork, arising out of a difference between rival bands. Several houses were wrecked, and a number of persons seriously injured.

The Bombay Government reports that great distress is imminent in the Deccan, because of the failure of the crops; 5,000 famine stricken refugees from Kattiyar have entered Bombay.

The tariff subject is now engaging the serious attention of the European countries. Prince Bismarck, in this connection, has said: "Through the widely opened doors of its import trade, the United States are to become a mere storage place for the over-production of other countries. Countries which were inclosed had become great, and those which remained open had fallen behind."

In Germany, it is said as many as 10,000 live animals are perishing in the course of a year, and amongst them some of our large size.

A violent hurricane at Segedin, in Hungary, on the 30th ult., destroyed the works prepared for restoring the railway and restoring the breaches in the dams. The waters have again risen in the town, recouping the works.

The unsettlement in Russia is unabated. A writer in St. Petersburg says: "A feeling of universal gloom prevails. The rigorous police regulations already in force, are to be rendered still more stringent. After 8 o'clock in the evening nobody will be at liberty to show himself in the streets without a certificate, upon which must be affixed the names of the place from which the bearer comes, and to which he is going. The measures are certainly stringent, but at the same time the insecurity in St. Petersburg is daily on the increase. Since the attempt on the life of the Czar, troops have been held in readiness day and night. On the 16th, a peasant hid himself in the pockets of some found dispositions for revolutionary troops. According to this document, active operations were to commence in the night between the 16th and 17th. Instantly the Government made the most extensive preparations for defence. The

troops continued several days and nights in the positions, but the revolution did not break out. The police continue to make arrests, and officers of Government do not venture out without escort in many cases.

A very destructive fire occurred in the city of Oberg, on the Ural river, on the 25th and 26th ult., is reported that 949 dwellings, besides a large number of shops and public buildings, were destroyed. Czar has contributed 10,000 roubles for the relief of sufferers. The village of Gratchonka, on the Volga said to have been totally destroyed.

An official report to the Persian Government of earthquake at Minneh, on the 22d of 3d mo., says twenty-one villages were destroyed, and 922 people, 2,660 sheep, 1,125 oxen, 124 horses and 55 calves were killed.

The Geneva of Switzerland, in 1878, exceeded expenditures by 66,500 francs.

Further advices from Upper Egypt represent the conflicts between the Egyptian troops and the Sudanese, resulted in the complete defeat of the latter with a loss of 6,000 killed, wounded and prisoners.

A railroad car loaded with blasting powder, blew at the Grand Central freight yard, in Stratford, Onta on the 5th inst. The car was wrecked, and a small earthquake. About fifty cars and some freight buildings were entirely destroyed. Three men were killed and six badly injured. The damage to property estimated at \$25,000.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Applicant may be made to

John W. Biddle, No. 726 Buttonwood St.
Ephraim Smith, No. 1110 Pine St.
Rebecca W. Kite, No. 459 North Fifth St.
Hannah Evans, No. 322 Union St.

DIED, at her residence in Okaloosa, Iowa, the 2d day of 9th month, 1878, Sarah Ann wife of Dr. J. J. Gruwel, in the 68th year of her age, a member and approved minister of Spring-creek Monthly and Okaloosa City Particular Meeting. She was of a meek and retiring disposition. In her ministry she was general, brief but lively; ever seeking to know the Master's will in her way. She would not follow his directions; sound in the doctrines of the Gospel of Christ, and in the principles and testimonies as held and put forth by the founders of the Society of Friends, she was often made to grieve over the obvious innovations made upon them by those in the Society of later days; and, in her quiet, unobtrusive way, she faithfully endeavored to maintain them in her way. Her husband had become so feeble that for several years she had but seldom been able to attend meetings; this to her was a sore privation, yet, in humble submission, she bore it with exemplary piety, and Christian resignation. As her end drew near, in sweet serenity she could say: "I see nothing in my way." The way seems clear—I am only waiting for the Master's will to be done. These testimonies, and many expressions of like import, evinced her high state of mind. "Mark the perfect man and behold his upright, for the end of that man is peace."

She was born on the 7th of 10th month, 1878, ROBERT H. SMITH, in the 77th year of his age, a member of Stillwater Monthly and Particular Meeting of Friends, Belknap county, Ohio. He was firmly attached to the doctrines and testimonies held by consistent Friends from the rise of the Society to the present time, and often mourned over the departures from ancient simplicity apparent in many under our name. His last suffering was protracted and at times attended with much pain, but he was firmly attached to his principles. He spoke at one time with much emotion of the prospect of a separation from his family, and expressed a choice in living a little longer on their account; saying he thought he could still be a stay to them in some respects, but added, "If it is not to be so, we must leave it to Him who knows better than we do." His relatives and friends have the consoling belief that his end was peace.

He died at his home in Stuart, Iowa, 4th month 9th, 1879, BENJAMIN SMITH, in his 75th year. He was a regular attender of meetings, and underwent many hardships and privations with which the early settlers of the middle and western portions of Iowa were familiar. After a brief illness he gently passed away. He was heard to say, not long before his sickness, that he was ready for the change.

PHILADELPHIA.

How one Chinese Woman became a Christian.

Translated from her Verbal Narration, by
Adele M. Fiddle.

My name is Sui; I am thirty-four years old, and have been a Bible woman four years. I have no near relative but the Lord, and we nothing to do but his work. If I had accepted the gospel when He first sent it to me thirty years ago, perhaps I might have known much that I then had and loved; but I could not heed his message till He chastened me by taking away the earthly things to which my heart clung.

My home was twenty-four miles north from here, on the seacoast, at Lam Chau. My father was a fish-merchant, and did an extensive business; but he died when I was three years old. I had five brothers and a sister, and I was much younger than any of them, and was a pet in the family. My eldest brother studied for a literary degree, but as he was inferior in making pictures than of reading, he failed to pass examination. My second brother was a most filial son. When my father entered a room in which he was sitting, he would immediately rise, and remain standing so long as she was there. He was so very talented. He began to attend the examinations when he was only fourteen years of age, and when he was eighteen he got a degree. Then he taught, and studied for a higher degree; but before he attained it he died, at the age of twenty-five. My younger brothers tilled our land. Though there were no scholars in our family, I was never taught to read. Girls are not taught to read unless they are the only children, and their fathers say then teach them for pleasure.

My mother was forty-four years older than I, and she was always very tender toward me, and had my feet bound when I was thirteen years old; but when they ached in the night, my mother would tell me to loosen the bandages. Bound feet ache the worst when they are still.

When I was fourteen years old, I was betrothed to a young man at the city of Chung King, a league from my home. An old neighbor acted as go-between, and went to and fro between the families, till all the preliminaries were settled. My future mother-in-law was very particular in previously ascertaining whether I would bring good fortune to her household. After learning the year, month, day and hour of my birth, she consulted a

blind fortune-teller, and got a favorable answer; then she worshipped before her family gods, tossing up a split bamboo-root till it fell so as to give an auspicious omen; then she made offerings to the gods in the temple, and got from their interpreter a sign of acquiescence. After that, on a day chosen as lucky, the go-between brought fourteen dollars done up in red paper, and my mother received it. With that the bargain was concluded, and could not be broken by any of the parties concerned. I was not consulted in the matter, and no one told me anything about it; but I overheard what was said, and knew very well what was going on, though I dared ask no questions. When I was seventeen, a lucky day was fixed upon, fourteen dollars more were paid to my mother, and I was carried to my mother-in-law's house. My mother had been busy for some months in preparing my wedding outfit. It consisted of two wash-tubs, two trunks, two strong cloth bags for clothing, two large red lanterns, a thick cotton coverlet, a pillow, sixty garments for summer and winter wear, embroidered shoes, hair ornaments of silver washed with gold, bracelets and ear-rings. My jewelry was worth twenty dollars, and my outfit altogether cost over sixty dollars. I have still the coverlet and one tunic which my mother then gave me. The jewelry I have given to my daughter, except a pair of bracelets which were torn off my wrists the day that we Christians were attacked and beaten by a mob, in the chapel at Chung Lim.

If people are very poor, they give their daughters only a suit or two of clothing when they are married. If they are rich, they give them much more than the amount of the betrothal money. I knew a man who gave his daughter a wedding outfit with a thousand dollars, and it included a rice field.

I was troubled about going away from home, and anxious lest I be unable to perform the duties of a daughter-in-law, and I did not look upon my new garments with pleasure. But all girls have to be married, and of course I must be. The day before my marriage, my mother gathered twelve kinds of flowers, and steeped them in water, and the next morning I was washed in this water, and put on an entire suit of new clothing, with a fine outer garment that my mother-in-law had hired from a wealthy official, and sent for the occasion. I was then put into a sedan-chair, and as it was lifted up, my mother took water in which green peas had been steeped and threw it on the top of the chair, for good luck. Only the go-between went with me to my mother-in-law's house. Neither my mother nor I had ever seen any of the family into which I went. The go-between stayed three days and waited upon me, then she went home. She received two dollars from my husband's mother, and one dollar from my mother, for the performance of all her part in the transaction.

After three days, my mother sent my

nephew to bring me a bottle of hair-oil, and to inquire after me. At the end of a month, he came again, and brought me an artificial flower, and a basket of boiled rice. At the end of four months, my mother sent a sedan-chair to bring me; and I went and ate breakfast with her. It is not the custom for a mother to visit her married daughter until the latter has had children; and then the mother-in-law must go and invite the mother to come.

Some thirty years ago, — Lecher, a German, the first foreign missionary that ever preached here, came and lived awhile at Lam Chau. My youngest brother heard him preach, and became a Christian. My brother used to come and tell me about God, and would explain the true doctrines to me until the perspiration would run down his cheeks, through his exertions in making me understand. He came again and again; but though I saw that what he said must be true, my heart clung to the old idols, and I wanted to adhere to the customs followed by my friends. My heart received the truth, but my heart rejected it. God has many ways of making people repent. Had my husband prospered in business I should never have turned to the Lord.

When I was thirty-four years old, my husband went with a cargo of goods to Siam; and there he took to smoking opium, lost money rapidly, and never came back any more. I diligently made offerings to the gods, and every year spent as much as ten dollars in paper money and incense to be burned before them. I consulted fortune-tellers to inquire when a letter or money would come from my husband, and would often get the answer for a certain day. Then I would sit in the door, and watch for the coming of the letter; and when any one that looked like a letter-carrier approached, my heart would beat fast; and when I found there was no letter for me, I would go in and cry. After I had spent much devotion and money on the gods, and found that they always disappointed me, I began to think my brother's God might be better. I went to him and said: "Brother, hereafter I am going to worship God; but as there are so many who will oppose and despise me, I will only worship him secretly." My brother told me that every one who belonged to Christ must confess him before men. I went home and thought it over, and began to go to worship with the few Christians at Chung Lim. My son was so vexed, when he knew that I meant to be a Christian, that he cried; and my sister-in-law, who had before been very friendly with me, hated me, and locked the door so that I could not get in when I came from the chapel. It was very troublesome, indeed, being a Christian.

When my son was eighteen years old, he went to Siam to search for his father; and hoped to induce him to give up opium. The next year, when I was forty-one, I came with some of the brethren and sisters from Chung

Lim to Swatow, to be baptized. I had to come secretly; and I sent my extra clothing, rice and cash for the journey to the chapel on the previous evening; and early in the morning came out and joined the Christian company on the road. Before I got back to Chung Lim, my sister-in-law went to three of the four chief men in our clan, and told them what I had done; and they agreed to wait on the brink of the river for me, and catch me as I was crossing, and crush me into the river bottom till I died. But she went last to the head of the clan; and he told her that the foreign teachers were powerful, and that she might get herself into serious trouble by killing a Christian; so my life was saved. When I got home, she reviled me, but nothing more.

My son went into business in Siam, and then came up to Hong Kong. From there he sent me twenty dollars, and a message asking my pardon for his lack of filial love in not coming to see me; but his ship was going back at once to Siam, and he must go with it. When only one day out from Hong Kong, the ship was wrecked, and all on board were lost.

When I heard this news, I did not cry, except in secret; for I feared that the heathen around me would say that my God was not good. I thought, too, that I must set the weak Christians an example of submission to the will of God. I have felt that my grief was greater than I could bear; but I have kept it shut up in my heart, and have never, until to-day, told any one how great it was.

I have nothing now to rest my heart upon but the hope of heaven. I have been deeply troubled; but without the trouble I should not have been saved. I am strong, and have, perhaps, many years to live; and if I can but lead many to believe in the Lord, that will be joy enough for me here.—*Nat. Baptist.*

For "The Friend."

The Common Salvation.

If I have apprehended, in any small degree, the holy mind of Him, who hath made of one blood all nations of men; hath formed them for his glory; and will render to every man according to his works; I am prepared to say, without hesitation, that all those who serve Him in their generation, according to the light received, will be made partakers of his mercy unto eternal life, through Jesus Christ our Lord. Whether it be those, who having not the Law (being void of instrumental teachers) "are a law unto themselves," and do by nature the things contained in the law; or those "who are under the Law," that is, literally keep, with devout, subjected minds, the literal commands of God; or those who, being drawn thereto by the further extendings of Divine power and grace, have pressed forward from the letter to the life, from the shadow to the substance, to a *full gospel state*. These latter are the wise indeed, who "in herit glory," and attain to that which exceeds all former dispensations,—the full revelation of the day of Christ; and are favored both instrumentally and immediately, with the constant lively operations of the good pleasure of the Most High; and know what it is to sit down with Abraham, Isaac and Jacob in the kingdom of heaven.

These three several states and divisions of mankind are kindred to each other, and of one Father; as were the sons of Noah,—Shem, Ham and Japheth; being partakers through the ark of the covenant of Christ Jesus, of

a common salvation; such as theirs in the outward was a type of. And their salvation, though diversely witnessed both in manner and degree, is of one kind in all—the light of Christ within, God's gift for this design. The same, therefore, which saves the willing and obedient, condemns the unbelieving and disobedient, because it shines in every man that comes into the world. D. P.

1868.

For "The Friend"

Turkish Superstitions.

(Continued from page 307.)

"I happened one day to be making some purchases from a Jew pedlar at the gate, when a Turkish woman passing by came quietly up to the old man, and before he could prevent her, made a snatch at his beard and pulled out a handful. The unfortunate Hebrew, smarting under the pain and insult, asked the reason for her cruelty. 'Oh,' she answered, 'I did not intend to insult or hurt you; but my daughter has had fever for a long time, and as all remedies that I have tried have proved vain, I was assured that some hairs snatched from the beard of an Israelite and used to fumigate her with would be sure to cure her.' She then tied up her stolen treasure in her handkerchief and walked away with it.

"While living at a farm near Broussa, situated a few miles from the town, not far from the ruins of a fine old hostelry called the 'Bloody Khan,' my mother was one moonlight night accosted by an old Turk while we were out walking. He was a stranger in the place, tall and handsome, with a snowy beard falling upon his slightly bent chest. A peculiar, restless look about the eyes and the numerous scars that covered his bare breast and face, were evident indications that whatever his present calling might be, his past life must have been a stormy and adventurous one. He walked quietly towards us, and stopping before my mother with a certain amount of respect mingled with paternal familiarity, said to her, '*Kuzim, gel!*' (daughter, come!) I have a secret to reveal to you. My mother followed him, and half amused and wholly incredulous listened to the following recital. Pointing to the 'Bloody Khan,' which, being situated upon the principal road leading into the interior, had once been occupied by a band of forty robbers, he said, 'I was the chief of the band of brigands that occupied that Khan. You must know its story. Forty years have passed during which my faithful followers have been caught, killed, or dispersed, leaving me the sole representative of the band. A timely repentance of my evil ways led me to make a *Tube* vow and renounce the old trade. I have since lived in peace with Allah and with men. I have sworn to lay violent hands on no man's property more; but my conscience does not rebel against attempting to recover what I had buried beneath yonder wall. I want your powerful concurrence to dig out this buried treasure, the greater part of which will be yours.' My mother naturally refused to have anything to do with the affair. Seeing her unwillingness, the old man tried all his powers of persuasion to induce her to take part in his plan, saying, 'On me, my daughter, be the sin. I will rest content with a small portion of what will be recovered, all the rest I abandon to you.' Finding this last induce-

ment had no more effect than his previous promises, he turned away, saying, 'Since you refuse I must seek somebody else.' Among the few Mohammedan inhabitants of the small village, his choice fell upon the *Imam*, who, an enterprising face promised the old man better success. The cunning Imam, on hearing the brigand's tale, being persuaded of its veracity at once promised his assistance, mentally deciding, however, that he would be the only one to profit by the hidden treasure. He once began to make use of the usual stratagem of superstition, which could alone secure the success of his plan. Telling the old man that according to his books ill-gained wealth must be in the possession of evil spirits, and that in order to guard themselves against their influences during their digging enterprise, and to prevent the treasure from tumbling into charcoal, a peculiar process of uttering, and soothing incantations, would be needed; but that he would at once proceed to perform these, and at the first crowing of the cock all would be ready, and they would proceed together to the spot and unearth the treasure. The credulous old chief stroked his beard, and said that with Allah's help and the goodwill of the *Peris* by the next day they would be rich men. In the course of the night as arranged, the two, spade in hand, leading the Imam's horse bearing saddle-bags, proceeded to the spot. The Imam commences operations by surrounding himself and his companion with as many magical observances as he could invent. Telling him to remove the first spadeful of earth, they went on digging alternately, until a hollow sound told the sharp ear of the Imam that the distance between them and the coveted wealth was not great. He threw down his spade, and again resorting to magical mummeries, declared that the danger was imminent, as the spell foretold resistance on the part of the spirits and a refusal to yield possession unless a goat were at once sacrificed to them. 'Go,' said he earnestly, 'back to the mosque, and in the small chamber you will find three goats; take the milk-white one and bring it here. Do not hurry it much, but lead it gently, as becomes the virtue of the offering.' The old man, nothing doubting, with Turkish nonchalance went quietly back to the village, which lay about three miles distant. The Imam, once rid of him, and when in no danger of being seen heard, set actively to work, got out the treasure, placed it in his saddle-bags, mounted and rode off, and was never seen or heard of in the village again. The old man returned in due time, accompanied by the goat, to find nothing but his spades, the pile of earth, and the gaping hole. Disgusted, disappointed and enraged, he came back to the village, and early next morning made his appearance at the farm. Enquiring for my mother, he acquainted her with the pitiable results of his attempt. This time the curiosity of the whole family was roused, and we all proceeded in a body to the spot. The old man's assertions proved to be perfectly correct, and my brother, upsetting part of the upturned earth, discovered a handsome silver dish and cup, which we took home with us as trophies of this strange adventure."

There are tears which are themselves the seed we must sow; tears of sorrow for sin—our own, and that of others; and tears of tenderness in prayer.—*Matthew Henry.*

Letters of James Emlen.

(Continued from page 305.)

"9th mo. 24th, 1851.—In thinking of thee and thy prospect during the wakeful hours of the night, it seemed to me as though it might be allowable and perhaps more than allowable to encourage thee to 'put on strength the name of the Lord.' Thou art no doubt very sensible of the need of this in so great an undertaking; but it may be that the enemy may take advantage of times of poverty unadvisedly to cast down and discourage, and although I think it is wisely ordered that our devotion should be wrought out 'with fear and trembling; yet if we hold fast our hope and confidence firm unto the end, we shall experience a change of dispensation, and know a truth the work of righteousness is peace, and the effect of righteousness quietness and assurance forever. I do not anticipate that thou wilt be exempt from pretty heavy burdens, inwardly and outwardly, such as will properly lead thee often into the closest seek for a renewal of strength, yet I trust on wilt also, both for thy own sake and that of others, be enabled after such seasons to wash and anoint; and endeavor both to be enabled to appear as cheerful as an innocent cavity will allow. If thou should yield to undue discouragement, the enemy may then abuse thee of that secret 'word in season,' which will never be withheld at the needful time to such as hope and wait for it. Therefore I could desire to 'strengthen the weak hands and confirm the feeble knees: say to them that are of a fearful heart, Be strong, fear not.' &c.

"1st mo. 9th, 1852.—Thy note was received a Seventh-day last, and should have been more promptly answered; but it always feels weighty time to offer advice and counsel on such occasions, unless we are satisfied of being a little of the best help. The ministry amongst us of late years, we all know, has been such as to excite occasion for jealousy, I have very little doubt but with the Society so large, the ministry itself has lessened in number and authority—and therefore I am not surprised that those who may apprehend themselves called to the work, should feel renewed and increased care resting upon them to regard the apostle's advice, 'Let every man love his own work; and then shall he have rejoicing in himself alone, and not in another; or every man shall bear his own burden,' or early so. If we are permitted to feel tried through doubts and fears respecting our calling, may it not be so permitted in best wisdom, in order that we may thus 'prove our own work,'

* * * and be driven home to the dear Father's bosom, leave our petition there, and await his answer. If he does not say 'it is well,' we shall not be condemned, I apprehend, for awaiting a more clear evidence—as we well know the occasion there is, when his poor church is so tried with wrong spirits that every man should prove his own work, I feel it right therefore to encourage thee, not to feel terrified, if the accuser of the brethren is permitted to buffet, but endeavor to hold on to that anchor which can abide the storm until it is overpast; then we may hope that judgment may be granted in the case, which will enable us to feel that our standing is upon the Rock and not upon the sand. The desire to have an answer of peace, before the best time, is very natural, and I presume very

common with the lambs of the flock; but as we grow in experience we learn to 'judge nothing before the time,' and that after we may 'have done his will,' as we apprehend, we may 'have need of patience to receive the promise.'

"2d mo. 14th, 1852. * * * I thought I felt helped and comforted in the reading of W. E.'s letter—by his faith under all his tribulations. * * * He who is the only fountain of true Christian love and sympathy, is ever present and cannot be removed from us. It is no doubt a time of general shaking amongst us; and how needful under such circumstances that we feel ourselves to be based upon that which cannot be shaken or removed—here must be our fellowship and unity, members of the one spiritual body, many members, but having one Holy Head and Lawgiver. * * * The time was when I thought myself enabled sometimes to help others, but now I feel much more like needing help myself; but still I acknowledge that in the hour of extremity, mercy seems to triumph in the midst of judgment. I crave above all things, purity of heart; and an increase in those 'unseen' heavenly graces which are much more professed than possessed by those who bear the name of Christ."

"For The Friend."

Floral Decorations in Houses for Worship.

A writer in a late number of *The Episcopal Recorder*, comments on the use of floral adornments in the "Protestant Episcopal Churches," as their meeting-houses are styled—a perversion, it may be remarked, of the scriptural and primitive use of the word.

He quotes from one of the New York journals, which describes the appearance of several of these on the occasion of the Easter celebrations in that city. Of "Trinity," it says: "The chancel was redolent of the perfume of choice flowers that were clustered in huge pyramids around the pillars, and several striking floral designs graced the altar."

Of "Grace Church," we are told: "The floral decorations were elegant, though confined to and about the chancel. Numbers of people entered the edifice between services to look at the array of flowers. On the reredos was a wall of white flowers, with an inscription in the centre, in carnations and tuberoses. On either side the chancel were green branches and white flowers, and before the railing, to the left, was a handsome red and white star. The pulpit was arrayed in roses and lilies, with a clump of ferns at its base.

"At Grace Church the spectacle of luxury and fashion made the roadway to heaven appear especially easy and comfortable."

"The altar space of St. Timothy's Protestant Episcopal Church was rendered beautiful by a number of very artistic flower pieces. In the centre of the communion table stood a large Irish cross, the transverse pieces being of white and the chaplet of crimson roses, while round its base were clustered a quantity of lilies and evergreen. Large bunches of fine flowers were arranged in vases on each side of this centre piece, and the entire table was surrounded with garlands of roses, carnations and foliage. A large mass of greenery was also piled above the reading desk, and, being dotted over with red and white roses and surmounted with a cluster of calla lilies, formed a very pleasing decoration."

After quoting some additional descriptions,

and referring to the "operatic" music which added to the attractions of the show, he adds—

"Where is the difference between the recent *Faster Floralia* celebrated in most, if not all, Protestant Episcopal Churches, and the heathen festival of the same name celebrated annually by pagan Rome on the 23th of the present month.

"Did they not both minister to the carnal sensuous appetite? Were they not both calculated to blind the eyes of the people, and to turn their hearts and thoughts and affections from the worship of Jehovah, who has told us in his Holy Word that 'they that worship Him, must worship Him in Spirit and in truth,' to the mere passing things of time and sense?"

It is pleasant to find a voice raised against the growing tendency to appeal to the outward senses in performances of a religious nature. In reading the account of such exhibitions as are above described, the members of our Society may well rejoice, that its principles do not admit of such things in our meetings; and they should be stimulated to maintain the simple form of worship practised by their forefathers. J.

An Extract from the Memoir of Martha Ruth.—The different sittings of the Yearly Meeting for New England, were seasons of heavy exercise, yet, through Divine help, a little strength was renewed to labor with other concerned brethren and sisters, for right order in the discipline of the church; and a general concurrence prevailed, that their meetings beginning at an earlier hour, would tend to more profit; and the ninth was concluded upon instead of the eleventh; which, for the cause's sake, was relieving to my mind; the heat having been frequently so oppressive at that late hour, that the body was scarcely able to support its feelings, and the best life was thereby greatly borne down; and nothing could be advanced, for the continuance of that late hour, but the bias of old custom, which many exercised members were religiously engaged to break through.

Advices from Canada show the presence of Sitting Bull and his warriors on that side of the line has resulted in a serious and unexpected injury to the tribes regularly settled there. The Sioux have killed so many buffaloes and frightened the survivors so far away that the Northern Indians are in a starving condition. As the immense herds of buffalo have gone south to the old hunting ground of the Sioux, it is very probable that Sitting Bull and his band will be driven by hunger to return to the United States.—*Ledger.*

Power of Conscience in a Pagan.—A follower of Pythagoras once bought a pair of shoes of a cobbler, for which he promised to pay him on a future day. On that day he took the money, but finding the cobbler had died in the interim returned, secretly rejoicing that he could retain the money and get a pair of shoes for nothing. His conscience, however, says Seneca, would not allow him to rest, till, taking up the money, he went back to the cobbler's shop, and casting in the money said: "Go thy way, for though he is dead to all the world besides, yet he is alive to me."—*British Workman.*

For "The Friend."

The Education of our Children.

The subject of Education having claimed renewed attention during our late Yearly Meeting, the following extracts are taken from a report adopted by the Yearly Meeting of 1830. They show that this concern, in its essential features, remains the same as fifty years ago.

"If the children of Friends are expected to grow up with an attachment to the Society and its doctrines, and to conform to the testimonies we believe ourselves called upon to maintain, it must become the fervent religious concern of parents to commence the work at an early period in life. They must be instructed in the doctrines and precepts of the Christian religion, in the nature and grounds of our own peculiar testimonies, and their tender minds imbued with a love of piety and holiness. Above all, we should be engaged to enforce these precepts by a corresponding life, and to show them we are more anxious to promote their religious welfare than any temporal advantages.

"Unquestionably it is the duty of every parent who possesses the means, to give his children liberal instruction in useful knowledge, and to cultivate those mental endowments which a beneficent Creator has bestowed on man for a noble purpose. But this is not the primary concern. It is of more importance to guard them from the contagion of corrupt principles and evil example; and the present condition of this Yearly Meeting, renders this consideration one of extensive practical application. * * *

"We therefore recommend that the Yearly Meeting earnestly advise its several Quarterly Meetings to enter deeply into the important subject of education, and to promote in the subordinate meetings, the establishment of schools to be taught by members of our religious Society, under the superintendence of Monthly or Preparative Meetings, and that a vigilant care be exercised in all the schools, to instruct the children in the principles of the Christian religion, and the peculiar testimonies of our religious Society; and that each Quarterly Meeting raise a school fund, to be applied, under the direction of a committee, to the assistance of those meetings and families which may require such aid. The daily reading of the Holy Scriptures, and the regular attendance of the scholars at mid-week meetings, where it is practicable, should be enjoined at all these schools.

"It is, however, important for Friends to bear in mind, that the business of education must be begun at home, and that the discipline and docility which will enable children to profit by the instructions of their teachers, and which often determine the course of their future life, should be inculcated there. Earnestly do we desire that a religious sense of these important truths may more and more prevail in our Society. Were this the case we believe that there would scarcely be found any situation so destitute or remote, as to deprive a child of the advantages of religious education and of the rudiments of school learning.

Signed on behalf of the committee,
HINCHMAN HAINES,
JOHN FORSYTHE.

Philadelphia, Fourth month 21th, 1830.
Extracted from the Minutes of the Yearly Meeting,
SAMUEL BETTLE, Clerk."

UNDER THE LEAVES.

Selected.

Oh have I walked these woodland paths,
Without the blest foreknowing,
That underneath the withered leaves
The fairest buds were growing.

To-day the south wind sweeps away
The types of autumn's splendor,
And shows the sweet Arbutus flowers—
Spring's children, pure and tender.

O prophet-souls, with lips of bloom
Outwicing in their beauty
The pearl tints of ocean shells—
Ye teach me Faith and Duty.

Walk life's dark ways, ye seem to say,
With Love's divine foreknowing,
That where man sees but withered leaves,
God sees the sweet flowers growing,
—Albert Leighton.

Selected.

ON THE DEATH OF A YOUNG FRIEND.

Thy mercy, past all measure—
Thy love, so strong and deep,
Hath garnered safe our treasure
That we so long to keep.
We give thee back thy loan, Lord,
And praise thee while we weep.

Safe from the tribulation,
From sorrow's rust and care,
From the subtle world's temptation
No more to shrink or share,
She rests in thy bright presence—
Lord! we would leave her there.

No fretting moth can reach her
In the land where thou dost reign,
Sweet lessons thou wilt teach her
Before we meet again—
Raised like to thee in glory,
In robes without a stain.

Keep, Lord, our treasure! keep her!
Though our hearts are sore to-day,
Thou knowest while we weep her,
We would not say thee "say!"
For the free bird's song is ringing
In the land of endless day.

—A. Shipton.

The Seamy Side.

The recent essayist points out in a sentence the reason of domestic infelicity. "The seamy side of the cloth is often reserved for the special edification of the home circle." The husband, deferential and polite to his out-door friends and business associates, is, if not abrupt, careless and perhaps imperious in his household intercourse. The wife, who has received her caresses with wonderful snaviness, and permitted them to leave with the impression that she is "just lovely," drops the company mask before her children and her husband. The man and wife, who are held in law and gospel to be one, demonstrate that there can be repulsion as well as attraction in matrimony as in magnetism. The children, who are on their good behavior when the mothers of other children are observing them, show how completely they can reverse the picture when nobody but their own parents are looking on.

Sincerity has its admitted place at the head of all the virtues. It is for its very insecurity that this domestic unpleasantness should be abolished. Usually the husband loves his wife, the wife her husband, and children love their parents. Let any real pain or mistreatment happen to either and this latent affection is made evident. Why should it be a latent affection, concealed at all ordinary times and evident only when the most its exhibition can do is not to increase happiness

but to alleviate pain? In a word, why should the "seamy side" only be obvious in the household, while among strangers the aspect of the cloth is always presented? If it is worth while to conciliate people for whom you care comparatively little, why is it not also worth while to be in pleasant relation with your own relations?

Yet, in the families which are considered happy, this consideration is too often overlooked. We talk of the hard-heartedness of uncivilized tribes, as if in them alone were called upon to bear the heaviest burden. Yet the same view of the relative burdens of women, children and men seems to be held "by saint, by savage and by sage." The Indian warrior despises domestic duties as beneath him. He leaves with the wife the daily wearing, weary drudgery of life, without sympathy with her toil, and without the expression of pleasure at the result of her labors.

How much better is the civilized man who comes home to his domestic tent proud of the metaphorical sculps he has won in the battle of life? How much less imperious is he when he lets himself down from his out-door dignity to the slipshod indifference of home and turns his coat as he enters "seamy side out? And what woman is there who does not perceive and inwardly resent the metamorphosis? It is perfectly natural that what in himself the man overrates the woman should under rate; and that while he looks without appreciation on her sphere, she looks on his with an answering feeling. There are, however, two sides to the subject. Perhaps the "equality" which is claimed for the sexes may include an equality in this way of consideration for each other. There is an operation among needle-women called "felling" seams. It means the overlapping and stitching the edges down to remove roughness. And there is an operation among tailors called "pressing," which aims at the same object in a manlier mode. If the woman would all "fell" the seaming sides of life, and the men "press" their rough edges down, a good many of the irritating inequalities of the domestic circle would become very smooth indeed. The result would repay the labor, and as trifles make the sum of life, the total would be a fair balance on the right side, and handsome dividends for father, mother, children, and all the household.—Ledger.

Of all the sirens' songs that lure men to destruction and lull their fears while on the way, none is more soothing and more destructive than the common temptation, in nearly every breast, to do something by and by instead of now. This temptation extends from the affairs of one's soul to the answering of a postal card; and it seems to affect octogenarians quite as seriously as youngsters. If you are ever tempted to postpone anything, great or small, first bring sharply before your mind this question: If I do not undertake this matter now, precisely when and where shall I? Next year, next week, to-morrow, may bring with it duties quite as exacting as those of to-day. If present work is neglected, its demands or its memories will make future work all the harder. The only worker in the world who is thoroughly to be pitied, is he who is always trying to catch up with week before last.—S. S. Times.

"For The Friend"
 Extracts from the Diary and Letters of Ebenezer
 Worth.

(Continued from page 310.)

12th mo. 10th. I think I may say I have my experience felt in a degree the truth of it saying, "That all things work together good to those that love the Lord." Just before I was about to write to the Committee, which I wished to express my prospect of leaving the Indian country and returning to my father's country, I received a hurt in my eye, did not know, at first, but that my eye was destroyed, but I soon found I could see some, was at the school near Cold Spring at the time, (but) soon started towards Tennessee, as I boarded; on my way it was truly inspiring to feel satisfied that I had been in the line of my duty. I thought proper to remain at home a few days and take care of it, took place on Fourth-day; on Seventh-day being in a very bad way, in the night was not quite sick. I began to think I should be able to have my sitting the next day; if I should be able to sit up, would be troubled with drowsiness, as I had got but little sleep. Towards morning I laid down, but could not sleep much; to my surprise, the next day in my "sitting" I was but little, if any, troubled with drowsiness. At this time I thought of expressing my prospect of leaving was felt (to be) a serious thing and rested away upon me. I could not feel anything but that I could justify me in writing. It felt necessary that I should (now) fix upon a time, which I was not able to do, though I had been much favored to do so sometime before. My eye seemed much limited. I feared my letter would not reach Philadelphia before the meeting of the committee, and I so destitute of blessing on the subject, it became a great trial to me; I almost feared I should not be able to see clear in writing at all, but when the next day dawned, I think I may say, I was mercifully favored to feel liberty to write my concern, and rest my burden a little on the committee; for which I trust I was made truly thankful. May this be remembered as an encouragement to wait patiently, and rely only on my Divine Master, with my eyes open, and my whole heart given up unto Him; and, I believe, will never fail to comfort and help his humble, dependent children, although in His wisdom and mercy He withholds from us at times what we much desire, but are not properly prepared to receive, and I cannot believe this is designed for our good. I feel bound to acknowledge that all the dispensations of the Lord toward me, have been in His mercy and wisdom, and things that have been very trying to me at the time, I have had reason to be thankful for afterwards. May I be more given up to suffer for and serve my Divine Master, than I have heretofore been; 'tis only in Him there is true comfort, 'tis in this life, and on his unmerited mercy I hope of happiness hereafter.

12th mo. 11th. It was something of a trial to me this morning, to think of having my sitting in the school with the teacher and scholars—the school had become larger. As went I invited Benj. Williams to come and interpret for me. I thought I was much favored to express my feelings to the scholars; some of these seemed quite sober, and I thought were brought to a degree of feeling. I was favored, after the opportunity, to feel comfortable. We had our sitting afterward,

in which I thought we were favored at times with a good degree of quiet; at one time a solemn quiet; and the countenances of some gave evidence of serious thoughts. I can but consider this day as one of great favor, and I trust felt in a degree thankful for the blessing.

12th mo. 13th. Visited the widow Jacobs, an old Indian. Called on my way home at William Patterson's—I had for some time desired an opportunity with him and his family; was favored to get William, his wife, Old Blacksnake, and Samuel Paterson together—another Indian was also present; Samuel was my interpreter. I have for some time felt for William on account of his infirmity, fearing it might be a serious disadvantage to him; although I said but little, I felt in a degree comforted and favored to feel the great necessity of living near unto my Divine Master, in whom there is life, light, strength and true consolation. May my time and talents be more given up to his service, for He is forever worthy, and all the glory be to His great and excellent name.

12th mo. 16th. Went to Great Valley. I was pleased not to find any Indians about the tavern.

15th. Went to see James Washington, an Indian, who had the cap of his knee broken by a white man throwing him out of the house. I think I had reason to be thankful for the favored opportunity with him. I went to see Jacob Fatty, who I understood had been drinking; not finding him at the house, I inclined to excuse myself, although I suppose I heard him chopping in the woods not far off; this omission caused me sorrowful feelings for a time. As I travelled down the river toward Great Valley, I was glad to see an opportunity of doing good. I saw (before me) an interperate Indian that I wished to have some conversation with, and in order to make up for my omission, I drove pretty fast, overtook him, and invited him into the sleigh. As we rode together I conversed with him on the subject of intemperance; he acknowledged it to be an evil, and I trust felt in a measure the truth of it; after which I felt my mind in a good degree relieved. I have great reason to be very thankful for the favors of this day, and desire from this time to be more careful, not to omit attending to any duty which my Divine Master is pleased to require of me. Oh! the necessity of living near to Him, for in Him is all we stand in need of, and (when we are as we ought to be) all that our hearts desire. Oh! the precious peace and safety there is in the Lord; all the friendships, the riches and honors of this world, are a mere bubble when compared with this inestimable treasure.

24th. Went to Great Valley to take my horse for Asa Jones to go to Collins Monthly Meeting. As I felt my mind drawn to attend that Meeting I left home prepared that if I should feel it right I might go. On the way up the river I was favored to feel well satisfied that it would be right for me to accompany Asa.

25th. Started before 4 o'clock for Collins'. It was a cold clear moonlight morning. We went in a horse sleigh; arrived I think a little after 2 in the afternoon; distance 32 miles. Called at Lewis Varney's, took dinner, and then went to Joshua Palmerton's, where we staid all night. I spent part of the evening in conversation with Joshua; he appeared concerned on account of his children.

26th. One of the older daughters seemed disposed to excuse herself from going to meeting on account of business. I had some conversation with her on the subject, after which I think I felt pretty well satisfied. Went to meeting, in, and after which, I felt in a degree comforted. Staid all night at Joseph Batten's. Joseph helped me a part of the way. I walked about 20 miles to Napoli Centre; my mind was so comforted that the walk seemed but little trouble to me, and did not feel much fatigued in the evening, though much of the road was rough and slippery. Asa Jones had taken the horse to go round by his father's on his way back to the school. I staid at Napoli Centre (all night); got two letters out of the office; one from the committee and one from S. Cope, both of which were satisfactory. My bill in the morning was 50 cents, (for which) I had two good meals and a good bed. It is a well conducted temperance house, the family so quiet and orderly that a stranger who desires quiet and rest will find it a comfortable stopping place. It is kept by a member of the Methodist society. [I] came home by Randolph; my mind continued to feel much comforted and supported. Oh! my soul, thou hast reason to look back on the many unmerited favors which have been bestowed upon thee, with feelings of humble gratitude to the Great Giver of all good, and to be encouraged to look unto the Lord for direction and strength; trifle not away thy precious time in thy favored seasons, but keep humble, keep thy spiritual eye single to thy Divine Master, and in humble dependence upon Him press forward in a faithful performance of the duties which He may be pleased to require of thee. His infinite wisdom and strength are alone able to direct and support thee; lean not on thy own understanding, nor depend upon the arm of flesh.

(To be continued.)

A Testimony to Plainness of Dress and Address.—It is in my heart to leave behind me a testimony to the truth. In my youth, when dead in trespasses and sins, and walking according to the course of this world, although in my infancy educated in an esteem of those precious testimonies borne by George Fox, and his fellow-laborers, to plainness of dress and address, I contented them in my heart, and departed from them in practice. When I was awakened to a sense of my lost and miserable estate without a Saviour, I embraced them with all acceptance in their strictest forms, and have not since deviated from them, either in sentiment or practice, not for an hour: *they are of God*, and will be established in the earth, when "the crown of pride" shall be cast down, and the glory of all flesh abased. Nevertheless, let none, who by the influence of education, or any other means, invariably adhere to them, glory in, or value themselves upon a bare exterior conformity to these truths; while the inner man of their heart is full of pride, self-preference, and ravening after the unrighteous mammon."—*From the Diary of Samuel Scott.*

A man's life consists not in the abundance of the things that he possesses. Full often the more your goods increase, the more your cares multiply; the care to keep is often greater than the care to win; while, after all,

the care rightly to use, ought to be the most weighty care of all. If thy God has loaded a neighbor with ten thousand a-year, thank God that he has not burdened thee in that way. Be glad if he has given thee as much as thou canst carry easily, and no more. When I go for a walk, I like a staff,—just one; but I should not like to be compelled to carry a hundred.

An Allegory.—A great king, desiring to teach his son a practical lesson, ordered a long table to be prepared in one of the galleries of his palace, set out with all manner of toys, fruits and other things, which he thought would please the little boy. Taking him to a door at one end of the room, he said to him: "My son, pass down this hall, and whatever you are pleased with, you may take for your own upon one condition—you are not to turn back. When you have gone the whole length of the table, and have made your decision, go out at the other door, and bring me what you have chosen."

joyfully the little boy started, enchanted with the prospect; he ate and drank, and gathered his hands and arms full of treasures, and presently tiring of what he had, he threw them away to make room for some more glittering toy which attracted him farther on; but which when secured, somehow, did not please nor satisfy him as much as he had expected, and he was constantly looking back regretfully on that which he had left behind, or he saw something still farther on which he thought more desirable. Now, instead of being happy in having his choice of all these good things, the little boy grew irritable and dissatisfied. At length he appeared before the king with a sorrowful countenance, and in his hands were a few broken toys.

"Is this all, my son, that you have brought me out of the great variety from which you had to choose?" "Yes, father," sobbed the weeping boy; "that which pleased me at first seemed so poor and inferior, when I had them, to that which I saw farther on, that I could not be content, and always hoping to secure something to please me better, I could not make my choice, and now these are all I have. Oh, if I might go back once more!" "Not so, my son," said the king, "that cannot be; but let this lesson sink deep in your heart. As you go through life, enjoy each day all there is in it of pleasure and happiness; do not look back with vain regrets, nor live in anticipation of future joys, oblivious of those which are within your reach. Let each day bring you its measures of comfort and cheer. The present is all you are ever sure of; by wisely improving it your memories of the past will be pleasant and your future happiness will be assured."—*Presbyterian Journal.*

Preparation for Service.—There must be preparation before a man can do proper work for Christ. "We behold a strange combination of zeal and worldly-mindedness; great activity for the extension of religion in the earth, united to lamentable indifference to the state of religion in the heart." We believe that much to-day, which goes by the name of "Active Christian Service;" highly commended of men, is, in the sight of God, very superficial, and will receive from Him little, if any, commendation when the time comes for it to be tried. God looks at the motive

and rewards accordingly. Many a man would be glad to work for Christ, if he could be superintendent of a Sabbath-school, or engage in some other showy service to be seen of men, who otherwise could not be induced to take some lowly position to be seen only of God. The Scriptures distinctly teach us that God is better pleased with what *we are*, than with what *we do*. He loves obedience better than sacrifice. If we expect to please Him in our service, and be efficient and successful, we must obey His command, and "tarry until we be endued with power from on high;" then we shall be effective witnesses for Him wherever we go, even "unto the uttermost parts of the earth."—*Christian Standard.*

From "The British Friend."

Ministry—Profession.

By adhering to our ancient mode [of worship], the "one-man" system will be effectually kept at bay. This is important, in this day especially, when so many *outside* the Catholic pale make *mediators* between themselves and Christ of some favorite preacher, and do not go to worship, but to hear him. To follow a man, however, whatever sect he belong to, or however good he be, is not to follow Christ; for one is man and the other God. This danger exists amongst us as well as elsewhere. Meanwhile, the minister may be ruined by such homage, for the text has a completely changed significance now: "Whosoever will be great among you, let him be your minister!" We want more of the spirit of that Yearly Meeting doorkeeper who, when asked if S. Fothergill was in the Meeting, replied: "*Samuel Fothergill's Master is!*" Whoever goes after a man will find he depends upon a reed (at best) shaken by the wind.

I have been solemnly impressed with the error to be met with even in our Society—that some are not called to, and do not affect, so great a *profession* as others. I have known it asserted that for a minister, things would be wrong which would not be for another Friend. Is not this to make Clergy and Lay, and, what is as bad, to set down different standards of right and wrong—a thing our Great Master does not do? But, to speak of *profession*. I cannot see how any Friend can think he makes less than others—even any Christian; we may *live up* to it or not, but *we make* it all the same by the name we bear, and one as surely as another. This responsibility, I believe, we cannot escape. O that none may think that they can safely walk below their revealed privileges, and the liabilities to service any feel, by adopting the idea; "I don't make a high profession; *thou art holier than I.*" Such members of congregations are in no slight danger, and no regularity of attendance and pleasure in hearing ministers can make up for the want. Religion is an individual thing, and God a personal God. Not only is it an injunction: "Be ye clean that *hear the words of the Lord,*" but it is another, "Let every one that *winneth* the name of Christ depart from iniquity." It follows from the above that the highest standard of truth and duty any may set forth or live by, so it be Scriptural and sound, is binding also on those who hear or read of it, and seek to escape its obligation by telling their fellows *they do not make a high profession.*

The luxury of luxuries is that of doing good.

Do We Believe It?

We all believe in the omnipresence or omniscience of God, after our fashion. B how many of us lay them to heart? How many of us realize that God is everywhere present, is with us always, and that he knows us altogether? Do we really *believe* that it is with us in the darkness of the night at the silence of slumber? that he is with us, we wake, or as we go to our business or labor that he is with the matron at her home, with the man of business in his cares? Do we realize that he sees each transaction, hears each word, reads each entry in the ledger?

Does the treasurer, or trustee, or cashier or clerk realize this, as he "borrows" without leave from the bank, or from the employer? Does the politician believe this, as he pursues his dark and devious ways, covering up his tracks from the eyes of his fellow-men?

Still more, do we *believe* that all our most secret thoughts are known to God? Do the minister realize that each feeling of unhallowed ambition, of self-seeking, of jealousy to say nothing of a thousand other feelings are as plain to the eye of God as the sun in noonday? Do we lay it to heart that he sees and records each impure, each passionate, each revengeful thought? And does our life testify to our belief?

And do we believe that he not only knows and sees, but that he is present all the time with each one of us? Not seldom, persons are very anxious to learn whether their deceased friends are near, and are cognizant of their welfare. The feeling is not unnatural and perhaps it would help our feeble moral purposes, would aid us to resist temptation, we knew that the spirit of a departed mother or sister was at hand, looking on each as each thought.

But all this is misty, and lies in the region of the imagination. What we know is, the God is always at hand, reading us, knowing us, understanding us better than we understand ourselves. And the question to be considered is, Does this knowledge affect our lives? do we live as though all this were true?

There is another side to this. God is with the righteous. Things may look dark; but may join in hand against goodness, against justice, against the welfare of man. The throne of iniquity may frame mischief by law. Satan may exult. Yet God is with us. And "one with God is a majority." Here is strong consolation. Let us not be discouraged.—*Let us hope and work, and pray at trust.*—*Nat. Btpt.*

The appeal of the Omaha Indians in behalf of the Ponca tribe is a most remarkable document. They offer to share their land with the Poncas, and assist them until by their industry they can support themselves. It plain that the Omahas have nothing to learn from the whites as regards one of the most important Christian virtues; indeed, the charitable remembrance of suffering brethren should shame the representatives of the white race, whose kindness has not gone beyond lip service. It might be a good thing if the Omahas could send a few missionaries into the world. There is need for a spread of such ideas as these so-called savages so practically advocate. This generous offer is in the unauthorized work of a single individual, but the result of the well-considered wish of the tribe.—*Ledger.*

Natural History, Science, &c.

Fire from Friction.—A heavy shower of raining driven us to the shelter of our attaps, sat and amused ourselves with chatting of the good-natured Malays who accompanied us, and who were ever ready and willing to do us any kind of office. I seized this opportunity of learning the mode of producing fire, which is seldom described, but usually given for granted as known. My request that they would make fire was answered by one of the Malays selecting from amongst firewood a dry stick of hardish wood, about 15 inches long, which he cut with his *parang* into the form of a thickish lath, and having also made small notch on the narrow edge, stick number one was ready for use. Taking a smaller piece of wood of the same kind, about nine inches long, he pared it into a cylindrical shape, and cut one end straight off. Then taking the long stick on the ground with the side uppermost, and setting his feet firmly on the two ends, he put a piece of paper over the notch, and taking the small stick between both hands, as he squatted before it, he pressed the flat end on the smoothed surface of the larger stick immediately adjacent to the notch. He then rotated the small stick rapidly between his hands, pressing it down on the larger one, until by degrees a round hole was formed, and a ligneous powder was produced, which fell down the notch and made a little heap upon the paper. After turning this rubbish for about two minutes, the powder began to smoke, and then turning the stick as the increasing heat charred it, suddenly became red-hot, and the tinder thus heated only required a puff of breath at this critical moment to ignite the paper beneath. The exertion required was considerable, but of short duration.—*Collingwood's Naturalist's Rambles.*

Birds as Hat Ornaments.—The other day I went upon a new store in the city. The windows were fairly dazzling with color. A very sunbeam falling upon them, the shop was flashed back a rainbow of blue and green, red and yellow, indigo and vermilion, black and black and white. I paused to gaze. It was a store devoted to the modern art of adorning ladies' hats, bonnets, and dresses with birds and butterflies. All the corners of the earth had been ransacked to supply this new craze. Whole birds, birds' wings, tails, breasts, were here by the thousand. Butterflies and humming birds vied with each other in wealth of color and beauty of arrangement. It is true, there are many presses in London devoted to specimens of natural history," where these things may be purchased; but here is a shop full of them, as studies or specimens, but as articles of ornament. Travellers and others tell me that the slaughter as a trade has now reached proportions which threaten to be very extinguishing to some of the rarest, as well as gayest, species. One can understand this when it is stated on authority that a German dealer in his city, recently received a consignment of 900 dead humming birds, 80,000 ornamental birds of several varieties, and 800,000 pairs of eggs. This to one dealer alone; while at the same time all the other traders are increasing their orders to foreign shippers. There is something very sad in these figures. Surely women can not think about the subject, they would never promote this sacrifice of life for a mere freak of fashion. The rage

for feather trimmings has almost annihilated the ribbon trade of Coventry. Men, women, and children in that once busy city, are starving because fashion has produced a new style of ornament. So that to please the latest whim birds must die and children must starve. You may stand "on the bridge at Coventry" now and see scores of people loitering there, who, but for the supersedeure of ribbons by feathers, would be busily at work in the locked-up mills.—*London Letter to the N. Y. Times.*

Effect of Cold on Milk.—The effects of a low temperature on milk have been carefully examined by Eng. Tisserand, who recently communicated his observations to the Academie des Sciences. He found that if cow's milk is, immediately or soon after being drawn, placed in vessels at various temperatures between freezing point and 90° F., and the initial temperature is maintained for twenty-four or thirty-six hours, it will be found that the nearer the temperature of the milk is to freezing point the more rapid is the collection of cream, the amount of butter is greater, and the skimmed milk, the butter and the cheese are of better quality. These facts, he believes may be explained by Pasteren's observations on ferments, and their effects on the media in which they live. It is probable that the refrigeration arrests the evolution of the living organisms which set up fermentation, and hinders the changes which are due to their growth.—*Lancet.*

It seems to me that the fault of all theological systems arises from logical sequences drawn from one revealed truth. Now, for this kind of logic, I have no sort of respect. Human ideas are the proper materials for the processes of logic. A human idea I can comprehend. I can know all about it, and therefore it is a legitimate subject for my limited powers. I know what is meant by a triangle. I can therefore reason about it with confidence in my conclusions. The ideas of revelation are not human, but divine ideas, the conception of the infinite God. It seems to me that they are not proper subjects for human logic, and therefore, by applying reasoning to them, we are led into absurdity. Take the two opposite ideas, the free agency of man and the sovereignty of God; how many men have logically reasoned themselves into absurdity on one or the other of these subjects! Now, when we take acknowledged truth, and, upon either side, reason ourselves into absurdity, it is evident to me that we have passed the bounds set for human reason.—*Francis Wayland.*

In a recent effort to pay off a church debt, the children in a First-day school were asked to each earn something for a special contribution to this end. A little girl had earned thirty cents. "I'd like my money all in pennies," she said, "because then it will make more noise when I drop it into the box." That child was a good deal like some older folks. If they have anything to give, the temptation is to make as much noise with it as possible.—*Late Paper.*

Blessed are those who die for God,
And earn the martyr's crown of light;
Yet he who lives for God may be
A greater conqueror in His sight.

A. A. Procter.

Secreted.

Moreover, when the Lord sent me forth into the world, he forbade me to put off my hat to any, high or low; and I was required to Thee and Thou all men, without any respect to rich or poor, great or small. And as I travelled up and down, I was not to bid people Good morrow or Good evening; neither might I bow or scrape with my leg to any one; and this made the sects and professions to rage. But the Lord's power carried me over all to his glory, and many came to be turned to God in a little time; for the heavenly day of the Lord sprung from on high, and broke forth apace, by the light of which many came to see where they were.—*Journal of George Fox.*

Spiritual power is "from on high." It comes directly from the throne. Jesus "ascended up on high; he led captivity captive, and gave gifts unto men." "Far above all principality, and power, and might, and dominion, and every name that is named, not only in this world, but also in that which is to come," hath he sat down at the right hand of the Father, and hath "shed forth" this power upon the sons of men. It is not found in books, nor does it come from books. It is not to be found in the teaching of professors, or in the curriculum of the schools. It is a gift directly from God.

War.—When professing Christians become practical Christians, there will be no longer war.—*Bryan Hill.*

THE FRIEND.

FIFTH MONTH 17, 1879.

A thoughtful observer of the religious world will notice a marked difference in the tone of feeling which predominates in different individuals and circles. He will find some who seem strongly impressed with a sense of the great departures from the law of the Lord which abound in the world; and who are disposed to urge upon every one, whether they be matured Christians, or those whose feet have newly been turned into the way of righteousness, to enter upon every service which has a show of good, especially to proclaim abroad the truths of the Christian religion in the line of the professed ministry of the Gospel.

He will find others, who are equally desirous of seeing the kingdom of the Redeemer spread in the world, and who can adopt the petition taught to his disciples by our blessed Saviour when personally on earth, "Pray ye to the Lord of the harvest, that He may send forth more laborers into his harvest," but who feel that those who enter this harvest field must experience a preparation for their work, and must know the Lord of the harvest to apportion to every one his proper place and line of duty. These recognize the fundamental principle that

"Transformation of apostate man
From fool to wise, from earthly to divine,
Is work for Him that made him,"

and that no labors of ours will promote that end, unless the Divine blessing rests thereon. Hence they are concerned for those who are newly brought under the government of the

Spirit of Christ in their own hearts, and are yet comparatively inexperienced in the dangers and difficulties that beset their Heavenly journey, that they may be trained in a watchful and humble waiting on the Lord to know the frequent renewing of spiritual strength from Him the everlasting fountain of all good, and be instructed of Him by the perceptible though gentle, manifestations of his will, as to what they should do and what they should leave undone. They feel assured that to all those who are preserved in this watchful, obedient and humble state, the Lord will open the line of service which He designs they should occupy, and in laboring out of which, they will be more likely to mar than to help his cause.

We noticed with interest at our late Yearly Meeting, the language used in the public communications of several Friends, implying their belief that there were those under the preparing hand, who would be made preachers of righteousness to others, if they did not frustrate the Grace of God extended to them, by their own unwatchfulness or unfaithfulness, or were not led astray by unskilful advisers. Surely all can unite in the desire that nothing may hinder the gracious designs of the Almighty towards these; and that it may please Him abundantly to pour out of his Spirit on sons and daughters, so that they may be able to "prophecy" in his name, and be instrumental in spreading a knowledge of the truth over sea and land!

In John Churchman's narrative of his visit to Great Britain, he mentions attending a meeting where, he says, "there were many tender young people, to whom I felt a salvation in the love of Truth; but before I thought it safe for me to stand up, a young man not much like a Friend stood up, and began to exhort them to be faithful in discharging whatsoever the Lord required of them, and how eminently He would be with and qualify them for his work; as though they were all appointed to enter upon some extraordinary great service. My mind was much grieved, for I thought it would be more suitable for them deeply to retire and wait for the virtue of Truth and sap of life, to experience a growth in grace and the knowledge of God, that they might be prepared to work out their own salvation. To expect a young tree to produce abundance of fruit before the branches are come forth and spread with strength to bear it, is not reasonable."

Like John Churchman, there are many in this day, who are grieved when they hear unwise counsellors urge the visited youth to enter upon labors for which they are not prepared, and the effect of which often is, to injure the tenderness and humility which constitute the most fruitful soil for the growth of Christian graces, and to encourage a spirit of self-sufficiency and self-confidence.

But while it is needful that all should depend on the Lord's blessing in their religious labors, let not any lag behind the true Guide through slothfulness or excessive diffidence. Services proportioned to their strength are called for, even from the very young; and as these are performed in simplicity and faithfulness, there is a blessed increase of light and strength, and such come to experience the fulfillments of the Scripture declarations, "The righteous also shall hold on his way, and he that bath clean hands shall be stronger and stronger."

SUMMARY OF EVENTS.

UNITED STATES.—The increase of business at the grain elevator at Washington street wharf, Philadelphia, has necessitated a number of alterations in the working capacity of the elevator, and also an enlargement of the machinery and other apparatus. One of the largest conveying belts in the world is about to be placed in position. This has been manufactured in one continuous piece of smooth rubber and canvas. It is 1145 feet in length, by 36 inches in width, and weighs over 7,000 pounds; this belt conveys the grain along the length of the machinery and other apparatus.

Extensive forest fires are raging in various parts of the Middle and Eastern States, owing to prevailing drought. Great damage has been done in the vicinity of Scranton, Pa. Forest fires are also raging on the mountains near Wilkesbarre, and also in the Hancock Mountains in Western Massachusetts.

During the past year there were 563 fires in Boston, destroying buildings valued at \$144,195, and their contents at \$250,256.

Another death is reported of those injured by the mine disaster at Wilkesbarre. Immense quantities of black damp issue from the mouth of the mine, indicating that the fire covers a large area. A great explosion of black damp occurred at the mine, which the mine is being flooded, rises high enough to shut off the air. It will probably be necessary to flood the mine to a depth of 300 feet, in order to extinguish the fire.

There arrived during last month at the port of New York, 14,391 passengers, 11,691 of whom were immigrants. During the corresponding period of 1878, there were 10,307 passengers, of whom 8,529 were immigrants.

A number of Southern emigrants to Kansas recently passed through St. Louis on their return to their former homes in Warren county, Mississippi. It is stated they were not pleased with their reception in Kansas, and were glad to return to their former homes. The Convention, declares the causes of the colored exodus to be, the low price of cotton, and the partial failure of last year's crop, the bad system of planting, and bad management in some sections, and the circulation of insidious reports that the civil and political rights of the negroes are endangered, or are likely to be.

During the past week, a bill to prevent military interference in elections has passed the U. S. House, and was sent to the President on the 10th inst. The President has returned it without his approval.

The mortality in Philadelphia for the week ending at noon on the 10th, was 296. Of whom 174 were adults, and 122 were children, 73 being under one year of age.

There were 48 deaths from consumption; convulsions 13; cholera infantum 4; diphtheria 4; disease of the heart 11; scarlet fever 9; typhoid 5; inflammation of the brain 10; inflammation of the lungs 20. The deaths in New York for the same period numbered 509.

Markets.—U. S. sixes, 1881, registered and coupon, 107 1/4; 1882, 107 1/4; 1883, 107 1/4; 1884, 107 1/4; 1885, 107 1/4; 1886, 107 1/4; 1887, 107 1/4; 1888, 107 1/4; 1889, 107 1/4; 1890, 107 1/4.

Cotton.—Sales of middlings at 12 1/2 a 13 cts. per lb. Petroleum.—Grade 7 1/2 cts.; standard white, 8 1/2 cts. for export, and 9 1/2 to 10 cts. per gallon for home use. Lined oil, 59 cts. from American seed, and 60 a 61 cts. per gallon from Calcutta seed. Lard oil, 48 a 49 cts. crude sperm, 81 a 82 cts. bleached winter, 97 cts. a \$1.00; red-foot, 75 cts. per gallon for prime.

Flour.—Minnesota extra at \$4.75 a \$4.87 1/2 for fancy; Penna. do., \$4.75 a \$5.25; western, \$5.25 a \$5.75. Fine flour, \$2.75 a \$2.87 1/2.

Grain.—Wheat is in good demand, and a slight advance in price. No. 1 soft winter, red, \$1.15 a \$1.16; amber, \$1.17 a \$1.18. Rye, 58 cts. Corn, 39 a 41 cts. Oats, mixed, 32 a 33 cts., and white, 34 a 35 cts.

Seeds.—Clover, 5 a 6 cts. per pound; Flax-seed, \$1.40 a \$1.42, and Timothy \$1.28 a \$1.40 per bushel. Red-top, Ruziz, Apple-sidell, Balbais, cinque, \$2.50; Red-top, \$2.20 a \$2.35. Strawberry-seeds, 35 a 40 cts. per quart.

Hay and Straw.—Prime timothy, 70 a 80 cts. per 100 pounds; mixed, 55 a 60 cts.; straw, 30 cts. a \$1.00 per 100 pounds.

Beef cattle were in fair demand—5000 head arrived and sold at 10 cts. per lb. as to condition, 14 cts. were also in demand—about 6900 head sold at 5 a 6 cts.

per lb., according to quality. Sheep, 4 a 61 cts., a condition. Good spring lambs, \$4.50 a \$5 per head.

FOREIGN.—The weather in London on the 7th i was stated to be variable and very cold, with show of hail and snow. The same weather was prevalent throughout the kingdom generally.

Last year there were registered in the United Kingdom 1,152,258 births, and 716,163 deaths; showing excess of births over deaths of 436,400. The actual increase of population last year cannot be ascertained there were no complete records of the balance between emigration and immigration. The increase in 1878 was, English 22 per cent., Scotch 34, Irish 27. Of British emigrants, 54,095 went to the United States, 10,697 to British America, and 36,075 to the Austral colonies.

In the House of Lords, the Prince of Wales presented the petition of 3258 Norfolk farmers in favor of the bill legalizing marriage with a deceased wife's sis

He said he believed the measure would be of great advantage to the community, and he would support Lord Houghton (Liberal) moved the second reading of the bill. The Government, represented by Lord Crook, strongly opposed it, and the second reading was defeated by a vote of 101 to 81.

In the House of Commons a declaratory resolution in relation to the proposed bill for legalizing marriage, except in cases where actual pecuniary loss has been incurred, was carried by a vote of 106 yeas to 65 nays.

The Metropolitan Board of Works, after the recent experiment on the Thames embankment, find that electricity costs 21 per cent. an hour less power than the best of gas, giving equal light.

The defects connected with electric lighting prevent its general adoption.

The Press Association announces that the War Office has issued circulars asking for 1200 volunteers from a regular army for the Cape.

Bonities are also offered to the men in the militia, and to reserves, who volunteer.

The consular reports from France show that during the first quarter of 1879, the imports of that country exceeded the exports by \$77,000,000. The imports of articles of food show an increase of \$34,000,000. Textile imports and exports of silk, manufactured and unmanufactured, have slightly decreased.

The importations of raw silk and cocoons have fallen off \$2,000,000 francs.

Minister Say reports, receipts for the first four months of 1879 have exceeded the estimates by 30,000,000 francs.

There are now only two vacancies in the French Chamber, which consists of 335 Republicans, 83 Bonapartists, and 63 Monarchists.

The portion of Spain and the adjacent islands is 16,255,800, including 40,741 foreigners. This is an increase of 952,324 since 1870; 90,000 Spaniards inhabit Algeria, and 62,000 other countries.

In the debate on the tariff in the Reichstag on the 8th inst., Windthorst, the Ultramontan leader, spoke in favor of protection. Windthorst said, we have grievances and opposition in Church matters, of which they had to complain, where the throne, the fatherland and the most vital interest of the country were at stake the Centre would always support the Government.

Subsequently a motion referring a portion of the tariff bill to a committee of 28 members was adopted.

The French Financial Com-missioners have refused to sign the programme of reform elaborated by the French and English members of the Commission, because it renders the appointment of foreigners at the head of the administration compulsory, whereas the Turks desire the introduction of foreigners to be mere optional.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Application may be made to

John W. Bidle, No. 726 Buttonwood St.

Elizabeth Smith, No. 1110 Pine St.

PHILADELPHIA.

From "The British Friend."

Man! Know Thyself.

For pith and brevity this duty could not have been better inculcated. The three words he said to contain the sum and substance of Paul's exhortation to the Corinthian believers: "Examine yourselves, whether ye be of the faith; prove your own selves. Know not your own selves, how that Jesus Christ is in you, except ye be probated?" There are other three words very familiar to Friends: "State of Society," the result of this process of self-examination, especially at the time of our annual gathering; and as this time is close at hand, it has occurred to us that the presentation of sundry questions on points intimately connected with our aggregate or church condition, might very profitably come before hand under individual serious consideration, in the way of helping to a sound conclusion, since what we are individually, we are a Church. Some of these questions are as follows:—

How is it there is amongst our members a gradually increasing conformity, in various ways, to the spirit, maxims, and corrupt practices of the world, unquestionably opposed to New Testament teaching, as Friends used to think? Has the tendency of these things so changed as to be promotive of heavenly-mindedness, or has not the worldly and acquired the ascendancy in us? How has the character of modern literature, and the introduction of music and singing to our families, influenced our members and tended to bring about this result? And how is it that the writings, memoirs, and records of our early Friends are now so little in favor, and wholly rejected?

How is it that our ministers, in their preaching and teaching, now dwell so little on the laws and principles professed by us? The teaching of the gospel is said by some to be the primary duty, but our principles can never be dissevered from the gospel—they being the result of the teachings of Christ under the quickening power of the Holy Spirit, and suitable subjects for exhortation and vocal prayer. Ought we not also to hear more than the "do, of the practical character of our simple mode of silent worship, of the wondrous work of the Holy Spirit, and of the Headship of Christ in our Church? &c.

How is it that we now so seldom hear our ministers speak of the great benefit and privilege of the practice of private retirement, and

waiting on the Lord in the privacy of our own closets?

How is it there is often, on the part of many, so little apparent interest in our meetings for worship, unless there is much vocal ministry? And, further, how can we satisfactorily explain the neglect, altogether, in very many cases, of our members attending meetings, except on First-day mornings? and, again, how is it so many of our members go to other places of worship in preference to our own?

How is it we bear so little now-a-days of the Christian's duty of self-denial, and taking up the daily cross, and that writers in our public papers satirically tell us, "the self-denial of the Quakers of the present day is a very comfortable sort of thing, and few need shrink from it?" &c.

How is it there is such a change of view and practice in regard to the attendance of places of amusement, concerts, oratorios, "vain sports?" &c.

How is it that Friends are taking to wearing mourning?

Why is our protest against "Water Baptism" and partaking of the "Sacraments" so far relinquished that we allow our members liberty in regard to it, forgetting this used to be one of the distinctly defined testimonies for which our forefathers suffered so much? Do we not thus practically ignore our former protest?

Can Friends consistently with their professed views take part in what are called "Revival Services"? Is it not desirable to avoid as much as possible the adoption of questionable expressions commonly used on such occasions, such as, "Do you believe?" "You have nothing to do but to believe!" "Are you saved?" "Have you come to Jesus?" "Have you told Jesus?" "Go and tell Jesus;" and many others which have been very freely adopted by some of our members? and is it not important to guard against the very frequent and familiar use of the name of Jesus? "Jesus" by itself sounds wanting in reverence as used by many persons who speak in public.

Are our missionary efforts in India and Madagascar really helpful in spreading our genuine Christian profession? Or can it be admitted that the preaching "the gospel of the grace of God" can be complete if ignoring our distinctive principles?

Does the reported increase of the number in membership with us really indicate an increase of spiritual life?

Are we not in danger, in our earnest zeal for the Lord's cause, of diverging too far from the old line of our profession, and in the increased activities of the present day also in danger of forgetting the peculiar and very special work in which our forefathers were so manifestly owned and blessed of the Lord? Instead of profiting by their faithful example, and following in their footsteps, are we not

carving out for ourselves another way more in accordance with our own liking and in imitation of others?—thus doing more harm than good, by leaving a sphere so clearly our own, and taking up work committed to others, for which they may be much better qualified.

Is it sound reasoning, or does it not rather indicate a want of faith in our professed principles and practice, to say that our meetings for worship, "composed as they are of old and young, rich and poor, ignorant and learned, converted and unconverted, are not adapted to present times?" Has the Truth changed, has the Lord's arm become shorted, has his Spirit lost his leavening, converting, teaching power; and can He not now work, as formerly, in his own way, bringing all states and conditions under his all-constraining influence?

Is it true that the wonderful influence for good, once exerted by our Society on other branches of the Church of Christ, so that everywhere it was beneficially felt, is rapidly passing away, as we are assured by some, not of our Society?

Of the important and responsible commission of ministry as acknowledged by our Society, is it the same as formerly, or has it not lost much of its reaching power; and what has become of that remarkable gift of many ministers in former days of "discerning of spirits," and so very strikingly preaching to the states of individuals present; and what is the reason of what used to be called "family visits" being so much out of favor now? There must be a cause, and may it not be found in the humiliating fact of a too superficial experience of the preparing, leading, and practical guiding of the Head of the Church?

How much have we left of what used to be considered genuine Quakerism? One thing after another is relinquished under varied pleas, and legislative enactments have also (as in the case of oaths) relieved us of much responsibility, and this we should be thankful for; but surely we can never with safety set aside the teachings of our Divine Master himself in what we profess, however much we may wish to find an easier path to the kingdom. He has told us, and surely we would not wilfully turn away from his words, "If any man will come after me, let him deny himself and take up his cross," &c. "For strait is the gate and narrow is the way (now, as ever) that leadeth unto life, and few there be that find it."

Has the subject of Birthright membership yet obtained that close consideration which it deserves, as calculated to show how very much of our degeneracy, as a church, cannot but be caused by the unconvinced and worldly-minded being held members and entitled to legislate for the Church?

On seriously pondering the above queries, the reader cannot dispute the evidence which they afford of conformity to what may be termed a worldly profession of Christianity

on the part of too many under our name—injurious to Friends themselves, not less than to those around them. We cannot influence others for good, if we countenance them in practices at variance with the Christian calling as set forth by the Apostle James—"Pure religion and undefiled before God and the Father, * * * keeping ourselves unspotted from the world."

The Nihilists of Russia.

Civil government, the family, property and the institutions of religion, are at this moment threatened throughout an empire of eighty millions of people. "The Russian National Secret Society" has been given as the name of the combination which aims at this result; also, "The Society for the Freedom of Russia." But the name "Nihilists," assumed by these agitators in the "Confessions of a New Generation," a series of letters published in a Russian journal in 1864, is now their universally recognized designation. Derived from the Latin, *nihil*, signifying nothing, it denotes that they believe in nothing. Their philosophy is the extreme of skepticism. The being of God, the authority of law, the right of property, the future or even the present life of the soul, have all been swept away out of the minds of these reckless agitators. The history of these opinions in Russia, and of the societies organized to propagate them, reaches back to the formation of various secret orders which sprung up after the French Revolution. These led to an attempt at revolution which was defeated in blood,—December 19, 1825, Citizens of St. Petersburg remember that terrible day as one of dreadful carnage. All the principal streets of the capital were red with the blood of the victims. Then followed the stern reign of Nicholas I. A secret society was formed at this time under the name of "Decabristy," or Decembrists, in memory of the month in which the massacre had occurred. Its object was to dethrone Nicholas I. in order to form a constitutional government with Constantine Paulovitch (an elder brother of Nicholas I.) at its head. An organ called the *Kolokol*, (The Bell) was established in its interests in London, with the famous Herzen, who died not many years ago in Switzerland, an exile and under sentence of death by the Russian government, as its editor. His eminent abilities and fanatical enthusiasm gave him great influence, especially with young minds.

Through the influence of this journal and its editor, new societies under such names as "Land and Freedom," "Young Russia," &c., were organized throughout the Empire.

Undoubtedly one cause for the rapid spread of this fanatical conspiracy has been the severity and cruelty of the Russian administration. The terrible punishment of the knout, and the equally dreaded fate of banishment to Siberia, have been familiar instruments of vengeance and repression in the whole history of the Empire. The government is an absolute despotism, and as such is out of harmony with all the ideas of the age. But that some deeper cause than this must be sought for so vast and malignant a social phenomenon, is evident, because the present Czar under whom nihilism has attained its greatest development, has been the most benevolent and progressive of all the rulers of modern Russia. He has promoted internal improvements, granted valuable civil privileges, such as trial by jury,

maintained through the greater portion of his reign the freedom of the press, and emancipated millions of serfs, giving them an interest in the land. The true cause of this revolt against social order is atheism, and the spread of atheism is due especially to the corruptions and superstitions of the Greek Church which has ceased to feed the people with the bread of life. The neglect and disuse of the [Bible], the support of a profligate, drunken, gambling priesthood by taxation, the letters thrown around religious inquiry, making membership in the Greek Church compulsory for those who had been born in it, are an adequate explanation of this fearful development of atheism in its boldest and most intolerant form. This explains the spread of this movement so largely among educated men and even the nobility. It is not the uprising of a mob howling for bread, but a revolt of the human mind against superstition and oppression.

The determination to destroy every institution which is based on the idea of God is a natural manifestation of this fell spirit. The assassination of rulers, the blind, passionate, vindictive striking at law by men whom cruelty has embittered and skepticism has absolved from restraint, is not surprising. Nor is it strange that the methods of such men should display a grim, sardonic cruelty, which thrills society every where with horror. Illustrations are abundant. On the 8th of February, a servant girl went to the office of the *Klarkoff Messenger*, and stated that her master being dead, her mistress had despatched her to beg that a space be left in next day's paper, and that the space should be bordered with black for the insertion of the gentleman's obituary. The girl said that her mistress was unable to write the announcement herself, but would send it to the office later in the evening. The announcement was never sent, and the entire issue of the paper appeared with the small black-bordered space, empty. Everybody noted it, and wondered for whose name the space was intended. In the evening Prince Krapotkin the Governor of Kharkoff was killed, and simultaneously several rockets were sent up from different ends of the city. The secret power afterwards avowed itself the author of the assassination, and made a detailed complaint against his administration. In Odessa, as the *St. Petersburg Zeitung* announces, Colonel Krupp, of the gendarmerie, was murdered by an unknown man in his own house. Near the corpse was found a paper on which was written in red letters: "With the compliments of the Social Revolutionary Executive Committee! So perish all tyrants and their coadjutors!" General Baron Dretelent, head of the secret police, received a letter which ran thus: "The Secret Committee well knows that you do not fear death, but it also knows that you have one passion and love in the world, and that is your daughter. The Committee have, therefore, decided to strike you through this child of yours." A young student who had steadfastly refused to join, wrote piteously to his father to come and take him home, stating the influences by which he was surrounded and that his life was in danger. The father hastened to the place, but before he reached it his son was dead, killed by an unknown hand.

Those who adopt the new views cherish the utmost contempt for the old order of things. Children despise their parents and

repudiate their authority. Women, as well as men, affect contempt for the mere ceremony of marriage, and enter into the relation without the legal formalities. They cut off their long hair, and many have entered professions. Young ladies, even of the highest ranks society, have dressed themselves as peasants and sought mental employment, that might instruct others in their peculiar views. Tombovske, a wealthy princess, and now in court circles, was discovered among peasant washerwomen with this object. In schools the young girls nearly all became converts.

It is not surprising that the government profoundly alarmed, nor that terrible repressive measures have been adopted. The evil is impossible to foresee. Like the French Revolution, it is, of course, a terrible incident yet only an incident in the advance of a race toward universal truth, holiness and freedom. It is attended with a remarkable intellectual quickening. It will remove, roughly, but effectually, some of the chief fetters on human progress. It will help to secure civil and religious freedom for Russia, a state once gained will never be lost. Its curses, like those of the Reign of Terror, will serve as a beacon to warn the world against the atheism from which they spring.—*2*

Christian Statesman.

"For The Friend"

Morning Thoughts.

It is written as one of the essential duties of man, that he "keep himself unspotted by the world." This short sentence implies much and requires more than he is capable of accomplishing in his own might and strength, no matter how determinedly he may strive. It is the Spirit of the Lord alone that can enable man, who is by nature of the world, to live and mingle in the world, and keep himself unspotted from it. Protection from captivity by temporal things cannot be thoroughly known except through obedience to the invisible power, which, if received in the best way of its coming, will not only preserve from terrestrial bondage, but give ability to use and enjoy the favors beautifully bestowed upon us in their proper places; permitting them to enslave the soul, and bind it in the earth, but enabling us to prize them as blessings on the way to a more durable and peaceful abode where temptations and trials are no more.

Ohio, 5th mo. 12th, 1879.

It was a spiritual and heavenly vision which the prophet Daniel had, when he saw the interpretation of the king's dream: "A stone cut out of the mountain without hands, smite the feet of the image, and break in pieces iron, the brass, the clay, the silver, the gold, and become a great mountain that filled the whole earth." A remnant in this age are cut to the same everlasting Light and spirit eye, whereby they see the power of God, signified by that stone, prevail against all imagery, not only without, but within also; they know the ground of it shaken and remove. The dark thoughts and imaginations of man are the grounds of the imagery upon the face of the earth; and that power that breaks them down, and brings every thought in the obedience of Christ, is the antitype of the stone and its work, revealed to Daniel, and dreamed of by the king. In this day of fig-

knowledge some are come to witness this stone become a great mountain, and to the earth, and to be the chief foundation corner-stone, elect and precious; the rock binding-place of the righteous in this, and ages. These abide in it, whereby they are served from making likenesses and images themselves, either of things in heaven, or on earth; and out of the many mixtures prefigured by the iron, brass, clay, silver, &c.; and the defiling and corrupting themselves therewith. There is not another means of preservation, nor of coming to receive the stone which John, in his vision and relation, saw, wherein is the new name given, which none knoweth, save he that hath it.—William Shewen.

The People of Turkey.

The inhabitants of Turkey are by no means one race, but are a collection of tribes, some former history and present characters differ as much from each other as do some of some nations who are entirely independent.

The author of the work from which was taken the account of Turkish Superstitions, published in previous numbers of this journal, describes the peculiarities of the different races which inhabit the European part of the Sultan's dominions. Of these the Greeks appear to be the most prominent in intellectual force of enterprise. In illustration of this latter point, she relates a conversation which she had heard between two medical men of Constantinople, one of whom, to use his own expression, said, "There is an immense amount of gold in the Greek."

"Gold!" repeated the other, waxing hot, "Too hot, so, I believe: there is no telling where the Greek's enterprising spirit may not lead him, or where his ambition will stop! Listen to my experience on the subject and judge for yourself. Some years ago I was asked by a foolish old Greek I knew very well to take his son, a youth of twenty, into my service. According to the father's recommendation, he is a good Greek scholar and knew a little Latin. I asked the father in what capacity was to engage him. 'Any you like,' was the reply; 'let him be your servant—your slave.' 'Very well; but he will have to clean my boots and look after my clothes!' [I replied] was the response, and I engaged his son.

"On the following day my new valet entered upon his duties. He was a good-looking, intelligent fellow, and at first exactable in the performance of his functions; but gradually he became lax, absent in manner, and negligent; although steady and quiet in his conduct. One day the mystery of this change was revealed on my returning home unexpectedly, and finding the fellow, instead of cleaning my boots, which he held in his hand, deeply plunged in one of the medical works on my table. In my anger at seeing my papers and books meddled with, I brought my boots into contact with his head, telling him that if ever I caught him again at that part of thing, he would be punished more severely. 'Forgive me,' said he, in a very obedient manner, and walked demurely out of the room. He showed, however, no signs of improvement, and subsequently I discovered him committing no less a piece of impertinence than copying some prescriptions that

lay on my desk. This was too much; so, as a punishment, I made him take one of the potions; but on the next day he calmly told me that the *intrico* had done him good, having calmed his blood and cleared his head! Of course, I dismissed the fellow and replaced him by an Armenian, who answered my purpose better, though he did dive now and then rather extensively into the larder. For some years I lost sight of my former valet and had forgotten his very existence till it was brought to my recollection in the following unexpected manner. One day received a pressing message to go at once to the house of D—Pasha to see a sick child and hold a consultation with his new *hekim bashi* (doctor) on its case. At the appointed hour I went, and on entering the *konak* was ushered into the selamluk to await the arrival of the other doctor who was to lead me into the harem. In a few minutes my supposed colleague walked in, hat and gold-headed stick in one hand, while the other was extended to me, with the words (good morning, doctor). The face and voice transfixed me for a moment, but the next presented to me the fact that my former valet stood before me, claiming the right of holding a consultation with me. Whereat I was on the point of giving vent to my indignation, by seizing him by the collar and ejecting him from the apartment, when he quietly said, 'Excuse me, doctor, but I stand before you in right of the diploma I have obtained from Galata Serai. Allow me to submit it to your learned and honorable inspection.' There was no denying the fact; the fellow's diploma was in perfect order. My anger cooling, I consented to consult with him, when he again incensed me by venturing to take a view of the case opposed to mine. His opposition, however, was only momentary; for, taking the upper hand, I dictated my directions to him, and he, yielding with a good grace to my experience, carried out my orders with great precision. I had subsequently many opportunities of meeting him, and must in justice say that he turned out one of the best pupils of Galata Serai, and the most grateful man I have ever known. He is at present attached to the Red Cross Society, to which he gives the greatest satisfaction."

The Albanians, who inhabit the ancient provinces of Illyria and Epirus, which are mostly rough and mountainous, are a warlike and turbulent people, among whom robbery and brigandage are very common. Yet they are trustworthy, and very respectful to the female sex.

During a journey, which our author was making to a watering place in Albania, while the party halted for a luncheon in a mountain gorge, a company of armed Albanians suddenly appeared. The leader of the band, she says, "inquired who I was, and declared he was astonished at the independent spirit of the *Taglis* lady, who, in spite of fatigue and danger, had ventured so far.

"He willingly accepted our offer of luncheon; first dipping a piece of bread in salt and eating it. My horse was then brought up; the chief stood by, and gallantly held the stirrup while I mounted. I thanked him, and we rode off at a gallop. After we had gone some distance on our road, my friend heaved a deep sigh of relief, and said to me, 'Do you know who has been lurching with us, holding your stirrup, and assisting you to mount? It is the fiercest and most terrible of Albanian

brigand chiefs in this neighborhood! For the last seven years he and his band have been the terror of this kaza, in consequence of their robberies and murders, respecting none but those of your sex,—guided, I presume, in this, by the superstition, or let us say point of honor, some Albanians strictly observe, that it is cowardly and unlucky to attack women.'"

"The respect entertained for women accounts for a strange custom prevalent among Albanians,—that of offering to strangers who wish to traverse their country, the escort of a woman. Thus accompanied, the traveller may proceed with safety into the most isolated regions."

"A friend related to me a strange adventure he had with an Albanian ex-brigand, who for some time had been in his service. This gentleman was a millionaire of the town of P., who in his younger days often collected the tithes of his whole district, and consequently had occasion to travel far into the interior and bring back with him large sums of money. During these tours the faithful Albanian never failed to accompany his master. On one occasion, however, when they had penetrated into the wildest part of his jurisdiction, his servant walked into the room where he was seated, and after making his salute, said, 'Chorbadi, I shall leave you; therefore I have come to say to you goodbye.'"

"What," said the astonished gentleman, "is this to become of me in this outlandish place without you?"

"'Oh,' was the response, 'I leave you because I have consented to attack and rob you, and as such an act would be cowardly and treacherous while I eat your bread and salt, I give you notice that I mean to do it on the highway as you return home, so take what precautions you like, that it may be fair play between us.' This said, he made a second salute and disappeared."

"He was as good as his word; going back to his former profession, he soon found out and joined a band of brigands and at their head waylaid and attacked his former master, who, well aware of the character of the man he had to deal with and the dangers that awaited him, had taken measures accordingly and provided himself with an escort strong enough to overpower the brigands."

(To be continued.)

For "The Friend"

The Kingdom of God and Christ Declared.

From the writings of Francis Howgill, who was imprisoned for his testimony to the truth, until death. By James Backhouse. London, 1823.

"The Lord hath prepared his throne in the heavens, and his kingdom ruleth over all; his dominion is an everlasting dominion; He is immortal: his kingdom is so; He is Light: his dwelling place is so: therein is no uncleanness, nor error shall be: it is eternally glorious: a quiet habitation: it is unsearchable and undeclawable; in it all who believe come to enjoy Him, who is the fulness of all things, either visible or invisible; who is eternally, blessedness itself; who makes all that believe in Him to partake of his kingdom, grace, power, dignity, dominion and celestial glory.—But these things are hid from the world—from them that are not redeemed from the earth. When Christ taught them that followed Him, he exhorted them to 'Seek first

the kingdom of God and his righteousness,' Matt. vi. 33, even while they were in the body; and he said to the Pharisees, 'The kingdom of God is within you.' Some may say, need we seek that which is in us? yea, it is like treasure hid in a field: it is like a grain of mustard seed among many great seeds, which is not easily found: it is like a piece of silver lost in the house among much rubbish, till that be swept away it will not be found; all must dig deep, search narrowly, and sweep clean before they find it; for although Christ said to the Pharisees, 'The kingdom of God is within you,' He did not say they were possessors of it; but to the disciples whom he taught to pray in faith, 'Thy kingdom come,' He said, 'Blessed be ye poor for yours is the kingdom of God.' Luke vi. 22. They had seen and were possessors of it; and he also said unto them, 'There be some of them that stand here, which shall not taste of death till they have seen the kingdom of God come with power,' Mark ix. 1, and his words were fulfilled; and they declared what they had felt, and said 'The kingdom of God is not in word but in power.' And Paul writing to the Romans who were made partakers of the same power and kingdom, said, 'The kingdom is not meat and drink, but righteousness, and peace, and joy in the Holy Ghost.' Rom. xvi. 17. And to the Colossians who had waited for and believed in it, he said, 'The Father hath made us meet to be partakers of the inheritance of the saints in Light, who hath delivered us from the power of darkness, and hath translated us into the kingdom of his dear Son.' And to the Hebrews he says: 'We who have believed do enter into rest; and these things were witnessed while in the body, and felt within by the seed immortal, by them that witnessed the birth immortal to live in them; and all that ever come to see the kingdom of God, which is spiritual, must wait in the Spirit, that so God, and his kingdom, and the things of his kingdom, may be felt, seen, and enjoyed, which is glorious.' The saints looked not after any other glory, but that which stood in eternal life, and the city they sought after, was that which God is the maker and builder of; and they looked for, and waited to receive of his power, in which the kingdom standeth in this life; and to know and enjoy his eternal dominion and authority. I do not say the full weight of glory, which is that which all his saints in measure witness, and in due time come to enjoy through faith. For by faith they come to see him who is invisible; and the things of his kingdom, which is invisible, spiritual, and eternal. The kingdom of God is come nigh unto many, and his power and the salvation of Christ is seen by many. Honor and praise unto him everlastingly, who is the only potentate that puts all authority under his feet, that God may be all in all; but every one must come to feel the kingdom first in himself, which is as a little grain, and believe in it, before he can know wherein it consists. And after it is in some measure known, this is still far short of the eternal weight of glory; yet he that believes is entered into rest, and made partaker of the heavenly gift, power and grace which is glorious, and witnesses a heavenly place in Christ Jesus; but there nevertheless remain many enemies to be subdued, and much of the heavenly habitation, which they see not, to be revealed, as there is an abiding in the power of God in which the kingdom stands, even as

Israel, the pure type, had much land to possess and many enemies to be subdued, after they had obtained an entrance in the land; and after there is an entrance into the true rest, and some possession therein enjoyed, there are yet many enemies to be subdued, and much of the heavenly inheritance to be enjoyed by them that stand in the power which gives dominion over sin, the devil, hell and the grave."

Millville, Orleans Co., N. Y., 5th mo. 6th, 1879.

Selected.

TRAILING ARBUTUS.

Under the leaves that are brown and ere,
Leaves withered and dead that fell last year,

A miracle fresh each spring is wrought,
As sweet as a kindly human thought,

Fair as the face of a maiden pale
Who blushes beneath a bridal veil;

The dainty Arbutus buds and blows,
Leaf of the lily, breath of the rose.

The "darlingest" flower that children know,
They seek and find it under the snow,

With fairy blossoms and spring of green;

Dear Trailing Arbutus, wreath-time's queen!

M. A. M.

Selected.

WORK AND WAIT.

A husbandman, who many years
Had plowed his fields and sown in tears,
Grew weary with his doubts and fears.

"I toil in vain! These rocks and sands
Will yield no harvest to my hands;
The best seeds rot in barren lands.

"My drooping vine, is withering;
No promised grapes its blossoms bring;
No birds among its branches sing.

"My flock is dying on the plain,
The heavens are brass—they yield no rain,
The earth is iron—I toil in vain!"

While yet he spake—a breath had stirred
His drooping vine, like wing of bird,
And from its leaves a voice he heard;

"The germs and fruits of life must be
Forever hid in mystery;
Yet none can toil in vain for Me.

"A mightier hand more skilled than thine,
Must hang the clusters on the vine,
And make the fields and harvest shine.

"Men can but work; God can create,
But they who work, and watch, and wait,
Have their reward, though it come late.

"Look up to heaven! behold and hear
The clouds and thunders in thy ear—
An answer to thy doubts and fears."

He looked, and lo! a cloud-draped car,
With trailing smoke and flames afar,
Was rushing from a distant star.

And every thirsty flock and plain
Was rising up to meet the rain
That came to clothe the fields with grain.

And on the clouds he saw again
The covenant of God with men,
Re-written with His rainbow pen:

"Seed time and harvest shall not fail,
And though the gates of hell assail,
My truth and promise shall prevail."

The Use of the Shoe in Connection with Marriage Customs.—Ruth iv. 7, 8.—"At a Jewish marriage I was standing beside the bridegroom when the bride entered; and, as she crossed the threshold, he stooped down and slipped off his shoe, and struck her with the heel on the nape of the neck. I at once saw the interpretation of the passage in Scripture respecting the transfer of the shoe to another, in case the brother-in-law did not exercise his

privilege. The slipper, being taken off indoors or if not, left outside the apartment, is placed at the edge of the small carpets on which you sit, and is at hand to administer correction, and is here used in sign of the obedience of the wife and the supremacy of the husband. The Highland custom is to strike for 'go luck,' as they say, the bride with an old slipper. Little do they suspect the meaning implied. The regalia of Morocco is enriched with a pair of embroidered slippers, which are, or used to be, carried before the Sultans as among us the sceptre and sword of state.—*Biblical Things Not Generally Known.*

For "The Friend"

Letters of James Emlen.

(Continued from page 315.)

"2nd mo. 21st, 1852.—It was truly pleasant to observe from —'s letter, that there was such an appearance of a succession of standard bearers amongst us. It does seem, however, that the women are still the first to announce the glad-tidings—they are generally so much less entangled with the thorny cares of the world, that they are better fitted for the services which relate to the next. How glad I should be to see them so sympathizing with their parents in bondage, as to induce the, by virtuous, frugal and self-denying lives, to do all in their power to break the bonds, at least to render them needless. I have often been led to fear that the excuse fathers give for so much devotion to worldly pursuits might be traced to the imprudence of those who indulge in the foolish and expensive fashions of the world, rendering large means needful to sustain them; but I have also believed that if any could see the cause, the affection for their parents would induce a different course. If a young woman, dressed in a gay and expensive attire, seeing her father vacant seat in our meetings for worship, could be led to suppose that she, in part, was the unconscious cause of his absence—that much expense, required corresponding means, and to acquire large means parents must devote their time to the world and neglect their religious duties; such an one could hardly fail to feel her responsibility, and especially if she had reason to suppose that with all his efforts he was encumbered with debts, incurred, perhaps, in his endeavors to sustain the imprudence of an expensive family. The calamities that are befalling many amongst us, naturally lead to these reflections; and as opportunely offers, it may be well to sow the seed of sound views and principles in these respects, in the minds of thy youthful charge.

"12th mo. 24th, 1852. * * * The language seemed to present this morning with degree of sweetness.—The secret of the Lord is with them that fear him: I cannot doubt but thou art one that does fear Him. Thou hast known what his answer of Peace is, and thou hast known what it was to be troubled. We have always believed that a quiet and peaceful feeling was the answer of acceptance for any act of dedication. If this has attended thy little offerings in public, I think thou shouldst accept it as his secret reward, * * * endeavor to cast thy burden upon the Lord and he will sustain thee. The 'accuser of the brethren' is very busy in endeavoring to destroy our hopes, and to rob us of our faith and our patience—may we be favored to know that happy deliverance from his power spoken of in Revelation xii. 10, 11, where it is said

he accuser of the brethren was *cast out*, which accused them before our God day and night; and they overcame him by the blood of the Lamb, and the word of their testimony; and they loved not their lives unto the death. Feel these to be very solemn things to write out, but having at times tasted in some degree the sweetness of faith in them, I desire to press after and encourage thee to do the same. The deep and abiding sense of our own helplessness and unworthiness is very profitable, if we do but take care therewith to associate entire confidence in our victorious Captain—what he hath done for us without us, and what he will do for us within us, if we endeavor to recline, as the beloved disciple did, upon his bosom. Can'st thou not accept of advice given twice in the same chapter of John xiv. 1 and 27, 'Let not your heart be troubled, neither let it be afraid.'"

From "The London Friend."

The Chinese Question.

A well written pamphlet, just received from Australia, edited by three Chinese merchants residing in Melbourne, exposes in forcible language the "divers weights" the British Empire uses in its dealings with their countrymen. These Chinese gentlemen give the history of the treaties between the British Empire and China, also those between their own country and the United States. They want it to be clearly understood that the present outflow of their population into Australia and California was not first sought by them.

Western powers," say they, "armed with formidable artillery, battered down the portals of the empire, and having done so, insisted upon keeping them open. They said, in effect, *We must come in, and you shall come out.* We will not suffer you to shut yourselves up from the rest of the world. We want to inoculate you with our enterprise, and to bring you inside the great family of nations. Let us draw together the ties of commercial amity, and live and do business together like friends and brethren." They go on to show how their nation has acted on these principles; how they went in great numbers to Australia, trusting to the friendliness and protection of the British Government and to the Christian principles of European settlers in Australia. Then they detail the brutal treatment they have received both in Australia and California, and they ask how England would have acted had her subjects received a like treatment in China. They complain of the ill-usage they receive, and of the efforts that are being made, both in Australia and the United States, entirely to prevent their immigration, whilst all European nations are welcomed. They plead eloquently for justice and equal privileges with other nations, and make good their claim to them. A telling anecdote, from Hepworth Dixon's "White Conquest," is quoted in this pamphlet, illustrating the attitude of Americans towards Chinamen, and its effects upon them. It is thus related by Hepworth Dixon, as told him by a gentleman in San Francisco:—

"Only the other day, in our rainy season, when the road was fifteen inches deep in Montgomery Street, a yellow chap, in fur tippet and purple satin gown, was crossing over the road by a plank, when one of our worthy citizens, seeing how nicely he was dressed—more like a lady than a tradesman, ran on a plank to meet him, and when the

fellow stopped and stared, just gave him a little jerk, and whisked him, with a waggish laugh, into the bed of slush. Ha! ha! you should have seen the crowd of people mocking the impudent heathen Chinese as he picked himself up in his soiled tippet and satin gown!"

"No white man can conceive the impudence (?) of these Chinese. My acquaintance picked himself up, shook off a little of the mire, and, looking mildly at our worthy citizen, curtseyed like a girl, saying to him, in a voice that everyone standing round could hear, '*You Christian; we Heathen.* Good-bye.'"

It is intensely humiliating to note the conduct of the Anglo-Saxon race, when they settle in the territory of Indians, Zulus, and Kaffirs, as colonists, and contrast it with that which they show to the Chinese immigrants who settle in their territory. In both cases they are continually regarding might as right, and they practically set aside the precepts of Christianity and the high appreciation of truth and justice which they lay claim to amongst themselves. A totally different set of weights is used in judging of the relative duties and privileges of colonists and natives according as they are one or the other. Nothing more indelibly stamps a man as a mean, dishonest trader, than the knowledge that he uses "divers weights," one for buying, the other for selling. No one excuses him; the judgment, whether of man or God, is equally against him. Why should not the standard of morality among nations be the same as that maintained by individuals? Most assuredly, in one case as in the other, "divers weights are an abomination to the Lord."

The Young Prodigal; or, "That's Ther, Jim."

Some years ago, says the author of the following true and touching story, I was staying at a very beautiful and much frequented watering place in England, where I met with an earnest Christian tradesman of the town.—Carr, who was ever watchful for opportunities of doing good. Though not a bookseller, yet he always had in a prominent place, in his shop window, an assortment of Bibles, with a card in large letters, saying, "*Lucy's swards sold here.*"

One day a band or "troupe" of young men who were giving entertainments in the place, their hands and faces blackened, and dressed in very grotesque costumes, arranged themselves before this gentleman's door one day for an exhibition of their peculiar "performances." These people used to be called "Ethiopian Screamers." After they had sung some comic and some plaintive melodies, with their own peculiar accompaniments of gestures and grimaces, one of the party, a tall and interesting young man, who had the look of one who was beneath his proper station, stepped up to the door, tambourine in hand, to ask for a few "dropping pennies" of the people. Carr, taking one of the Bibles out of his window, addressed the youth:—

"See here, young man," he said, "I will give you a shilling and this book besides if you will read a portion of it among your comrades there, and in the hearing of the bystanders."

"Here's a shilling for an easy job!" he chuckled out to his mates; "I'm going to give you a public reading!"

Carr opened at the 15th chapter of St. Luke's Gospel, and pointing to the 11th verse,

requested the young man to commence reading at that verse.

"Now, Jim, speak up!" said one of the party, "and earn your shilling like a man!" And Jim took the book and read, "And he said, A certain man had two sons; and the younger of them said to his father, Father, give me the portion of goods that falleth to me. And he divided unto them his living."

There was something in the voice of the reader, as well as in the strangeness of the circumstances, that lulled all to silence; while an air of seriousness took possession of the youth, and still further commanded the rapt attention of the crowd.

He read on: "And not many days after the younger son gathered all together, and took his journey into a far country, and there wasted his substance with riotous living."

"That's ther, Jim!" ejaculated one of his comrades; "it's just like what you told me of yourself and your father!"

The reader continued: "And when he had spent all, there arose a mighty famine in that land, and he began to be in want."

"Why, that's ther again, Jim!" said the voice. "Go on!"

"And he went and joined himself to a citizen of that country; and he sent him into the fields to feed swine. And he would fain have filled his belly with the husks that the swine did eat: and no man gave unto him."

"That's like us all!" said the voice once more interrupting; "we're all *beggars* and might be better than we are! Go on; let's hear what came of it."

And the young man read on, and as he read his voice trembled: "And when he came to himself he said, How many hired servants of my father's have bread enough and to spare, and I perish with hunger! I will arise and go to my father."

At this point he fairly broke down, and could read no more. All were impressed and moved. The whole reality of the past rose up to view, and in the clear story of the Gospel a ray of hope dawned upon him for his future. His father—his father's house—and his mother's too; and the plenty and the love ever bestowed upon him there; and the hired servants, all having enough; and then *himself* his father's son, and his present state, his companionships, his habits, his sins, his poverty, his outcast condition, his absurdly questionable mode of living—all these came climbing like an invading force of thoughts and reflections into the citadel of his mind, and fairly overcame him.

That day—that scene—proved the turning point of that young prodigal's life. He sought the advice of the Christian friend who had thus providentially interposed for his deliverance. Communications were made to his parents, which resulted in a long-lost and dearly loved child returning to the familiar earthly home; and still better in his return to his Heavenly Father! He found, as I trust my readers will, how true are the promises of the parable of the "Prodigal Son," both for time and for eternity.—*Religious Herald.*

The Christian life is a long and continual tendency of our hearts towards that eternal goodness which we desire on earth. All our happiness consists in thirsting for it. Now this thirst is prayer. Ever desire to approach your Creator and you will never cease

to pray. Do not think it is necessary to pronounce many words.—*Prim. Christian.*

"For The Friend"

Some Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 317.)

1845. 1st mo. 5th.—First-day.—I had my sitting as usual; Emily Flagg attended; I think I may say to be myself in a good degree comforting. Visited Moses Snow in the afternoon, and had some conversation with him; I thought he appeared in a tender frame of mind. A white man coming in, I was prevented from talking with his wife.

6th. Having the rheumatism in one of my feet, I did not feel well enough to go far from home; visited Jackson Curry; I thought it the most favored opportunity I ever had with him. He is quite a clever, steady man. I then called and talked with Moses Snow's wife; she was quiet and sober, and expressed her intention to try to live a good life.

7th. Went to Cornplanters to assist the teacher in starting the school, and on the 8th I think we had fifteen scholars; they were generally pretty well clad, behaved well, and appeared to pay pretty good attention to their lessons. The parents appeared pleased with the school; I had quite a comfortable sitting with the teacher and scholars, in which I trust my poor unworthy spirit was drawn near to the Fountain of Good; after which I started home with comfortable feeling, having reason to believe that the blessing of the Lord was attending our labors. May the fruits of thanksgiving and praise be to his great and excellent name.

2nd mo. 19th. Although unworthy of the least of the mercies which a kind and merciful Master bestows upon his people, I may again acknowledge his unmerited favors to me, which have been many. I have at times been brought very low, feeling but little strength to move forward, and have felt the necessity of making a pause and waiting upon the Lord; passing through that fire which can consume our corrupt and unregenerate nature; this is at times trying, but I find it necessary and profitable, and have great reason to be thankful that the Lord is still mindful of me, and continues thus to visit me. Oh! His dealings with his creature man are in wisdom and mercy. There is great cause for thankfulness and encouragement. I went yesterday to Cornplanter's, and was much favored in an opportunity with Charles and William O'Ball.

3rd mo. 14th. Returned yesterday from taking to Buffalo two remonstrances against a ferry over the Allegheny river in this reservation, in order to get the United States agent to sign one of them, and use his influence in favor of them. It was trying when the subject was first started, as I at times felt but little ability to move forward in opposing it, but can now look back, I trust with feelings of gratitude to Him who has wonderfully helped, supported and comforted me. I staid over First-day at Collin's, on my way to Buffalo, and attended Clear Creek Meeting. Second-day morning, in company with Asa Jones, went on to Buffalo. I thought myself much favored in meeting readily with the United States agent; had an opportunity with him that evening; the next morning, thinking I had better see him again before leaving, I went to his lodgings. He treated me kindly,

and I finished my business to pretty good satisfaction. Left the place with comfortable feelings; spent a little time satisfactorily with Abraham Gifford and his wife; they are well advanced in years; she kind and affectionate, and both in the station of elders: a responsible station which the Lord alone can qualify His servants to fill. Oh! that there was more of a willingness on the part of our elders generally, to give themselves up unto the Lord to be formed and fashioned agreeably to his blessed will, keeping the eye of the mind single to Him, then I believe we should be more favored with a spirit of discernment, and a qualification would be experienced to be helpful to them in the ministry.

4th mo. 5th. I have been much tried on receiving a letter from the committee, that there seemed no way opening for my leaving this place. I have felt much of human weakness. Oh! the necessity of being more given up to the blessed will of our Divine Master, which would always work for our good and greatest happiness. I believe all things will work right, if I should keep my place and be faithful. I have been sorrowful in feeling so much reluctance in giving up to the will of the Lord; I could desire that it might not continue to be the case.

4th mo. 18th. Although I have felt much weakness at times, and I fear too much looking towards home, yet I have had seasons of enjoyment. May I ever remember the great obligations I am under to my Divine Master; that there is no true happiness except that which proceeds from Him. Oh! that I was wholly given up to serve Him—soul, body and spirit.

4th mo. 30th. I sometime ago attended a meeting of the old party, commonly called "Pagans." I thought I ought to say something to them on the subject of religion, but felt so weak as almost to be afraid to speak to B. Williams to interpret, although I had an opportunity to do so. I had some expectation of getting Horace Jimmeson; I requested the chiefs to speak to their people on the subject of clearing land and preparing to put in their spring crops. After waiting considerable time, and Horace not coming, I felt much tried, fearing I might miss the opportunity; although it was a great trial, I desired not to omit anything that was required of me, that when the right time came for me to leave, I might be favored to feel the service required was performed, and experience the sweet reward of peace. After waiting a considerable time for Horace, I started to hunt Benjamin, but did not find him; returned, went into the Council-house, seated myself, and was, I think, much favored to feel my mind pretty well settled and composed. They commenced dancing; I thought it was right for me to appear as I felt, and so bear my testimony. After waiting awhile, I was informed I could then have an opportunity to speak to them. Samuel Patterson interpreted for me, and I spoke a few words to the relief of my mind.

5th mo. 20th. I have experienced weakness in different ways for some time past, [he felt tried that no one offered to take his place] thinking that the time was near that I might leave, if all was right. I sometimes thought, if I only knew that it was the will of the Lord, I could be much better resigned to my stay, but did not feel an evidence that all my work was done. A part, and I know not but most of this weakness and uneasiness, was

owing to my not keeping my eye single enough to my Divine Master, and not exercising that faith and strength which was given. When I look back, I think if I had lived nearer to the Lord, it might have been different with me. Great gratitude and praise are due to Him—may this be the fruit of my heart daily.

21st. When I have endeavored to give myself up to the Lord, placing my dependence on Him, I have experienced strength and comfort. Yesterday in my sitting with the Indian children in school, I felt a good degree of strength to enter into secret spiritual labor, and I think I may say consolation to it; the praise is due to the Lord.

6th mo. 8th. May what I have written be blessed to me in time to come, if I should be spared to read it. May past favors, unmerited mercies, for they have been truly such, be remembered with feelings of love and gratitude to the Great Giver of all good, who has followed me all my life long. I attended the past week the Council at Cataraugus. Although I have felt weakness, my mind has been clothed at times with a good degree of seriousness and strength, to my encouragement and comfort. I staid on 4th day night after attending the Council at Peter Potter's. Attended their meeting on 5th day at Clear Creek. Before leaving to attend meeting I had some conversation with Peter, also with his wife, on the importance of taking their children to week-day meetings. I also spoke to one of their older children on the importance of attending religious meetings. I thought in unmerited mercy I felt my mind in a degree strengthened and supported in meeting, although there was another trying communication delivered by a man not a member. Oh! the necessity there is of elders daily living near to Him who alone can qualify to meet such trying cases in the proper time. I thought I could not feel quite easy to leave without speaking to the individual; his situation I considered a distressing one. This case has proved to me the necessity of all who may think they are called to the ministry to keep their eyes single and guard against a forward aspiring spirit, which the enemy is ever ready to encourage in those that are prone that way.

6th mo. 1st. May a kind and merciful God continue his preserving care over us as a religious Society, and overrule the evil designs of the enemy who would make rents and divisions amongst us. I have again experienced the great necessity of being renewedly awakened to a sense of my true situation, which I esteem a great blessing. How poor and empty is all formal religion, and how necessary it is that we should guard against contenting ourselves with this outside covering; it will prove insufficient in the time of trial. There is no religion but that of our blessed Saviour that can afford true consolation in life and conduct as safe to the Mansions of everlasting rest. Oh! that it was more cleaved to by me and all others, that there was more of a concern to become living members of Christ's Church, a willingness to submit ourselves to his spiritual baptisms which are cleansing.

8th mo. 6th. Put thy confidence, oh! my soul, in the Lord; for in Him alone there is strength. Mayest thou keep thy eye single unto Him, and endeavor to live near unto Him, that thou mayest be made a partaker of the

merited mercy of God the Father, through His Son our Lord and Saviour. I think I have been favored to feel that it is precious, the trials thou mayest have to pass through, seek to get into the quiet; withdraw thyself from the world, guard against the discouragements or flattery of the enemy, and wait patiently on the Lord, for He is worthy to be waited upon; remembering that men ought always to pray and not to faint. What encouragement to poor sinners.

8th mo. 18th. I may again record a sense of the unmerited mercy of a kind and merciful Master to me, a poor unworthy sinner. I continue at times to feel tried on account of my stay here being longer than I expected. Al that I was more given up to the will of the Lord, and my time and talents more devoted to his service, for He is forever worthy to be obeyed, in all things honored and praised. I can truly say, my hope of happiness, either in time or in eternity, is not on my own merits, but in the mercy of God and the merits of His dear Son. Oh! may there be more willingness experienced by me to give to his blessed will, and more faithfulness performing it.

(To be continued.)

Natural History, Science, &c.

The Sensitive Plant.—One of the commonest roadside plants of Singapore is the sensitive ant (*Mimosa sensitiva*), which grows in profusion in waste places, and on banks by the wayside. It is a very low, spreading ant, of suffruticose habit, seldom rising higher than the grass among which it grows, more than six inches from the ground, but covering large spots, which are distinguished on the rough herbage by its neat, regular foliage. It seems to be almost constantly in flower, for in October, November, and May, noticed numbers of the little round tufts characteristic of this acacia (*Mimosa*), and of pale flesh color. The manner in which the effect of such a little bush is altered by a touch is very remarkable. Brush your foot over a luxuriant little plant as you pass by, and the whole bush seems to disappear, and you look back for it almost in vain; the leaves are all closed up, and the stems become depressed, and nothing is left but a few withered sticks upon the grass. Try to pluck a spray, and it fades between your fingers; so that it is very difficult to gather and examine it in an expanded condition. But if you will carefully take between the finger and thumb the petiole, or swelled base of the leaf stalk where the little thorns are situated, without touching any other part, and pinch it hard before attempting to break off the spray, the leaves will remain expanded; relax your firm hold, however, and they will immediately begin to close up.—*Collingwood's Naturalist's Rambles.*

A Tame Chipping Sparrow.—Out on the farm of Caleb Cope, on the road leading from West Chester to Downingtown, there is a tame Chipping bird. In the beginning of last June a little bird of this species, with a portion of two of the toes of one of its feet missing, built its nest and reared its young in a tree near the house, and gradually became so tame, owing to the kind treatment and attention which it received from the younger members of the household, that it would alight in the palm of a hand extended to receive it, and there eat its fill of crumbs,

and carry to its young a good meal also. All last summer the little chirper was fed in this way, each day growing tamer and more and more attached to the ones who fed it, until, with the approach of cool weather, it bled to warmer and sunnier climes. After its departure, those who had cared for it were anxious to know whether their little feathered ward would return in the succeeding spring, and about two weeks ago, on a sunshiny day, one of the members of the family went to the door and called, as had been the daily custom the previous summer: "Chirp! chirp! chirp!" when to the astonishment of the entire family the twittering migrant whirred from a perch it had occupied in an adjacent tree, and alighted in the hand out-stretched to receive it. Since that time until the present we are told that the "chippy" has dealt out to it its daily ration of bread crumbs in this way, and that its mate, which is too coy to be thus fed and fondled, receives at a distance a regular meal of the same from the tame bird's bill. This interesting pair is again building a nest near the house, and it is probable that the same programme of feeding as last year will be gone through again the present season. There can be no doubt as to the identity of the little bird, for it has brought with it the same mutilated foot and the same confiding nature.—*West Chester Jeffersonian.*

Telephone in Germany.—The German government lost no time in the practical employment of the telephone. There are now 272 telephonic circuits, and communication is satisfactorily carried on over a distance of from 30 to 40 miles.

Colors of Animals.—In many animals their colors appear to have been given them for the purpose of enabling them to conceal themselves from their enemies or from their prey; in some cases the color of the animal bears a close resemblance to that of the soil, herbage or foliage in which it lives. This is very strikingly seen in the "leaf" insects, in which the likeness is so close that only on close scrutiny they can be distinguished. This "protective mimicry," as it has been called, may be observed in the eggs and young of birds which nest on the ground.

A Real Telegraph.—A new invention of a practical character has just been made by E. A. Cowper, the well known mechanical engineer, in England. It is a telegraphic writing machine. The writer in London moves his pen, and simultaneously at Brighton another pen is moved, as though by a phantom hand, in precisely similar curves and motions. The writer writes in London, the ink marks in Brighton. The pen at the receiving end has all the appearance of being moved without hands.—*Nature.*

Measuring Temperature by the Spectroscope.—M. Crova communicates to the *Compte Rendu* some experiments in the determination of the temperature of incandescent bodies by the spectroscope. It is well known that as a mass of iron is heated the first visible rays are the red rays and the mass becomes nearer to white as the temperature is raised. When examined through the spectroscope the red portion becomes first visible and the spectrum gradually grows till it embraces the violet, more and more of which shows as the mass becomes hotter. By calculating the wave length of these extreme violet rays, we have a measure of the heat; also by deter-

mining the wave length at the point of maximum heat of the spectrum, which point moves towards the violet end at every increase of temperature, another measure is obtained.

Prayer.—"Remember, the Lord will not hear thee because of the arithmetic of thy prayers; he does not count their numbers. He will not hear thee because of the rhetoric of thy prayers; he does not care for the eloquent language in which they are conveyed. He will not listen to thee because of the geometry of thy prayers; he does not compute them by their length or by their breadth. He will not regard thee because of the music of thy prayers; he doth not care for sweet voices, nor for harmonious periods. Neither will he look at thee because of the logic of thy prayers, because they are well arranged and excellently compared. But he will hear thee, and he will measure the amount of the blessing he will give thee, according to the *divinity* of thy prayers. If the Holy Ghost inspire thee with zeal and earnestness, the blessings which thou shalt ask shall surely come unto thee."

Accustom your children to a strict attention to truth, even in the most minute particulars. If a thing happened at one window, and they, when relating it, say that it happened at another, do not let it pass, but instantly check them; you do not know where deviation from Truth will end.—*Johnson.*

Kindness is an invisible force of unmeasured power.

THE FRIEND.

FIFTH MONTH 24, 1879.

Among the expressions of feeling, called forth by the publication in our issue of 4th mo. 19th, of extracts from the minutes of the Select Yearly Meeting of the Binns' body in Ohio, few have given us more satisfaction than that contained in a letter written by John G. Whittier, and addressed "To the Editor of The Friend." It says, under date of 4th of 5th month, 1879:

"I have just seen a copy of 'The Friend' of the 19th ult., and have read with more regret than surprise the extracts from the minutes of the Ohio Yearly Meeting for 1877 and 1878. They seem to me an entire abandonment of the one distinctive and root-doctrine of our religious Society—that from which it derives all that is peculiar to it in doctrine and testimony, and which alone gives it a right to exist. I seriously question whether there is any other religious body in the United States which could be induced to assent to such an unqualified repudiation of a doctrine which the wisest and best of all denominations are regarding as vital and essential."

In these days, when, as regards doctrines, the Church's enemies seem to be those of its own household, it is strengthening to meet with such a testimony to the truth.

The article headed, "Man! Know thyself!" which we have extracted from *The British Friend*, contains several queries that may profitably be pondered by many on this side of the ocean, as well as in Great Britain.

They reveal a sad picture of the decline of many under our name from the original principles of Friends; and, as we believe, of a loss of faith in the government of Christ in his Church, leading them to supplement the work of his Spirit (as they imagine), by human contrivances, better "adapted to present times."

We believe that in proportion as our members are brought into true submission to Christ, and into an earnest concern for their own salvation, they will learn to look to Him as He reveals himself in their hearts, for strength and comfort; and they will be convinced that the "Lord's arm has not become shortened," nor "His Spirit lost its leaving, converting, teaching power."

We have been interested in examining the pages of *Le Reformateur*, a new journal just issued in Paris, which vigorously attacks the political influence of Catholicism as opposed to the true interests of France; and advocates reform in general.

In that country the Protestant part of the community seems at the present time to be unusually active.

Julius Ferry, the present Minister of Public Instruction, has introduced into the legislature two bills, which, if enacted, will make important changes in the management of the schools. These are now mainly under the control of the Catholic clergy. The effect of the proposed laws would be in large measure to substitute lay teachers for clerical. What success will attend the movement, it is difficult to foresee; but no doubt it will strenuously opposed.

SUMMARY OF EVENTS.

UNITED STATES.—But little of importance has been accomplished in Congress during the past week. The Legislative Appropriation bill still under consideration. In the House, the veto of the bill to prevent military interference at elections, was sustained by a vote of 127 to 97. The Warner silver bill is now under consideration. An attempt was made in the House to revive the old "Income Tax" law, but was defeated; the affirmative vote falling short of the requisite two-thirds, though a majority of 189 voted in its favor.

The President has signed the bill authorizing the annual enlistment of 750 boys for the navy; also the bill to pay Captain Eads for work done on the Mississippi jetty.

An important decision has recently been rendered in the U. S. Court at Omaha, by Judge Dundy, in reference to some of the Ponca Indians, who had fled from their reservation in the Indian Territory, on account of sickness which was rapidly diminishing their tribe. These Indians were arrested and were being taken back under charge of military force, when some of the citizens became interested on their behalf, and had their case brought before the court. The Judge decided, that an Indian is a person within the same rights of the United States, and is possessed of the same rights, under the law, in regard to his liberty. That no rightful authority exists for removing any of these Poncas to the Indian Territory, as General Crook had been directed to do; and being restrained of liberty, under color of authority of the United States, and in violation of the laws thereof, they should be discharged from custody, and it was so ordered.

The Steamship California recently arrived at Victoria, from Alaska, reports all quiet at Sitka. The United States steamer Fish Hawk, remained at Sitka to render assistance if needed.

Some of the forest fires in sections of this State and of New Jersey, are reported extinguished by recent rains. In M. J. and New Hampshire, serious fires were still burning.

In northern New England, the weather was unprecedented hot on the 13th inst. The thermometer at several points marked 100 deg.

A few workmen are engaged in building up the piers on which the new roof of the burnt portion of the Patent Office is to rest, but these will not be carried above the temporary roof, until the permanent roof is about ready to go on. A hundred days were required by the contractor to forge the heavy iron work which is to support the roof. This time does not expire until the 10th of 8th month, but the work will be commenced as soon as the receipts are received.

One hundred and eighty-three cotton mills have been built in the South since the war.

The Treasury Department states, "The demand for the ten dollar refunding certificates has been so great that the supply does not equal the demand. On the 13th the Bureau was delivering them at the rate of six weekly \$2,000,000 per day. The whole amount authorized is about \$40,000,000.

A fire at Chico, Cal., on the night of the 16th, destroyed the Central Hotel and several other properties, valued at \$600,000. On the same night fires occurred at Hazelton, Pa., Montague, Mich., and Newport, Ky.; aggregate loss \$85,000.

The number of deaths in Philadelphia the past week numbered 264. Of which 149 were adults, and 115 children—61 being under one year of age. Two hundred were natives of the United States.

The total value of exports from Philadelphia during last month was \$3,854,579.

Wheat, 1881, 1881, 107½; 5's, 103½; 4½ per cents, registered, 106½; do. coupon, 107½; 4 per cents, 102½; 103.

Cotton.—Prices of middlings at 13 a 13½ cts. per lb. for uplands and New Orleans.

Petroleum.—Crude 7½ cts., in bbls.; standard white, 8½ cts. for export, and 94 a 101 cts. per gallon for home use. Lined oil, Calcutta, 60 a 61 cts.; American, 59 a 60 cts. Lard oil, 49 a 50 cts.; crude sperm, 80 a 81 cts.; bleached tallow, 95 a 98 cts.

Fresh Fruits.—Choice apples in better demand.—Baldwins, \$2.50 a \$2.75; Russets, \$2.35 a \$2.75. Strawberries, 20 a 30 cts. per quart.

Cloves.—Clover, 5 a 6 cts. per pound; Flaxseed, \$1.40 a \$1.42 per bushel. Timothy \$1.35 a \$1.40 per bushel.

Flour.—There was more demand and prices of choice grades were higher. Minnesota extra, \$4.37 a \$5.20 for medium to fancy; Penna., \$5 a \$5.25 for good to choice; western do., \$3.71 a \$5.75; patent and other high grades, \$6.25 a \$7.75.

Grain.—Wheat.—Market dull and a little lower. Penna. and Southern red, \$1.15 a \$1.16; amber, \$1.17 a \$1.18; white, \$1.18. Rye, 57 cts. Corn, 40 a 45 cts. Oats, white, 35 a 37 cts; mixed, 34 cts.

Hay and Straw.—Prime timothy, 70 a 80 cts. per ton; mixed, 55 a 65 cts. per 100 pounds; straw, 10 a 95 cts. per 100 pounds.

Beef cattle.—The market during the week was dull. Extra, 64 cts.; good, 5½ a 6 cts.; common, 5 cts. Cows, \$25 a 35 per head.

Hogs dull and prices lower, 3,250 head sold at 5 a 5½ cts. per pound, as to quality.

Sheep, 3½ a 4½ cts. per pound for clipped.

Passengers.—Among the passengers who sailed recently from Liverpool to Quebec or Montreal, were sixty-five American operatives from Stockport for a cotton mill at Dundas, Ontario. There were 500 applicants for the sixty places.

War balloons, one of them containing thirty-eight thousand cubic feet, are getting in readiness for transfer from Liverpool to Quebec or Montreal. The practicability of sending up a fresh supply of gas to a balloon while it is in the air, has been demonstrated. Arrangements have been made for telegraphic communication with them, when aloft, by means of a wire running through the cable restraining them.

The contractors between the masters and men of the Durham coal-mining district have decided to submit to the judges of the county court, who have decided on a reduction of 8½ per cent. on the wages of underground, and 6½ per cent. on surface labor. This decision was very unsatisfactory to the miners, but it is said three-quarters of the collieries resumed work on the 19th inst.

It is reported that the Ameer of Afghanistan has agreed to such terms as will secure the withdrawal of British command of the passes, with sufficient territory to constitute a scientific frontier; the appointment of a British Resident at Cabul, and control of foreign relations of Afghanistan.

The failure of three firms largely engaged in the iron trade, is announced. Two in Middle-borough, the other in Darlington.

News from Cashmere is bad. The increase of argent

distress and famine, joined to incompetency, corrupt and want of organization on the part of the official producing a most serious state of affairs. Cholera appeared in most of the cities of the Panjab. Held by armed gangs is assuming alarming proportions. These gangs threaten the life of the Governor unless something is immediately done for their relief.

Several conflagrations have recently occurred in Russian towns, causing great distress. At Ibrity, 2000 of the houses were destroyed, also the station of the Great Russian Railway. A serious conflagration has occurred at Orenburg, which destroyed much of remaining portion of the town. Numerous arrests have been made on the charge of incendiarism.

A despatch from Pesth on the 19th inst., informs that heavy rains have caused destructive floods in that and other countries. The rivers Theiss and Drave have both overflowed, and inundated large tracts of country. Ninety square miles of grain fields, and two villages are said to have been destroyed. The harvest prospect in that district are ruined.

Some experiments with the electric light were recently made at Mount Valerian, one of the defences of the city of Paris, with the object of finding how far electric light will vary in its brilliancy according to the official space it can illuminate. A Gramme machine illuminated; the projector was a reflector which collects the luminous rays and sends them out in one direction, making them pass through a series of lenses similar those used in light-houses. The steeple of St. Clovis, a lighted in a small machine, at a distance of 500 yards from the projector, was brightly illuminated. Another large machine illuminated the towers of the Trocadero palace, a distance five miles. At a distance of a little over two miles, two superphos illuminated were 270 to 866 yards broad.

The biennial price of \$4099, given by the Institute of France, to the work or discovery which does most honor to the country, falls to the Academy of Moral and Political Sciences.

Complete returns of the popular vote in Switzerland give 191,197 in favor of, and 177,263 against the re-establishment of capital punishment.

China produces an annual average of 6,000,000 pounds of tea; Japan, 40,000,000; India, 35,000,000; and 1,000,000,000 pounds, making a total of 87,000,000 pounds.

The Dominion Parliament was prorogued on the 15th inst. The Governor General, in his speech, said the measures adopted for the vigorous prosecution of the Canadian Pacific Railway, hold out a prospect of infirly completion; and the proposed purchase of the line from Riviere du Loup to Quebec, will, when concluded, complete the engagement entered into at the time of the confederation.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Application may be made to

John W. Biddle, No. 726 Buttonwood St.
Ephraim Smith, No. 1140 Pine St.
Rebecca W. Kite, No. 44 North Fifth St.
Hannah Evans, No. 322 Union St.

FRIENDS' ASYLUM FOR THE INSANE.

New Friendsford, (Twenty-third Ward,) Philadelphia.
Physician and Superintendent.—JOHN C. HALL, M.D.
Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

MARRIED, Fourth mo. 16th, 1879, at Friends' meeting-house, Lancaster, New Jersey, EZRA C. ENGLE, of Easton, to MARTHA T., daughter of Richard Bzuby, of the former place.

DIED, at his residence in Conshohocken, Montgomery Co., Pa., on Second-day, 1st mo. 20th, 1879, ISAAC JONES, in the 77th year of his age, a member of Gwynedd meeting.

On the 15th of this month, after a short illness, on the 27th of 3rd month 1879, JANE SKOWNON RHOADS, daughter of Joseph and the late Elizabeth S. Rhoads, aged 14 years, a member of Springfield Particular and Chester Monthly Meeting, Pennsylvania. Her friends have the consoling hope that through redeeming love, she has been safely gathered.

"For The Friend"

Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 207.)

[The following letter was omitted under the proper date, but as it gives some interesting information in regard to the Indians and their legal rights, and contains many good sentiments, it is thought it may well be introduced here.]

Tennessa, 11th mo. 1844.

Dear Friend,—I received thy acceptable letter; it afforded me satisfaction to hear from thee, thy family, and from my relatives and friends generally, and seemed to do me almost much good as a short visit from one of my ends. When I was about to return to this country last spring, and after getting here, I thought of being again separated from my relations and friends was quite a trial to me, and I am convinced we do not know what poor creatures we are until we are tried; we sometimes think we could submit to almost anything if we were convinced it was our religious duty, but our natural strength soon wears away when it is brought to trial; we can feel the necessity of drawing near to Him who can support us under every privation and trial He permits to come upon us; and, and enables us to rejoice in the midst of them, or rather in Him to rejoice. I was mercifully favored to feel myself in my proper place, and I know not that I wished myself home at any time. The comforts of a Christian when he is favored to feel the life-giving presence of his Divine Master to be with him, far exceed that of any earthly one. When I compare my trials and privations with what many have had to experience, they appear comparatively small, and I feel sensible that I have great reason to be thankful that I have been so mercifully dealt with. After my return last spring, my time for some weeks was spent in going amongst the natives, persuading and encouraging them to clear off more land, put up their fences, and plough their ground so as to be ready to put in their spring crops in good season. I also endeavored to persuade them to farm more land; telling them it was cheaper to raise grain than to buy it. I waited until I thought they had done nearly all they would be likely to do, then told them if they would prepare more ground I would purchase seed for them and they might pay me when they drew their bounty; to a few who were poor I would give

seed. A number of them told me before I made the offer, that they would like to plant and sow more seed but they had none, nor money to buy with. They were much pleased with what I proposed, and commenced getting more ground ready. I purchased and distributed amongst them something like 150 bushels of potatoes, besides oats and buckwheat. It is thought they seeded a quarter more ground last spring than they did a year ago. Their corn, considering the heavy frost we had on the 11th day of the 6th month, was good, their oats were good; the potatoes rotted some in the ground; I should think they had three quarters of a crop; buckwheat middling. I feel a hope they will be able to get along, as it regards provisions, pretty comfortably. I have had this last spring and summer, two schools in operation. In the spring I had two teachers employed, through the summer I taught one of the schools myself; six who attended the school at Cold Spring could read in the Testament, others in easy reading; but few of the children can speak much English. We have still to contend with the sale of ardent spirits on and near the reservation; it has been one of the most trying things I have had to contend with. I have spoken to nearly all who sell the article near, and to two who sell it on the reservation—giving them my opinion of the sinfulness of the practice, telling them I believed the use of it very much disqualified persons for answering the great end for which they were created, and obstructing the improvement of such Indians as made use of it. These persons have all treated me more kindly than I could have expected. I have, I think, spoken to nearly all the Indians on this reservation who make much use of spirituous liquors, of the great disadvantage it may be both to their present and future prospects. They nearly all appear to receive it as an act of kindness, which makes the labor much more easy and pleasant to me. Some of the chiefs are zealous in support of temperance.

I sometimes feel so poor and weak that I think it is but little I can do to help this much injured people; at other times I feel comforted in believing that if I should keep my place, and do what is required of me it will be enough, and that the reward is precious and sure; it is the blessing of the Lord that makes fruitful. There has been a great improvement among the Indians within a few years in regard to temperance.

Some time ago two surveyors came on with men to assist them to divide this reservation off into sections, and commenced the work. The chiefs called a council, which was attended by thirteen of them and a number of other Indians. I was invited to attend. One of the surveyors, and two or three of his men, also attended the council. When I went into the house the chiefs were generally there, but did not appear to be doing much business; the surveyor was also there: he got up in a

very friendly way and shook hands with me. I seated myself at some distance from him; he pretty soon invited me to step aside with him, his object seemed to be to enlist me in his favor. I told him I was opposed to having the reservation divided, believing the object was entirely to promote the interests of the Ogdén Company, and would not in any way benefit the Indians. I gave him to understand that I would oppose everything that would be prejudicial to their interests; that I felt friendly towards him, but would oppose the act he was engaged in. I left him and went into the council-house—he pretty soon followed. Old Bocksnake informed him the conclusion of the reservation was, not to have the reservation divided. The surveyor informed the council that he was employed by the arbitrators to do the work, that it was necessary in order to complete their map; that it could not in any way affect their title, &c. Tunis Halltown (a chief) told him that they were united in the conclusion not to have the reservation divided, that he thought there was nothing in the last treaty that required it, and they wished him now to stop. The surveyor attempted again to persuade the chiefs to let him go on, telling them he divided the Cattaraugus reservation, that he met with no obstruction there, and the Indians appeared pleased with it; he was sorry to go on without their consent, but would be under the necessity of doing so; that if they would not submit to it, it would have to be done at some future time. Tunis again informed him that they were united in the conclusion not to have anything done; that it was not worth while for him to say anything more on the subject, and if he did not stop, they would endeavor to find means to stop him. I went to Buffalo at the request of the chiefs, and ascertained from Thomas Lowe, (he is generally called Judge Lowe, he being the arbitrator that was chosen to act for the Indians in settling up the last treaty), that the surveyors were (employed) by the Ogdén Company, that the arbitrators had nothing to do with it, had made out their report, and their services ended last spring; that the treaty did not require the reservation to be divided, and that it was optional with the Indians whether it should go on or not. The Supreme Court of this State has given an opinion, in a case that had been tried at Buffalo, between a man by the name of Lee and the Ogdén Company, in relation to some timber which Lee had purchased of the Cattaraugus Indians that had been cut on their own reservation, in which it says: "The Indians have never parted with the title to the land on which the timber was cut; that their right is as perfect as it was when the first European landed on their continent, with the single exception that they cannot sell without the consent of the government. Their right of occupancy to them and their heirs forever, remains wholly unimpaired. They are not tenants of the State—

they hold under their own original title. They have cut and sold their own timber, and I see no principle upon which the plaintiff can have an action either against them or their vendor." * * *

I do not, as yet, feel quite able to fix upon the proper time for leaving, but desire to be preserved in patience until that time arrives. Oh! it is a great and a good thing to be entirely resigned to the will of our Divine Master.

In sincere love I remain thy friend,
EBENEZER WORTH.

From "The London Friend."

Friends in Cardiganshire, &c.

The *Friend* of Eighth month, 1874, contained an account of a visit that I had paid to Gwern Driv, the only spot which seems to have been used by the Society of Friends as a burial-ground in Cardiganshire. Some particulars were also given respecting the Friends who had lived in that county, two of whom, Samuel George and his brother John George, resided at the adjoining village of Llandewi-Brefi, in the early part of last century. I am now able to add to this account, by having lately had an opportunity of perusing some papers left by John Player, a Friend of Tockington, near Bristol, who took an active part in the concerns of the Society in the latter half of the last century, and died in 1808, aged about eighty-three.

In 1753, when John Player was about twenty-eight years of age, he spent about six weeks in travelling through Wales as companion to one whom he describes as "that worthy and honorable servant of God, William Brown, of Philadelphia." William Brown was the brother-in-law of John Churchman, an eminent American minister, with whom he was a frequent fellow-laborer in the Gospel. They had crossed the Atlantic together, but they believed it was best for them to carry out their visits in this country for the most part separately. In part of his service John Churchman had for a companion John Pemberton, whom he describes as "a sober, well-inclined young man," and who himself subsequently became a valuable minister.

John Player wrote a brief journal of his visit in Wales with William Brown, in which (after mentioning meetings held in the counties of Monmouth, Glamorgan, Carmarthen, and Pembroke) he says:—

"12th mo. 5, Fourth-day.—Being guided by Morgan Price we set forward over the mountains to the widow Ann Evans, at Gwern Driv, in the parish of Llandewi-Brefi, in Cardiganshire, at whose house we had a meeting on the morrow. A solid and satisfactory meeting it was, there being some of the neighbors well-inclined, and most of the few Friends there keep their places pretty well, being of those who was first convinced in this place; to whom encouragement was given, as well as the way of life declared to others, which covered the souls of some present through the power of Him who is all-sufficient, that it seemed as a shower to refresh the drooping heart of some there; they were encouraged to continue in the practice of holding a week-day meeting. From this place (on Sixth-day) we set forward, guided by Daniel Evan, to John Goodwin's, at Esgairgoch, on the mountains called Tredegwyn, in Montgomeryshire. This Friend and his wife are a noble pair, and well

esteemed of at home, having built a meeting-house and purchased the ground at their cost. We rested with them one day, and the morrow being the First-day, I had a meeting (which was pretty large, I think I may say *very*, considering the few inhabitants hereaway), and a solemn and good meeting it was, the states of some seeking souls present being a pretty deal spoken to, and encouraged to go on. The morrow we set forward to Llandiloes, guided by Edward Rees."

This is the only notice of Cardiganshire that occurs in this journal, and Gwern Driv is also the only place in that county mentioned by John Churchman; but the names given of the Friends who were seen by William Brown and his companion form connecting links respecting others. Daniel Evan, who guided these Friends into the adjoining county of Montgomery, was the grandfather of an elderly woman who was living in the village of Llandewi-Brefi, in 1873, and who very pleasantly supplied some of the information I sought. "The widow Ann Evans" was the sister of the Georges, and of them John Player has left the following interesting account:—

"An Account of John Goodwin's visit to some young convinced at Gwern-driv, as related by himself to me the 8th of Twelfth month, 1753, at his house at Esgairgoch.

"At the Yearly Meeting at Llandovery, in Carmarthenshire [in 1709], was observed two young men of sober and grave deportment to be often pretty much reached in the meetings and much tendered by the power of Truth. By their apparel and speech they was taken to be Friends; but none knew from whence they were, neither did any ask them as I know, nor make inquiry after them till they were gone from the town, when it arose with me to inquire after them, but they were gone; but by some means I found they lived in Cardiganshire, but where, or what their names was, I could not learn. Some time after my return home I found it laid on me to go and visit those two young men, but where to go I knew not, nor whom to inquire after; so delayed in going till I could not with ease of spirit stay any longer at home. Then calling to mind that there was no Friends lived in that county as I knew of, save an old man at Aberystwith, to whom I resolved to go and inquire if he knew of any such as my concern was to; so taking my horse early in a morning I rode to this Friend, who I found more ignorant concerning them than myself; so then was I left in a great strait; to go back I did not dare without offence to my Master, and where to go forward I could not tell; but being very low in myself I resolved to rely on the Divine Director for my guide, and accordingly turned my horse and rode out of the town, resolving to ride that road I found most freedom to take, when I came where there was two, accordingly having followed this Guide without asking any one after any religions or sober people, till I came within about a mile of the place where they lived, where, seeing a man keeping sheep, I found freedom to go and ask him if he knew of any sober, religious people thereabout. He told me there was two young men and their sister who lived about a mile off that was called Quakers, who would not pull off their hat, nor go to church, but did sit together without any preaching; at hearing of which my heart leaped for joy. I inquired of him the way

and rode to the house, where being come called at the door and asked if any religious people lived there. The father came to me who was a sour old man, and much displeas'd with my manner of addressing him; but his son John, being in a garden behind the house, heard my first inquiry and ran to me and took my neck and kissed me, having in the spirit knowledge of my coming. It was now near night and where to get lodging could not be had and they was afraid to ask their father for me to lodge there, but desired me to ask myself which I did, and he told his son he might see up my horse and take me in; so, after having been there a little time, the father began to exclaim against his children for their leaving the church and joining in so foolish a worship as he apprehended ours was. I was led in the meekness of wisdom to open to him the way of righteousness; he became more moderate and suffered his children to sit with me; we were comforted in each other's company, being one in all things, though they had not seen or heard anything of our Society till a little before the aforesaid Yearly Meeting. Their names were Samuel George, John George, an Ann, their sister (now the widow Ann Evan at whose house the meeting is held)."

The foregoing narrative is a valuable addition to the memoir of Samuel George, which is published in the Fifth Part of "Piety Promoted;" but is equally valuable as portraying the earnest Christian character of John Goodwin, of whom there is also an account in "Piety Promoted;" confirming the impression that he "walked by faith, not by sight," in other cases besides this, in which he seems to remember that "it is not the will of our Father in Heaven that one of the little one should perish," even if he had literally to carry out our Saviour's description of "going into the mountains" to seek some of His flock. To accomplish this object was no light matter for the first journey to Aberystwith would be about thirty miles, and, after getting no information at that place, there would be twenty miles more to ride before reaching Llandewi-Brefi.

John Goodwin was in very limited circumstances when he was a young man, and being anxious for the support of his family, he purposed following his parents and other near relations, who had removed to America; but "finding a stop in his mind, and feeling after Divine counsel, he found it his place to settle in his native land; and it livingly arose in his heart that the Lord would provide for him and his family." "At the close of his days he said with thankfulness that the Lord had fulfilled this to him." About the twenty-seventh year of his age he was called to the work of the ministry, and became an able instrument in turning many from darkness to light, and from Satan to the power of God. He often paid religious visits in Wales and in some parts of England. He is described as having been pleasant in conversation, and continued fresh and lively to old age. During his last illness he appeared to be in a heavenly frame of mind, abounding with praises to God for his continued mercies, often expressing how valuable the enjoyment of the love of God is on a dying bed. He died in 1763, aged about eighty-two years.

Esgairgoch, where John Goodwin lived, is a village about eight miles from Llandiloes, in Montgomeryshire, very near the sources of the Severn and the Wye, on the slopes of

inlimmon. It was of such a Welsh mountain as this, though more probably it was under-Idris, that George Fox wrote, with no expressions of incredulity, that "the country people said it was two or three miles high," and he says, "From the side of the hill I could see a great way. And I was moved to try my face several ways, and to sound the day to the Lord there. And I told John ap John (faithful Welsh minister) in what places would raise up a people to Himself, to under his own teaching. These places he took notice of; and since then hath a great people arisen in those places."

At the time that John Goodwin was living are told by John Churchman, that there are at Esgairgoch "several tender Friends; but," he adds, "the living are scarcely able to bear the weight of the professors, who, although they know the truth, do not abide therein, and so are as withered branches cast forth." Amongst those who then lived there was Edward Rees, who followed the occupation of a mountain farmer; his widow, Elizabeth Rees, continued to reside at Esgairgoch until her decease, in 1804, at the advanced age of 97. Their descendants settled further south, and the last survivor in the Society of Friends who retained the family name was their grandson, the late Jonathan Rees, who died at Neath in 1867.

In thus gathering together fragments respecting the Friends in Cardiganshire, the exact limits have been exceeded by the mention that has been made of some who lived in the adjoining county of Montgomery. Although Friends have ceased to exist in these districts, yet, when we turn to such records as we can find respecting them, it is evident that Friends' principles were far more extensively held in the latter than in the former county; but the number seems to have been greatly reduced by emigration to America, on which continued the Welsh element is still very apparent in the surnames that frequently occur; for there we hear of the families of Evans, Griffiths, Jenkins, Jones, Thomas, Williams, and other names that are most familiar in Wales. FREDERICK J. GIBBINS.

Neath, Third month 12th, 1879.

Under the Piers.—A recent article in *Scribner's Magazine*, describes a visit paid, in company with one of the steamboat police, along the docks and piers of New York city. The piers are generally open below, so that the water ebbs and flows beneath the flooring on which the goods are deposited. This flooring is supported on piles driven into the mud. The article says:—

"This under side of the city is a shadowy world even at high noon, and its structure, as well as its seclusion, makes it as good as a forest for hiding. The piles stand in rows running across the pier, a stringer of heavy timber lies on top of every row, joists lie across the stringer, and planks cover the whole. Thus between the top of each stringer and the planks there is quite a space, where boxes and bundles can be hidden. The under side of a pier can hold a good sloop-load of packages, and a box on a stringer is invisible to any one passing under the pier, unless he passes very close to it. There are many miles of piers about the city, and each pier has a great quantity of stringers. So here is a vast region of secrecy right under the busiest part of New York. Many of the piers are sup-

ported on such a dense forest of piles that only the smallest skiff can pass through the narrow, tortuous openings. Formerly the thieves had a channel of this kind from one end of the city to the other, by which they could travel nearly the whole distance without showing themselves."

For "The Friend."

Letters of James Emlen.

(Continued from page 325.)

"8th mo, 31st, 1852. * * * How hard it is, under the pressure of bodily infirmity, still to feel a weight of responsibility resting upon the mind, which it is not easy to put away. I fully believe divine compassion regards thee,—thy sighs and thy tears, and even thy physical ailments are not unnoticed—That I crave thy strength may be renewed and revived by a sense of His mercy, and that thou mayest hold up thy head in hope: We are said to be 'saved by hope,' and let us not suffer the enemy to rob us of this precious anchor to the tossed and tribulated mind.

"1st mo, 12th, 1853.—Thy little messenger was relieving. * * * I had feared my letter might prove like the prescription of an unskillful physician, and so do more harm than good. I felt glad that peace was restored, and hope the return of it may be accompanied with renewed encouragement to devote thyself unreservedly to the best of Masters. To 'know how to abound' as well as 'how to suffer want,' I have often thought must be among the highest of christian attainments. To suffer with patient submission, and let it 'have its perfect work' in 'strengthening, establishing and settling' us, and to 'abound' with trembling and humility, lest the enemy should insinuate some of his flattering delusions, and tempt us to think—now all is safe, we shall never be moved, &c.; but blessed is he that endureth temptations such as these, and many others, for 'when he is tried he shall receive the crown of life.' 'The things concerning me shall have an end,' said the dear Master; and we are not to suppose that 'the rod of the wicked shall always rest upon the lot of the righteous;' but that he shall in due time know his enemies to be subdued under him, and the crown of victory—the mark of holiness—placed upon his head.

"I dare say there are many trials, peculiar to the position, but I have also often had reason to think there was much to be thankful for in being placed in a situation wherein we can serve the good cause in our outward vocation; but little in it to flatter and nourish selfish feelings, and a constant opportunity to do a little good, if it is only by diffusing the salutary influence of a good example, a devout and prayerful spirit, an affectionate interest in the best welfare of the flock of 'lambs' entrusted to your care.

"2nd mo, 25th, 1853. * * * I do think it may be allowable, sometimes, for the poor sorrowing disciples to talk together by the way (as did the two on their way to Emmaus), under those feelings of sadness and disappointment that most attend many during the trials of the present day; and I am sure I would rather be found in company with such, than with those who are taking their ease and are unconcerned about these things. We feel disappointed, because we hoped better things from the worthy profession of our education, and one that we had tested and tried and loved and admired. But if we have been too

unguarded, and during our repose have suffered the enemy to enter and sow his tares, we must be willing now to abide the consequence, until the sifting time may be over; and oh! that we may be found among the solid wheat in the end—of which we are assured 'not one grain shall be lost.'

Oh! the sweetness of true humility; is it not at the very foundation of all our building in spiritual things? how fearful of every thing that is high and lifted up! how jealous of every aspiring thought—how much at home with the lowly, little ones. Do we not desire that our dwelling may be appointed with such to all eternity? Yes, I fully believe we do, and if we are faithful to what we know, we shall not be disappointed. * * * If I know my own heart there is nothing I so much desire as to be enabled to walk acceptably in the divine fear until my change come—which I often think may not be far off. * * * Oh! that the wound of my people was healed, and harmony restored!"

A Big Cut.

Passage of a Train Through the Grand Canon of the Arkansas.

The actual passing of the first passenger train through the Grand Canon and Royal Gorge, on the line of the Denver and Rio Grande Railroad of Colorado was briefly mentioned last week. The *Denver Tribune* contains a glowing description of the pioneer excursion of invited guests. The excursion started from Denver, but received accessions at other points along the route. On reaching the canon the engine was placed in the rear, so as to give a better view to the tourists. The approach to the canon is gradual. The distant hills draw nearer, and the Valley of the Arkansas becomes narrower and narrower until the river is shut in closely on both sides by high mountains, sloping gently away and covered with verdure. Then the slope of the mountains becomes more perpendicular, and the hills become higher, until suddenly the river is completely shut in by mountains with mighty tops. The roar and rattle of the train grows louder and echoes up and down. The train is fairly in the canon. It moves slowly. The mountain walls are of a dizzy height, and so close together that looking ahead they appear simply to form a crevice, a huge, awful crooked crevice, through which the miserable little train was timidly crawling. The curves of the canon are superb. They constitute the finishing touch to its grandeur, and fill the mind with a fuller appreciation of this great miracle of nature. But the Royal Gorge! Imagine two almost perfectly perpendicular walls rising to a height of 2,200 feet, and only thirty feet apart, those walls feet, and irregular masses of projecting, jagged and irregular masses of rock that on the railroad side hang over the land all creviced and ready to fall in thousands of tons. The roadbed is cut out of the solid rock, and masses of this hang over it stretching out a hundred feet. One cannot look to the top of this wall on account of these projecting, irregular bluffs, but the height to the top even as measured by the eye disturbs the faculties and brings on vertigo. The cramped-up Arkansas rushes madly by a narrow thread, made still more so by the rocks thrown into it. There is not room to step from the train without pitching into the river. Not a word is uttered. The engineer whistles occasionally, and timid folks look for

he rocks to fall. It is really a strain on the mind to take it in; and this can be only feebly done on a single trip. Two thousand feet above you are the tops of the mountain walls. You are imprisoned in a crack thirty feet wide, and are partially under one mountain wall. You can see on the opposite side the gradations of the verdure, rich below, impoverished above. And the curves become more awful as you look ahead or back. For forty-five minutes the tourists enjoyed this sight. The train stopped at the construction bridge near the end of the gorge. Salutes were fired, a fifteen minutes halt was made, and the engine started the train for Canon City. There was no sun in the gorge, but it slanted down the opposite mountain wall as the party returned through the canon, increasing the surpassing beauty of the scene. The canon is eleven miles in length, and the gorge a mile and a-half. The tourists had seen it all—seen the greatest natural wonder of the West and the first train of passengers had passed through the gorge. It will be impossible to build another road through the gorge. Until this point is reached the other side of the river has the advantage, being easier to build over. But the only way to continue a road beyond the opening of the gorge would be to bridge the Arkansas and run over the track of the Santa Fe. This is the only escape. In cutting the road-bed in the gorge the workmen would begin high up on the mountain wall and blast down to the level of the road. In this way masses of rock a hundred yards wide have been split from the mountain. In that narrow crevice it was difficult to dispose of this material. Some was used for the road-bed, and the rest of necessity was thrown into the Arkansas. This made the already too much shut-in stream still more contracted.

For "The Friend."

The new doctrine advanced by some amongst us, that it is not the office or work of the Spirit to sanctify or cleanse the soul from sin, but that it, the Spirit, simply leads the soul to depend on the blood shed on Calvary to cleanse them, whilst they can indulge the gratification of the carnal man, in pride and ostentation, must be very agreeable to the great deceiver of souls; as well as what is now advanced, that universal peace must not be expected until Christ appear in person again upon the earth. These new views will not accord with the doctrine of our early Friends; but the enemy has first drawn many from *Christ in the heart*, and then drawn a "veil" over the understanding; and it is only as Friends are brought to live in the purity, in the indwelling of the Spirit of Christ, that they can remove this "veil." But we are assured, "The loftiness of man shall be bowed down, and the haughtiness of man shall be brought low;" and "That the Lord shall arise to shake terribly the nations." S. C.

It is as truly witnessed now, as in days of old, that to be "spiritually minded is life, and peace;" to mind the spirit, to have our minds, thoughts and wills exercised by the Spirit of truth, "is life and peace; and to be carnally-minded "is death, sorrow, and trouble." These things are not only read, but truly known, and every particle may feel both within.—*William Sheeven.*

AN APPEAL TO FRIENDS.

BY SARAH B. WILBUR.

How can we be nirthful, how can we be gay,
When so many poor souls are going astray?
Going down in their sin to darkness and doom,
Only hoping the future will end in the tomb.

True, we cannot save them, the choice is their own;
But when stumbling in darkness, the path may be shown.
A word dropped in season the wild heart may reach,
And our daily example a sermon will preach.

Though the pathway be narrow, and strait be the gate,
Though temptations beset them, and snares lie in wait,
By faithfully striving they may yet be made whole;
But mirth and the revel, ne'er they saved a soul.

Light words and gavelty, merely hide fears,
While the heart is made better by sorrow and tears.
Then by precept and practice, let's earnestly seek
To prove that we're striving to be humble and meek.

Then how can we be nirthful, how can we be gay,
When long ere the dawn of another bright day,
They may be called hence to meet their just doom,
And find that the future ends not in the tomb?

Eternity then will have opened its gate,
And they will have passed to meet their just fate;
No change can be there where the soul cannot die;
The tree will have fallen, and so it must lie.

Hopkinton, R. I., 5th mo. 12th, 1879.

WAITING.

Selected.

Do the little brown twigs complain
That they haven't a leaf to wear?
Or the grass, when the wind and rain
Pull at her matted hair?

Do the little brooks struggle and moan
When the ice has frozen their feet?
Or the moss turn gray, as a stone,
Because of the cold and sleet?

Do the buds that the leaves left bare
To strive with their wintry fate,
In a moment of deep despair,
Destroy what they cannot create?
Oh, Nature is teaching us there
To patiently wait, and wait.

Selected.

Backward my memory wanders to-night

Into the shadows of by-gone years,
Parting the curtains and bringing to light
The past, with its gladness and tears.

Things long forgotten, memories hushed,
Dreams I had tenderly buried from sight—
Longings unsatisfied—bright hopes crushed—
Of sunshine and gladness—of shadow and blight.

Of a sister's tears and a mother's prayers—
Of trials, temptations and victories won—
Of days of brightness and freedom from cares,
Or of striving to utter, "Thy will be done."

And I marvel much at the tangled skein
The parted curtains have left in sight,
With threads of gladness and threads of pain
All mingled and twisted, the dark with the light.

Ah! strangely woven, these lives of ours,
With warp of gladness and woof of pain,
Yet the flowers would droop in the sunny hours
Were they never refreshed by the cooling rain.

We wonder oft-times at the broken threads,
And murmur at trials and crosses we meet,
Ne'er thinking it needeth each fragment and shred
To render the pattern of life complete.

Oh, a careful Weaver is watching the loom—
And tho' the web may seem jagged and rough,
Whether threads of glory or threads of gloom,
He knoweth the reason, and that is enough.

Every particle of matter is an immensity;
every leaf, a world; every insect an inexplicable compendium. How, then, can we comprehend all the mysteries of truth, and all the ways of the infinite God?—*Lavater.*

For "The Friend."

The People of Turkey.

(Continued from page 325.)

The Bulgarians are the descendants of a horde of Hunnish warriors from the bank of the Volga, who crossed the Danube about the year 679 A. D., and gradually coalesce with the previous inhabitants of the country they now occupy, which extends from the Danube River to the Balkan Mountains, on a south of that range. Our author represents them as a peace-loving, hard-working people but inferior to the Greeks in that versatility of talent which enables the latter to enter into and follow with success employments of almost any kind. Yet their persevering industry and economy enable them to obtain a living from the soil notwithstanding the irregular system of taxation, and the tyranny of the government officials to which they are subjected.

The Turkish peasants are described as quiet and submissive subjects, but poor, ignorant and improvident. They show signs in many places of decrease in numbers, and general deterioration. This is largely due to the drain upon the able-bodied men for military service, and to the general mismanagement of the civil government; which their naturally indolent habits, and lack of quickness of intellect, render more hurtful to their prosperity than it is to that of the quicker-witted Greeks.

The Armenians, driven from their own country by the horrors of war, are scattered over all the countries of the East. Many of them inhabit the larger towns of Turkey and find employment in the mechanical arts, and in commerce and banking, in which they display much ability. They do not manifest a national feeling to any great degree; and have largely assimilated to the customs of the people among whom they live.

The Jews dwelling in Turkey are, to a great extent, descendants of those expelled from Spain by the Inquisition and the edict of 1492: their language is a corrupt Spanish dialect.

The chief occupations of the Jewish community are banking and commerce. They excel in both to such a degree, that where a man belonging to another nationality can only realize a fair competence, the Israelite makes a fortune; whilst in positions in which other men would starve, the Jew will manage to keep himself and family in comfort. The secret of this well known fact lies in the unusual finesse and ability displayed by Israelites occupying high positions in the business world, and the cunning and ingenuity of the lower orders, who with moderate exertion make the most of their trade, and extort all they can from those with whom they have dealings."

When Circassia was finally subjugated by the Russian armies in 1864, about 300,000 of the inhabitants migrated into Turkey. Clothes and rations were distributed to them by the Turkish authorities, and they were settled in different parts of its territory. Our author describes them as sad thieves, and a serious nuisance to the more industrious people among whom they were located. She says:—

"The depredations of the Circassians became so extensive that from one farm alone in the district of Adrianople three hundred and fifty head of cattle were stolen and never recovered.

For "The Friend"

Nicholas Upsall.

At a recent meeting of the New England Historic Society, held on the 7th of 5th mo., a sketch of the life of Nicholas Upsall was read by Augustine Jones, which is of interest to the members of the Society of Friends. N. Upsall was one who showed kindness to some of the early sufferers under the intolerant spirit of the Puritan settlers in Massachusetts.

He came from England in 1630, and settled in Dorchester. He was one of the first one hundred and eight who were admitted to the privilege of a freeman, in 1631. It was determined that same day, that thereafter none should be made freemen who were not church members; this reduced the government to a theocracy.

It appears to have been well esteemed, and filled several important public offices in Dorchester prior to his removal to Boston in 1644. There he and his wife Dorothy were admitted members of the church in the 5th month of that year. He kept an inn called the Red Lion Inn at the corner of North and Richmond Streets.

Mary Fisher and Ann Austin, the first Friends who visited America, arrived in May, 1656, and, without law, were kept in prison five weeks, no one being allowed to speak to them, the prison windows being boarded up as an extra precaution. Nicholas Upsall, touched with compassion, gave the jailer five shillings a week for the privilege of furnishing food to save the lives of these women. This was in obedience to a law higher than the statutes of men.

It has been said that these women visited churches insufferably attired and did other insane and impossible things. It is certain, however, that neither of them had a moment of liberty in Boston, and that both were sent directly to Barbadoes. They were banished 6 mo. 5, 1656. They had not taught heresy in words, but their sufferings attested the genuineness of their convictions and the firmness of their faith more completely than language could have done it.

It does not appear that he suffered for these deeds of mercy; they may not have been known to the Government. His own persecution was, however, at hand.

The first act of the General Court against Friends was dated Oct. 14, 1656. The presumption 'that every man knows the law' was not relied on; the act was publicly read, attention of citizens being called to it by beat of drum through the streets. This was done in front of the Red Lion Inn. And Nicholas Upsall hearing the act read before his door said that 'he did look at it as a sad forerunner of some heavy judgment to follow upon the country.' On the following morning he was called before the court and charged with having expressed his disapprobation of the law against Quakers. He 'in much tenderness and love' warned the magistrates to take heed lest they be found fighting against God.

"I testify against these cruel laws; Forerunners are they of some judgment on us; And, in the love and tenderness I bear Unto this town and people, I beseech you O magistrates, take heed, lest ye be found As fighters against God."

It was fined for this twenty pounds, Governor Endicott saying, 'I will not bate him one groat.' He was besides banished, to depart in thirty days, including four in prison,

every one of you, and give largely to the poor and needy! Refuse not charity either to Mohammedans or Christians, for they are separated from us only by the thickness of the skin of an onion; but give none to the Chinguis, lest part of the curse that rests upon their heads should fall upon yours!"

"The habits of these people are essentially nomadic. Sultan Murad IV. tried to check their roving disposition, by ordering that they should be permanently settled in the vicinity of the Balkans, and obliged to live a regular life; but disregarding the imperial decree, they dispersed all over the country, now pitching their tents in one place and now in another, like evil spirits bent on mischief, or birds of prey ready to pounce upon any game that offers itself. Their pilfering propensities are entirely directed to supplying the common wants of nature; they never grow rich on their plunder."

There are always men in every community whose store of time and zeal and helpfulness and money seems unlimited. If anything is to be done, the common opinion at once looks to these men to do it. But the fact that they have more time and money at their disposal, for any good use, is pretty sure to be nothing but an evidence of their frugality and prudence. Those whose hands and purses do the most good are those who save strength and money for good things, instead of wasting them on frivolities. Ten foolish demands have to be refused, in order that there may be means to gratify one wise call. He who says *no*, wisely, to-day, is the man who will be able to say *yes*, wisely, to-morrow.—S. S. Times.

An Unpublished Verse of Gray's Elegy.—In his reading at Boston, recently, James T. Fields spoke of the lives of the poets Gray and Goldsmith. He said that in 1750 Gray showed his friends, in manuscript, the "Elegy Written in a Country Church-yard." He had much shrinking timidity with regard to its publication, but its sudden popularity when it appeared first in the press, filled him with delight as well as with surprise. The poem was instantly translated into Greek, Latin, Italian, Portuguese, French, German, and Hebrew, so that the whole world read it contemporaneously. When he first handed about the poem in manuscript, it contained a lovely verse which he discarded in the printing. It seems to me, said Fields, one of the most perfect in the poem, and why he chose to omit it is still a mystery:

There scattered off the earliest of the year

By hands unseen are showers of violets found,
The reddest loves to build and warble there,
And little footsteps lightly print the ground.

Ep. Recorder.

Dr. Cullis tells, in one of his reports, of an aged Christian who, lying on his death-bed in the Consumptive's Home, was asked the cause of his perfect peace, in a state of such extreme weakness that he was often entirely unconscious of all around him. He replied, "When I am able to think, I think of Jesus; and when I am unable to think of Him I know He is thinking of me." And to how many of the Lord's dear suffering children have the words of the Psalmist come with sweet consolation, "I am poor and needy; yet the Lord thinketh upon me."

A systematic company of cattle-stealers established all over Bulgaria; the stolen animals taken from the villages found their way to Rodosto and Gallipoli, where they were shipped to Asia Minor and exchanged for stolen cattle from that coast. The dexterity with which a Circassian, introducing himself into a stud, takes possession of the horse, is the terror and wonder of the owner. He uses a kind of lasso, which, cast by the head of the animal, enables him to catch it and stick to it as if horse and rider were one. The wildest animal is soon cowed under the iron sway of the rider, and disappears to be seen no more."

Becoming prosperous and wealthy through continual depredations and robberies, the stithful portion of the community that had appeared sickened on first landing formed a class hostile faction in the land, having as its respect for the authority of the Porte as the life and property of the natives. When the Government tried some years ago to bring order of them under military discipline, they rebelled and gave much trouble to the authorities in the capital itself, where it was necessary to seize, exile, and otherwise punish some of the chiefs for insubordination." The Gypsies in Turkey, numbering about 1,000,000 souls, profess outwardly Mohammedanism, but keep so few of its tenets that the true believers, holding them in execration, deny their right to worship in the mosques, bury their dead in the same cemetery, though not persecuted, the antipathy and disdain felt for them evinces itself in many ways. It appears to be founded upon a strange legend current in the country. This legend states that when the gipsy nation were driven out of their country and arrived at Mekran, they constructed a wonderful machine, to which a wheel was attached. Nobody appeared able to turn this wheel till in the midst of their vain efforts some evil spirit descended himself under the disguise of a sage and informed the chief (whose name was Men) that the wheel would be made to turn by him when he had married his sister Guin. The chief accepted the advice, the wheel turned round, and the name of the tribe after its incident became that of the combined names of the brother and sister, Chinguis, the appellation of all the gypsies of Turkey at the present day.

"This unnatural marriage, coming to the knowledge of one of the Moslem saints, was forthwith, together with the whole tribe, publicly cursed; they were placed beyond the pale of mankind, and sent out of the country under the following malediction:—May you never more enter or belong to the twenty seven and a half races that people the earth, but be cast as scattered to the four corners of the earth, homeless, wretched, and poor; ever wandering and toiling, never reaching, enjoying the fruits of your labor, or acquiring the esteem of mankind!" "I have related this legend because it represents in a very striking manner the condition of the gypsies of Turkey as well as the belief placed in it by people of all creeds, who not only put them beyond the pale of mankind, but also deny to them what would be granted to animals—their alms. One year during the Ramazan, a popular *odja*, preaching on charity to a large congregation of Mohammedans, thus addressed them—"O true believers, open your purses

and was fined three pounds more for not attending worship after banishment. He is driven from his home, the Red Lyon Inn, near the beginning of winter, at sixty years of age; he passes the winter in Sandwich, and in the early spring is driven to Rhode Island, the sanctuary of men persecuted for conscience's sake.

The Indians give him a home, and one of them exclaims, 'What a God have the English, who deal so with one another about their God!'

He returned to Boston in three years, and was instantly thrust into prison. He found there Daniel and Provided Southwick, who were offered to be sold as slaves, but there was no buyer. Whittier has described this scene in a spirited poem.

William Robinson and Marmaduke Stevens were hanged in 1659, tradition says, on Liberty Tree, Boston, and Nicholas Upsall caused poles to be brought to fence in the pit where their bodies were thrown by the executioner.

He was in prison in Boston two years, and he 'drew so many persons to him' that he was sent down the harbor to the castle. Through the efforts of his wife and others he was permitted by the court to go to the house of John Capen, who was probably his wife's brother. John Capen lived in Dorchester, and had early been selectman of the town with Nicholas Upsall. Here he remained four years, from 1662 to 1666, and died there Aug. 20, 1666. He was buried in Copp's Hill Burying Ground, and the following is the inscription on the stone at his grave:

NICHOLAS
VPSALL AGED
ABOUT 70 YEARS
DIED YE OF
AVGVST 1666

The descendants of Nicholas Upsall, highly esteemed and respected people, are living now in Boston and New York.

The inventory of his estate, deducting his debts, was £543 10s, a large estate then, and he had been ten years an exile or in prison and had to support both himself and family.

He gave his books, papers, certain furniture and the use of a room during the life of his daughter, to the Society of Friends; this room was in the Red Lyon Inn. The Yearly Meeting of Friends for New England, 4 mo. 7, 1694, sold its interest under the will, and adding other money to the proceeds, built the first brick meeting house in Boston, near the site of the Quincy House, in Brattle Street.

Nicholas Upsall was not a sectarian fanatic; he was a quiet, unobtrusive man of business, whose heart warmed at the sight of human suffering, a friend of the friendless, who clothed the naked and fed the hungry—a good Samaritan. And if we may not call him a great man, he certainly exhibits the real grandeur of moral heroism, when solitary and alone he confronts the Government with his honest conviction—

"At last the heart
Of every honest man must speak or break."

So uncertain is life, and so manifold are the vicissitudes of human experiences, that any leave-taking may be forever. We are never sure of an opportunity to unsay the angry word, or draw out the cruel thorn we left rankling in a tender heart. The kindness we felt prompted to do to-day, but neglected or

deferred, we may never again be able to perform. The only way, therefore, to save ourselves from unavailing sorrow and regret, is to let love always rule in our hearts and control our speech. If we should speak unadvisedly, giving pain to another heart, let reparation be made instantly, and upon the spot. The sun should never go down upon our wrath. We should never leave anything over night that we would not be willing to leave finally and forever, and which we would blush to meet again in the great disclosure.

Optimism and Pessimism.

Two boys went to hunt grapes. One was happy because they found grapes. The other was unhappy because the grapes had seeds in them.

Two men, being convalescent, were asked how they were. One said, "I am better to-day." The other said, "I was worse yesterday."

When it rains, one man says, "This will make mud." Another, "This will lay the dust."

Two boys examining a bush, one observed that it had a thorn. The other that it had a rose.

Two children looking through colored glasses, one said, "The world is blue." And the other said, "It is bright."

Two boys eating their dinner, one said, "I would rather have something better than this." The other said, "This is better than nothing."

Two men went to see New York. One visited the saloons, and thought New York wicked. The other visited the homes, and thought New York good.

Two boys looking at some skaters, one said, "See how they fall." The other, "See how they glide."

Two strangers to our world were offered refreshments. One took beer, and the other meal. The first said the world is bitter. The other that it is sweet.

A servant thinks a man's house is principally kitchen. A guest that it is principally parlor.

Two boys having a bee, one got honey and the other got stung. The first called it a honey bee; and the other, a stinging bee.

Two boys got each an apple. One was thankful for the apple. The other was dissatisfied because it was not two.

"I am glad that I live," says one man. "I am sorry I must die," says another.

"I am glad," says one, "that it is no worse." "I am sorry," says another, "that it is no better."

One man counts everything that he has a gain. Another counts everything else that he conceives a loss.

One man spoils a good repast by thinking of a better repast of another. Another enjoys a poor repast by contrasting it with none at all.

Sitting down to the same table, one man can make his meal off pickles and another off sweetmeats.

In drinking lemonade, you may detect only the sweet or only the sour.

One man is thankful for his blessings. Another is morose for his misfortunes.

One man thinks he is entitled to a better world, and is dissatisfied because he hasn't got it. Another thinks he is not justly entitled to any, and is satisfied with this.

One man enjoys what he has. Another suffers for what he has not.

One man makes up his accounts from wants. Another from his assets.

One man complains that there is evil in the world. Another rejoices that there is good in the world.

One says, "Our good is mixed with evil." Another says, "Our evil is mixed with good."—*Independent.*

Natural History, Science, &c.

Rooks.—Our attention was first attracted to these birds on a bright sunny morning the month of February, when they came hundreds, and set up such an outbreak "caws," that the most indifferent person could not be unaware of their presence. The severe weather of winter had prevailed but few days before, and I considered it somewhat strange at the time that these birds could be looking for the spring season on short a notice, so I watched their doings attentively. Each rook shouted as loud as it could, and every shout awoke a hundred reverberations. Sometimes a large number would simultaneously set out on the wing and make a flight of considerable circuit, a then return, and set up as loud a cawing ever.

We all know that bright February days are generally followed by northeasterly blasts of which there is an old adage that "there are good for neither man nor beast" at most certainly, they are not calculated to excite any merriment in the rookery. They sit in silence on the branches, sway by the force of the wind, and have the appearance of being uncomfortable to the last degree.

About the first of March, however, if the weather be dry, and the wind not too boisterous, the work of building begins in earnest. The older birds have only to effect a few pairs, but the young ones have to begin for the foundation. On the sixth of that month I observed a couple just making a start, although there was a great deal of noise, tone and manner of the birds were different. They did not appear to be shouting one another, as before, but seemed to caw for their own delectation and encouragement. At the end of the first day but little progress was made. No form of a nest was indicated by the few sticks that might have been carelessly thrown together. On the following day the wind blew very hard, and all hands struck work. None was so adventurous as to attempt to carry on business. The day following, however, the storm subsided; although the weather continued cold, the color once more became the scene of noise at activity.

In the first stage of building, and even until the nest begins to assume a finished form, it is found necessary that one bird should remain on guard, while the other goes forth in search of building material. The male bird does the work, not only by bringing home the sticks, twigs, and other requisites, but also of arranging them in order, whilst the [female's] duty is to take care of the property already acquired. It is during her absence that most of the depredations are committed. Such pilferings are managed in the most stealthy manner possible; the thief which is generally a near neighbor, pretends to be very busy, and when she imagines that

is looking on, will nip up a twig and fly it, as well as any other portion of the protected property, to her own purposes. We never seen a theft committed openly, probably from the fear of exciting popular indignation.

The breaking off of twigs and sticks from branches of trees must be very hard work. A rook may be often seen tugging away for an hour before its purpose can be accomplished. During the two days' storm to which I alluded just now, a great quantity of it might appear, at first sight, to be use-material, was strewn on the ground, but rooks never attempted to make any use of it. Probably they knew by instinct that at they gathered themselves from off the young trees was more sound and durable than such as was brought down by the wind. In carrying home the larger sticks, the labor often appear to be much exhausted with it, and in attempting to wend a somewhat intricate way amongst the branches, they not infrequently lose their prize, when in a few yards, or even feet, of their destination; still I could not make out that under such circumstances a rook ever decided for the purpose of recovering what had lost. They seemed to bear their misfortune in a philosophical spirit, and set to work again without delay. At the end of a week's work the nest I was especially watching began to assume its veritable form, the male was able to sit in it, but would hop on the return of her partner, in order that he might the more conveniently continue building or lining process. At a certain point the nest is supposed to have attained a final settlement, after which both birds may come home with impunity. In about a fortnight the dwelling is complete.

Up to this time the entire colony leave the sliding places at night and proceed to their nesting quarters in a body, which are frequently some miles away, generally in an extensive wood, which affords shelter from wind. It is interesting to observe that their course the number of the flock is frequently increased, being joined by parties coming from different quarters, and falling in nicely together.

As soon as the period of building is over, the time for laying their eggs has come, and rooks take up their permanent quarters side their nests.

In a week or ten days they usually have four or five eggs in the nest, and then the process of incubation begins. During this time the male bird is most assiduous in the discharge of his domestic duties. He brings some abundant food for the use of his sitting mate, and occasionally takes her place in the nest, whilst she goes abroad, it may be, for a while. About the middle of April the young birds may be heard giving utterance to a squeaking note, whilst the parents send forth a kind of gobbling sound. Their labors in bringing food for their young are unceasing, commencing with the first streak of dawn for the "early worm" and finishing only at nightfall. Sometimes they return on the fields singly, sometimes together, to their clamorous brood. And so the daily round of labor goes on until the young bird's "brancher" have the branchers have flown. Rooks have their partiality and their aversion to certain classes of other birds. Jacksnaws and starlings are free to visit the colony

without fear of molestation, but not to build there. If a magpie, however, should put in an appearance, a great commotion would be the immediate consequence. I have seen the latter bird compelled to beat a retreat when followed by several black gentry, who assumed a very threatening attitude.

Rooks have frequently taken up their quarters amidst the bustle and constant traffic of public thoroughfares, apparently unconcerned about the passing and repassing of the crowd; but when their abode is situated in a remote district, they are extremely susceptible of the approach of strangers. Even the appearance of a strange dog or cat is, in some cases, a sufficient cause for exciting a great noise and commotion; whilst those which belong to the place would attract no attention whatever.

In common with other kinds of birds, rooks will sometimes help themselves to fruit, newly sown corn, and the young tubers of potatoes; still the incalculable good they do in clearing the earth of grubs, so destructive to crops, is surely more than a compensation for such depredations.—*Chamber's Journal.*

Intra-Mercurial Planets.—From a comparison of his own and Professor Watson's observations of stars near the sun during the last total eclipse, Prof. Swift arrives at the conclusion that four intra-mercurial planets were seen on that occasion—two by Prof. Watson and two by himself.

Stability of Cleopatra's Needle.—A curious controversy has been going on in the *London Times* as to the stability of Cleopatra's Needle, recently imported from Egypt. The smallest diameter is five feet and it is calculated to be able to resist a pressure of 80 or 90 lbs. per square foot; the question is whether the wind pressure ever attains that amount, some asserting that 55 lbs. is the maximum; and the discussion has brought out the assertion that our ordinary anemometers are entirely unreliable, and fears are entertained that the needle is not safe.

An effective application of the science of photography to the detection of criminals has been adopted by the Bank of France. An invisible camera, with proper apparatus, is placed in a gallery behind the desk of the cashiers, who, when they suspect any body of an attempt to swindle, give a private sign to an unseen operator, and he takes at once a portrait of the suspicious person, while engaged in conversation with the cashiers. Several cunning forgers have been copied in this manner, and were astonished when brought face to face with their counterfeit presentations. Not long since, a man suspected of forgery was arrested in Marseilles; but he showed letters and brought witnesses (accomplices) to prove his innocence. They seemed so convincing that he was released, and was on the point of sailing for Alexandria, Egypt, when a detective arrived from Paris with a photograph taken at the Bank of France. He was re-arrested, and found to be the original of the photograph, which led to the discovery of various forgeries, and caused him to be sent to prison for ten years.

Some curious natural phenomena are witnessed from the summit of Pike's Peak. Electric storms are so remarkable there that those who have witnessed them are eloquent as to their splendor. Little thunder accompanies them, but the whole mountain seems to be on fire, and the top one sheet of flame. Elec-

tricity comes out of every rock, and darts here and there with indescribable radiance. An observer says that it played around him continuously, shot down his back, glided out of his feet, and so completely filled him that he became charged like a Leyden jar.

Nine-tenths of the poor need moral help more than they need material help. While they are in their present condition of mind, alms are more likely to be a curse than a blessing to them. They are poor and degraded only because their inner life was first impoverished; if they could be taught self-denial and self respect, and the value of character, they would speedily find a way out of their pauperism. Inspire them with a higher motive, teach them to postpone present gratification for future good, lift up before them a hope of better life, and the great majority of them would soon be above the need of charity. In other words, the ideas and sentiments which it is the business of the churches to propagate, are what they are starving for.—*Late Paper.*

Experience and Incident.—"Before they call I will answer."—A Dutch preacher one evening held a meeting in a strange city. While he was preaching and enforcing upon the hearts of his hearers the doctrine of the cross, a police officer came into the room and forbade him to go on. He even commanded him to leave the city. As he was a stranger in the place, and the night was dark, he wandered around the city gates. He was not, however, without consolation, for he remembered Him who had said, "Lo, I am with you always, even unto the end of the world." "Though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me; thy rod and thy staff they comfort me." He had been long in the school of Christ, and had learned to watch for the slightest intimations of his will. While he was thus wandering around, suddenly he saw a light in the distance. "See," he said to himself, "perhaps the Lord has provided me a shelter there," and in the simplicity of faith he directed his steps thither. On arriving he heard a voice in the house, and as he drew nearer he found that a man was praying. Joyful, he hoped that he had found here the house of a brother. He stood quiet for a minute, and heard the following words poured out from an earnest heart: "Lord Jesus, they have driven thy servant from the city, and he is perhaps at this moment wandering in a strange place, of which he knows nothing. O may he find my home, that he may receive here food and lodging." The preacher having heard these words glided into the house, and as soon as the speaker said "Amen," he saw his prayer was answered. Both fell on their knees and thanked the Lord, who is a hearer of prayer, and who never leaves nor forsakes his servants.—*Late Paper.*

THE FRIEND.

FIFTH MONTH 31, 1879.

The need of relaxation and rest, after severe or long-continued toil, is universally felt. It is as essential to our brains as our muscles—to our mind as our bodies. There are few who have not felt the beneficial and invigorating effect of a thorough change in one's

mode of living—such as the meretricious experiences when he leaves his counting-room and its cares and responsibilities, and spends a week or two by the sea-shore, or among the mountains, or in the quiet retirement of the country. The freedom from care, and the feeling of rest, have in thousands of cases restored the wasted energies, and enabled the visitor to return to his usual employments and take up his load of duties with fresh vigor and courage.

But while relaxation and amusement are allowable and right within certain limits, it is needful to be on our guard that they do not become excessive in amount, or hurtful in character. The true Christian, even in those times when most unburdened and at ease, can partake in nothing which is tainted with evil, or whose tendency is to lower the standard of morality, or to act injuriously on his own spiritual condition or that of others. The innocency, sweetness and conscientious carefulness which should mark his character, must manifest itself then as well as at all other times. The declaration of our Saviour, that a tree is known by its fruit, gives us ground to believe, that those who indulge in anything wrong, when from under their usual restraint, have not yet known what it is to have all things in them "made new."

There is a strong tendency to excessive indulgence in the community, in many of the games and sports practised for amusement. The desire to excel in them takes hold of the mind, and they are studied and pursued with an eagerness altogether inconsistent with the primary or professed object of furnishing that mental or physical change which will restore to the system its power of resuming the real business of life with efficiency. Whenever amusement thus ceases to be a means, and becomes an end which is sought for its own sake, it falls below the dignity which belongs to a rational and immortal being.

In many of the colleges and institutions for learning, of our country, active amusements, such as base ball, cricket and rowing are resorted to, as a relief from the tension of severe study. It may not be wise to prohibit these, when kept within proper limits, unless some other forms of active exercise could be substituted, which would be better adapted for the same purpose, or less liable to abuse. But the growing custom of continuous and systematic training in these pursuits, and of contending for superiority in skill with the students of other schools, is a perversion of the right object, that calls loudly on those interested in such establishments, to check a practice which threatens to become a source of serious evil.

The spirit of rivalry is often strong in the young, and though they may be well-disposed, yet they have not had that experience in life which will enable them to foresee the evil results flowing from such contests. They can not fully appreciate the tendency of undue culture of the muscles to lower the moral and intellectual tone, and to approximate the individual in some measure to the level of the professional athlete—a level so low that he who excels in that capacity has very rarely been worthy of imitation in the higher and nobler parts of man's nature.

We are sorry, therefore, to observe these trials of skill between the students of different schools, believing that evil will flow from them.

During the past few months, exhibitions have become common in some of our large cities of "walking matches," both of men and women, in which the physical strength and endurance of individuals are tested under conditions closely resembling those of animals in a race course. These exhibitions are said to have been attended by a large number of spectators. Are not the feelings which are gratified by such displays, closely allied to those which in former ages led to gladiatorial contests; and in these days promote the brutal amusements of bull-baiting and prize-fighting; and do they not both indicate and foster a condition of mind far removed from that which becomes a people professing the self-denying religion of Christ, or even claiming to belong to a race of beings distinguished from the lower orders by a higher intellectual development?

SUMMARY OF EVENTS.

UNITED STATES.—An interesting report of the recent exercises at Hampton Normal and Agricultural College, gives an encouraging statement of the progress of the Indian students. Of these there are 18 adult men, Cheyennes, Kiowas, and Arrapahoes, who were taken to St. Augustine; 40 boys and 9 girls were gathered from agencies in the West, where they had received some training, and are represented to be bright, intelligent children. These have been at the school since last autumn, the older Indians more than a year. The latter can read intelligibly from the Bible and other parts of the Scriptures, and are remarkably familiar with the map of the United States and arithmetic, and had evinced a creditable interest and progress in the work where they have received instruction in the mechanic arts.

The returns to the Department of Agriculture show the average wages of labor, without board, on yearly engagements have declined from \$21.29 per month to \$20.26, or 4.8 per cent., during the past year. The cost of board of farm laborers declined 4.16 per cent. Four States and two Territories show an increased rate of wages—Minnesota, Colorado, California, Oregon, New Mexico and Washington Territory—all others a decline. This is greatest in Vermont, 39 per cent., Maryland, 25 per cent., and Virginia 18½ per cent.

The cost of subsistence has advanced in New Jersey, Pennsylvania, Texas, Colorado, New Mexico and Washington Territory. All other States show a smaller cost of subsistence.

The general tone of correspondence is hopeful of a revival of industry, and the surplus of unemployed labor is growing less. Good labor can generally find employment at fair prices. Many are idle because they will not accept reduced wages.

During the year 1878, forty-eight railroads were sold under foreclosure, representing \$151,616,700 of capital stock, and \$160,014,000 of bonds and debt.

The U. S. ship Constitution arrived at New York on the 16th inst., with returned goods from the Paris Exhibition.

William Lloyd Garrison, the noted abolitionist, died in New York on the 24th inst., in the 74th year of his age.

The telephone is being satisfactorily introduced into underground and submarine operations. The divers find no difficulty in conversing, while at work, with the engineers directing their operations, thus effecting a great saving of time. In the divers' telephone the wires are carried into his helmet through the air tube, and are thus amply protected.

The Legislative Appropriation bill, as amended by the Senate, has been concurred with by the House, and has been forwarded to the President. The Warner silver bill passed the House on the 24th inst., by a vote of 114 yeas, 97 nays.

The mortality of Philadelphia during the past week was 261. Of whom 171 were adults and 90 children—42 being under one year of age.

Morals, &c.—U. S. sixes, 1881, 107½; do, 5's, 104½; 1 per cent. forwarded 106½; coupon, 108; 4 per cent., 103½. The subscriptions to \$10 refunding certificates to date, have been \$21,417,150.

Cotton.—Sales of middlings at 13½ & 13½ cts. per lb. for uplands and New Orleans.

Petroleum.—Grade 7½ cts. in bids.; standard white, 8½ cts. for export, and 9½ a 10½ cts. per gallon for home

use. Lined oil, 59 a 60 cts. for American, and 61 cts. for Calcutta. Lard oil, 48 a 49 cts.; c sperm, 77½ cts., and winter bleached, 95 a 98 cts.; n. foot, 60 cts. for No. 1, and 75 cts. per gallon for No. 2.

Seeds.—Clover, 5½ a 6½ cts. per pound; Flaxseed, \$3 a \$4.42 per bushel. Timothy \$1.35 a \$1.40 bushel.

Flour.—Minnesota extra, \$1.50 a \$1.70; Penna. Ohio, \$5 a \$5.25; patent and other high grades, \$ a \$. Rye flour, \$2.87½ a \$3. Corn meal, \$1. Brao, \$13.75 a \$14.25 per ton.

Grain.—Amber wheat, \$1.16 a \$1.17; red, \$1.14; white, \$1.18. Corn, 40 a 44 cts. Oats, \$1.33 a 34 cts.; white, 35 a 36 cts.

Hay and Straw.—Prime timothy, 70 a 80 cts. per pound; mixed, 55 a 65 cts.; straw, 80 a 90 cts. per pound.

Beef cattle were dull and lower—2614 head arrived and sold at 31 a 51 cts. per lb. Cows, \$25 a \$45 head. Sheep, 41 a 51 cts. per lb. Hogs, 5 a 5½ per lb., as to quality.

FOREIGN.—It was announced in the House of Lords on the 26th, that the Secretary of State for India, had received a telegram from Major Cavagnari, stating that he had signed the treaty with the Ameer of Afghanistan. The treaty is said to bring rich gains to England.

News from South Africa do not encourage a hope of a speedy termination of the war. Preparations are being made for a more general invasion of the Zulu country. General Wolseley has been appointed prime Military and Civil Commander of Natal, Transvaal, and other districts adjoining and included in the war of Africa.

The statement of the Irish Government recently paid the last installment of £1,150,000,000 francs to the B's of France, incurred at the time of the war with Germany.

The sub-committee of the Darien Canal Congress presented a report, admitting the possibility of a Nicaragua route, with locks, but consider the local canal course, proposed by Lieut. Wyse, the best. The estimated cost of the latter is £2,000,000.

The winter just passed is said to have been one of the coldest on record in France, in a long time. The thermometer did not reach an extraordinarily low figure, but remained at a very small elevation for unusually long space of time.

The German Empire has 21 universities, with 12 professors of French, and 17,000 students.

The Danube river is reported to be very high, the water being within two feet of the highest point recorded, and is still rising. Nearly all the Austrian villages between Pesh and Bazias, have water in the streets. At Belgrade the river is twenty miles wide.

Russia is said to have the highest death rate of any country that collects mortality statistics.

In 1877, the number of deaths from cholera in Russia was 1,000,000, and next in the list of diseases; next came typhoid fever, and next small-pox. There are about 14,000,000 sectarians in Russia who do not allow vaccination, and hence the large mortality from small pox. Of the fourteen nihilists recently court-martialed in Kiev, 11 were sentenced to be shot, ten to various terms of penal servitude, and one to hard labor. Among them were three women sentenced to fifteen years each. Incendiariness continues in some sections.

The recent vote in Switzerland, it is said, does not actually revive capital punishment, but leaves enactment at liberty to enact it or not.

The British India Steam Navigation Company's steamer Asia, has been sunk by collision with another steamer. Sixty-six of the crew and four passengers were drowned.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Application may be made to—

John W. Biddle, No. 72½ Bampton Street.
Ephraim Smith, No. 1110 Pine St.
Rebecca W. Kite, No. 459 North Fifth St.
Hannah Evans, No. 322 Union St.

FRIENDS' ASYLUM FOR THE INSANE.

Now Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOHN C. HALL, M.D. Applications for Admissions—Patients may be made to the Superintendent, or to any of the Board of Managers.

Life and Adventure in Japan.

BY E. WARREN CLARK.

[It is proposed to give some extracts from his work, in the belief that they will be found interesting to the readers of "The Friend." To author, as he tells us in his preface, reled four years in that unique country (from 71 to 1875) in the service of the Japanese Government, as a teacher of science in a hool in the interior, and subsequently in Tokio, the modern capital. He remarks that a book "is a simple narrative of his experiences and adventures, presented from a Christian standpoint, and reflecting the novel phases of Japanese life and character, with which he as daily brought in contact." It was "intended primarily for the young," and this will account for the easy and somewhat juvenile style adopted by the author; but the subjects treated of in these extracts are such as to impart valuable information to readers of any age, respecting a land so long secluded from other nations, and only within the last few years inviting foreigners to her shores, and sending her sons abroad to acquire a knowledge of western civilization and the arts and sciences peculiar to Christian communities.]

FIRST SIGHT OF JAPAN.

At early dawn on Wednesday, October 5th, I looked out of my state-room window from the steamer Great Republic, and lo! the now white dome of Fuji-Yama, the "Matchless Mountain" of Japan, rising like a temple of beauty above the clouds and mist; and as I caught sight of it the sun rose higher and higher, causing the mountain to brighten up, and its face to smile a welcome to us in our approach to the old, old world.

Slowly we steamed up the great bay of Yedo, passing verdure covered cliffs, rocky promontories, and small islets clothed in brightest green, while here and there the thatched-roof cottages of the fishermen were scattered along the shore.

A slight breeze rippled the surface of the water, and Japanese junks came scudding by under full sail. The junks had low prows and very high sterns, with broad sails sometimes made of matting or bamboo, and having large characters inscribed on black bands of cloth, with which the main-sail was ornamented. The cargo of the junk was carried amidship, with a bamboo roof built over it; and not a particle of paint appeared on the whole craft. The junk came quite near the steamer, dash-

ing the spray from their low prows, and rocking violently in the rollers left in the wake of the Great Republic.

Swarms of little skiffs surrounded us, sculled by nearly naked Japanees, with brawny arms and brown skins. Dropping into one of these boats, I made for the shore. Alone I wandered off, and peculiar were my feelings as I wended my way among the strange sights and people.

It is said that the *sounds* of a place first attract the stranger's attention, and so it was here. I heard an unearthly shout or yell, repeated in quick and regular succession, and turning down the street I saw a line of rough wooden carts drawn by strong coolies, who tugged away like horses and gave these guttural yells in keeping step with each other.

Boxes of tea were piled on the carts, and as I passed by the stone houses on a side street I could smell the sweet aroma of the tea that was being "re-fired" within, and hear the merry prattle in a strange tongue of the tea-girls as they sang together and stirred the tea-leaves on the hot copper ovens.

Taking a straight street to the left, I passed through a portion of the foreign settlement, which was substantial and comfortable, and came to a bridge crossing the canal. On ascending a steep flight of steps I reached the top of "The Bluff," where many English and Americans live; from this point a beautiful view spread before me of the bay, shipping, city, and the native town of Yokohama.

I met many kind friends at the American Mission Home, a beautiful building on "The Bluff," where Japanese girls are instructed in Christian truth, and where the first Sunday-school in Japan was established.

After a few days the Japanese officials arrived at Yokohama who were appointed to conduct me to their distant province in the interior of the country.

I had engaged to go to the city of Shidzu-o-ka, one hundred miles south-west of Tokio, to take charge of a scientific school there, and teach the Japanese in chemistry, physics, and other branches of study. I was to be liberally paid by the Japanese Government, who were also to furnish my horses, guards, interpreters, philosophical apparatus, attendants, and give me a large temple in which to live. Thirteen long articles, written in Chinese, Japanese, and English, forming three imposing-looking books, constituted the "contract" or agreement made between us for the space of three years.

But when I came to sign the agreement, I found that the "Dai-jo kan"—as the Council of State is called—had slyly inserted a clause forbidding me to teach Christianity, and binding me to silence on all religious subjects for a space of three years. Many reasons prompted me to accept, and some of my friends urged me to sign the contract as it was. The interpreter said, "Sign the promise; but when you get away off in the country you can break

it and teach what you please." Others said, "Sign it, or you will lose \$300 a month, and all your good chances besides; some mere adventurer may get the position, who will do the people more harm than you can do them good."

It was a great dilemma, for I had spent all my money in coming to Japan and getting ready to go into the interior, and were the contract to fail I should find myself in a tight place.

Nevertheless I determined to stand firm on the principle at stake, and sent word to the government that unless the objectionable clause was withdrawn, the contract could not be accepted. "It is impossible," I added, "for a Christian to dwell three years in the midst of a pagan people, and yet keep entire silence on the subject nearest his heart."

To my surprise an answer was returned after three days, saying that the clause against Christianity should be stricken out; and the messenger who brought me the news exclaimed, "You have conquered, and have broken down a strong Japanese wall. Now you can also teach us the Bible and Christianity!"

I mention this to show that it pays to hold fast to the right, at whatever apparent cost; for, instead of thinking less of me, or being vexed at my obstinacy, the Japanese officials were more friendly than ever.

They immediately advanced all the necessary funds to meet the heavy expenses incurred, and were so liberal and polite as to excite my gratitude and astonishment. Under their kindly assistance I was soon ready to start on the long journey.

But never before had I so many things to think of at once. Not only had I the care of perfecting my official arrangements, but I had all the minute details of "first going to house-keeping" beyond the range of civilization.

Imagine yourself preparing to keep house where a real house was never known! Imagine yourself endeavoring to furnish said house where furniture was never heard of; where bedsteads and beds and carpets and windows were never seen; where mirrors and stoves and chimneys and coal had not even been dreamed of. Imagine yourself going to live a certain number of years in said house and place. The probability is you would want something to eat during your sojourn; but there beefsteaks and mutton-chops are unknown, a loaf of bread is a myth, and milk, butter, and cheese are fairy tales.

Perhaps now and then you would like to know the time of day. But no town-clock ever strikes to inform you, no chronometer exists by which to set your watch when it stops, no almanac to tell the day of the week or month when you have forgotten them. In fact I frequently *did* forget the day of the week, and once kept the scientific school waiting several hours for me, supposing it was Sunday! After that I thought of cutting

notches in a stick every day, after Robinson Crusoe's fashion; and when my watch stopped I would set it by a sun dial, which I made with two sticks, a compass, and a string.

Na ka-mura was the name of one of the officers sent from the province where I was going; and although he was the most noted scholar of Chinese literature in Japan, he was as simple as a child, and quite amusing in his use of broken English. He called at the Mission House to see me one day, while I was off making some purchases, and, as he awaited my return, the children of the Home volunteered to entertain him. "They take out several cards," he wrote, "singing the songs which are written on them" (Sunday-school hymns), "then passing the biblical pictures, very fine, to me, they said, 'While you look at them — Clark will soon be returned.' The girls again merrily explained them to me, saying, 'This is John the Baptist,' 'This is dove,' 'This is Jesus,' 'This is Abraham sacrificing his son,' and the like. During one hour I feel myself to get some advantage from the surrounding children."

Not long after this Nakamura boldly presented a memorial to the imperial government suggesting that they build a Christian church in Tokio! in order that Japanese subjects might have an opportunity of being instructed in the truth. Of course the government did not quite see it in that light. Nakamura was appointed to go abroad with the Japanese embassy then starting for America, but he declined, saying that he had once lived in a Christian country—England—without learning Christianity, and now he wished to retire to his own province and study religious subjects with his new foreign teacher. He was subsequently my warmest friend and most intimate companion; he became a devout Christian under the instruction of my Bible class, and frequently would sign himself, "Your most humble servant, and to be your future and forever friend in the spiritual world."

You can scarcely imagine the impressions of one fresh from a Christian land at the first view of the heathenism of which he had heard but never seen. [On the First-day of the week] the sounds of labor are heard in every direction, and sin and corruption abound in their worst forms. I hear ever and anon the deep, prolonged sound of the great bell of the heathen temple, as it strikes to announce that another soul has entered to bow down to the idol. I hear fire crackers in an adjacent Chinese burying ground, where worship is going on to the spirits of the dead. As I visited the temples of Yedo the other day, and saw the hundreds of human beings prostrated before their images and calling upon their gods, it did seem to me the most pitiable sight I ever witnessed; and as I moved among the millions in the great capital of Japan who never heard of the name of Christ, it seemed too solemn to be true. Possibly I may become so accustomed to heathenism and its accompaniments as not to feel their painful reality, but I trust I may never lose the earnest desire to turn these poor deluded souls from their errors."

On the following Monday the horses and guards appeared at the door, and as my furniture and freight had been sent by sea on a Japanese junk, I bade farewell to all my new-made friends at Yokohama, and started off with the guards to encounter the strange ex-

periences and adventures of life in the heart of Japan.

(To be continued.)

For "The Friend."

A Few Thoughts.

Will the keeping of every jot and tittle of the outward appearance and practices of Friends, with an intellectual apprehension of their principles, however correct, while we have failed to submit ourselves in some good degree to the baptizing power of the Holy Spirit, make us truly Friends?

Were the practice of reading the Bible in our meetings for worship to be generally adopted; if singing in them should come to be considered a regular part of the performance; if we should reach through the length and breadth of our Society a "close approximation" not only to a paid ministry, but also to a college-bred one; if the ancient living and powerful ministry that was under the immediate puttings forth of the Holy Spirit, both as to matter and time, should be completely exchanged for the extempore lecture and First-day school talk; if we should universally cast off every distinguishing feature of Friends in our dress and address; should a time come when there was nothing to distinguish us from professing Christians around us in our religious practices, or from the non-professing world in our appearance;—shall we then have any just claim to be considered as truly Friends?

A dear and valued friend whose opportunities to observe have been large, writes: "I have not been disposed to question that there has been a wide spread revival of fresh interest and life. Much of the truth of the gospel has been taught with increased definiteness, and merely traditional foundations have been thoroughly shaken. But how ready has the enemy been to infuse error wherever possible, and conceit and insubordination and disorganization. Liberty has been proclaimed and taken on the one hand, and tolerated on the other to the verge of anarchy. In the midst of innovations and changes approaching revolution, there has been little to be done by many but to suffer. But as tendencies become fully developed, and the great movement in the direction of change manifests its true character, it seems to me there must inevitably come a limit and reaction or a crisis. When doctrines and practices are taught and urged radically at variance with Quakerism, there will be some, I hope there will be many, who cannot endorse and sustain them. These will not be the aggressors. The simple withholding of approval cannot be truly called opposition nor persecution. It seems to me the time is near when Friends must separate themselves, *not from the body* but from the things that destroy it."

For years have I pondered the condition of our Society, invariably coming to the same conclusion: that our ancient principles must be held fully and honestly in the Life and Power that the founders of our Society felt to accompany them, by all that truly represent the Society of Friends. Is not this the only impregnable ground, and though it be swept with a storm of arguments, must not all who deeply and honestly love the principles and testimonies of the Society of Friends, sometime rally and stand upon it in solid phalanx together? In order to this, must there not be a deep bowing of individual hearts under

the power of the Holy Spirit, that He may become their purifier, their actual teacher and guide, day by day, into all truth?

West Falmouth, Mass., 4th mo. 20th, 1879.

Some Extracts from the Diary and Letters of Ebenezer Wirth.

(Continued from page 330.)

1845. 8th mo. 20th. Attended the funeral of John Blacksnake, son of Owen and Ab Blacksnake, (one of the scholars of Co Spring), which was conducted in a sober and orderly manner. The parents and relatives appeared to feel their loss keenly, but when I trust, in a degree resigned to the will of the Lord. I understood his mother, when she went to take her last look at the corpse, spoke as follows: "My dear little boy, thou hast left this world, yet I continue to love thee; I have been thinking in my heart and have asked the Lord to help thee and make thee well. I cannot help thy dying, for the Lord has promised that we must all die and leave this world. It is now better for me to try to be good, than I may meet thee in Heaven, for I should like to meet thee there." I was present at the time, but did not understand the language. I understood from the interpreter, that thinking in her heart meant prayer. I suppose secret prayer.

31st. May the Lord in his mercy be witness, for his life-giving presence can alone administer consolation in all our trials, and at times when we are favored to partake largely of it, makes up more than we are called upon to sacrifice in serving our Divine Master. What an inexpressible favor it is to come under His blessed wing; to be near Him who we love, and in whom we trust; who has in his infinite mercy granted us the privilege of a dressing Him in that endearing language—"Our Father who art in Heaven." Oh! its comforting beyond the power of language describe to the soul that is bowed under sense of its own unworthiness, and at the same time favored to feel a living sense of His loving kindness and goodness of our Heavenly Father and his dear Son, our blessed Savior! It has frequently, during the past week, been the breathing desire of my heart, that sometime might be more fully given up to the Master's service, that I might perform the duties required of me in his time, and in that way that would be most pleasing to Him, that when the right time for me to be released, some, I may be favored to feel that the service required of me (here) is performed and that I may return home with the reward of peace.

1846. 12th mo. 29th. A considerable time has passed since I have written my religious experience and trials, during which time I fear I have been too careless and slack in coming up to my religious duties in sincerity and truth. Oh! how much I stand in need of Saviour, of a merciful Saviour; of his blessing, Light to show me my true state and condition, and of passing through his refining fire that all within me that stands opposed to the blessed will, may be taken away, that in time to come I may be preserved from the snare of the wicked one; may be more and more concerned to know His blessed will and faithfully to perform it. I am sensible that this my duty, and that a faithful performance of it, through his unmerited mercy, (not my own merits), will afford a peace and consol-

that is far superior to all the riches and honors of the world. There have been within weeks six cases of small-pox and two of these may serve as a warning to those who are left, myself included. Such has been my weakness that I fear I have indulged too much (of late) in looking toward home. When aided with help and strength from my Disposer, I have desired to be preserved in the place that would be most pleasing unto me, attending to the services which He may require; for He is infinitely worthy to be loved in all things: He is a rich rewarder of those who serve Him. I am unworthy of these feelings—they are of his unmerited mercy. Oh! may they continue, and may I be more fruit unto this dear Master. I am sensible that I have been much favored in being helped in getting along with the Indian concern; may his blessing attend the work; his praise is due to Him alone.

I think I feel in a degree thankful I have the teacher I have for the school at Great Hill or Horse Shoe; his living in the school-house and boarding himself, has afforded me a quiet and comfortable stopping place when that part of the reservation. I have enjoyed the accommodations with a good degree of secret satisfaction. The natives do not appear properly to value an education, which is partly the reason they do not send their children to school more regularly. The last time the school was started while I was there, I felt a desire to sit in silence with the children (for a time)—the teacher was present. I think I felt in a good degree clothed with the spirit of secret supplication, and my mind dwelt upon Him who has been my comfort and strength: sweet and encouraging is the remembrance of these favors.

1847. 1st mo. 16th. Received a letter giving an account of my brother Paschall being very unwell, and requesting me to come home. The news did not alarm or distress me as much as I might have expected from his weakness I have felt under similar trials on other times. I esteem it a great favor, which I hope I may not soon forget. The thought of leaving this place without first being liberty so to do, I felt to be a serious matter. I endeavored to feel after liberty and thought I felt it in some degree. After this I dismissed the school and went home, where I tried the subject again, and thought I might return to Chester county as soon as I could, for which I trust I felt in measure thankful. I then turned my attention to get ready to leave, and started the next morning about 2 o'clock. Wm. Blackmake, an Indian boy, took me to Collins'. The sleighing was good, and we got along well; but getting to Buffalo that night appeared for a time discouraging. I thought it right to persevere, and after trying some time I was much favored in meeting with an opportunity, and got within eight miles of Buffalo that night. I think I was much favored in getting along where there appeared no way. First-day evening got to Syracuse; Second-day to Albany; Third-day to New York; Fourth-day night, or rather Fifth-day morning, about one o'clock, reached home. I at times felt surprised, on my way home, that I did not feel more cast down in spirit on account of my brother's sickness; I hope it was the power of Him who was restoring my brother to health, that supported me. I

enjoyed my visit in a good degree, but think I suffered loss for the want of not keeping my eye enough single to Him who alone can direct us aright, and give us ability to perform.

(To be continued.)

Elihu Barritt.

The announcement of the death of Elihu Barritt has stirred up affectionate regret in many hearts on this side of the Atlantic. Lively recollections have been awakened of a period of earnest labor and hope in the cause of peace and human brotherhood, of which Elihu Barritt was the presiding and inspiring genius.

His mental capacity and marvellous linguistic powers might have led him to a life of seclusion and study, but a higher inspiration took hold of him, and he gave himself to illustrate in every way of which he was capable, in word and action, by pen and voice, the great truths of the universal Fatherhood of God and brotherhood of man. He also preached and illustrated through his whole life what we may perhaps call the gospel of labor, and carried to perfection the ideal of "high thinking and plain living," which the poet mourns over as almost lost in our degenerate days.

It is probably known to most of Elihu Barritt's friends that during the later years of his life his outward circumstances were more prosperous than in earlier life, through an increase in the value of some land which he possessed; and, as might be expected, this chiefly showed itself in efforts for the good of those around him. In 1874 he writes—"I can hardly realize that I am already what I hear myself called—an old man. It often startles me to hear the term applied to myself. Though my health has been precarious for several years, I have been very active in all sorts of mental and manual occupation. I have been writing a good many books, and am surprised to find that they number over 30, counting in all sizes and titles from the beginning. On my return from America in 1870, I wrote a semi-theological work of 450 pages, in an assumed style, with an assumed name, which was published in London.* It contains my deepest thoughts for thirty years on the most vital points of Christian faith. I have compiled grammars and reading and parsing exercises in Sanskrit, Hindustani, Persian, and Turkish, which are now ready for the press."

Later on in the same year, after a severe illness, he writes—"I am almost busier than ever with my pen, not only on my philological books, but for the press and newspapers. I am also instructing a class of half-a-dozen young ladies in Sanskrit. They come every Saturday evening, and are making very much progress in a language which but few distinguished savants have grappled with. I feel quite proud of having the largest, if not the only class of ladies in the study to be found in Europe or any other country."

The Back Pew Man, who I suppose in the main means Elihu himself, was brought up in a strongly Calvinistic community. The doctrines of Election and Reprobation were preached in all their native repulsiveness from the pulpit of a New England church which he as a boy attended with his parents, and he often heard them discoursed on by the fire-

side. He describes the agony of mind which they produced, as he dwelt upon the painful question of how many of the members of their household group would be likely to be among the elect. As he himself, like so many other men of genius, was somewhat dull as a boy, he concluded that it was not likely that he would be one. He describes going out alone and coming to a place where a river was dashing far below him among sharp rocks, and questioning whether, if he were sure of annihilation, it would not be wise to make the plunge.

He says, in his book, "As I grew up to be a man, I found that Milton had made a deeper impression upon the minds of Christian people than Moses himself. I could see, or thought I saw, that all the preachers I heard, and the religious writers I read, took their ideas about God, the Creation, and the Fall more from 'Paradise Lost' than they did from the Book of Genesis."† He puts the following question to preachers and other learned men:—"Can you open the Bible and read the first chapters of Genesis without your mind's reading ten lines of Milton to one of Moses? Now I say it in humble but earnest belief: if you cannot do this, I can. There is where a man of simple, straightforward common sense has the advantage over your learning. The wayfaring man, though a fool to your wisdom, may write his honest heart—read out plain meanings of Bible words which you are too learned to receive."

He then shows how Christ brought life and immortality to light:—"Christ made this life beyond the grave a vivid, unclouded reality, that should be present to every human mind, always everywhere, and in every thought, word, and act. He showed how sinful man could alone be fitted (for this life), that the holy breath or spirit of God must breathe into him a new and divine life, some of God's own nature, that shall transform or regenerate human nature, and make it like the angels' heart and mind, and make it to enjoy their communion—to share their thoughts, their joy and sonship, and to find the same heaven as theirs in the presence and love of God. This, then, is the great mission and work of Jesus Christ—not only to reveal, but to impart to sinful men a new and eternal life, an immortality that death shall not interrupt; to breathe into their nostrils His own, to assimilate them to His, that their spiritual life may be hidden in His, living and breathing in it here on earth, and with Him in heaven."

He dwells much on the continuity of inspiration, and appeals to "Christians who remember the experiences of religious revivals to say, if they can conscientiously, that they do not really and fully believe in this continuity of inspiration; in the continuity of Christ's presence and power amongst men; in the continuity of His abode with him who keeps his words according to his promise; in the continuity of His Almighty Immanence in and with the ministers and missionaries of his gospel unto the end of the world, and unto the end of time."—Condensed from *The British Friend*.

† [These remarks are evidently meant to apply to those trained in theological schools—they do not apply to those who depend for their knowledge of spiritual things on the teachings of the Spirit of Christ.]

Elerent's mo. 9th, 1788.—Some things in my conduct are now likely to be exposed to those who are already prejudiced against me; being for a short time dismayed at the unpleasant prospect, these words were with power brought to my remembrance, viz: but "I say unto you, my friends, be not afraid of them that kill the body, and after that have no more that they can do; but I will forewarn you whom you shall fear: fear Him, which, after he hath killed, hath power to cast into hell; yea, I say unto you, fear Him." We ought indeed to walk as becomes the gospel, and to "show out of a good conversation our works with meekness and wisdom;" but the approbation of our fellow-men, their praise or their censure, is lighter than chaff, when placed in the balance with those mercies, forgivenesses, and righteousnesses, which are in Christ Jesus.—*Samuel Scott.*

Run and Trade Depression.—In the course of a recent meeting in England to consider the causes of the depression of trade a paper was read by Hoyle, which embodied some very surprising figures if the data upon which they rest are trustworthy. Hoyle said that the money expended in Great Britain for intoxicating drink in the past four years amounted to \$574,000,000 (\$2,778,160,000), or £143,000,000 (\$692,120,000) per annum. In 1830 there were only 50,000 public houses in England and Wales, and no beer shops or wine shops. In 1876 there were 135,000 places where intoxicating drink was sold. He concluded by saying that while the warehouses of merchants and manufacturers were full of stocks, the backs of the people were bare and their homes scantily furnished. "The reason was that the money which should go into the till of the grocer, the tailor, the draper, &c., went into the till of the publican."—*Late Paper.*

Hard Fare in College.—In Scotland, a college education is highly esteemed, and the number of graduates, in proportion to the population, is larger than in any other country of Europe, or than in the United States. But the majority of students practise a more rigid economy than is known in our country, and many spend less in their entire course than the average expenses of a single year in American colleges. Dr. Guthrie, in his autobiography, tells several touching anecdotes of the hardships cheerfully endured by some of his fellow-students.

A stout country lad came to the University of Edinburgh, bringing with him a large chest. For three months he took no meal at any hotel or restaurant, and asked nothing from his landlady except hot water. It turned out that his chest was filled with oatmeal, brought from his country home, and he himself cooked it with the hot water received from the landlady, adding as a relish a little butter and salt. A student who is willing to submit to such privations, in order to obtain an education, is likely to make the most of his opportunities at college.—*Late Paper.*

What can we wish that is not found in God? Would we have large possessions? He is immensity. Would we have long continuance? He is eternity itself. Would we be perfectly and for ever satisfied? We shall be, when we awake in his likeness.—*Arrowsmith.*

WHO MADE THE FLOWERS?

Selected.

Mother, who made the pretty flowers
That blossom everywhere?
The daisies, and forget-me-nots,
And violets so fair?

Who made the golden buttercup,
That in the meadows grow,
The bright-eyed little innocence,
And lilies white as snow?

Who made the wild red columbine,
And fill'd each tiny cup
With honey, which the little bees
So daintily sip up?

Who made the fragrant clover fields,
That drink the summer showers?
It must have taken very long
To make so many flowers.

Mother, who keeps the flowers alive,
And clothes them every day?
Who watches over them by night,
To keep all harm away?

'Twas God, my child, who form'd the flowers
So exquisitely fair,
And they, with all his hands have made,
His kind protection share.

He form'd each leaf and opening bud
With skill so nice and true,
And gave to some a golden tint,
To some a violet hue.

God shields the tender flowers by night,
And cares for them by day;
He giveth to each different plant
Its beautiful array.

He sends the soft refreshing rain,
The gentle summer showers,
And light, and air, and falling dew
He giveth to the flowers.

'Tis the same God who form'd the flowers
Makes my sweet child his care;
Then seek to raise thine infant heart
To him in grateful prayer.

[These lines were selected and copied in memoriam of M. J. L., who died 5th mo. 17th, 1879, after a lingering illness.]

LIGHT IN THE VALLEY.

"Though I walk through the valley and shadow of death,
I will fear no evil."—Ps. xxiii. 4.

The struggle is ended, her spirit has fled!
The one we have cherished so fondly, is dead!—
And now, from the verge of the valley of gloom,
We bear her loved relic away to the tomb.

The valley of gloom, whence there comes not a sound;
The valley of mystery, dark and profound;
The valley earth's millions for ages have trod;
The valley which leads to the presence of God.

And here we have parted, in sorrow and tears:—
From the faithless void not a token appears!
And yet, through these shadows that limit our sight,
We know she has passed to transcendent delight.

Through sickness and death, to the land of the blest,
Where labor is o'er, and the weary find rest;
Where our pilgrim ends, and a welcome awaits
The children of God at the heavenly gates.

No pain shall be there, neither sorrow nor tears,
Nor the shadow of death cloud the glorified years;
While the trials of time, in sweet harmony blend
With a blissful reunion, which never shall end.

Our Father, we bow, in submission, to Thee;
O give us Thy light, through our darkness to see!—
The light that first streamed through the valley of gloom,
When our blessed Redeemer arose from the tomb.

Francis DeLuea Junior.

If a piece of polished steel is breathed upon, its lustre is dimmed; but it almost instantly recovers its brightness. So many a bright character is dimmed for a time by the breath of scandal; but the more genuine the char-

acter the more speedily does it recover even lustre.

Indian Graves in Chester County, Pennsylvania.—In the year 1824 there appeared the *Village Record* at West Chester a series of articles by Joseph J. Lewis, in one of which the following paragraph appeared. "This is a place near the Brandywine, on the farm of Mr. Marshall, where there are yet a number of Indian graves that the owner of the ground has never suffered to be violated. One of them, probably a chief's, is particularly distinguished by a head and foot stone."

Having recently obtained permission the present owner, some of the members of the Philosophical Society of West Chester proceeded to investigate these graves. The burial ground is situated in a group of hickory and oak trees on a prominent knoll some three hundred yards to the north of the West branch of the Brandywine or Minqua Creeks formerly known to the Indians as the *Susyough*. "The Indians upon the Brandywine had a reserved right (as said James Logan in his letter of 1731), to retain themselves a mile in breadth on both sides of one of the branches of it, up to its source."

The exploring party found traces of at least thirty graves, indicated by shallow depressions, but originally there was a much larger number, as the plough has been gradually encroaching upon the cemetery.

Four of these burial places were opened in the first grave at the depth of three feet was found a skeleton stretched at full length on the back, from East to West. Around the neck were nineteen spherical, opaque milky-white, Venetian beads, each about a inch in diameter. These glass beads are similar to some found in Northumberland County and other portions of the State, are had undoubtedly been supplied to the Indians by the early settlers.

In another grave, besides a large number of beads, were found three objects of aboriginal workmanship, consisting of two finely chipped *gun-flints*, and a highly polished elliptical stone of a dark color, three inches in length. A quantity of red clayey substance resembling paint occurred in this grave, which in all probability had been employed by the Indians in personal decorations. Close to the right hand of the body were found two European white clay-pipes of a pattern employed during the seventeenth century on the bowls the maker's stamp (R T) was impressed. Around the skeleton were found thirteen wrought-iron nails much corroded with fragments of decayed wood adhering to them. The body had evidently been enclosed in a wooden box.

Indian Hannah, the last of this branch of the Lenni Lenape, died in the neighborhood at the Chester County Almshouse, in the year 1803.

The discoveries in these graves go to prove that the inmates were among the last of their tribe who lingered on the banks of their beloved stream, ere the remnants of their people gathered themselves together and sadly wended their way westward. They had adopted to a considerable extent, both in their manner of living and the disposal of their dead, the customs of the whites. The local legends and memories of the oldest inhabitants ascribe to these graves an age of about a century and a half.—*Am. Nat.*

Letters of James Emilen.

(Continued from page 331.)

11th mo. 19th, 1853. The affecting tidings received while I was with you, I trust had a salutary impression upon us all, of the ad uncertainty of all things here below. My husband, taken in the prime of life, and the midst of usefulness—that we might soonably say, 'how can she be spared from church, and from the particular sphere in which she is so acceptably employed?' But w often is it so! and my hope is that the press ion it must have made will be remembered and cherished so as to incite others to follow her steps. When she first came to be stowed as teacher, at the early age of 18, she seemed to be as much impressed with the religious weight of her engagement, as might expect in one of considerable age and experience. If dear Margaret had been nished with any particulars of her sickness and close, it would be very grateful to her st Chester friends to have them. My loved sympathy were drawn towards her on occasion, and as I had no opportunity of visiting it, they may please tell her so as opportunity presents."

5th mo. 20th, 1854. * * * The meeting was a very precious one to me, as well fore as during and after vocal expression: the expression, 'Christ the power of God and the wisdom of God,' seemed to present early the meeting, and furnished a sweet repast. I believe, from the original fountain. It appeared very clear that Divine wisdom was distinguished from mere human wisdom, by a meekness, lowliness—as 'with the lowly wisdom'—and that all who have this power and this wisdom, have Christ and know Christ. May this heavenly wisdom be thine, and this power, and mayest thou feed upon em in true meekness and lowliness, as the ead that gives life and sustains life."

"7th mo. 10th, 1855. Thy short letter received at —, did me good—thought I could el from whence it came. Those little contributions to the weary and hungry traveller, dispensed in due season, are as brooks by the ay; and dost thou not think that this lively ope, this word of promise which thou rquired, is that 'word of prophecy whereunto e do well to take heed until the day dawn,' e., about which so much has been written of late years, some saying it is the scriptures, at George Fox and early Friends alleging it is the 'word nigh in the heart,' the 'word of Faith'; and although it does, no doubt, often, clothe itself in scripture language, as a confirmation to the believing mind, yet it could be unsafe to say or to admit, that the cripture is that very word itself. This 'word of prophecy,' or gift of faith and hope, is that which enables us to abide patiently in the lace of waiting, 'until the Lord come' and satisfy the longing soul. To be without some eeling of divine good, either in hope or reality, must ever be the greatest grief that can assail the child of the kingdom; but how much of his time and his labor is spent in hope! May we judge of it by the husbandman, who ploweth in hope, and soweth in hope, and waiteth in hope until the harvest come. This place of waiting is a very precious place as well as state, and I greatly desire that we may duly appreciate it, and by our example endeavor to draw others to it.

I expect thy sister has given thee some

account of our visit at P.—. I thought I felt at least a liberty to go, and quite an inclination to do so, and as to the outward I know not how it could have been much better; and our meeting, also, I thought was a good one, but somehow I waded under feelings of much distress during most of the time. * * * There is certainly great cause for sorrow that meetings once so favored, should remain in such a weak, reduced condition. * * * Friends appear to be greatly blessed in temporal blessings, but alas! the 'springs of water,' how are they dried up!"

Dr. Richardson on Alcohol.

Among the many recent converts to total abstinence none are more important, and none are exerting a wider influence, than Dr. Richardson. Standing, as he does, in the forefront of the medical profession, his opinions and testimony are of immense value.

His conversion to temperance views is most remarkable. He has not been influenced by moral, social, or religious considerations, but solely by those that are scientific. Till within the last ten years, he tells us, he had paid little attention to the temperance question, regarding it merely as one amongst the many philanthropic attempts to grapple with our national intemperance, an attempt in which the generous and godly sacrifice themselves for the sake of the vicious and drunken.

At the British Association of 1863-4, he gave the results of a long series of experiments on the nature and action of anaesthetics. So much interest was excited by his paper that he was requested by the Association to take up the whole series of substances of that class, and to give at another meeting the results of his experiments and examinations. He consented, and this led him, while not an abstainer, to study the physiological action of alcohol.

He very soon discovered that the action of alcohol was the same in its character as was the case with the chemical substances and narcotic agents that had previously come before him. There were four distinct stages of action in the effect of alcohol on the body. The first stage was one of some little excitement, during which the body of the person or animal subjected became a little flushed, and the temperature of its surface a little raised. In the second the excitement and flushing were a little increased, while the temperature was a little more raised, but it soon began to fall. Then followed a third stage, in which these symptoms or phenomena changed somewhat, the whole of the muscular and nervous system becoming unsteady, whilst the thermometer showed the temperature of the body to be lower. The fourth stage was when the whole body was lying prostrate, insensible, the muscular system entirely destroyed as to function, the nervous system as to direction, whilst the temperature was three or four degrees lower.

One other observation of telling moment was with respect to the action of the heart. In the first stage there was quickened action; in the second stage, still quicker action, followed by reduced action; in the third and fourth stages this reduction of the action was continued until at last it was brought down, at the termination of the fourth degree or stage, to an extremely low point indeed.

The whole of his researches were conducted in 1869, without any change of life on his

part. For experimental purposes, however, he thought it necessary to abstain. A new light then dawned upon him. He found that he slept better, that his power over work increased, and that his appetite and digestion were improved. He began to think that those sympathetic speakers—teetotalers—were right, and that it would be best for him to abstain. But there was a social difficulty in the way, and a great difficulty it proved. His mind, however, after a few years, was made up, and he determined, as there was no use in the agent, and as under its influence some physical degeneration must take place in his organism, that he would join the band of total abstainers. Having taken this position, he was not long in making it known. His pen and voice have been most energetically employed, and the value of his services has been immense. The whole medical world owns his power; and is diligently examining his positions; while, backed by his authority, the advocates of temperance feel that in urging men to abstain they can appeal to their selfishness as well as to their philanthropy, and can show them that in blessing others they themselves will be blessed.—*The (London) Methodist Temperance Magazine.*

The Monotony of Life.

The most enthusiastic and the most stolid temperaments are alike subject to an occasional strong feeling that the monotony of life, the doing of the same things over and over again, is a burden, scarcely to be borne. The more the mind dwells upon this monotony, the less fitted it becomes to consider it to advantage. Behind and before stretch the days and years, it seemingly endless progression; and at length the tired soul is ready to give up in despair, and think, in a vague way, only of some low, obvious rest under the green grass at the foot of the hill.

This surely is not a Christian frame of mind. Despair is called by the Catholics one of the six sins against the Holy Ghost, and certainly any thoughtful Protestant will be equally emphatic in banishing it from the neighborhood of the spiritual graces. "I know all that," exclaims the weary toiler, "but I am so tired; and the end seems all the while farther and farther away." The doctor seeks to cure maladies that exactly reproduce themselves in generation after generation; the lawyer sees the son pursuing the phantom of justice that eluded the father; the teacher seeks to stay each hurrying procession of children long enough to offer it the same little store of petty news item, or spends his best thought on an editorial to be forgotten in an hour; the business man buys and sells only to buy and sell again, thankful if he win his living year by year; the farmer sows, and reaps, and tills the familiar soil until he sleeps beneath it; the weary woman, with more exacting labors and fewer consolations than all the rest, goes struggling on, caring for the careless wants of her home, and trying to pay some attention to mind and soul, in a world where great hungry bodies seem striving to monopolize everything. Such is the picture that presents itself to the complainer, and which even the stoutest heart cannot always banish.

The first point to be considered with reference to life's monotony, is that, so far as it does really exist, we cannot avoid it. It

is inevitable, and it is the work of the good God who made and orders everything. But our reception of it, our endurance of its laws, are things which are our own doings, not God's. If we look sharply enough, we shall see that every moment of time is a thing with which in itself we have absolutely nothing to do, but with the employment of which we have a great deal to do. Grumbling, therefore, does no good and much mischief, even from the materialistic standpoint.

But the calm, philosophic mind, and much more the Christian soul, may easily see that monotony and change are combined, in this world of ours, in an exquisite and superhuman fashion. If a more stringent reign of natural law would be unendurable, any less universal sway would be the merest anarchy. If life were but a kaleidoscopic picture, its sum total would really be indistinguishable from death itself. The very conditions of existence and growth, in all the physical, mental, and spiritual states of which we know anything, are conditioned upon some sort of stability and endurance. Upon this firm basis of immutability and iteration is placed a superstructure of ever-changing beauty. Seasons and surroundings are, in a sense, always new, and each moment is something never enjoyed before, and never to be utilized again. Just here, in the conquering of the individual moment, lies the unailing remedy against any suffering on the score of life's monotony. God holds us responsible for no more than a single instant at a time. *Now* is the thing he demands: not yesterday or to-morrow, but always now. The accepted time is now. If we do just what God asks us to do, whether it be to accept Him first or to serve Him afterwards, we cannot help being happy. If we do not, nothing can give us joy. "What shall I do now?" asks the child of his mother. "What shall I do now?" is the question for the child of God to ask of his Maker. If he asks it, learns it, does it, he will never be worried about the monotony of life.

And so minutes and days and years bring the changes soon enough, and growth appears full quickly. House, home, family, friends, pass away, and even one's own personality gradually becomes a new thing. Constant change is what comes of all the slow, unvarying minutes; and looking back through the years, one sees the unlooked-for alterations in character and surroundings that have come while monotony seemed still to nod in the same old chair. He who improves the time in contentment and golly fear, grows imperceptibly into a sweet life of trust and strength and joy; he who does nothing now because he did the same thing yesterday, finds each new demand harder to meet, until at length the very shadow crushes him who once, it may be, took up the substance with a manly heart. God's work, done for God's sake, is never monotonous, whether its changes come fast or slow; work done without God is never anything but monotonous. Though it gain the whole world meanwhile, its beginning, and its middle, and its end, are dust and ashes.—*S. S. Times.*

Natural History, Science, &c.

Nutmeg Growing at Singapore.—About 1837 an impetus was given to nutmeg-cultivation in Singapore with results so promising that everything gave way to the mania for planting this species. Large clearances in the

jungle were purchased from Government at considerable distances from town, and expensive bungalows were erected upon such estates, and surrounded by plantations of this valued tree; and nearer the settlement, private gardens were turned into nutmeg-nurseries, and the houses were closely surrounded with nutmeg-groves.

The nutmeg-tree is, when in health, a handsome bushy tree, between 20 and 30 feet high, with numerous dark-green shining leaves. It is ever-green, and ever-flowering, so that fruit and flowers constantly coexist upon the tree—the flowers small, yellowish, and acceolate, and the fruit needing no description here.

The trees were not allowed to be left to the natural powers of the climate and soil, but were richly manured and forced into yielding heavy crops. To the manner of doing this, and to the extent to which they were forced into luxuriance, may probably be traced the catastrophe which eventually blotted out nutmeg-cultivation from the settlement. Around each tree, and just level with the outer branches, a trench was dug about one foot deep and one foot wide, and this was filled with a manure of cow-dung. The result of this universal treatment was that the trees for a time grew luxuriantly, and yielded large returns. About six hundred nuts, or 8 lbs. weight, were yielded by a good tree during the year; and as the crop was yielded all the year round, independently of season, some plantations produced a picul (133 lbs.) per diem on an average—the value of the picul being 70 or 80 dollars—or from 25,000 to 30,000 dollars per annum.

For upwards of twenty years the planting was carried on vigorously. Plantations changed hands at very extravagant prices; and much money was made during that period. In the year 1860, however, a sudden destruction came upon the trees from an unknown quarter; and, to the dismay of the planters, the trees, which up to that time had yielded magnificently, were attacked with a blight, whose destructive effects could not be arrested, while the source of it defied all inquiry. In the night a tree would be attacked, and the morning light would show its topmost branches withered; the leaves fell off; the disease slowly spread downwards, chiefly on one side of the tree; and, in spite of every attempt to check it (the lower portion often being for a long time green and bushy), the tree became an unsightly mass of bare and whitened twigs. Most trees were entirely stripped in time, and became mere skeletons. Large outlay was expended in the endeavors to arrest the destruction, but it was all thrown away. No situation was exempt from its ravages—hills and valleys alike suffered, nor could any principle be traceable in its promiscuous attacks. Upon a close examination of the diseased parts, it is found that the formative layer inside the bark dries up and turns black; the leaves then wither and fall off; and soon the bark is found to be full of small perforations; but no insect of any kind has ever been discovered in connection with the change, nor has any fungus been charged with the destruction. Its nature has been a mystery and a puzzle with the planters, who have, for the most part in vain, sought for a cause, either near or remote, and whose efforts to arrest it have proved entirely unavailing. I have heard various suggestions offered, some of them of the wildest character, to

account for the disease. That which J. d'Almeida proposes is by far the most reasonable, and in fact commends itself to the judgment of the vegetable physiologist. It is that the trees had long been unnaturally forced, by digging trenches too closely around their spongioles, and by too rich and long continued manuring, by which heavy crop it is true, were for a time obtained, but which at last exhausted the tree, so that the premature decay, thus brought on by indirect physiological laws, was incapable of being arrested by any after-treatment.

When it was found that, in spite of care and lavish expenditure, the trees surely died a reaction took place. The planters abandoned the plantations in disgust, in many cases while there were still numerous healthy trees; and the land reverted to the Government. In other cases, where expensive bungalows were built upon the estate, they were sold for a small proportion of the sums expended in building them, since they were, in a rule, too far from town to command any competition, and ceased to be convenient situated. Many planters, both English and Chinese, whose whole estates were invested in nutmeg-plantations, were thus reduced to ruin, and became absolutely penniless; a distress and disappointment everywhere prevailed.

It is a curious fact that many of these abandoned trees, around which has now sprouted a thick jungle undergrowth, have, since they have been thus neglected and left to themselves, *recovered*, and relieve the generally dismal prospect of bare branches and skeleton trees. I have myself seen the dark-green healthy trees in many situations where they are quite uncare for, even among the oldest plantations in the island; and this fact seems decidedly corroborative of the idea that the disease was one of exhaustion and decay, arising from unnatural forcing.—*Colingwood's Rambles of a Naturalist.*

Potashes from Beetroot Molasses.—It is well known that in the cultivation of the beet on a large scale, as is the case in France, a large amount of potash must be added to the soil as a fertilizer. The molasses containing man impurities cannot be used for food; and when charred the ashes consist of 50 per cent. of potash. Eighteen chemical works in France are engaged in receiving this valuable ingredient; using about 25,000 tons of molasses ashes yearly and obtaining about 10,000 tons of refined potash suitable for soap-making, and other purposes.

Amount of Sugar in the Nectar of Various Flowers.—Some recent experiments have shown that the nectar contained in the flower of a single head of clover yields about eight milligrammes of sugar. From this the calculation has been made that in order to obtain one pound of honey, three-fourths of which is said to be sugar, it would be necessary that 5,600,000 such flowers should be visited by the busy bees.

German Post Offices are Zoological Gardens on a small scale. In the course of a year as many as 40,000 live animals are sent by post and if crabs, frogs, bees and small insects are counted, the total will be among the millions. The post-office authorities have the privilege of excluding such animals as may be deemed either dangerous or disagreeable; but within the last six months only thirty-nine packages of living animals were refused, among which

an alligator, done up in a box as compared to fragile; a lot of dogs, whose persistent barking could not be quieted, and a number of pigeons loosely tied up in a sack.

On the other hand, during the same period, a codfish, scores of birds of prey, monkeys, peacocks, a leopard and four living bear cubs were transmitted by post.

Imaginary Injuries.—Dr. C. F. Taylor in a recent lecture reveals a singular state of affairs among persons who imagine themselves, and are supposed to be, afflicted with diseases, and even fractures or paralysis of their limbs. It tells of a young man who was under the impression that he had broken a leg for the second time, and for two years was treated for a fracture without success. All the while the bone had not been broken, but the mind of the patient had exerted such an influence on the limb that it had assumed all the external characteristics of a fracture. It does not suffice to inform patients of this kind at their malady is simply mental. The will is exerted upon the member without the tient being conscious of the fact. By directing the attention and making the limb move before the subject is aware what is going on, the physician proves that the apparent hurt is simply a delusion of the senses.

Chr. Adv.

Sewage in Water.—A writer in the *New York Times* asserts that the popular opinion, at a running stream purifies itself in a flow of ten miles, is an error, and cites the report of the Rivers' Pollution Commission of England, which declares that "we are led to the inevitable conclusion that the oxidation of organic matter in sewage proceeds with extreme slowness, and that it will be safe to fear that there is no river in the United Kingdom long enough to effect the destruction of sewage by oxidation."—*Chr. Adv.*

Corks Made Tight.—Corks are made both tight and water-tight if plunged in melted paraffine, and kept there for about five minutes. When prepared, they can be easily cut and bored, and may be inserted in, or withdrawn from bottles without any difficulty.

THE FRIEND.

SIXTH MONTH 7, 1879.

There is much instruction in the record which John Churchman has left of the dealings of the Lord with him in bringing him into the way of life. When a young child, his mind was divinely illuminated, and his heart "filled with solid joy." Yet he afterwards lost this good condition, not so much from the commission of any gross sin, as from want of watchfulness, and by gradually sliding into a state of lightness and forgetfulness. This was when he was about twelve years of age. He gives a touching narrative of the mental distress which he endured for eight or nine years, till, through the renewed visitations of the Lord, he was again brought to know somewhat of the joys of salvation. During this time, he says, "I was diligent in attending meetings, hoping at seasons that the Lord would condescend once more to visit me; for a saying of an eminently pious man was revived in my remembrance, 'That if there remained a desire in the heart after redemption, as it was kept to, the Lord would

again assuredly visit such in his own time.' I was therefore fearful of neglecting meetings, lest I might miss of the good intended for me."

"The hand of the Lord was underneath, though for my disobedience he suffered me to remain in the wilderness and to dwell among fiery serpents, until he had waded that disposition in me which lusted after forbidden things."

"In this state I continued until I was about nineteen years of age, and as I was one day walking to meeting, thinking on my forlorn condition, and remembering the bread in my Heavenly Father's house, of which I had partaken when I was a dutiful child, and that by straying from Him, and spending my portion, I had been eight years in grievous want, I inwardly cried, 'If thou art pleased again to visit me, I beseech thee, O Lord, visit my body with sickness or pain, or whatever thou may please, so that the will of the old man may be slain, and everything in me that thy controversy is against, that I may be made a sanctified vessel by thy power.'"

"In the fall of the year after I had arrived at the age of twenty years, it pleased the Lord to remember me, who had been an exile, in captivity under the old taskmaster in Egypt spiritually, and by his righteous judgments mixed with unspeakable mercies, to make way for my deliverance. I was visited with a sore fit of sickness, which in a few days so fully awakened me, that I had no hope of being again entrusted with health. My mispent time, and all my transgressions were brought to my remembrance, and heavy judgment was upon me for them."

"At this time my old will in the fallen nature gave up its life." "My heart was made exceedingly tender, I wept much, and an evidence was given me, that the Lord had heard my cry, and in mercy looked down on me from his heavenly habitation, and a willing heart was given me and patience to bear his chastisements and the workings of his eternal Word, which created all things at the beginning, and by which only poor fallen man is created anew in the heavenly image, and prepared to praise Him with acceptance, who lives forever and ever."

During all this time of spiritual desolation, John Churchman appears to have been sensible of the loss he had sustained, and of his own transgressions; and a desire was kept alive in his heart to be restored to the Divine favor. No doubt this desire was awakened and strengthened by the secret working of the Spirit of Christ, and a blessing rested upon it; but he felt no power to take any step in his spiritual journey except through the fresh extendings of heavenly help. He was hungering and thirsting for that food of which he had formerly partaken (and a blessing rested on this earnest longing), but he had no power to take a crumb thereof until it pleased the Lord to dispense it to him. May we not learn from his experience (which is similar to that of many Christians), how entirely dependent we are on the renewed visitations of Divine favor for all our spiritual blessings? And does it not show the erroneous character of that preaching which would lead the hearer to suppose that salvation is within his reach *whenever* he chooses to take it?

What a lesson of the need of maintaining the holy watch, is taught us by his experi-

ence of the bitter fruits springing from the decay of his love and obedience in his childish years! When we are conscious of the extension of Divine love to our souls, we rejoice in the feeling of sweetness and of peace vouchsafed to us. When this overflows us, we fear no evil for the time and can understand the declaration, "Thou wilt keep him in perfect peace, whose mind is stayed on thee, because he trusteth in thee." This is a frequent experience of those who early in life obey the gracious invitation of the blessed Redeemer, to take his yoke upon them and follow Him; and in the freshness and fervency of their feelings, such are ready to hope and believe that they will never again offend so gracious a Lord. But as they journey forward through life, they learn more and more of the weakness of the flesh, how difficult it is to keep on the watch, how plausible are the snares of the enemy, and how strongly their own natural inclinations tend to draw them aside from the heavenward path. They find themselves often neglecting the daily sacrifice of drawing near to the Lord in humble waiting on Him for preservation and spiritual food; and are conscious of the resulting coldness of heart, and absence of strength for any good thing. They lose confidence in their own power to care for and keep themselves, are humbled under a sense of their weakness, and accept every good desire and every sense of tenderness and sweetness of feeling, as a fresh mercy from the hand of the Lord. Thus they come to feel the importance of the apostle's exhortation—*Work out your own salvation with fear and trembling.*" Such humble disciples are often made to rejoice in the evidence of the Lord's goodness and mercy to them; yet they are often puffed up thereby, nor dare they speak of their own attainments lightly to others; for they know that they are liable to fall if unwatchful, and therefore are concerned to heed the scripture exhortation—"Be not high-minded, but fear," and also the warning language, "Let him that thinketh he standeth, take heed lest he fall."

It is lamentable indeed to hear some speak so confidently of their final salvation, as if they were beyond the reach of temptation and of falling away. For the greater their assurance and self-confidence, the greater is the fear awakened in the hearts of others that they are under a cloud of deception as to their real condition. It is the mark that the Lord teacheth of his ways, and the humble that He guides in the path of judgment.

We have received a note from Cyrenius and T. D. Emmons, of Alamata, Lane Co., Kansas, designed for the information of those who wish to settle on Government lands, under the Homestead Laws.

They say they "have spent considerable time and pains in selecting a place in western Kansas, possessed of the most attractive qualities, and where the government proposes to give persons the groundwork of as beautiful homes as can be found anywhere, for living on them; and having decided on township 16, range 27, of Lane Co., Kansas, we invite all Friends who wish to emigrate and desire to maintain the principles and practices of the Society of Friends as they were established and maintained by our worthy ancestors, to come and examine for themselves at as early a day as they can."

So many risks are involved in going into a

new country, that we think our members ought to consider such a movement as a serious matter, requiring a degree of that Divine guidance which is profitable to direct in all things. It involves not only the question of earning a support for those dependent on them in the neighborhood into which they go, but also the effect of the change on the health, the intellectual and moral development, and the religious usefulness of their families and themselves. We do not doubt that there are many cases, in which families are convinced that the way is rightly opened before them for migrating from one section of country to another; and we sincerely desire for such of our members that, wherever they go, they may "maintain the principles and practices of the Society of Friends, as they were established and maintained by our worthy ancestors."

We have been requested to give information that experienced and reliable Nurses for private cases can now be secured by applying at the Pennsylvania Hospital.

SUMMARY OF EVENTS.

UNITED STATES.—The average temperature of Philadelphia for the Fifth month, is given as 63.6 degrees, which is two degrees above the average of the past eight years, and a higher one than any year since 1871. The lowest temperature was 42 degrees on the 3rd, and the highest 91 deg., on the 31st. Prevailing direction of wind south-west; maximum velocity 27 miles. The total rainfall 1.22 inches, which is much below the average for nine years past. During the month there were 16 clear days, 10 fair, and 5 cloudy. One hundred and thirty tons of Scranton coal were sold in New York on the 26th ult., by the Delaware Lackawanna and Western Company, at prices showing an advance of 2 1/2 a 7 cts. per ton.

Resumption of work at the Seneca Colliery, Pittston, Pa., after a month's suspension, will give employment to 200 men and boys.

The Philadelphia and Reading Railroad Company having announced an advance of the tolls, to take effect on the 2nd inst., has notified its miners that this advance will be followed by a corresponding advance of their wages, which will not be less than 16 per cent. below the basis, instead of 20 as now paid; and that the condition of the coal trade is such as to warrant the expectation of further increase.

A party of 150 Dunkards have left Marietta, Lancaster Co., Pa., for Kansas, where they have purchased large quantities of land. They took with them a bishop and a full church organization.

Forest fires during the past week have caused great damage along the Lake shore of Wisconsin. Communication with Sturgeon Bay is cut off by the burning of telegraph poles. Several buildings have been destroyed, rendering some families homeless.

Terrible storms of wind and rain visited portions of New York, Kansas and Missouri, on the night of the 29th, causing serious loss of life, and great damage to property.

The colored teachers in Georgia have been invited to meet in convention in Atlanta on the 23rd inst., to consider the educational interests of the colored people of that State.

The Cheyenne delegation in Washington had a final interview with the Secretary of the Interior, and with the Commissioner of Indian Affairs. They were positively informed they should not return to Dakota. They finally consented to return to the Indian Territory.

Great effort is now being made in New York, by the "Society for the Prevention of Crime," for a rigid enforcement of the excise laws, by removing the excise-commissioners from office, and putting men in their places who can be depended upon to distinguish between a genuine tinner and a spurious one. The underlying reforming sentiment is said to be, to elect twenty thousand drum shops, backed up by most of the clerical, political, and a friendly disposed police department.

The President's veto of the Legislative Appropriation bill was received and read in the House on the 29th ult. The question being taken on the passage of the

bill over the veto, it failed for want of two-thirds in the affirmative, the yeas being 112, nays 91.

The excess of exports over imports of the United States, for the twelve months ending 4th mo. 30th, was \$272,215,770, against \$221,680,013 for the previous year.

The mortality in Philadelphia for the week ending at noon on the 31st ult., is stated at 231—of whom 130 were adults. In New York city the total was 445.

Since the first of the year 20,626,204 gallons of petroleum have been exported from Philadelphia; during the previous year 14,047,916 gallons; 102,881 bushels of corn, 146,006 of corn, and 59,863 of rye were shipped last week from this port.

The whole number of pieces coined at the U. S. Mint during the 5th month was 1,705,000, of the total value of \$2,094,503, and which \$789,800 was gold, 1,300,000 silver dollars, and \$4708 base coin.

Markets, &c.—The Government bond market was firm on the 31st ult., and the entire list, with the exception of the currency 6's, advanced 1/16. The subscriptions to \$10 refunding certificates on the 30th and 31st, were \$1,428,300, making the total subscriptions \$33,874,970. The Secretary announces that he has orders for all the remaining certificates, and they will soon be distributed. This will end funding till 1881.

Cotton.—Sales of middlings were reported at 13 1/2 cts. per lb. for uplands and New Orleans.

Petroleum.—Crude 7 1/2 cts., in barrels, and standard white at 8 1/2 cts. for export, and 9 1/2 to 10 cts. per gallon for home use. Lined oil, 59 a 61 cts. Neat-foot, extra, 70 a 75 cts. Lard oil, 48 a 50 cts. Sperm, crude, 83 cts. Refined, 90 a 95 cts. per gallon.

Flour.—Trade dull, but without essential change. Minnesota extra, \$4.37 1/2 a \$5; Penna. do., 25 a 25.35; western do., \$2.25 a 2.87 1/2; high grades, \$6.25 a 7.25. Rye flour, \$2.75 a \$2.75.

Grain.—The demand for wheat was limited—Penna. red, \$1.14 a \$1.14 1/2; do. amber, \$1.15 1/2 a \$1.16. Rye, 58 a 60 cts. Corn, 40 a 41 cts. Oats mixed, 33 1/2 a 34 cts., and white, 35 a 37 cts. per bushel.

Seeds.—Clovered, 4 1/2 cts. per pound. Timothy, \$1.45 a \$1.50 per bushel.

Hay and Straw.—Prime timothy, 65 a 75 cts. per 100 pounds; mixed, 50 a 60 cts.; straw, 75 a 85 cts. per 100.

Beef cattle during the week were dull and prices lower: extra, 5 1/2 a 5 1/2 cts.; good, 5 a 5 1/2 cts.; common, 4 1/2 a 4 1/2 cts. Sheep, 31 cts. for common, and 4 1/2 cts. for good. Lambs, 5 a 9 cts., as to quality. Hogs, 5 a 5 1/2 cts. per pound.

The increase of public debt during last month was \$62,250,000.

FOREIGN.—The British and Foreign Bible Society reports that no less than 35,000 Bibles were circulated in Germany last year—a gain of 20,000. Nearly 500,000 copies of the Scriptures were distributed among the Russian forces in Turkey.

The reports from all parts of England are that the grain crops are backward, and in many districts dull and poor, and that vegetation is later than in former years. Recent genial changes in the weather may repair much of the delay.

From a report of the accidents which have occurred in the streets of London and its suburbs, through the passage of vehicles, horsemen, &c., from the first day of 1878, to the 31st of 1st mo. 1879, it appears there were 3872 such accidents, resulting in the injury of 2861 persons, of whom 166 were killed. The greatest number of accidents were caused by light carts.

The Government has recently voted 250,000 francs for the construction of the largest telescope that can be advantageously made. The object glass is intended to be between 30 inches and 3 feet diameter, if possible to cast a disc of this size, of the necessary evenness and purity. Otto Struve, director of the Pulkova observatory, intends visiting the United States, to examine the Washington and other observatories.

Civil engineering in connection with railway construction, has hitherto been carried on almost exclusively by foreigners in Russia. There are now a few schools in that country for the training of railway mechanics and engineers, and these schools have been found to be useful that twenty more are about to be opened.

The *North German Gazette*, says that Germany, by the recent treaty, is enabled to make all changes in the affairs of Samoa dependent upon her consent, and hereby it and other treaties with the South Sea groups, including the Washington and other treaties, can be annulled, unfeared, and the competition of the Prince Bismark has requested the emperor to grant him a furlough of several months.

The Reichstag has passed the bill authorizing the

provisional levying of the customs duties proposed in the tariff and tobacco bills. This includes the duties of unwrought iron and petroleum.

It is reported that negotiations are proceeding in Berlin for a commercial treaty with Japan, on the mode of the Japanese treaty with the United States.

The United States and Great Britain, by a vote of 139 to 8, the Panama and Limon Bay route.

In Paris and its suburbs, there are more than 18,000 people who live by rag picking or rag selling. There are 10,000 chiffonniers who go about collecting scraps of paper, and 3000 old clothes dealers who buy rags, and who again employ 2000 workmen. The King Alfonso opened the Cortes on the 1st inst., in his speech he declares that the Ministry will continue the practice of liberal principles; relations with foreign powers are satisfactory; the budget will contain no new changes; the Government will submit measures to alleviate the effects of the ten years war in Cuba, and will the assistance of the Emperor to assimilate the position of the colony to that of a province of Spain and hasten the day for the complete abolition of slavery.

The Portuguese cabinet has resigned in consequence of internal dissension. Previous to its retirement, it announced, the Ministry concluded a treaty with Great Britain looking to the suppression of the slave trade, the development of commerce, and the civilization of Africa.

The volcano of Mt. Etna is in full eruption. Several villages are threatened with destruction, and there is great alarm among the inhabitants. Craters have formed on two slopes, covering several square miles and the volcano presents a very imposing spectacle. Mount Vesuvius is also in state of eruption.

The *London Times* says, cholera has been making fearful havoc among the pilgrims returning from the Herdard fair, and is being spread by them throughout Northern India. It is asserted that 20,000 and 30,000 hillmen from the Himalayan districts died of their homeward journey.

WESTWON BOARDING SCHOOL.

A Stated Meeting of the General Committee is to be held at the school on Fourth-day, the 18th inst., at 9 A. M.

The Examiners on Instruction and Admissions meet at the school on the preceding evening, at 7 o'clock.

The Visiting Committee meet at the school on Seventh-day, the 14th inst.

For the accommodation of the committee, conveyances will be at the *Street Road Station* on Seventh and Third-days, the 14th and 17th inst., to meet the trains that leave the city at 2.30 and 4.40 P. M.

SAMUEL MORRIS,

Philada., 6th mo. 2d, 1879. Clerk.

A competent teacher is desired for Friends' School at Crosswicks, N. J., to commence about 9th mo. 1st.

Application may be made to BARTON F. THORP or JOS. S. MIDDLETON, Crosswicks, or SAMUEL ALLINSON, Yardville, N. J.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Application may be made to

John W. Biddle, No. 726 Buttonwood St. Ephrata, Pa., or Geo. H. Pine St., Rebeewen W. Kite, No. 159 North Fifth St., Philadelphia, the 14th inst.

Hannah Evans, No. 322 Union St.

FRIENDS' ASYLUM FOR THE INSANE.

New Freekford, (Twenty third Ward,) Philadelphia.

Physician and Superintendent—JOHN C. HALL, M.D. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, Fourth month 13th, 1879, at the residence of her husband, in the city of New York, after a lingering illness, ELIZABETH, the beloved wife of D. H. HARRIS, and daughter of the late Daniel Wills, deceased, in the 46th year of her age, a member of New York Monthly and Particular Meeting.

Although this dear Friend was permitted to pass through much mental conflict, as well as great bodily suffering, she was favored with the assistance of acquaintance by her Saviour, and that his arms were open to receive her into his heavenly kingdom.

WILLIAM H. PILE, PRINTER,

No. 422 Walnut Street.

PHILADELPHIA.

Life and Adventure in Japan.

BY E. WARREN CLARK.

(Continued from page 353.)

The great public thoroughfare of Japan is called the "To kai-do." It is several hundred miles in length, and passes along the sea-shore and over the mountains, connecting the ancient capital, Kio-to, near Iake Biwa, with the modern capital, Tokio, at the head of Yedo Bay.

The road is flanked on either side with venerable pines, which have shaded generations of travellers and pilgrims who have passed to and fro through this beautiful country. Near the sea-shore it is protected by earthen embankments, and over the steep declivities of the mountains it is paved with stones. It runs through innumerable villages and towns, and its way-side is the best possible place to study the country life and character of the people.

Here you may meet the two-sworded "Samourai," as the military gentlemen are called who wear long sharp swords thrust in their belts, and who sometimes look very fiercely at foreigners, whom they do not love enough for invading the sacred seclusion of their country. Here you meet the farmers also, carrying their produce to market, and the coolies, trudging along with their burdens suspended from the ends of a pole carried on the shoulder.

Here you meet bands of pilgrims clothed in white, wearing broad bamboo hats, and carrying a small bell in one hand and a long staff in the other. On the staff were strips of paper prayers, and the little bells tinkled continually to call the attention of the gods to the prayers while the pilgrims were on their journey to the various heathen shrines.

The country people were very polite, and as we passed them on the road each one would bow and exclaim, "O hi o!" (Good-morning.) The children would also nod their little heads politely, and touch their foreheads as a mark of respect.

In passing through one of the towns on the "Tokaido," we saw a long ladder standing upright at the side of the street, upon which a man climbed whenever the fire-alarm sounded. The houses were simply wooden shanties, with paper sliding-doors, and when they caught fire, as they frequently did, the man on the ladder would shout to his neighbors,

and they would run together and pull down the house, instead of attempting to extinguish the flames.

On the road side a stream of water is seen, which the natives use in cooking and washing. The open space in front of each house is used for drying fish, sifting grain, and also for sunning the babies and children who swarm by the road-side, and who use this space frequently for a play-ground.

The mountain Fuji-Yama is seen in the distance.

We turned aside a few miles to visit "Dai-Butz," the great bronze idol of Japan, which is about fifty feet in height. It stands near the former site of an ancient city of great historic interest, but which passed away some centuries ago, leaving scarcely a vestige behind, except this idol and a large temple.

The colossal image represents Buddha sitting in a large lotus-lily, in the state called "nirvana," which is a kind of divine sleep or unconsciousness. This is the heavenly state which the devout Buddhist hopes to attain. Not a heaven of holy activity and of joyous worship, but a sleep of eternal unconsciousness, an absorption into Buddha! Yet there is certainly something very peaceful and even beautiful in the expression of repose on that bronze face, and I do not wonder that multitudes of the ignorant pilgrims worship it with awe.

In front of the image are two vases containing large bronze lotus lilies with expanding leaves, and between the vases is a bronze brazier where incense may be burnt. Dai-Butz is very imposing without, but he is entirely empty within; for you may go inside of him, by passing through a small door, and find his hollow form lined with shelves, on which small gilt images are ranged. His ears are very large, as all ears are on idols, and his massive head is covered with concentric rows of snail-shells, which gathered there to protect his sacred person from the sun when (in mythological times) he rose from the sea.

After studying the image as a work of art, I climbed up into his capacious lap, and sat upon one of his thumbs, which were placed together in a devout attitude. Here I began to sing the longmetre doxology, to the astonishment of the priest standing below, who could not understand the words, and wondered what the matter was! A year after this I sang the same hymn in Dai-Butz's lap, with half-a-dozen other people; and we told the priest we were praising the TRUE God, that the time was at hand when idolatry in Japan was going down, never to rise again, and that even Dai-Butz would no longer be worshipped.

Not far from this great image is the beautiful island of In-o-shi-ma, close by the shore, where shrines and temples are found embowered among the trees high up on the rocky cliffs, and where you may descend to submarine caverns, to reach which I had to

swim around the rocks and allow myself to be swept into a dark and dreary cavern by the waves. Here a naked priest stood by a stone altar. On the ledges of the rock, where the surf rolled and dashed high in the air, little Japanese archers were diving for pennies in the deep green water, protected by the grottos formed at the foot of the cliff; they would catch a penny when thrown into the water long before it reached the bottom.

We spent the first night at a large city on the Tokaido, and the next morning found us galloping along the level road leading towards O da wa-ra, a city at the foot of the Ha-ko-ne mountain pass. The whole journey to Shidzu-o-ka required five days, for you must remember there were no steam-cars, coaches, or modern conveniences of travel. Besides, I very soon found that it was to be a journey of Japanese etiquette the whole way. As we approached the province where I was to live, whole villages appeared specially prepared for my reception. The native officials would come out to meet us, dressed in flowing robes, and salute me in the way they used to receive the dai-mios, or distinguished princes, in olden times. Although they were two-sworded men of rank, they would kneel in front of our horses and bow their heads to the earth, heaving a deep sigh of respect.

At the next village we would have to go through the very same formalities, until, after a dozen or more were passed, it became rather monotonous. Whole neighborhoods were thrown into agitation by the arrival in their midst of such a strange-looking creature as the "foreigner," and I was evidently as great a curiosity to the people as they were to me. Long lines of awe-struck faces presented themselves at every window and door and crevice, and crowds of women and children thronged the narrow lanes as we galloped through the principal street, making the old town echo with the clatter of our horses' feet.

On crossing the Hakone range of mountains it became necessary to change our horses for peculiar vehicles called "kan-gos," carried on men's shoulders. The "kan-go" is like a broad cane chair without legs, slung securely on a thick pole.

When I was fairly stowed away in the kan-go, two naked coolies raised it from the ground and placed the ends of the pole on their brawny shoulders. Off they trudged, as though I were simply a bag of rice or a box of cheese, and jolting me up and down like a bowlful of jelly, they slowly climbed the steep and stone-paved path of the mountains. Now and then they rested the ends of the pole upon their stout bamboo steks, and after shifting the heavy burden to the other shoulder away they would go again. Though their naked bodies would fairly shine with the sweat that trickled down their backs, yet they went great distances without apparent fatigue, always shouting to each other in keeping step.

There are half-way stations on the mountain, where they stop to rest and eat rice. Their appetites are well earned, and after eating plenty they finish off with a cup of tea.

On the pass we encountered naked runners, or post-carriers, with their broad-brimmed hats and their little post boxes slung on a stick over their shoulders. These are the swift-footed fellows who afterwards brought me my home mails from Yokohama.

After ascending several thousand feet, through thickly wooded ravines, we reached the picture-que village of Hakone, nestled among the mountains, at the head of a lovely lake of the same name.

(To be continued.)

Selected.

An Epistle from John Estabrook, to the Quarterly Meeting of Friends for Newton and Salem, New Jersey.

Dear Friends:—As it hath been the Lord's love which took hold on my mind, and drew me forth from you, to visit his people in other parts, so its from a sense and feeling of the same heavenly spring of the Father's love, in which I am now drawn towards you, for ye are fresh in my remembrance, and as at many other times, so at this time, is my concern for you, that as God of his infinite goodness hath been pleased to reach unto you, and by the shepherd's crook of his love hath taken hold, and gathered you near unto himself in some degree, and hath often given you to partake of the bread and water of life, through the virtue whereof your loves were at first raised to him, and ye filled with heavenly zeal, and were made willing to leave all for his sake, and with the apostle to esteem the loss of all things but as dross or dung, so you could but win Christ. And that this heavenly mind may grow and increase in you, is what I am often concerned for; that as ye have entered into the way and path of life, you may be preserved therein, and feel your growth to be in Christ the living vine; and where that is witnessed, the good fruits are not wanting; for whoever grows in Christ, grows in all holiness of life; for what is received from Him, is of a holy, pure and divine nature; purging to the purifying of the consciences of them that believe. And maketh of such who once were sinners to become saints. And they who were once blind have, by believing in him, received sight, and given to look into the mystery of the kingdom of God, in which his glory is beheld, the least glimpse whereof tends to mar all the glory of Satan's kingdom in them who are thus favored with the dawning of the day of God's merciful visitation upon their souls. With which, my dear friends, you have been favored, and largely given to partake thereof, with many others, and by the one spirit have been baptized together as into one body; and have drunk at the one heavenly divine spring, and united together in that pure love which flows from God, through Christ, to true believers; and great was that care which came upon you, for the maintaining of that love and unity which Truth had brought you into; and when anything appeared which struck thereat, how readily did you then join hand in hand, to get that cast out from amongst you, which had so ill a tendency in it. And God, who delighteth to behold his children united together in his love, failed not to bless your endeavors.

And dear Friends, if the same care be con-

tinued, you'll then feel the Lord will not be wanting to support you in what tends to his honor; for his eyes are upon the righteous, and his ears are open to their cry; and for their help he will arise, and what is wrong must be judged down by him. Therefore, let not any give way to favor any thing which is from under the cross of Christ, for those who would favor the cause of such are not willing to bear the yoke, will thereby hurt themselves, and bring a veil of darkness over their own understandings, and if darkness prevails, love will wax cold to brethren, and that care for maintaining love and unity will be lost, and instead thereof, bitterness gets up, and hard speeches are uttered, and grievous reflections cast on them who cannot give way for anything to be contemned or encouraged in the Church of Christ, but what is consistent with his will whose dwelling is in holiness, and is of purer eyes than to behold any evil with allowance.

Wherefore, my dearly beloved friends, be all careful to keep a strict watch, each over his own mind; that nothing that's wrong may get up, to harden your hearts or darken any one's understanding which God hath opened; and if the watch be well kept up at home, and no evil thing encouraged there, then, such will become more and more in the Lord's hand, as proper instruments to watch over others, and to lend a helping hand unto them who stand in need. And indeed, he that would help another out of the mire, must first get out himself, and be washed from his own defilements, before he can be helpful in so good a work; for should help be offered from such an one, who hath not passed under the refining power and mortifying word of God, it might well be rejected and turned back again, and to him said, O! thou deceitful hypocrite, first get a clean heart created in thyself, before thou offers help to me. And God saith to the wicked, what hast thou to do to declare my statutes, or that thou should take my covenant in thy mouth? seeing thou hast instruction and castest my words behind thee; when thou sawest a thief then thou consentedst with him, and hast been partaker with adulterers. And, dear friends, seeing there were such in many generations that are past, who did presume to appear as servants of God, and were not truly such, we need not wonder if there be some such in this day; for there is the same old deceiver, that's going about seeking whom he can devour, and he is not without his wicked and evil instruments, by whom he is working; and as is their master, so are they, full of subtlety; and often under a seeming show of goodness, and a feigned humility, gain upon the minds of some, and get a place in their affections; which being once fixed is hard to move; and so it proves many times of ill consequence, when such an one comes to be discovered, and judged to be no other than a deceiver.

Wherefore, dear friends, in order that that and all other dangers may be avoided, let every one keep close to the gift and measure of Christ's Spirit in himself, against which no device or enchantment of the enemy can ever prevail: for if we are deceived, it's for want of keeping a single eye to our holy and heavenly guide, Christ Jesus; to whom, for all the mercies we enjoy, be glory and praise for ever.

And, dear friends, as to my travels, I may with comfort say, the Lord hath been with me in this my service and labor of love to his

people, so that my way has been made easy, and so far as have felt it opened, I have answered; and now finding myself free and clear of that concern which lay as a weight on my mind, and, being at liberty, think the time long, till I am again with you. And if this opportunity had happened the beginning of last month, I should have come this fall: but the winter is now too near to attempt it, have therefore dropped the thoughts of coming until spring. My dear wife gives her dear love to you all, and through mercy we are in a good state of health, praised be the Lord. And may it please him, our heavenly Father, to protect and preserve us all in the way and path of life, unto the end of our time here; and at last give us an entrance into the kingdom of eternal glory, is the sincere desire and prayer of your truly concerned friend,

JOHN ESTABROOK.

London, the 20th of the 7th mo. 1722.

For "The Friend."

Divine Protection.

The belief that the following narrative may prove strengthening to the faith of many readers of "The Friend," leads me to transcribe it for publication, subject to the judgment of the editor.

After the ship *Loch Erne* ran down and sunk the steamship *Ville DeLivre*, from New York to France, in 1873, it was still thought by her officers that she would be able to reach a port of safety, although in a very damaged condition. This they attempted to do, after having transferred the few that were saved from the sunken steamship to another more commodious ship, which fell in with them in their wrecked condition; but after parting with this ship, that came to their aid, they found the *Loch Erne* to become unmanageable.

The following letter was read at a meeting in the city of Edinburgh, Scotland—which a few months after I copied from the newspaper *Weekly Review*, published in that city. It shows us plainly that our Heavenly Father yet holds converse with his children, outside of that which was written aforetime for our instruction in the Holy Scriptures. Verily the days of miracles are not yet passed. Who dare limit the Holy One of Israel?

"After they found the ship to be unmanageable, many a heart failed. They feared they would never see land again. They could not navigate the vessel, and were left to the mercy of the wind and waves; or rather to the care of Him who ruleth the wind and waves. Vain was the help of man. The wind drove them out of the course of ships, northward. You are aware (says the writer who received the information contained in this letter from her son who was on board), that two ministers were left on board the *Loch Erne*. One M. Cook, a truly godly man, did all he could to encourage their hearts. Every day at noon, he gathered them together and earnestly strove to lead them to the Saviour; and this he continued to do till they reached England.

"The day before they were rescued they knew that very shortly they must go down. The wind now changed, bringing them a little nearer the track of ships, yet little hope was had of being saved. M. Cook told them of his hopes, and that death to him would be eternal life; and he urgently entreated them to put their trust in Him who is mighty to save; at the same time he told them that he had no

but they would be rescued; and that *even* on a vessel was speeding to save them; and had answered their prayers; and that next day as morning dawns they would see. That night was one of great anxiety; morning dawned every eye was strained to see the promised ship. There truly she was, and the British Queen bore down upon them; you may think with what thankful arts they left the Loch Erne."

One thing is remarkable. The officer in charge on board the British Queen, had a most remarkable feeling that there was something for him to do; and three times during at night he changed the course of the vessel, bearing northward, and told the watch to keep a sharp look out for a ship. Immediately on sighting the Loch Erne he bore down upon her; at first sight he thought she had been abandoned, as she lay helpless in the trough of the sea; but soon they saw her out of distress. It seems to be a remarkable instance of faith on the one side, and a aiding providence on the other. After they are taken on board the pilot boat that brought them into Plymouth, M. Cook read an account of Paul's shipwreck, showing the mirality of their experience. T. D.

San Leandro, Cal., 5th mo. 23d, 1873.

NOTE.—By another newspaper, afterward, the writer learned that M. Cook was a Protestant minister in Paris. Had been in the Evangelical Alliance, and died about a year afterwards. T. D.

Selected.

Syrian Home-Life.

The home life of any people is influenced very much by the dwellings in which it is led. The discomfort so manifest among the poorer classes of the East, the absence of that cheerfulness and brightness which makes a marked feature in the family relations of many other lands, comes in a measure from the houses in which young and old are forced to spend their days. Among Arabs, as among ignorant races generally, there is a marvellous lack of forehandedness. With Mohammedans this lack is aggravated by the tendency that the Moslem doctrine of fatalism has to increase the laziness which has been not inaptly described as an original sin.

When Dr. Calhoun was spending a summer in a Lebanon village, he wondered at the composure with which the natives endured the blazing sunshine, unbroken by any shade. One day he said to some of the householders:—

"Why do you not plant trees here, to shade your houses?"

"What is the use?" they answered; "we should not live to sit in the shade."

"But your children would."

"Then let them plant the trees." And that was answer enough; and content with it they sweltered on, as they had for generations before. The same satisfaction with the past has preserved the architecture, and the methods of house-building, century after century.

Most of the Syrian houses are built of stone. The great scarcity of timber through the land forbids the use of wood. It is said that in the days of the successors of Alexander the Great, and in the wars of the Maccabees, the Syrian forests were almost wholly destroyed, and that since then the goats and donkeys have persistently nibbled and browsed down the young shoots until the land has become so bare and desolate that now a tree is a treasure, and often a wonder.

Very few of these stone houses are built many stories high. Outside of the larger cities they are almost all low and mean. In Halba, for instance, the home of a good Christian native, whose name is Isboe Abu Hanna; that is, the father of Hanna), is perched on a hill-side opposite the village, above a ravine through which runs a stream of water. It is simply one low room, about sixteen by twenty feet. The ceiling is of logs, smoked black, and shining as if they had been varnished. Above the logs are flat stones and thorns, on which earth is piled a foot deep. This, of course, gives fine rooting ground for grass and weeds. And they grow there just as in the Bible times, "when the grass upon the houses withered after it grew up." In the winter, this earth is rolled down with a heavy stone roller, to keep out the rain. In many of the houses, the family, cattle, sheep, calves, and horses, sleep in the same room. The family sleep in the elevated part of the room, along the edge of which is a trough, into which they put the barley for the animals. This is the methwaid or manger, such as the infant Jesus was laid in.

It seems strange that people are willing to sleep in such dark rooms among the cattle and donkeys, and that they are not afraid that their children may be trodden on in the night. They do sometimes have trouble, but serious accidents are very rare. Mr. Wilson, of Hums, was once travelling near Safita, and slept in a house among the cattle, and it was stormy and he had no other place to sleep. In the night he was disturbed that his dreams, and opened his eyes thinking that coarse sour bread he ate for supper had given him the "nightmare!" But instead of that, he found it was only a *night-calf*; as a calf was standing on his breast and looking down into his face!

It may easily be imagined that Syrian houses as a class do not furnish very attractive homes to Americans. But besides the trouble that missionaries have in getting places fit for civilized homes, there are special difficulties that come from the superstitions of the Moslems, for they believe that the sale of a building will be followed by a death in the family of him who parts with it. The obstacles to sale are, however, overcome by legal fictions, just as they are in lands further west.

The dresses of the Syrians, young and old, vary as much as the garments of other nations. The varieties come, however, from different material and value, rather than from frequent changes in fashion. In Eastern lands garments are heirlooms, handed from one generation to another, and valued and used in a way which would be impossible under the decay of fickle fashion. If popularity be decided by numbers, then the most popular dress is that made in main of rags. And there are degrees of raggedness in Oriental lands that are apparently unapproachable and incomprehensible in the West.

The ordinary dress of the *fellah* or peasant is a simple affair. For instance, the little boy Asoad, who brings milk every morning to the missionary families at their summer home in Abah, on Mount Lebanon, wears a red tarboosh or cap on his head, a loose jacket, and trousers which are like a blue bag, gathered around the waist, with two small holes for his feet to go through. They are drawn up nearly to his knees, and his legs are bare,

as he wears no stockings. He wears red shoes pointed and turned up at the toes. When he comes in at the door, he leaves his shoes outside, but keeps his cap on his head.

The better dressed children wear clothes of more costly materials and richer colors. Sometimes they have white turbans, instead of the fez or red felt cap. The indoor dress is often very rich. At a party in such a place as Tripoli or Beirut, the ladies will be dressed in the most elegant style, in silks and satins and velvets, embroidered with gold thread and pearls, and their arms and necks loaded with gold bracelets and necklaces set with precious stones, and on their heads wreaths of gold and silver work sparkling with diamonds and fragrant with orange-blossoms and jessamine. The little boys and girls, too, are dressed in the same rich style among the wealthier classes.

One of the deepest convictions in the mind of an Arab is that any man is immeasurably superior to any woman—that women are fit only to be despised. Boys are trained to abuse and oppress their sisters, and girls are taught that such treatment is the only kind they have any right to expect. The women carry the burdens, and grind the grain in the hand-mills. They are sometimes yoked with cattle and donkeys before the plough, and driven, as the other beasts of burden are, by a sharp goad. Part of their daily work is to bring water for the household uses.

In speaking of the customs of the Arabs that pertain to their meals, it is hardly proper to use a term familiar in western speech, and speak of "the table," for in Syria the company who are to eat together do not sit at a table, but squat cross-legged around a little, insignificant piece of furniture about a foot high, merely a large stool or tall kind of tray. This is placed on a mat in the middle of the room.

Here is the bill of fare of a supper to which a traveller might be welcomed in a Syrian home: First of all are the world-wide essentials, bread and water. The bread is in four piles on the edge of the tray. The water is in one cup, from which all are to drink. On the table there is *kibby*, and camel stew, and Esau's pottage, and olives, and rice, and figs cooked in *dibs*, and chicken boiled to pieces, and white fresh cheese, and curdled milk and fried eggs. *Kibby* is the Arab plum-pudding and mince-pie and roast beef, all in one. It is made by pounding meat in a mortar with wheat, until both are mixed into a soft pulp, and then dressed with nuts, onions and butter, and baked or roasted in cakes over the fire. The Arabs use no knives or forks at their meals, nor have they plates for each person; but each one doubles a piece of the bread into a kind of three-cornered spoon, and with it or with a wooden spoon, or his fingers dips from the dish which he may happen to prefer.

Of the tame beasts in Syria, the strangest to western eyes is undoubtedly the camel. The Arab name is *Jemel* or Beauty. The camel is often called "the ship of the desert." He is very much like a ship, as he carries a heavy cargo over the ocean like plains and wilds of the Syrian and Arabian deserts. He is also like a ship in making people sea-sick who ride on his back. The people often eat camel's flesh. It is rarely sold in Beirut, as camels are too expensive along the sea coast to be used as food; but in the interior towns, like Hums and Hamath, which border on the desert, or rather the great plains occupied by

the ten thousands of the Belawin, camel's meat is a common article in the market.

There is a popular fallacy in the West that camels are most patient and peaceful and gentle in their ways. And when they are tied together in a long caravan, with a little mouse-colored donkey leading the van, ridden by a long-legged Bedawy, who sits half astride smoking his pipe, one might well think them the tamest and most innocent creatures in the world; but when they fall into a panic, they are beyond all control, and then the safest place is that which is farthest off. This is especially true in the month of February, for then they get to be as "mad as a March hare." They are what the Arabs call *taish*, and often bite men severely. A camel *taish* in a city will drive the whole town before him. Wherever he goes, with his tongue hanging down and a foaming froth pouring from his mouth as he growls and bellows through the streets, the people leave their shops and stools and run in dismay.

Still more common than camels, and perhaps more useful, and certainly more abused, are the donkeys. In the East they are used not merely as the meanest and most common beast of burden, but by officials and persons of high rank and wealth.

As donkeys have a world-wide reputation for stupidity, it is eminently proper to set the Syrian priests next in order, for, with rare exceptions they are marvels of ignorance. Most of them belong to the Greek Church, though there are plenty of those who belong to the Romish and Armenian sects. And they are not only ignorant, but many of them are very vicious ones. As for ignorance, it is "like people, like priest." It would astonish a school-boy to hear of the blunders and lack of knowledge shown by even those who are considered learned. Comets, eclipses, meteors and all unusual sights in the sky, are looked upon by the majority of the people as portents dire and terrible, produced by some malign spirit, who thus seeks to foretell wars, pestilence and famine. But men and women who have been educated and instructed in the Bible, have learned to look with satisfaction and delight upon these phenomena, and by their calmness, and evident interest, disarm the fears of their less intelligent neighbors.

The power with which Christianity has taken hold of many hearts in Syria, is a source of delight and wonder. And they who have witnessed its effects are often greatly moved on seeing how Christians have triumphed through faith over even the fiercest persecutions. Not a few of the girls and women who have been rescued by Christian teaching from long-continued and dreadful degradation, have shown the heroism and simple-hearted devotion that in every age of the Church has come from faith in Christ.

An Arab priest, in the prospect of immediate dissolution, called upon God to have mercy upon his soul. His children he gave to one of the missionaries. "Let him take them," said he; "be may teach them his religion, and anything he chooses. He is a *good man*; I will be a father to them; they shall be his."

Relatives and friends, in that trying hour, were set aside for a stranger whose life was an unanswerable appeal to the heart of an open foe.—From "Syrian Home Life," by Henry Harris Jessup.

Watch ye, stand fast in the faith.

THE INDIAN'S LAMENT.

Selected.

I go from all my heart loves best,
On to the dark Pacific wave,
For the poor Indian ne'er can rest
But in his grave.

From every well-known wood and wild,
Whence every dearest hope was born,
From all that charmed me since a child,
I go forlorn.

My smiling fields where harvests wave,
My peaceful hut I loved so well,
My father's bones and moss-grown grave,
A long farewell.

Thou great good Spirit whom we fear,
Are thy red children all forgot?
Dost thou not mark each bitter tear
Nor heed our lot?

We go from all our hearts love best
On to the dark Pacific wave,
And the poor Indian ne'er can rest
But in his grave.

WHICH IS YOUR LOT?

Selected.

Some children roam the fields and hills,
And others work in noisy mills;
Some dance in feics, and dance and play,
While others drudge their lives away;
Some glow with health and bound with song,
And some must suffer all day long.

Which is your lot, my girl and boy?
Is it a life of ease and joy?
Ah, if it is, its glowing sun,
The poorer life should shine upon.
Make glad one little heart to-day,
And help one burdened child to play.

—St. Nicholas.

SOWING IN HOPE.

Selected.

"My words are poor and weak," I said; "they pass
Like summer wind above the summer grass.

"To utter them seems idle and vain;
I cannot hope to gather them again.

"And yet, impelled by some deep inward voice,
I must work on; I have no other choice.

"But oh my words are poor and weak," I said;
"The truth is quick, the utterance cold and dead."

"Nay, nay, not so," he answered. "Sow thy seed
Unquestioning; God knoweth there is need.

"For every grain of truth in weakness sown
He watches over who protects his own.

"Though buried long, it shall spring up at length,
And shake like Lebanon its fruitful strength."

He said and left me, while I pondered o'er
The holy truths so often heard before.

And while I pondered, unawares there stole
A strange, sweet, subtle strength through all my soul.

I rose and went my way, and asked no more
If words of mine had any fruit in store;

Content to drop my patient seed, although
My hands shall never gather where they strow;

Leaving the harvest, be it great or small,
In His dear keeping who is all in all.

J. B. Gough, the temperance lecturer, relates the following incident, which occurred at a meeting which he held amongst some slaves in Virginia, in the year 1847.

"When I got up to speak, a man stepped from the foot of the pulpit, and said, 'Before Massa Gough begins, I want you just to look at me, brodren. Brodren, here's a nigger doesn't own hisself. My massa owns me; he bought me in the market-place—paid dollars for me. Yes, brodren, here's a nigger doesn't own hisself; bless the Lord! Ah, yes, brodren, this poor old body of mine, the bones and the sinews of this old body of mine, is massa's slave; but, glory to God, brodren, my soul is the free man of the Lord Jesus.'

"Ah, there is not a drunkard in England can say that. There is not a drunkard in England can say that he is not a meaner slave than the slave who is bought and sold for dollars. Why? Because he has sold hisself. And what does he get? Wretchedness, misery, rags, destitution, and poverty. 'Wha' huth wocs? who hath contentions?' He th' carries long at the wine, they that go to see mixed wine."

Cheerful Homes.

Who can overestimate the importance of cheerful homes? From them spring true love and happiness, and virtue. From them go forth those who make other homes, who owe much, very much, of their comfort, cheer and real beauty to their predecessors—from which were imbibed the right sort of influences and knowledge.

If a home is all it should be, the harbor of safety to those reared therein, then, when the young men and women go from them to find and manage other homes, will the results be virtuous. Of course, there are exceptions to this, as to other rules. But causes and effects are means to an end, are natural life experiences.

And where are the cheerful homes? They are where pure air and sunlight are permitted entrance daily; where amiability, affection and good will are ever ripe. Where there is unity with true accord, and parental authority which gently but firmly claims, and receives, due obedience. Where children and youth are respectful and considerate, and the family peace is habitual, not occasional. Above all, where Divine love glows, and Christian culture, the grace and strength of all other culture, continually progresses.

And does the cheerfulness of homes center in themselves, and only affect those immediately concerned? Ah, no! it could not do this any more than the sun can confine its glorifying rays and beams within a limited circumference. The real home, sheds its light abroad, in comparison as do orbicular rays illuminate and gladden homes and individuals far and near.

Sympathy, benevolence and charity are familiar household words, and consciously and unconsciously the home diffuses its genial mantle on all sides. Many hearts are rendered happier, and other homes made brighter, so that those in turn may thrive for the same ends, and thus unmeasured good is done.

Cheerful homes! how the very words inspire a healthful animation. What delights are implied. How many memories awakened and hearts consoled by "reminiscing" over them. How we like to visit them, and get somewhat of the gifts they are always beautifully bestowing.—sunny smiles, pleasant words, and tones, and helpful intelligence,—the fruits of home diligence and experience.

In the cheerful homes are all manner of sweet and simple devices, for the allurement of those who might, but for them, stray from the fold and come to final misery and sorrow. There will be found every means of pleasantness which circumstances united to energy can afford, not the least of which, will be the reading matter, which, to keep the heart pure and mind strong and inclined to the side of virtue, must be of a well selected kind. For the character of the literature indulged in by immature minds is a powerful bias towards the separate paths of life. There are all grades

mental food, but there can be only one di-
vision between the species which will build
that which will weaken a nature.

One should be admitted into the home
is not of a directly pure sort. And
does not exclude an entertaining and a
lative species.

Oh, if there is one thing
at which parents should be especially
careful over their children, it is the matter
of reading. Guide them in the "ways of
saintness," that their paths be "paths of
peace."

Then wherever your dear ones may
be, you have tried to direct them well with-
in their home. Keep your homes always
useful, for, in them, are the forces and ex-
cesses of example and training. A cheer-
fulness, an earnest wisdom, understanding, and
a power embracing truth, humble or mag-
nificent, the home in which these harmoni-
ously dwell is indeed a cheerful one.—*Ep.
order.*

*** "For The Friend" ***

Extracts from the Diary and Letters of Ebenezer
Worth.

(Continued from page 339.)

5th of 2nd mo. 1846. Left home to return
to Tunesassa. It was quite a trial to me to
leave my new relatives and friends, but I
knew it is because I believe it to be the will
of the Lord, whom I know it is my duty and
at interest to serve and obey, (that I make
a sacrifice.) Oh! it is a great favor to be
privileged to be engaged in serving so kind
and merciful a Master. I believe we feel it so
en we feel as we ought. I was favored in
going out, to meet with but little hindrance
getting along between two snow storms. I
went to Naples on a Seventh-day evening; the
weather was cold but I did not suffer much
in it; walked to Tunesassa on First-day
morning, was a little hindered by meeting
with some of the natives. The river was
open, the ice not strong enough to be
crossing without taking a couple of boards,
and putting one on the ice then drawing the
other over and shoving it ahead. Henry Gar-
n, an Indian, assisted me. I got home, I
think, about 11 o'clock; made a fire in the
stove, I occupied and was glad of an oppor-
tunity of sitting down in the quiet. The first
week I spent in visiting the natives, the next
in a named school, continued it almost two
weeks, then stopped for making sugar. A
Indian moved, after which I felt lonely at
times. Geo. March lodged with me a part
of the time. When I was favored to feel love
to the Blessed Master, and I think I may say
a degree of faith in Him, I could lie down in
peace, although alone, depending on the Lord
to take care of me and preserve me through-
out the night. "Except the Lord build the house
vainly labor in vain who build it; except the
Lord keep the city the watchman waketh
it in vain." [These expressions of our dear
friend bring to remembrance some remarks
his, made to the writer many years after
the above date, when at his own home in
Weston Co., having been quite sick and con-
fined to his bed, he said in substance, "he
could rather die alone, in a cabin out in the
woods or wilderness, having the Divine Pres-
ence with him, than to die amidst his rela-
tives, with all the comforts of a home, and be
without that."]

5th mo. 9th. Through the most part of last
month my faith was at times much tried; not
having any tenant on the farm, it began to
be very doubtful whether I should be able to

get a suitable one, and not feeling liberty to
spend much time on it (myself), I felt much
tried in many respects, at times it seemed as
if I could hardly bear up. After being at the
post office one day and receiving a letter from
the Committee in which no mention was made
of any one coming out to take my place, this
together with my other trials pressed heavy
upon me; I could hardly describe my feelings.
Had it not been for the unmerited mercy of
Him who is mindful of his poor unworthy
creatures, it seemed at times as if I would
almost have sunk under them. On my return
home (I think on that day) I came by West
Rodolph. As I came along a lonely piece of
road, my burden (appeared) in a good degree
removed, and I was favored to feel a com-
fortable degree of peace to my much tried
mind. How necessary it is, always to keep
the spiritual eye single to our Divine Master
and endeavor to seek after true resignation
to his Divine will in all things. I believe it
will promote our happiness in time and help
us on our journey to the mansions of rest and
peace.

5th mo. 20th. I have been mercifully
favored of late to bear up under the discour-
aging appearance of things.

5th mo. 30th. Not being well to-day, I
staid pretty much at home; finished writing a
letter to Samuel Cope, and forwarded it;
then went across the river and visited Amos
Thompson,—had a pretty satisfactory oppor-
tunity with him. Feeling a desire to talk
some with a sick Indian girl, that I thought
was going into a consumption, I got Amos to
go and interpret; she was better, and showed
rather an unwillingness to be spoken to about
her situation; it was trying. How necessary
it is for us, when we undertake to speak to
others, to try to know that it is required of
us, and feel after a qualification. I have been
sensible that it is our duty to live so near to
our Divine Master as to be prepared at any
time to engage in service when He may be
pleased to require it. The qualification has
sometimes to be waited for after duty is
pointed out; but I think if we keep our place,
it will be given in proper time to commence
the service.

7th mo. 4th. Went down to Freeman
Thompson's, intending to have gone to Corn-
planter's reservation, (but) finding there was
a good deal of drinking at Freeman's, I spent
some time with them talking upon the evils
of intemperance; was kindly treated by all
except one, who was quite saucy. I returned
pretty well satisfied in mind.

8th mo. 9th. I have great reason to be re-
newedly thankful of late for a very comfort-
able sense of the loving-kindness and goodness
of the Lord, to me a poor sinner; this has en-
abled me to spend the two last weeks to rather
better satisfaction, I think, than some pre-
ceding ones. There is a precious reward to
be experienced in living the life of a Christian.
I am sensible I have suffered loss, and at times
great loss, by not living near enough to Him
who is the Life and Light of the world, and
shunning the cross; may there be an im-
provement in the remainder of the days dealt
out to me. The glory be to Him who is for-
ever worthy.

10th mo. 5th. I think I have been much
favored these last two weeks in being brought
at times to feel a degree of love to God, and
of faith and confidence in Him. The last
week, particularly, I have been comforted

with the foregoing encouraging feelings, (sen-
sible) at times that his strength was sufficient
to bear me up. It is He that worketh in us
both to will and to do.

13th. At seasons of late I have felt weak-
ness and discouragements, at other times a
degree of comfort and encouragement.

1st mo. 10th, 1847. I feel a little encou-
raged to write some account of the goodness
and mercy of the Lord to me a poor unworthy
sinner. I have been, for a few days past,
favored to feel a renewed sense of his loving-
kindness, which has been strengthening and
encouraging. Oh! for more humility and
faithfulness in serving so kind and merciful a
Master.

18th. I feel undeserving of the great favors
that have been so richly bestowed upon me
for some time past by a kind and merciful
Master, and think them worthy to be record-
ed, and to be long remembered with feelings
of the deepest gratitude. The love that I have
felt to my dear Master has been truly com-
forting. I have been favored, I think, with
a degree of faith to believe that if I should live
near to Him, it would not be required of me
to remain in this place a great while longer,
(accompanied) at times with sincere desires
that I might faithfully fill up the remainder
of the time in the way that would be most
pleasing to Him. I feel a little encouraged
to try, although in the past I have fallen far
short of what I desired to do.

(To be continued.)

A Notable Night in Boston.—A. Bronson Alcott as a
Christian Confessor.

Many a "conversation" in many a city has
Bronson Alcott held, but never in any place
one of the significance and interest of last
evening's. For some time it has been known
that this once pre-eminent representative of
"New England Transcendentalism" no longer
stands in his earlier theological attitude.
Partly through closer and more intimate in-
tercourse with christian believers, partly no
doubt through a guileless following of the
"true light which lighteth every man that
cometh into the world," he this spring reach-
ed a clearness and positiveness of evangelical
conviction, which rendered it a kind of per-
sonal necessity to declare to others his new
position.

The 14th of 4th month, on the evening
fixed by B. Alcott—the invited guests as-
sembled. Representative men of almost every
type and shade of belief were there—Evan-
gelical, Unitarian, Universalist, Swedenbor-
gian, and "Free Religious." The eager, yet
diverse, interest with which all awaited the
words of the venerable sage, was something
not soon to be forgotten.

Beginning back in early manhood, he spoke
of the influence long exerted over him by the
doctrines and personality of Channing; then
of the formation of "The Transcendental
Club," and his connection with it; then of
his gradually formed conviction that the drift
of that movement was pantheistic; then of
his later and larger intercourse with people
of orthodox views, and his better appreciation
of them.

This, by an easy transition, brought him
to speak of the great doctrines of the chris-
tian faith, and of his own apprehension of
them. In the course of his remarks, and of
the conversation following, he touched mainly
upon the following points: The unique char-

acter of the Christian religion; the reality and value of divine revelation; the Trinity; the person of Christ; the lapsed state of man, and the atonement. As to the first, he professed his faith in Christianity as from above, as the first religion that gave the true knowledge of sin, as destined to supersede all other religions, and to be superseded by no other. Speaking of the Founder of Christianity, he thought the overshadowing question of the age was still, "What think ye of Christ?" Without using technical names or definitions he mentioned the Orthodox, the Arian, and the Socinian conceptions, but at last came back to the unequivocal admission of Christ's own claim of oneness with the Godhead. The atonement was a supreme illustration of love's power vicariously to suffer for the good of the loved, but that which differentiated Christ's vicarious suffering, from all that human love had ever prompted, making it unique and world redeeming, was "the oneness of the sufferer with Deity."

These statements show how complete was the speaker's dissent from all Channingsm, and from all transcendental or other rationalism, but they cannot show how rich and hearty and poetic was the vein of his discourse. Still less can they give any idea of the genial excitement of the sharp but friendly catchings to which the new confessor was subjected.

At one point he was almost lost in what seemed more soliloquy than address on love as the very essence of God. Apparently to disconcert him and bring him down to the level of criticism and logic, a well known radical suddenly thrust in the question, "What is love?" "Ah, who can tell?" sighed B. Alcott, without a second's hesitation, and with absolute simplicity he soared on the higher, actually helped and not hindered by the attempted interruption. Another questioner tried to make him see the impossibility of ascribing suffering to a divine person, love being so essentially and unalterably blessed that nothing to which love prompts can be really a suffering. Not the twinkling of an eye did it arrest him. "Yes, yes, love loves to suffer!" was his answer, and the epigram was worth a dozen arguments as on he went. Whatever the agency by which it has been brought about, this new and unexpected confession of Christ by one supposed to feel no need of any Mediator, has produced a profound impression in Bo-ton, and wherever American Unitarianism has gone.—*Ch. Ad.*

The visible unity of the Church roots in the invisible unity. The invisible unity is spiritual. It is a common life in Christ. This is the organizing, generating, developing force in the Church. Without this spiritual vitality, a Church is a poor, formal, dead thing. The invisible unity is, therefore, the great fact. It magnifies Christ. It demonstrates brotherhood. It supplies power for growth and conquest. Every believer who keeps himself in the love of God, keeps himself, also, in the communion of the saints. To be in Christ is to be in his members; for the life which is in the vine flows through all the branches. "There are diversities of gifts, but the same spirit. And there are differences of administrations, [ministries,] but the same Lord. And there are diversities of operation, but it is the same God, which worketh all in all." (1 Cor. xii. 4-6).—*Ch. Ad.*

Natural History, Science, &c.

Gathering India Rubber on the Amazon.—The rubber-swamps are all around, but land travelling is out of the question. So an Indian canoe man is engaged, —a good-natured fellow, and an adept in woodcraft. He sets us across the river at a half-raised hut, where bright vines clamber over the broken thatch and hang in long festoons in front of the low door-way; but within, the floor is sodden black clay, and dark mold hangs on the sides, and the air is like a sepulchre. The single slovenly *manabaca* woman who inhabits the place complains bitterly of the ague which tortures her; yet year after year, until the house falls to pieces, she will go on dying here, because, forsooth, it is her own and the rubber-trees are near. She will not even repair the structure. You can see sky through the roof, but if rain drives in she will swing her hammock in another corner, and shiver on through the night as best she may; for tomorrow there are rubber-trees to be tapped, and a fresh harvest of the precious milk to be brought home,—and what will you have? One must expect discomfort in a swamp.

Back of the house the rubber-trees are scattered through marshy forest, where we clamber over logs, and sink into pools of mud, and leap the puddles; where the mosquitos are blood-thirsty, and nature is damp, and dark, and threatening; where the silence is unbroken by beast or bird,—a silence that can be felt; it is like a tomb in which we are buried, away from the sunshine, away from brute and man, alone with rotting death. The very beauty of our forest tomb makes us shudder by its intensity.

In the early morning, men and women come with baskets of clay cups on their backs, and little hatchets to gash the trees. Where the white milk drips down from the gash they stick their cups on the trunk with daubs of clay, molded so as to catch the whole flow. If the tree is a large one, four or five gashes may be cut in a circle around the trunk. On the next day other gashes are made a little below these, and so on until the rows reach the ground. By eleven o'clock the flow of milk has ceased, and the *seringueiros* come to collect the contents of the cups in calabash jars. A gill or so is the utmost yield from each tree, and a single gatherer may attend to a hundred and twenty trees or more, wading always through these dark marshes, and paying dearly for his profit in fever and weakness.

Our *manabaca* hostess has brought in her day's gathering—a calabash full of the white liquid, in appearance precisely like milk. If left in this condition it coagulates after a while and forms an inferior whitish gum. To make the black rubber of commerce the milk must go through a peculiar process of manufacture, for which our guide has been preparing. Over a smoldering fire, fed with the hard nuts of the *tucumá* palm, he places a kind of clay chimney, like a wide-mouthed, bottomless jug; through this *boiaio* the thick smoke pours in a constant stream. Now he takes his mold,—in this case a wooden one, like a round-bladed paddle,—washes it with the milk, and holds it over the smoke until the liquid coagulates. Then another coat is added, only now, as the wood is heated, the milk coagulates faster. It may take the gatherings of two or three days to cover the mold thickly enough. Then the rubber is

still dull white, but in a short time it turns brown and finally almost black, as it is to the market. The mass is cut from an paddle and sold to traders in the vill. Bottles are sometimes made by molting rubber over a clay ball, which is then broken up and removed. Our old-fashioned rubber shoes used to be made in this way.

Twenty million pounds of rubber, value \$6,000,000, are annually exported from Brazil in the dry season many thousand people engaged in gathering it. But the business altogether a ruinous one for the province. The Brazilians themselves are fully aware. *Seringueiro*, who gains two or three dol from a single day's gathering, has enough life goes here, to keep him in idleness a week; and when his money is spent, he draw again on his ever-ready bank.—*Scrib. Magazine.*

Steam Generator.—At Sharon Hill, in Lancaster County, a new invention is in process. A correspondent of the *Philadelphia Press* describes it as follows:

In this somewhat secluded shop, from which curious intruders are carefully shut out, "instantaneous steam generator" has been actual operation for four months.

The steam generator consists of a series of hollow spheres into which water is injected by pulsations. The instant that the droppings on the hot surface of the steel spit it flashes into steam and ascends through small aperture into a "reservoir," which consists of six gridiron sections of hollow steel tubes which lie transversely upon each other. From this "reservoir" the steam conveyed to the engine. The water instead of being in a boiler under the action of fire, is in a tank which can be located in any part of the building, and if it should happen to empty through failure to set the pump motion, no harm could possibly come, except that the process of making steam would stop, and after the small stock in the reservoir had passed out, the machinery would come to a stand. There would be no explosion to give notice.

The "steam generator" now in operation at the Sharon Hill shop does not occupy more than twenty square feet of floor space. The furnace burns by natural draft, and its flame comes in direct contact with the horizontal gridiron of hollow spheres immediately above. The six gridiron sections of steel tubes, which constitute the "reservoir," are at the top. Compared with the space occupied by an ordinary boiler, this little furnace shrinks to the dimensions of a kitchen range. In sea-going vessels, and in fact wherever space is valuable, the "steam generator," if proved successful, will have a vast advantage over the old form of boiler, whether upright or horizontal.

Amber and Asphaltum from Vincenttown, J.—E. Goldsmith reports these minerals from the Ash Marl, a layer above the Green Sand. The mass of asphaltum weighed 100 lbs. Unlike ordinary amber, the specific gravity the New Jersey variety is less than that of water, and it fuses to a mobile liquid.—*Phil. Acad. Nat. Sci. Phila.*

Insects as Food.—At a recent meeting of the London Entomological Society there was exhibited a piece of "Kungu cake" from the Nyassa district in Africa, where according to Livingstone and others, it is used extensively as food by the natives, who manufacture

a large quantities of a minute insect; being to the mosquito family. It was stated a common hemipterous insect was largely n by some of the hill tribes of Northern India. The crust of insects has been v n by analysis to contain about 6 per cent of nitrogen, and their ashes show the enee of phosphorus.—*Am. Nat.*

Rocky Mountain Locust.—At its last session gress appropriated \$10,000 for the comion of the investigation of the Rocky untain Locust by the United States Entomological Commission. The work during coming season will be carried on in Colorado and the Western Territories, particularly h and Eastern Idaho, where the locust unds each summer, doing more or less age. Parties will also be sent into Montana, the main breeding place of the destruc-swarms periodically visiting the Western sissippi States.—*Am. Nat.*

Breeding Habits of the Dace.—Standing one rnoon upon one of the bridges crossing river in this city, a nest of the Dace was covered in the stream below. It was about 6 feet in diameter, situated in running ler from twelve to fifteen inches deep, and teeted on the upper side by a small root which the current of the water was broken. e female would pass over the pebbles and osit her spawn, while the male stood ready an attack, and on the approach of an my, would dart off like a flash in pursuit the intruder. When no danger was near, l after the bed had been covered with wn, both would proceed up the stream in four to ten feet or more, and taking a all pebble in their mouths, would quickly urn and deposit them on the eggs. Some- es but one fish would go for pebbles, o other lingering near. Thus layer after r of eggs and pebbles were deposited one on the other. These movements were tched for two days, when the water be- ame muddy from the spring rains, and fur- er observation was impossible. The cover- g of the eggs retained them in their place, d at the same time protected them from g destroyed by other fishes who were con- antly hovering about, like vultures watching opportunity to devour them, while the terstices between the pebbles gave sufficient ace to harbor the little fry as soon as hatch.—*W. H. Gregg, Elmira, N. Y., in Am. Nat.*

Bark Louse.—In the summer of 1870, a large ecies of bark louse was common on the lip trees about the lawns of the Michigan gricultural College, at Lansing. So destruc- ve were they that some of the trees were lled outright, and others were much injured. Tennessee these insects seem very common a the stately tulip trees of that State.

Wherever the tulip tree louse has been b- served, sucking the sap and vitality from hee, there the bees have also been seen, lap- ing up a sweet juicy exudation which is creted by the lice.

The fully developed insect, like all bark- ee, is in the form of a scale closely applied he limb on which it works. On the under ide is a cotton-like secretion which serves to ander beaks, and finally folds the eggs. The larvae which are hatche- rom these, crawl about the tree, and finally asten by inserting their long slender beaks, here they so pump up the sap that they row with surprising rapidity. In a few eeks the scale-like form is assumed, and the ollowing summer the eggs are developed;

and soon after the scale, which is but the car- case of the once active louse, drops from the tree.—*A. J. Cook.*

THE FRIEND.

SIXTH MONTH 14, 1879.

A notice recently appeared in the public papers, of one of our members having been brought into difficulty in the State of Dela- ware, for the observance of our testimony against hat-honor. On inquiry, we find the circumstances were as follows:

He had been summoned to attend the court at New Castle, as witness in a civil suit. On the opening of the court, the order was given for those present to take off their hats. As he continued to keep his hat on, the erier and stipstall both called to him to take it off. He then left his seat, and went to one of them, and explained his objections to so doing. The erier conducted him to the witness room, where he remained till his name was called.

On again entering the court-room, the judge and erier both ordered him to remove his hat. Turning to the judge, he said, "I keep it on from conscientious motives, considering it [uncovering the head] an act of worship due to the Most High." The judge still insisting, he replied, "In my native county of Delaware, Pennsylvania, I have many of my people live, it was not expected, and I was surprised on coming here to find it was required."

Judge. "We always require it as a mark of respect to the court."

Witness. "I intend no disrespect to the court."

Judge. "I know you intend no disrespect, but you must take your hat off, and if you will not, the erier must take it off for you."

The erier accordingly removed the hat. We see no good reason for the persistence of the judge in enforcing his order, unless there is some law on the subject in Delaware, different from what prevails in other States of the Union. When we reflect that its territory was formerly under the government of William Penn, who himself suffered greatly because he could not violate his conscientious convictions, by uncovering his head in honor of any man; and that ever since it has numbered among its influential citizens many claiming to be members of our Society, and bound by their profession to observe its testimonies; it seems strange that such a law should have been enacted, or that it should have been allowed to remain on the statute book, violating as it does the rights of a portion of its citizens.

There are some of our younger members who have thoughtlessly fallen into the habit of taking off their hats as a token of respect to others. It would be well for these to consider the ground on which our worthy forefathers in the truth suffered so severely, even to beating, imprisonment and loss of property, for declining to give to their fellow man an honor which they considered due only to their Creator. They believed the rendering of such homage to man proceeded from an unworthy servility, that its origin was corrupt, and that it either tended to foster pride and self-esteem in those who received it, or else was an unmeaning show.

Those of our members who depart from our

long-established practice ought to remember, that their unfaithfulness adds to the burthens of the more consistent members, and that if we do not steadily maintain our testimonies, the right to live in accordance therewith may soon come to be denied. Then those who may be drawn, as our early members were, to a faithful rejection of all that is tainted with evil, may be compelled again to contend for their rights through suffering, as was done in the rise of our Society.

A similar case to the present one occurred in this city in the year 1872. From the issue of our Journal of 10th mo. 5th, of that year, we quote the following comments, which are as applicable to the present case as to that for which they were written:

"Were this extraordinary action in accordance with or sanctioned by any law of the State, it would be a disgrace to the place and the age, betraying a lingering existence in the community of that persecuting spirit which once filled the goals of Great Britain with innocent Friends, because they would not violate their conscientious scruples in order to gratify the pride and unjust demands of cruel and vindictive judges; and in New England goaded on high professing Puritans to hang ministers of the Gospel of Christ, because they presumed to set their feet within the limits of their jurisdiction, after they had forbidden them to come."

Since 1872 we have heard of no instance in these parts, in which a Friend has been ordered to remove his hat, until the present occurrence. If the State of Delaware has a law in force which authorizes such an act, we trust it will not long be permitted to remain un repealed.

The London Friend for the Fifth Month, contains a notice of a volume of "Sermons by Robert Barclay, Author of 'The Inner Life of the religious societies of the Commonwealth,'" edited by his widow. In this notice it says:—"The sermons in this volume are not complete, they are little more than notes—helps towards the arrangement of the speaker's thoughts before-hand. We feel sure, from what we have been told by one who heard some of them delivered, that they give a very imperfect idea of the earnestness and force that often attended Robert Barclay's ministry."

This seems to imply that R. Barclay was in the practice of studying out and arranging the matter of his discourses "beforehand," as is done in most cases by those of other denominations who undertake to preach to the people at stated times. It is a practice altogether inconsistent with the views of Friends, who have ever believed, as is expressed by his ancestor, Robert Barclay the Apologist, that in times of public worship, "The great work of one and all ought to be to wait upon God; and returning out of their own thoughts and imaginations, to feel the Lord's presence, and know a gathering into his name indeed, where He is in the midst, according to his promise. And as every one is thus gathered, and so met together inwardly in their spirits, as well as outwardly in their persons, there the secret power and virtue of life is known to refresh the soul, and the pure motions and breathings of God's spirit are felt to arise; from which, as words of declaration, prayers or praises arise, the acceptable worship is known, which

edifies the Church, and is well pleasing to God. And no man here limits the Spirit of God, nor brings forth his own counsel and gathered stuff; but every one puts that forth which the Lord puts into their hearts; and it is uttered forth not in man's will and wisdom, but in the evidence and demonstration of the spirit and of power."

We do not doubt that persons may be brought under a preparatory religious concern on particular subjects by the Head of the Church; but the true minister of the Gospel will have no liberty to cast off his burden by expressing it in public till he feels the right exercise of spirit produced by a Divine power, and knows the command given to proclaim the Lord's message to the people. When under this sacred influence, he may be required to bring forth out of the Lord's treasury things new or old,—those which had not been resting on his mind before; or those whose weight he had long felt. But in either case, it will be in the freshness of the present feeling.

SUMMARY OF EVENTS.

UNITED STATES.—The steamer Illinois, of the American Steamship line, made her last voyage from Liverpool to Philadelphia, in nine days, one hour, and five minutes—one of the shortest trips on record.

A survey of the Delaware river, from Bridlesburg to the mouth of the Schuylkill, has just been completed. The hydrograph consists of many thousand soundings, and the chart, when completed, will give the depth of water in every part of the harbor; the location of all the bars and shoals, and the conformation of the shore line, and the high and low water lines; and will give at a glance the most important information to all interested in the navigation of the river.

In order to prevent future inundations of the meadow lands in the southern part of the city, it is proposed to construct a wall from Girard Point to the mouth of the Schuylkill. The stone for this purpose is to be furnished from the House for Correction grounds; and the work performed by inmates of that institution. The wall is to be 40 feet thick at the base, 20 feet at the top, and 12 feet high, and will be faced with stone two feet in thickness. The estimated cost \$24,000.

The Arabian horses presented by the Sultan of Turkey to General Grant, on the occasion of his visit to Constantinople, arrived in this city last week. The animals were selected as two of the best steeds in the imperial stable, and during their journey have been treated with marked consideration. They are said to have made the long voyage without showing any signs of discomfort or fatigue, and to be in perfect trim and models of beauty. The fifteen hanks high, of graceful, well-bred, though strong wiry necks, and of a compact body, with soft skin and shiny coat; the manes and tails dark and very long; the neck is arched, and the head held very high.

On the evening of the 6th, eastern Pennsylvania and New Jersey were visited by a violent thunder storm, accompanied in some sections by hail. Comparatively little damage was done in this city, but in the country many trees were uprooted, and growing crops seriously injured by the hail.

Severe frost throughout Wisconsin on the night of the 6th, was destructive to corn, potato- vines and vegetables. Heavy frosts occurred on the 6th and 7th, in northern New York, New England, and Canada. Snow fell at Troy, N. Y., Sandwich, N. H., and Quebec.

The first flow of oil from the Bradford oil district, through the Tidewater Pipe Company's pipe, reached Williamsport last week. The oil which flows through more than a hundred miles of pipe, is received in tanks, and is shipped to the seaboard, over the Reading Railroad, about to commence.

It is stated the largest block of granite ever quarried in the United States, has recently been taken from a quarry at Vinalhaven in Maine. It is 59 feet long, 5½ feet square at the base, and 3½ feet square at the top. It cost \$17,000 to blast it and move to the shed where it is to be finished.

The total tonnage of anthracite coal from all the regions for the week ending 31st ult., was 593,136 tons, or more than double that for corresponding week last

year. Prices are firm under recent advances of about 25 cents per ton. The Philadelphia and Reading Coal Company announces its entire product for this month is sold.

The iron workers' strike at Pittsburg is estimated to have thrown out of employment in the iron and collateral trades, from 35,000 to 45,000 people, while \$25,000,000 capital is idle in Allegheny county. The strike also affects iron mills elsewhere, that belong to the same association.

The Senate has passed the bill authorizing the District of Columbia to issue \$1,200,000 5 per cent. bonds, at not less than par, to fund debt now becoming due.

The Senate Finance Committee, by a vote of 4 to 3, decided to postpone the consideration of the silver bill till the first Second-4 day in 12th month next.

The U. S. Treasury has prepared a statement showing that the total reduction of the interest-bearing debt, from 8th Mo. 31st, 1865, to 8th Mo. 1st, 1879, when the funding process will be completed, will be \$583,886,594, and the annual reduction in interest charge will be \$67,203,919. The reduction of the public debt, less cash in the Treasury, between 8th Mo. 31st, 1865, and 6th Mo. 1st, 1879, was \$729,249,103.

During last month 18,109 immigrants arrived at the port of New York, against 12,213 during corresponding month last year. During the twelve months ending 5th Mo. 31st, 1879, there were 92,801; for the previous year the number was 71,091.

In New York city last week, 490 deaths were reported. In Philadelphia 274.

Markets, &c.—U. S. sixes, 1871, registered, 104½; do. coupon, 107½; do. 5s, 104; 4½ per cents, 100½; 4 per cents, 102½.

Cotton.—Sales of middlings reported at 13½ a 13½ cents per lb. for uplands and New Orleans, and 14½ a 14½ cents.

Petroleum.—Crude 7½ cts, in barrels, and standard white 7½ a 8 cts. for export, and 9½ a 10½ cts. per gallon. For home use. Lined oil, American, 61 cts, and Calcutta 62 a 63 cts. per gal. for city oil, 47½ a 48 cts; sperm, crane, 77½ cts, bleached white, 79 a 80 cts.

Flour.—Minnesota extra, \$1.50 a \$1.70; Penna. and Ohio extra family, \$5 a \$5.25; patent, \$7.25 a \$7.75; other high grades, \$7.75 a \$8. Rye flour, \$2.87 a \$3.10. Corn meal, \$2.40. Bran, \$1.50 a \$1.22 per ton.

Grain.—Best wheat, \$1.13 a \$1.14; amber, \$1.16 a \$1.17; white, \$1.17. Rye, 38 a 60 cts. Corn, 33 a 41 cts. Oats, mixed, 35 cts.; choice white, 38 a 40 cts. per bushel.

Fresh Fruits.—Strawberries, 4 a 12 cts. per quart; cherries, 6 a 10 cts. per pound. Gooseberries, \$1 a \$1.50 per bushel.

Seeds.—Clover seed, 5½ a 6½ cts. per pound. Flaxseed, \$1.40 a 1.45 per bushel. Timothy, \$1.45 a \$1.50.

Hay and Straw.—Prime timothy, 65 a 75 cts. per 100 lbs.; mixed, 50 a 60 cts.; straw, 75 a 85 cts.

Beef cattle.—Extra, 5½ a 5½ cts.; good, 5 a 5½ cts.; common, 4 a 4½ cts. per pound. Sheep—4000 head arrived and sold at 3 a 3½ cts. for common, and 4½ cts. for extra. Hogs, 3 a 5½ cts. per lb., as to quality.

FOREIGN.—At a meeting of the South Staffordshire Mining Drainage Committee, it was announced that owing to the debt of £40,000, the Fifth district, at the pumping engines would be stopped. The effect of this would be the flooding of collieries for miles around. A meeting of all the colliery owners was called on the 11th, to consider the position of affairs.

The Times of the 6th inst. says, speculation in silver has apparently run its course for the present. A correspondent informs that during last month 108 new companies were registered, with a capital of £7,500,000. This is something like a revival of joint stock speculation.

The steamer Faraday, will commence loading the new French Atlantic Cable on the 10th inst., and sail about a week later. The shore ends, and Brest and Sicily connections will be laid first. The Faraday will then return to the Thames for the deep sea cable, which is being manufactured at a rapid rate. The route for this cable is by the way of Brest, the Island of St. Pierre, off the south coast of Newfoundland and Cape Cod. It is expected the line will be open for business before autumn.

The British steamer Devonshire, which arrived at Liverpool on the 4th inst., from Philadelphia, lost 155 head of cattle driven to a gate at sea.

The total value of minerals and metals obtained from the mines of Great Britain in 1877, reached £38,281,405, viz: £18,742,950, the value of the metals; £47,113,767 coal, and £2,424,679 minerals.

France and England have agreed to abstain from interference with Egyptian administration, and will not receive the appointment of European Ministers, or

Comptroller General, but they will hold the Khediv responsible for the consequences of his acts.

It is said that Germany has informed England France that she leaves to them the political part of Egyptian question, and desires only to defend financial interests of German subjects.

Official reports from Cashmere say, that it is impossible to exaggerate the distress the famine is can there. Thirty-five hundred tons of grain are no transit to the valley of Cashmere.

Intelligence from Irkutsk says, the Amoor river its tributaries have overflowed. Much damage has been done, and it is thought a famine will ensue.

Solvovief, who attempted the assassination of the Czar has been condemned to death.

The eruption of Mount Etna has almost ceased. Flow of lava has completely stopped. The Chamber Deputies has voted 500,000 lire for the relief of sufferers by the eruption, and the inundation of the

strike among the workmen in the timber trade which began at Sundswall, Sweden, has now extended to all parts of the district on the Gulf of Bothnia. Sixteen thousand men were idle at last accounts.

WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the General Committee is to be held at the school on Fourth-day, the 18th inst. S. A. M.

The Committees on Instruction and Admissions; at the school on the preceding evening, at 7 o'clock. The Visiting Committee meet at the school Seventh-day, the 14th inst.

For the accommodation of the committee, conferences will be at the *Street East Station* on Seventh-Third-days, the 14th and 17th inst., to meet the train that leave the city at 2.30 and 4.40 P. M.

SAMUEL MORRIS,

Philada., 6th mo. 24, 1879. (Cler)

A competent teacher is desired for Friends' School Crosswicks, N. J., to commence about 9th mo. 1st.

Application may be made to BARTON F. THORNTON, JOS. S. MIDDLETON, Crosswicks, or SAMUEL ALLINS, Yardville, N. J.

FRIENDS' SELECT SCHOOLS.

Wanted a teacher for the Girls' School. Applicants may be made to

John W. Biddle, No. 726 Bampton Street,

Ephraim Smith, No. 1110 Pine St.

Rebecca W. Kite, No. 459 North Fifth St.

Hannah Evans, No. 322 Union St.

FRIENDS' ASYLUM FOR THE INSANE.

Now Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOHN C. HALL, M. D. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

Obit., at his residence near Pennsville, Morgan O. DUBO, on the 19th of 3rd mo. 1879, DAVID BALL, in 82 years of his age, and member and elder of Hope Particular and Pennsville Monthly Meetings. He was firmly attached to the ancient doctrines and testimony of the Society of Friends, and although his removal from works to rewards was sudden, his friends are comforted in the belief that it was his daily concern to fulfil standing as with his loins girded and his lips burning, so that whenever account might be rendered joy at the coming of his Lord.

—, on the 5th of 5th mo. 1879, at the residence of Wm. H. Moon, near Morrisville, Bucks Co., JOSEPH WATSON HIBBS, of Roaring Creek, Columbia Co., I

in the 79th year of his age, an esteemed member of Money Monthly Meeting. Although so remotely situated, that he was prevented from the regular attendance of meetings, he was concerned to maintain our principles and practices, as held and maintained by worthy forerunners. In his last illness, which short, he was preserved in passive submission to Divine will; not a murmur escaped him, and he calms and peacefully awaited the close of his earthly career.

—, at his residence in Penn's Manor, 5th mo. 14 1879, after a short illness, EDWARD BALDWIN, aged 45 years, an esteemed member of Falls Monthly Meeting of Friends, Bucks Co., Penna.

WILLIAM H. PILE, PRINTER,

Life and Adventure in Japan.

BY E. WARREN CLARK.

(Continued from page 345.)

The houses are plain wooden huts with paper sliding-doors, matted floors on which people eat and sleep, and roofs covered with thatched straw, without chimneys, and having holes at the top to let out the smoke. Babies were sprawling around on the floors, strapped upon their mother's backs like an Indian's papoose. Sometimes the baby's head was shaved, with tufts of hair left upon the sides and back of the head; at other times the child wore a little red cap, which I used to think quite pretty until I found it signified small pox!

The "hotel" at Hakoné was like most of the others we stopped at on the Tokaido; the landlord was very polite, and the women of the house favored us with loud demonstrations of welcome by uttering a chorus of strange sounds we could not understand.

Our coolies turned us out of the kangos on the porch of the hotel as though we had been wheel barrows; and taking off our shoes, as all Japanese do on entering the house, we walked across the clean straw mats to the inner apartments prepared for us.

Japanese houses are only one or two stories high, but cover a great deal of space, and have many rooms, separated from each other by same-work and sliding-doors covered simply with rice paper. All these sliding-doors can be thrown open at once, making one large hall, so that from the street you can look straight through the house to the garden behind. The kitchen is at the very entrance, so that in coming in you pass through an array of pots and kettles, and see the women boiling rice and frying fish over a fire kindled in the floor, or in a stone fireplace where there is no chimney. Unsavory odors greet you of unmentionable Japanese dishes, and you are glad to escape the noise and smell by striding to your room, which faces upon a small garden; here you sit upon the floor and rest as well as you can, in the absence of beds, chairs, sofas, or common comforts. My cook prepared supper from the preserved provisions brought with us in tin cans, and every thing was served on tiny little tables, scarcely a foot high, in dishes no larger than saucers.

After tea soft quilts were spread upon the floor of the guest-chamber, which is one foot

higher than the other rooms, and a wooden pillow-block, with a little round roll on top of it was placed at the head of the pile of quilts for a pillow! When I played my neck on the pillow-block I felt as if I were about to be decapitated; but they covered me with a great stuffed quilt, shaped like a coat, with arms two feet wide that flapped over me. Then they hoisted a great mosquito-net, and tucked the edges under me to keep away the rats! I wondered at this, until I rolled from under the net, and found the rats at midnight playing tag over my face! Nor could I drive the creatures away until I struck a match, when they fled at the light.

The appearance of the Tokaido throughout this section of the country is splendid; it is lined all the way by a double row of massive and magnificent pines, whose overhanging branches have shaded the generations that have journeyed over this road for centuries. These old trees are among the most pleasing and interesting features of the whole country, and I like to hear the wind sighing through them, as though it were mourning over some strange and unknown scenes of the past. Passing through the villages so early, it was a peculiar sight to see all the houses shut up in front, their weather-beaten sliding-doors fitting into each other so closely as to make the whole town look like a succession of windowless barns.

We stopped at a large tea-house, where breakfast was served in better style than usual, and then we reclined on the broad veranda overlooking a garden where dwarfed trees, miniature mountains, and rippling cascades were all placed in an incredibly small compass. We fed the finny tribe in the gold fish pond close to the veranda, and then sent out for "Jin reka shas" or man-power earriages, and resumed our journey southward. The "Jin reka sha" is a two-wheeled vehicle, more than twice the size of a substantial baby-carriage, and is usually drawn by two men. One man gets into the trills, the other runs ahead with a rope. Both are finely tattooed with pictures pricked into the skin with ink of various colors. These pictures are similar to those seen on Japanese fans, but are more elegantly executed. These fellows are very strong, and I have often had a single pair of them carry me forty miles on a stretch! They would stop every three hours to eat rice and refresh them-selves; in this way they would run a whole day without showing signs of weariness.

The little carriage has a cushioned seat and short springs, but in going down hill where the road is worn rough from the rains you are liable to be bounced out if not very careful. Should a storm come up, you are protected from the wet by an oiled silk top drawn up over your head, completely covering you; through a little flap you can look out at the storm and see your coolies with dripping straw coats splashing through the mud.

The long journey drew to a close as we approached the suburbs of Shidz-u-o-ka. Several turbulent rivers had been crossed in flat-boats, propelled by bamboo poles, and I now the last relay of Jinreka-shas had been given up, and we found ourselves entering the city, mounted upon jet black Japanese ponies sent out to us by the local officials. The directors of the Scientific School met us some distance down the road, and bade us welcome.

The Buddhist temples usually occupy the most picturesque sites, enshrined among thickly shaded groves, and secluded from the noise and bustle of the large cities. Approaching them through an avenue of trees, or ascending the hill-slope, you may see their massive roofs, carved pagodas, and huge bell-towers rising abruptly through the green foliage. The very atmosphere of sacred solitude surrounds them.

In one of these temples I was destined to live during my first year in Japan. With all its heathen rites and pagan darkness, I yet learned to call it my home. Under almost the same roof with me were the priests of Buddha and the idols, before whom incense was continually burning, filling the house with fragrance. The grounds of the temple covered several acres, and contained nearly a dozen buildings. Some of these were temples, others were small shrines, and the central building was a temple and dwelling combined. Here most of the worship was performed by day and night, and here I lived.

Several massive gates led into the grounds. Under the largest stood two grim warriors, carved in wood and painted plaster, measuring fifteen feet in height, and holding giant spears, bows, and arrows, with which to guard the sacred portals of the temple. Colossal pines shaded the walks, and bamboo groves skirted the hill side. To the left stood a Buddhist cemetery on the terraced slope of the hill. A great bronze bell in the tower tolled solemnly and slow, with a deep booming sound, every evening when the sun went down. The priests were very polite, and sent me fresh tea raised in their own garden, and boxes of eggs and sponge-cake. I thanked them, sent them some preserved peaches, and invited them to attend my Bible class!

In fact I had a Bible-class, even in this stronghold of heathenism, with nothing to interrupt except the noise of the gongs and the pagan worship of the adjoining temple. On the very first Sabbath,* at the request of many of my brightest pupils, I explained the teachings of Christianity to as earnest and intelligent a body of young men as it was ever my privilege to address. They listened for more than two hours to a careful presentation of Christian truth, warmly thanking me at the close, and gladly accepted a copy of the Scriptures, when I gave each one of them,

* The First-day of the week—improperly termed Sabbath.]

promising to study the chapter assigned for the next Sabbath.

The happiest memories I have connected with my long exile in the interior of Japan, are those of the hours regularly spent with my Bible-class. The eagerness with which the truth was received, the affectionate gratitude manifested by all who attended, the solemn assurance which the Divine Spirit gave of his presence, and the consciousness that I was presenting Christ to those who had never known Him, but would soon rejoice in his salvation, filled me with awe and yet with enthusiasm, and gave an unction to my words far above the secular teachings of the week-day lecture room or laboratory.

Of the difficulties experienced in presenting spiritual truth to minds entirely unaccustomed to it, and through a strange language, I need not speak; but all obstacles were gradually overcome, and the students would write me grateful notes during the week, asking questions on the subject discussed, and usually closing with short exclamations like the following:

"These are golden truths you are giving us, and they satisfy the soul," said one student. "I have got very great important points yesterday, of which you have spoken to us from the faith," wrote another. A third wrote, "Alas! my grandmother has died without knowing the greatness and glory of our God, and the comfort of the blessed Gospel of our Saviour Jesus Christ."

(To be continued.)

" For The Friend."

Watch over the Tender Lambs.

"Train up a child in the way he should go, and when he is old he will not depart from it."—Pro. xxii. 6.

Various and important are the duties and obligations resting on the children of men in their daily walks through life, not only in observing a proper care in their temporal pursuits, to "provide things honest in the sight of all men," but also in maintaining a close adherence to the governing influence of the "Spirit of Truth" in each of their hearts, that ability may be afforded to "go in and out" in an exemplary manner, in the presence of those with whom they "have to do."

How great is the necessity that parents, and those having the care of the young and rising generation, should keep their proper places, both by example and precept, in order to be successful in the right training and instruction of those over whom an all-wise Providence has placed them. Very injurious effects, it is feared, are often produced on the tender minds of such, by their being habitually directed or reproved, in a mood of impatience or boisterous tone of voice. Where this is the case, a similar disposition is begotten, and fostered in the children, which is not only productive of a feeling of resentment and disregard towards their parents, but also of a selfish and overbearing manner of communication amongst themselves. As "like begets its like," so they, in speaking to each other, will partake of the feeling, and imitate the tone in which they are accustomed to being spoken to by those in authority over them. What a contrast appears between families thus trained, and those who are nurtured under the discipline of love and mildness, and the continual attractive influence of kind words! What beauty and excellency there is in a spirit of meekness, gentleness, and love,

combined with dignity and firmness in the government of a family. Whether encouragement, reproof, or restraint becomes the line of duty, these "weapons are mighty" and effectual, through Divine assistance, "to the pulling down of strongholds" of sin and temptation in the hearts of the dear children.

The responsible station of a delegated shepherd for the training of souls for a never-ending eternity, is an awfully solemn one indeed. Oh that there might be an earnest seeking, "first for the kingdom of God, and the righteousness thereof," humbly trusting in the merciful promise that "all things necessary will be added;" that the Lord might be sought unto early in life, and found to be "a present helper in the needful time" before the responsible place of parents and guardians over precious souls, should overtake them. In the commencement is the time, while the "twigs" are yet young and tender, that a qualification for "bending" them aright is so essential, and specially important; for an opportunity *then* lost, may be lost forever: once pause and consider—but *one* life to live—but *one* family to train—no second trial on a mistaken course; and the accountability *great and sure*; and as "it is not in man that walketh to direct his own steps aright," how great the necessity to trust in the Lord, and daily seek his presence and aid; for how can any know a preparation for training up the "lambs" entrusted to their care in the right way, except they have first learned to walk in the right way themselves? No stream can rise higher than its own fountain head, so neither can parents rightly instruct their children in spiritual things, unless they have known something of the qualifying operation of the Spirit within themselves. "Without me," said our Saviour, "ye can do no good thing;" how then is it possible that any can be capable of directing others in that "strait and narrow way" which themselves have never yet walked in or known? Where "obedience keeps pace with knowledge," and the Spirit of the Lord is felt to be near, how easy it then is to perform known duty, but in the absence of *this*, how utterly impossible.

"Trust in the Lord with all thy heart, and lean not to thine own understanding," is a beautiful and wholesome pointing of duty, and worthy to be heeded in all our movements; therefore, ye who are yet in the earlier walks of life, with your interesting little flocks around you; be humble; be watchful; be earnest in your searchings after good, that you may feel your spiritual strength renewed in times of need; ever remembering that "the Lord is good," and very near to those who "diligently seek him," and will reward for every rightly directed effort. Remember it is written that "the little foxes spoil the tender vines." Keep near *to that* which will hold in check the proneness of natural affection to indulge; and enable to watch carefully over *these*—the early budgings of a relish for forbidden things; that which fosters pride in the heart, and mars the tender begettings, there.

Oh that parents would more seriously consider these things; that they would dwell more inward; and more sensibly feel their great responsibility. That they would more earnestly seek to know the way of Truth for themselves, and thereby be brought not only to feel the importance of observing the wisely written words, "Train up a child in the way he should go, and when he is old he will not

depart from it;" but also to appreciate and experience the truth of the kindred language: "He that would train up a child in the way he should go, must first go in the way would train up a child."

5th mo. 31st, 1879.

Redemptioners.—In a recent number of *Lucy's Progress* is a sketch of the life of Alham Peters, who is now living and enjoys a competency at the advanced age of 88 years, near Millersville, Lancaster Co., Pa., which contains an incident which took place at Chester about seventy years ago. In those times the poor Germans who wanted to come to this country but had no money to pay the passage, contracted with the captain of a vessel, so that he was allowed to sell them into servitude for their passage money, these people were called Redemptioners. The time above referred to, Abraham Peterfather was in the habit of hauling grain from Lancaster county to Wilmington, Del.; on one occasion, as he was going there, sister requested him to buy a small German girl from a vessel for her. The vessel stopped at Chester. So after he had disposed of the grain he mounted one of his horses and rode to Chester. He went on board an emigrant vessel, and as he spoke German he was surrounded by a crowd, each one requesting to be bought, as they preferred to get to families where German was spoken. He called the captain and made known his errand. The captain told him he had two small German girls on board, their mother having died on the voyage. He asked forty dollars for the two; but as Peters only wanted one and could take but one on horseback with him, the captain said he would charge twenty-five dollars for one, and if he sent him a purchaser for the other he would give her fifteen dollars.

He describes the scene when these two German girls were parted as most affecting, he assured the remaining one that he would try and find her a good home. Before parting the girls were going to divide their dear mother's effects, but Peters would not allow this, as he assured them that Katy, the girl he was taking with him, would find plenty, and therefore insisted on the other keeping all except the clothes that Katy was wearing. Agreeing to the captain that he would try to find another purchaser, he started for Wilmington, and was soon on his way home. He had proceeded but a short distance from Wilmington, when he met a Quaker gentleman and his wife driving to town. The latter saw the girl, and admiring her, stopped and wanted to buy her. But Peters told her that he had bought the girl for his sister, and therefore could not sell her, but told her of the little sister that was left behind on the vessel, and requested them to go to Chester and buy her. He gave the gentleman a few lines to the captain, and reminded him of the fifteen dollars he had agreed to take.

The Quaker promised to go and buy the sister. They gave each other their addresses, and promised to write and keep the girls in communication with each other. Katy was installed in her new home, and grew up to be a fine woman. Her sister also found a good home with a Quaker family. Correspondence was kept up between the families, and yearly visits were made alternately with the girl, and very friendly relations sprung up between

families, which were kept up long after girls were free. When Katy had served her time and arrived at the proper age, was married to a worthy baker in Philadelphia. These incidents illustrate how some of our early settlers came to this country, too poor to pay their passage, but they were honest, industrious, and of good habits, and their offsprings are scattered through the fern counties of this State, composing some of our most prosperous and respectable families.—*Jeffersonian.*

For "The Friend."

Letters of James Emlen.

(Continued from page 341.)

Date omitted. * * * I should be very glad to attain to more evenness in my course, and to be unduly cast down with desertion, or at ease by favors received. I remember one Friend in high esteem, after passing through a season of close proving, remarked in a letter to a Friend, that she had found holes and corners she had never thought of; and I such I can truly say has often been the case with me—so that I could say indeed 'all my righteousness is as filthy rags.' But such ravings lead us to appreciate more highly the dear Saviour's righteousness with which we seek to be clothed. It not only teaches us the repetition of these trials, we may hope, all *little* us in the uniform habit of mind, attributing all praise where it is due, not to ourselves, but to our Lord; but unto my name give glory, &c. It is a great thing to be thoroughly delivered from self in all his hidden as well as open appearances—to die to ourselves and to be renewed in the life of righteousness. It is a state I fully believe and I hope aim after, but am very sensible lacking yet. * * * To be members of the same family with those who have gone before us, and to be gathered home with them at the end, would be the height of my desires. In the mean time it may be wise in us to cherish a willingness to fill up all our measure of suffering, mentally or otherwise, for our own and the body's sake. * * * We can hardly expect to abound in the present condition of the church, and if we can but possess our souls in patience, it may be as much as we can ask—not doubting if this is done we shall witness resurrection.

"I have been reading dear Samuel Fothergill's Memoirs, and although I have read portions of them before, I did not know they were such a treasure—so rich and instructive. Reading, latterly, has not been so much relished as feeling; I have known a state that could not live upon the labors of others—must labor for myself or starve—but reading this work has been reviving; he seems truly to have grown up to the stature of a perfect man a Christ; but oh! what a view it gives me of myself! dear man, he had been forgiven much and therefore he loved much."

* * * I retained those letters to let Anne see them—she was a good deal affected with reading dear Francis's remarks about the loss of her little Francis, and I have no doubt she was favored to feel congenial emotions, accepting the dispensation as ordered in best Wisdom. I thought when reading it, what a favor to have such a friend as thou had in Susan—so artless, and yet so ardent, as well as her friendship as her devotion: both proceeding from the Fountain that is inexhaustible. I often fear that my life has been one

of too much profession in a religious way—too much for the fund of grace within, and I have much desired, if this has been the case, that I might be preserved in future—preserved from being more in show than substance. Such, I believe, was not dear Susan—one of the many hidden ones, who are as the 'bone and sinew' of the body, the church, and who though they may now be esteemed as 'the last,' will be found among 'the first' in the end, when the secrets of all hearts are revealed. * * * Dost thou not think it is very important that we know what it is to 'Take counsel of the Lord and not of man, in these fearful times? how much, even of the welfare of souls, may depend upon it!"

"Stm mo, 22d, 1853.—It has been a strength to me in the prospect of going with —, to find so many appearing to unite with it. When the thought first glanced through the mind, it was, as it were, a dark cloud; but I found by watching it, the darkness passed away, and ended in a pleasant little shower of humble and peaceful resignation; but I thought as 'he who believeth maketh not haste,' I might safely leave it with Him who I have no doubt often brings his followers to this point, as a trial of their allegiance. Finding, however, after it had passed the Quarterly Meeting, that no one had yet offered, I felt most easy to inform — how the matter had been with me, and since then I have continued to feel peaceful. When it first presented it felt as a little offering that was more needful for myself, than it was for dear —, or those to whom she may be sent, and I only crave that I may be preserved from doing any harm to the cause, and be enabled to hand the cup of cold water in the true spirit of a disciple. It has indeed felt to me very much like the time referred to when there was nothing but a 'few barley loaves and some small fishes' remaining amongst us. There is a great deal of noise and outward profession in the Christian world, but the animated eye must see that if all the chaff—all except the solid wheat were sifted out, *little* would be left—and yet that little, with the divine blessing, may be sufficient; and therefore our faith must not be in the wisdom of man, nor in the multitude of words, but in the innocency, simplicity and humility of the Truth itself and the power of its operation.

It is often a comfort to me to think of thy filling the position thou dost, though thy constitution is feeble, yet it is not upon our own strength we have to rely. He who said, 'I profess unto you I die daily,' said also, 'I can do all things through Christ who strengtheneth me.' A deep sense of our own weakness is entirely consistent with a lively faith in divine help and power. This I have no doubt thou hast mercifully experienced—more of this experience is what we all need, and need to abide under.

"I was sorry to learn from —, that the boys' school is more unsettled than usual. Oh! for something to reach and subdue the untoward spirit of our too thoughtless youth! how sad to think of such liberality—such uncommon favors of many kinds being bestowed upon our children, and they not appreciating them! It feels to me as though it was time to pray for them as with the heart of one man, lest all our labor should be in vain."

Patience is an important requisite to a holy life.—*Upham.*

Young Friends at Watering Places.

The season is now approaching when many, in search of health or pleasure, visit some one of the numerous mountain or sea-side resorts in this part of the country. With many of those that do so, it is a matter of necessity, to seek relaxation from business cares during the summer months. Among those thus obliged to leave their homes for a short period, are many young people; and it is to these I would venture to suggest a few considerations connected with this subject.

A large number of the class I address, when they visit such a place, are introduced into the company of a great many strangers, whose education and manner of life have been totally different from that of the young Friend, who suddenly finds them to be his or her companions for a few days or weeks. They are often fashionable people, who, by their actions show, that they think wealth, fashionable attire, and worldly pleasures are indispensable to true happiness. The amusements that they indulge in may be right for them; but it is not so with the young Friend who has been taught otherwise, and on whom accordingly rests a greater degree of responsibility. Unless he is very careful he may (almost unconsciously perhaps), partake of the spirit that animates his associates; and there is thus danger that when he returns home, he may have acquired a disinclination for the simpler amusements which he had previously delighted in. He may have permitted himself to receive impressions that will ripen into a distaste for serious things; and a desire for a more worldly course of life that shall neither prove an advantage to himself or his friends, nor yield him one whit more of genuine pleasure than he had known before.

Young people at summer resorts occasionally attend places that they would deem hurtful at home, persuading themselves that having such an opportunity to see gayety and the fashionable side of life, it will not hurt them this once, and no one need know anything about it. They forget that those influences which are not desirable at one place, are equally detrimental to their good at another; besides, they are frequently observed by others when least suspected. They may thereby induce some of their friends to forget their responsibility as members of a religious Society that professes the necessity of keeping "unspotted from the world."

It is a great cross to be brought into contact with intelligent people, who yet cannot understand the motives inducing Friends to adopt a plain dress, an unassuming behavior, and the simple language of the bible; but I have observed that while they may not appreciate the reasons, they will generally respect those who show they do so from principle, and not from a desire to be peculiar. On the other hand, when they see youthful Friends altering their conversation to suit their company, or ridiculing the distinctive testimonies of the Society, they cannot fail to think there is nothing in these testimonies, or else secretly pity the individual who proves himself ashamed of them.

There are many healthful and enjoyable ways of passing the time at a summer resort; and there is such a thing as properly indulging in the attractions that such places afford, without violating either the moral or Divine laws. The chief thing is to be watchful, and

this state has to be maintained everywhere; but probably nowhere more than in society composed of men and women, bent on pleasures, and relief from the cares of life. Those who maintain their watchfulness through the inevitable temptations that accompany watering-place life, will, when they return home, feel a satisfaction in having done so. They will realize, that having kept to the cross under unfavorable circumstances, they themselves have been preserved from evil, and from bringing even a shadow of reproach upon the Society of Friends.

The Ever-Watchful Eye.—Looking from my window one day, I saw a little boy in the very act of putting out his hand to steal some flowers. He seemed to be quite unconcerned, as though he had never been taught how wicked it is to steal; but, catching sight of a pair of eyes looking at him, he quickly drew back his hand, ashamed and frightened, and ran off. As soon, however, as he thought himself out of sight, he was doing the same thing again, and, there being no one near enough to prevent him, gathered as many as he wanted and went away.

There are, I am sorry to say, many who, like this child, are bold and forward in doing wrong, when they think no one is near to see them, but tremble with fear and shame if they find any one has been looking on. They are perhaps very careful to make sure that no one is near to see them, but they forget to look on high, where God's throne is, and from whence the Bible declares, "His eyes behold, his eyelids try, the children of men."

"God is in heaven; can He see

When I am doing wrong?"

Yes, that He can; He looks at thee

All day and all night long."

I have heard of a little boy who had learnt of God's all-seeing eye. He had a wicked father, who compelled him one night to go with him when about to commit a robbery. The father, when he arrived at the spot, was very cautious to look everywhere round about to make sure no one was near to see him, and, being satisfied there was not, would have completed the theft, when his little boy said, "Father, there is one place where you have not looked." The startled father exclaimed, "Where, child?" "Up in the sky," replied the boy, "for God is always looking at us." The would-be thief was so much affected at hearing this truth from his child's lips, that he was obliged to give up his wicked intention.

Remember this, my young readers, that God's piercing eye sees everything we do; and I desire you may be made to look up when tempted to do wrong, and consider, "Thou God seest me." And God's eye not only sees all we do, but looks into our hearts and sees all our thoughts, for his Word says, "God searcheth the heart."—*Ep. Recorder.*

An Orr.—The necessary union of prayer and work is well illustrated by an anecdote of Dr. Maclod. He was on a highland loch one day, when a severe storm arose. He was a large powerful man, but his companion was very diminutive. The danger was so imminent that the good doctor proposed that they should all engage in prayer. The chief boatman, who was tugging with all his might, replied; "Well, well, let the little one gang to pray, but the big one maun tak' an oar."

TEARS.

Selected.

It is raining, little flower,
Be glad of rain,
Too much sun would wither thee,
'Twill shine again;
The clouds are every black, 'tis true,
But just behind them shines the blue.

Art thou weary, tender heart,
Be glad of pain,
In sorrow sweetest things will grow,
As flowers in rain;
God watches, and thou wilt have sun
When clouds their perfect work have done.

Selected.

On being asked after a religious meeting if there were any strangers there?

Yes, the stranger of Galilee stood at the door
While our spirits were gathered within,
We knew his sweet men—He had been there before,
And we joyfully welcomed him in.

Then He looked with an eye most merciful love,
On the few he had drawn to the place;
And the incense seemed fresh from his dwelling above,
As he breathed forth his heavenly grace.

For his presence so rested on each softened heart
With an effluence truly divine,
That the smallest and meanest partook of a part,
And longed on his love to recline.

And they felt in the silence and awe of his might,
That the holy Baptizer was there;
That John had departed indeed from their sight,
But a greater had come to declare,

That as never man taught, must his lesson be learnt,
That his fan is to cleanse us within,
His fire—a reprover that secretly burned,
His laver—a washing from sin.

Oh we long that his lesson of life-giving power
May rest on our spirits as dew,
That oft it may please Him, that worshipp'ing hour
In mercy and love to renew.

Then no guests from afar will be needed to tell
Of the fount, or the mountain of prayer,
For deeper by far than Samaria's well,
Is the fountain of life that was there.

Self-Righteousness.

Mary L. Whately in her book entitled, "Among the Huts in Egypt," relates a conversation which took place during a visit she paid to some poor Bedouins in Egypt on the borders of the desert. She had met with them on some former occasions, read to them from the Arabic Bible and endeavored to interest their feelings in the subject of religion.

She says: "The party are by no means prepossessing to the eye, it must be owned; they are exceedingly dirty and miserable-looking, and one or more has always bad eyes, and the grandmother certainly never can have become acquainted with soap and water during the whole of her life; nor is the seat offered to their visitor inviting, as it consists of an old goat's hair cloak spread over the rubbish outside the huts. However, the welcome was, as always, hearty and cheerful; many were the inquiries after all the mission family, the school, &c., and, finally, a new baby—a little brown atom, rolled up in a curious medley of rag—was introduced to me, and I was requested to take it in my arms. I, of course, complied, not forgetting to utter a blessing in the name of God aloud, so that the mother might have no fear of the evil eye!

"Have you brought the book?" then asked the old blind woman. "Oh, yes, here it is." She felt the volume with her fingers, and reverently kissed it; then, commanding the chil-

dren to be quiet, we began the reading, with an end-avored, as usual, to make as easy possible to their ignorant minds, by select the plainest portions of the gospel."

"When I spoke about all men being sin the blind man gave a grunt, which plain showed he did not approve the doctrine; fact, his self-righteousness has long been, a believe, the stumbling block that hinders accepting the truth. 'But, Suleyman, I see if you don't disobey one of God's command you disobey another; if a man, for instance doesn't steal but tells lies, or if he doesn't tell lies but gets into a passion, is he then no sinner?' 'Well, that is true,' he allowed. 'Does not the little child, as soon as it can speak, begin to show sin by anger, by selfishness, and other things?' 'Yes, yes, indeed the mother interposed, and the rest nodded in agreement, while I went on to try (not the first or second time) to show them how greatly we needed a Saviour, since we were sinful and could not save ourselves. 'No Suleyman, do you know any friend who would die for your sake?' I said at last. He gave a short incredulous laugh as he replied, 'No, no, lady; no one in the world would do that.' I suppose no one would care so much to poor blind Suleyman as to give his blood for his sake?' 'No, truly; no one!' he repeated. 'Yet that is just what our Lord Jesus did, Suleyman!' He died, as I often have to you, that all sinners who believe in Him at trust Him may be saved and forgiven, and made happy for ever in heaven. You heard this from me before, and from all of us, but perhaps you forgot it, or else you did not understand that it was for you, as well as others, that our Lord came to die. It is His Spirit that sends me to speak to you, and to you these things! 'Wonderful indeed!' said the blind man. 'Ay, it is wonderful!' True! God's love is very wonderful; and yet you don't seem to believe in it. Some will say you can be saved by your own good deeds; others by fasting and pilgrimage; others by the prophet: none of these really believe in God's love. It is only He who can save us. 'Praise God!' ejaculated Suleyman. 'Al but it is not saying that which will save your brother; it is not speaking, but believing God's word, and giving Him the heart.'

"The woman (his sister-in-law) now interposed, and said, 'Sitt M., I will show what mean by a parable' (or example); the word is the same in common Arabic.' Suppose she continued, 'that I did not love you—it is only a story, you know, for I love you truly—but suppose you were a kind lady, and yet still I did not love you, from something in my heart; if my heart was hard—how shall I say it; but you know what I mean—what then could I do?'

"I see," said I; 'you mean that you can't love God because your heart is hard by nature like this,' and I tapped on the great stone water jar that lay beside me; 'is that so?'

"Yes, yes," she cried, striking the jar; 'that's it; story!'

"Then, dear sister, I have a word from God exactly for you!" I said; 'only listen, and then I quoted, as well as I could from memory (for I had not a whole Bible with me), the text from Ezekiel, 'I will take away the heart of stone, &c.'

"Ah, that is good indeed," she said; 'it is sweet!'

"Now, why I wrote down this conversa-

(which is given exactly as it took place, somewhat abbreviated) was, that self-consciousness being deeply ingrained in all tents, it was exceedingly rare to hear any real like this."

"For The Friend"

Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 349.)

6th mo. 14th, 1843.

My dear friend, Jos. Elkinton: * * * It is easy to forget thee—we sincerely love—whom we feel that precious unity which proceedeth from the true and living Vine. I do not remember that I ever felt stronger desires for the growth and prosperity of my friends in the ever blessed Truth, than since I have been separated from them. See, no distance, doth not diminish that precious love which proceedeth from the inextinguishable Fountain of all good. I trust I have been favored to feel something of it at times, and feel bound to acknowledge great been the merciful dealings of the blessed Master with me since I have been here. I am pretty comfortable, and at times have been made to rejoice. My "sittings," although not so comfortable and strengthening as of late, I have had the company this morning James Bucktooth, whom I thought a promising Indian in best things.

In sincere love I remain thy friend,

EBENEZER WORTH.

the same.

7th mo. 20th, 1843.

Thinking it would be right for me to acknowledge the receipt of George Williams' letter, I thought I would write a few lines to thee, and as an excuse for my not writing more frequently, while I have been favored, unmerited mercy, to feel that precious love and unity to and with my dear friends, (the Religious Society of which I am a member), I felt my dear friend particularly so, I felt my time is not my own, that it would be best for me to feel after that true qualification, and to attend to my duties in this place; I had at times felt so poorly qualified, that I had had time, it would have been a trial to me to commence writing. As I have been attending over the reservation I have often thought of thee, and how thou must have felt in the early part of thy services in this place, thinking thy trials were greater than mine, and can easily believe that nothing but sense of duty was the cause of thy continuing here so long as thou did. I have also often thought of my friend Robert Scotton, and his various trials in this place; and have thought, were it his proper place, it would be pleasant for me when I return home in the evenings, to have his company and at times his advice and assistance; notwithstanding my sincere desire for our dear friend it is that we may faithfully discharge his duty in the place pointed out by the Divine Master, for that, I believe, is the only place where we can truly suffer. If it is the will of the Master to call another—or a man and his wife,—I could be glad of society and help, but can say "His blessed will be done." Our time and talents are of so much importance that it is a precious thing to misapply them, therefore I do not wish to see any one come, except as sent by the Master.

In love I remain thy friend,

EBENEZER WORTH.

To the same.

12th mo. 19th, 1843.

In the last letter received from Thomas Evans, he mentioned that thou wast indisposed. Since receiving this information I have often thought of, and felt much sympathy with thee; at the same time I feel comforted in the belief that thou knowest unto whom thou should look for help, and upon whom to lean in the day of trial—having tasted and known in a good degree that the Lord is good, I hope thou may still in unmerited mercy be favored to feel his life-giving presence to be with thee, which can administer help and true consolation in all our trials, and cause that all things shall work together for good. Oh! that we did but love Him with all our hearts and all our minds, we should then, I believe, be enabled to love our neighbor as ourselves. In this precious feeling we should be drawn near together in spirit, although far separated in person, and experience that precious unity which is in our beloved Master, the great Head of the Church; being engrained into Him, in Him we should be strongly united one unto another, and as long as we keep an abiding there, I believe his Holy Arm will be as a wall about us, which will bid defiance to all the powers of the enemy, and we should be enabled as a religious body to journey forward in the strait and narrow way which leads unto life; at times and seasons rejoicing in the Captain of our salvation.

Although I have been for a considerable time deprived of the privilege of meeting with my friends, having attended but one meeting at Collins' since our friend Robt. Scotton left, my "sittings" have nearly always been truly refreshing and comforting. While attending to the school at Cold Spring, which I taught for some time, I had sittings with the scholars on Fourth days, when I have been sometimes surprised at the quiet orderly behavior of the children. Before commencing I have often felt so weak, I would have been glad to have felt excused from sitting with them and been alone, desiring only the company of my Divine Master; but I think I have always been satisfied after giving up to it. * * * While I would be sorry that any of our members should come here without first feeling it to be their proper place, if it was the will of the Master to send one, I should be glad of some help; but after all, all help and strength cometh from above.

In sincere love I remain thy friend,

EBENEZER WORTH.

(To be continued.)

"For The Friend."

The writer has been interested in the subjoined illustrations of the fundamental truth, that it is the Lord's power alone that can change the heart of man; that whoever may be employed in planting and watering in his church, that to Him we must look for any increase of spiritual fruit; and that He does not withhold a blessing on the labors of those whom He prepares and sends forth as laborers into his vineyard.

"This endowment of the Spirit, this holy baptism, has remained with the Church in all ages. With what power did the apostles give witness to the resurrection of Christ! How society was revolutionized, and the very customs of earth changed! Men in high places, as well as in low places, trembled at the

preaching of Paul. Ephesus was in an uproar, and Athens was moved. They said at Thessalonica, "These that have turned the world upside down are come hither also." I hear the apostle always exhorting us to triumph in Christ, and maketh manifest the savor of his knowledge by us in every place." How successful was the loving John in winning souls for his Master; and with what power did Peter preach while the Holy Ghost fell on them which heard. We know but little about the earlier centuries, and yet the names of an illustrious few have been handed down to us who shined like stars upon the darkness of the world. What power was given to St. Ambrose! See the multitudes that gathered around St. Chrysostom! How they hung on their lips! How eagerly did they wait on his ministration! Erasmus said of him: "I know not whether we are to admire the indefatigableness of the man or of his hearers!"

"Under the preaching of Luther immense multitudes were swayed, and all northern Europe was agitated. Under the preaching of Wiclif, or rather the missionaries whom he sent out, England was also stirred to its depths. Knox with his burning words inflamed the mind of Scotland, as well as made its queen to tremble.

"John Howe relates from Dr. Goodwin how he had heard Rogers preach when the house was crowded, and such was the influence, that he put all the congregation in so strange a posture that he never saw any congregation in his life. The place was a mere Boehm, the people generally as it were deluged with their own tears; and he told me that he himself, when he got out, and was to take horse again to be gone, he was fain to hang a quarter of an hour upon the neck of his horse weeping before he had power to mount, so strange was there an impression made upon him, and, generally, upon the people.

"Look at the vast multitudes that attended the preaching of a Whitefield, and the longer continued ministrations of a Wesley. See how thoroughly society was stirred to its very foundation—how the colliers from their sooty pits listened with uplifted faces and streaming eyes to the words of life, and how the rabble on the commons, though like wild beasts in their lawlessness, were tamed and sobered under their preaching."—Bishop Simpson.

J. F. Hanson Organizing Friends' Meetings in Denmark.

LETTER FROM J. F. HANSON.

Dear friend Daniel Hill:—A few days after our last account those professing with Friends at Veile and Horsens were called together and an organization effected by holding a district meeting, combining the functions of a Quaker Church and the executive powers of a Monthly Meeting. The meeting was established to be held quarterly, alternating at Veile and Horsens, and will exercise care over the Society in Southern Denmark. The meeting was a blessed season from the Lord. As Friends know but little of order there were several matters to consider, and some regulations were adopted for the exercise of disciplinary care in the churches. Two of each sex, the most suitable, were appointed overseers, who will exercise the functions of caretakers and feeders of the flocks in their respective meetings. Eleven new members were received, mostly young, earnest people who have counted the cost and are willing to bear

the ridicule incumbent upon a decided follower of Christ in this land. Among these is a family who had been a-sociated among the Baptists for thirteen years (but not members), who could not quite accept the Baptist teaching of immersion. When they heard our exposition of baptism of the Holy Spirit they accepted the truth with all readiness and seem to be perfectly at home among Friends. Many precious meetings were held at their home a little out of Veile. Friends have also hired a comfortable room in the town for their regular meetings. We feel thankful for the abiding evidence of deep and substantial work in that vicinity that the Lord will cherish with his own blessing.

We held a few meetings at Horsens where a very few members reside, who, together with some attenders, hold a meeting in a private house. After a six weeks' stay in those southern places we moved our quarters to Randers, some four hours north from Veile.

Four members have resided at Randers for some time, and some others who claim to hold with Friends for a while after E. and A. Cowgill passed through here. They met together, but the non-members being unwilling to bear their part of the responsibility, the meeting soon collapsed. We began holding public meetings for the exposition of doctrine, and private meetings in houses for experience and personal efforts. The latter meetings have been much blessed. Some have found Christ and others a better experience of purity of heart and holiness of life.

We have no hope of building up the Society here or any where else on the foundation that not a few stand on. They are able to see all the faults and crookedness of the existing state church, and at the same time have no foundation of saving faith or practical holiness of life for themselves. We meet these wherever we go, and sometimes it is harder to get them out of their security than to waken the open sinner.

A prominent family who had long opposed all organization, yet professed to be much attached to Friends, did at last see the necessity for good order and government. They gave their names for membership. We believe this will break down the barrier which has stood in the way of others. The membership is now ten at this place, with several others who will attend the meetings. We may hope they will be able to hold meetings to the honor of truth by the divine blessing which is promised. We also held three temperance meetings in Randers, the first of the kind that had been held there. Thirty signed the total abstinence pledge and have begun work to counteract the wide-spread and desolating弊 of intemperance every where prevailing.

Looking over our stay of three weeks at the last named place, we cannot say that we moved the whole town, for the people seemed to be much more interested in theatres and amusements than anything else, and like every other military rendezvous, a military glare blinds the people, so they see but little else than what pleases the eye and ear. Yet we feel the Master has owned our coming and stay at Randers, and many souls were glad and praised the Lord for what they had seen of his loving care. We left the place with reluctance, having become much attached to the dear ones left to struggle in the battle for the Lord.

Reaching Aalborg yesterday, we were met

by our dear friend Lassens, at whose house we are stopping, and where we find an open door to go in and out among the people. But few can understand the different privations we labor under in reaching the people, and so little congenial association. It takes very few days to take off the novelty of a visit to a place. We become the observed of all observers, and various opinions pass upon us and our work. Some say they tell the truth, but we must not own it; others say they ought to be stoned; others say they praise God for sending us. Pray for us.

Thy friends, J. F. AND A. HANSON.

Aalborg, Denmark, 5th month 7, 1879.

—Christian Worker.

Religious Items, &c.

At the recent Yearly Meeting of "Hieksite" Friends of Philadelphia, their discipline on the subject of temperance was altered by the introduction of the following clause—"Friends are earnestly entreated as far as their influence extends, to prevent the sale of intoxicating liquors as a beverage, and not to sign applications to license inns or taverns for that purpose, and when any of our members do sign such applications, it shall be considered a violation of our Discipline."

The subject of establishing a Boarding School under the care of their Yearly Meeting for the education of their children was considered and referred for attention to the next Yearly Meeting.

The same course was taken with a communication from Illinois Yearly Meeting proposing a conference of all their Yearly Meetings to be held once in five years or oftener, for united labor to advance the cause of morality and kindred subjects among men.

Presbyterian General Assembly.—At the late meeting of this influential body, the Committee on Bills and overtures reported upon the resolution condemning the act of church members attending theatres and operas. Attached was the following resolution:

Resolved, That, in view of the increased attendance of church members at the theatre and opera, the Assembly bears earnest and solemn testimony against this practice, as inconsistent with Christian duty, since it not only gives countenance and support to an institution justly described by a former Assembly as a school of immorality, but is in itself spiritually hurtful and tends to obliterate the line which should always be plainly visible between the followers of Christ and the world.

The committee also reported the following:—That the General Assembly, believing that the practice on the part of Church members of reading secular papers on the Sabbath day is alarmingly on the increase, and believing also that it is a grievous injury to the personal piety of the readers, and a serious obstacle to the cause of Christ in every community, would deprecate the practice, and would urge upon all who love the Lord and desire the spread of His Kingdom in the world, to refrain and to do all in their power to discontinue it.

We are glad to see these testimonies to practical religion.

D. L. Moody recently said in Boston, that the Christian life was a battle. He started with the idea that after he was converted all he had to do was to fold his arms and "float right along into Heaven." But he soon found

that the Old Man was not dead in him, that the flesh still lived, and that the world, the devil were yet alive. From his experience and from careful reading of the Bible he learned that when a person is converted has only enlisted; the weary marches, hard fights, the wilderness, the deserts, the mountains are all before him.

Reformed Episcopal services have been opened at Peterborough, England, and several clergymen of the Anglican Church have been applied to Bishop Sguden to be received into the Reformed Church. New openings almost constantly occurring.

Sleepiness in Church Cured.—Under this title a writer in the *Primitive Christian*, published at Huntingdon, Pa., in the interests of German Baptists, recommends those afflicted with drowsiness to cultivate an earnest religious concern for themselves and others, to engage in much domestic labor before meetings, and on such days to eat sparingly, and of simple and easily-digested food.

The time of summer thunder-storms is again at hand. This year, as always, one set of holders will rush to the door or window in lofty mood of pleasure, regretting only that they cannot stand on the mountain-top to be in the midst of the grand battle of elements. Another set, as always, will carefully shut the doors and windows, and sit in the middle of the safest room in the house to banish the terrors of the storm without. There will be some cowardly souls among the first, and some brave souls among the second; for physical boldness is by no means synonymous with moral bravery. Be courageous in body and soul if you can, but never forget that the two lie on widely separate planes. The best use that can be made of physical courage is that of a type and a pattern for something higher.

Natural History, Science, &c.

The Starling.—*Curious Instinct of the Bird.*—I received the enclosed from John Oldham of Maresfield. It seems worthy of record as an example of perseverance under difficulties:—"I have been this summer on a visit to a dear friend (J. D. Bell) at Totterdell Park, Herts. He has a large school of over 100 boys, consequently a very large establishment, and the daily receipts of letters were large; he had to send about a mile for 1 letters, so he obtained permission to have a letter-box fixed in his park-paling, at the nearest point to the house (about 150 yards) as the postman passed this point, and it is on the side of a large shrubbery of many years growth. The slip outside the rails was about six feet high, and of course the box for the letters was a large square one, about eighteen inches by twelve. During the first week its being put up (this spring), twice each day the letters were fetched, and each time a double handful of small sticks and straw was thrown out of the box, which was attributed to mischievous boys on their way to school. After two or three days a messenger was sent round to the house with two letters found on the road, next day several more, and the rubbish continued to be put in the box, although twice a day thrown out. The letters being found on the road, caused J. D. Bell to set a watch for the boys, but none were seen near. Next morning the rubbish had been put in the box in larger quantities, a nest put

ne corner and a blue egg. Now, of course, starting was found out; she continued to add to the number until five, then commenced setting, and for several days a large number of letters were thrown upon it as she sat, the box door opened and the letters taken away, but she never left her seat as they took the letters off her back. A passer-by on the road must have discovered her, for one morning a stone was thrown and to have fallen and broken the eggs (not to a mischievous boy); the stone was thrown out, and when they went to clear the nest they found she was covering the broken eggs with flowers, dog-daisies, and primroses. A few days she formed a nest in another corner and laid four eggs. These were like the broken and covered with flowers. Then in another corner, and three eggs. These were also with stones dropped in, and the same process of covering up with flowers. Then in the fourth corner, she laid two eggs, and to her from the outside enemy we cut her piece out of the door. Here she was for a safe. She sat, and had two young ones; one nearly ready to fly, he heard a great creaking, as from the letter-box; he ran to and caught a boy 'jabbing' with a stick through the outside slip, the mother extending her wings to protect her young—one killed and the other slightly injured; the old bird was much bruised; she flew into a large jar tree just over her head, while he took the young one into his hand and stroked the wings into shape. After some minutes it flew into the tree to its mother, when the noise of a great quantity of starlings assembled the tree was astounding, quite deafening, and was the rejoicing over the one saved."—*and and Water.*

Platinum Vessels.—One of the most interesting objects in the late Exhibition at Paris was the collection of huge platinum vessels and apparatus, the manufacture of which marks one of the most valuable steps in the progress of the industrial arts. The preparation of sulphuric acid, the cheapness of which is so important a factor in the productions of the chemist, is largely dependent upon the use of platinum concentrating vessels, which are now produced of a size hitherto unknown.

Benjamin Silliman in a recent notice of some of the objects exhibited at Paris, says: "Formerly boilers or stills of platinum of large size were used, costing from \$15,000 to \$30,000 each, more frequently about \$20,000, at this very considerable amount of capital expended up in these costly vessels—of which several were required in each large acid works—was in the old manner of construction attended with a comparatively limited production of acid. Now, by a very simple modification in the form and mode of using the platinum boilers, their cost is greatly reduced, and the daily product of concentrated acid at the same time very much increased. The new boilers are rectangular in shape, with corrugated bottoms, which offer extended surface, with additional strength and evaporating power. By the new system of manufacture, autogenous soldering of all the joints is accomplished by the oxy-hydrogen blow-pipe, and this work is done so neatly and completely, that the eye detects no trace of the lines of union."

"One may see to-day in the Exposition in Paris, the crucible now used for the fusion of platinum on a large scale, by a series of five

or six large jets of Hare's compound blow-pipe. The special apparatus exhibited is a block of chalk, of the Paris basin, about a yard long by a foot broad, and divided horizontally into two equal halves. In the upper half are the jets, placed equidistant along the length of the ingot mould, each provided with its pair of gum-elastic gas tubes and stop-cocks. The ingot mould proper is fashioned out of the lower half of the block, and its cavity is capable of holding an ingot of 250 kilos, (quarter of a ton) of molten platinum.

"The pile of beautiful, lustrous bricks—six as common house bricks—of platinum, fused by the oxy-hydrogen blow-pipe, is a sight to enliven the eyes of those who remember when the fusion of a globule of this metal as large as a pea was considered a splendid class-room experiment."

Rare Platinum Metals.—The same writer says: "Platinum is a metal found in the gold washings wherever alluvial gold is found, but usually in very small quantity. In the Russian mines of the Ural and in Siberia, it is found, however, in considerable abundance; occasionally in nuggets of twenty pounds weight, or even more, but usually only in grains and flat-tened scales, associated with gold and with certain other rare metals, familiarly known as the platinum-metals, with which the platinum is also frequently alloyed. These metals are chiefly iridium, osmium, rhodium, ruthenium, and palladium. The native alloy of iridium and osmium is familiarly in use for pointing gold pens, for which its remarkable hardness and unchangeable nature particularly adapt it. Fine specimens of this *iridosmine* are found in the gold washings of Northern California and Oregon, associated with platinum, but the quantity is not very considerable. It is with delight that the chemist sees in the exhibit of Johnson, Matthey & Co., large masses of these rare metals in a state of great purity, obtained by them in the preparation of a chemically pure platinum from its crude state. For example, there is a cubical block of pure ruthenium weighing two kilos, (about 4½ lbs.) the product of the treatment of about ten millions of dollars' value of platinum, and itself valued at 40,000 francs; a like mass of pure iridium, fused by the oxy-hydrogen blow-pipe; and the same quantity each of rhodium (fused ingot), osmium, and palladium (forged ingot).

"But more extraordinary for quantity is the mass of pure palladium, weighing 65½ kilos, and valued at 260,000 francs. This mass is composed of a great number of smaller masses, each representing a separate melt, and simply agglutinated into a large composite ingot, to obtain which about 125,000,000 francs' worth of native gold and platinum were worked over. No such mass of this precious and rare metal was ever seen before.

"Palladium has about the same value as gold (a little more), and is as yet too rare a metal to play any important part in the arts. Nor has it the beauty of gold, although it has certain physical and chemical properties, which give it a scientific value."

Theory as to Coal Mine Explosions.—Recent investigations into the causes of explosions in coal mines have developed a new theory as to the origin of many of them, which is plausible enough to draw to the attention of all who have any thing to do with the management of collieries. It is a well known fact that the dust of flour when in the process

of grinding, mixed with dry atmospheric air, produces an explosive compound, and though it is not so easy to demonstrate that a mixture of coal-dust and dry air brings about the same result, it is highly probable that this is the case. Certain it is that by combining with these two an exceedingly small quantity of fire-damp, the entire compound burns freely, and it is never safe in coal mining to assume that there is a complete absence of this dangerous article. The remedy for this is exceedingly simple, and this is to sprinkle the road and pathways in the mines plentifully with water. It is believed that in several of the English mines, where severe explosions have occurred of late, the failure to take this precaution was the chief cause of the disaster.

Telephone.—It is stated that at Manfield, O., an elderly woman, a devoted Christian and regular attendant at church, who has become an invalid, had a wire strung from the church to her bedroom and fitted with the necessary apparatus, and evening she listened to the Church service, receiving every word distinctly, though on her couch half a mile distant.—*Ch. Adv.*

THE FRIEND.

SIXTH MONTH 21, 1879.

The religion of Christ leads its followers to seek to promote the physical, moral and spiritual welfare of all mankind. It opposes war, slavery, intemperance, idolatry and superstition. Our members therefore naturally look with much interest on all efforts aimed at the removal of these evils; and rejoice in the success which attends these efforts. They feel disposed to lend a helping hand to those engaged in this moral warfare, and to enter the field as co-laborers, zealously striving to help forward the good cause.

But we hold peculiar views of the spiritual nature of true worship, of the need of a Divine call to the work of the ministry, and of a fresh bestowal of help from on High for every fresh exercise of ministerial labor, and of our dependence on the Lord's power, and help for any spiritual benefit to be conferred by us on others. These views were divinely opened as we believe to our forefathers in religious profession; and have been firmly held by all faithful members of our Society from their day to this. They are in part recognized by many Christian professors of other denominations, but not generally so fully and strictly as by the Society of Friends. Hence it follows that in the efforts to improve mankind made by these, there are nearly always some features in the methods adopted which a true Friend cannot sanction. However he may desire the end in view, he cannot do that which would be evil to him (with his views of religious truth), in the vain hope that good may flow from it.

We believe that Friends always make a mistake when they undertake to do the Lord's work in a way that is inconsistent with the doctrines He has given them to believe and uphold. Nor have we any faith, that the results of such deviations from a strict upholding of our original principles, will ultimately be found to have promoted the spread of the Redeemer's kingdom. Though some good may appear to have been effected by their

labors, yet we believe *more valuable* fruits would have been produced, if the labors had been regulated by a conformity to our principles.

Several recent communications have called our attention to this subject. One of these is a letter from England, which speaks "of the singing and other formal acts, such as the opening prayer in the schools," &c., in "the temperance and mission work carried on by active members" in that country. This letter however gives some encouragement, by adding, that several of the attenders have been made uneasy with these practices. It would be greatly to the benefit of these, if that which has made them uneasy should draw them into a real and deeper work of religion in their own hearts, so that they might become firmly established on the blessed Saviour through experience of his transforming and regenerating power in themselves. This would re-move all confidence in any efforts which were not felt to be under his direction and guidance, and would prepare and qualify them for real usefulness in his cause.

A notice of Salem Quarterly Meeting, Iowa, published in the *Christian Worker*, says: "A small body of Friends organized another meeting to be known as Salem Quarterly Meeting of Friends, which was held on the same days that our meeting was. The ministers that went with them were Harvey Derbyshire and Job Smith, the last named having recently removed from Pleasant Plain Meeting."

From another source we learn that this meeting will be in connection with that at Bear Creek, which separated from the main body of Iowa Yearly Meeting, a year or two since. We had previously known that at Salem, as well as in other parts of Iowa, some of the members had ceased to attend the meetings because doctrines and practices were introduced at variance with the original principles of Friends.

It is often claimed that the excitements and novelties which have given offence to concerned Friends, are merely incidents attending a true revival of primitive zeal and earnestness. We desire to be preserved in the spirit of charity, but we cannot admit this excuse to be any justification for an open departure from the principles of our profession, still less for an attack upon them. Therefore, when a person professing to be a minister among Friends publicly states in one of its meetings (and that in language more gross than we care to repeat), that the writings of our early Friends had caused the everlasting destruction of many of those who had read them, we do not believe that such a person ought to be either a minister or a member among us. When such abominable sentiments are allowed to be expressed, without an open disavowal of them by the officers of the meeting (as we are credibly informed was the case at this same Salem), it is no marvel that honest-hearted Friends should withdraw themselves and their families from exposure to the influence of such teaching.

SUMMARY OF EVENTS.

UNITED STATES.—Isaac Halfown, chief of the Seneca tribe of Indians, died on the 12th inst., aged 90 years.

During a heavy thunder-storm which passed over this city on the 11th inst., one of the buildings at the oil works of the Atlantic Refining Company, at Point Breeze, was struck by lightning and set on fire. The

flames quickly extended to other buildings, and to vessels at wharf, which were chiefly effective in preventing the spread of the fire, being unable to control that which had gained strong headway, and which continued to burn in different parts of the works for three days. Five vessels were burned, some of these partially loaded. The entire loss it is thought will approach \$500,000.

U. S. consul at Copenhagen, in his last dispatch to the Department of State, transmits a translation of a very interesting lecture on "Dairy Thrift" in Denmark. The lecture was delivered before the Royal Agricultural Society of Copenhagen. It contains the results of some experiments in making butter, of value to dairymen. The Royal Treasury contributed the economic lessons of the experiments, especially valuable in these hard times among the agricultural people. It is printed in the Danish language; the translation is in manuscript.

The first Mormon convicted of polygamy since the passage of the act of 1852, was sentenced at Salt Lake City the first, to two years imprisonment, and pay a fine of \$500.

Advices from San Francisco state, the work in the sub-drain of the Sutro Tunnel is being vigorously pushed forward. Although three quarters of the work is completed, 500 miners and carpenters are still employed. It is expected the waters from the flooded tunnel, will be discharged into the tunnel on contract the 20th inst. The time is looked upon with interest by the whole mining population, as marking a new era of prosperity for the miners of the Comstock Lode. Since the water flooded the Savage and adjacent mines four years ago, the lower works have remained submerged. A few weeks pumping it of extracting ore has commenced.

The Treasury Department is now ready to fill orders for standard silver dollars in sums of \$500. Under previous regulations not less than \$1000 could be procured on orders.

The returns to the Department of Agriculture indicate an increase in acreage of cotton of two per cent. over last year, but the average condition of the crop is not so good. Reports from the Pacific coast indicate the wheat crop considerably above an average, whilst from most other sections, the prospects are below an average. Drought has been more or less severely felt in all parts of the country.

Several districts of our country have been visited by severe storms during the past week, which have uprooted trees, demolished buildings and seriously damaged growing crops. An eye witness of the recent terrible storm in Kansas says, the cloud from which the wind and rain seemed to come, was in the shape of an immense inverted funnel, of a dark bluish color, and itself. The funnel appeared to float along with its bowl close to the ground, occasionally bounding high in air and almost disappearing for several seconds, when it would again drop to the earth. When it thus leaped into the air, whatever was upon the earth under it was left unharmed.

The deaths in Philadelphia during the past week were 128 adults and 111 children, 43 of whom were under one year of age.

The annual rate of mortality, according to the most recent weekly returns, in Calcutta was 34; Bombay, 37; Madras, 20; Paris, 20; Geneva, 25; Brussels, 20; Amsterdam, 27; Rotterdam, 31; The Hague, 27; Copenhagen, 29; Stockholm, 28; Christiania, 23; St. Petersburg, 43; Berlin, 24; Hamburg, 30; Dresden, 23; Breslau, 31; Munich, 40; Vienna, 34; New York, 41; Rome, 21; Naples, 31; Turin, 25; New York, 22; Brooklyn, 20; Philadelphia, 18, and Baltimore, 14.

A further decline in the volume of exports, and an additional increase in importations, as compared with last year, are the main features of last month's returns of foreign trade to this port. These are regarded as signs of home prosperity.

Markets, &c.—U. S. sixes, 1881, registered, 104½; do. coupon, 107½; 5s, 1881, 103½; 4s per cent, 106½; 4 per cent, 102½.

Cotton.—Rates of middlings at 134 a 13½ cts. per lb. for uplands and New Orleans.

Petroleum.—Crude 7 cts. in barrels, and standard white 7 ½ cts. for export, and 9 ½ a 10 ½ cts. per gallon for home use. Lined oil, 61 a 62 cts. for American, and 62 a 63 cts. for Calcutta; Lard oil, 42 a 53 cts.; sperm, crude, 67 cts., and winter refined, 90 a 93 cts.

Fresh Fruits.—Peaches are beginning to arrive, and sell at \$2 a \$4 as to size of crate and quality of fruit,

Strawberries, 5 a 12 cts., as to quality. Cherrie 12 cts. per pound. Gooseberries, \$1 a \$1.50 per box.

Flour.—Minnesota extra, medium and fancy, a 55 cts.; Penna., do., at \$3 a \$5.50; western do. \$5.50 a \$6, and patent and other high grades at \$7.25. Rye flour, \$3.12½.

Grain.—Wheat, Penna., and southern red, \$1.18m, \$1.16½ a \$1.17; white, \$1.18. Corn, 40 cts. Oats, mixed, 39 a 40 cts. per bushel.

Hay and Straw.—Prime timothy, 70 a 80 cts. per ton; mixed, 50 a 75 cts.; straw, 75 a \$1.00 per pounds.

Beef cattle were dull, and prices ranged from 20 to 25 cts. per pound, as to condition. Sheep, 31 cts. Hogs, 5 a 6 cts. as to quality.

FOREIGN.—The Parliamentary committee's report on electric lighting says, sufficient progress has been made to encourage the belief that electricity has an important future for illumination, and as a source of chemical power. The electric light, even in its present state of development, may be advantageously use large areas whether open or closed; but it is not so matured, as to compete with gas for domestic purposes. The committee, therefore, does not recommend the extension of applying the light to private property, but does recommend that a restrictive act should be allowed to impede its further development. It considers that for light-house purposes, the electric has established itself, but does not consider the evidence proves that electric lighting is economical as compared with gas.

The directors of the City of Glasgow Bank have received a dividend of 6s. 8d. in the pound, and one of 3s. 4d. is promised, making 10s. in all, or one of the claims.

Bullion in the Bank of France has been increasing steadily during the last two years. *Le Temps* accounts for the large proportion which silver bullion has assumed, which places the bank in competition with its competitors, and partly by their competition, and also, by its cells being a refuge for the depressed silver.

On the 14th, the Senate at Versailles discussed bill providing for the return of the Chambers to Paris. Legislation of the Council supported the bill. The Government, he said, would be answerable for the maintenance of order. The Minister of Public Works, in a rejection of the bill would be tantamount to a vote of confidence in the Government. The bill was passed a large majority.

The Prince of Orange, heir apparent to the throne of the Netherlands, died in Paris on the morning of the 11th inst., in the 39th year of his age.

From an account published by the French Ministry of the Interior, it appears the number of French subjects who are leaving their country to settle abroad, is reducing year by year. The total number of registered emigrants, in 1877, was 3666, in 1876, 2867, in 1875, 4161, in 1874, 7000, 7590 in 1873, 9500 in 1872.

What is to be the largest bridge in Europe, expected will be completed next year. It will cross the Volga in the Government of Samara, Russia, the Siberian Railroad. The river at the point of crossing is four miles wide in the spring, and 4732 feet in the autumn. The cost of the bridge will be about \$10,000,000. Twelve piers 85 feet high, 364 feet apart will support the structure.

CORRECTION.—In the Extracts from Diary, of Ebenezer Worth, on page 349, in the third line of the article, "new relatives" should be "near relatives" and on the second column of the same page, "W. Rudolph" should be "West Rudolph."

FRIENDS' ASYLUM FOR THE INSANE, New Franklin, (Twenty-third Ward), Philadelphia Physician and Superintendent.—(JOHN C. HALL, M. D.) Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, 2nd month 5th, 1879, BENJAMIN M. HOLLEMAN, in the 80th year of his age, a member of the Northern District Monthly Meeting of Friends.

—, at her residence in Marlton, New Jersey, 5th month 9th, 1879, MARY EVANS, in the 78th year of age, a member and elder of Crowell Particular a Upper Evesham Monthly Meeting.

Life and Adventure in Japan.

BY E. WARREN CLARK.

(Continued from page 354.)

Shi-mo-jo, my favorite interpreter, lived with me at the temple; he was the brightest and most interesting young Japanese I ever met, and I learned to love him as a brother. He was invaluable to me in a thousand ways, and I bestowed great care on his education. His scientific studies he made rapid progress, and at my daily lectures in the class-room he rendered the work of instruction delightful by his clearness and enthusiasm with which he could expound to others the most abstruse scientific subjects.

But his health was delicate, and to my great regret he died in his twenty-fourth year, just when he was entering a life full of usefulness and promise. Over his grave, in a Japanese cemetery in Tokio, was raised a large stone, with touching inscription written in Chinese by his friend Nakamura; and having at the close complete statement of the Christian faith, the hope and comfort of which Shimo-jo had.

Two little boys also lived with me; one was the son of Governor Okubo, and the other the son of the captain of a Japanese ship of war, which went down in the last naval battle fought in 1865 by the forces of the Tycoon. When the father of this little boy saw that his ship was going to sink, he sent his men away in the boats, and then set the ship on fire, and drew his sword and committed "haka-ki-ru," which the Japanese consider a very brave and honorable way of terminating life.

Perhaps you may wonder how I occupied myself during these long months away from society and civilization, without seeing an American or European face for half a year at a time.

You may even imagine that I had an easy and dreamy existence, in the midst of shady trees, fragrant incense, and oriental repose. On the contrary, I never before worked half so hard as I did during the months of exile in the interior of Japan. With an institution of nearly one thousand students, under the supervision of a single foreigner; with fifty Japanese assistants to direct and instruct; with classes in various scientific departments, both theoretical and practical; with interpreters to be drilled, regulations to be made and

enforced, experiments prepared, and lectures given through the threefold medium of English, French, and Japanese, you may believe I had my hands full.

My regular duties at the school began on Christmas-day, as much time had been spent in getting settled. During Christmas week the heathen festival occurred of offering first-fruits of the earth to the pagan deities, so that three holidays were given. We began again on New-year-day, and I made out a programme of studies, which was accepted and printed in Japanese. I said nothing respecting the [First-day of the week], but left the space blank; the officials inferred my wishes, however, and inserted the word "rest." It was quietly done, and an order was issued changing the previous arrangements, and closing the school on that day.

I usually rose at six o'clock in the morning, and after breakfast the horses and guards would appear at the gate. Passing across the little garden, with its dwarfed trees and gold-fish pond, I would mount my jet black Japanese pony and gallop down the road, preceded by my "bet-to" or groom, and followed by the guard. The "bet-to" was a well-formed young fellow, naked to the waist, and splendidly tattooed with colored figures and dragons; he ran like a deer, and always kept ahead of the horse, clearing the road by a peculiar cry, which made everybody get out of the way. The distance from my temple to the school building was more than a mile, and as I frequently went over the ground four times a day, it was sometimes necessary to go very fast.

When I got tired of riding horseback—for the Jap ponies are very spirited and hard to hold—I borrowed a four-wheeled foreign carriage, which I found the ex-Tycoon had brought to the city. This carriage was the only one in the whole province, and was a great curiosity to the Japanese. It had been presented by the Dutch to the Tycoon, and now that it was no longer needed, he lent it to me, with the horse that had been trained to the harness. But Shidz-u-o-ka roads were never made for carriages, so the governors caused the way to be widened by building new bridges and small embankments.

If you could have seen the bewildered amazement of the natives as my chariot wheels dashed by their doors, you would suppose something frightful was coming. Mothers were running for their babies in the middle of the road, peasants flying into the ditches, ducks cackling, dogs barking, and stones rattling—all mingling in the wild *mélée*. Yet nobody was hurt.

The two-sworded men on the road would prostrate themselves before the carriage thinking that the ex-Tycoon was coming; but when they heard the laughter of my guards as we passed, they looked very fierce and straightened up immediately. They were as wrathful in the end as they were reverential in the

beginning. These were the men who disliked foreigners.

At the side entrance of the school are shelves upon which are ranged hundreds of wooden clog-shoes, which the scholars have taken off on entering; instead of a hat-rack (of which there would be no need), you see a sword-rack, with pegs in it, upon which rows of small swords are re-tied, some of which are sharp and elegantly ornamented. These belong to the Samurai scholars within, who, though small, are proud of their rank, and are entitled to wear swords in their little belts, with the ancient family crest on their clothing.

On entering the part of the building where Japanese instruction is going on in the old-fashioned style, you hear a great buzzing sound, such as might come from a colossal beehive, and as the noise gets louder and louder you can distinguish the shrill voices of several hundred youngsters, who seem to vie with one another in studying aloud their Chinese and Japanese lessons.

In the school you would not see any thing that even approached disorder, and there was an air of refinement about the commonest-clad child. The scholars wore loose dresses with long sleeves, which served as pockets, and in which they carried tops, strings, oranges, and rolls of brown paper, or any thing they needed. They tied up their books in pieces of cotton or silk, and carried them home to study at night in the same noisy way. All this loud study of former days simply filled their heads with long passages from classical Chinese and Japanese books, which they memorized by rote, without understanding half they studied. They had to learn a great many "moral precepts" also, such as obedience to parents and the elder brother, respect for the aged, worship at the graves of their ancestors, offerings at the shrines of pagan gods, and stories of romance and robbers, which were calculated to teach bravery and give them contempt of death.

The scholars in the Japanese and Chinese department came to school at six o'clock in the morning and were dismissed at nine. They also came again at five in the afternoon. My own classes of the more advanced students commenced at nine o'clock and continued until noon; then I arranged the apparatus and experiments in the new laboratory built for me, preparatory to the afternoon lectures, which began at two o'clock and continued until five.

I wrote chemical formulas, and drew diagrams on the large black-board, which were copied by the students while I went home to dinner. On returning I would find fifty or sixty young men seated in the large lecture-room, ready for the experiments and the lecture in chemistry or physics. These young men were nearly all about my own age, enthusiastic in their pursuit of science, and diligent in their studies to a degree that aston-

ished me. They mastered with facility textbooks that had taxed all the energies of American college students, and were so thorough and devoted to their work that it was a pleasure to teach them.

The government had been very liberal in providing suitable scientific and philosophical apparatus, so that all the principles and problems in chemistry and physics could be proved and illustrated before their eyes. The experiments were at times a little dangerous, but the Japanese delight in excitement, and would face without fear the most hazardous "demonstrations."

One may easily imagine with what astonishment and delight these people (who had hitherto known nothing of science and the marvellous inventions of our age) viewed for the first time the wonders of electricity, the steam-engine, the air-pump, the startling results of chemical combinations, and all the powers and appliances of modern physics. No wonder that rumors floated about among the common people outside the school that either I had "the gods" or "the devil" in my laboratory, they didn't know which! While I was performing my experiments, Shimojo, my interpreter, would explain the principles to those students who only understood Japanese; other students were taught in French or English. Between the three languages we usually got along very well: they always asked a great many questions.

Earthquakes are very frequent in Japan, and often occur at night. Sometimes I would be aroused from my sleep by a strange motion of the bed, as though its four legs were about to walk off with me! On listening, I would hear the heavy timbers in the roof creaking, and the whole building groaning and shivering like a ship at sea. Still, as there was no storm raging outside, I could not sometimes imagine what the commotion meant, until, on lying perfectly quiet, I could feel the earthquake waves passing under the temple at intervals of two or three minutes each. Usually there are three waves, and the second is the most severe; so, if the first shock was heavy enough to shake things up badly, I would scamper out of bed, and try and get from under the massive roof of the temple before the second wave would have a chance to bring it down on my head. These roofs, being made of stone tiles, are exceedingly heavy, and are supported simply by uprights standing on the ground, without any foundation; in fact the whole building stands on wooden legs. As the earthquake wave passes under, these timbers slip and creak and make a great fuss, but do not fall. When they do fall, however, woe to the unfortunate people who happen to be underneath! In the destructive earthquake in Tokio, some years ago, more than sixty thousand persons perished by the falling of these tiled roofs and the opening of deep crevices in the earth.

(To be continued.)

If we wish to rise in God, we must be willing to sink low in ourselves. It may seem like a contradiction in terms, but it is nevertheless true, that there is no elevation in true religion higher than that of profound humility. He that would be the greatest must become the least. He who was equal with God condescended to become man; and it was the beloved Son of the Most High that washed the feet of the disciples.—*Thomas C. Upham.*

Some Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 357.)

1847. 2d mo. 10th. A considerable portion of last week was spent in preparing to commence suits against a number of persons for selling intoxicating drink to the Indians. Frederick Aldridge and Isaac Higgins were arrested and brought before the magistrate (Allen Cammel) yesterday, whose court was held at the school-house at Cold Spring, to commence at 10 o'clock, A. M. I think in mercy I have in a degree been humbled under the weight of the business I have (at the request of the "Peace-makers") engaged in, and at times felt weakness and discouragements. In the morning, when we met for trial, the appearance of things was discouraging; some of the witnesses had gone to Cattaraugus, we had strong reason to believe to avoid giving testimony; I also received a letter from the United States agent (saying) he could not attend on account of other business; we had expected him to attend to the suits for us. After reading the letter, I concluded to go and meet the constable and request him not to serve the warrants. I met the magistrate, he said in all probability one of the warrants had been served before that time. Joel Hall, one of the overseers of the poor, was with me; we turned about, thinking we would have to do the best we could and go on with the cases commenced. When I returned the "Peace-maker," who I had left at the school-house, had gone. I understood William Hall, the Presbyterian missionary, had come and left, and that our proceedings were reported to be stopped. I sent for the missionaries and for two of the "Peace-makers." At this particular time I felt much concern and anxiety, fearing we should not be able to prove clearly the charges, and manage the case properly; to fail on our part when it came to trial, I feared would serve as an encouragement to them to continue the great evil of selling and giving intoxicating drink to the natives. I think all concerned in trying to put a stop to this distressing evil, have great reason long to remember with feelings of deep gratitude, the way in which a kind and merciful Providence brought about a settlement of our present troubles, and I desire through his continued blessing it may be a lasting good, and to Him be the glory forever.

When Aldridge and Higgins were brought (up) for trial, Aldridge invited me out of the house, and proposed a settlement on terms that were perfectly satisfactory; that he would sell what liquor he had by the barrel, or in the barrel, that he would not keep or retail any more intoxicating drink for time to come, and I think offered to cut down his sign-post; he gave his bond to the amount of fifty dollars for the faithful performance of said promises. Higgins promised in time to come he would not give or sell intoxicating drink to Indians, and was bound up in the sum of fifty dollars, with his son as security for the fulfillment of said promises. These two men seem quite disarmed; they appeared like children, (and) after the business was settled, quite friendly. I consider the blessing of the Lord attended this day's labor, my discouragements and sorrowful feelings were turned to rejoicing and gratitude; all the glory to be a kind and merciful God.

11th. This day the three "Peace-makers,"

"For The Friend"

one of the Presbyterian missionaries (Chauncey Carver), the Methodist missionary and self, had warrants (issued) on the testimony of James Pierce, one of the "Peace-makers" (against H. Fuller and Swan, two men who keep public houses at Cold Spring. They were brought before the magistrate (and) pleaded guilty of selling cider to the Indians. The "Peace-makers" let them off, on making promises to clear their houses of intoxicating drink for time to come, bring more on to the reservation, and pay the fines. * * * They were informed (think) that when these promises were violated the old charges should be brought up, and law enforced.

2d mo. 21st. Oh! that I could long remember, with deep feelings of gratitude to kind and merciful Master, the great favor that have so bountifully been bestowed upon me this past week, a qualification for praying thanksgiving and praise. May I be humble, as at the footstool of my Divine Master, and be preserved as in the hollow his holy hand. He is forever worthy of honor, praise and thanksgiving.

3d mo. 2nd. My mind has been a good looking towards home in Chester county, Left Tunesassa this morning early to go to Naples, with some expectation of getting a letter from the committee; while going and after getting there, I think I may say I was favored to feel a comfortable degree of resignation to the will of my Divine Master. What a pious feeling; how much it ought to be sought after; I consider it a great duty resting us to feel after it, and a great blessing to be able to experience it. There was no letter for me in the office. On my way home came round by Randolph; a little before I got to the east village, the horse that I was riding I think stepped into a quicksand, pitched forward and threw me over his head; one of my feet stuck in the stirrup; I kept hold of the bridle; when the horse (which was a colt) had not been much used, got on his feet was lying in a situation in which I could not help myself. It seemed a Providential thing the colt stood almost as still as a post, and the time it happened there was a boy passing who loosed my foot. I was but little hurt and I think I have great reason to be very thankful that I was not killed. Towards evening attended a council of the chiefs and others on the subject of a new law, or rather amendment of one that had been made about a year before. I felt desirous not to miss an opportunity of speaking to them on the subject of their improvement; at the same time I desire to be preserved from attempting to speak only when I feel it my duty so to do. How necessary it is for all to keep their eyes single to the pointings of Best Wisdom; in there is safety and true comfort.

(To be continued.)

A Box on the Ear at the Right Time.

In one of the important commercial cities of North Germany there once lived a merchant named Muller, who, in his walks about the city, often encountered a bright-faced, well-dressed young man, who always took off his hat and bowed to him in the most deferential manner.

The young fellow was an entire stranger to the merchant, but the latter always returned his greeting with a friendly nod, supposing himself to be mistaken by the young

to for some one whom he probably resembled. One day Muller was invited to the country of a friend, and, arriving there at the appointed time, he noticed this young man picking up and down the shady paths of the den engaged in earnest conversation with his host.

"Now I shall know who this young gentleman is," thought he; and hastily approached him.

"Allow me," said the host, after exchanging greetings with his friend, "to introduce—" "It is not necessary, I assure you," interrupted the young man eagerly, "we have known each other for many years!" "You must be mistaken," said Muller, "for though, in answer to your greetings, I have humbly bowed to you, still you are entirely unknown to me!"

"And yet I insist," replied the young man, "but I have been acquainted with you for a long time, and am delighted to have the opportunity of meeting you here and to present my most heartfelt thanks for a service you have done me!"

"You speak in riddles," said Muller; "how in you be under obligations to me when I do not even know you?"

"It does seem a little mysterious," laughingly answered the young man, "but let us sit down here on the piazza, while I throw a little light on the statement."

"Seventeen years ago, when I was a lad of nine, I started for school one morning with my books under one arm and my lunch of bread and butter under the other. I was a poor boy with a big appetite. My luncheon proved never enough for my hungry stomach, and I used often to envy boys whose mothers would afford to give them choice fruit with their dinner."

"This morning I had been especially dissatisfied. 'If I only had an apple with my bread,' I thought, 'how nice it would be!'"

"My way to school was through the market place, and as I arrived there it seemed to me the fruit had never looked half so beautiful or desirable. I stood there several momentsazing at the abundant supply, instead of hastening away from the temptation as I should have done."

"Suddenly an old market woman, who superintended large rosy-streaked apples, turned her back on her wares to gossip with a neighbor."

"'Such lots and lots, I thought to myself, surely one from so many would never be missed, yet would do me so much good.'"

"'Quick as a flash I stretched my hand out, and was just about to thrust an apple into my pocket, when a sharp box on the ear caused me to drop the fruit in an agony of terror.'"

"'Youngster,' said an earnest voice close to my burning ear, 'have you forgotten the ten commandments? Now, I hope this is the first time that you have ever stretched out your hand after goods that are not your own, let it be the last time also.'"

"'I hung down my head for shame, and only for an instant lifted my eyes from the ground to see who my reprover was.'"

"'When I reached school the words I heard were still sounding in my ear. My heart was so full I could scarcely keep from crying. 'Let it be the last time also,' let it be the last time also,' again and again confronted me. Bowing my head on the desk, I then resolved

that indeed it should be the last time, even as it had been the first; that never as long as I lived would I covet what belonged to another, or strive to gain unlawful possession of it."

"After a few years I left school and became a clerk in my uncle's counting-room. From there a year or two later I went to South America. You will readily believe me when I tell you that there the temptations to a young merchant are not few. I repeatedly had opportunities, which acquaintances of mine did not hesitate to improve, to benefit myself at the expense of others, but every time these presented themselves, that ringing blow on the ear, and those words 'Let it be the last time also,' reminded me of my duty, and helped me to distinguish between right and wrong."

"I have been back in my native country about five months. I have come back possessed of considerable wealth—but money earned squarely and honestly! Never have I knowingly reached out this hand and taken a penny even that did not rightfully belong to me!"

The young man remained silent for a few moments, overcome with emotion, then, reaching forth his hand, he took that of Muller, and exclaimed:

"Allow me to gratefully grasp the hand that once did me such a service!"

"And permit me," said Muller, embracing him, while the tears came into his eyes, "to love the man who is capable of such gratitude, and who in later life so faithfully keeps the resolve made in boyhood days."—*Cincinnati Gazette.*

Letters of James Emala.

(Continued from page 255.)

"1st month 17th, 1854.—Since we met at C—, I have at different times felt a word of encouragement towards thee, but have still put it by, partly from a view of my own unworthiness, and partly from an apprehension it was not needful, fully believing that thou hast felt thy exercised mind a little lifted up and encouraged by that which is better than words. But still this morning I remembered how often the apostle advised the brethren to greet one another, such as 'Greet Priscilla and Aquila, my helpers in Christ,' &c. Thou hast passed through many probations, under all which thy chief desire has been to 'buy the truth,' and thou hast it cost thee much and may still cost thee more, I cannot doubt but the full reward will be gained in the end. Let the hills therefore be brought down, and the valleys exalted, endeavor as much as possible to receive all dispensations alike, and to 'rejoice evermore, and in all things give thanks'—remembering the crown is at the end of the race, and its glory will be enhanced, probably, in some proportion to the cost. That I trust there is hardly occasion for reviving what seemed to arise, 'Strengthen the weak bands, and confirm the feeble knees, and especially the latter part of the passage, 'say to them that are of a fearful heart, be strong,' &c. As there is a time for all things, a time to sow, and a time to reap, so there is no doubt a time to ask and a time to receive, a time of probation and a time of confirmation, which last, I trust, thou hast had some foretaste of."

"1st mo. 31st, 1854. * * * I have no doubt of it being right to compassionate the condition of those, who from any cause have

strayed from the fold, and as ability is afforded endeavor to restore them. I sometimes think, however, that when we are addressing the unconverted, either verbally or in writing, it may be worthy of a thought, whether it is best to seek to clothe the message we may have to deliver chiefly in scripture language, or otherwise. To such, I apprehend, scripture is something like an 'unknown tongue;' and although it may be, and no doubt is, often very proper to confirm the words by appropriate quotations from scripture, yet a different language in the main would perhaps be more intelligible to such, and of course more likely to be acceptable. To those who can rightly savor the scriptures, the case might be different." * * *

Indian Affairs.

FLORIDA PRISONERS.

At the close of the war in 1873 and 1874, there were fifty Indians sent as prisoners of war to a fort near St. Augustine, on the eastern coast of Florida. Captain Pratt, who had them in charge, appears to have been a kind and Christian officer. They received school instruction, and some of them learned to read and write. Some of the Christians of St. Augustine, particularly the ladies, took great interest in the prisoners, and taught them the truths of the gospel in addition to the preaching which they heard, which has been blessed to many if not all of them. They were all released this spring, and sent to their homes, except twenty of them, who preferred to remain in the States and go to school. One of them in writing to his father at the Cheyenne and Arapahoe Agency, stated that they had learned a little in white men's books, and of his religion, and they wished to learn more.

Howling Wolf [one of the returned prisoners], who is now twenty-nine years old, told me his experience as follows: When a young man I used to sometimes think while rambling around and raiding with my comrades that I was doing wrong in some things; for I knew a little of God. I did not think it wrong to raid and fight, which I now believe to be wrong, for I was an Indian, and thought and acted as an Indian. I wanted to be a leader in the tribe, and so went on in sin, for which I was taken a prisoner, and with others sent to St. Augustine. There I learned much more of the Great Spirit. God caused me to realize that I had done very wrong. Then I wanted to throw away all of my bad deeds. I asked God to take away my bad heart and give me a good heart. The Great Spirit heard me, and in his providence gave me a good heart, and then I felt happy. I often got tired of my confinement, and was very uncomfortable. Then I would pray to God. When thus feeling, I sometimes took the Bible and held it open before me, and that gave me comfort, although I could not read it. I threw away my old road, took the road of the Bible, which, I believe, is God's road. Now I am holding on to it.

Since coming here to school to work, I talked to the boys and girls, urging them to take the good Bible road. It makes me so happy to go in that I talk to the people in camp, urging all the Indians, Cheyennes and Arapahoes, to take the Bible road, that they also may be happy."

Cheyenne and Arapahoe mission school was taken by John Homer Seger on contract. He receives \$5 per month for each scholar at

school. The government furnishes the rations, material for clothing, bedding, and a farm. The contractor, (Superintendent) furnishes all the necessary help for carrying on the school. There are four teachers, and six other white employees, including himself. The scholars are progressing well in their studies, and their behavior is good. During the last three quarters the school has averaged 115 scholars. There are 28 girls who are over twelve years of age, four of whom have been in school three or four years. Besides the white employees, the Superintendent pays \$52 per month to 11 of the school girls, who are out of the school a part of the time assisting in sewing, cooking, washing, &c. He pays four of the boys \$25 per month. All of the children who are old enough are taught to perform such part of the work that they are capable of; those only receiving pay who are kept out of school a considerable portion of the time. Teaching the girls to do housework, and the boys to cut wood, plow, and other out-door work, is considered an essential part of their education. The boys have an interest in the crop that they raise on the farm. Some of them are at work on it all the time, in the plowing and cultivating season. This year they have 110 acres in corn, 5 acres of broom corn, 4 acres of sorghum, 4 acres of vegetable garden. They work faithfully.

When the children receive money, either for their work or crops, they are encouraged to invest it in cattle. Forty-nine of the scholars, boys and girls, now have a herd of 141 head, besides a large number of calves. Each scholar knows his own animals.

Friend Seger, after receiving from all sources what he considers a reasonable compensation for his services, gives the balance to Friends' Endowment Herd, which he, the agent and others have started, and are increasing as they can. The design of the herd is for the educational benefit of the Indians of this agency. The benefit is expected to be derived by sending some of the children to the States to more advanced schools than they have here, and thus prepare them for teachers or other places of usefulness, or to increase the school capacity of that agency. The herd now numbers 70 head, besides the calves. It is kept with the scholars' herd, but differently branded.

The agent and friend Seger both have great executive ability. The latter was very much annoyed and injured by the Indians going across the cultivated fields. The agent issued an order to prohibit it, which all respected except some of the young men. Two of them were arrested for the offence, whom the agent sentenced to chop wood at the school-house, which they very reluctantly submitted to do. The third young man went across the field with no other apparent motive than to show that he could not be controlled. He was arrested by the school boys, and taken by Superintendent Seger to the Agent's office, where he received the sentence to chop wood. He would not submit to cut wood until his hands were tied down, and a log of wood was fastened on his back, and he led around for a time in presence of the children and a number of the camp Indians. He then cut the assigned portion of wood. Since then the Indians can go around the field without inconvenience.—*L. Tatum, in Christian Worker.*

Can we keep Heaven in the eye while the world is in the heart?

"SO RUN THAT YE MAY OBTAIN."

Selected.

Onward for the glorious prize;
Straight and clear before thine eyes,
See, thy homeward pathway lies;
Rest is not beneath the skies,
Onward, onward still.

Onward till the dawn of day;
Tarry not; around thy way,
Danger lurks, O fear to stay;
Rouse thee, Christian, watch and pray,
Onward, onward still.

Stay not for the flowers of earth;
What are hours of idle mirth?
What are fading treasures worth,
To a soul of heavenly birth?
Onward, onward still.

Linger not, through onward fear,
Though thy way be dark and drear;
Is not Jesus ever near,
Still to bless and guide and cheer?
Onward, onward still.

In the way the Saviour trod,
Gladly bearing every load,
Meekly bending to the rod,
Walking humbly with thy God,
Onward, onward still.

Rest not here but onward haste,
Till each danger shall be past;
Till each foe is 'neath thee cast,
Till thou gain thy home at last;
Onward, onward still.

THE SMOKER'S DREAM.

Original.

The smoker arose from his easy chair,
And carefully putting his pipe away,
He sought his couch, and after prayer
His weary head on his pillow lay.

And soon he slept, and deep and long,
Until the dim and shadowy train
Of dreams, a dark mysterious throng,
Came trooping over his restless brain.

And the sleeper dreamed that the blast of fate,
By the great Archangel's trump was given,
And his soul went up to the golden gate
That stands at the corridors of Heaven.

And the book of life was opened there,
But the waiting angel sought in vain
Over its pages broad and fair
For a single trace of the smoker's name.

And the spirit wept in its great dismay,
"For my name is surely there, he thought,
For I love the Saviour, and day by day
My hands in the Master's work have wrought."

And the angel sighed and the pearl tears
Fell on the page he was bending o'er,
When lo! there dimly and faint appears
The mortal name that the spirit bore.

And the angel turned from the mighty book,
And a wondrous smile his face o'erspread,
As he bent on the dreamer a mingled look
Of love and pity, and sweetly said:

"The smoke of thy cherished pipe, for years
Had gathered so heavy thy name about,
That nought but an angel's pitying tears,
And thy own contrition might wash it out."

And the vision passed, and the sleeper woke
With a high resolve, and a purpose strong
To break forever the galling yoke,
And the cruel chain that had bound him long.

And for the years that were yet to be,
With a lighter heart and a clearer brain,
In the strength of a nobler manhood free,
He turned to the Master's work again.

E.

Employment.—Occupation is of real advantage both to body and soul. Even in Paradise it was ordained that Adam should not be without employment, but he was placed in the Garden of Eden to dress and keep it.—*Blensing.*

For "The Friend"

The Seed of the Kingdom.

It was the testimony of a good man who near the close of his dedicated life, that had had a heavenly visitation when only 7 years old. And that though he had wandered far and wide from the reproofs of instruction or the safe guidance of the light of Christ yet he never lost sight of this at any time but that it remained with him as a rallying-point ever after. It is to this merciful tension of Divine regard, whether made us so early as four years or later in life, that we would solicit the most careful attention with the most unqualified obedience.

The seed of the kingdom is represented the Saviour to be even as the least of all seed when it is sown in the heart; but as due proportion is given to it under the enlightening influence of the Son of righteousness, it gradually yet steadily groweth up unto fruitfulness first the blade, then the ear, and after that the full corn in the ear, to the praise of the Great Husbandman.

Obedience to this little seed of the kingdom, or the Redeemer's grace manifested the heart, has ever been the starting point the religious life of all those who through faith and patience have inherited the promise and been permitted to join the redeemed kingdom of their Father. How important that none should overlook the simplicity of the Messiah's appearance in, as it were the margin of their hearts, as the Jews turned away from and rejected Him in his outward manifestation; being so without "form comeliness," so beneath their expectation that He was to them a stumbling block, and the Greeks foolishness.

But, on the contrary, as obedience in the day of small things keeps pace with the knowledge of the Lord inwardly revealed—remembering that "that which is to be known—God is manifest in man"—all such are led step by step in the narrow way of holiness in which it is declared, "The way-faring men though fools, shall not err;" and finally are built up more and more and established upon the rock, Christ, against which the winds cannot wave, nay, as is written, "the gates of hell shall not prevail."

"Except ye be converted, and become as little children," saith our Divine Lawgiver, "ye shall not enter into the kingdom of heaven. Then how important in the great work of salvation, that the little child's state should be fully realized and duly abode in, with a learning of the a, b, c, lessons belonging to said pupilage state; which prepares the way for the successive growths unto the stature of young men, of strong men, of fathers in the Truth, and pillars in the Lord's house, which shall go no more out.

That thou, dear reader—that all—may come to the inward, experimental knowledge of Christ which is life eternal; and thus know Him to be as a rock and refuge in every storm that either frowns or falls, even as a well spring of peace and joy to the soul, is the earnest desire of the writer.

Satan offers forms and ceremonies to those he would rock to sleep, and who are seeking something that they feel they need; and in the enemy can satisfy them with external and superstitious reverence for men and things, he keeps them in "the iron furnace of Egypt."

Religious Items, &c.

Ritualistic Church.—A correspondent of *National Baptist* recently visited the Episcopal place of worship in Philadelphia known as Clement's. On the altar candles were lit and before it were suspended seven lamps. On and around it were various ornaments, such as figures of angels, a s, bouquets and a silk banner bearing some device.

The priest, musicians and various attendants, in all about seventy in number, clad in altar garments, mostly white and black with red embroidery, enter in a formal procession. The celebration of the "communion" service is attended with many ceremonious evanescences, such as kneeling, crossing, invoking certain scripture passages with the back of the people present, &c.

The priests connected with this establishment reside together in monastic fashion. The doctrine that the bread and wine used in the "communion" are transformed into the veritable body and blood of our Redeemer, and that prayers for the dead affect the state departed souls, are maintained, and there would seem to be but a short step yet untried to bring these people into full unity with the Roman Catholic Church.

To those who have been accustomed to let waiting upon God in the religious meetings of Friends, and have learned to look to our Creator and Redeemer for the ability to accept worship to Him in spirit and truth; these complicated ceremonies seem exceedingly lifeless and destructive to all true devotion of heart. For they continually draw away the attention from Him who is a spirit, and fix it on ornaments, processions, music, orations, and human manipulations.

Licensed Grog Shops in Philadelphia.—There are 5033 licensed places for selling liquor in Philadelphia, the sales from which by their returns are more than \$14,000,000 a year! This is not only an enormous waste of itself, but involves heavy expenses which could otherwise be unnecessary—as well as being a fruitful source of evil in other ways.

An ex-Mormon, F. W. Cook, has been admitted to orders in the Episcopal Church at Eden, Utah.

Excessive Cider Drinking.—A case has recently come to light in Northbridge that is causing considerable talk not only there, but all the surrounding towns. The family consisted of a father about sixty, the mother fifty-six and two sons thirty-five and thirty-nine years old. The actual amount that this family have consumed since last fall cannot be determined, but one man says he made 1,000 gallons for them and two other men made half as much more. The father and mother have always been in the habit of drinking cider to a large extent and the sons were also brought up to it since they were children. The father says he does not know how much cider they put in last fall, and also says that his youngest son sold some and that they had given away some, but as near as can be found out between 40 and 50 barrels of cider have been consumed by this family since last fall. Some weeks ago the mother was taken with fits and died. The youngest son was taken with fits three weeks ago and died, and since that the oldest son was taken with fits just the same as the others. The physician says there is but very little hope of his living but a short time. The

father is also in a very bad condition, sees snakes nearly every night, and he frequently gets up in the night and runs about the house crying "Fire" at the top of his voice, and is doubtless suffering from tremens.

Anti-Chinese Prejudice.—Gober, of Grass Valley, Cal., offended part of his Methodist congregation by employing a Chinaman. The officers voted to pay him no salary unless he discharged the Mongol. "I now answer you once for all," he said from his pulpit, "that this Chinaman shall stay and I shall continue as pastor of this Church until the Conference sees fit otherwise to direct me, salary or no salary, starve or no starve. I have never yet been intimidated, and do not propose to be now. Brethren, it strikes me that it would be better for you to follow the religion taught in the Bible than that dealt out on the sandlots in San Francisco."

The Baptist General Association of Virginia had the subject of seeking more intimate relations with the colored Baptists of the State before it. A report was adopted recommending that such relations should be cultivated. It proposed to send messengers to the State Convention of colored Baptists and invited a return of the courtesy, promising to provide seats for the colored messengers who should come to it. The ministers and brethren were also advised to aid the colored preachers in securing such knowledge as will increase their efficiency.

The French Council of State has indorsed the opinion of the Minister of the Interior respecting the recent pastoral of the Archbishop of Aix attacking M. Jules Ferry's Education bill, and have pronounced the pastoral illegal; and a decree of the President of the Republic promulgates the decision of the Council with considerable additional emphasis. The President's decree sharply reminds the clergy of the fundamental distinction in French law between things strictly spiritual and things only temporal and civil, and informs them that, while bishops have the right of submitting to the chief of the State their views on things temporal which appear to them to touch religious interests, and even to present their views as citizens to the Legislative powers, they must not do so in the form of pastoral letters, the only object of which should be the instruction of the faithful in their religious duties. The President accordingly declares the Archbishop to have transgressed his legal powers, and pronounces the pastoral suppressed.

Fashion in Dress.—Augustus Cæsar is said to have worn the apparel made by his wife and daughter, frequently observing that gay clothing was the badge of pride and the nurse of luxury. It was commanded that Aaron should be sanctified, "and his garments." The frippery and popery and fumes that are attached to the garments of even some professedly Christian people, will hardly suggest either "the odor of sanctity" or "the beauty of holiness."—*Thwing's Handbook.*

The civil authorities of Prague, Austria, where missionaries of the American Board have maintained public services for more than a year, have, for some reason not assigned, directed that no more such meetings be held, under penalty of \$50 fine or twenty days' imprisonment. The persons attending these meetings are only permitted to attend services of the Churches recognized by the State.

The French Protestants, numbering about

700,000 souls, have contributed for home and foreign missions nearly 1,000,000 francs, or one quarter of the sum which the great Roman Catholic Propagation Society has raised. They sustain foreign missions in the south of Africa, in Senegal, and in Tahiti. They have been encouraged in their home missions by the appearance of an increasing disposition among the people to listen to Protestant teachings.

At the annual assembly of the Congressional Union, of England and Wales, in London, last month, a resolution was adopted condemning the policy of the Government by which it was committed to "unnecessary and therefore criminal wars in India and South Africa, and to burdensome and undesirable obligations in European diplomacy."

Expense of South African Wars.—The *London Times* places the expense of the war with the Zulus at about \$2,500,000 per week. Already thousands of lives have been lost by fighting and disease. Military men are bad financiers. It is not probable that it would have cost the half of one week's military outlay, in the hands of prudent and judicious men of peace, to have averted the crimes and waste of this war, which some of the English people denounce as unjust and unnecessary.

Natural History, Science, &c.

Pill Making Crabs.—A curious little crab is common upon the sandy beaches everywhere on these coasts. I observed it abundantly at Labuan, and at Singapore and Johore, and other places, where, immediately after the tide has gone down, the smooth beach is covered with loose, powdery sand and holes of various sizes. From such as would admit a small pea to those big enough for a large filbert, but usually of the former dimensions. A closer examination showed that little radiating paths converged among the litter of sand to each hole, and that the sand itself was in minute balls or concretions of a size proportionate to the calibre of the holes. The rapidity with which the shore was covered with myriads of such concretions was very surprising, as at first there appeared no living thing to which they might be attributed. I naturally supposed that the little crab inhabiting the hole had ejected the sand in little balls in the construction of his habitation; but an approaching footstep was an immediate signal for the disappearance of the little creatures. By remaining quite quiet, however, on a patch 30 or 40 feet square, which was covered with their holes, I was able to watch their remarkable habits. On the first approach, a peculiar twinkle on the sand was visible, which required a quick eye to recognise as a simultaneous and rapid retreat of all the little crabs into their holes, not a single one remaining visible. Kneeling down and remaining motionless for a few minutes, I noticed a slight evanescent appearance, like a flash or bursting bubble, which the eye could scarcely follow. This was produced by one or more of the little crabs coming to the surface, and instantly darting down again, alarmed at my proximity. It was only by patiently waiting, like a statue, that I could get them to come out and set to work. They were of various sizes, the most common being that of a largish pea. Coming cautiously to the mouth of the hole, the crab waited to reconnoitre, and if satisfied that its own length was near, it would venture about its own length distant from the mouth of its hole; then

rapidly taking up particles of sand in its claws or chela, it deposited them in a groove beneath the thorax. As it did so a little ball of sand was rapidly projected as though from its mouth, which it seized with one claw and deposited on one side, proceeding in this manner until the smooth beach was covered with these little pellets, or pills, corresponding in size to its own dimensions and powers. It was evidently its mode of extracting particles of food from the sand. I made many attempts to catch one before I could succeed, so swift were they in their movements. Preparing my right hand, and advancing it cautiously, I darted it out as rapidly as I could to secure the crab; but it was too quick, and had regained its hole. At length, after repeated attempts, I caught two specimens, which immediately curled themselves up and feigned death. I put one of them on the sand to see what it would do. At first it did not attempt to move; but after a short time, by a twisting and wriggling movement, it rapidly sunk into the sand and disappeared. I had attempted in vain for a long time to cut off one of the crabs from its hole, so that I might fill it up and observe whether it would go to a neighbor's hole, and with what result. But as I could not succeed in doing this (and it was frightfully hot work stooping over the sand under the direct rays of the tropical sun) I put one of the crabs I had caught into a hole already containing a crab; but no result followed. I attempted to dig it up again in vain. I dug up many holes; but though I soon arrived at the soft and wet sand beneath, I never succeeded in procuring a pill-making crab by digging it out. Nor, when I filled up several holes, did any result follow, as long as I had patience to wait.

These pill-making crabs are gregarious. Many considerable patches of sand were covered with their holes and pellets, some close together, some more sparsely; but other very large tracts in the neighborhood had not a single hole upon them. They rapidly make their appearance immediately after the tide has left the sand, and go on making their pellets as until the water returns again. The first ripple washes all their pellets away, and turns their holes into little funnel-shaped pits.

Celluloid and its Uses.—Celluloid, which is growing into prominence in the manufacture of many of the fancy articles entering into druggists' stocks, is a composition of fine tissue paper and camphor, treated with chemicals by a patented process. A rather common impression that it contains gun-cotton is a mistake, which arises from confounding it with collodion. Celluloid, it is said, is entirely non-explosive, and burns only when in direct contact with flame. When crude it looks like a transparent gum, and its color is light yellow brown. It can be made as hard as ivory, but is always elastic, and can be molded into every conceivable form. With equal ease it can be colored in any tint desired, the dye running through the entire substance, and being, therefore, ineffaceable. All the celluloid made is produced by a single company, with factories in Newark, N. J., and it is also imported to a moderate extent under the name of zylonite. A number of large corporations are now engaged in the various branches of manufacture for which celluloid can be used. As a close imitation of ivory, celluloid has made great inroads in

the business of the ivory manufacturers. Its makers assert that in durability it is much superior to ivory, as it sustains hard knocks without injury, and is not discolored by age or use. Large amounts are used for combs of every variety, for the backs of brushes and hand mirrors, and for all kinds of toilet articles which ivory is employed for. Among many other articles in which celluloid takes the place of ivory or india-rubber, are whip, cane and umbrella handles, every kind of harness trimmings, foot rules, and the handles of knives and forks. Its use in cutlery is said to be especially desirable, as it is not cracked or discolored by hot water. India-rubber, as a general rule, holds its ground against celluloid, as the latter cannot be sold so cheaply. The freedom of celluloid from sulphur, and the natural flesh color which can be imparted to it, have caused it to be extensively substituted for india-rubber in the manufacture of dental blanks, or the gums and other attachments of artificial teeth. Celluloid can be mottled so as to imitate the finest tortoiseshell, and its elasticity renders it much less liable to breakage. In this form it is used, like the imitation ivory, for combs, card cases, match-boxes, pocket-books, napkin-rings, and all sorts of fancy articles.—*Late Paper.*

A Great Orchard.—The largest orchard in the world is that owned and worked very successfully by Robert McKinstry, of Hudson, Columbia county, New York. The orchard is situated on the east bank of the Hudson river, on high, rolling table land, and contains more than 24,000 apple trees, 1700 pears, 4000 cherries, 500 peaches, 200 plums, 200 crabs, 1500 vines, 6000 currants and 200 chestnuts.

The pears are Bartlett, B. d'Anjou, Sheldon, Seckel and Lawrence chiefly. Of cherries there are twenty-eight varieties. The orchards are remarkably thrifty, and the oldest trees are about twenty years old. The soil is dry, rolling gravel, with some limestone; the trees are planted twenty feet apart, and do not by any means seem crowded. The ground is ploughed several times in the year and kept fallow; except, when thought advisable, it is sowed to clover. The orchard is intersected by roads over six miles in length for the passage of wagons, and is bounded by a continuous row of apple trees, set ten feet apart, for four miles and a half. The apple crop of last year is 30,000 barrels. Twenty-four men and fourteen horses are employed in hauling out the crop or in ploughing.

The success of this orchard has not been achieved, nor is it maintained, without the closest supervision and most industrious work. Suckers and sprouts are removed as soon as seen, the borers are watched and followed with vigor. Wires are used to reach them in their burrows, and the damaged bark is removed with chisels. As trees fall others are planted in their places.—*The Rural Home.*

Fossil Bird-tracks.—The lower Connecticut Valley seems to be quite as full of giant fossil bird tracks in stone, as the upper region about Turner's Falls. Coe and Fowler have uncovered in their quarry on Powder Hill, in Middlefield, a layer of stone indented several inches with bird tracks. Several on a line are three-and-one-half feet from each other, and measure fourteen inches on the center claw, the outside claws being separated about a foot at the points. These tracks were made in the mud and ooze of a shore that was evidently washed by the tides, and each incom-

ing tide deposited a layer of silt, or mud which became sufficiently hardened in time to retain the form of the impression, and in that shape the mud was slowly turned to freestone.—*Ch. Adv.*

Fall of a Meteor.—On 5th mo. 10th, a large meteor fell at Estherville, Emmet County, Iowa, accompanied by a loud report, resembling the discharge of a cannon, only louder. Parties have since found numerous pieces of the meteorite, varying from one to eight ounces. Also, four pieces about four pounds and one weighing thirty-two pounds. A large piece, or probably the meteorite itself, has recently been found bedded eight feet in blue clay, and fully fourteen feet from the surface of the ground. Its weight is 431 pounds, dimensions about two feet long by one and one-half wide, and one foot thick, with ragged uneven surface. It is composed, apparently of nearly pure metal of some kind, a piece which has been made into a ring, resembling silver somewhat, but a trifle darker in color.

Prehistoric Bronzes.—A number of prehistoric bronzes found in ancient Siberian graves and collected by Seebohm and Wiggins during their exploration of Arctic Siberia, is thought to be from 4,000 to 5,000 years old.

Observatory on Mt. Etna.—An observatory is to be established on Mount Etna, and the work of constructing it will probably be commenced soon. Both astronomical and meteorological, as well as seismological, observations are to be carried on at this new observatory, which will be the property of the University of Catania.

Extract from a letter from Thomas Waagstaffe James Pemberton, dated London, 1st of 3 mo. 1786.

About four months since I was applied to on 'change, and informed that Zachens Coffin who was an inhabitant of Nantucket, and belonged to our Society, was taken and carried into Algiers. I thought such information should be known, and accordingly I mentioned it in the Meeting for Sufferings. Friend seemed affected with the account, and Wm Dilwyn and myself were desired to write to the English Consul, which we did by post and also forwarded another by Gibraltar, with a power to him to advance £10. 10s. for present help, and to acquaint us the price of redemption, as Friends seemed desirous if possible to procure his liberty. John Bland banker in this city, gave it credit for the draft of £10. 10s. But we have received no answer or any information than that the letter by Gibraltar was duly forwarded from thence. By his letter, which I have in my possession, it appears the English consul did all in his power for their relief, and to use his own words, displayed every mark of humanity towards them. As we have no answer, I am desired to forward another copy through a French house, which I expect to do next Sixth-day, the 3d inst.

Wm. Ellery, grandfather of Wm. Ellery Channing, was Collector of Customs for Newport, his native town. One of his grandsons remembers to have ventured in early youth to take a sheet of paper off a desk at the Custom House, in order to write a letter. Wm. Ellery stopped him and said: "My boy if you want paper, I will give you some; but that is government paper." Were the youth trained in honesty in little things, we should hear of fewer defalcations.

THE FRIEND.

SIXTH MONTH 28, 1879.

LONDON YEARLY MEETING.

The last number of *The British Friend* contains a full report of the proceedings of London Yearly Meeting, which convened on the 1st of last month. From its pages, the following information is collected.

The statistical reports show the number of ordained ministers to be 173 men and 123 women; the whole number of members 14,710, being an increase of 197 over the previous year. This was mainly due to the additions of consecration, which amounted to 174. Of these deaths exceeded the births by 30. Of 113 members married during the year, 79 were married according to Friends' usages, and 33 not according to Friends' usages. In 19 were married to those not members.

The Epistle from Indiana stated that the action of that Yearly Meeting had been ended with the question, how they were to be the necessary support to those employed in the work of the ministry, in order that their service might not be limited by temporal suits?

This drew forth some comments: One friend said "was very sorry for the allusion in the title to the support of the ministry. Such language and the course it would seem to recommend, were alike inconsistent with the principles that we professed."

Another Friend "was sure Friends might like themselves easy in this matter. The early Meeting of Indiana was very desirous to follow out New Testament teaching on this object."

Another "had shared the uneasiness and concern on this point, and believed that any innovation of this kind would be trenching foolishly upon those principles on which we wished to continue the ministry amongst us. In this basis only could we maintain it pure to our midst. 'Freely ye have received; freely give.' But we must not suppose this as a new problem. It had been known for 70 years. It involved the first principles of Christian truth. How were the expenses met? Peter, and Paul, and John? By diligence in their outward avocations. Others, indeed, had the privilege of contributing to their needs; but it was another thing to have aid provided for the payment of ministers, and that was what we must all admit was that was coveted by many within our borders. We must be alive to these temptations, or the round world slip from under our feet. None there had taken so high a standard on this question as Friends, and we had never taken so high a ground. Might we still maintain it firmly and in its integrity?"

The reports on attendance of meetings represented that those on First-day mornings were generally well attended. With some exceptions, most of the others were much neglected.

In considering the state of Society there was such said by different persons, and various ideas held up. One speaker thought more attention was needed to the Divine teachings as laid down in the Scriptures, and that some pious people were in danger of thinking they had not been called into the Lord's service, forgetting that the Lord called all into his service. [A correct sentiment which is liable to be misapplied.]

Another said, "there was no doubt that very many of our members were in the habit of attending two places of worship—our own in the morning, and elsewhere in the evening. He was not really either to approve or disapprove of this course."

This avowal of his own weakness as to the support of our principles, fittingly preceded the further remarks of the same person, that the Society of Friends did not enjoy the fullness of religious liberty. "Was it not in the hearts of many of our ministers to take their Bibles into meetings for worship, and preach from them? Yet how many did not like to use this privilege. Many, like himself, had been called into the ministry in middle life, whose memories were not, and could never be, so stored with Scripture as those whose religious exercises were of earlier date. Again, he thought that if in those meetings which were not strong enough to hold general or serial meetings, any Friend, not a minister, was left at liberty to bring his Bible to the meeting, or leave it at home, it would conduce to that right liberty that we should enjoy."

Another Friend in referring to the previous utterances, observed: "It was sometimes remarked that we had no creed. This was incorrect. If we had no binding and fundamental principles there would be nothing whatever to prevent one member from doing one thing, and another another. But we really had principles, around which it was our duty to rally, and which we ought to defend, for it was on the maintenance of these that our existence as a Society depended. A Friend had seemed to wish to introduce the reading of Scripture into our meetings. The teaching of Barclay was very plain on this question—If the ministry be a right ministry, a Friend will never be at a loss for Scripture. If the quotation was in the main correct, the verbal accuracy was of less importance. He could by no means agree with I. Brown that the present aspect of the Society was better than fifty or sixty years ago. He was pained, at the way in which that period had been alluded to; these were the days of Stephen Grellet, Thomas Shillitoe, and William Allen; when these were men qualified to visit emperors. Would that we had such in our midst now! Had we had such, he believed that peace might have been preserved in Europe. And T. Shillitoe was a comparatively unlettered man. The first principles of truth must operate on our hearts as they operated on the hearts of our forefathers, before we could have a revival. If those principles were disregarded, there was a danger of this country sliding back under that yoke from which it escaped three hundred years ago."

Another Friend thus alluded to the marked difference between the attendance of meetings on First-day mornings and at other times: "With regard to the attendance of First-day morning meetings for worship how little credit was due to us for the supposed satisfactory size of the meetings. If Friends stayed away from those meetings what would they have to do? So universal was the custom of staying this one on First-day, that if a Friend stayed away he would become a marked individual. Whilst he was glad to see them so well attended, he felt we could take but little credit for it. The real test of the earnestness of Friends was to be found when the duty was inconvenient or difficult to carry out, when for instance, on First-days Friends were

obliged to go over the same ground again to a second meeting, or still more when in the middle of the week they were obliged to leave their daily employment to attend the meetings. We might show a noble testimony to the world by holding such meetings in the middle of business hours. He would not condemn those who did not attend these meetings, but he would say that in his own experience, when it has been his privilege to attend these mid-week meetings with very slight exception, that they had been to him the most profitable of all meetings, although frequently held in silence."

"Some Friends wished to introduce a read service into our meetings, and even this would be found not to be enough. He deeply valued the Bible, but he grieved to see it placed in a wrong position, for there was a danger of men coming to it, instead of to Him who gave it. Let us choose the Lord Jesus Christ as our President, and He will provide whether we remain in silence, or whether vocal ministry take place."

Another spoke of a district in Cumberland where five or six out of seven meeting-houses had been closed, and thought the cause of this decline was, that Friends had shut themselves up in their privileges and rules. He thought our members needed more to go out into the haunts of misery and invite the people into the First-day schools. These works were a means of enlarging our borders.

Others thought the decrease of our numbers in the agricultural districts was due to the powerful influence of the clergy in those parts.

The Deputation to Western Yearly Meeting presented a report, which stated that they were enabled to remind Friends of the Smaller Body, of the weakening effect of separations, and to appeal to them in the spirit of restoring love; and "pressed upon them that in retiring from the body of Friends they had lost a sphere wherein usefulness could be exerted, and where they had deprived themselves, their families and children of a large amount of privilege and blessing. Whatever individual difference of opinion there might have been, the deputation could not ascertain that there was any difference of view in doctrine between those Friends who retired and the recognized principles of the body. It seemed more to be due to misgiving and mistrust of certain practices which had been used by individuals in revival and mission meetings, and which they believed the Yearly Meeting practically recognized."

In replying to a question, whether there was much prospect of the object of the deputation being obtained? one of their number replied, that it could not be easily decided.

In the discussion which followed, one Friend remarked: "The causes which operated in causing this separation, in all probability, operated still, and it was these that demanded investigation. He rejoiced that the results of the deputation were not valueless. He had too much confidence in some of these Friends that they would not be so much exercised without good arising from it. He could not close his eyes to the state of that continent. The sanction which had been given by this Yearly Meeting to some there had grieved the hearts of many sound upholders of our principles up and down amongst Friends in those Yearly Meetings. He did not see that disposition on our part to meet our separating

Friends as brethren, which was necessary for the healing of the breaches. Where was the reconciliation which we had effected? We had sent excellent epistles on unity, but the causes had not been searched. The recovery of the hurt of the daughter of the people of the Lord was yet distant, yet unattained, and he feared would be unattained so long as we settled down in a confident, self-satisfied spirit, believing that we had done what was right, and that there was no more to do."

From the Minutes of the Meeting for Sufferings it appeared that the propriety of holding a General Yearly Meeting for the Australian colonies had been considered by some of the bodies of Friends there, and the conclusion arrived at, that the time had not yet come.

Meetings were kept up in the South of France, Germany, Norway, and Brumana in Syria. Owing to the severe military conscription of Germany, the young men of Minden Meeting generally left the country on arriving at the age at which they were liable to be drafted.

The care of Friends travelling in the Ministry, it was proposed by Deacon and Cornall Quarterly Meeting should be entrusted to a committee of two in each Monthly Meeting, who should take charge of the travelling and lodging of such Friends while in their compass. This was referred to the Meeting for Sufferings, as was also a proposition from Durham Quarter to include meetings for Scripture reading and mission meetings in the Book of Meetings.

A protest was drawn up at the infraction of the principles of justice and Christianity involved in the Zulu war now carried on in South Africa.

During the past year, 150,000 copies of an Appeal on War, had been distributed in various ways.

Six General Meetings had been held during the past year. In commenting on the report on this subject, one Friend said, "that if it was thought that inviting the public to meetings held contrary to our principles, would increase the attendance at our ordinary meetings, it was a great mistake."

Another was "uneasy at the reading of the Scriptures, and singing being taken up as a means of drawing people to our meetings." The committee on this subject was continued with some addition.

A committee was appointed to visit Friends in Ireland, and on the 30th of the month the Yearly Meeting closed.

The proceedings of London Yearly Meeting, the reports presented to it, and the comments of the different Friends who spoke therein, clearly evince that there are still preserved among its members those who retain their attachment to its original principles. At the present time much attention is given to various forms of mission work; such as First-day Schools among the poor and neglected; mission meetings, temperance meetings, and other similar agencies. In carrying on this work, some of those interested claim and exercise the liberty to adopt methods which practically set at nought our former testimonies to the spiritual nature of true worship, to the nature of Gospel ministry, and to the necessity of a special call to its exercise on every occasion. Thus the standard of sound doctrine among Friends is not upheld as it ought to be, our true position in the mil-

lity is departed from, and we are unconsciously losing our strength. This necessarily brings sorrow and anxiety to the consistent members of the Society of Friends. For, while these desire the maintenance of a living concern for the spread of the kingdom of the Redeemer among men, and the full exercise of all forms of labor which rightly grow out of that concern, they justly and properly condemn the lack of faith in the Head of the Church, and in the principles He has given us to maintain, which leads some of our members to think they can promote his cause more effectually by ignoring and violating those principles, than by adhering to them.

The same number of *The British Friend* contains some notice of Dublin Yearly Meeting, which is deferred to our next issue.

In our last number there was printed a letter of J. F. Hanson, describing his labors in Denmark. It was inserted through a mistake of the printer; for though some of the information contained in it is interesting, yet there are several expressions in it which are unsatisfactory, and would not have been admitted into our columns without comment.

SUMMARY OF EVENTS.

UNITED STATES.—During the past week Congress has passed the three appropriation bills, and sent them to the President. The Army and Legislative bills have been approved by him, and the Judicial Expenses bill has been returned to the House vetoed. The objections urged by the President to this bill are very similar to those contained in his previous veto messages. The House sustained the veto.

Of the forty millions of four per cent. certificates issued, only \$47,120 remain undisposed of at the various depositories, and nearly seventeen and a half million of the amount issued have been converted into gold.

The *Journal of Commerce* publishes a list of the dates of the issues of different denominations of silver coins, including one and two cent pieces. Pattern cents, called the "Washington cents," were issued in 1791 and 1792, and a few others about the same time. A few silver "dime" and "half dime," as patterns, were issued in 1792. The first regular copper cent was coined in 1793, and thence yearly except in 1815, when none were struck. In 1794, a dollar, half dollar and half dime were struck, and thence yearly. The first quarter and the first dime appeared in 1796, and thence annually. Three cent pieces of silver were coined in 1851, and changed again in 1853. The nickel cent was introduced in 1856. The twenty cent piece was authorized by act of 3rd Mo. 3rd, 1857, and its further coinage prohibited in 1878. The two cent copper coin was authorized in 1864, the three cent copper and nickel piece in 1865, and the five cent copper and nickel in 1866.

Professor Swift, of Rochester, N. Y., it is stated, has discovered a new comet in the constellation Perseus, right ascension, 2 min. 30 seconds, declination, 55 degrees. It is quite bright, of strong condensation, with a short tail, and moves about one degree per day east of north.

One thousand and twenty Chinese immigrants arrived at San Francisco, recently, in the steamship City of Tokio, from Hong Kong.

A boiler in an ore mine, near East Texas, Pa., exploded on the morning of the 21st, killing four men, and fatally injuring three others who died in a few hours. Six others were injured but not fatally.

General Crook, who has just returned to Omaha from a frontier trip, says the Indians are generally quiet, but an outbreak may be expected if the stealing of the Sioux' ponies is not stopped.

One of the most remarkable features in the trade of the United States within the last few years, is the increase of provision exports. Since the year 1860, twenty to thirty per cent. increase is recorded every year. At that time the gross value of exports were \$16,612,443; in 1878 they amounted to \$123,590,322, nearly \$87,000,000 of which represented hog products alone.

The foreign imports during the last month are said to have been largely in excess of the same month last year.

Markets, &c.—U. S. wheat, 1881, registered, 1044 coupon, 1071; 5's, 1881, 1033; 4½ per cents, 106 per cents, 102 a 103.

Cotton, 123 a 124 cts. per lb. for uplands and Orleans.

Petroleum.—Crude 6 cts. in barrels, and stan white 6½ cts. for export, and 9¼ a 9½ cts. per gallon.

Fresh Fruits.—Apples sell in a small way at \$2.50 per barrel. Peaches, \$3.50 a \$4 per crate. Cherries, 7 a 15 cts. per quart, as to quality. Cherries 7 a 9 cts. per pound. Gooseberries, \$1.50 a \$2.00 bushel. Watermelons, \$50 per 100.

Flour.—Minnesota extra, medium and fancy, \$4 a \$5. Pennsylvania do., \$5 a \$5.50. Western do., \$5.50 a \$6. Patents, \$6 a \$7. Rye flour, \$4.

Grain.—Wheat, \$1.14 a \$1.16 for corn, and \$1.18 for amber. Rye, 60 a 61 cts. Corn, 41 cts. Oats, 37 a 40 cts., and mixed, 36 a 37 cts. per bush. Hay and Straw.—Prime timothy, 65 a 80 cts. per pounds; mixed, 55 a 65 cts.; straw, 80 a 95 per pounds.

Beef cattle.—The market is a trifle stronger, sales at 4½ a 5½ cts. per lb., as to quality. Sheep, 4½ cts. Hogs, 5½ a 6 cts., as to condition.

Immense quantities of white potatoes are being shipped north from Norfolk, Va.,—19,000 barrels were shipped to New York on the 21st inst.

The mortality of Philadelphia last week was 240.

New York city.

FOREIGN.—The United States Minister to Mexico in a letter to the Department of State dated 5th Mo. 21st, reports a visit made to the valley of St. Mar to witness a trial of American harvesters; the result, which was satisfactory. He anticipates very favorable results from the introduction of agricultural machinery and implements, and that the country, as they are being overcome, and planters are preparing their introduction.

From recent accounts forty vessels were loading the river Plata with wheat for Europe, although growing of wheat on a large scale in the Argentine.

The public is being kept up with emigrants from France and Germany, and promises soon to be a competitor, in grain shipments, with the United States.

Consular advices from St. Paul de Loanda state entrances into that port, during 1878, have been 9 gulf mail steamers, 7 trading steamers, one brig, 12 small boats, two French war vessels, 14 sailing vessels, 10 Dutch trading vessels, and one small one American schooner. The trade in American goods ceased on account of the poor quality of former ports. American cotton goods and some other article the consul thinks, can compete successfully with British in that market.

A low condition of trade is reported between America and the Turkish dominions, which the consul chafers to want of direct communication between New York and Palestine. There is one mill, engine, boiler, &c. in Jerusalem, of American manufacture, and another projected.

The Prince Imperial of France, who had joined his British army in South Africa, was killed in a skirmish with the Zulus on the 1st inst. His death has caused a sensation in many parts of Europe, and several courts have gone into mourning as a mark of respect.

The late Baron Lionel de Rothschild was the 11th survivor of the four sons of the founder of the great house of the Rothschilds, and the head of the London firm of M. M. Rothschild & Sons. His death removed the second generation, and the senior member of the richest family in the world.

England and France have united in demanding the abdication of the Khedive of Egypt. Germany & Austria give the Khedive the alternative of the payment of the floating debt, or his co-operation with England and France.

DEAD, on the 5th of 6th Mo. 1879, in Salem, Ohio, LINDA E., daughter of Chas. L. Hayes, in the 23rd year of her age, a member of the 1st Yearly Meeting for Sufferings. During her illness she seemed to be freed from the world, was desirous of doing the will of her Heavenly Father, and looked forward to the end of life with peace.

DEAD, on the 6th Mo. 6th, 1879, at her residence in Salem, Henry C. F. GARDNER, son, ELLEN K., wife of Isaac Child in the 51st year of her age, a member of the 1st Yearly Meeting of Friends. As she, at several times during protracted illness expressed herself, her friends had the consoling assurance that their transient loss is her eternal gain.

Indian Affairs.

The last number of *The Council Fire* discusses several matters of interest relating to the Indians.

One of these is the effort making to introduce white settlements into the unoccupied lands of the Indian Territory. In reference to this it says:—

"The aspect of things along the borders of Kansas and Missouri indicate unmistakably at several thousands of white men are preparing to invade Indian Territory with a view make permanent settlement therein.

"It is the old story repeated. The white man wants the Indians' home. The pretence made that there are extensive bodies of good land in Indian Territory belonging to the Government of the United States, and hence open to settlement to its citizens. Under these circumstances it is right and proper that the people of the United States should fairly understand the real condition of the Indian Territory lands. We believe the people intend to do right, but that they are sometimes misled by designing men, and hence may consent to wrong doing, under misapprehension. We have given the question of Indian title to the country known as Indian Territory careful examination, and we find that the Government of the United States has confirmed to the several tribes now located herein, as complete and bona fide title as it is possible for it to confer to wit: By four separate treaties with the Choctaws, in 1820, 1830, 1855 and 1866; by four with the Creeks, to wit, 1828, 1832, 1855 and 1866; by five treaties with the Cherokees, to wit, in 1828, 1835, 1846, 1860 and 1865; in all thirteen treaties, in each of which the question of title was confirmed to the several tribes. No man has ever questioned these titles, except so far as the lands lying west of 96 degrees west longitude. The condition of these lands is most this: The government secured the right to locate alien tribes on the Choctaw lands in the treaty of 1855; upon the Creek and Cherokee lands lying west of 96° in the treaty of 1866, the price of the lands to be paid to the owners either by the government or the tribes locating therein, and in no instance has the government obtained a title to the lands, but in every instance the *lease* has been made con-

ditioned upon the settlement of other Indians or Freedmen upon these lands.

"In plain words the government has no ownership of the lands, and cannot have without a sale from the Choctaws, Creeks and Cherokees. In the matter of the Creek lands some portions have been appropriated and paid for, or payment assumed by the government. The government has no lands subject to pre-emption and homestead by white men within the limits of Indian Territory, and all schemes for settling upon any lands therein by white men are in violation of lawful treaties. See Revised Statutes, section 2118, which reads:

"Every person who makes a settlement on any lands belonging, secured, or granted by treaty, with the United States to any Indian tribe, or surveys or attempts to survey such lands, or to designate any of the boundaries by marking trees, or otherwise, is liable to a penalty of one thousand dollars. The President may, moreover, take such measures and employ such military force as he may judge necessary to remove any such person from the land."

"This is plain language, and worthy the attention of every citizen, especially those who are leaguing themselves together to invade Indian Territory."

"The scheme to settle this country is simply the result of the defeat of the 'Territorializers' in the late Congress. There are several railroad companies interested in having 'Indian Territory' opened up for settlement.' It is currently and boldly asserted that 'funds are not wanting to sustain the invaders in the new departure.' The Indians of the territory believe that the scheme points to a breaking up of the autonomy of the Indian tribes in the territory, and a general destruction of all treaty pledges."

It is sincerely to be hoped that the proclamation of President Hayes, warning all citizens against taking part in such flagrant violations of law and right, may prove effectual; and that the Government of the United States may not relax its vigilance and determination to check this intended invasion.

The case of the Ponca Indians is also reviewed. Of these, it says:—

"In April, 1877, under the authority of the Indian Office, the Poncas, some 700 in number, were removed from their old reservation, in Dakota, to the Indian Territory. They had attained to a considerable degree of civilization, lived in comfortable log houses, wore garments after the fashion of the white man, used the furniture and implements of white men, of similar degree, cultivated their lands and sent their children to a flourishing school, but they were surrounded by, and subjected to depredations from their natural enemies, the Sioux; and hence it was deemed best, with their quasi consent, to remove them to the Indian Territory.

"The new location, rich and beautiful as it

is, has not satisfied them. Malarial diseases have thinned their ranks, and they pined for their old home.

"Some thirty of them stole away from Indian Territory, and were making their way northward, when they were arrested by the military and imprisoned preparatory to being sent back to Indian Territory. A writ of habeas corpus was issued in their behalf, calling for the grounds upon which they had been restrained of their liberty. No crime was alleged; no invasion of the rights of others; no threats of violence on their part. The return to the writ, was simply, as I understand it, that they were Indians, who had left their reservation without a permit from the agent; and the Government was exercising the right as claimed, to send them back, and to imprison them as a means of putting that right in force."

"Judge Danly, of the United States Court at Omaha, who had under consideration the application for a writ of habeas corpus, decided in favor of the discharge of the Indians. The following are the points in his opinion:—

"1. That an Indian is a person within the meaning of the laws of the United States, and has therefore the right to sue out a writ of habeas corpus in the federal court and before a federal judge in all cases where he may be confined or in custody under the color of authority of the United States.

"2. That Gen. George Crook, respondent, being commander of the military department of the Platte, has custody of the relators under color of the authority of the United States, and in violation thereof.

"3. That no rightful authority exists for removing by force any of these Poncas to the Indian Territory, as Gen. Crook has been directed to do.

"4. That the Indians possess a right of expatriation as well as the more fortunate white race, and have the inalienable right to 'life, liberty and the pursuit of happiness,' so long as they obey the laws and do not trespass on forbidden ground; and

"5. Being restrained of their liberty under the color of the authority of the United States, and in violation of the laws thereof, Standing Bear and his party must be discharged from custody and it is so ordered."

The same paper contains a copy of a petition from respectable citizens of Yankton, Dakota Territory, asking that the Poncas be allowed to return to their old reservation-lands in Dakota, which still belong to them, and are unoccupied—the Sioux having declined to settle thereon.

Standing Bear, who was one of the Poncas imprisoned by Gen. Crook, and discharged by the decision of court, appears among the recent subscribers to "The Council Fire," which so warmly defends the rights of his people.

The greater our power the greater our danger, if we walk not in the fear of the Lord.

"For The Friend"

Some Extracts from the Diary and Letters of Ebenezer Worth.

(Continued from page 362.)

To Robert Scotton and Joseph Elihinton.

3d mo. 17th, 1847.

Dear Friends:—Having understood from Joel Evans' last letter that Robert was spending some time in the city, I feel inclined to address a few lines to you. * * * You are both aware that settling an old account between such parties as P. and the Indians will take up a good deal of time, and be attended with trouble. I have sometimes flattered myself that Friends would be able to get some suitable person to come out and assist in that, and to take charge of the concern. If I have done wrong in thus flattering myself, I desire our Divine Master may forgive me. If it is his blessed will that I should remain here, surely it must be right; this affords consolation. I feel the necessity of more resignation, a willingness to be anything or nothing, as it may please Him, who is able to bless the labors of his weakest instruments, (if I am worthy at all to be called an instrument), and make them fruitful of good. I feel desirous to give the whole matter up (in relation to my stay here) to Him who is forever worthy to rule and reign in and over his people. In a conversation with Moses (Pierre) some time since, my feelings (were) hurt to hear him reflect as he did on Friends, for not doing more to help him out of his troubles; he compared the situation of the heirs of Corplanter to a flock of sheep with a wolf among them; he said J. and J. had gone home and left them in the hands of the wolf. I talked with him more plainly than I had ever done before, and told him Friends wished to assist them in getting this business settled. J. and J. had come out for that purpose, and had tried hard to effect it; that they themselves had opened the door and let in the wolf; that their own act had got them into their present difficulties; that there was only one way for them to get out,—the way they had been advised to. I had tried to convince them that the favorable circumstances under which they held their land ought to be an inducement to try to keep it. In conversation with one of them, in order to work a little upon his feelings and strengthen his attachment to their reservation, I told him, I wished them to keep it for four reasons, one of which was that it was once the property of old Complanter, upon which he lived, died, and was buried. I have since felt it necessary to be careful not to try to settle their affections too much on earthly things, lest it might draw them from that which is infinitely better. So far as it regards industry, I have tried to persuade the Indians generally that it was a religious duty to be industrious and make a good use of our time in trying to get an honest, comfortable living for ourselves and families. * * *

A few days after getting through with the liquor business mentioned in my last to the Committee, I found a little note under the door of the school-house informing me that I and two others had better be on the lookout, that T. and F. was preparing, and vengeance declared. I understand T. and F. to mean tar and feathers; this made me feel rather uncomfortable for a short time. I have since, through unmerited mercy, been much favored at seasons to feast on true enjoyment; their threats now, do not concern me. I have also

at times felt of late, great weakness and discouragement, and have remembered "that the Lord could make the barren wilderness a fruitful field;" may all the fruit here and elsewhere be unto the Father, with his dear Son.

In love I remain your friend,

E. WORTH.

Diary resumed.

1847. 4th mo. 3d. I (visited) Amos Thompson, an Indian, he has been unwell for some time—there seems but little prospect of his being restored to health. I read some in the Testament and talked to him, after which we sat awhile in the quiet. I thought I felt the language of encouragement to him.

4th mo. 4th. I have been tried with discouragement; (but) my "sitting" this morning closed in a degree to satisfaction; took a walk after dinner, and was truly comforted and strengthened.

7th mo. 27th. Since the above (was written), I have passed through discouragements and trials, which I have no doubt might have been borne with more fortitude and patience had I kept my eye more single to our Divine Master. I have, notwithstanding, through his unmerited mercy, had seasons of comfort and refreshment. Within a few days, I trust I may say, I have felt my mind in a degree humbled and comforted. I feel more resignation is wanting to the will of a kind and merciful Master.

9th mo. 7th. I have been mercifully favored with a renewed sense of the goodness and mercy of the Almighty, to bear with, and revisit me. Oh! may these seasons of mercy and enjoyment, with the covenants I have made, be borne in mind, and if I should be spared to read this in years to come, may I profit by it. Oh! that in my time that is to come, there may be more of the fruits of righteousness than in the past. Last First-day was a week, the 29th of last month, was a day of enjoyment; I spent the afternoon to my comfort, had an open and satisfactory opportunity with Isaac Snow; also one with Moses and his wife Mary, in which I was favored to feel a concern for their spiritual prosperity, and language to express it. I laid awake a good deal of the night following; in which I had sweet peace and enjoyment.

9th mo. 23d. I left my boarding-house this morning to go to see Samuel Patterson, having been requested by his father to call and talk with him on the subject of his intemperance; had a pretty satisfactory opportunity with him, for which I felt in a degree thankful. Returned home, and in the afternoon had my week-day "sitting;" it was a highly favored season, I know not that I remember one more so; I think I may say I was mercifully favored with the spirit of prayer, greatly to my comfort and encouragement.

(To be continued.)

It is a precious state to feel the mind staid upon the Lord, walking in his way; to know the girdle and bridle of Truth, and a being girdled and bridled with it; to know every high thought and imagination brought down and subjected unto Christ the light, the way. This is possible to be known now, as in times past. It is in the thoughts, will, and imaginations that the enemy of man's happiness gets and builds his strongholds; and until they are broken down, subjected and destroyed by the power of God within, no peace,

quietness, nor soul-satisfaction, can be enjoyed nor sitting down in the kingdom of God, drinking of the rivers of pleasure that are at his right hand, can be attained to or partial of.—William Shewen.

Life and Adventure in Japan.

BY E. WARREN CLARK.

(Continued from page 362.)

Nearly three hundred years ago the foun of the Tyeoon dynasty dwelt in a great cast. This castle was at Shidzoka, and was rounded with high walls and broad moat with water flowing through them. This cast is now in ruins, and fire and earthquake h left little there save the walls and mounts a crumbled towers shaded by patriarchal pin. For a century or more these castle grou remained unoccupied, and the birds and w animals had learned to make it their hom while the city still thrived without the wall and grew in crescent form around the broo outer moat of the castle.

After I had lived a year at the Buddh temple, already described, the governme decided to build me a house in foreign sty and I was requested to select the most suab site for its location. My two frien Katz and Okubo, who had been concille in the court of the last Tyeoon (and who we more recently instrumental in calling me Japan), were the persons who built me th house, as a gift from San-miesan, a litt prince of the province, whom they had charge. This little prince was greatl r spected in the region, as he was descende from those who had ruled the country f three hundred years, and would have bee the present Tyeoon had not that power bee overthrowen.

Katz and Okubo thought my temple too far away from the school and too unappreciated, besides being inconvenient in many ways. They wisely proposed the new house and I chose the deserted castle grounds as the best place upon which to build.

The Japanese carpenters had never seen foreign house, nor were they familiar with modern methods of construction; neither did I consider myself an architect, or capable of very explicit directions. But I wanted a house well built, comfortable, and secure. So we determined to overcome all obstacles. I drew up the plans with care, and for nearly six months hundreds of stone-cutters and carpenters were engaged in executing them. A portion of the embankment on the corner of the castle moat was cut away and faced with solid masonry, constructed from stones drawn from the ruins of the old castle tower. The stones for the walls of the house were brought from a neighboring province.

I experienced much pleasure in watching the progress of my crude architectural ideas as they slowly assumed solid reality. But the work was no child's play; for not only did the ground plan and apartments have to be mapped out, but every thing inside and outside the house had to be explained, for the Japs had no mode of idea of their meaning than the man in the moon. Doors, windows, stairs, closets, chimneys, and other minor details had to be drawn and presented to the head carpenter by pictures and measurements. Sometimes the most amusing mistakes would occur, owing to his never having seen the objects in question. The carpenters were skilful in imitation beyond any thing you could believe.

ly brought back the most perfect little sets of the things described, and it was now necessary to correct them.

After the work of building was fairly commenced, the roof was completed in a month, the heaviest part of the foundation in two months more; for you must know that it could be decidedly contrary to Japanese practice to do any thing except in a manner exactly opposite to all our preconceived notions on the subject. In a Japanese house the roof is always built first, and the other parts afterwards! With a kind of celestial instinct, they always commence at the highest point and work downwards. In all the lesser occupations of daily labor, such as digging, sawing, planing, cutting lumber, boring holes, or turning screws, the Japanese do just exactly the reverse of what people do on the other hemisphere.

The chimneys, by the way, were the most mysterious part of the house to the carpenters. For a long time they could not be prevailed on to build them; but at last they broke through the floors and roof, and, with the aid of the stone-cutters, put them in.

They regarded the building of the house as a wonderful achievement, and hundreds of people from all over the country came to see, supposing that all houses in America were built in the same style.

On the south side of the house a court yard seen, where I gave a "stereoscopic exhibition" on Christmas eve to several hundred Japanese, the parents and friends of my students. The evening was beautiful, and the people came early with printed tickets that invited them to "a trip in imagination through foreign countries and the starry heavens!"

Not the least interesting part of the entertainment to them was the opportunity given of viewing the interior of my house. Ushers were appointed to guide them around, and for an hour the people poured in and out of the house, uttering all manner of exclamations of wonder at what they saw. And well they might, for the poor creatures had never been accustomed in their own homes to any thing they would call comfort. Living and sleeping, as they do, on straw mats, in simple wooden houses with paper windows and shutters, and without any thing that we could call furniture, except little lacquer tables a foot high, of course a foreign house, furnished in American style, appeared to them luxurious beyond description.

They examined every object with the minutest care; carpets, rocking-chairs, table-covers, writing desk, mirrors, lace curtains, chandelier, beds, and bureaus—all were of great novelty to them. The brilliant-colored oil-cloth in the hall created astonishment as they walked upon it, for they could not imagine what it was or how it could be made. The walls and ceilings were covered with bright-tinted paper of various patterns—for we do not use plaster ceilings in this land of earthquakes—and the Japanese understood the wall paper very well, for it is from Japan that Europeans first got the idea of covering their walls with paper.

But when the Japs, especially the ladies, came to explore the kitchen, their admiration for the cooking-range and chimney was unbounded. They had never seen ovens, or appliances for baking, roasting, &c., and every thing in the culinary department was a reve-

lation to them exceeding the novelties of the parlor, bedrooms, or well-stocked pantry.

When it was dark I seated the people on straw mats in the court-yard, and delighted them with the stereoscopic entertainment. They had never seen such a sight before, and the beautiful pictures of scenes in America and Europe were like glimpses into another world. The revolving astronomical diagrams excited great astonishment. I tried to prove by the shadow of the earth on the moon, and by the ship sailing around the globe, that our world was round. But the old folks shook their heads, and were sceptical on that point; for they had been in the world longer than I had, and knew it was flat!

(To be continued.)

For "The Friend."

Morning Devotion.

The practice of turning the thoughts to our Creator, when we first arise in the morning refreshed by a night's slumber, is one that many Christians have felt to be very profitable to them. It is good for us to have the spirit covered with a sense of the Divine Presence, and that living desires should ascend on high for preservation in the fear of the Lord through the labors and exposure of the day.

In adopting and recommending the advice contained in the following brief paragraphs, the writer desires to explain, that by the use of the word "pray," he does not mean simply an utterance of words which may be addressed to the Almighty without the heart being so impressed as to enable it to offer true prayer, but he refers to that waiting on the Lord in reverential silence and in fervent exercise of mind, in which the spirit of prayer is often felt to arise.

MORNING PRAYER.

"What rules of life do you give to your young Christians?" I am often asked. "Only our morning prayer."

"If I can secure a few quiet, thoughtful, sacred moments on rising, the influence goes all day with the soul."

"Before the mind touches study or business, or gets absorbed in any line of duty, prayer. Before any temptation has met you, pray. The time to put your armor on is the morning. Have a few moments of close counsel with your wisest Instructor."

"I would thus urge on the young Christian just what I feel the need of myself.—E. P. Powell.

Additional Advice.

Books.—The reading of precious books is a source of much danger, particularly to young persons. There are some pretending to advocate the cause of religion, which tend to settle the reader in a more belief in the outward coming of Christ, yet overlooking his spiritual appearance in the heart, and the work of regeneration by his Holy Spirit, without which our Lord declared, that no man can see the Kingdom of God. These, we believe, are instrumental in obstructing the work of religion, and the spreading of the reign of the Prince of Peace. We would affectionately press upon all our members, to keep upon their guard against these insidious attempts to draw the mind away from submission to the washing of regeneration and the renewing of the Holy Ghost, which their Saviour would effect in their hearts. Dear Young Friends, love retirement, as at his feet, that you may

be taught by Him. Frequently read the Holy Scriptures and the writings of your own Society; which would, as you obey the Truth, strengthen you to turn your back upon all the seductions of Satan, the corrupting amusements of the day, and the attractions to mingle with those who are enemies to the cross of Christ. Religion is an inward work; and all who really know it abide with their Lord, both in his sufferings, and when his banner over them is felt to be love.—*Philadelphia Yearly Meeting, 1860.*

Burials.—Our members are tenderly advised and cautioned against a growing tendency in the present day to conform to the ways and customs of the world, in relation to the expensive coffin, habiliments and floral decorations bestowed upon the perishable body upon the occasion of its burial. The desire was expressed, that in reference to the two first-named departures from simplicity on these solemn occasions, we may let our moderation be more fully known to all men; and that the other practice intended or calculated to drown solemn thoughts of death and the grave, may be withstood by all our members.—1877.

Accepting Responsibilities.

We have often had occasion to notice with disapproval the spirit so common among men, and not altogether unknown to women also, of desiring high and prominent positions in political, commercial, literary or social life, and the many unworthy and undignified efforts made to obtain them. From the longing of the school boy for pre-eminence in his base ball club to the secret craving for the President's chair, this spirit is rife among us, and to it we may trace much of the inefficiency of execution, the perversion of means, the unfaithfulness to trusts, and the general corruption which inflicts such grievous stains upon our organizations, and frustrates so much of their power for good.

There is, however, an opposite extreme, into which another very different class of people is in danger of falling, and which, while winning a kind of sympathy, from its utter antipathy to all trickiness and wire-pulling, is yet to be regarded as a deplorable public calamity. We allude to the unwillingness of good and capable men and women to assume positions of trust and importance to which they may be appointed. It may be thought that this is so rare a defect, and forms so refreshing a contrast to the eager feverishness of office-hunting, that it needs but little reprobation. Yet this is not the case. It is surely quite as important that all places of trust be filled with suitable officers as that unsuitable ones be kept out. Indeed it is only by the former coming to pass, that the latter can be possible. So whenever the right man declines, from any cause, to fill the place for which his talents or education or native qualities peculiarly fit him, he inevitably contributes a large share towards putting the wrong man in. Probably but few persons realize that this is so. To decline an honor seems so natural a thing to a modest person, so merely negative an act, so utterly innocent of any ill intention, that it cannot involve any responsibility, or be the cause of any injurious effect. Yet, when we reflect that, to one person well fitted for an honorable position, there are probably a hundred eager aspirants who are not at all qualified to discharge its duties, we

shall see that the retirement of that one is the turning point which throws the work almost certainly into incompetent hands. True, the lack of competence is the usual plea made by those who shrink from assuming responsibility; but, unfortunately, it is those who are best qualified who usually feel this lack, while the careless and unthinking, eager only for the emoluments or the éclat of the work they see for, are loath in proclaiming their general abilities and special fitness. Such modesty, then, however pleasing to look upon, should give way before the judgment of others, and learn to distrust its own convictions, rather than suffer them to imperil a good cause.

Many other reasons are also urged for refusing positions of trust. Want of leisure, pressing duties, the thanklessness of office, its publicity, its criticism, oftentimes its undeserved reproach and censure. It is true that such objections are often based on facts. Valuable public work by no means receives all the honor and gratitude that it deserves. Self-sacrifice is sometimes rewarded by obloquy, and earnest effort with indifference or scorn. But what then? Is there not another side to be realized? Is not all this effort and self-denial, and even suffering for the good of the community, a means of paying a large debt which is due to society? Ancient civilization taught the strong to use the weak, and the wise to use the foolish, as stepping-stones to further power and glory for themselves, but the civilization which is born of love and charity teaches that strength and wisdom, and talents, and power, and education, and money, and leisure, and every other privilege, should be freely offered as stepping stones on which those less favored may climb to heights which would otherwise be wholly inaccessible. All or any of these advantages are so many obligations to use them for the general good. "Noblesse oblige" is as true as it ever was in feudal times, and bears even a higher application.

If each one who possesses any good thing is bound to see for himself that it is doing its reasonable work for the world, surely, when his fellow men, conscious of their need of it, combine to ask him to use it for their benefit, he should have grave and weighty reasons, indeed, to justify him in declining. It is no longer the honor that is done to him that should be uppermost in his mind, but the service that is due to them. The first he might resign, but the latter he dare not, if he would be faithful to his trust.—*Public Ledger.*

TEACH ME TO LIVE.

Selected.

Teach me to live! 'tis easier far to die;
Gently and silently to pass away,
On earth's long night to close the heavy eye,
And waken in the realms of glorious day.

Teach me that harder lesson, how to live,
To serve Thee in the darkest paths of life;
Arm me for conflict now; fresh vigor give,
And make me more than conqueror in the strife.

Teach me to live! my daily cross to bear,
Nor murmur though I bend beneath its load.
Only be with me; let me feel Thee near;
Thy smile sheds gladness on the darkest road.

Teach me to live, and find my life in Thee;
Looking on earth and earthly things away;
Let me not falter, but unflinchingly
Press on, and gain new strength and power each day.

Teach me to live! with kindly words for all;
Wearing no cold, repulsive brow of gloom;
Waiting, with cheerful patience, till Thy call
Summons my spirit to her heavenly home.

LINES.

May we so live, that when we die,
We may mount to realms on high,
From the pleasures which arise
In a blessed paradise.
Mingle in delights eternal,
Where the scene is ever vernal,
And adore the Lord, who reigns
In those bright celestial plains.

Original.

queries whether the same principles would "discountenance any mere forms of mourning at funerals? Nature has its method of expressing its sorrow, and Christians need no artificial or ornamental signs to display theirs."

It very sensibly adds, "Funeral badges or apparel make expenditures which many cannot afford, but if the custom obtains, it is necessary articles must be procured, although those on whom the expenses fall have not the money to spare to procure them."

The Presbyterian Church and Romanism.—At the recent meeting of the General Assembly of the Presbyterian Church at Saratoga the action of the Assembly of 1835 was affirmed, which states its belief that the Roman Catholic Church has essentially apostatized from the Christian religion; and which recommends its members "to endeavor by the diffusion of light by means of the pulpit and the press, and all other proper and Christian means to resist the extension of Romanism, and lead its subjects to the knowledge of the truth."

At the late meeting a resolution was adopted protesting against the political ambition of Romanism and its sectarian demands for the public funds.

First-day in Chicago.—The Chicago Interior says:

"The picture of nearly three thousand saloons in full blast on Sunday, from an hour before any church doors are open, to an hour at night long after the sextons have closed them, is a dark and fearful one—fearful of account of the ruin which is already reaping, and still more fearful when we think of the harvest of ruin that may be before us. But the picture is not darker than the facts. It is a picture true to the life. We vividly recall to mind, that it was on precisely such a Sunday night eight years ago—a night following a Sabbath utterly desecrated by revelry and drunkenness in all parts of the city—that the great fire originated, which in thirty-six hours, laid the greater part of it in ashes buried hundreds of victims under its ruins and clad all hearts with dismay or despair. But here we are to-day, utterly oblivious of the lesson, utterly reckless of the danger, with precisely the same elements of demoralization, and the same causes of destruction, which existed then, all in full force again, and to all appearance, with a tenfold increase of power for evil. This resurrected metropolis of a great Christian people, in her pride of atheism, her greed of gain, and her insane lust of forbidden pleasure, has not only set God's law at defiance, and the laws of the State of Illinois at defiance, and the public sentiment of all the law-abiding classes of her own citizens at defiance, but by solemn vote and ordinance, has decreed that so far as the liquor traffic can destroy it, there shall be no Sabbath of rest in Chicago—other trades and business occupation may cease, but this one privileged class shall go on unmolested, and unchecked."

Religion and Morality in Germany.—The *Sunday at Home* contains an article on this subject, prepared by Wm. Tallack, of England. He says, "it is impossible for the friends of that great historic empire to divest themselves of the gravest anxiety on its account when, as recently and at present, many of its official authorities and most honored citizens unite in public lamentations over a grievous decadence in the condition of the national

A CONCLUSION.

There's no abiding city here,
That rears its spire in yonder sphere;
But unto it the coast is clear
For those who live in holy fear,
Who keep the sacred presence near.

THE TURNED LESSON.

"I thought I knew it," she said;
"I thought I had learned it quite!"
But the gentle teacher shook her head,
With a grave, yet loving light,
In the eyes that fell on the upturned face,
As she gave the book
With the mark still set in the self-same place.

"I thought I knew it!" she said,
And a heavy tear fell down,
As she turned away with a bending head;
Yet not for reproof or frown,
And not for the lesson to leave the pain,
Or the play hour lost;
It was something else that gave the gain.

She could not have put it in words,
But her teacher understood,
As God understands the chirp of the birds
In the depths of an autumn wood;
And a quiet touch on the reddening cheek
Was quite enough;
No need to question, no need to speak.

Then the gentle voice was heard,
"Now, I will try you again,"
And the lesson was mastered, every word;
Was it not worth the pain?
Was it not kinder the task to turn
Than to let it pass
As a lost, lost leaf that she did not learn?

Is it not often so,
That we only learn in part,
And the Master's testing time may show
That it was not quite "by heart"?
Then He gives, in his wise and patient grace,
The lesson again,
With the mark still set in the self-same place.

Only stay by his side
Till the page is really known;
It may be we failed because we tried
To learn it all alone,
And now that He would not let us lose
One lesson of love,
(For he knows the loss), can we refuse?

Then let our hearts be still,
Though our task be turned to-day,
O! let Him teach us what He will,
In his most gracious way,
Till, sitting only at Jesus' feet,
As we learn each line,
The hardest is found all clear and sweet.

—Good Words.

Religious Items, &c.

Mourning Attire.—The German Baptists at their meeting for the Southern District of Ohio decided that it was not in harmony with the Gospel for brethren [as they term themselves], to wear crapes on their sleeves when acting as pall-bearers. The New York Independent criticises this action in a light spirit, by saying, "We have on several occasions examined specimens of crapes, and have been unable to see anything in it not in harmony with the Gospel." The *Primitive Christian* in its reply, says, "The Author of Christianity gave special charges to his disciples not to make a display to be seen of men when performing their religious services. And it

tion and morality, and over a marked rapid increase in the statistics of crime. For example, there appeared in the leading English newspapers, a few months ago, a statement that 'The Chaplain of the Imperial family preached a sermon before the Emperor and Imperial family, in which he bore of the present state of morality, or rather morality, in Prussia, in very strong terms. He said, "Affection, faith, and obedience to the word of God are unknown in this country, this our great German Fatherland, which properly was justly called the home of the sinner." On the contrary, it really seems as if here the father of all lies who now is worshipped in Prussia. What formerly was considered generous and noble is now looked upon with contempt; and theft and swindling, called by the euphonic name 'business,' 'crimes are concluded without the blessing of the Church, concluded 'on trial,' to be taken, if not found to answer. We still see a Sunday, but it is only a Sunday in name, as the people work during church hours and spend the afternoon and evening in riotous public-houses and music-halls; while the upper classes rush to the races, preferring near the panting of the tortured horses to hearing the word of God, which is ridiculed in the press and turned into blasphemy in the popular assemblies.'

W. Tallaek feeling it very difficult to accept a gloomy picture as the above as a faithful description of German society, yet being unable absolutely to reject it when coming to so authoritative a source, took occasion during a recent visit to Berlin, to refer to the same complaints by the Imperial chaplain, and appealed to various persons in religious and official positions for their own opinions on the subject. It was sad and surprising to find an almost unanimous agreement as to the truth of these allegations; though there is not quite the same amount of unanimity as to the causes of so deplorable a state of affairs. But there was found to be a general concurrence of opinion that the great war of 1870-71 between Germany and France was a turning-point in the national history, and that since that date things have been going decidedly from bad to worse. Published statistics show, that during five years from 1872 to 1876 inclusive, crimes against life and property have increased 50 per cent.; and crimes against morality 56 per cent.

"A careful series of house-to-house inquiries in Berlin, show that in less than one house out of every eighty is there any regular use even possession of the Bible. So small is the proportion of the attenders at religious worship in the German capital, that, to a population of more than a million, there are only one hundred and ten ministers of religion, both Protestant and Catholic. The average number of persons in each congregation is below one hundred."

This deplorable condition of things is not caused by ignorance, for the people are generally well educated; nor by the absence of artistic taste, which is well developed, and supplied with abundant objects for its exercise in collections of pictures, statues, and museums of various kinds; nor by intemperance.

One of the most fruitful sources of the corruption in which religion is held is the connection between the church and State—the church being considered as little more than one of the departments of the government.

The counsels of the ministers of religion could scarcely be expected to have much weight with the people under these circumstances. Though the Government enjoins the study of the Scriptures in the public schools, yet some of the University professors whom it appoints and pays, are permitted to issue books of a most skeptical tendency, which irreverently attack the fundamental principles of Christianity.

One of the most fruitful sources of evil to Germany is the enormous development of the military system. Conscription forces the men and youths into the army by the hundreds of thousands, and there in the barracks and among their comrades, they are exposed to gross temptations, without the restraining influences of home-life to protect them. Comparatively few can stand the pressure unimpaired, and the moral corruption thus produced is a greater evil to Germany than the pecuniary burden.

The author thus sums up his article:—"It is not the supremacy of the military or of the police, it is not the power of the cannon or of the prison-cell, but it is the mightier sovereignty of the principles of the Bible and the Gospel that can alone restore Germany to a healthy social condition."

Natural History, Science, &c.

Kungu Cake.—During a portion of the year, the northern dwellers on Lake Nyassa have a harvest which furnishes a singular sort of food. As we approached our limit in that direction, clouds, as of smoke rising from miles of burning grass, were observed bending in a southeasterly direction, and we thought that the unseen land on the opposite side was closing in, and that we were near the end of the lake. But next morning we sailed through one of the clouds on our own side, and discovered that it was neither smoke nor haze, but countless millions of minute midges called "kungu" (a cloud or fog). They filled the air to an immense height, and swarmed upon the water, too light to sink in it. Eyes and mouth had to be kept closed while passing through this living cloud; they struck upon the face like fine drifting snow. Thousands lay in the boat when she emerged from the cloud of midges. The people gather these minute insects by night, and boil them into thick cakes, to be used as a relish—millions of midges in a cake. A kungu cake, an inch thick and as large as the blue bonnet of a Scotch plowman, was offered to us; it was very dark in color, and tasted not unlike caviar, or salted locusts.—*D. Livingstone.*

At a recent meeting of a scientific company in England, a specimen of this cake was exhibited.

The Eruption of Mt. Etna.—A correspondent of the *London Times*, writing at Taormina, Sicily, on May 29th, gives an account of the eruption of Mount Etna. He says: On the night of May 25th there were continuous murmurings from Etna, but, this not being an uncommon occurrence, it attracted but little or no attention. On the morning of the 26th these murmurings increased, and I called the attention of a servant of mine to the fact, but he positively denied that the sounds proceeded from the mountain at all; he rather thought the noise was made by the surf beating on the seashore eight hundred feet below, a dull sound which it much resembled. Somebody called attention to the

glass rattling in the window frames, and somebody else suggested earthquake, a suggestion which was met with derision. However, at about half-past 12 p. m. a dense cloud of smoke was seen to be issuing from the great crater of Etna—that is, as well as its origin could be traced amid the clouds with which the mountain was covered. It was a broad cloud, which stretched over the land and over the sea until it was lost on the horizon. It had a very red, or rather it might be described as of a burnt sienna color, and minute specks of ash began to fall, but not in any quantity; we could trace it in its course far into the night, and, in fact, until we all went to bed. On the morning of the 27th all seemed in repose: not a cloud was upon the mountain, save the flat cloud with a lump in the middle, which often overhangs the crater in the summer months, and which the Sicilians call "the Cardinal's Hat." But at half-past eight a dense cloud was observed to issue from the earth upon the northern slope of the mountain, as well as could be judged, about half-way between Linguagrossa and Randazzo, but much higher up the mountain. This cloud grew and spread, and became so dense that the whole mountain became perfectly invisible; the light became so much obscured that it resembled the darkness produced by a total eclipse of the sun, and a rain of fine black ash, like powdered emery, commenced. So heavy was the fall that the promontory of Naxos, but two miles distant, became perfectly invisible. This black rain continued the whole of the day; loud reports could occasionally be heard from the mountain, and no doubt now remained that an eruption on a grand scale had commenced. No positive information could be obtained as to its exact locality, for nobody could ascend the mountain under such circumstances. Etna is so enormous and so precipitous and rugged that a voyage of investigation in such a rain of ash and such darkness would have been almost an impossibility. We did all we could to obtain news, but very little that could be depended upon was acquired.

All night this black rain went on. About midnight huge fires could be seen looming through the dense clouds. In the morning a most extraordinary scene presented itself; the whole face of nature was black, the hills and plains were black, the seashore was black, the usually dazzling white roads were black, the roofs of the houses were black. My garden is just now a mass of flowers, but every leaf, every petal, every cup, was loaded with black, the edges of the petals giving a bright line of the color of the flower. If a breath of wind passed, a black shower fell from the trees, and still the black rain went on. The effect upon the mind was most depressing. This ash penetrates everything; it is found in closely-shut linen drawers, in close boxes; it is all among my paper as I write, and it seems to take delight in inserting itself in one's food—for two days I have been chewing grit. The effect of trees and figures in this universal black is very strange, the colors standing out with startling brilliancy.

At two o'clock in the day I started on horseback to Piedmonte to try and gain some positive news, and heard that three craters, each about a mile apart, and that situate like the points of a triangle, had opened in a valley about six miles above a postal station called Passapescara, a place nearly midway on the

road between Linguagrossa and Randazzo—a most difficult place to reach, as lodging of any description could not be obtained within 14 miles, over precipitous and rugged ground, with every path obliterated by the ash, the mountain thundering and vomiting fire in unknown directions, with the terrible darkness and eternal rain of black ash, and general consternation everywhere. The lava was said to be flowing, but only its reflected light could be seen at night, as it was in a valley which, as far as I can ascertain, must be next the "Valley del Bove."

My eyes were most painfully inflamed by the fine ash as I returned, as were those of my horse. My pockets were full, my boots were full; it was down my neck, in my hair and beard, and my ears were blocked up with it; the polished surface of my saddle was ground away with the grit. On the road home I came upon a priest enlarging upon the eruption to a select audience of *contadini*, and ventilating his knowledge by describing the destruction of Pompeii, and, among other accuracies, described the sentinel at the Herculeanum gate sticking to his post through it all, and being found with his *gun* 1800 years after.

At night the scene was magnificent; a tremendous stream of lava, many miles long, descended in the apparent direction of Randazzo, while from the new craters great balls of fire were thrown high in the air and burst into showers of fire, like gigantic rockets, accompanied by thundering explosions. This morning the explosions are still going on; the stream of lava seems more active than ever, but the ash has much diminished, and although much of the mountain is obscured, it is by a cloud apparently of vapor rather than of ash, and this gives indications of clearing away, when the whole scene may become visible. Two English gentlemen left here this morning to try and reach the craters.—*Public Ledger.*

Healthful Effect of Fire.—D. Livingston in his travels in Africa observes, that "in occupying one night a well-built hut, which had been shut up for some time, the air inside at once gave us a chill and an attack of fever, both of which vanished when the place was well ventilated by means of a fire. We have frequently observed that lighting a fire early in the mornings, even in the hottest time of the year, gives freshness to the whole house, and removes that feeling of closeness and languor which a hot climate induces."

The residents of the unhealthy lowlands along the sea-board portions of our Southern States are well aware of the health-preserving effect of a little fire on the open hearth, in the mornings and evenings of even hot and sultry weather. A resident on the Isle of St. Helena said she had a fire kindled daily during the sickly season from the Sixth to the Tenth month.

Sugar from Mauritius.—Something like one-tenth of the sugar in the world is produced in Mauritius. McChloch, in 1853, put down the world's produce at 1,250,000 tons. In that year the island produced about 126,250 tons. In 1862-3 the crop produced 165,000 tons, the largest quantity ever made in Mauritius in a single crop. These figures are independent of sugar made from beet or other sources besides the cane. The crop during the *coupee* just over is estimated at 125,000 tons. Of this the larger portion is exported, the island

consuming annually about 7,500 tons. Beet-root sugar can be classed among the natural enemies of the cane; the very mention of its name in Mauritius acts like the wave of a red flag to a bull—a good year for "beet" meaning a bad year for sugar; a failure in the former crop will add several shillings to the price of a hundred weight of cane sugar, a difference which means to the planter a good income for the year, or the reverse. Beet sugar is encouraged by bounties by the French Government; hence its cheaper production, and its rivalry with cane sugar.—*Frazer's Magazine.*

THE FRIEND.

SEVENTH MONTH 5, 1879.

We have received a number of communications from different parties in America and from one person in England, referring to the Editorial in No. 36 of the present volume of "The Friend," which contained the doctrinal minutes issued by the Select Yearly Meeting of those who separated from Ohio Yearly Meeting in 1854.

The first of these, in point of time, is from one who feels himself aggrieved by the expression, "the heresy of E. Hicks and his followers," as used in that editorial. He says, "Hicksite is an appellation we never acknowledged." * * * There is a large number with us who accept the Scriptures as Friends always have, and believe that the Holy Spirit alone can truly interpret them. Our discipline I believe acknowledges all the offices of our Saviour, as does yours, and whatsoever is to be sparingly known of the outward is, through obedience to His inward and spiritual appearance in the heart. * * * Our discipline is a sufficient refutation of our denying the divinity of Christ, and the authenticity of the Holy Scriptures." After some further remarks he intimates that it would be well for those who have the oversight of "The Friend," to "avoid unjustly and reproachfully calling us Hicksites."

We desire to avoid all *unjust and reproachful* language, and have no intention to use terms which can properly bear such a construction. But in consequence of the divisions which have been effected in our Society in the last fifty years or more, there are several independent bodies claiming the name of Friends; and if reference is made to the doctrines or movements of these, there must be some distinctive appellation used, or the readers of our paper will not know to whom we allude.

As to the doctrinal questions involved, we can unfeignedly rejoice in every evidence that those going under the name of Friends, or that any other branches of the Christian church, are being preserved in soundness of faith, or are being brought nearer to that standard. We would rejoice to know that many of the fellow-members of our correspondent hold the same views as ourselves with regard to the atoning sacrifice of our Saviour, as well as to the necessity of experiencing His work in our hearts in order for salvation. We have no harsh or unkind feelings toward these, or toward those with whose doctrines we cannot unite. But that there did exist a difference in doctrine at the time of the separation in 1827, is shown by

the document then put forth by those whom our correspondent is associated, who declares: "Doctrines held by one part Society, and which we believe to be sound and edifying, are pronounced by the other part to be unsound and spurious." In proportion as the difference here avowed ceases to exist, will the partition wall between the two bodies be removed.

A letter from England suggests that it was a mistake to state in the editorial we are considering, that "London Yearly Meeting was the first to accept that body of separation [the Binns' Meeting] as a meeting in unity with it;" as the writer thinks that the acknowledgment of it by some of the other Yearly Meetings preceded in point of time the action of London Yearly Meeting. We had not at hand the data to verify this statement (which does not affect the main subject-matter of the editorial), but we mention it, from a desire to be just to all.

A letter from a member of the Binns' Meeting in Ohio says, that many of their members have no unity with the act of the Select Meeting; and further states that the account of published in "The Friend," "I find to be admitted to be a true and correct report of the action in 1877, and also in 1878." This writer states that he had been informed by members of their Select Meeting, that the delegation of English Friends were not present when the subject was introduced, having previously left on their Western journey. We think this information cannot be correct, because we have received a letter from one of his fellow-members, who says that he was present when those minutes were adopted. The letter contains the following paragraph: "The English deputation is referred to in the article [the Editorial of 4th mo. 19th]. They of them were present when the minute of " was considered, and they heard the doctrinal views there expressed, &c."

The letter last referred to enters into an explanation of the meaning and a defence of the minute before quoted in our Journal, which it says, "Appears to be too brief and not explanatory enough to be correctly understood." We quote from it sufficient to enable the reader to understand the meaning which the writer attaches to the minute:

"I am persuaded that the apparent difference among Friends of your Yearly Meeting and ours, is largely owing to our standpoints and mediums through which we look, together with the side of truth upon which we look. There are a number of short extracts from George Fox given, which, to my mind clearly show that the author did not rightly view the language of the minute he commented upon. No Friends with whom I am acquainted (and I was present when those minutes were adopted), would at all deny the truth set forth in those extracts; there has been no one among us who has, to my knowledge, ever intimated a denial of the great and fundamental truth that the Holy Spirit visits or influences the hearts or minds of all men; hence the language of the minute, 'the Holy Spirit is sent to convince the ungodly of sin &c. The minute is very brief, and hence does not state just how this is done; but I presume that no one would object to the statement of George in their connection, 'that ever man is enlightened by the Divine light of Christ; that the grace of God that brings salvation appears to all men, and that a man

tion of the Spirit is given to every man profit withal.' These are different statements of a truth that we all believe. But that minute repudiates the inscriptionsal statement that a portion (which according to Webster means a part) of the Holy Spirit is placed in the heart of every one, when the doctrine of the light within is so stated as to convey the thought that the Holy Spirit, or Christ by the Spirit, influences or sits the hearts of all men for their salvation there is no objection to the expression; but the minute the meaning intended is stated to be a gift of a portion of the Holy Spirit in the heart of every one."

Without calling in question the sincerity of the writer of this letter, we remark that an apology he presents is by no means satisfactory to us. According to him, the whole matter aimed at in the successive minutes is mere abstract idea, which no part of the Society of Friends entertains, so far as we know, in any improper or incorrect sense. To attack the doctrine of the Light of Christ in the heart, and issue a formal protest against merely through a fear that some minds may become involved in a metaphysical cloud, to the proper meaning of the phrase, a "portion of the Holy Spirit," is little better than dema trifling. It is as irrational as it would be to denounce the scientific views of one who should speak of the sun's coming into room, where his rays entered. The expression "a measure or portion of the Holy Spirit," has been in constant use by the Society of Friends from its early days. Thus Robert Barclay in his Apology, § 11, Prop. and 6, says:

"God, who out of his infinite love sent his Son, the Lord Jesus Christ, into the world, who tasted death for every man, hath given to every man, whether Jew or Gentile, Turk or Egyptian, Indian or Barbarian, of whatsoever nation, country or place, a certain day or time of visitation: during which day or time it is possible for them to be saved, and to partake the fruit of Christ's death.

"That for this end God hath communicated and given unto every man a measure of the Light of his own Son, a measure of grace, or a measure of the Spirit, which the Scripture expresses by several names, as sometimes of the seed of the kingdom, the Light that makes all things manifest, &c.

"That God in and by this Light and Seed, invites, calls, exhorts and strives with every man, in order to save him; which as it is received and not resisted, works the salvation of all, even of those who are ignorant of the death and sufferings of Christ, and of Adam's fall. * * * By which also are speedily they that have the knowledge of Christ outwardly."

This fundamental doctrine of the Gospel as held by the Society of Friends is that which by the language of the minute of the Binneselect Meeting is aimed at, and described as dangerous, unsound and unscriptural."

Our correspondent appears to have convinced himself that something else is intended; but so long as the language remains unaltered and the holding of our ancient views on this subject is regarded as a "manifest disqualification for the station of minister or elder," the outside world cannot place any confidence in the doctrinal soundness of the body that issued it, whatever may be the sentiments of individuals among them.

In order to guard against the cavil which

has now again been raised after the lapse of 200 years, Robert Barclay further says, in § 13 of same Propositions, "By this Seed, Grace and Word of God, and Light wherewith we say every man is enlightened, and hath a measure of it which strives with him in order to save him. * * * we understand not the proper essence and nature of God, precisely taken, which is not divisible into parts and measures, * * * but we understand a spiritual, heavenly and invisible principle, in which God as Father, Son and Spirit dwells; a measure of which divine and glorious Life is in all men as a Seed."

As we are writing mainly for those who profess to hold the doctrines of the Society of Friends, it is not needful to repeat the texts of Scripture and the solid arguments by which Robert Barclay establishes the truth of the positions here quoted from his book. Those who are desirous of examining further into this subject, can obtain his Proposition on Universal and Saving Light, which is bound by itself separate from the Apology at large, and kept for sale and distribution at Friends' Book Store, No. 304 Arch St., Philadelphia.

Dublin Yearly Meeting convened on 4th mo. 30th. When the reports from the Quarterly and Monthly Meetings were read, respecting the condition of the various meetings for worship and discipline, a Friend spoke on the need of walking circumspectly, so that professing one thing, when we go out into the world, we should not practise another; we should take up our daily cross and deny ourselves, and follow the meek and lowly Saviour in simple obedience to the manifestations of his Spirit. We should avoid indolence, be diligent in business, so as to be able to attend our week-day meetings without leaving it to the world to say that it would have been better for us to mind our business than to go to meeting.

Another Friend remarked: "We require silent waiting before the Lord to receive that nourishment and instruction which we stand in need of. The Society has a literature of deep and instructive volumes by minds deeply opened by the Spirit of Truth. In Dublin there are those amongst us who feel that there is an unauthorized ministry, and I believe this is one cause why our meetings are not more numerously attended."

Attention was called to the increasing number of mixed marriages, twelve out of twenty-three being contrary to the rule. This seems to indicate that the alteration in marriage rules has not decreased the evil. When persons are united in marriage and are not united in religious feeling, it cannot result in the moral and religious welfare of their families.

A proposal to let the Yearly Meeting circulate by holding it at different places on different years, was left over for consideration another year.

The statistical returns showed the whole number of members to be 2943, of whom 173 were children. The number of deaths during the year exceeded the births by five.

A Friend calling attention to the neglect of the second meeting on First-day, said, "I have faith in our holy profession; if the members would gather together in silent exercise before the Lord we should not go away un-comforted or unsatisfied. Hearts would be brought into united exercise that would be blessed of the Lord; there would be raised up

amongst young and old those who would speak well of the Lord's name. I have faith in united exercise, when we feel that our interests are the same in the same spirit and the same hope of eternal life. He who ascended up on high and received gifts for men would communicate those gifts."

Another (whose proper place would not seem to be in membership with the Society of Friends) said, that in George Fox's time, the Bible "was much used" (as the context implies), in our meetings for worship. This is an erroneous statement, for though there are references to such use in the writings of our early members, yet it is spoken of in such a way as to imply that it was not a customary thing. The same person spoke of many of our members going elsewhere to be converted, and sending written requests for prayer elsewhere and not to us, as an evidence of the want of spiritual life among us. The Bible he called the Word of God, and said it was a grave mistake putting the Scriptures in the secondary place.

In reply to these remarks, one Friend said, "We have been gathered 250 years by Gospel principles. One of these testimonies is that the Word of God is He who was in the bosom of the Father before the world was. I put it to the meeting if it will be right to use these opportunities to overturn or controvert the established doctrines of the Society."

Another thought, "the great cause of our leanness is that our mind-are so preoccupied with things around, that the Lord does not get that full surrender He should have of our time, energy, talents," &c.

Another said, "Mourning, lamentation and weeping written on every page of our history of late years. We are gradually sliding aside from the testimonies we were raised up to proclaim to the world."

Another: "Our very standing as a Society depends on individual faithfulness. The reading of Scripture will not do what we want. We want to come to meet our blessed Saviour, not to hear him. We want more consecration. * * * The Lord will bless the provision of Zion. He will satisfy her poor with bread. Ask and ye shall receive. Seek and ye shall find. Knock and it shall be opened unto you."

Another spoke of our Society as being in a transition state, and said, "Putting the Scriptures before the Spirit lies at the root of the difference between early and modern Friends." He further remarked, "If we had not the Scriptures, which tell us of that satisfactory propitiatory offering of himself by Christ upon Calvary, the law of the Spirit of life would still condemn sin in the heart, and giving up to His convictions, we would come to know the old man to be crucified and slain, and to experience the baptism of the Holy Ghost, and of fire, and of the new man to be raised within us by His resurrection power, and to eat of that flesh and drink of that blood of which the Saviour said 'Except ye eat the flesh and drink the blood of the Son of Man, ye have no life in you.' Are we in this dispensation—of which it was declared, 'I will pour out my Spirit upon all flesh, and their sons and daughters shall prophesy'—in a worse condition than Enoch and Abraham, and Isaac and Jacob, of one of whom it was said 'Abraham rejoiced to see my day, and he saw it and was glad'! The early Friends did not come to a knowledge of the doctrines of truth by studying the Scriptures; they had

all that, before they came to know them, but they came to a knowledge of the doctrines we profess, by experiencing in themselves. William Penn clearly shows, that there is no religious body that values the Scriptures more highly than Friends do. But they held that to be the Word of God, which was in the beginning with God, and was God, and was made flesh and dwelt amongst us. Let us prize the Scriptures; let us read them in private and in our families; but when we come to our meetings, let us come up to a higher platform, to worship 'the God of Abraham, and the God of Isaac, and the God of Jacob.' To Him, the fountain of living waters, the early Friends gathered in their meetings for worship, and in the overflowing of his fullness they found abundant sufficiency for all their need. But now some think that without reading the Scriptures in our meetings for worship we cannot get along, and thus, this people is turning back to those things out of which this Society was gathered."

The Clerk, at a subsequent sitting, produced the following minute, which was agreed to: "We fully acknowledge the liberty which every individual Friend has of making use of the Holy Scriptures, by reading a portion in meetings for worship, as he may be led by the influence of the Holy Spirit, and under the directing power of the Head of the Church, but we would affectionately express our judgment that care should be taken in this respect to do all things in good order, and subject to the same judgment as communications in the ministry."

The old edition of the Book of Advices of Philadelphia Yearly Meeting to its members having been exhausted, the Meeting for Sufferings has issued a new edition, in which are included some of the advices issued by the Yearly Meeting from time to time since the preparation of the previous edition.

As many of these contain valuable hints applicable to the present time, we believe it will be acceptable to some of our readers to see them in the columns of our paper. We commence their publication in the present number of our journal, under the heading, "Additional Advices." We trust some who may read them will derive instruction therefrom, and be strengthened in their desires and efforts to live in accordance with the Christian standard.

We have received the fourth number of the *American Antiquarian*, containing interesting articles on mounds, shell-beds, and other traces of the former inhabitants of this country, and of the history, movements and character of the Indian races.

The first article is on the Emblematic Mounds of Wisconsin, and contains several illustrations of such structures, built in the shape of animals, such as deer, bear, squirrel, &c.

Notice is given that the publication office has been removed from Cleveland, to Nos. 162 and 164 Clark street, Chicago.

SUMMARY OF EVENTS.

UNITED STATES.—According to the local weather report, the average temperature for the Sixth month was 71.7 degrees, which is just the average for the past nine years. The highest temperature was 92 degrees, on the 1st, and the lowest on the 7th, 49 degrees. The number of days on which rain fell, fourteen; and the total rainfall 6.77 inches, which is three inches above the average for the last nine years. Prevailing direc-

tion of the wind, southwest. Maximum velocity, thirty miles per hour.

The President's veto of the marshals appropriation bill was received and read in the House on the 30th. The question being taken on the passage of the bill over the veto, it failed for want of two-thirds in the affirmative. A message was also received from the President, urging immediate appropriations for marshals and their deputies; but it is expected that Congress will not make any such provisions. The Senate Finance Committee has postponed the further consideration of the House bill providing for the redemption of trade dollars, until the next session of Congress.

On the 27th ult., a boiler in the saw-mill of A. Witt & Son, on the river, near Brown, in this city, exploded, wrecking the boiler-house and several dwellings in a court near by. The engineer, and a woman and two children living in one of the dwellings, were killed.

The receipts of the Government for the year ending 6th mo. 30th, were \$265,500,000; the expenditures \$256,900,000; leaving a surplus of \$8,600,000 applicable to the sinking fund.

A comprehensive review of the production and prices of American iron, recently published, shows some remarkable fluctuations. The effect of our present tariff, first showed itself clearly soon after the close of the civil war in 1866, when there was a sudden leap to 1,350,313 tons, from 391,282 tons in 1865. The amount produced in 1873 was steadily until the maximum of 2,868,278 tons is reached in 1874. Since that time it has fallen to 2,093,226 tons, in 1876, then rising again to 2,577,361 tons last year. Prices and their changes are even more striking. A ton of pig iron in 1844, cost \$25.75. Notwithstanding improved methods of smelting, the tariff and a depreciated currency carried the price up to \$39.23 in 1874. In 1873 the cost of a ton was \$42.75, and the lowest figure was reached last year, \$17.62. A ton of iron rails cost \$62.25 in 1848, \$120 in 1864, \$76.66 in 1873, last year \$33.75.

The U. S. Assay Office in New York, has received a specimen of the great meteor, which recently fell in Northern Iowa, the largest piece, weighing about 380 pounds, having been dug out of fourteen feet of earth. A cursory examination shows the presence of a large quantity of iron ore, something, it is said, rarely discovered in such conditions. One or two other of its constituents are interesting from their rarity. The assay will be of no small interest to the scientific world.

The new Guano steamer, Arizona, left New York at 5.30 A. M., on the 17th of 6th month, and arrived at Queenstown at 7.20 A. M. on the 25th, which is stated to be the shortest passage ever made.

Late on the afternoon of the 28th ult, two storms met over the lower part of Baltimore, and swept the water front of that city, doing great damage. Nearly one hundred buildings were unroofed, and windows broken by heavy rain. One man was drowned, and several injured by being blown out of their carriages or overturned in their vehicles.

The report of the Agricultural Department for 6th mo., shows the acreage of oats has decreased about 4 per cent., and the general condition is unfavorable in nearly all sections of the Union. The decrease in rye is about the same. Corn is backward owing to the drought. In some localities it has ceased to germinate. The condition of clover is very low except in the New England States, and those bordering on the Gulf of Mexico. The prospect for fruit is unfavorable. A carefully prepared paper on the prospects of the peninsular peach crop, estimates the marketable yield at 1,000,000 baskets of dried and canned, so that the entire crop is expected to be about 4,000,000 baskets.

The deaths in Philadelphia during the past week were 258. Since the beginning of the present year 7887, which is an increase of 156 over the same period last year.

Stocks, &c.—U. S. Sixes, 1881, registered, 104½; do. coupon, 107½; 5s, 1881, 104½; 4s per cents, 106½; 4 per cents, 103½.

Cotton.—Sales of middlings at 12½ a 13 cts. per lb. for uplands and New Orleans.

Petroleum—Crude, 6 cts. in barrels, and standard white 6½ a 6¼ cts. for export, and 61 a 61 cts. per gallon for home use. Lined oil, 64 a 95 cts.; Lard oil, 48 cts.; Spermac, 77 cts. for crude, and 95 a 98 cts. per gallon for refined.

Fresh Fruits.—Apples, \$2.50 a \$3.00 per barrel. Peaches, \$3.50 a \$4 per box. Strawberries, 15 a 25 cts. per quart, as to quality. Raspberries, 15 a 17 cts. per pint. Cherries, 7 a 9 cts. per pound.

Wheat.—The market is dull and steady. Minnesota extra, \$1.50 a \$1.25; western do. at \$5.50 a \$5.75, and patent and other high grades, 80 a \$8. Rye flour, \$3.10 a \$3.12.

Grain.—Wheat market firm—red, \$1.18; an \$1.18 a \$1.30. Rye, 39 a 60 cts. Corn, 41 a 44 cts. Oats, 34½ cts., and white, 30 a 38 cts.; ch 40 cts. per bush.

Hay and Straw.—Prime timothy, 70 a 85 cts. per pounds; mixed, 55 a 65 cts.; straw, 85 to 110 cts. per pounds. There were sold during the week 208 1/2 b of hay, and 40 loads straw.

Beef cattle—423 head arrived and sold at 31 a 64 cts. as to quality. Sheep, 30 a 40 cts. as to quality. Hogs, 5 a 6 cts. per pounds.

FOREIGN.—The Standard in a financial article of 26th ult. says, a novel feature at the Bank of England was the receipt of £120,000 from the United States, to be paid in payment of called American bonds, returned to New York.

The total number of pieces coined at the Mint during last year, was 24,491,230, representative value of about \$18,928,960. There were 28,283, British coins, the value of these, gold, £2,132,245 1/2 silver, 401,426 1/2 10d.; bronze, £18,664 1/2 s. 3d. In 1874, estimates do not place Great Britain as wealthier than any other country in the world. It values her private property, real and personal, at 110,600,000, and her navy, palaces, public buildings and other public property, exceeding highways, \$1,475,000,000, making \$44,585,600,000. Aggregate estimates for England, Scotland and Ireland, with France, and highways, is \$42,500,000,000. Real estate France is valued at \$1,000,000,000. The area of England, and in the latter there is a great excess of personal property over the former.

From Berlin it is reported that arson is rife in Petersburg and in every part of Russia. The town Soyran, on the Volga, has been nearly destroyed by fire.

Information received from East Russia, states that the Grand Duke Nicholas appointed to leave Nizhny Novogorod this summer, that he will be 3000 at Kazan, 5000 at Smarna, thus making an aggregate of 12,000 persons; and this does not include the vast number arrested at St. Petersburg, or the nihilists in prison nearly every town, which is expected will increase number to 50,000.

The Russians who have emigrated to Brazil are returning in large numbers to Europe. The Indian Ganga has been recaptured by the British. Abdul Rappan, the pretender to the Afghan throne, who has hitherto lived under Russian protection, has invaded Badakhshan, and that the Afghan troops in Balkh have revolted.

According to official statistics, Holland exported to the Brazils, in 1870, 1871 and 1872, more than eight million dollars worth of onions and peppers, an average of half a million dollars worth a year.

In a lecture at Amiens, Ferdinand de Lesseps stated the first sold of the Panama Canal would be turned 1st mo. 1st, 1880, and that with 40,000 navies, including some Chinese and 15,000 African negroes, it would be completed in eight years.

It is expected the St. Gothard Tunnel will be completed the end of 11th month. The point now reached on the Airole side is 1281 metres, that on the Goetschen side 649 metres from the centre of 1/2 mountain, and it is expected the junction of the galleries will be made some 300 metres from the centre on the eastern side.

The exports of Egypt in 1778, were about \$40,000,000, in 1877 about \$60,000,000, and in 1876 about \$9,000,000. These figures, says a correspondent of the *London Times*, are worthy of study by every one who holds Egypt a rich country and able to pay her debt. The assigned reason for the decrease is the falling off of the crops.

CORRECTION.—In essay "The Seed of the Kingdom," in last issue of "The Friend," at 234 line, margin, read "wenger."

WESTTOWN BOARDING SCHOOL.

Our friends Benjamin W. and Rebecca G. Passmore having resigned their positions as Superintendent and Matron of Westtown Boarding School, Friends who may feel drawn to engage in the important and responsible duties of superintending this Institution, are requested to communicate with either of the undersigned. The present Superintendents desire to be released 14th month next, or earlier.

William P. Townsend, West Chester, Pa.
John S. Conover, Fallsington, Bucks Co., Pa.
Charles J. Allen, 304 Arch St., Philadelphia.
Elizabeth R. Evans, 322 Union St.
Anna W. Edge, Downingtown, Pa.
Dorothy Rhoads, Haddonfield, N. J.

Life and Adventure in Japan.

BY E. WARREN CLARK.
(Continued from page 371.)

A very large proportion of the tea exported from Japan to the United States comes from its Province of Saruga, in which I lived. I am therefore much interested in watching the cultivation of the tea-plant, and visited the fields frequently to see the leaf prepared. The tea-bushes are not more than breast-high at full growth, and the young plants are quite small. When first set out they are allowed to grow three years before any of the leaves are taken; after that the leaves are freshly picked each season, yet the plant lives, and lives about a man's lifetime.

The plant is never stripped entirely, but only the bright green leaves are plucked which appear on top of the bush in the spring of summer. If the older leaves are evered, it is simply to make a coarser and cheaper quality of tea. The very finest quality, and that which costs several dollars a pound, even in the province where it is produced, is made entirely of the delicate shoots found at the tip end of the stem in early spring, just as the tiny leaf is in process of forming, these minute shoots are carefully picked first, and the leaves below them are gathered afterwards.

Upon approaching the tea-fields we find numbers of young girls and women scattered among the bushes, and busily engaged in filling their baskets with the fresh leaves. They are chatting merrily together, and to our Yankee eyes it seems like a good-sized huckleberry party in New England; for the style of picking is the same, and the bushes are similar, only instead of yielding berries they bear nothing but leaves. The women, young and old, keep their tongues going as briskly during the tea-picking as their sisters of other times are accustomed to do at their tea-drinking socials; so that the little leaf begins and ends in *go-sip*.

When the baskets are full, they are taken to a long low house where several men are busily at work. Here they are boiled about three minutes to render them soft and tender, and after being pressed between mats and dried a little they are placed in small quantities upon a series of stout pasteboard trays or pans, set upon brick ovens containing mouldering embers of charcoal and straw.

These queer-looking pans are ranged in rows, and are maintained at various temperatures, some being so hot that you can barely put your hand on them. In front of each pan stands a Japanese, working and rolling the leaves between his hands and spreading them back and forth, to keep them equally heated throughout.

It is here that the hard work of the tea-making process is seen. These men stand from morning until night over these slow fires, rubbing and rolling the leaves between their hands continually. The leaves are placed on the hottest pans first, when they are moist and green; but after being rolled and partially dried they are allowed to cool on straw mats, and then they are placed on a second pan, and rubbed and rolled again. This process is repeated twenty times or more, and is far more laborious than any one would suppose.

Gradually the leaves become drier and darker in color, and after the last rolling they are spread on moderately warm pans, and then placed in large baskets. On an average one man will roll and dry, in a whole day, as many leaves as would fill an ordinary tea-chest.

The next process consists in sifting and sorting the leaves; this is done in another house, where young girls are seated around low tables with piles of tea in front of them. Before sorting the tea, it is well shaken in sieves of various sizes, to rid it of dust and fine particles; then it is heaped upon the tables. Each girl takes her left hand full of the leaves, and throws them before her on the table, while with her right hand she picks out any stray stick, straw, or imperfect leaf, and then sweeps the rest to one side. This is done with great rapidity.

The tea is sometimes still further sorted, when it is desirable to separate the fine, small leaves from the larger ones; the former always constitute the best qualities of tea, while the latter form the chief bulk of that exported to foreign countries. Of course the best tea remains in Japan and the poorest goes abroad; but as foreigners usually spoil the true flavor with milk and sugar, it does not make so much difference after all.

The exported tea has to be "refired" at Yokohama. This is done on an immense scale in large stone houses, where hundreds of men and women are employed in heating and stirring the leaves again, and putting a finishing touch on the whole process; this is absolutely essential to preserve the tea and render it fit for transportation. The fresh tea odors which greet one in passing the open windows of these tea-firing establishments would make some of our old lady friends smack their lips with delight. These were the pleasant odors that I noticed on first landing at Yokohama.

The long exile in Shizu-oka was drawing to a close. The Government had determined to centralize the educational interests at the capital, and the provincial schools were suf-

ferred temporarily to decline. The old feudal system was abolished, the Mikado had transferred his court to Tokio, which heretofore had been the capital of the military chief, or Tycoon. This latter had retired with his retainers to Shizu-oka, which became the St. Helena of Tycoonism. The men who formerly ruled Japan were therefore my associates and advisers in Shizu-oka. But their successors at the Mikado's capital found themselves unable to manage the affairs of government, hitherto left in the hands of the Tycoon. They had not the practical skill to guide the ship of state with steadiness through the troubled waters of political change.

Therefore they sent to Shizu-oka and called away my friends and my brightest students, assigning them important positions at the capital. Against this course I protested in a memorial to the "Mom-bu-sho," or Department of Education. The officials replied that Shizu-oka should feel complimented in being called upon to furnish young men for important positions in the capital. This was cold comfort, and I urged that the best students should be allowed to remain until the completion of their course. I also argued that no education was truly national which disregarded the interests of the interior.

The Educational Department admitted the truthfulness of the argument, of which they have since experienced the demonstration; yet my protests were unavailing, and the Government continued to call away my most valued friends and helpers. Kato and Okubo, who had been instrumental in bringing me to Japan, and had always been my best advisers, were called to the capital; the former resumed his old position as Admiral of the Navy, and the latter became Governor of Tokio. Nakamura, Shimizu, and all of my foremost students removed to the capital, saying that every thing was now changing in Japan, and that I should soon be called away also.

New governors were appointed over the province, who "knew not Joseph," and my old friends faded out, leaving me alone. My enthusiasm was dampened in seeing my cherished plans thwarted, and the labor of building up any permanent work appeared in vain.

I lived alone in the new house during the second year, and the sense of solitude became very oppressive. No one lived near me except the servants, who occupied the little Japanese building near the gate. At night, I sat in my room listening to the wind sighing through the pines that skirted the embankment of the moat. The screech of the night-owls could be heard, and the timid bark of the foxes who frequented the ruins of the castle. Now and then an earthquake would startle my reveries, sending me at a rapid pace out upon the balcony, where I had an out-door view of the phenomena. The ground shook and heaved, the moat trembled, the tree-tops swayed, the heavy house creaked and groaned, and the

windows rattled as though they would break. The birds, frightened from their perches on the tree-tops, flew wildly around, uttering piteous cries; the mountains looked as though they were ready to "skip like rams, and the little hills like lambs." But the stars twinkled silently, as though they never could shake, and soon all became quiet again.

During the long winter evenings the stars were my best companions; I never wearied of studying them through my little telescope, and they were always found bright and cheerful.

The country people on the mountains near Shidz-u-ka sometimes set fire to the long dry grass of that desolate region at night. The whole mountain chain appeared at times in flames, and a fiery circle swept around the "peaceful hills," as the name Shidz-u-ka signifies. One could easily imagine that half a dozen volcanoes had broken out, and the first time I witnessed the startling scene I thought Fuji-Yama's volcanic fires were starting afresh, and that perhaps Shidz-u-ka would become another Pompeii. In the daytime the mountains looked blackened and bare, as though they had gone into deep mourning.

At the close of the second year at Shidz-u-ka an official order came, calling me to the Imperial College in Tokio.

(To be continued.)

"For The Friend."

Regeneration, Suffering, Rejoicing and Self-searching.

The doctrine of regeneration by the powerful operation of the Holy Spirit is one, it is to be feared, too much lost sight of in the present day. But when we reflect that the safety and salvation of our immortal souls depend upon being "born again," or upon our submission to that baptism of the Holy Ghost and fire which thoroughly cleanses the fiber of the heart, how should we earnestly seek to lay hold of the hope set before us, be the cost or sacrifice what it may! That which is the alone sure foundation for peace here and for eternal happiness hereafter is, surely, above every thing else to be coveted, though the purchase, like the goodly pearl of the merchantman (Matt. xiii. 45, 46), be at the cost of all things beside. The apostle well knew of what he wrote when conveying, "I count *all things* but loss for the excellency of the knowledge of Christ Jesus my Lord; for whom I have suffered the loss of all things," &c.

There can be no doubt that crosses, conflicts, tribulations and baptisms must attend the "transformation of apostate man from flesh to wise," or from a state of nature to a state of grace; yet the Saviour has promised to make his yoke easy and his burden light to the willing and obedient, who for his sake are with Moses brought to choose "rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season," &c. These, as has been said, may have to pass through many and varied trials in the pilgrim's progress journey from the city of Destruction to that of Zion; may have, as the prophet Malachi represents, to "abide the day of his coming" "as if like a refiner's fire and like fullers' soap;" yet how little and insignificant will be "these light afflictions which are but for a moment" comparatively, when weighed in the balance with "the joy unspeakable and full of glory" which

awaits the overcoming ones—the ransomed and redeemed—in the kingdom of their Father.

Does not a grave cause for apprehension lie in the fact, that because of the imagined hardness of the way from Egypt to the promised land, or from a state of fleshly ease and indulgence to that of self-denying, cross-bearing follower of a crucified Lord, there is great danger of our taking up a rest short of that prepared for the people of God? and this notwithstanding the promise, no less so than to Israel of old: "As thy day so shall thy strength be." * * * The eternal God is thy refuge, and underneath are the everlasting arms," &c. This would be a very grievous error; not only because of the great difficulty of being aroused from the bowers of ease or a state of carnal security, but no less from the fact that in so doing we ignore the salutary lessons which common prudence teaches, to examine strictly and fairly into the ground of our hope of eternal life; and whether we have been so imposed upon by the false glosses and specious misrepresentations of the god of this world who ever lieth in wait to deceive, as to have erected our house but upon the sand. Satan, an ever watchful foe, is always ready to settle those he can into a state of carnal security or worldly-mindedness, or in any way to beguile from that steady watchfulness in the straight and narrow way which has the promise of the life that now is—the consolations of the gospel of Christ here—with never ending rest and peace and joy beyond this fleeting, fading scene, eternal in the heavens.

Thus the writer of this would desire that we might severally examine our foundations in a spiritual sense, and whether we be, in the true faith, building upon Christ, the rock of ages. If we have not given ourselves to Christ Jesus in the fidelity of little children, letting the government be upon his shoulders; if we have not experienced that refining and saving baptism which, as in the laver of regeneration, causes us to become new creatures through a practical belief in the precious outward sacrifice of the Saviour, with obedience no less to his all-sufficient grace or law written in the heart, we surely cannot reckon ourselves, whatever our profession may be, with those who have put on Christ, and, from experimental knowledge, believe in Him to the saving of the soul. It is the washing of regeneration and the renewing of the Holy Ghost that prepares for usefulness in the militant church, or for admission at last within the pearl gates. The Lord Jesus must ever remain the only door into his sheepfold; and worse than vain will be every effort, either to take it by violence or to climb up some other way—such being but thieves and robbers.

Let us humble ourselves before the Lord. Let us get to the watch-tower of close scrutiny. Let us endeavor to bring all our deeds to the Light of Christ. Let us dig deep that the foundation be securely laid. Let us be earnestly engaged that we may see of the things which belong to our peace before they are hid from our eyes. Let us strive that the Father's will may be done in us and through us, that so his kingdom may be exalted, and his ever worthy Name be glorified and renowned now and forever.

Time is swiftly rolling on. This is a world from which we are continually passing away. How imperative the obligation to examine

ourselves with the light of the Lord Jesus freely offered, whether we be in the faith, the saving faith that overcomes the world. What need is there to be vigilant, watch and prayerful, lest the awful end come upon us unawares; lest the lamp be found that profession only, and therefore untrimmed; lest the oil wanting; lest the grace of God be frustrated, and the great aim and end of that responsible existence be forever lost.

While there is no condition beyond the Saviour's power to heal and to restore—He came to seek and to save that which was lost—there is need for each one to be brought through submission to his convicting grace to a knowledge of their fallen and lost state that feeling the malady of their souls, as being heart-sick of the wages of sin which death, they may, repentant, humble and contrite, go to Him who is "the way" and "the door" to his kingdom, even the resurrected and the life unto all who, in the true nothingness of self, come unto God by Him. Urge this end how movingly the apostle exhorted the church at Philippi: "If there be therefore any consolation in Christ, if any comfort of love, if any fellowship of the Spirit, if any bowels and mercies, fulfill ye my joy," &c.

For "The Friend"

Letters of James Emilen.

(Continued from page 363.)

"Sth mo. 3rd, 1854. * * * I was sensible of the quiet of the meeting being disturbed by thy appearance on Second-day. * * * That I hope there was no occasion for more than the cloud which was permitted to cover thy mind when thou sat down, and I presume must have been permitted for thy instruction rather than condemnation. The attentive and obedient ear, such disquisitions are no doubt often deepening and instructive. * * * It is no doubt a great thing to be thoroughly redeemed from a selfish influence in the divine service; and trials that seem peculiar should be dispensed for a time, let us rather esteem it an evidence of chastening love. I do not believe there was ever a time when there was more occasion for sanctified vessels for the divine service. * * * I should feel exceedingly depressed and discouraged, if I were to yield the disposition to look outward alone; but must acknowledge that in the midst of a when I endeavor to keep my own habitation there is an encouraging support, and am admonished not to lose the anchor of hope and faith. * * * I can indeed feel with you under recent trials, and did intend being with you yesterday or to-day, but find myself to weak in body to venture from home at present. It may be that Samuel Cope and my self will come on Fifth-day, as I saw him this morning and he acknowledged he had been thinking about Westtown, and wishing to go there. * * * *"

"12th mo. 1854. In the exercise of thy ministry, I have often thought it a subject worthy of care in the young, to avoid a habit of toning; the gift, when a right one, will always recommend itself by its own weight and solemnity, and although I cannot say but think there is sometimes a sweet harmony in the utterance of gospel truths, yet I think it better that this should not become *habitu* with any. There may be times when the heart is especially prepared to exhibit such emotions as harmony conveys, but I have n-

but thou hast been sensible of the difference between that which evidently proceeds from a heart under some peculiar and fervent notion, and that which results from habit alone. I can readily suppose that when the bit has been long indulged, it would be very difficult and perhaps impossible to change it, (though the speaker giving more attention to than would be consistent with a close regard to his subject; and hence the need of caution to avoid contracting the habit in the early exercise of this weighty and solemn duty."

For "The Friend,"
A Tour in Morocco and the Great Atlas.

Owing to the bigotry of its inhabitants, Morocco has long been almost inaccessible to Europeans, except in a few commercial ports.

Joseph Hooker, the distinguished botanist who presides over the royal gardens at Kew, had long desired to explore the chain of the Great Atlas Mountains, in order to study its vegetation. In 1871, through the intervention of the English Government, permission was obtained from the Sultan of Morocco by the British Minister resident there for Hooker and his party to make the desired visit. The narrative of their adventures has recently been published.

The difficulties of the party were by no means ended when the Imperial permit was granted. The local authorities,—the Governors of the districts, and the sheiks of the different villages along the base of the mountains had to be conciliated; and it was only through the exercise of much firmness and perseverance, and by availing themselves of favorable opportunities that the higher recesses of the mountains were reached in two instances.

In the first of these the sheik had been prohibited by liberal presents, and after conducting them to the village of Arrond, at a considerable elevation on the mountain side, he gave them two guides who appear to have received instructions not to allow the travelers to go beyond a certain sacred tomb at the extreme end of the valley.

On their way they ascended a steep slope to examine some solitary trees scattered at rather wide intervals on a zone of the mountain, at elevations between 8000 and 5500 feet above the sea. They were found to be a species of Juniper, which seemed in former times to have girdled the Atlas with a belt of forest, which has been gradually thinned, and is doomed to ultimate destruction. "The existing trees," the writer says, "are probably of high antiquity, and their destruction is mainly due to the practice of setting fire to the brushwood to gain pasture for animals; while the young plants, of which not a single one was seen, would be cut off while yet seedlings, by the tooth of the goat, the great enemy of tree vegetation—an animal whose disastrous influence, acting indirectly on the climate of wide regions, entitles it to rank as one of the worst enemies of the human race.

The sacred tomb was found to be a rude stone hut with a space five or six feet square in the centre. "When we reached this," the narrative relates, "the guides made it clear to us that we had arrived at the end of our excursion. The hut stands at the junction of the streams issuing from two rocky ravines. That on the west side was apparently very

steep and pathless; the other, mounting about due S., was nearly equally steep, but we could see that a beaten track ascended along the opposite bank of the slender torrent that tumbled over the rocks at its entrance. The native guides confirmed the statement before made to Hooker, that by that track lay the way to Soos; but, by expressive pantomime, they explained that danger lay in that direction, and that the people of the other side were addicted to the practice of shooting at strangers. We were careful to avoid controversy, and set ourselves to collect plants in a patch of boggy ground near the hut.

"So intent had we been on the surrounding vegetation, that we had scarcely cast a glance at the sky overhead. This had continually assumed a more and more gloomy aspect; and at length, after due notice and preparation, the long-expected rain began, not in a heavy downpour such as often occurs in southern countries, but in that fine steady drizzle which is known to those whom the fates have led to the northern parts of our island as a Scotch mist, hateful to the lover of the picturesque and still more hateful to the botanist. On this occasion, however, it seemed to us no unmixt evil, as it furthered the execution of a stratagem that was already in our minds. Our followers were scantily clad, and felt more than we did the chilly temperature of the day, and of course the rain increased their discomfort. They were, therefore, in the right frame of mind to accept at once the suggestion that they should light a fire within the hut, therein following the example of preceding wayfarers. After uttering a few prayers, they proceeded to gather some damp sticks, and presently were busy in the attempt to make a fire out of them. Having continued for a few minutes to loiter about, still gathering plants near the hut, until the men appeared to be fully engaged in their occupation, we started together to ascend the track leading to the summit ridge of the Atlas."

"We had ascended several hundred feet, and were looking about for plants among rocks to the left of the path, when some faint sound made us look up, and we descried amid the rain and mist, a party of men and laden mules descending towards us down the steep ravine. There was some obvious awkwardness in the impending encounter of three Englishmen, utterly ignorant of the native tongue, with a set of wild mountaineers of the Atlas, in a spot where no stranger had ever before been seen. In such cases, the less time that is left for deliberation the better. Suspicion or greed may prompt an attack where time is left for consultation; but if people are suddenly confronted by peaceable strangers, they will rarely, unless provoked by the profession, think of molesting them. The shape of the ground happened to favor this obvious bit of policy, and some projecting rocks concealed the approaching train until we suddenly confronted them at a turn of the path, and passed within a few yards, with something approaching to a grave salute. The mules appeared to be laden with goatskins, along with other articles that we could not distinguish. Whether these were people from the northern side of the chain returning from a trading expedition in the Soos country, or men of Soos carrying goods to the capital, we never certainly ascertained; but from noticing pieces of orange-peel on the

track, we inferred that they must have descended rather low in the Soos valley; while it is certain that people going from the lower part of that valley to the city of Morocco would not have followed this circuitous and difficult track, unless urged by special reasons. "A little farther on we found, on ledges of rock near the track, several of the most interesting plants seen during the day. Therefore forward all botanizing became difficult. The rain turned to sleet, and before long to snow; and, though the roughness of the ground still enabled us to discern the more conspicuous plants, it was almost impossible to secure satisfactory specimens.

"Soon after the snow had set in, we heard from below, yells and screams, and immediately guessed that the caravan from Soos had brought news to our guides at the Saint's tomb of our escape towards the summit of the pass. The guess was correct, and though we pushed on rather faster than before, the foremost guide soon overtook us, and addressing himself especially to Maw, who led the way during the ascent, with vehement gestures and emphatic phrases, that seemed to combine threats and injunctions with supplication, urged an immediate return. Maw judiciously had recourse to an argument of universal efficacy, and presenting the man with a piece of silver, pointed upwards and strove to explain, by signs, that we meant to go to the top and then return. Shortly afterwards, the second man appeared, panting from a pace at which he had run up the steep ascent. He addressed himself to Ball, who came next to Maw, but was answered by the same reasoning that had prevailed with his companion."

(To be concluded.)

"For The Friend"

Extracts from the Diary and Letters of Ebenezer Worth.
(Continued from page 376.)

1847. 9th mo. 24th. The day being wet I spent it pretty much at home, and wrote a letter to L. Tisdale, requesting him to have a couple of stones removed which had been put in Friends' grave-yard at this place to the grave of his wife; it was done in my absence. I had been spoken to on the subject and had objected to it. Through unmerited mercy I was enabled to spend the day pretty comfortably. May there be more watchfulness on my part, thankfulness for past favors, and resignation to the will of Him who has a right to dispose of us as He sees meet.

12th mo. 11th. I think I may again acknowledge that for some time past I have been favored with a sense of the loving kindness of our Divine Master, of which I am unworthy.

Letter to his Father.

Tenassaca, 1st mo. 17th, 1848.

Dear Father,—I feel it to be my duty to do what I can to promote thy comfort, also of the rest of my relatives and friends—I can say I take pleasure in trying to do it. I am (now) strong enough to sit up all day, and would be able to walk about the house were it not that my ankles, one of them in particular, is quite sore, being badly burnt and blistered by repeated applications of mustard plaster while I was sick. I feel, dear Father, that I have been and remain to be, wonderfully blessed. I have felt the privation of [the company of] my near relatives very sensibly in my sickness; but have also, through

umerited mercy, been wonderfully favored to feel that which has more than made up for all, and which alone can produce true peace and comfort in every place and in all our trials. A—'s removal from works to rewards was rather sudden, and ought to serve as a warning to us who are left behind, to stand prepared for that great change which we know not how soon may take place. Oh! that we may not put off that all important work until a more convenient season, but draw near unto Him, who is the way, the Truth and the Life, and who is able to save; the present time only is ours; the comfort of true religion in this life is very great; Oh! then to be received in the mansions of everlasting rest, and to be with our Divine Master forever, how encouraging, how precious.

19th. I rest well at nights, and am able to be up all day. The doctor allows me what I want to eat, and John Ray, a very kind Indian, has supplied me with rabbits, squirrels and venison. * * I felt a desire that this sickness, through the blessing of our merciful Master, might prepare me to finish the service which He may be pleased to require of me, and in his own way and time. He is for ever worthy. Let us, dear father, try to be resigned to his blessed will in our thus being separated, and in all things else, which He may see meet to require. * * I sometimes feel a deep interest in the welfare of our religious Society.

In sincere love I remain thy son,

EBENEZER WORTH.

Tunnessas, 1st mo. 25th, 1848.

Dear friend, Jos. Elkinton.—The brotherly and Christian feeling which thou hast strongly exhibited toward me, I think I may say in truth, is met in me by similar feelings toward thee. How sweet and precious is that love that is begotten within by the Spirit of our Divine Master, it embraces the whole human family with feelings of living desire for their welfare. May it, dear friend, ever be our sincere desire and concern to know that our love to God is above all other love, and to live in obedience to his Divine will. This will, I believe, prepare us for the true enjoyment of this life, and to meet with Christian patience the trials which we may have to pass through. Then at the closing scene, through the unmerited mercy of our Divine Master, I believe we shall have a well-grounded hope of entering into the enjoyment prepared for the righteous. Thou wilt probably feel interested to hear something in relation to my sickness and the present state of my health. * * I have felt a desire that this sickness may prove a blessing to me, and that I may be favored to keep near to my Divine Master, and be enabled through his holy help to finish the work which He may yet be pleased to require of me, in his own way and time. * * I may say to thee, I have been wonderfully supported through my sickness, and at seasons truly comforted by my Divine Master, which I hope I may never forget. I have read with interest and satisfaction the pamphlet published by the Meeting for Sufferings, * * and have deeply sympathized with Friends in their trials.

In sincere love I remain thy friend,
EBENEZER WORTH.

(To be continued.)

If Heaven is lost, all is lost.

Drawing out the Fear.

Selected.

"I witnessed a beautiful and touching incident illustrative of the early lessons which make the peril of a future occupation familiar to a child from his cradle, in a little scene on the banks of the Donro. A fisherman and his wife stood at the water-side, opposite to a deep and dangerous spot. Their child, a boy of about a year old, was already habited in the costume of his future life, that of a sailor, the trousers tucked up above the child's knees. Leading him towards the river's brink, the mother purposely wetted his tiny feet; he was alarmed and clung to her. With soft and affectionate caresses, again and again she led him to the water, until the little imp, emboldened by her encouragement, ventured down alone, and, only just able to walk, tottered unsteadily to the stream. I trembled at the risk; a few feet farther, and the water deepened dangerously. But there was no cause for fear. Guided by a watchful eye, the mother's hand was ever ready to catch the little scrap of infant humanity, just in time to save it, and to render my half-uttered exclamation unnecessary. What is she doing? 'She is drawing out his fear,' was the reply."—*Owen's Here and There in Portugal.*

A FISHER'S wife to Douro's side
Guided her infant's feet,

While to persuade him off she tried

Its golden waves to meet;

At first he eyed them with delight,

Then to her hand he clung in fright.

"Nay, shrink not so, my bonny boy;

His stream thy home will be,

Where thou wilt earn, in glad employ,

Food for thyself and me;

Merrily rocks thy father's boat

On yonder golden waves aloft."

One baby foot the urchin dips;

Then, gathering more and more

New courage from her loving lips,

Speeds boldly down the shore,

And feels, by its warm clasp beguiled,

The river's welcome to its child.

E'en thus a tender Hand, methought,

Guiding my earthly way,

Thus far my lingering steps hath brought,

And led me every day

To face by slow degrees the stream

Which did at first so dangerous seem.

His gentle voice my fear hath quelled,

And bid me bravely go;

My shrinking feet his clasp upheld,

"Nay, child! why tremble so?

The Father still shall be thy Guide,

And bear thee o'er the surging tide.

Before thee lies thy daily task;

There too thy joy shall be;

Thy work for me I deign to ask,

For those thou lov'st, and thee.

Thy Father's love, the perils o'er,

Shall give thee welcome on the shore."

—*Chambers' Journal.*

LEAD ME TO THE ROCK THAT IS HIGHER

THAN

Selected.

When rugged, and lonely, and weary my way;

And cloudy, and chilly, and dreary my day;

And heavy with sorrow, I leave a deep sigh,

Lead me to the Rock that is higher than I.

When dark is my sky with clouds thick and dread,

Which threaten to break in a storm on my head,

All weak and defenceless, with no covert nigh,

Hide my soul in the Rock that is higher than I.

When high o'er my head angry billows are breaking,

And the last gleam of hope is my spirit forsaking,

And whelmed in the depths I am ready to die,

Lift me up to the Rock that is higher than I.

When forsaken, reproached, in deep solitude,
With sickle to my raiment and tears for my food
Spread over my spirit, as fainting I lie,
The shade of the Rock that is higher than I.

When deep dews of death my spirits are drinking,
And in his cold arms I am fainting and sinking,
O! then may my soul with my last parting sigh,
Escape to the Rock that is higher than I.

O Rock of salvation! the rest of the weary,
Of troubled the soul; the light of the dreary;
The fountain of life; immortality's goal,
Let me find in thy cliffs the true home of my soul.
—*Bible Record.*

For "The Friend"

The Santa Cruz Mountains, California.

Truly California is a land of surprises; where you will in every direction and sort thing wonderful or startling greets the eye—her parched dusty plains—her rich valley waving with ripened grain—her foot hills vine-cold or dotted over with umbrageous ivy oaks—her mountains clothed with majes and gigantic redwoods—her great unexploded canyons—her mines yielding their priceless stores of mineral and geological wealth—her vast orchards laden with luscious fruits—her beautiful gardens odorous with the breath of countless flowers—all these, and much more make up a surprising and interesting picture such as no other country yet known presents. Grandeur, wilder scenery may be found amid the magnificent ranges of the Sierra Nevada; but for picturesque beauty, perhaps no other mountain-chain in this wondrous State, surpasses the Santa Cruz coast line. Here amidst the stately redwoods, sylvan shade and grassy slopes, the eye rests on lofty groups of mountains, pleasing valleys and winding canyons, through which meander swift sparkling streams, musical with the sound of water falls, and where babbling brook or unseen rivulet join in sweet cadences as they flow in an ceaseless harmony towards the sea. From many of the higher peaks of this fine range extensive views of the Pacific Ocean may be had, while still nestled beneath the hills, yet in full view, lies nestled on its shores the town of Santa Cruz, noted for its sea bathing. Taking a more extensive view beyond may be seen extending inland the beautiful Bay of Monterey, with its blue waters and long shore line of white glistening sand; thus there is a charm about these mountain and sea views that renders this part of California very attractive to the tourist and the invalid; for here is combined the grandeur and solitude of nature, a home for the fruit-grower, lumberman and stock raiser, with a bracing salubrious climate for those in quest of health. Here, too, there is much to fill the mind with ennobling thoughts; we gaze with delight on the serried ranks of noble redwoods lifting their tall graceful tops heavenward—on spreading oaks casting their shadows on the grassy knolls—on the green, glossy hues of madrone and manzanita trees mingling with the sombre evergreens,—and on the smooth sides of precipitous hills covered with scaly herbage, or rock-ribbed and scarred by the storms of centuries. These different outlooks all form a panorama of exceeding and romantic loveliness; and to crown all we look upward with mixed feelings of awe and admiration on Mounta Loma Prieta, the loftiest peak of all, whose flattened crest rises as a grim guardian of the solitudes around, 3,500 feet above the sea. Thou who wouldst commune with nature and seek amidst her many

ghts a solace and a balm, go and wander these grand mountain retreats, and learn great and good lessons of purity and nobility that such inspiring scenes impart, and which the writer of this was favored in a measure to partake.

J. BELL.

in José, California, 6th mo. 14th, 1879.

Communicated.

Ackworth School (England) Centenary Fund, 1879-1879.

Members of the Society of Friends in the United States and Canada, and especially old Ackworth scholars, are invited to contribute to this Fund, raised to commemorate the 100th anniversary of its establishment by J. Ackworth and other Friends.

It is proposed to apply the first £1000 of this fund to the establishment of libraries for scholars, and one of great excellence for teachers, officers and more advanced pupils. The interest on another £1000 to be applied to the keeping up and extension of the same. The interest of the remainder of the fund to be used in teaching practical science. Further information will be given and donations received and forwarded by Henry Dickinson, 243 Broadway, New York; Timothy Harrison, Richmond, Indiana; Charles Hutchinson, Oskaloosa, Iowa.

On behalf of the committee.

WILLIAM COO PARKER,
ALFRED SIMPSON,
Secretaries.

Darlington, England, 6th mo. 13, 1879.

Additional Advers.

Conduct and Conversation.—In viewing the state of our members and subordinate meetings, an earnest concern has been felt that we should duly estimate and give heed to the blessed gospel truth ever held by Friends, that Christ is the true light which lighteth every man that cometh into the world. As this "Light of Christ within" is regarded, and as His revelations obeyed, the understanding will be opened to receive the doctrines of the gospel, and the testimonies springing from them, and the obligation will be felt to maintain them in life and conversation. This divine gift brings those who submit to its teachings not only to believe the sacred truths declared in the Holy Scriptures respecting our Lord and Saviour, Jesus Christ, and the means provided in the mercy of God for the salvation of men, but also gives an insight of the corruption of the heart in its unregenerate condition, of man's need of a Redeemer, and the purifying baptisms of the Holy Ghost and fire; and as it is followed, it produces the blessed fruits of righteousness and peace. As the members are individually engaged to walk in this Holy light they will be brought to see, eye to eye, and have "fellowship one with another, and to know the blood of Jesus Christ to cleanse them from all sin." Thus holding "The Head, from which all the body joints and bands having nourishment ministered and knit together," we would "increase with the increase of God." We would be brought willingly and gladly, to attend all our meetings for worship, and for the transaction of the affairs of the Church; and when in them, we should be preserved from giving way to drowsiness, the frequent occurrence of which, in our meetings, continues to be a source of much exercise and sorrow, manifesting, as it does, spiritual slothfulness. In the

language of George Fox, we would affectionately exhort all to "Take heed of sleeping in meetings, and of dullness. For it is an unavailing thing to see one sitting nodding in meeting, and so lose the sense of the Lord's presence. It is a shame and a sadness both, and it grieveth the upright and watchful that wait upon the Lord, to see such things."—1870.

While the mere natural wisdom and will of man have no place in the church of Christ, we would tenderly encourage the rightly concerned in our Meetings for Discipline, who may be entrusted with a sentiment on the business before such meetings, to be simple, honest and faithful in giving expression to it in the fear of the Lord, and in the obedience of faith in Him, yielding themselves up to the service that may be required at their hands. This is the way that the talent committed to it to be used and occupied with, and it is the way to peace and enlargement—being faithful in a little, we shall be made rulers over more.

Our Yearly Meeting in 1795, declared its judgment in the following minute of advice: "We are concerned that the management of our Christian discipline, be not committed to hands unclean, particularly of such who allow undue liberties in their own children and families. 'If a man,' said the apostle, 'know not how to rule his own house, how shall he take care of the church of God.'" [1795.] It has been a cause of sorrow to observe, that in some meetings, those are occasionally appointed to stations or employed in services, who make no appearance of being Friends, and whose manner of life is not in accordance with our distinguishing doctrines and testimonies. Herein the precious cause we are called to uphold and promote must suffer.—1874.

Religious Items, &c.

The Strangers' Home is a London institution for the benefit of natives of India, Arabia, &c., in distress in that city. Some illustrations of its practical operation, taken from its last annual report, are published in the *National Baptist*. It says:—

In 1877, Cap. Adams of the ship Corea, appeared before the sitting magistrate at the Thames Police Office, and stated that he had recently returned from China, and that when about two hundred miles from land, and still in the China seas, he fell in with a boat which contained two men, who were almost in a dying condition from hunger and thirst. He took them on board, and having no opportunity of putting them ashore, he had brought them to London. No one on board could converse with them; but he thought they were natives of Cochin China. They had informed the sailors by signs that they were out fishing, had fallen asleep, and had drifted out too far to get back again. Since his arrival in London, he had been trying to find a place where they could stay till they could return to their own country; but not having succeeded, he sought the advice of the magistrate. That gentleman requested him to keep the men on board his ship a day or two longer, and he would make inquiries. The next morning, the Superintendent of the "Strangers' Home" saw an account of the case, in one of the daily papers, and immediately went to the Police Office and informed the Magistrate, that the men could be cared for in the "Home," till an opportunity oc-

curred to send them to their native land. They were therefore sent there, and a few days afterwards, Cap. Roper, of the ship *Consolation*, offered to take them to Singapore. On arriving there, they were as French subjects, placed in charge of the French consul, who sent them to Saigon, the capital of French Cochin China, whence they no doubt reached their homes, to the joy of their friends, and with grateful feelings towards those who had cared for them in their distress.

The other case is that of four Tunisian Arabs who were of their way home from the United States, and put up at the "Home" for a few days. While in London, they were assailed by a party of ruffians, and seriously injured, three of them being stabbed, and the life of one placed in danger. Under ordinary circumstances, this case would not have been known to the authorities, the men would have had no redress, and the ruffians would have been emboldened for future outrages. But the officers of the "Home" took the matter up, and applied to the government for aid to the men. This was given; their assailants were arrested and punished; the Lords of the Treasury paid all the expenses for legal assistance, &c., and also paid the expenses of these men to their homes; and they "left the Home with expressions of gratitude for the protection afforded them, and for all that had been done for them whilst detained in England."

Of the 418 inmates of the "Home" during 1877, 56 were natives of Bengal and Punjab; 34 of Madras and Ceylon; 55 of Bombay and Goa; 48 of Africa and Arabia; 102 of China; and 49 of Japan; 5 of Mauritius; 24 of Straits of Malacca; 43 of Turkey and Persia; 2 of Madagascar. Of these, 49 were shipwrecked, and 35 otherwise destitute cases. They were disposed of as follows: 216 were shipped by employers; in the "Home"; 39 were shipped by employers; 55 returned in the vessels they came in; 43 shipped themselves; 11 passages were provided to individuals; 4 were sent to a lunatic asylum; 2 died in the Home; and 1 in a hospital; and 46 remained in the "Home," Jan. 1, 1878.

Famine in China.—Every now and then there crops out from the layers of heathendom something that shows a great unwritten law of God. We give two contrasts, which are to the shame of Christendom. "All the money contributed for the relief of the famine in China did not amount to a two hundredth part of the revenue that was derived by India or by Great Britain from the opium monopoly of China." Dr. Legge, one of the gentlemen distributing famine relief funds in North China, writes as follows: "One other matter in connection with the village relief work, I cannot but allude to. It impressed me deeply as I pondered over it. In the second or third as I have village I visited I asked the head man, 'Have you any opium smokers here now?' 'No,' he replied, 'they are all dead, and we have issued a notification that any person smoking henceforth shall be prosecuted according to law.' 'Have you sown any opium?' I inquired. 'No, not a grain; and we have prohibited its being sown,' was his reply. After leaving the place, I made inquiries as to the respective values of wheat and an opium crop, and found that these Shansi villagers with starvation staring them in the face, refuse to cultivate the drug which they know is blighting their land, though it would yield them

more than double the money value of a crop of wheat.—*Chr. Adv.*

Testimony Against Fiction.—The late Charles Skilton, of Trenton, willed his library and book cases to the use of the teachers and pupils of the public schools of Trenton, and to that of the apprentices and mechanics of the city. His real estate was also given to the trustees of the public schools, the income to be expended in the purchase of books for the library. He set forth in his will that "truth is always preferable to falsehood;" that "life is too earnest and time too precious to be wasted on fictions that give no knowledge;" and furthermore that a "single great practical truth is of more value than all the fictions ever invented by novelists." Whereupon he directs that none of the money given by him shall be expended in purchasing novels; but that the books bought for the library shall consist of "works and treatises on the arts and sciences, especially on mechanics, engineering, mathematics, astronomy, geography, chemistry, natural philosophy, architecture, history, travels and biography." Of "mere tales and works of fiction" he will have none. Furthermore, he avers that no part of the real estate devised shall ever be used or let for the purpose of manufacturing or selling intoxicating beverages, nor of tobacco in any of its forms.

Penalty of Intoxication.—A law passed by the Legislature of Michigan declares offices vacant in all cases where the incumbents are convicted of being intoxicated, and provides for the filling of such vacancies without delay.—*Chr. Adv.*

Ritualism.—The *Episcopal Recorder* gives the following explanation of Ritualistic ceremonies.

In the case of Ritualism exhibited in St. Clements' or in any other similar church, the thing to regard is the premises, the foundation, the radical and essential doctrine and belief of the system. The priests and people use much symbolism, more ornamentation, and the most elaborate ceremonial which American ingenuity, prompted by the results of mediæval fancy, can invent. They do so because they believe in the Real Presence of Christ, body, soul, and divinity, in the consecrated bread and wine of the Memorial Supper of the Lord.

But we do not grant the premises. We deny the fundamental doctrine of Ritualism. We prove to our own satisfaction that the doctrine of "Real Presence," as the clearest and best Ritualists themselves explain it, is entirely wrong, unscriptural, and idolatrous. It is not before the Lord their performances are done, but before an idol, an object of their own creation.

Natural History, Science, &c.

Poisoning of Live Stock by Cuckles.—The Cuckles, *Agrostemma Githago*, is very common among wheat crops in France, and conspicuous by the beauty of its reddish violet flowers. Its seeds get mixed with the grain of the crop, and, when separated from the wheat, pass with the small and damaged grains into the siftings, from which a meal is prepared for feeding live stock, more especially pigs and calves. Experiments have proved that meal made from the cuckles seed contains a poisonous principle which causes the death of animals to which it is fed. A few years ago at the Vaise market a whole drove of

calves sent in for sale were suddenly seized with violent illness. The food supplied to them was submitted to careful chemical analysis and microscopic examination; and the experts who made the investigation unanimously agreed that the sickness of the calves was due to an acid and narcotic poison in the food, derived from the ground cuckles seed. An action for damages was brought before a court of justice, and a verdict obtained against the miller who supplied the meal. Similar instances occurred among the pigs in the neighborhood of Donai. Here too, the miller who supplied the food was cast in damages, but, both to throw away the whole stock he had on hand, he continued to sell it mixed with a large quantity of fresh wheat siftings. Even in these diminished proportions, the cuckles still manifested its poisonous properties, and fresh actions for damages being brought against him by owners of stock which had suffered from its use, the miller ultimately arrived at the reluctant conclusion that siftings containing even small proportions of cuckles are best not sold as food for cattle.—*The Country Gentleman's Magazine.*

The Poplar Tree.—In the vast waste steppes contiguous to the fertile plains of the Hungarian Banat, attempts have been made for many years past to bind the drift sand of which they consist by establishing plantations of poplars, the variety chiefly employed being the *Populus Canadensis*. These are generally renewed every ten or fifteen years, by which time they furnish serviceable wood of considerable value.

Food of Birds.—Prof. S. A. Forbes, of the State Normal University of Illinois, in writing of "the food of birds," gave the following as an evidence of the good service of our birds:

Of the two hundred and seventy-seven birds, insects were found in the stomachs of two hundred and thirteen; hymenoptera in fifty-five (ants in eighteen, ichneumon in only four) adult lepidoptera in twenty-two and caterpillars in eighty-one; coleoptera in one hundred and forty-nine (predaceous beetles occurring unluckily in nineteen; but to compensate for this, curculio in sixteen, and plant beetles, crymellidæ, in eleven); hemiptera in forty-five; orthoptera in twenty-two (of which thirteen contained grasshoppers); spiders in twenty-two, harvestmen in six, and earth-worms in three. On the other hand, thirteen had eaten corn; nine, wheat; five, cherries; and fourteen, black-berries. The mere reading of these figures is enough to show the immense value of birds as a class, if there are any persons left at present to question it.

While seventy-seven per cent. of them had eaten insects, only seven per cent. of them had eaten grain, and seven per cent. of them fruit (cherries or black-berries.)

Comparing now the records of the leading families, those represented by the commonest birds, we find that of the forty thrushes examined ninety five per cent. had eaten insects (one an ichneumon and ten predaceous beetles), seven and a half per cent. had eaten grain; thirty-seven and a half per cent. had eaten cherries or black-berries. Of the nineteen warblers all had eaten insects (two of them ichneumon, however), and none had eaten either grain or fruit or predaceous beetles.

Of the fifty-nine seed eaters, so called, seventy per cent. had eaten insects, of which none were recognized as beneficial forms, while none had eaten either grain or fruits, and

seventy per cent. had eaten seeds of wheat. This largest and most abundant family birds seems to me the most valuable.

Thirty-six of the blackbird family were studied, and eighty per cent. of them eaten insects (but one beneficial as far known, and that by a meadow-lark), thirty-one per cent. had eaten grain, and per cent. fruits.

The thrushes are the great sinners against the garden and the blackbirds against the farm.

Ninety-four per cent. of the thirty-thirty-catchers had eaten insects (only one a hoverer)—a suspicious number; about thirty-three per cent. had taken small hymenoptera and ten per cent. predaceous beetles; two had saved their diet with blackberries, and one had eaten wheat. All but one of seventeen woodpeckers were insectivore, and only the red-head had done any harm. He had also tried a little wheat. The stacks of three out of the four sap-suckers contained a curious amount of wood. The flick a renegade from the customs of his ancestors, ruffling in the dirt the brilliant plumage which by a nobler parentage, had invariably stuffed his stomach with ants and their eggs.

The cuckoos are also great caterpillar eaters and feet. At Normal, on the green caterpillar which infests the maple. They have a taste for spiders and harvestmen—pardon the scism—which dims their fame. The killdeer plover proves to be a valuable bird. The rebreasted grosbeak is the only bird known to relish the Colorado potato-beetle.—*Facts and Farn.*

The London Dust man.—There are more than 300,000 inhabited houses in London consuming more than 3,500,000 tons of coal a year; and, besides the ashes from this great quantity of fuel, the dust-man gathers to other refuse of the houses. He is employed by a contractor, who agrees with the corporation to remove the ashes, &c., out of the city and the contractor divides every load into six parts, as follows: Soil or fine dust, which is sold to brick makers for making bricks, and to farmers for manure; breeze, or cinders, sold to brick-makers for burning bricks; rag bones, and old metals, sold to marine stores dealers; old tin and iron vessels, sold to tinning makers, for clamps; bricks, oyster and oth shells for foundations and road-building; an old boots and shoes, sold to the manufacture of Prussian blue. Sometimes much more valuable things than these are found. It is sifting the different parts of loads that the men, women, and women are employed; they are as busy as ants; mere babies and wrinkle old dames take part in the labor, and all of them are so covered with dust and ashes that they are anything but pleasant to content plate, though, as a rule, they are useful, honest and industrious members of society.—*S. Nicholas.*

Stinginess of a Spider.—Dr. Lawrence Hamilton contributed the following incident to the *London Times*, which he says, "I witness myself." A boy removed a small spider's place it in the centre of a big spider's web which was hung among foliage, and distant some four feet from the ground. The large animal soon rushed from his hiding place under a leaf to attack the intruder, which ran up one of the ascending lines by which the web was secured. The big insect gained rapidly upon its desired prey, the smaller

ture, (spiders are cannibals.) But the spider was equal to the occasion, for on barely an inch ahead it cut with one of posterior legs the line behind itself, so that a stronger insect fell to the ground, thusording time and opportunity for the diminutive spider to escape along the ascending rope of the web.

The Corner-stone of the new Eddystone lighthouse was to have been laid a few days ago, but work has been going on at the foundations for a year past, and another stone will probably see the structure five or six feet above water, where work can be carried on more rapidly. This famous lighthouse is a reef of rock in the English channel, thirteen miles southwest of Plymouth. The old Eddystone light was a wooden structure, built in 1696-99, and swept away with its silt, Henry Winstanley, in 1703. Three years afterwards work was begun on a new lighthouse, which stood until 1755, when it was destroyed by fire. Then John Smeaton's great engineering structure, which the new one is to replace, was built, being completed in 1759. The granite blocks of which it is constructed are dovetailed into each other with such ingenuity and skill that the whole structure is practically one stone with the rest on which it is built, and its great strength is the chief reason why it is necessary to anchor it. In heavy storms the rigid lighthouse acts as a lever with which to split the rocks on which it is constructed, and, sooner or later, the latter is bound to give way, carrying with it the otherwise indestructible lighthouse. The new lighthouse is to be built on the same general plan, but on a firmer foundation, and the lantern is to be 130 feet above high-water, or fifty-eight feet higher than the present light. The intensity of the light at Eddystone has been gradually increased from a power of twenty-four candles in 1759, to that of 7325 candles in 1872, and it is probable that this will be increased in the new structure. An instructive lecture on light and optics might be written from a history of the famous Eddystone light.—*Public Ledger.*

While making an excavation for a new building at Charing Cross, London, recently, the workmen came on the fossil remains of various extinct animals at depths varying from fifteen to thirty feet. Among the objects discovered were elephant tusks and molars, the teeth and many of the bones of the extinct gigantic ox, and a portion of the horn of the great extinct Irish deer. Some of the fossils are not yet been identified.—*Ch. Adc.*

A process has been patented in Germany for retaining the aroma of ground coffee by pressing it into cakes in cast-iron molds. The cakes, like those of chocolate, are crossed by lines that they may be broken into sizes needed for use. The volume of the coffee is reduced to less than one-third of the original bulk. Like chocolate, it is packed in tin-foil for preservation.—*Ch. Adc.*

It is within that thou must join with Christ's appearance, that so thou may'st be Christianized, and thy mind made truly Christian. Thou must be purified in thy spirit, and baptized with the Holy Ghost and with fire, and know the powerful operation of the Lord. They that have not experience of the new birth, they cannot enter into the kingdom of God.—*W. Penn.*

THE FRIEND.

SEVENTH MONTH 12, 1879.

We have received a copy of the printed minutes of New York Yearly Meeting, held at Glen Falls, and commencing on the 30th of 5th mo. last.

The report of the "Bible School and Missionary Board" mentions, that in accordance with the arrangement made at the last Yearly Meeting, a Friend and his wife had gone to reside among the Indians at Shawneetown, and were laboring to promote the material and religious welfare of those people. The Board had kept in operation seventeen schools in North Carolina and Virginia,—twelve being for freedmen and five for white children among Friends. They had appropriated \$50 towards the maintenance of a teacher among a settlement of persons in the interior of Mexico, who had withdrawn from connection with the Roman Catholic Church.

We are sorry to observe in this report, and in the minute of the Yearly Meeting respecting it, the use of the word "Sabbath" as applied to schools held on the "First-day" of the week. The Society of Friends have ever believed that the term "Sabbath" did not apply to that day, but belonged to the Seventh-day of the week under the Jewish dispensation; and that the Christian Sabbath refers not to any particular day, but to that state in which we cease from our own labors in a religious sense, and come to rest in the Lord, and know all our works to be wrought through his power. For, as Robert Barclay says, they were "Persuaded that all days are alike holy in the sight of God." He further adds, "We not seeing any ground in scripture for it, cannot be so superstitious as to believe, that either the Jewish Sabbath now continues, or that the First-day of the week is the anti-type thereof, or the true Christian Sabbath; which, with Calvin, we believe to have a moral spiritual sense."

A proposition was introduced looking towards an association of the American Yearly Meetings for united action in regard to "Foreign and Domestic Mission Work," which was referred to a committee for consideration, and subsequently laid over till next year.

From the Report of the Trustees of the *Maryland Fund*, it appears that the principal of the fund is \$50,000. The income was devoted partially to the circulation of the books, "The Power of Religion," "Colored Americans," and "Diamond on War;" and partly to various benevolent agencies, largely those of an educational character.

The Report of the Associated Executive Indian Committee, stated that owing to difficulties with the Interior department, they had ceased to work in co-operation with the Government in the care of Indians. The tabular statement prepared by the General Indian Agent, shows a very encouraging improvement in the last ten years in those tribes who have been under the care of Friends. The number of ponies, which constitute the principal wealth of the wild Indians, has diminished; while the number of cattle has increased fourteen-fold, and the number of hogs and the quantity of agricultural products raised is greatly in excess of what it was when Friends assumed the charge of these people.

A minute was received from the Meeting for Sufferings in London, informing that where the certificates of Friends from America traveling on religious service had been examined and verified by that meeting, "all their traveling and needful personal expenses should be paid during their residence amongst us."

The statistical tables showed the whole number of members to be 3,546, of whom 729 are under 21 years of age. The number of births during the year had been 38, and of deaths 52. Cornwall Quarterly Meeting was continued under the care of a committee.

Reports were presented by special committees on Temperance, Peace, General Meeting, &c., and by the Central Tract Association, and the Trustees of the Mosher Fund. The examination into the condition of the meetings and members as developed by the answers to the queries seems to have been crowded into a small space, by the multiplicity of other concerns claiming attention. Among the most prominent deficiencies noted in those answers were the neglect of attending meetings—others than those held on First-day mornings (no mid-week meeting being held in one Monthly Meeting), and an exception to the preservation of love noted in all the answers but two. The minute on the state of Society is brief, and principally relates to the non-attendance of meetings. The following extract from it indicates a belief that this is partially due to the want of more preaching: "If our fellow members do not attend our meetings as they should, the fault may be our own. Do we seek to be very near the Master's feet, to hear his gracious words, and to receive bread? He would have us stand to the flock? 'Preach Christ, or anti-Christ we'll be preached!' If we think some brother is too active, let us inquire, 'Am I as active as I ought to be?'"

It is in no unkind spirit that we remark, that we have been pained with the evidence these minutes afford of a departure from the former customs and we fear, to some extent, the principles of our Society.

As illustrations of this, the report of the Committee on General Meetings speaks of the definite number of conversions effected in certain meetings—more than one hundred at one place, seven or eight at another, five at another, twenty at another, &c. Of one opportunity it says, "We believe that ten souls were at this time brought out of darkness into His marvellous light;" of another, "Three or four souls were born into His kingdom at that time."

We do not believe that those who conducted these meetings and drew up the statistics of them, had such an insight into the spirits of men, as would enable them to tell how many of the "tenderers were really converted, brought out of darkness into the Lord's Light, or born into His kingdom;" and we are sorry to see such statements introduced into a report to the Yearly Meeting.

Again, this report evinces that the committee depend entirely for the spread of the Redeemer's kingdom on the preachers. Of one meeting it says, "The Committee have felt the needs of this little flock to be so pressing, that they have, from week to week, sent some ministering Friend to attend the meeting, and as many should open to hand forth to them the Bread of Life;" of another, "The need of a faithful evangelical shepherd, to

gather and to feed these scattered sheep, requires no argument of ours;" of another, "A strong meeting might be built up, if some thorough-going servant of the Lord would go there in his power, to preach his gospel to the people;" of another, "Here, as at Westmoreland, there is need, not only of occasional earnest effort, but to follow and confirm this, the steady, patient labor of some consecrated Friend. A minister could easily alternate between West Branch and Westmoreland, and could be partially cared for by the resident ministers."

We do not undervalue a living ministry, which is a precious gift to the Church, and useful now as it always has been for the edifying of the body; but it is the Spirit of the Lord alone that can bring any sinner into the true fold, and it is only as the ministers are actuated by that Spirit and move in obedience thereto, that they can do anything to promote the cause of vital religion. If people learn to look to them for nourishment, instead of turning inward to the Spirit of Christ in their own hearts, they will be like those the apostle speaks of, "ever learning and never able to come to the knowledge of the Truth." George Fox declared it to be his mission to bring people off from their outward teachers to Christ, their true Teacher.

The advice of the Society heretofore to its ministers has been to abide in their outward callings at home until the Lord sends them forth with a message, and when that is delivered and the service accomplished, then, as George Fox expresses, "let them return again with speed to their habitation, and there serve the Lord in their generation; that no slothfulness may be among you." As the same experienced laborer in the Lord's vineyard declares, "The intent of all speaking is to bring into the life, and to walk in and possess the same, and to live in and enjoy it, and to feel God's presence, and that is in the silence."

In collecting the accounts published in our paper under the heading "*Religious Items, &c.*," of the proceedings of other religious societies, we have been influenced by the belief that the information thus conveyed would be acceptable to many of our readers. We wish however to state, that publishing such proceedings by no means implies that they meet with our approval. In some cases perhaps, such approval can be given without qualification; in others, while the object intended to be effected may be good, the means used may not be satisfactory; and in others, there may be very little that we would be prepared to sanction, and yet they may be of enough importance to interest a general reader.

For example, if we should speak of the result of Missionary labor among the heathen in any designated locality, while we sympathize with rightly-directed efforts to spread the Redeemer's kingdom in the earth, we do not thereby endorse the methods pursued by the persons engaged in that labor; or abandon our convictions of the necessity and wisdom of adhering to our own principles in reference to Gospel Ministry, and the need of Divine Guidance and help in all religious efforts.

SUMMARY OF EVENTS.

UNITED STATES.—Increased care in inspection of steamboats shows favorable results in the statistics of accidents. There has been a steady decrease in the

number of lives lost, and of accidents, since 1875; the number given for 1874 being 607, for 1878-9, 105. Much of the saving of life may be accredited to the greater efficiency of the life-saving service, and the increasing number of light-houses and buoys put in position by the government.

Over forty persons injured by fireworks, were admitted to the Pennsylvania and St. Mary's Hospitals in this last year.

It is stated there have been nearly fifty hotels and cottages built in Cape May city since the late fire. The Suro Tunnel, in Nevada, to construct which has taken ten years of labor day and night, and the expenditure of six millions of dollars, has been completed; and on the 30th ult. the powerful engine of the combination shaft of the Heile and Norcross and Savage mines was started, discharging the water in the tunnel, at the mouth of which it made its appearance in one hour and twenty minutes, showing a temperature at first of 101 degrees, which gradually increased to 118 degrees in eight hours. In this time the water in the long trenched-out mines, was said to be lowered 100 feet. The success of this great engineering work surpasses expectation.

The largest cultivated wheat farm on the globe is said to be the Grundin farm, not far from the town of Fargo, Dakota. It embraces some 40,000 acres, both government and railway land, and lies close to the Red River. Divided into four parts, it has dwellings, granaries, machine shops, elevators, stables for 200 horses, and room for storing 1,000,000 bushels of grain. Besides the wheat farm, there is a stock farm of 10,000 acres. In seedling time, 70 to 80 men are employed, and during harvest 250 to 300 men. The average yield is from 20 to 25 bushels per acre.

The public debt statement for last of present month shows an increase of \$21,788.

The total tonnage of a draft coal from all the regions, for the month of August of the year 11,885, 655,335 tons, and for the first half of the year 11,885, 649 tons, against 7,249,248 tons in the corresponding half of last year. Notwithstanding this large production, the demand for coal is said to be active, and prices are firmly maintained. American coal is selling at Geneva, Switzerland, slightly cheaper than French and German coal, and is regarded as much superior.

The iron trade is reported in very bad condition at present. All the pig iron manufactured is speedily consumed, whilst the rail mills are working to their fullest capacity. Compared with this time last year, the prices of iron rails have advanced five dollars per ton; steel rails three dollars, and pig iron one and two dollars. The product of pig iron, bar iron and rails this year, is expected to exceed that of any previous year.

The superiority of steel over iron rails, is illustrated in the case of the Erie railway, which cost, prior to 1872, for new rails and repairs to rails, \$2639 per mile. Since the road has been laid with steel rails, the repairs have been so reduced, the annual expense is but -253 per mile. On the entire road, this is said to effect a saving of \$1,800,000.

The *New York Times* states, that the Bessemer process by economizing the manufacture of steel, which is now made direct from the ore, has effected a saving in expenditure in all the existing railways in Great Britain, the guaranty of the use of rails, of \$850,000,000. The cost of the manufacture of steel rails runs for fifteen cents per ton, and the cost of replacing worn and defective rails. The best steel rails are expected to last not less than twenty years. The royalty paid Bessemer amounts to over \$5,000,000.

Of the nineteen window-glass factories in Pittsburg, fifteen are in operation. The number of deaths in this city for the week ending on the 5th inst., was 305. Of this number 42 died of consumption; cholera infantum, 52; convulsions, 11; debility, 10; disease of the heart, 8; typhoid fever, 5; inflammation of the stomach and bowels, 12.

Deaths, &c.—U. S. sixes, 1881, registered and compared 1047; do same, registered, 1027; consols, 1033; 4 1/2 per cents, 1063; 4 per cents, 1097.

Otton is quiet and steady at 121 & 122 cts. for middlings.

Petroleum—Crude, 6 cts in barrels, and refined, 6 1/2 cts. for export, and 9 & 9 1/2 cts. per gallon for home use. Lined oil, 64 & 65 cts. per gallon. Lard oil, 48 cts.; crude sperm, 78 & 80 cts.; winter bleached, 90 & 93 cts. per gallon.

Flour.—Market dull and unchanged. Minnesota extra, medium and choice, at \$4.75 & \$5.25; Penna. do. do., \$5 & \$5.37; western do. do., \$5.20 & \$5.80; patent and other high grades, \$6 & \$7.25. Rye flour, \$8.10 & \$8.12. Corn meal, \$2.35.

Grain.—Wheat is unsettled—red, \$1.16 a \$1.18; white, \$1.18 & 1.19. Rye, 59 & 60 cts. Corn, 44 & 45 cts. mixed, 34 & 35 cts.; white, 37 & 41 cts. Hay and straw.—Average prices during the week: Timothy, 85 cts to \$1 per 100 pounds; mixed, 70 cts.; straw, \$1 per 100 pounds.

Beef cattle.—The market dull, and prices low Extra, 5 1/2 & 6 cts.; good, 5 1/2 cts.; medium, 4 1/2 to 5 cts., a 4 1/2 cts. Hogs, 5 1/2 & 6 cts. Sheep, 3 cts. per lb., as to quality.

The House of Commons on the 14th inst., the Government proposed to the royal commission to enquire into the causes of the cultural depression, and how far they were created or are remediable by legislation. The matter came under great debate, and all agreed that a great cause of depression was American competition.

On the morning of the 31st inst., a terrible explosion occurred in the High Blantyre colliery, near Glasgow. There were 31 persons in the mine at the time, and have been taken out dead.

The cotton made in the Blackburn district is reported unprecedentedly low. The mills will be closed cause of the depression.

In the last ten months, England gained \$21,254, in silver, receiving \$23,418,000 from Australia, \$1,677,000 from America, and exporting \$16,293,000 Germany, which sent in return \$1,995,000.

In the seventeenth century, the deaths in London exceeded births in number; but with special systems of drainage and sewers, the death-rate notwithstanding increased density of population, has been so reduced that the registered births of last year exceeded the deaths by 45,489.

The Paris mint has commenced the coinage of 1,500,000 francs in gold, silver and bronze pieces, for the service of the Government. The die adopted is that of Latin Union. Serbia has no national money, business has been transacted in the coins of the adjoining countries.

The Senate has adopted the bill providing for the return of the Chambers to Paris.

France is a large importer of foreign stock. In 1881 she imported 185,000 black cattle, 1,500,000 sheep, and 120,000 pigs—all of which are examined in the frontier custom houses by veterinary surgeons. To meet this expense a small tax is exacted per head.

The report of the St. Petersburg Public Library for last year, gives the number of readers as 110,000, who ordered 278,000 books and journals; of the readers 150 were foreigners. There are 384 periodicals in Russian and foreign languages.

The prospects of cessation of the famine in Cashmere are gradually improving. The area of the autumn sowing exceeded expectations, and the importation of grain is proceeding satisfactorily.

WESTTOWN BOARDING SCHOOL.

Our friends Benjamin W. and Rebecca G. Passmore having resigned their positions as Superintendent and Matron of Westtown Boarding School, Friends may feel drawn to engage in the important and responsible duties of superintending this Institution, are requested to communicate with either of the undersigned. The present Superintendents desire to be released in 4th month of next year.

William P. Townsend, West Chester, Pa.
John S. Comfort, Fallington, Bucks Co., Pa.
Charles J. Allen, 304 Arch St., Philadelphia.
Elizabeth B. Evans, 322 Union St.
Anna V. Edge, Downingtown, Pa.
Deborah Rhoads, Haddonfield, N. J.

MARRIED, at Friends' Meeting, Middletown, Delaware Co., Pa., on Fifth-day, the 12th of Sixth month 1879, W. WENSTER, son of William and Elizabeth Webster of Middletown, Pa., and CLARA ENGLAND daughter of Thomas H. and Elizabeth S. England, of Norristown, Pa.

DIED, on the 20th of 4th mo. 1879, SARAH C. PAUL, in the 65th year of her age, a valuable member and overseer of Woodbury Monthly Meeting of Friends, New Jersey.

1879, 5th mo. 17th. M. JENNIE LOVETT, in her 27th year, a member of the Monthly Meeting of Friends of Philadelphia for the Western District. She was favored with an evidence that she would be received into a Heavenly home.

Life and Adventure in Japan.

BY E. WARREN CLARK.

(Continued from page 253.)

I did not accept the new appointment very promptly, even though my loneliness and life would be at an end, for I should have American and English society there. Finally, I submitted certain conditions to the Department of Education, which were accepted; whereupon I prepared to remove to the capital.

The three conditions were afterwards fulfilled satisfactorily. The first condition was, that I should have the chair of chemistry only assigned to me at an end, for I should have my philosophical apparatus should go with me; and thirdly, that a good house should be assigned me in place of the one I left at Shidz-u-ka.

Moving in Japan is not very easy work; at least all my furniture was packed, and sent off to a seaport six miles distant, to be shipped on a Japanese junk. Every thing has done up in straw, making huge bundles and bales of every possible description. A long train of carts led the horse one morning, loaded with my household effects. Each cart had a naked Jap pulling like a horse in front, while a woman pushed the cart behind, and children tugged at the wooden wheels, or called ahead with short ropes. The procession of carts made the most ridiculous freight-train I ever beheld; yet these poor people drew the cumbersome loads all the way to the seaport, for human labor is cheaper than that of horses, and each cart only cost half a dollar.

Six huge boxes containing philosophical apparatus, which could not be sent by sea, were subsequently carried on men's shoulders all the way to Tokio, over the Hakone Mountains, a distance of one hundred miles!

I cannot forbear mentioning the romantic feelings with which I finally returned to Yokohama, after being shut up so long in the interior of Japan. When I first landed in the country, and journeyed into the lonely isolation that awaited me so far away from friends, I dreamed a strange dream, conducting my senses outside the world and all its familiar associations. But when I turned back again, leaving the pagan surroundings in which I had at last become so much at home, and re-entered the business life and social atmosphere of a civilized and Christian community,

it seemed a greater dream than the other! Yokohama is to all intents a foreign city set down upon Japanese soil, and although it may look queer and quaint enough to all newcomers, from whatever land they hail, yet a Jap fresh from the provinces of the interior seems more to astonish his awe-struck eyes than a verdant Vermont youth would experience in his first visit to New York city. The regular and paved streets, the substantial stone houses, the elegant shop windows, the fine equipages, the foreign style of dress, and the busy life of the people, all combine to produce an effect upon the bewildered senses of the country Jap, the like of which he never knew before.

And when he strolls along the water-way and looks out towards those leviathan steamers which lie at anchor in the bay, or when, perhaps, he goes to the railroad depot and timidly asks for his ticket for the next train to Tokio, it begins to dawn on his mind that the nineteenth century is finding its way into his long-secluded country, and that the outside barbarians are not such offensive creatures after all.

On entering Yokohama after my long residence apart from foreign society, I looked upon the city with something of the wonder and curiosity of a veritable Japanese; and the first thing I proposed to my companions from Shidz-u-ka was a ride on the railroad just completed between Yokohama and Tokio.

We saw the locomotive and train coming as we turned down the hill toward the city; and the naked Japs who pulled our jinrikishas looked in astonishment at the smoking locomotive, wondering what kind of an animal it could be!

In journeying along the Tokaido, the newly constructed telegraph followed us the whole way from Shidz-u-ka, and the little wire seemed like a thread that bound me to civilization. The country people have a great deal of superstition about it, and dislike to have the wire cross their rice-fields; for they say the evil spirits prevent the crops from growing. At first the ignorant farmers used to cut the wire, and throw stones at the glass insulators on the poles; they would also watch the wire for hours to see the messages go by! What the crazy foreigners had stretched the wire across the country, for they could not imagine; but at last they ceased to trouble their heads about it, and left the telegraph alone.

But the railroad was far more wonderful; of that they could see the meaning, though the locomotive was entirely beyond their comprehension.

The road is only eighteen miles long, and there is a substantial stone depot at each terminus. The Yokohama station is very handsome, and all the arrangements are complete.

When I took my first ride on the railroad I was accompanied by a little boy who formerly

lived with me, and who was now going to his father, the new Governor of Tokio. The little fellow had never heard of a railroad train, and when we were fairly seated in the car he looked around, wondering what kind of a little house we were in, with its curious doors and sliding windows. When the train began moving slowly out of the depot he grasped the seat with a look of terror, and glanced anxiously into my face to see if I was frightened also. But finding that I only laughed at his fears, he regained courage enough to look out of the window at the trees and houses which began to fly by us faster and faster. The first time the car stopped he ran out on the platform and peered under the wheels to see what was pushing it along; but when we passed one of the down trains he looked at the locomotive, and seemed at last to realize that this was the big black horse that was doing it all. In half an hour we arrived at Shin-a-ga-wa, a distance which it used to take more than half a day to journey over, and which brought us to the suburbs of Tokio. Here we took jinrikishas, with naked Japs, to draw us two miles more into the heart of the city.

On arriving at the capital, I reported myself at the Mombusho Department, where I had an interview with the Minister of Education. He received me very kindly, and stated that Mr. Hatakayama, the newly appointed Director of the Imperial College, would confer with me there respecting my new duties in the institution.

Now it so happened that Hatakayama was my warmest Japanese friend, whom I had known for several years in America, but who had changed his name on returning to his country, so that I did not at first recognize him. In the United States his name was Soogi-woo ra; but this was an assumed title, and now he had resumed his family name.

He was one of the first students who left Japan to study in foreign countries, shortly after the bombardment of his native city, Kagoshi-ma, by the English war-ships. After remaining a year in England, he came to the United States, and eventually settled down to his studies at New Brunswick, N. J., where I first met him at Rutgers College. He was quite a lad when he left his native land, and his mother was very anxious about him, for she had heard strange stories about the barbarians who were reported as living in England and America. With a mother's solicitude she urged him to take a few bags of good wholesome rice with him, for she had been told that people in America lived on snakes, frogs, and lizards!

He became a Christian at New Brunswick, and joined the Second Reformed Church. When called to an account for this act by the government, he replied that he had come abroad to study into the true source of western civilization, and he found Christianity to be that source, therefore he had embraced it.

The power of Christian countries did not consist in cannon-balls and gun-powder, as he had been led to believe when his native city was bombarded by the English; but there was a better principle underlying civilization, which had peace and love and religious life as its basis. His reason indorsed Christianity, and his whole heart accepted it.

Instead of the government calling him back to his own country and punishing him, as he had cause to fear—for Christianity was forbidden in Japan, and at one time was punishable with death—they placed more confidence in him than ever, and gave him the superintendency of the other students who were subsequently sent to pursue their studies in America.

At New Brunswick he was very earnest in his desire that I should go and help the cause of civilization in Japan, and before I started for that country he came up to see me in Albany. After spending a pleasant evening with some friends, we went to the depot near the Hudson River Bridge, and bade each other *Stionara*—good-by; and as the train moved off, Hatakéyama said, "You go westward while I go eastward, and we will meet around the world in Japan!"

I started from the same depot across the continent, and passed over the broad Pacific, while he sailed over the Atlantic; but owing to his joining the Japanese Embassy, with which he travelled through all the countries and courts of Europe, he did not reach Japan until two years later, at the time I was called from Shidz-o-ka to Tokio. My surprise and pleasure may therefore be imagined when the Minister of Education informed me that Hatakéyama was now the new director of the college, and that he would consult with me concerning the duties and details which heretofore were contested with yaconims and petty officials.

(To be continued.)

"For The Friend."

An Historic Parallel, of George Fox and Martin Luther as Reformers.

BY CYRUS W. HARVEY.

A perusal of the above pamphlet, which is the production of a Friend in Kansas, who is in the station of a minister, has been deeply interesting to many in this vicinity, as setting forth, in a clear logical method, the doctrine of our Society respecting the work of the Holy Spirit of Christ in the heart of man in convincing him of sin, and redeeming him from its power. It opens with a lively comparison of the respective labors and views of the two eminent men named in the title, and then passes on to enunciate the fuller elaboration of George Fox's '*fundamental principle*,' as the following extracts will show:

"Luther's great work was, to overturn the system of ritualistic ceremonies and outward works, established by the Church of Rome, and in their stead, establish the great gospel principle of Justification by Faith; so God revealed to him this great truth, and sealed it upon his heart again and again, in the words of the Apostle, '*the just shall live by faith*.' The mission of George Fox—like that of the apostle Paul—was to 'turn people from darkness to light,' and by clearer views of the nature and extent of the work, influence, and guidance of the Holy Spirit, to draw them away from the barrenness of an empty profession; that by *obedience to the Light*, they

might know that that *inward experience, communion, and guidance*, of the Holy Spirit, *whereby the life of faith is to be lived*. As God dealt with Luther, so he dealt with George Fox, and on the very threshold of his work, He revealed to him by special teaching of the Holy Spirit, the principles which will always underlie, and serve as the basis for teaching, such a religion of *inward experience*.

"At that time, people were everywhere taught, that they were to depend on the priest or minister, to direct their worship, and for instruction in the Scriptures. The Bible was held in almost superstitious reverence, while the Holy Spirit, by whom it is interpreted, and '*fulfilled in us*,' was practically almost universally denied. Such were the grounds of faith and religious teaching when, in the language of George Fox, '*The Lord opened to him by his invisible power, how every man was enlightened by the Divine light of Christ*.' Jour. p. 72. We have seen how that the words of Paul, '*The just shall live by faith*,' in the language of Luther's historian, 'had a mysterious influence on his life.' They became a 'powerful and creative sentence,' around which the Reformation of Luther gathered; so the words, '*He was the true Light, which lighteth every man that cometh into the world*,' Jno. 1. 9, became the great creative sentence, around which the Reformation of George Fox gathered. The doctrine of '*The light of Christ within, as God's gift for man's salvation*'—which George Fox, and his worthy associates so often expressed in the foregoing words of John—William Penn called the '*fundamental*,' 'characteristic, or main distinguishing point or principle,' of the early Friends, which was 'as the root of the goody tree' of doctrine, that grew and branched from it.' Pref. to Fox's Jour. p. xi.

"As this doctrine is *fundamental* in the teachings of George Fox, every effort to explain the '*Inner Life*' of his system, when it is rejected, or not rightly understood, will be in vain, and the author of every such attempt will justly lie under the charge of perverting his system, either with or without design.

"George Fox thus presents his *own* method of teaching this doctrine, found on page 73 of his Journal; 'I was to direct people to the Spirit, that gave forth the Scriptures, by which they might be led into all truth, and up to Christ and God, as those had been who gave them forth. I was to turn them to the grace of God, and to the truth in the heart, which came by Jesus, that by his grace, they might be taught, which would bring them salvation, that their hearts might be established by it; their words might be seasoned, and all might come to know their salvation nigh. I saw Christ died for all men, was a propitiation for all, and enlightened all men and women with his divine and saving light, and that none could be true believers but those who believe therein. I saw that the grace of God, which brings salvation, had appeared to all men, and that the manifestation of the Spirit of God, was given to every man to profit *withal*.' George Fox seems at once to have seen through all those things, which men have invented as 'means of grace,' he saw that they were useless, that in reality they were *hurtful*, only diverting the mind from a real experience. He realized in his own experience, the blessedness of 'being taught of God,' of looking to the light of Christ in his own heart, and holding *imme-*

diute communion with Him in Spirit and truth; and so he taught the people, alw directing them to seek for Christ in them, th they might know Him revealed in them, a Saviour, a Teacher and a King. The quotation made above from George Fox, is so p_{er}tine in its affirmation of the doctrine of t^e 'light of Christ in all men,' that it seems n^o could misunderstand him; but it is cause sorrow to all those, who *sincerely* and *scientifically* believe the doctrines of the e^{ar}ly Friends; that there are those occupying station of ministers in our Society, who this time, reject this doctrine and teach again it, and still claim the name of Friends. Su^{ch} ministers, for the purpose of *self-justifica*tion and the more effectually to lead astray t^e weak and the unwary; generally make g^{re}at pretence of following the scriptures, and c^{laim} against forms, creeds and tradit^{ions}. They seem to forget, first—that in eve^{ry} Christian denomination, the bond of fello^{ws}hip is, a unity of faith, and second, that iⁿ early Friends—as do those who are now unity with them—believed, that their do^{ctr}ines were the doctrines of the Christ^{ian} religion.

"For The Friend"

Extracts from the Diary and Letters of Ebenezer W^{or} (Continued from page 386.)

1848. 2d mo. 9th. I feel willing this mo^{rn}ing to try to write some account of my l^{is}kness, that if I should be spared to live, may read it in time to come to my own v^{an}tage; bearing in mind, the great necess^{ity} of always being in a state of preparation, at remembering that my happiness here ar^e hereafter depends upon my keeping my e^{ye} single to my Divine Master and living iⁿ strict obedience to his holy will, then, n^o upon the ground of merit in me, but of h^{is} mercy. I have felt the necessity of keepi^{ng} my eye single to my merciful Master in wo^rd and actions; may I live up to it. I w^{as} taken sick on the 15th of 12th mo. 1847. W^{as} at home repairing my woodshed; was takeⁿ with pain in my breast and sickness of stomac^h, followed by a heavy chill. I went to bed an^d was sweat with h^omoclock branches prepar^ed for the purpose. The next day sent for the doctor; my disease was called a bilious iⁿflammation of the lungs. For near two week^s of the first part of the time I felt strippe^d though I believe I was mercifully favo^red with my senses. I have not heard anythin^g to the contrary from any that attende^d oⁿe. I understand from some, since I go^t better, that they did not expect me to recove^r. I felt a desire to see my relations again bef^ore I was taken. I believe my feeling was theⁿ if I could feel my way clear, I could be r^esighted. When I began to get a little bette^r I felt a fervent desire that the Lord would b^e pleased to open and prepare the way for an^o qualified me to perform the remaining servic^e which He may require of me in this place, iⁿ his own way and time. I also was merciful^{ly} favored at seasons to feel his Holy Spirit t^o be with me, to qualify for prayer, after whic^h I frequently felt that I could resign mysel^f into his hands, and lie down in peace an^d safety and sleep; which is a great blessing, and was a great comfort to me. One of m^y ankles was made quite sore by frequent applic^{ations} of mustard plasters; became cankered and was a long time in getting well, whic^h perhaps has been humbling to me. I hop^e

whole sickness may prove a blessing of long and lasting benefit to me. May I not forgive it, but bear forth unto Him who raised me up, the fruits of thanksgiving and praise. While sick, I was brought to a degree of love and concern for a man to live up Cold Spring Creek, near the reservation, who had been charged, (and I think likely justly so), of letting the Indians be ardent spirits. I heard reports of their drinking a good deal while I was sick, and it was said they got much of it from that man, though if I was spared to get well I would think it him on the subject. When I got able to go about I remembered the feeling I had, it felt discouraged, thinking I would be in danger of being insulted or abused by the rough intemperate people he kept about him, two weeks after as I was passing by the place I saw five Indians about leaving there, I, I think, more or less intoxicated. I thought I ought to speak to him, and requested a man who was going in to invite him out, he came, and I spoke to him on the subject, letting the Indians have intoxicating drink; so expressed the concern I had felt for him, he seemed much tendered, I think to tears; I acknowledged it was wrong to sell or use the article; he said when he disposed of what he had, he would not keep the article in his house; he also said he had prayed, that if he drank any more ardent spirits, it might take him sick; that he had once felt the love of God in his heart and thought he could be something of it at times yet, and that he was one of the greatest of sinners. I told him I thought he had best get rid of what intoxicating drink he had and try to live up to his good resolution. I first thought of wholesaling it, (afterwards) that I was not fit to sell the article (in any way). I inquired how much he thought he had; he said he thought about ten gallons of whiskey and so other ardent spirits in his house. I proposed that he should throw it (the whiskey) on the ground; he spoke of its being a loss. I think I spoke in this way, that when we felt anything to be wrong, that was the time to leave off and try to reform. That the Lord's time was the best time, that it was dangerous to put it off and to keep the temptation about him. He seemed much broken down, and consented to throw it out if I thought best. I told him he should not lose by it if he did. We went into the house, took hold of the barrel, shook it and said he thought there was more in it than he had supposed. There was a number sitting in the bar room who kept their eyes upon us as if their curiosity was much excited, not knowing what we were going to do. The poor man acted with a good degree of firmness, though no doubt it was a great cross to bear such a testimony against an article he had dealt in and used so much himself. I asked for a pail and a measure; he had it brought; we lifted the barrel on the counter, those who sat looking on appeared struck with astonishment—their countenances looked quite sober. One man pleaded in favor of converting it into vinegar so as not to waste it. We measured out a pailful, I carried it (out) and threw it on the ground, and so continued until we emptied the barrel. While we were drawing it off, he sold some to two men who promised it should be used for medicinal purposes; to one to put on camphor, the other man's wife was quite sick, he said the doctor directed him to get

some (I think) to rub her with. There was another drinking man present who presented his jug and pleaded hard to have it filled, but he did not get any. I do not recollect that there was an unkind or disrespectful word spoken to me during the whole time. After we had got done, I took the man aside who had pleaded so hard for liquor and talked with him of the great evil of making use of intoxicating drinks, both as it regards our happiness in this world and our future prospects. He first spoke strongly in favor of ardent spirits as a medicine, said it had been recommended to him by a physician and that there did not appear to be any other medicine so well adapted to his disease, which was something like an affection of the heart. I told him the bad effects of the medicine were more to be dreaded than the disease. He said before he got to using it as a medicine, he was opposed to using the article, and before we parted, he said, he had thought at times, it would have been better for him to have died, than got to using ardent spirits. I parted with them both in kind, good feelings, and had great reason to be thankful for the preservation and favors of that day.

(To be continued.)

Additional Advices. DOCTRINES.

There are influences operating in the present day, both within and without the pale of our Society, the tendency of which is to draw the members from the simplicity and spirituality of our Christian profession, and from a faithful and consistent support of the principles and testimonies of the gospel as always held by us, into a nearer conformity to the religion, the worship, and ways of the world. These influences are apparent in the same disposition to shun the daily self-denial and cross-bearing belonging to the Christian; in the effort to reduce religion very much to a formal and intellectual work, which the unaided powers of man may originate or promote; to smooth and widen the path to salvation, so as to make it more easy and attractive to the tastes and inclinations of the unregenerate mind; and to substitute works of a benevolent or ostensibly religious character, for lowly waiting, in silent introversion, at the feet of Jesus, to be taught of Him, in whom are hid all the treasures of wisdom and knowledge, and who only can savingly instruct in the things which belong to the soul's peace.

The awakened mind is readily influenced by the desire to be doing something for Christ's cause, and unless it watches diligently unto prayer, in the Light of the Lord, the will of man prompts this desire into unbidden activity; takes pleasure in it; gradually dims the spiritual vision, and leads to the substitution of these formal services, for the patient abiding under the heart-changing and crucifying work of the Holy Spirit in the soul, which is in danger of settling down at ease in them.

In the feeling of Christian love and interest for all our dear Friends, and especially for the younger class, we tenderly desire that we may all diligently watch against these plausible and delusive tendencies, and strive to dwell much inward with Christ Jesus, in reverent, silent retirement from the many alluring voices that are abroad, seeking above all to be taught of Him who is the only saving Teacher, and who will not fail to give true

peace and rest to all who come to Him, take his yoke upon them, and learn of Him, who is meek and lowly of heart.

The preciousness of our testimony to the prerogative of the Head of the Church to dispense to whomsoever He will, the gift of Gospel ministry, and against all ministry originating or performed in the will and wisdom of man, has been renewedly felt at this time; having been revived by accounts received that a few of our members have not been sufficiently on their guard against lowering its importance and retarding its spread. Let us ever bear in remembrance, dear Friends, that as it is only under the immediate influence of the Holy Spirit that acceptable worship can be performed, so it is alone, when by the transforming power of his grace the Head of the Church has prepared any for his service, and bestowed a special gift thereof, that true gospel ministry can be exercised; and this not in their own time and way, but when and where He freshly qualifies and appoints. Those who are thus called and commissioned, and as they wait on their Holy Leader, find they have nothing of their own to glory in, for, at his command, and as He gives the matter, a necessity is laid upon them; yes, woe is unto them if they preach not the gospel. Hence they are bound freely to dispense that which they also have freely received, looking for and accepting no other reward than that given by their Master for obeying his commands.—1867.

Grinding Corn in Africa.—The corn is pounded in a large wooden mortar, like the ancient Egyptian one, with a pestle six feet long and about four inches thick. The pounding is performed by two or even three women at one mortar. Each before delivering a blow with her pestle, gives an upward jerk of the body, so as to put strength into the stroke, and they keep exact time, so that two pestles are never in the mortar at the same moment. The measured thud, thud, thud, and the women standing at their vigorous work, are associations inseparable from a prosperous African village. By the operation of pounding, with the aid of a little water, the hard outside scale or husk of the grain is removed, and the corn is made fit for the mill-stone. The meal irritates the stomach unless cleared from the husk; without considerable energy in the operator, the husk sticks fast to the corn. Solomon thought that still more vigor than is required to separate the hard husk or bran from wheat would fail to separate "a fool from his folly." "Though thou shouldst bray a fool in a mortar among wheat with a pestle, yet will not his foolishness depart from him."—Livingstone's Africa.

A farmer who had recently listened to an exposition of the text from Isaiah, "The ox knoweth his owner, and the ass his master's crib; but Israel doth not know, my people doth not consider," was giving food to his stock, when one of his oxen, evidently grateful for his care, fell to flicking his bare arm.

Instantly, with this simple incident, the Holy Spirit flashed conviction on the farmer's mind. He burst into tears and exclaimed: "Yes, it is all true. This poor dumb brute is really more grateful to me than I am to God, and yet I am in debt to Him for everything; what a sinner I am!" The lesson had found its way to his heart, and wrought there effectually to lead him to Christ.

For "The Friend."

Letters of James Emilen.

(Continued from page 379.)

"2nd mo. 20th, 1855. I have been led, more than ever of late, to crave the condition of a little child in the school of Christ, feeling that I should esteem it an unspeakable favor to be instructed even in the first rudiments, if I may only be assured it comes from the true teacher of his people. I greatly desire to be preserved from all deceit and mixture, and yet I find the enemy is ever watching to take me in weak moments, and I find, as I suppose we all do, that I am never safe without keeping in a watchful, prayerful condition. It feels to be very desirable that we constantly bear in mind, that the day and the night are both alike to Him—that in our times of stripping and desertion and temptation, we are as much under his baptizing hand, as in seasons of strength and comfort. But I am instructed in many lessons, that I never learn as thoroughly as I ought, and I crave the aid and sympathy of the members of our Father's family."

* I felt a fear in my last letter that I wrote too much in the character of an adviser, which indeed, I feel but poorly qualified for, among the rocks and bars amid which our vessel is now sailing. If I may only be preserved from shipwreck and brought safely to land, I think I shall esteem it a great favor."

"3rd mo. 22d, 1855. I think it likely exercised minds often feel as David expressed in that petition, 'Be not silent unto me, lest if thou be silent unto me, I be like them that go down into the pit.' We love to behold his countenance, to hear his voice, even though it should seem to be under the cloud, or in the language of reproof—we even learn to love his judgments; but to be left long without seeing our beloved or hearing his voice, is no doubt felt by all who rightly appreciate such favors, as a great trial. 'Thou hidest thy face and we are troubled.' Is not this our greatest trouble? and do we not sometimes feel a desire a little similar to this, extending towards our spiritual friends? Would it not be a great comfort to some of us, if we had many Penningtons, clear sighted, penetrating, honest, unflattering friends, and withal so compassionate, to write to us and to visit us. His love was so hopeful that he would scarcely cast any off, he thought there was healing virtue in divine grace sufficient for the greatest backsliders, if they would look to it.

"I have been confined to my chamber for near two weeks * * * feel better physically, but not so much improved in other respects as I hoped for. While I was on my sick bed I was visited by a young man who had lived with me for some years in his early life. I thought his visit seemed like meeting one in a long journey—with bread and wine—it so comforted me; he is a solid well concerned Friend."

We Can Trust Still.—Allen W. Gardiner, whose death was recently announced, was the founder of the South American Missionary Society, and a preacher in several parts of South America and Australia. When in Australia his health failed, the sight of one eye was irreparably lost, and he began to fear the loss of the other. He then wrote:

I often wonder, as with trembling hand
I cast the seed along the furrow'd ground,
If ripened fruit for God will there be found;
But I can trust.

I cannot know why suddenly the storm
Should rage so fiercely round me in its wrath;
But this I know, God watches all my path,
And I can trust.

I have no power to look across the tide,
To know, while here, the land beyond the river;
But this I know, I shall be God's forever;
So I can trust.

Selected.

DYING WORDS OF NEANDER.

I'm weary—I'm weary—let me go home.
I'm weary, weary—let me go!

For now the pulse of life declineth;
My spirit chides its lingering flow,
For her immortal life she pineth.

I feel the chill night-shadows fall;
The sleep steals on that knows no waking;
Yet well I hear best voices call,
And bright above the day is breaking.

Not now the purple and the gold
Of trailing clouds, at sunset glowing,
These dim and fading eyes behold;
But splendors from the Godhead flowing.

'Tis not the crimson Orient beam,
O'er mountain-tops in beauty glancing;
Light from the throne! a flooding stream;
'Tis the eternal Sun advancing!

As oft, when waked the summer morn,
Sweet breath of flowers the breezes bore me;
In this serene, fairer dawn,
Perfumes from Paradise float o'er me.

The joy of life hath been to stand
With spirits noble, true, confiding;
Oh, joy! though thought! to reach the band
Of spotless souls with God abiding.

Ye loved of earth! this fond farewell,
That now divides us, cannot sever;
Swift-flying years their round shall tell,
And our glad souls be one forever.

On the far-off celestial hills,
I see the tranquil sunshine lying;
And God himself my spirit fills
With perfect peace—and this is dying!

Methods I hear the rustling wings
Of unseen messengers descending,
And notes from softly trembling strings,
With myriad voices sweetly blending.

O thou, my Lord, adored! this soul
Oh, oft its warm desires hath told thee;
Now wearily the moments roll,
Until these waiting eyes behold thee.

Ah! stay my spirit here no more,
That for her home so fondly yearneth;
There joy's bright cup is running o'er,
There love's pure flame forever burneth.

—Dr. Roy Palmer.

Selected.

WHAT WE SHOULD CARE FOR.

[From the Swedish, in the *New England Journal of Education*.]

It matters little where I was born,
Or if my parents were rich or poor;
Whether they shrank at the cold world's scorn,
Or walked in the pride of wealth secure;
But whether I live an honest man,
And hold my integrity firm in my clutch,
I tell you, brother, plain as I am,
It matters much!

It matters little how long I stay
In a world of sorrow, sin, and care;
Whether in youth I am called away,
Or live till my bones and pate are bare;
But whether I do the best I can
To soften the weight of adversity's touch
On the faded cheek of my fellow-man,
It matters much!

It matters little where he my grave,
Or on the land or on the sea,
By purling brook or heath-stormy wave,
It matters little or naught to me;
But whether the angel Death comes down
And marks my brow with his loving touch,
As one that shall wear the victor's crown,
It matters much!

For "The Friend."

A Tour in Marocco and the Great Atlas.

(Continued from page 379.)

"To collect plants was now scarcely possible, for the snow covered the surface, and it was necessary to kick it away from tufts of grass or dwarf bushes, in order to ascertain what might be growing beneath. The wind, which had hitherto spared us, now joined itself to the opposing forces, driving the snow with blinding force, and making it cold, already severe, well nigh intolerable. The poor fellows who had for some way followed us without further remonstrance, now renewed with redoubled energy their appeals that we should return. Kissing the hem of our coats at one moment, brandishing the arms with passionate gestures, or actually pulling us back at another, they really impressed us more by their pitiable appearance exposed with the slightest covering to the bitter blast, their feet and bare legs out as bleeding from the rocks and thorny bushes the way.

"It was now apparent that the dread which these men were evidently impressed did not arise solely from apprehension of an encounter with human enemies. Firmly believing that the heights of the Atlas are inhabited by *djinn*s, or demons, it was obvious to our companions that the storm was caused by their anger at the intrusion of strangers into their sanctuary. We had not before noticed that one of the *Shellus* carried with him a live cock under his arm. In a state of the utmost excitement, he now proceeded to rent the animal's throat, in order thus to appease the wrath of our supernatural foes, the renewing the appeal to us to forego further prosecution.

"In emphatic English, and such pantomime as we could command, we explained that we were determined to reach the top, but would then immediately return, and proceeded to face the last portion of the ascent. This last, through a broad *colado*, some twenty to thirty feet wide, between steep walls of rock where on narrow ledges giving scarcely any hold for snow, the last plants were collected. The storm, now almost a hurricane, raged with increasing violence; it was scarcely possible to face it, and our hands and feet gave scarcely any token of sensation. The thermometer though carried in a pocket, marked 25° Fahr (or about -4° Cent.) when last observed. Maw pushed on with increasing vigor, and in the driving snow, was soon lost to sight. Presently, shouts were heard, and he reappeared, saying that he had reached the ridge where the ground fell away on the southern side, that he could see absolutely nothing in any direction, and, owing to the severity of the cold, found it impossible to remain." He estimated the height at rather more than one hundred feet above the point reached by Ball, who in turn was about sixty feet above Hooker. They descended through that short space; and, after very brief deliberation, decided that no more could be done, and that a speedy descent was the only possible course. The appearance of the party was singular, and not one could have been recognized by his nearest friends. Faces of a livid purple tint were enclosed by masses of hair thickly matted with ice, and the beards, frozen in the direction of the wind, projected on one side, giving a strangely distorted expression to each countenance."

In the valley little snow had fallen, and was half melted, and continued to fall in intermediate condition between snow and that forms slush, a word of odious import except for its associations with the Christmas holidays. We learned that the sheik, Si-sau, was waiting for us some way lower in the valley, and without halting we went on to meet him. Long waiting in the valley and without mending our tempers, the sheik, already much annoyed that his intentions not to let us go beyond the Saint's ab had been ineffectual, was doubtless in a rage humor when we at length appeared, or successfully breaking through all the straits he had contrived. Yet he managed to put a good face on the matter, offered his congratulations on our safe return, and invited to partake of some food that was provided at a spot where an overhanging rock gave a poor shelter. This did not save the poor ones who had done their best to keep us in the intended limit from a desperate owing-up, and many threats of future vengeance. Drenched and cold as we were, the invitation to halt was anything but tempting; in this country the obligations of hospitality are binding on the receiver as well as the giver, and it was necessary to wait some time and eat a few mouthfuls before proceeding on our homeward way to Arroual."

The observations of our travellers gave the height of the pass they here reached 11,484 ft, and they estimated the mean height of the main ridge to be at least 12,200 feet. Their second successful attempt to reach the summit of the mountain was up the Anzaviz valley, where their difficulties were increased by the deep-rooted suspicion of strangers entertained by the mountaineers, and the religious bigotry of the local sheik, who refused permission. Hooker assumed respectful tone, and said to the interpreter, Tell him, that the Sultan has issued his order he should go to the snow—El Graoui (the governor of the district) has ordered that we shall go to the snow—the Kaid of Ansmiz has ordered that we shall go to the snow—if he refuses to carry out their orders, we shall start to Ansmiz, and send a courier to the Kaid and to El Graoui, and we shall see that that will be the consequence." The sheik alluded gave way and promising that all would be ready the next morning.

The following day, the sheik put them in charge of a guide with strict injunctions to lead as far as the snow, but not to allow them to proceed farther. The account says:

"By the time we reached the lower skirts of a long snow slope that stretched upwards towards the summit of the mountain, the sun, which had now ascended nearly to the zenith, beat down upon us with intense rays, that drove two of the party to seek some temporary shelter. The Sheikhan guide probably considered that he had done his day's work; and, finding a narrow rim of shadow under an overhanging rock, lay down, with his head screened from the blazing heat. Ball, who was suffering from a violent head-ache, also found a spot that gave partial shade. Hooker took advantage of the halt to push beyond the reach of interference from the guide, when Ball felt able to resume the ascent, the guide springing to his feet, and for the first time became aware that one of the party was already far ahead to be easily overtaken.

He proceeded by a series of nearthly yells and frantic gesticulations, to attempt to attract Hooker's attention, and urge his return. When these demonstrations were found to be useless, and he perceived that Ball was about to follow in the ascent, he commenced a fresh series of exclamations and pantomimic gestures of which the burden seemed to be that if we went to the top, we were certain to be shot; but the same argument that was used with effect on the Tagher Pass—the gift of a silver coin—was so far successful that no attempt was made to arrest Ball's progress, and, after ascending a few hundred feet higher, the unwilling guide gave up the attempt, and rested comfortably until he had an opportunity of rejoining Hooker in his descent."

Hooker reached the summit about 2 P. M., and was rejoined by Ball nearly half an hour later. Excepting some light fleecy cumuli floating over the low country to the north, at a lower level than the eye, the sky was cloudless; but in some directions a thin haze obscured the details of the vast panorama. Our first glance was inevitably directed towards the unknown region to the south, and there, at a distance of fifty or sixty miles, rose the range of Anti-Atlas, showing a wavy outline, with rounded summits, and no apparent deep depression, rising, as we estimated, to a height of from 9,000 to 10,000 feet above the sea."

On their return they "found the sheik in a state of thorough exasperation at our success in defeating his orders, probably aggravated by the tedium of waiting for our return. He discharged volleys of fierce abuse at the guide who had failed to keep us within the prescribed limits, but was not openly disrespectful in his manner towards the Christian *kakim* who had come to his country under the immediate shadow of imperial protection. Foreseeing future trouble in returning through the valley after dark, he was evidently much annoyed at the necessity for awaiting Ball's arrival. To calm his impatience, Hooker lent him a field telescope, and the novel experience so much amused him that his ill-humor appeared to vanish for the time. Uncivilized men are like children, rarely remaining long under the same impression; and even when seemingly quite possessed by some strong feeling, are led away from it by the veriest trifle."

Waiting.—When Jesus, beyond Jordan, received a message that Lazarus whom he loved was sick, "he abode two days still in the same place." He did not hasten to comfort his sick friend, or to heal him, but waited until he died, before going to Bethany. This delay must have seemed strange to his disciples and to Mary and Martha at first. But they understood it afterward. The blessing was fuller and richer for every hour that it was delayed. We all need the discipline of waiting. We all need to understand that God's best gifts are never bestowed at once. How long Abraham waited for the birth of Jesus! How long the Hebrews waited and sighed in Egypt! How long the world waited for the coming of Christ! That which grows rapidly is usually short-lived and of little value. That which matures slowly is usually permanent. Jonah's gourd sprang up in a night, but it perished next day. So with many a mushroom growth. Speedy results—prompt answers to prayer—may be very precious;

but if we would enjoy the ripest fruitage of grace we must expect to wait as well as labor and pray.

I have two seeds; each came from a luscious fruit. If I plant the one I will have, in a few weeks, a vine covered with melons. But in the autumn that vine will die. It will repay me well for the care and culture I give it. But it lasts only a summer. The other seed, if placed in mellow soil, will give me this season only a little scion—a mere twig with a few leaves—no flower or fruit. The next year it will be somewhat larger. It will send out branches, and bear more leaves, but yet no fruit. I prune it, I dig around it, I protect it from the winds, and from insects that would prey upon its bark and leaves. I do this three, four, five, six years, and then I am rewarded with a few white blossoms of a peculiar and delightful fragrance. These are succeeded, in due time, by a few ripe oranges. Now I rejoice. But why? What are those half a dozen oranges as the return for so much work and waiting? Oh! they are the first-fruits only. They are the beginning of results that will go with steady increase for many years. In time, if I continue to cultivate my tree, it will yield me a thousand oranges a year. It will live a century. It will become an inheritance for my children, and my children's children. It will be an arboreal gold mine for several generations. There are families in Italy that live upon the fruit of a few orange trees planted by their great-grandfathers."

Something about Stairs.—Three days in a week at least the mother of a family who does her own work must be on her feet from morning till night—washing day, ironing day, baking day—and in this count, sweeping day and the day for general housework is not enumerated. If her working rooms are all on one floor her tasks are hard enough, but suppose her kitchen is in a basement, and her dining-room and sitting-room on the second floor, and her wood-house a step or two down, and her water likewise, the addition to the labor required is simply enormous. A house might as well be built on a steep side-hill, so far as doing the work is concerned, as to be built with steps from one room to the other. The woman who does her own work ought to have, on absolutely one level, the kitchen, the pantry, the dining-room, the nursery, and be able to get wood and water without taking one step up or down.—L. L. Shepherd.

Too Dear a Whistle.—As a family composed of three persons, father, mother, and little son—a bright little fellow—were taking a trip on one of the railroads that run through Williamsport, Pa., a little incident occurred that is worth relating. The day was a balmy one, and the window was raised to admit the fresh air. Little Fred, like all children, insisted on putting his head out of the open window to see what was going on outside of the train. The father, somewhat alarmed at the conduct of his son, tried various plans without resorting to force to keep him within bounds, but without success. "Fred, Fred," idea came up in his mind. "Fred, Fred," said the father, "keep your head in or the wind will take your hat" and in order to frighten his hopeful, he slyly slipped the hat off the little one's head and concealed it. As soon as this was done the child began crying,

and could not be appeased. Finally *poter familias* told him to look in an opposite direction and he would whistle the hat back again, all of which was very neatly done, and the happy parents settled back in their seat and began to converse pleasantly, thinking they had cured little Fred; but not so, for in a very short time he seemed to brighten up suddenly, and away he sent his little hat through the ear window, shouting as it disappeared, "Papa, whistle again!" Moral—never deceive your children.

Communicated for "The Friend."

The hope that some one better qualified to write a description of it, may have seen the wonderful electrical phenomenon which occurred during a heavy thunderstorm on the afternoon of the 11th instant, not far from Media, Delaware county, has been the inducement to send the following notice of it for "The Friend."

The writer had been sitting for a long time at a window which commanded a fine view of the western horizon, bounded by beautiful slopes of woodland, alternating with those of rich corn-fields and ripening grain, and enjoying the grand exhibition of almost incessant broad flashes of lightning from the north and south, but more especially the exquisite display of brilliant zigzag streaks and winding streams of liquid fire that were ever and anon darting hither and thither over the western clouds. Yet all this, though certainly unusually grand and beautiful, of its kind, was nothing novel or rare. But suddenly there arose, almost perpendicularly, a column of fire, evidently coming out of the earth from behind a neighboring piece of woods. Rising up in some measure like a skyrocket, yet not so rapidly, it displayed a fiery pillar of greater apparent breadth than that of a rocket, but divided into a succession of *fire-balls*, linked closely together like a chain, by short sections of electric light. This extraordinary chain of meteors rose at first perpendicularly, in a slightly serpentine line, then curved over until it passed over the house, where, when about the zenith, (and perhaps encountering an opposing current of electricity), it *exploded* with a tremendous crash. Very heavy peals of thunder had occurred several times during this storm; but the several members of the family, none of whom but myself had been privileged to witness this grand exhibition, all agreed that this crash was unlike any thunder they had ever before heard, and resembled rather some great explosion, followed by grand reverberations. There was a degree of solemnity amounting to awe, attending and following it, which was deeply impressive, and which, I think, I can never forget. M.

7th mo. 15th, 1879.

Judicious Instruction.—A pleasant incident occurred in a public school some time since. It seems the boys attending the school of the average age of seven years had in their play of bat and ball broken one of the neighbor's windows, but no clue to the offender could be obtained, as he would not confess, nor would any of his associates expose him. The case troubled the teacher; and on one of the citizens visiting the school, she privately and briefly stated the circumstances, and wished him, in some remarks to the scholars, to advert to the principle involved in the case.

The address had reference principally to the conduct of the boys in the streets and at their sports; the principles of rectitude and kindness which should govern them everywhere, even when alone, and when they thought no one was present to observe. The scholars seemed deeply interested in the remarks. A very short time after the visitor had left the school a little boy arose from his seat and said: "Mrs. L., I batted the ball that broke the window. Another boy threw the ball, but I batted it and it struck the window. I am willing to pay for it." There was silence in the school as the little boy was speaking, and continued for a minute after he had closed. "But it won't be right for one to pay for the glass," said another boy, rising in his seat; "because we were engaged alike in the play; I'll pay my part." "And I!" "And I!" A thrill of pleasure seemed to run through the school at this display of correct feeling. The teacher's heart was touched, and she felt more than ever the responsibility of her charge.—*Hogg's Instructor.*

Religious Items, &c.

War vs. Christianity.—One of the English journals lately stated that Robert Moffat, the father-in-law of David Livingstone, and for many years a missionary among the African people, approved of the Zulu war, as a means of spreading Christianity; and used the following language, "The venerable Dr. Moffat has found energy in his declining years to preach the extermination of the Zulus in the cause of Christianity." This statement brought forth the following satisfactory reply:—

"It is evident that one who can make the above assertion and others of a like spirit is an enemy of missions to the heathen world. Nothing can be farther from the truth than the above declaration, and the writer, I try to persuade myself, would blush with shame did he but know the character and history of one who has spent the greater portion of a long life incessantly proclaiming the spirit of Him who came to the world to preach 'Peace on earth and good-will to men.' Ever animated by that spirit, he has at the risk of life prevented collisions of warlike tribes, and on more than one occasion been surrounded by men eager to destroy him, while doing all in his power for their own sakes that they might 'bury the spear.' Again and again he has escaped amid a shower of spears, war axes, and clubs, and all arising from his undying desire to prevent war. As to the charge brought against a large section of the missionaries, looking at the present destruction of human life as a *jehad*, or holy war, waged in the interests of the spread of the Gospel, and, therefore, to be sanctified by all the company of the preachers," is like the above, which I believe to be utterly without foundation, so far as I have known missionaries, and I have known many. So far from preaching the extermination of the Zulus, I have repeatedly, in public and private, expressed my opinion that the Gospel cannot be enforced by the sword, and that mission work all over South Africa has been thrown back fifty years by the present war with the Zulus. Yours, a constant reader,

ROBERT MOFFAT."

Monks in Belgium.—The Belgian Government continue their warfare against monks. Recently, an order expelled from Germany

had come on to Belgian soil, with two hundred boys, opened up an establishment, with the authorities ordered to move out of the country in a week.

Statistics.—According to recent statistics of Churches in the State of New York, the following order: Methodists, 700,639; Presbyterians, 372,662; Baptists, 351,339; Protestant Episcopalians, 226,002; Reform (Dutch), 109,815; Congregationalists, 1,847; Lutherans, 77,731. In communication these same denominations rank as follows: Methodists, 198,900; Presbyterians, 123,630; Baptists, 109,972; Protestant Episcopalians, 78,515; Reformed (Dutch), 34,307; Lutherans, 34,439; Congregationalists, 30,922.

Harmony between Northern and Southern Presbyterians.—Words of greeting were changed by telegraph between the Northern and Southern Presbyterian Assemblies. The Northern Assembly sent the following: "The General Assembly of the Presbyterian Church, now in session at Saratoga Springs, presents its cordial salutation to the General Assembly in session at Louisville, praying for the grace, mercy, and peace through our Lord Jesus Christ, in behalf of the Assembly, and in the sympathies of a common faith and order."

To this kindly greeting the Southern Assembly sent the following reply: "The General Assembly at Louisville cordially reciprocates the kind Christian salutation of the General Assembly at Saratoga, and commends that body to the grace of our common Lord and Master, praying that his presence may overshadow it, and its deliberations all directed for his glory."

Natural History, Science, &c.

Peculiar Plants.—Among the plants in the Royal Gardens at Kew is the *Peruvian Moss*. The cells of its leaves contain a great quantity of volatile oil, a resinous matter, which violently expelled if the leaves are placed in water, the recoil causing a motion that appears to be spontaneous. In Italy, where this plant succeeds well in the open air, a shower of rain renders the air fragrant with discharged oil.

In the same gardens is the *Manchineel*, Euphorbiaceans tree from the sandy shores of the tropical parts of South America. The milk-white juice of this plant has a volatile poisonous principle, which however is so virulent enough to render credible the innumerable marvels related concerning its effects.

A Buried Lake Village.—The waters of the Swiss Lakes have been unusually low during last spring, owing to the long continued frost shutting off the ordinary supply of water from the small streams flowing into them. This has led to the discovery of many traces of the ancient lake inhabitants. The most remarkable of these was in the Canton of Berne in a peat moss bordering on a small lake about a mile in circumference. In the moss a trench was dug. Directly under the turf, says the *Spectator*, were found numerous remains of piles on which the houses of the lake dwellers were probably placed; further down, flint implements and weapons, intermixed with bone-tools, articles in wood, bone of animals and pottery were turned up in great abundance. The flint implements were of the usual shape and sort—arrow and lance

els, knives and saws—and, as many raw, flint and broken flints were found, it is conjectured that the dwellers were in the habit of making their own tools and arms. But as it is not found in the neighborhood, the whole material must have been brought from distance, probably from France. Many pieces were found made from serpentine and other minerals. Stones splintered by the action of heat abound. These it is supposed are used for boiling water. The pottery is very primitive, made entirely by hand and fired before an open fire. The lake-dwellers were also basket makers and not unskilled in pottery,—one of the “finds” being a bent wicker handle exactly like those now in use, and a hatchet handle. Bone chisels were numerous. Arrow heads of the same material were found, and the bone of a stag fashioned into a pair of forks. From the number of hair pins found, it is evident that they did some attention to the adornment of their persons.

Among the animal remains are the bones of the dog, badger, otter, the wild ox, bear, marmoset cow and moor cow, stag and pig.

Nordenskjöld in the Arctic Seas.—Those who were first interested in the progress of the Swedish expedition which has attempted the solution of one of the problems of navigation, and has sought to prove experimentally that the India seas may be reached by a northern voyage along the Arctic shores of Europe and Asia and through the Behring's Strait, will be gratified to learn that Professor Nordenskjöld has accomplished the feat after encountering great peril, and it is now proved that there is a navigable water north of Asia.

Other explorations will undoubtedly be made in the same field; and now that it is known that a route exists which is clear of ice at certain seasons, it is possible that it may be so defined as to become comparatively safe.

Nordenskjöld made his first voyage in 1875, under the generous patronage of Oscar Dickson, and reached the mouth of the Yenisei. He and his immediate staff ascended the river while the remainder of the expedition returned to Hammerfest in the short space of ten days. We are told that in Siberia he was regarded as a benefactor, who had realized the hopes of many generations, by opening a commercial highway to Europe through the Arctic Ocean.

The next year he made another successful voyage to the Yenisei, disposed of a cargo of merchandise, shipped new goods, and returned to Hammerfest after an absence of seven weeks.

The particulars of the present expedition, which has resulted so favorably, we clip from the *N. Y. Herald* of Fifth month 28th.

“The favorable results of his two voyages encouraged Professor Nordenskjöld to a bolder step. He no longer hesitated to affirm the possibility of rounding Taimur Land and the North Cape of Asia to the Lena River, and believed it possible to reach Behring Strait by the Arctic Sea. He also affirmed that the icebergs which accumulate on the eastern coast of Nova Zembla disappear every summer, being thawed out by the enormous mass of fresh water poured out by the three great rivers of Siberia. A new expedition on a vast scale was planned, and an appeal was made for support to Oscar, King of Sweden and Norway. This enlightened monarch,

who is himself a professional sailor, took the greatest interest in the project, and readily became its patron. He granted him a considerable sum of money, and commissioned several of the ablest of his naval officers to accompany the expedition, [which started from Tromsø, in Norway, July 10, 25th, 1878.]

“In December last, full reports from the expedition were received in Sweden. A letter from Christiania, Norway, published in the *Herald* of January 11th, 1879, contained a transcript of an extended communication from the gallant explorer, dated ‘‘On board the *Vega*, east of Cape Chelyuskin, August 20th, 1878.’’ In it he chronicles the voyage from the Yenisei and his successful doubling of the North Cape, accomplished the previous day. On leaving Port Dickson, August 10th, the *Vega* was favored with a fine breeze and started under full sail, but a few hours later the sea was covered with fog, and the advance had to be made with great caution through a group of small islands not indicated on the chart. The second day the fog became so dense that the *Vega* was obliged to lie for some hours close to a small sterile island, covered with thin mosses, which afforded a rich harvest for the botanist, Dr. Almqvist. The sea was but slightly salt, at least on the surface, but the zoologist obtained by dredging abundant specimens of the pure forms of deep-sea life. In the afternoon the fog lifted, and the steamer proceeded on its way through thin, rotten ice, which scarcely arrested her motion. In this manner the voyage continued leisurely, and the zoologists on board obtained splendid stores of marine animals peculiar to the Arctic seas, and hitherto unknown to science. Fish were abundant, but the shores were almost destitute of the usual Arctic birds.

“Professor Nordenskjöld thus chronicles a remarkable mineralogical discovery: ‘‘While the ship was lying moored to one of the few pieces of floating ice which we encountered and found to be of sufficient strength to bear a dozen men, Lieutenant Nordquist and I descended on the ice to see whether I here could find any trace of the remarkable substance of cosmic origin which I found in 1872 on the ice at the northern coast of Spitzbergen. I could find nothing of the sort here; but Lieutenant Nordquist directed my attention to some yellow spots on the ice, which I asked him to collect and hand to the botanist of the expedition for examination, thinking they proceeded from some diatomaceous mud. At the examination afterwards made, it was discovered that the substance in question was of no organic product, but coarse sand, consisting exclusively of very beautifully formed crystals, of a diameter reaching even up to a couple of millimeters. I have not yet had time or opportunity to examine them more closely, but, as an experienced mineralogist, I can see that this mineral is no common terrestrial one, but that it, perhaps, is a substance crystallized from the sea water by the severe winter frost.’’

“Between the 14th and the 18th of August the *Vega* lay at anchor in an excellent port in the sound between the Island of Taimur and the Continent, which the explorer named Actinia Harbor, on account of the numerous sea anemones there found. Mosses and lichens were abundant, affording a splendid pasture for reindeer, which were seen, though in scanty number. Professor Nordenskjöld re-

commends Actinia Harbor as a site for a permanent station for scientific observation, especially those of a meteorological character. On the 18th the *Vega* sailed along the Taimur Island and on the 19th along the peninsula of Chelyuskin, the sea being almost free from ice, though there was a bay filled with an unbroken ice field. At six o'clock on that day the North Cape of Asia was reached, and the *Vega* cast anchor in a little creek with flags flying and firing a salute with one of her small guns. The promontory lay clear in the sunshine free from snow. A polar bear was walking to and fro on the beach, now and then looking and snuffing in the direction of the creek, until frightened away by the noise of the salute. The expedition remained at the North Cape until noon of the 20th, making some excursions inland and taking astronomical observations.

“The details of Nordenskjöld's voyage subsequently to leaving the mouth of the Lena are as yet unknown, the only certain fact being the detention for many months in the ice near Kellett Land, as reported by a vessel which arrived at San Francisco. It is unnecessary now to recount the various measures of relief which were in process of execution, but which have happily proved unnecessary by the arrival of the *Vega* in Bohring's Strait.”—*Friends' Intelligencer*.

Unfaithfulness to discoveries of duties, plainly imparted, is the parent of doubts and distrusts.—*S. Scott*.

THE FRIEND.

SEVENTH MONTH 19, 1879.

The increasing disposition manifested in different parts of the Society of Friends to make arrangements for the support of those who are engaged in the work of the ministry, is one of the marked features of that gradual change from the doctrines as well as the practices of our predecessors in religious profession, which has been going on now for many years; a change which is welcomed by some as an improvement, and deprecated by others as a mournful declension, and which necessarily breaks the unity of the body and introduces discord and division.

Where a minister is drawn by the Head of the Church to travel in Gospel service, and his own estate is insufficient to defray the necessary expenses, it is right that sufficient help should be given by the Church or some of its members, so that the service intended should not be hindered. If the family of such an one is likely to suffer during the absence of its natural caretaker, it is right that their situation should be inquired into and relief afforded by concerned Friends, as is done in the case of all of our members who are in distress. This care has been taken by the Society since its first organization, and manifestly flows from that love of one another, and of the blessed cause of truth and righteousness, which should ever prevail in the hearts of real Christians. Nor is it in any degree inconsistent with the command of our Saviour to his disciples, “Freely ye have received, freely give.” For in a healthy state of the Church, the relief extended to the families is not because one of their number is a preacher, but because they are brethren in want; and

the help given to the minister is not as compensation for his preaching, but simply the defraying of those expenses which must be incurred in reaching the people to whom the Lord sends him, and which he has not funds of his own to discharge.

We believe there is a growing tendency practically to revive the old distinction between clergy and laity; to recognize certain persons as belonging to a distinct class from their brethren,—a class who are expected to devote more of their time to the service of religion, and who therefore ought to be relieved from the ordinary duty of laboring for the support of their families. But it is one of the glories of the Christian dispensation that *all* those who fully partake of its blessings are "kings and priests unto God," are "a royal priesthood, an holy nation, a peculiar people," that they should show forth the praises of Him who has called them out of darkness into his marvellous light. He who has been called into the ministry is under no different obligations than other Christians to labor for the extension of Christ's kingdom in the earth, though his line of service may be different, because it is the duty of *all* to labor in the Lord's vineyard, and to perform such services therein as the great Husbandman may appoint them.

The sentiment which regards ministers as a separate class of Christians, to be treated in a different manner from the other members of the Church, we believe is closely connected with a departure from, or at least a weakened hold on one of our most distinguishing doctrines—that the ministry can only be rightly exercised under the fresh anointing and immediate putting forth of the Head of the Church, and that without this Divine qualification it is no better than sounding brass or tinkling cymbal, however ardent in its character, intellectual in its tone, or replete with Scripture quotations it may be.

The value and efficacy of Gospel ministry depend not on the intellectual ability of the speaker, his mental cultivation or the amount of scripture information he may have acquired; still less on that study of the sacred records and comparison of texts and doctrines which may make him wise in his own conceit, while still involved in the mists of spiritual darkness; but it depends on the minister being brought into that humble, teachable and attentive state, in which he is prepared to hear the inexpressible voice of the Minister of ministers, and to distinguish it from the suggestions of his own imagination; and is enabled to deliver the message of the Lord in simple obedience to the Divine requiring, depending on a wisdom and strength that is higher than his own. As the minister of the Gospel must thus be immediately led and taught of the Lord, there is no reason why he should not when at home labor with his own hands to procure things honest in the sight of all men, as did the great Apostle Paul. It is not necessary for him to spend his time in study and preparation for the sermons he is expected to deliver, as is the case with most of the preachers in other denominations, who in consequence require to be supported by their congregations. On entering our meetings for worship his duty is the same as that of all others present—to wait in fervent exercise of spirit on the Lord for ability to offer true and spiritual worship unto Him, and if a command is given to speak to the people, to obey the

command; if no such impression is felt, to sit in silence, wrestling for the arising of spiritual life—an exercise which has often been abundantly blessed without the utterance of words.

SUMMARY OF EVENTS.

UNITED STATES.—A train, consisting of a locomotive and four cars, ready for the depot of Pennsylvania Railroad at 7.35 A. M., and arrived in Jersey City at 9.25. A part of the distance was travelled at the rate of seventy miles per hour. The return trip was made in one hour and fifty minutes. It is stated that arrangements are made to continue this fast line daily.

The 10th inst. in Locomotive works completed on the 10th inst. their 4700th locomotive.

The Board of Managers of Pennsylvania Society to Protect Children from Cruelty, state, that during the past six months, 284 cases have been brought to their notice, involving the custody of 619 children. This is regarded by the secretary, as an evidence of the increase of the evil field of labor, because in excess of any previous six months. During this time there were fifty arrests made, and 213 children were removed for charges of neglect, cruelty, &c., all of whom were provided with homes.

Five ocean steamships sailed from New York on the 12th, carrying over six hundred saloon and steerage passengers.

The growth of the business of American clock and watch manufacture for export, is illustrated in the statistics, showing that in 1870 the value of American clocks exported was \$584,273; watches, \$5,325; in 1873, clocks, \$936,003; watches, \$140,794. The importation of Swiss watches has dwindled to insignificant figures, and we stand second to France in the amount of our export trade.

A tabular statement has been prepared at the Post-office Department, making a comparison between the issue of stamps, stamped envelopes and postal cards for 1878-79. The total value of this year's issues is \$29,295,093, an increase of \$971,866.17 over the value of those of last year. The increase in the number of ordinary postage stamps is 4.29 per cent, as compared with an increase of 7.66 per cent, for 1878 over 1877. This comparative falling off is due to the effect of the new law for the compensation of postmasters, having for its basis the number of stamps cancelled, not the number sold, which has put a stop to speculative purchases. There were 221,807,000 postal cards issued, an increase of ten per cent. The increase in the value of sales to the public, between the two years, is \$1,003,281.42.

A significant feature of a table prepared in the Treasury Department, showing the amount of notes and fractional silver coin outstanding at the close of each fiscal year from 1860 to 1879 inclusive, is found in the column giving the value in gold of the total outstanding currency. From this it is seen, that with the exception of two years, the purchasing power of the money in circulation has been constantly increasing. On the 31st of last month, the total amount of currency in circulation was \$734,804,994.78, being worth its face in gold. This is about \$9,000,000 in excess of the purchasing power of the total outstanding currency at any previous period of American history.

An approximate report of the foreign trade of the United States for the fiscal year just closed, gives the imports at \$460,000,000, and the exports at \$900,000,000.

A piece of the great meteor which fell in Emmet county, Iowa, on the 10th of 5th month, weighing in the aggregate 500 pounds, has been subjected to a thorough examination, with the following results: The metallic portions, separated as far as possible from the rocky part, are 85.100 per cent. nickel, 11 per cent. nickel with a trace of cobalt. The rocky part contained crystals of zircon of small size, and was principally made up of that mineral in granular form, mixed with sulphide of iron and nickel, besides carrying silica, alumina, lime, and magnesia. The whole makes a compound not heretofore known, though its several parts are well known to geologists.

Considerable alarm has been felt in Memphis during the past week in consequence of the re-appearance of yellow fever. Five or six cases have been reported, most of which proved fatal. No new case has occurred since the 10th, and hopes are entertained that the disease may not be introduced by being made, in the way of quarantine, to prevent its introduction into other cities.

There were 425 deaths reported in Philadelphia during the past week. New York city 710.

Markets, &c.—U. S. sixes, 1881, 104½; 5's, registered 102½ do. coupon, 103½; 4½ per cents, 106; 4 per cent 102.

Cotton.—Sales of middlings at 12½ a 12½ cts. per lb for ordinary New Orleans. **Petroleum.**—Crude, 6 cts. in barrels, and standard white, 6½ cts. for export, and 9½ a 9½ cts. per gallon for home use.

Linned Oil. Calcutta, 64 a 65 cts.; American, 62 a 64 cts. Lard oil, 48 cts. for ice pressed. Crude sperm, 7 a 8½ a; bleached tallow, 92 a 95 cts. per gallon.

Fruit.—Apples, \$3.25 a \$2.50 per barrel. Non-Carolina peaches, \$2 a \$2.50 per box. (1 bush), Georgia do., \$1.50 a 1.75 per basket. Raspberries, 3 a 4 cts. per pint. Cherries, 5 a 7 cts. per pound; fancy, 8 a 1 cts. Watermelons, \$20 a \$25 per 100.

Flour.—Minnesota extra, medium and fancy, \$5 a \$7; western do., \$5.50 a \$5.00; patent, \$7.25 Rye flour, \$3.25 a \$3. Corn meal, \$2.40.

Grain.—Wheat is firmer, but quiet; new red and amber, \$1.13 a \$1.15; old ditto, \$1.18. Rye, 62 cts. Corn, 40 a 50 cts. Oats, mixed, 37½ a 38 cts.; white 39, a 41 cts.

Hay and Straw.—Prime timothy, 85 cts. a \$1 per 100; mixed, 65 a 75 cts.; straw, 55 cts. a 100 pounds.

Beef cattle.—Market moderately active, and good cattle rather higher—extra, 5½ cts.; good, 5½ cts., an common 3½ a 4½ cts. per pound. Cows, \$20 a \$30 per head. Calves, 3 a 5½ cts. per pound. Sheep, 3 a 5 cts. per pound as to quality. Lambs, 4 a 6 cts. Hogs, 6 a 6 cts. per pound, as to condition.

FOREIGN.—The remains of the Prince Imperial arrived in England, on the British ship Orontes, on the 10th inst., and the funeral ceremonies were observed on the 12th. Considerable ill feeling is said to be manifested in France at the great demonstration of mourning in England for the dead prince.

Joseph Meschi, the noted agricultural writer to the Times, "Another week of flooding storms and low temperature has put the finishing stroke to the agricultural disaster. It is now too late for the crop to recover. They are considerably injured, even of well drained and drained lands, while on ill-farmed and undrained lands, the matter is simply ruinous. The wheat will suffer less than the spring crops. Woad is hopeless, and unless we get the promised hot, dry weather, many grass and clover crops, and even peas will not ungrated."

Henry Bessemer has taken out 160 patents—almost as many as Edison—and one of them, his process for making steel, ranks as one of the most brilliant inventions of the century. It converts pig-iron into steel in a few minutes, and has reduced the price of steel from \$200 to \$30 per ton. Ten times as much steel is used now as prior to 1856.

On the 12th inst. the Reichstag finally voted the protective customs tariff—217 against 117. Prince Bismarck then read a decree closing the session. Several teen National Liberals announced their secession from that party.

The tariff bill includes amendments providing that the grain duties shall come into force on the 1st of 1st mo., 1880, and the duty on fax on the 1st of 7th month following.

WEST-TOWN BOARDING SCHOOL.

Our friends Benjamin W. and Rebecca G. Passmore having resigned their positions as Superintendent and Matron of Westtown Boarding School, Friends who feel desirous to engage in the important and responsible duties of superintending this Institution, are requested to communicate with either of the undersigned. The present Superintendents desire to be released 10th month next, or earlier.

William P. Townsend, West Chester, Pa.
Samuel E. Easton, Eastington, Bucks Co., Pa.

Life and Adventure in Japan.

BY E. WARENE CLARK.
(Continued from page 286.)

Accordingly I went gladly to the reception-room of the Kai sei Gak ko, or college building, and awaited the coming of him who was once my old friend and my new yacomin! The officials sat around in dignified silence, then the door opened and the new Director stepped in. He was greeted by my attendants and others with profound bows, and as I approached unobscured behind, and spoke his familiar name, he turned about with the same boyous bound as of yore, grasping my hands with the grip of bygone days, and burst forth with such a grateful warmth of welcome as made the solemn officials look at one another with mingled awe and wonder, that such a boisterous breach of etiquette should come from one who usually was so dignified and calm. We cared little what they thought, however, and enjoyed ourselves for some time as hilariously as we pleased.

Hatakéyama said he had "piles of things" to tell me about his strange experiences in the various courts of Europe, and he afterwards gave me the most vivid descriptions of all that he had seen and heard. His official connection with the embassy afforded him rare opportunities of meeting many of the greatest men and princes in Europe. He did not forget to bring me some pictures he had promised from my old home in Geneva, Switzerland; and I also gave him some large photographs of Niagara, which he requested me to bring from the falls for his mother.

The new Director assigned me my duties and residence at the college, and I was soon settled amid the novel experiences of life at the capital. I took new courage, and began my labors afresh.

Shortly after, the Saga rebellion broke out in the southern provinces of Japan, and Hatakéyama was sent down there in company with the former prince of his province to try and conciliate the insurgents. The attempt was unsuccessful, and a short but bloody strife ensued, in which many noble lives were lost; among others, my former student and friend Katski, who studied with me in Albany, was beheaded with eleven of the leaders of the rebellion. Katski was a fine young fellow, and his cruel death was a great shock to me; I had endeavored to persuade him not to

go back to his province, when the rebellion first broke out, but he would not heed the advice.

When Hatakéyama started for Saga I expressed some apprehensions respecting his safety. He only smiled, and said quietly, "My trust is in the Lord, and my true faith will sustain me."

I had a long interview with him at his house before he left for the south, concerning the re-establishment of my Bible-classes in Tokio, especially at the Imperial College. He expressed surprise that no Bible-classes had been established there before, but said that as the law against Christianity had not been revoked, he was not officially able to give the permission desired. Personally, however, he said that he wished the plan God-speed, and as Director he would appear blind to any attempt that I might see fit to make. He wished most heartily, he said, that the young men of Japan might study the Gospel and abide by it.

Accordingly I started three Bible-classes in Tokio. Two were held in my house near the college, and one at the house of my friend Nakamura, where my old friends and students from Shidz-u-o-ka were gathered together.

Soon after arriving in Tokio I attended a New Year's reception held at the educational department, at which all the foreign professors of the Imperial College were present. The body of instructors assembled were the most cultured and gentlemanly company I had met in Japan, and it was a pleasure to see the progressive interests of the country intrusted to such competent hands.

Life in Tokio was more varied than that at Shidz-u-o-ka. Something was always going on, and pleasant society was not wanting, whenever one felt the need of it.

The capital itself is not beautiful. There are no elegant boulevards or splendid buildings, such as those seen in European countries. Tokio is simply a vast wilderness of houses, containing nearly a million souls, but lacking all the evidences of comfort and luxury to be found in the capitals of western lands. The houses are built of wood, and a general view of the city presents an endless succession of tiled and shingled roofs, with here and there a fire-proof storehouse, having walls of white cement.

Yet there are places of great interest to visit, notwithstanding the sameness and shabbiness of the city. Let us stand for a moment on the highest wall of the Tokio castle, built by the same great chieftain who constructed the castle at Shidz-u-o-ka. Close beside us is a large cannon, which is fired every day precisely at noon. All about us are the deep moats, massive walls, and colossal gateways of the castle, encircling a space of nearly a mile in extent, and forming a wilderness of walls, embankments, public buildings, and shady promenades, right in the heart of the city. At each angle of the castle wall there used to

be a square tower, built of stone and covered with white cement; the tower had narrow windows, from which arrows could be discharged, and the roof was made of heavy stone tiles, stamped with the crest of the Tycoon. Only a few of these towers now remain, the rest having been removed by order of the Mikado's government.

There are also numerous canals which intersect the city in every direction, so that merchandise can be transported from one point to another. Boats of every description are poled or sculled through the canals.

I had a little canoe carrying but one person, and propelled swiftly by a single paddle. In this canoe I cruised around the canals and moats of the capital, studying many phases of life among the boatmen and fishermen, which could not otherwise be observed. Frequently I would venture out upon the bay, but the canoe (which I called "The Rob Roy of Tokio," and which only drew two inches of water) would dance on the waves like a duck, while the salt spray washed over the thin deck, threatening to upset me. But it never did.

Sometimes I drew in my spoon-like paddle and raised an umbrella to the wind. The canoe would scud across the bay, greatly to the astonishment of the Japanese fishermen, who had never seen such a tiny craft before.

A large river emptied into the bay of Yedo on the eastern side of the city, which may be seen in the small map of Tokio and vicinity. Near the mouth of the river was the small "concession," where foreign merchants and missionaries resided. Here were the foreign consulates, stores, schools, and chapels. Foreigners in the service of the Japanese Government alone were allowed to reside outside the limits of the "concession" at the capital; for Japan was not yet free to foreign trade, excepting five open ports.

The most beautiful and interesting places in Tokio, and those which I most frequently visited, were the large temples of Shiba, Uyeno, and Asakusa. The two former were the burial places of the Tycoons for several centuries, and their sacred groves, richly ornamented with shrines, and spacious halls for worship were among the most beautiful works of art of ancient Japan.

At Shiba the temples are well preserved, and the carvings and gildings are very elegant. The carved pillars, and portals of the temples display figures of every possible variety, from the hideous scales and claws of the frightful dragon to the soft white plumage of the sacred crane. Massive bronze lanterns, six feet high, are ranged in rows in the courtyard, and covered corridors lead up the hill-side to the tombs of the Tycoons.

The tomb consists of a hollow cylinder of stone, placed upon a granite pedestal, and surmounted by an immense capstone weighing several tons. The dead body of the Tycoon is deposited in the tomb in a square

casket, or sometimes in a large earthen jar; for the Japanese are buried in a sitting posture, and occupy but little space. The tomb is closed by a bronze door, upon which a large crest of the Tyeoon is seen. This crest resembles three outspread clover leaves, turned inward upon each other. It is found stamped upon every thing throughout the temple grounds, even upon the stone tiles of the massive temple roofs.

Letters of James Emlen.

(Continued from page 383.)

Date omitted. "The account of dear Mary was such as I should expect to hear—quiet, peaceful, one of the hidden members of the body; and how important these are, may be inferred from the fact that the most vital, important parts in members are such as are out of sight, the bones, the sinews, the heart, the lungs, and I have often thought if we may only feel assured that we are of the body, whether hidden members or not, it would not matter; but yet how important that these should be preserved in a sound and healthful condition, and as 'He who made that which is without, made that which is within, also,' to Him we must look for the healing virtue of divine life when any thing is out of order or in an unsound condition. Therefore, let none conclude because they may think themselves out of sight, as Mary did, that they are therefore needless or useless members of the church of Christ. I am confident that such, keeping their places in humility, do often secretly minister grace to beholders.

"Cousin Hannah (Gibbons) has been confined to the house for several days, more poorly than I have seen her since she came to N. C. M. Jefferson also is very feeble. I sometimes look along our galleries with a good deal of anxiety. Oh! for a succession of such as love the Truth, and who desire none of the novelties of the present day, very thankful indeed to be permitted to share in the inheritance left by our forefathers—to drink of the old wine."

"6th mo., 1855. It was very acceptable to me to read the account thou sent me of the last illness of your Lydia, no doubt it will always afford you a peaceful retrospect that you were so careful of her training, and so kind in nursing and caring for her. "Whatsoever good thing any man doeth, the same shall he receive of the Lord, whether he be bond or free." These disinterested acts of kindness are very precious, proceeding from the good fountain. We take much pains to guard ourselves against suffering, but I often think, if we could estimate things rightly, we should seldom find an easy life, exempt from trials, the most happy. Our experience shows us that we often receive the word in much affliction, with joy of the Holy Ghost, when the poor creature is humbled and can have no share in the glory; and how true we find it, also, that 'the Lord is no respecter of persons.' The sable skin does often cover a sanctified spirit.

"The passage thou alludes to I have always understood to imply that they who 'scatter' at the divine command, may always hope for an increase. There may be, and no doubt is, such a thing in spiritual matters as scattering, as the prodigal scatters his substance, when

and where it is not called for, nor perhaps needed; or it may be, as pearls before swine, &c.; but they who are 'good stewards' of the good things they receive what they have given them to dispense, are such as I have always supposed lose nothing by scattering, but on the contrary, they find truly that 'He that watereth shall be watered again; so such it is even 'more blessed to give than to receive.' I think I have known something of this in days past, but latterly my travels have seemed to be through a desert land. The hope thou expressed that 'our waste places' would be comforted, was somewhat cheering, and I acknowledge I have been endeavoring to derive comfort from the many corresponding assurances to that effect, as: 'The wilderness and solitary place shall be glad for them, and the desert shall rejoice and blossom as the rose,' and 'The eyes of the blind shall be opened, and the ears of the deaf shall be unstopped, the lame shall leap as an hart, and the tongue of the dumb sing,' &c. 'The parched ground shall become a pool, and the thirsty land springs of water; that we can but acknowledge there is much in these promises to encourage us to keep our faith and our patience under every trial; and even while writing, if it is proper for me to write at all, I feel as one of the poorest of the flock, if worthy to be called one. My prayer has been for a solid increase in humility and stability. May we all aim for this. * * *

I have been a good deal troubled at hearing of remarks made by some about poor _____; good men have often made mistakes, and have had to suffer for it. He admits he was too hasty, and I believe has been heartily sorry. * * * When one sees his error and condemns it, may we not leave it between him and his Judge."

For "The Friend."

"What is that to thee?"

"That ye present your bodies a living sacrifice, wholly acceptable unto God, which is your reasonable service."—Rom. xii. 1.

At a time well remembered a number of years ago, yet long since the days of our worthy ancestors, the following, in substance, was heard to take place between a young Friend and his companion. On rising from his bed on a Monthly Meeting morning, he expressed his doubts to her of the necessity of leaving his business that day to attend meeting; saying that it would not only be a sacrifice of his interest in that respect, but others which he enumerated; and the distance, too, he thought was so great—much greater than many others had to encounter; and the roads were also heavy and difficult to travel, and he therefore thought he might reasonably be excused.

After listening attentively to his remarks, she very prudently, and in a becoming manner, reminded him of the faithfulness of our early Friends in this respect. The trials and hardships that many of them were subjected to—some travelling many miles on foot to their meetings, and wading streams on the way, even in cold weather. Others enduring long imprisonments and cruel beatings; suffering the loss of their property, and even their lives in some instances, for the sake of a faithful discharge of this "reasonable duty."

These well-known truths, revived as they were, evidently caused him to pause and re-

flect a little; but the reasoner, still being the permost and unsubdued, he replied, that he had read the accounts alluded to, and believed them to be reliable and worthy; but we might also see in the same accounts that their meetings in those days were very different from ours in the present day. That he believed the original design in adopting the practice of meeting together for the purpose of performing divine worship, to be, in order that while the members respectively were dwelling in the life and power within themselves, the various gifts and talents might be mingled in the one spirit, as a united endeavor to worship and serve their great Creator acceptable. That they might be helpmates and a strength to each other; and experience their souls as spirits to be baptized and refreshed together, and the oil of the kingdom poured from vessel to vessel; so that if any lacked they might be supplied by those that overflowed—if they were weak, they might be supported by those that were strong; that all might be edified together as members of the one body, "built up a spiritual house," their Master and Lord being the Head, and dwelling in the midst thereof; thus establishing a strongly fortified bulwark against the "wiles of the wicked one." That if this was not the object of Christians meeting together for the performance of religious worship, why not as well each one perform their worship in retirement at home.

But in view of the evidences of the power and life which attended their assemblies in those days, he fully believed that our worth predecessors in the Truth, saw and felt the great benefit of thus meeting together for the purpose of mingling their exercised souls in worshipping the "Father in spirit and in truth," because the various members of the body, each being alive within themselves, they experienced such opportunities to be times of refreshing to their hungrier and thirsting souls; and a great loss would therefore have been sustained by neglecting to thus meet and spiritually mingle with their friends, and this he believed to be the cause of their great diligence and perseverance in attending their meetings.

"But how very different," said he, "is the character of our religious meetings in the present day." "Our Society, once so highly favored, has now become so lukewarm and defective, through the love of the world, and the things of it, that when we meet together it is comparable to a collection of dry bones that contain neither oil, marrow, nor moisture; leaning one against another without even life enough to say, 'Give us of your oil for our lamps have gone out,' resting almost exclusively in the form, without that life and power so essentially necessary to render our meetings profitable opportunities to us."

"Wherein, then, are we benefited by attending such meetings? Why not as well use our endeavors individually at home?"

To this train of reasoning she made but a little reply, as she was no doubt sensible of that being within him at times, which gave him to see and feel that such finite conclusions as these would constitute no excuse for his unfaithfulness; and although with this the interview ended, and the hour of meeting found him in attendance, yet thoughts were awakened in the mind of the hearer, which led to an instructive view of the proneness of the heart of man, in its natural and fallen

ate, to carefully scrutinize all motives to which except its own.

How liable is he, when sensible of guilt within himself, to endeavor to excuse himself in his own neglect of duty on account of the faults and defects he sees, or imagines he sees in others. To such as these, how truly applicable is the language, "What is that to thee, though thou be?" It is evidently a mark of great weakness and lack of true discernment, to indulge in pleading excuses in favor of our own neglect of duty, on the ground of a belief that others are guilty of the same or similar deficiencies. Are we not thereby yielding the whole ground to the enemy, and sinking ourselves to a condition even more faithless and forlorn than we conceive theirs to be? Besides, while we are thus pleading for the wrong within ourselves, are we capable of acting in judgment over our fellow pilgrims or short-comings of our fellow pilgrims? First cast the beam out of thine own eye, and then shalt thou see clearly to pull out the mote that is in thy brother's eye."

We should always bear in mind, that the health and prosperity of the church is dependent on individual faithfulness; and that *ourselves*, each constitute one of these individuals, whose duty it is to occupy our respective places in the church in accordance with the design of our great Creator; and unless we are earnestly engaged to adhere to his, and know the Lord for ourselves to abide with us, and rule in each one of our hearts, we need not expect that He will reign in our assemblies. F.

6th mo. 29th, 1879.

Religious Conversation.

A few sentences will be indulged to me here respecting religious conversation. I believe both that the proposition is true, and that it is expedient to set it down—that religious conversation is one of the banes of the religious world. There are many who are really attached to religion, and who sometimes feel its power, but who allow their better feelings to evaporate in an ebullition of words. They forget how much religion is an affair of the mind, and how little of the tongue; they forget how possible it is to live under its power without talking of it to their friends; and some, it is to be feared, may forget how possible it is to talk without feeling its influence. Not that the good man's piety is to live in his breast like an anchorite in his cell. The evil does not consist in speaking of religion, but in speaking too much; not in manifesting our allegiance to God; not in encouraging by exhortation, and amending by our advice; not in placing the light upon a candlestick, but in making religion a common topic of discourse. Of all species of well-intended religious conversation, that perhaps is the most exceptional which consists in narrating our own religious feelings. Many thus intrude upon that religious quietude which is peculiarly favorable to the Christian character. The habit of communicating experience I believe to be very prejudicial to the mind. It may sometimes be right to do this; in the great majority of instances I believe it is not beneficial, and not right. Men thus dissipate religious impressions, and therefore diminish their effects. Such observations as I have been enabled to make, has sufficed to convince me that, where the religious character is solid, there is but little religious talk; and that

where there is much talk, the religious character is superficial, and like other superficial things, is easily destroyed. And if these be the attendants, and in part the consequence of general religious conversation, how peculiarly dangerous must that conversation be, which exposes those impressions that perhaps were designed exclusively for ourselves, and the use of which may be frustrated by communicating them to others. Our solitude should be directed to the invigoration of the religious character in our own minds, and we should be anxious that the plant of piety, if it had fewer branches might have a deeper root.—*Dymond's Essays.*

"For The Friend"

Extracts from the Diary and Letters of Ebenezer Worth.
(Continued from page 287.)

[In the simple narrative contained in the last number, of the faithfulness of a devoted man under what appeared to be very discouraging surroundings, two circumstances seem to present themselves to view as worthy of imitation. After feeling an intimation of duty to speak to the individual who was doing so much injury to the Indians, and no doubt to others by selling them intoxicating drinks, he did not speak to him before he "felt a love and concern" for the poor man himself, who was the active agent in doing so much harm.

How instructive is the lesson to be learned by this example, showing that our friend was not acting in his own natural will and strength, but we may humbly believe, under Divine guidance and power; and how efficacious was the result, bringing down the lofty spirit of the liquor-seller, reducing him, for the time being at least, to the state of a little child, and to use the expressive language of the narrative, "I think to tears." Another lesson may be learned, that in the labor, close and strait in which our friend found himself placed, he no doubt felt as did David of old, when he wished to possess the threshing-floor of Ornan the Jebusite, upon which he set up an altar to the Lord, "that the plague may be stayed from the people." And king David said to Ornan, "Nay; but I will verily buy it for the full price; for I will not take that which is thine for the Lord, nor offer burnt-offerings without cost." Although our dear friend very modestly says: "I told him he should not lose anything" if he would consent to throw his whiskey on the ground, it is understood that he paid for it out of his own private funds.]

7th mo. 3d. I think I had a favored opportunity with Alick John on the subject of using ardent spirits; I had also some conversation with his wife and sister, in relation to the advantage and necessity of living a religious life, which was also to good satisfaction; the praise and glory be to my Divine Master, who qualifies for every good work.

7th mo. 6th. In the forenoon had my sitting as usual in the middle of the week, which was comfortable. After dinner started to attend a council at Cold Spring, on the subject of building a school-house with money appropriated by the State for that purpose. Samuel Wilcox requested me to ride with him; when we got within about a mile of Cold Spring, his horse got his tail over the line and commenced kicking and started to run. I jumped out, so as to clear the wheels, but in the fall hurt my right leg, bruised it, and have thought it was cut to the bone. I walked about a mile

towards home and rode the remainder of the way. After getting home, had wormwood and vinegar applied and went to bed. I felt a good deal discouraged at times, the hurt looked bad, and hurts on my ankles heretofore had been slow in healing. The thoughts of having a very sore leg so far from home, and not knowing what the result might be, produced serious feelings, and at times I was brought pretty low, and felt the necessity of supplicating my Divine Master for forgiveness, mercy, and support. His name was sweet and precious to me in prayer; had it not been for his support, it seemed as if my poor spirit would have sunk. I think my prayers were heard, my leg improved much faster than I could have expected, and I think likely as fast as would be profitable to me. I believe the Lord doeth all things right, and is deserving to be praised for sickness as well as for health.

On First-day, the 9th of the month, I felt a desire to have my sittings without being disturbed. The physician called to see my leg; said it looked better than he expected, thought it was doing well; it was pleasant to me to hear such an opinion. Before I could get an opportunity to get into the quiet it was later than usual. The doctor came in the second time, which was some interruption. I informed him of my wish to have a time of quiet retirement for worship, he sat awhile in quietness, but inclined to enter into conversation; my mind being mercifully drawn to religious exercise, it was less interruption than it would have been at some other times.

5th mo. 21st, 1848.

Dear father.—I received a letter last week from (brother) John; he gave me the comforting information of the health of my relations generally (uncle E. only excepted), who he says is much better. I also received a letter since Yearly Meeting from Samuel Cope and one from W. T. The account they gave of the Yearly Meeting was more favorable than I had expected, although truly sorrowful is the state of things in our Society, yet I think there is cause for thankfulness and encouragement. I much desire that Friends endeavor to live near to Him who can preserve them, for the Christian's life is a continual warfare, and one in which we stand in great need of wisdom and strength from our Divine Master to discover the snares of the enemy and to contend with him, the adversary of our souls' peace. * * * I think I can sympathize with Friends in their trials, and have felt disturbed on account of the above trying case, (alluding to a case in their own Monthly Meeting), thinking if we were what we ought to be, we should feel more Christian and brotherly love than what many of us do, and should be religiously guarded against giving cause for offence, and when injured, cultivate the spirit of forgiveness. What a great attainment to love our enemies and to do good for evil. * * * My own health is pretty good, which I esteem a great blessing.

In sincere love, I remain thy son,

EBENEZER WORTH.

(To be continued.)

Self-Denial.—Value greatly, and exercise as often as possible, *small efforts* of self-denial. By little and little the mulberry leaf becomes satin, and no one can understand, prior to experience, the amazing power of small efforts constantly and steadily repeated.—*Kelly.*

Additional Advers.

Meetings for Worship.—The testimony borne by our religious Society, from its first rise, to the spiritual nature of all acceptable worship; that it is not dependent on any thing which one man can do for another, but must be performed by each soul for itself, through Christ Jesus our holy Mediator, and that it is equally attainable in a state of true silence, as when there is vocal utterance; is, we believe, very important to be faithfully and publicly upheld, in this day of abundant activity, and of dependence on outward performances.

Those who come to their religious meetings under a sense of their needs; and when there, really hunger and thirst for the bread and water of life; will, in the Lord's time, know their souls to be refreshed and comforted; and, having tasted of the preciousness of inward and spiritual communion with Him, they will not only have no desire to attend at places where there are formal stated services, under the character of worship; but will feel themselves religiously restrained from violating our Christian testimony against a man-made and hireling ministry, and to the supremacy and all sufficiency of Christ in his church, as well as to that worship which is in spirit and in truth.—1862.

Fervent are our desires for all our members, however small may be the number, who thus come together for the solemn purpose of offering adoration to the Most High, that, humbly relying on the Great High Priest of our profession for ability to appear with acceptance before Him, they may wait, in the silence of all flesh, for the arising of a sense of his presence and power, and know Him to feed them with the food convenient for them. Then indeed would our meetings be held in the power of God, and while tending to build up on our most holy faith, would hold out a living invitation to others to come and have fellowship with us; for they would be made sensible that our fellowship was with the Father and with his Son Jesus Christ.—1875.

Never Forget Anything.—Charge your mind with your duty. That is largely the true definition of faithfulness. Bad memory and mistakes are used as apologies a great deal oftener than necessary. A boy beginning business life will generally lose his place who pleads such an excuse more than once or twice.

A successful business man says there were two things which he learned when he was eighteen, which were afterward of great use to him, namely: "Never to lose anything, and never to forget anything." An old lawyer sent him with an important paper, with certain instructions what to do with it.

"But," inquired the young man, "suppose I lose it; what shall I do then?"

The answer was, with the utmost emphasis, "You must not lose it?"

"I don't mean to," said the young man, "but suppose I should happen to?"

"But I say you must not happen to! I shall make no provision for any such occurrence. You must not lose it!"

This put a new train of thought into the young man's mind, and he found that if he was determined to do a thing he could do it. He made such provision against every contingency that he never lost anything. He found this equally true about forgetting. If

a certain matter of importance was to be remembered, he pinned it down on his mind, fastened it there, and made it stay.—*Youth's Companion.*

UNSPOKEN PRAYER.

Too tired—too worn to pray,
I can but fold my hands,
Entreating in a voiceless way,
Of Him who understands
How deep and hearts succumb—
How will sink, weary—weak,
"Dear Lord, my languid lips are dumb,
See what I cannot speak."
Just as the wearied child,
Through sobbing pain oppress,
Drops, hushing all its wailings wild,
Upon its mother's breast—
So on thy bosom,
Would east my speechless prayer,
Nor doubt that thou wilt let me lie
In trustful weakness there,
And though no conscious thought
Before me rises clear,
The prayer, of wordless language wrought,
Thou yet wilt deign to hear.
For when, at best, I plead—
What so my spirit saith—
I only am the bruised reed,
And thus, the breathing breath.
—Margaret J. Preston.

Selected.

"MOTHER IS GROWING OLD."

"Aye, John, I know there are sunny lands
Where our eager feet might roam;
Wealth rears its shining goals afar
From our rural, vine-clad home;
And we are young, and strong and bold,
And could win both honor and fame;
And twine brave laurel-wreaths around
The dear ancestral name.

Selected.

"But, John, do you note the failing step,
And the ever whitening hair,
Of her who over our childhood years
Ever watched with tenderest care?
Too soon the folded hands may rest;
Too soon the form be low;
And while she waits to bless us here
From here I cannot go.

The work of our hands might turn to gold;
Our paths might with flowers be bright;
But all is naught as I look this eve,
In our fireside's tender light;
For I feel the bliss of her faithful love,
Through weal or through woe the same,
And no music can thrill my heart like her voice,
When she gently calls my name.

"Her smile is the light and joy of the day;
And in fancy I love to trace
The likeness of some rare pictured saint,
As I look in her calm sweet face;
And even as the light from the picture fades,
When the sunlight passes away,
I know we shall miss her womanly grace,
The light of our home, some day.

"Aye, John, our mother is growing old,
And our sweetest joy should be
To speak those words she loves to hear,
"Dear mother, lean on me."
The love she gave to our helpless years
It is ours in return to bestow;
And so, while she waits, in the dear, old home,
Afar we never may go."
—N. Y. Ledger.

An Exhibition of Indian Character.

In the summer of 1853 I had a contract of surveying Government land in the lower peninsula of this State, (Michigan,) in what is now known as Missaukee county; in which Muskrat lake is situated. The country was then a wilderness; the Catholic mission on the point in Grand Traverse Bay being the nearest settlement to my territory, and that seventy miles distant from my camp. I had made

arrangement with my family before leaving home in April, to go to the post-office "Mission Point," to receive and deposit letters, and field books of my work for the Surveyor-General. Accordingly, on the first day of August, I, with one of my young men for company, set out to go through the wilderness seventy miles to the post-office. We had traveled around the lake from our camp on the east side to the west side, found some Indians camped there, from the Grand Traverse Indian settlement, who went on a deer-bunting excursion; there being no deer in the vicinity of their homes. Three of them, one old man and two young men probably his sons, were tying up bundles in form of knapsacks, and had the appearance preparing for a tramp.

My young man and I could speak a few words of their language, and they about a much of ours, and so, between what we understood of each other, we made out that they were going home to Mission Point—ju where we wanted to go. We were glad to have company. They had a blind trail which they could follow, although a white man could not, unless he was a practical woodsman or surveyor.

When our company got ready, we all started into a blind forest northwest of the lake, each one carrying a knapsack on his back. We traveled together till noon, without conversation with our red companions, except as an occasional word dropped from one of the young men would be replied to, but not a word from the old man.

About noon we came to a fine brook cool, clear water, and I proposed to eat our lunch and rest a little while. The day was very hot, and mosquitoes very thick and hungry, so we made a smudge and took our loaf of bread and piece of pork, and the red men lighted their pipes; having no lunch I presume they intended to smoke while we ate, but I, seeing they made no signs of eating offered each of them a piece of bread and pork which was received with a nod and kind of guttural acknowledgment, and pipes were laid aside until after lunch.

While we were resting and the red men smoking, all sitting on the ground, I noticed they were eyeing each other in a peculiar way which I did not understand; as I was watching to see what it meant, I also noticed that they began to hold their heads lower and lower towards the ground and speak to each other in whispers, their eyes now all turned in the same direction, I too, looked in the same direction, with my aricular nerves all sharp set to catch the slightest sound, but could hear nothing. I finally asked what my friends heard and got the answer in a whisper, *Nich-a-nan-ba*, the Indian word for Indian.

In a few moments after, I heard at quite a distance, the dull thudding sound of a horse's feet on the ground coming toward us. I had always, till that time, rather prided myself on the acuteness of my hearing, but these children of the forest certainly threw my self-conceit in that respect in the shade. The curiosity of all the performance was that the traveling Indian was going out to the lake which our companions had just left, but no conversation whatever took place between the parties. On the contrary, the traveler with the pony made a circuit and left the trail, and did not come nearer than four rods of the resting party.

White people, when meeting their neighbors away from home, would have been likely to say, "How were our friends at home, on you left?" "What are the prospects game at the lake?" "Where have you been?" or some such question; but these were spoken. I then asked if they knew the Indian who had just passed, and was answered the affirmative by a nod of the head, but no explanation was made.

When they had finished their smoking, and felt rested, we resumed march together, I traveled all day in a perfect wilderness, leading the way along a trail so dim that one but a woodsman or an Indian could go on it. We traveled all the afternoon together, and just at evening we arrived at an Indian spot beside a beautiful brook of clear water, where the ground had the appearance of wear and use. A pile of old ashes burned ends of sticks of wood, and the general aspect of the surroundings required a moment to determine that the place was an Indian camp.

Our Indian friends, without any ceremony, loaded their knapsacks, and my young man and I followed their example without question. A fire was soon lighted, and preparations for night were made. The old Indian, who had not spoken a word of English all day, went around peering into the brush and bushes, and finally approached a large old log and began to rake the old leaves out from one side of it, and pulled out a camp tins and some knives, forks, spoons and tin plates. By this time the young man had a fire made, and they fixed a tripod of three sticks, hung over the kettle with water in it, and one of them opened his knapsack and brought forth a deer's head which he had carried all day rolled up tight in a woollen blanket, through a hot sun in August, but there was not the least taint, or sign of being spoiled about it. The young man skinned the head, cut it up and put it in the kettle of water to boil. They had shot several pigeons the afternoon. These they also dressed and put in the kettle. Seeing all the operations carried on with my eyes open, and nothing filthy about it, I put in a small piece of pork for each of the family, say five, calling attention to the fact as I did it, and in acknowledgment of it received the expression from the Indians "neshien co esuh," which, being interpreted, means good pork.

While the cooking was going on, the old man took one tin plate, one knife and fork, to the brook, and with sand and water, soaped them clean and bright, and when the meat was well cooked he took out one pigeon, one piece of pork, and one piece of venison, on the clean plate, together with the clean knife and fork, and brought them to me, where I was seated to rest after my hard day's walk, and with a low bow and a guttural *ugh*, set it down to me for my supper. We gave each one of them a piece of our bread, and we all had a good supper and soon retired for the night, each one of our Indian companions by himself, rolled up in his Mackinac blanket like a silk worm in his cocoon, and a respectful distance from me, and thus spent the night. It is presumable that our traveling companions knew what we were doing in the woods, and as I was the oldest of our party, the old Indian exhibited his respect for my station by giving me a clean dish, knife and fork at supper.

We traveled together the next day till evening when we separated, they turning off to their homes. The only articulate word to the old man uttered in my hearing was at the fork in the trail where we separated. I was a little behind the company when they arrived at the fork, and the young Indians took the trail and my young man the other, but the old Indian stood at the fork until I arrived a few minutes after; then he pointed me to one trail saying "mont-pa," which is as much as to say "that way;" he then gave me his hand and made a bow, and we parted.—*W. L. Coffinbury, in the Am. Antiquarian.*

—* For The Friend.

An Historic Parallel, or George Fox and Martin Luther as Reformers.

BY CYRUS W. HARVEY.
(Continued from page 386.)

"If there are those in the Society of Friends who, after careful investigation of the Scriptures, find that they are not in unity with its doctrines, *they are with it, but not of it*; and if such remain in the Society and make an effort to *discard or subvert* its doctrines, the effort—as such efforts always do—will only cause strife, disunity, and division among Friends.

"Believing that many sincere-hearted persons, who really desire to be Friends, are carried away with these unsound doctrines, by an *undue confidence* in the soundness and integrity of those who are denying this; which William Penn calls, the 'fundamental' doctrine of the Society of Friends; I have thought it best to show the prominence and clearness with which Friends have always taught this doctrine, by calling attention to the following quotations setting it forth; and I commend them to all who are compelled to sit under a ministry which denies the presence of the Holy Spirit in the heart of the sinner.

"I desire it expressly understood, that I do not make quotations from the writings of Friends, as arguments to *prove* the doctrines, but that it may be seen how inconsistent or worse it is, for any who claim to be Friends, to charge their brethren who believe them, with heresy or unsoundness. George Fox says of his own ministry to the inhabitants of Becliff: 'I directed them to the Divine Light of Christ and his Spirit in their hearts, which would let them see all the evil thoughts, words and actions; that they had thought, spoken, and acted; by which light they might see their sin, and also their Saviour Christ Jesus to save them from their sins. This, I told them, was their first step to peace, even to stand still in the light that showed them their sins and transgressions; by which they might come to see they were in the fall of old Adam, in darkness and death, strangers to the covenant of promise, and without God in the world; and by the same light they might see Christ, that died for them, to be their Saviour and Redeemer, and their way to God.' Jour. p. 119.

"At no time in the history of the Society, has there been more outward or verbal recognition of the offices of the Holy Spirit in the believing Christian, than at this time. Yet while this is true, it is equally true, that at no time in its history have there been so many who seem disposed to question its teachings on the doctrine of 'Universal and Saving Light,'—or the nature and extent of the Holy Spirit's office in the unbeliever. Many statements now made, touching this doctrine, are

open to objection. Such as 'The Holy Spirit only comes to the unregenerate as an *outside* visitor.' That the Spirit is *not* in the sinner. That Christ only 'stands at the door and knocks'—in which the expression, addressed to the 'Inkwearn' Church of the Laodiceans, is thus applied to the unconverted. And this line of thought is carried as far away from that doctrine, which William Penn calls the 'fundamental principle' of early Friends, as is possible to carry it, when—in unity with the teaching of Alexander Campbell and his followers—it is declared, that 'where there is no knowledge of the facts of the gospel, by tradition or other outward medium, in such there is no immediate influence of the Holy Spirit.' I remark, as a fact verified by observation, that the advocates of every phase of the above views persistently shun any comparison of their views with the writings of early Friends, on the ground 'That they are preaching Christ and not George Fox'; but when members or ministers are called in question, it is not only our *right*, but our *duty*, to test their soundness by the standard writings of the Society.

"The Apostle Paul, in one of his most urgent injunctions to the Church at Rome, says, 'Now I beseech you, brethren, *mark them* which cause divisions and offenses, *contrary to the doctrine* which ye have learned, and avoid them, for they that are such, *serve not the Lord Jesus Christ*,' of them Paul says, that 'by *good words and fair speeches*, they deceive the hearts of the simple.' Rom. xvi. 17-18. The Society of Friends has no creed; but that its characteristic doctrines were established by general agreement and unity, almost from its first rise, is attested by the many writings still extant. For two centuries it was a brotherhood, where love and harmony reigned. Its history bears evidence that this was only broken by efforts of those not in unity, to subvert its doctrines or practices. As God is the 'author of peace as in all the churches,' 1 Cor. xiv. 33, the presumption is, that that which leads to *division* is not of God. It will always be found, that in that which divides brethren, a principle of truth is in some way involved; therefore, when we see those who make divisions contrary to that which we have learned, we should mark them, and no 'good words' or 'fair speeches,' should prevent us from immediately comparing their doctrines with the standard writings of the Society. I therefore call attention to George Fox's Epistle to the people of Ulverston, found on pages 134 and 135 of his Journal; as one which may be rejected or denied, but not misunderstood. To the inhabitants of this wicked city he says: 'God hath given to every one of you, a *measure of his Spirit*, according to your capacity; liars, drunkards, whoremongers and thieves, and who follow filthy pleasures, you all have this *measure in you*. *Thou that hatest the light, thou hast it*. This light, if thou lovest it, will teach thee holiness and righteousness, without which none shall see God; but if thou hatest this light, it is thy condemnation. Therefore, to the light in you, I speak; *your teacher is within you, look not forth*; it will teach you, both lying in bed and going abroad, to shun all occasions of sin and evil.' He says, that this epistle 'was directed to all the inhabitants of Ulverstone in general.' To the followers of priest Lampit, he says: 'To the light in all your consciences I speak, which

Christ Jesus doth enlighten you withal.—*Jour.* p. 136. On the same page, to Adam Sands he says, 'to the light in thy conscience I appeal, thou child of the devil.' On p. 143, 'I declared to them, that every one that cometh into the world, was enlightened by Christ the life.' Page 178: 'He that feleth the light that Christ hath enlightened him withal, he feleth *Christ* in his mind, and the cross of Christ, which is the power of God.'

(To be concluded.)

For "The Friend."

EDITORS OF "THE FRIEND:"

From the first introduction of "Religious Items" into the columns of "The Friend," it has been upon my mind to send a word of approval, believing they will meet a want felt by many. Surely those who are desiring the enlargement of the Redeemer's kingdom, and earnestly engaged to be found faithful in the sphere allotted them, must feel a craving to know of its growth and establishment in other parts; being ever ready to rejoice in beholding "the knowledge of the Lord cover the earth" (our earthly natures) "even as the waters cover the sea." "The word of God cannot be bound;" and our interest as followers of a meek and lowly Jesus, is not confined to time, or place, or people. "Rejoice in the Lord alway; and again I say rejoice!"

M.

Chester Co., 7th mo. 13th, 1879.

Communicated.

Tuckerton, 7th mo. 19th, 1879.

The first meeting in Friends' new meeting-house at Beach Haven, on Long Beach, near Tuckerton, N. J., was held on First-day, the 6th inst.—a number of Friends attended. The meetings will be continued until Ninth mo. 14th, under care of Quarterly Meeting's Committee.

L. W. P.

Providential Escape.—Some years ago, a clergyman from New Haven was on a visit to Boston one winter. He was stopping at the Marlborough Hotel, and was sitting in his room writing a lecture that he was going to deliver. A very severe gale was blowing that day. He stopped in his writing, being at a loss for a word. He clasped his hands over his head, and tilted his chair back, while hesitating about the word he wished to make use of. Just while he was doing this, the storm blew down a chimney, and a great mass of bricks and mortar came tearing through the roof and the ceiling, and crashed the table on which he had been writing. If he had not leaned back on his chair at that very moment, he would have been killed instantly. The hole made in the roof was from ten to fourteen feet in width.

What was it which led him to lean back at that very moment, and so to save his life? It was not an accident or chance that happened to him. In a world where God is always present everywhere, there can be no such thing as accident or chance to the children of God. Why was that word which the writer needed, forgotten? The finger of God was laid upon that busy brain and a pause was made. Then came the vain effort to recall, to invent, or to coin the word, then the change of attitude and the escape. The Christian should apply the microscope to his experience, and in the rays of light streaming from that text, there shall not an hair of your head perish,—"He will open see objects of adoring thankfulness,—Ep. Rec.

Religious Items, &c.

Mission Among the Telogogos.—The Report of the Missionary Union throws some light on the influence which caused the great number of conversions from Brahminism to Christianity among the Telogogo Indians, amounting in the last year to 9600. These converts became members among the Baptists—who had for some time been laboring in that field. The report says, "The rains of 1876 had failed, and distress had become great. Months passed, and 1877 was ushered in, and with it all the stern realities of a terrible famine. Idols were worshipped at the beginning of the famine freely, enthusiastically; and Brahmin and other priests again and again promised rain, seed-time, and harvest; but all these had proven to be false. By the beginning of 1878 the mass of all castes and creeds were convinced that idols could not help them. Had they not cried night and day for well nigh two years, and sacrificed to them time and again, and yet the rain came not? Then, when it did come, and they so piously sowed the seed, notwithstanding all their Mantras, it rotted. Then the charity of English Christians enabled them to sow their fields again; but their idols did not keep the grass-hoppers away, and many—and the aggregate would make a multitude—had so far lost faith in the gods of their fathers, that they felt that a last appeal must be made, even to Jesus Christ as the one, the only living God; and about him, and how to call upon him so as to be heard, the most orthodox Hindoos even were glad to listen. The coolies on the Buckingham Canal, who, all told, numbered several thousand, having worked under Christian Maistries (or head men), had scattered to their homes. These last, as their lives or the lives of their parents or little ones had been saved by the work secured at Camp Ruzoopolam, felt that Christianity was different from Hindooism. They had seen its practical workings, and heard the good news of salvation through the love of Jesus for them. They remembered the hard lot granted to them in the Brahminical religion; and they were tired of it, and gladly heard of something better, and threw away their old religion, and embraced Christianity, many of them with a living faith in Jesus. These spread the news of their new faith to the Nulla Mulla Hills on the west, and far to the north; hence, the preachers and teachers, when they went from village to village, found many not only ready to listen, but many actually believing in Jesus."

Enforcing Discipline.—A writer in the *Christian Advocate* (Methodist), urges the necessity of enforcing the rules of discipline against such diversions as card-playing and dancing, and such offences as are forbidden by the scriptures and "sufficient to exclude a person from the kingdom of grace and glory." He asserts that the church ought not to become an asylum for evil-doers, or encourage looseness in moral conduct; and says, that if it allows its members to borrow money without a probability of paying, or to commit other acts of dishonesty, it is shorn of its strength, fettered in its influence, and becomes a laughing stock to the world. The strength of a church should not be measured by numbers or by wealth, but by the depth of its piety, and its saving influence upon the community.

It is a satisfaction to see such sound sentiments put forth and advocated.

Costly Funerals.—A ministers' meeting Putnam Co., N. Y., recently adopted a paper in which they recommend, "In view of the prevalent tendency of our times to make costly expenditures for caskets and adornments, that on the part of both rich and poor all the arrangements for interment be simple and inexpensive."

Church Music.—The Presbyterian Gene. Assembly at Belfast declined by a vote of 3 to 278 to permit musical instruments to be used in divine worship.

The ministers of the Free Church of Scotland have been enjoined by the General Assembly to discontinue raffles or bazaars, lotteries, and other similar methods of raising money for religious purposes.

War.—That which is opposed to the teachings of Christ, cannot be right for Christians. That which is morally or religiously wrong cannot be politically right. So also all whatever be the plea of policy or of necessity, is not lawful under the Christian dispensation.

Temperance Movement in China.—It appears from the *Pekin Gazette*, the official gazette of the country, that the governor of Shan Tung, in obedience to instructions issued by the instance of the Board of Revenue, has published a report on "the condition of the spirit trade in that province," and that he proposes a plan suggested by the Board for "gradually closing the distilleries." An official notice says that, "by way of putting stop to the excessive waste of food which spirit-distilling entails," the governor proposes to have all distilleries now open registered, to make their licenses non-transferable and to issue no new ones. This official notice closes by saying that "so much grain kept out of the distilleries will be so much food stuff saved. The proposal, therefore, is from the present year the existing establishments will be allowed to die out, while no new ones will be permitted to be opened."

Temperance Advocate.

Spiritual Communion.—At an annual meeting of the Congregational Union of England and Wales, one of the speakers said: "The fund in the New Testament something more than a knowledge of the teaching of Christ. Was there not such a thing mentioned as communication with Him as truly as communication with living persons around us? Their duty was to help Christian people to realize the fact of Christ's presence among them. That might be done by a more frequent waiting on the Holy Spirit, and by teaching them to live closer to their great Saviour."

A writer in *The British Friend* thinks that even "Friends" may accept the monition contained in these words, "fily spoken;" because some among them practically overlook the assurance contained in the text "Where two or three are gathered together in my name, there am I in the midst of them." By such persons, he says, "it is deemed befitting (in certain of our meetings for worship), regularly to have a portion of the Bible read aloud; such portions as, from time to time, shall have been selected. This procedure differs little from that of the Congregationalists in their usage of texts, followed here in the general by comments, as do they by sermons." He objects to the innovation, saying, "We assemble in order that we may, by Divine aid, be enabled to worship God who is a Spirit, in spirit and in truth."

Natural History, Science, &c.

Pine Pollen Mistaken for Sulphur.—The *London Times* of 6th mo. 16th said that during the previous week after a heavy fall of rain, a thin film of sulphur had been observed Windsor and the neighborhood to settle on surface of rain-water caught in butts and urns. Professor Carpenter of Eton College sent a communication, published in "Nature," in which he says the supposed "sulphur-rain" caused considerable excitement among country people in his neighborhood. It was first observed after a heavy shower on afternoon of 6th mo. 8th. Its yellow color suggested sulphur, and some of the ragers around Eton were afraid to go to thinking that the judgment-day was at hand. Two or three days afterwards there was a similar shower, and on collecting some of the dust it was found to be pollen of the pine, of which two species are common in Windsor Forest.

He subsequently received a specimen of a similar deposit from near Carlow, Ireland, which also proved to be pine-pollen.

The public papers have recently contained accounts of a similar fall of pine pollen in the interior of Pennsylvania over an extensive tract of country.

In these cases the light powder is borne on the trees by the winds, and carried along until it descends by its own weight, or is engaged in the falling moisture of a rain-storm.

Dog Recognizing his Master's Portrait.—As W. Peach in "Nature," relates that when he resided in Cornwall, England, he had a very intelligent dog, a cross between Newfoundland and Spaniel. A young artist having painted a portrait of the dog's master, when it was brought home the dog was present at its uncovering, though nothing was said to him, nor any invitation given to notice it. The family observed that his gaze was steadily fixed on it, and he soon became excited and whined, and tried to lick and catch it.

After it was hung up, the door of the room was left open without any thought about the dog. He however soon found it out; and a low whining and scratching was heard, when he was found on a chair trying to get at the picture. After this it was hung higher up to prevent its being injured. Whenever his master was absent from home the dog was in the habit of repairing to this room and gazing at the picture. This lasted for years—as long as the dog lived and was able to see it.

C. W. Peach adds, "I have never kept a dog since he died, I dare not—his loss so much affected me."

Sagacity of a Cat.—During the recent severe winter a friend was in the habit of throwing crumbs for birds outside his bedroom window. The family have a fine black cat, which, seeing that the crumbs brought birds, would occasionally hide herself behind some shrubs, and when the birds came for their breakfast, would pounce out upon them with varying success. The crumbs had been laid out as usual one afternoon, but left unattended, and during the night a slight fall of snow occurred. On looking out next morning my friend observed puss busily engaged scratching away the snow. Curious to learn what she sought, he waited, and saw her take the crumbs up from the cleared space and lay them one after another on the snow. After doing this she

retired behind the shrubs to wait further developments. This was repeated on two other occasions, until finally they were obliged to give up putting out crumbs, as puss showed herself such a fatal enemy to the birds.—*Nature.*

Ethnology.—Among the arrivals at Berlin, Prussia, are a family of Esquimaux, one of Patagonians, and some Zulu Caffres.

Louists Victorious.—A Russian party gives an account of a plague of locusts near Elisabetopol, which forced a detachment of troops on their march to retrace their steps. They settled so thick on the soldiers' faces, uniforms, and muskets, that the major, driven to desperation, ordered firing at them for half an hour, but this produced no effect, and a march back was ordered.—*Nature.*

Changes in Vegetation.—At a meeting of the Delaware Co., Pa., Institute of Science, as reported in the *Monthly American*, Dr. George Smith stated that the former existence of White Cedar on Tinicum Island is shown by the imbedded logs and stumps of that tree found there. Sharing in the gradual subsidence of the eastern coast of the continent, the peculiar swamps which produce these cedars with their springs, were brought below tide-water, and the trees thereby utterly destroyed as growing timber. Every botanist can readily imagine how many other plants, usually found in cedar swamps, were submersed and destroyed at the same time. One of the most remarkable of these cedar swamp plants—the *Sarracenia* or side-saddle flower, preserved a strictly existence on Tinicum even down to the time when I made my early botanical visits to that island. Here the cause of a great floral change is evident, but changes occur that are not so readily explained.

Some discussion followed the reading of this paper, in the course of which Dr. Geo. Smith said that when John Prince established his government on Tinicum, he built a fort—it is said in history of hemlock, but it was of white cedar; the fort was burned by the Dutch, and hemlock would not have burned.

The doctor further remarked: "Persons of my age will remember the great abundance of St. Johns wort (*Hypericum perforatum*) that grew throughout the county, especially in pasture fields, and which was so seriously injurious to white-nosed and white-footed horses. This is a foreign species, and was widespread in the time of John Bartram, the earliest of American botanists, and was then noted for its injurious effects on horses. He says it spreads over whole fields and spoils their pasturage, not only by choking the grass but by infecting our horses—and I sheep—with scabbed noses and feet, especially those that have white hair on their face and legs." The disappearance of this plant was sudden and for a time seemed almost complete; only a few specimens were left which may have increased a little within the past few years. The cause of the disappearance of this plant is unknown, but the re-spread of it over the country should be prevented."

Rue Bateur.—When D. Livingstone was among the tribes of Central Africa, he says, "We shocked the over-refined sensibilities of the ladies by eating at them! they are actually eating *rue* butter—ugh! how nasty!" or, pitying us, a good wife would say, "Hand it here to be melted, and then you can dip your bread into it decently." They were as

much disgusted as we should be by seeing an Esquimaux eating raw whale's blubber. In their opinion, butter is not fit to be eaten until it is cooked or melted. The principal use they make of it is to anoint the body, and it keeps the skin smooth and glossy."

Practical Sympathy.—In one of our sleeping cars in America there was an old bachelor who was annoyed by the continued crying of a child, and the ineffectual attempts of the father to quiet it. Pulling aside the curtain, and putting out his head, he said, "Where is the mother of the child? Why doesn't she stop this nuisance?" The father said very quietly, "The mother is in the baggage car in her coffin; I am traveling home with the baby." This is the second night I have been with the child, and the little creature is weeping for its mother. I am sorry if its plaintive cries disturb any one in this car. "Wait a minute," said the old bachelor. The old man got up and dressed himself, and compelled the father to lie down and sleep, while he took the babe himself. That old bachelor stilling the cry of the babe all night was a hero. And the man who, for the sake of others, gives up a lawful gratification in his own house or in the social circle, is as great a hero as when he stood upon the battlefield.—*J. B. Gough.*

It is as we meet and wait together in the Spirit, as we live and walk in the Spirit, the worship of God in spirit and in truth is performed; which all the bare professors upon the face of the earth are ignorant of. Such as wait and worship in the Spirit, know Jesus in the midst of them to be their Saviour, their teacher, and leader; and as they follow and obey Him, though but as one of a family, and two of a tribe, they will be as the light of the world, as the salt of the earth, and patterns and examples of righteousness to all that behold them.—*William Swen.*

Worthy of Record.—A month or two ago, says one of the late papers, a young girl in Boston, the daughter of one of the wealthiest men there, being about to marry, asked her father to let the wedding be as quiet as possible, and to give her the money which would have been spent in flowers, wines, &c. With this money she gave a certain sum to the poor of each city which she visited on her wedding journey. She had the blessing of the hungry and naked strewed along her path instead of roses. The story, without names, crept into the newspapers. A short time since the wedding of one of the great capitalists of New York city was marked by as beautiful and touching an incident. One of the gifts of the bride was the sending of one hundred orphan boys to homes in the West. Two noble examples for all to follow.

THE FRIEND.

SEVENTH MONTH 25, 1879.

It has been a satisfaction to observe in *The British Friend* for the present month, a partial review of the "Memoir, Sermons, &c., of the late Robert Barclay," in which the writer entirely dissents from the strange theory put forth by that author in his "Inner Life, &c.," that George Fox had derived his religious

views from preceding sects, and was mistaken in attributing them to the openings of the Spirit of Truth on his mind.

We concur also in the following remarks on the published sermons:

"We deprecate the introduction into our meetings for worship of discourses premeditated and prepared by dint of study. We maintain the steadfast belief that when spiritual life is begotten in the soul, through the new birth, near communion with Christ—youth with the Father and the Son (John xv. 23)—will often be experienced in the patient exercise of watching unto prayer. And this independent of any vocal exercise; but, in such seasons, should instrumental ministrations be required by the great Head of the Church, they will tend to the profit of the hearers, as they are of His own putting forth through the operation of the eternal Spirit in the hearts of those assembled."

These views on the nature of Gospel ministry have been so fully recognized by the Society of Friends from its earliest days, that it might seem scarcely needful to repeat them for the benefit of our own members. But the writings and the discourses of some claiming our name, evince so strong a tendency in these times to depart from the path in which our forefathers trod, that there is need of firm upon line and precept upon precept. We meet with so much that is in some degree tainted with error, that it gives strength and encouragement to find a clear testimony to the truth, even in quarters where we have no reason to expect anything different.

A friend from a neighboring State has sent us some remarks by Jonathan Dymond, dis- couraging that kind of conversation on religious subjects which is entered upon without a proper feeling of reverential seriousness, or which unduly exposes the experiences of the speaker. We have no doubt of the need of care on this band; yet we hope none will be influenced thereby to withhold the expression of any sentiments which arise in the life, and press for utterance. "There is a withholding more than to meet, and it tendeth to poverty;" and this is the case where, through diffidence or fear of man, persons are deterred from bearing that testimony to the truth which is called for from them by their Divine Master. Out of the abundance of the heart the mouth speaketh; and where it can truly be said of any, "His delight is in the law of the Lord, and in his law doth he meditate day and night," his conversation as well as his contentance will be "beyond him that he has been with Jesus." Cowper beautifully expresses the tone of conversation which may be met with in a truly religious family—

"Nor do we madly, like an inapious world,
Who deem religion frenzy, and the God
That made them, an intruder on their joys,
Start at his awful presence, or deem his praise
A jarring note. Themes of a graver tone,
Exciting of our gratitude and love,
While we retrace with memory's pointing wand,
That calls the past to our exact review,
The dangers we have scaped, the broken snare,
The disappointed hope, deliverance found
Unlooked for, life preserved, and peace restored,
Fruits of omnipotent eternal love."

Yet this is not inconsistent with the advice of Jonathan Dymond. The practice of conversing on religious themes when the mind is not clothed with proper reverence, and a

true openness felt for it, is weakening to the person indulging in it, and tends to lessen in the listeners their esteem for religion. Its effect is somewhat similar to that of sermons delivered without Divine life and virtue, which our Society has always testified against as mere will-worship, and unacceptable to the Lord.

SUMMARY OF EVENTS.

UNITED STATES.—It is estimated that the total product of the precious metals since the discovery of America, has been \$14,585,623,007, of which gold has constituted nearly one half. The product in the sixteenth century is given at \$1,480,828,148, of which gold has the largest proportion. The estimates show a steady increase, and in the last seven years the yield has been \$194,481,628.

During the first six months of 1879, 4058 failures were reported in the United States, against 5825 for the first six months of the previous year. The liabilities for this year are about \$65,000,000, being one half of those for last year. This is considered an indication of improvement in the business of the country.

The reports for the fiscal year, received from collectors by the Commissioner of Internal Revenue, show a total of \$1,100,000,000 in revenue. A report from the sixth North Carolina district, where there has been almost continuously trouble with illicit distillers, shows that during the year 405 distilleries have been seized, the net amount of money recovered to the United States therefrom being more than \$85,000.

The whole number of journalistic publications in the United States in 7th mo., 13, was 9,153, an increase of 450 since the first of the year. The increase is chiefly in monthlies and dailies. The suspensions were fewer than usual.

The steamship Mosel, from Bremen, which arrived at the New York quarantine recently, brings over 600 steerage passengers. Most of them are Russians, including 60 families with 213 children, and possessing an aggregate capital of \$10,000.

The steamship State of Virginia, which sailed from New York on the 10th inst., for Glasgow, went ashore during a thick fog on Sable Island on the 12th. Nine of the passengers, four women and five children, were drowned in the surf while landing. The vessel is afloat.

During the last week, there was shipped from the port 3,156,157 gallons of petroleum, and of which the value of the exports have amounted to \$3,837,843 gallons, or nearly 15,000,000 gallons more than for the same period last year.

Yellow fever has made its appearance in several places in Memphis during the past week, and from five to ten new cases have been daily reported for several days past. The citizens are leaving as rapidly as possible, but it is thought at least 10,000 will be unable to leave.

The number of deaths in this city for the week ending at noon on the 19th inst., was 421—a decrease of 3 since the previous week, and an increase of 63 over the same period last year. Of the number 174 were adults and 247 children, 167 being under one year of age.

Markets.—C.—U. S. sixes, 1851, 105½; 5's, registered, 103½; do. coupon, 104½; 4½ per cent, 100½; 4 per cent, 102½.

The markets generally have been rather quiet during the week, and prices of several of the leading articles were unsettled and lower.

Cotton.—Sales of middlings at 12½ cts. per lb. for uplands and New Orleans.

Fresh Fruits.—Choice hand picked apples, \$2.50 a \$3.50 per barrel; small and inferior, \$1 a \$1.50. Choice pears, \$1.50 a \$2 per cart; common, 50 a 75 cts. per cart. North Carolina peaches, \$2 a \$2.25 per bush. box. Choice watermelons, \$20 a \$30 per 100. Cantaloupes, \$3.50 a \$4 per barrel.

Petroleum.—Crude, 6 cts. in barrels, and refined, 6½ cts. for export, and 9½ a 9½ cts. per gallon for home use.

The grain.—The wheat market unsettled and lower—new red and amber, \$1.10 a \$1.14½; old do., \$1.14 a \$1.16. Rye, 60½ cts. Corn, 45 a 50 cts. Oats, mixed, 37 a 38 cts.; white, 29 a 40 cts.

Flour.—Minnesota extra, low and fancy, at \$4.75 a \$5.75; Penna. do. do., at 5 a \$5.50; western do., at \$3.75 a \$3.80, and patent and other high grades, \$5.75 a \$7.75. Rye flour, \$2.20 a \$3.25.

Hay and Straw.—Prime timothy, 85 a 95 cts. per 100 pounds; mixed, 60 a 70 cts.; straw, 70 a 90 cts.

Beef cattle were dull but prices unchanged. E. 5½ a 5½ cts.; good, 5 a 5½ cts.; medium, 4 a 4½ cts. common, 3 a 3½ cts. Cows, \$20 a \$30 per head. \$1 a 1½ a 3½ cts. per lb., as to condition. Hogs, 5½ a 6½ per pound.

The commission appointed by the National Board of Health of the United States, for the purpose of studying yellow fever symptoms, development and treatment Havana, is prosecuting its work there assiduously. Much local interest is manifested, and hopes of better results are entertained. One hundred and seven deaths from yellow fever are reported in Havana within a week.

FOREIGN.—The mercantile failures in England during the first half of 1879, numbered 8,990. During whole of 1878, they numbered 15,059. The *Lon Times* says, that in two chief industries, cotton and iron, there are signs that the suffering has been severe. The cotton trade has been more depressed than in 1877, and during 1879 there were a still larger number. The one favorable sign is, that the losses in the past month have been far less than those of previous months.

The *Manchester Guardian* says, a return has just been issued which shows the estimated population of England to be 35,350,000. That of Scotland 3,272,458; Ireland 3,563,324. The total net product of the revenue derived from taxation is, in England 4,925,292,297; Scotland, 47,834,252; Ireland, 26,499,353.

A dispatch from Folkestone says it is stated that contractors who have undertaken to raise the *Gen* iron-clad *Grosser Kurfirst*, have succeeded in placing 87 tons of the side of the vessel, and a shield over a breach caused by the collision with the *Koenig Wilhel* and that an attempt will be made to raise the wreck.

Advices from South Africa state that an envoy from Cetewayo reached Fort Napoleon on the 20th ult., being peace proposals, and a fine tusk of ivory as a present. It is also reported that the cattle demanded by Sir Garnet Wolseley manning the British camp at the Zuln king, asking that three leading chiefs be taken to the frontier. Hopes are entertained that the war near an end.

The value of the food supplies imported into France during the first half of this year, shows an increase of 10,000,000 pounds compared with the same period 1878.

A Berlin dispatch states that cholera has made appearance in the government of Smolonsk. The terrible epidemic, diphtheria, continues its ravages in Barabaria, where a rescript of the Governor is published ordering a universal fumigation of the dwellings at night, and the cessation of the passenger traffic. Epidemic has not been raging seven years, carrying to grave, in some districts, almost all of the rising generation.

WESTTOWN BOARDING SCHOOL.

Our friends Benjamin W. and Rebecca G. Passmore having resigned their positions as Superintendent and Matron of Westtown Boarding School, Friends will feel drawn to employ others, and responsible duties of superintending this Institution are requested to communicate with either of the undersigned. The present Superintendents desire to be released 14th month next, or earlier.

William P. Townsend, West Chester, Pa.
John S. Conifer, Fallstown, Bucks Co., Pa.
Charles J. Allen, 301 Arch St., Philadelphia.
Elizabeth R. Evans, 322 Union St.
Anna V. Edge, Downingtown, Pa.
Deborah Rhoads, Haddonfield, N. J.

FRIENDS' ASYLUM FOR THE INSANE.

New Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOHN C. HALL, M.D. Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

MARRIED, at Friends' Meeting, Rutherford, N. J., on the 3rd of Seventh month, 1879, REUBEN HAINES, of Germantown, Pa., to SOPHIA P., daughter of George Hartshorn, of Locust Grove.

DIED, at his residence in New Sharon, Mahaska Co., Iowa, the 26th of Sixth month, 1879, ISAAC SHAW, in the 76th year of his age, a member of Coal Creek Monthly and Particular Meeting.

Life and Adventure in Japan.

BY E. WARREN CLARK.

(Continued from page 294.)

The most populous part of the city is on the eastern side of the castle area, near a ridge from which all distances in Japan are said to be reckoned. A fearful conflagration swept through this district before I arrived in the city, and destroyed five thousand houses and hundreds of provincial *Yashiki's*. The streets were afterwards widened and straightened, and the district rebuilt in foreign style—i. e., with sidewalks, gas-lamps, and two-story houses, half foreign and half Japanese. The main street was called the *Tori*. This is the Broadway of Tokio; it runs from the new railroad station to the old bridge of Nihon-Bashi. After crossing the bridge, houses of the Japanese style are seen again.

The street life in Tokio may be studied by strolling up and down the *Tori*; and I frequently rambled through this street, to indulge my curiosity in observing the strange characteristics of the Japanese people. The native shops were ranged on both sides of the street, their fronts being thrown open so that the passer-by could see all the display of wares at once. The shopkeeper squatted upon the straw-matted floor, in the midst of his goods, toasting his fingers over a brazier of live coals, and smoking his tiny pipe, which was refilled at every third puff. If you stopped to purchase any small article, he would bow politely, and figure up the price on a little frame with rows of beads running on parallel wires, like the *abacus* used in schools. Unless you were expert in mental arithmetic, he would calculate faster with his fingers than you could with your brains. His result was always right.

The most interesting sights in the streets are the games and sports of the children. The Japanese believe in enjoying themselves, and the young folks are as bright and merry as the children of other climes. The girls play battledore and shuttlecock, and the boys fly kites and spin tops. The girls enjoy their game very much, and are usually dressed in their prettiest robes and bright-colored girdles; their faces are powdered with a little rice flour, and their lips are tinted crimson, and their hair is done up in a most extraordinary fashion.

They play in the open street, sometimes forming a circle of half a dozen or more, and sending the flying shuttlecock from one to the other. They are very skilful, and rarely miss a stroke. The boys like a strong wind that their kites may soar high; but the girls sing a song that it may be calm, so that their shuttlecocks may go right.

The boys have wonderful kites, made of tough paper pasted on light bamboo frames, and decorated with dragons, warriors, and storm hobgoblins. Across the top of the kite is stretched a thin ribbon of whalebone, which vibrates in the wind, making a peculiar humming sound. When I first walked the streets of Tokio I could not imagine what the strange noises meant that seemed to proceed from the sky above me; the sound at times was shrill and sharp, and then low and musical. At last I discovered several kites in the air, and when the breeze freshened the sounds were greatly increased.

Sometimes the boys put glue on their kite-strings, near the top, and dip the strings into pounded glass. Then they fight with their kites, which they place in proper positions, and attempt to saw each other's strings with the pounded glass.

On the fifth day of the Fifth month the boys have what they call the "Feast of Flags." They celebrate the day very peacefully, with games and toys. They have sets of figures, representing soldiers, heroes, and celebrated warriors; with flags, daimio processions, and tournaments. Outside of the house a bamboo pole is erected by the gate, from the top of which a large paper fish is suspended. This fish is sometimes six feet long, and is hollow. When there is a breeze it fills with wind, and its tail and fins flap in the air as though it were trying to swim away. The fish is intended to show that there are boys in the family. It is the carp, which is found in Japanese waters, and swims against the stream, and leaps over water-falls. The boys must therefore learn from the fish to persevere against all difficulties, and surmount every obstacle in life. When hundreds of these huge fishes are seen swimming in the breeze, it presents a very curious appearance.

The girls have their "Feast of Dolls" on the third day of the Third month. During the week preceding this holiday, the shops of Tokio are filled with dolls and richly dressed figures. This "Feast of Dolls" is a great gala-day for the girls. They bring out all their dolls and gorgeously dressed images, which are quite numerous in respectable families, having been kept from one generation to another; the images range from a few inches to a foot in height, and represent court nobles and ladies, with the Mikado and his household in full costume. They are all arranged on shelves, together with many other beautiful toys, and the girls present offerings of rice, fruit, and "saki" wine, and mimic all the routine of court life. The shops display large

numbers of these images at this special season; after the holidays they suddenly disappear.

The greatest play-ground in Tokio appears to be the garden and cluster of buildings known as the Temple of Asakusa. The temple stands near the river, at the further end of the city. Here the people congregate in large numbers for pleasure and worship; the Japanese combine religion and amusement, and their temple grounds are the places of resort on all festival occasions. There is a perpetual holiday at Asakusa. The main temple is approached by a long avenue, lined on both sides with booths, stalls, and shops, in which toys and all manner of things are sold. The fast table is devoted to the sale of small beans, with which to feed the sacred doves that throng the eaves of the temple by hundreds. When I purchased a penny's worth of beans and threw them on the ground, the whole feathery tribe of doves descended in a fluttering cloud, and picked the beans up in an instant. At another table larger beans are purchased to feed the sacred white horse. The horse is very gentle, and stands with due dignity in his stall, receiving with meekness all favors conferred upon him. The gods are said to ride upon this horse, therefore it is a religious act to feed him; he is plump and fat, like the lazy priest who attends him.

Inside the temple, the altars and images are protected from the birds by wire screens. There is a small wooden image which has been rubbed by the people so that its face, hands, and feet have been literally worn off. Whoever touches the image is said to have his diseases cured by touching the corresponding portion of his own body. It was very pitiable to see the blind, lame, and sickly coming up to this hideous wooden image, hoping to be cured thereby.

For long ages the Mikado of Japan has had religious reverence paid him by his subjects as the "Son of Heaven." He sat behind a screen at his ancient capital Kioto, and no one might dare approach him except a few court nobles. His very existence was shrouded in sacred mystery, and neither his face nor his form could be seen, but only the voluminous folds of his imperial skirts. The military chieftain, the *Teyoon*, managed all the affairs of state during this time at Yedo.

At last, after the revolution of 1868, the Mikado came forth from his seclusion and established his court at Yedo, which thereupon became Tokio, or Eastern Capital. The *Teyoon* retired with his retainers to Shizu-o-ka.

Since my arrival at the capital I had been intensely curious to see the Mikado, of whom I had so long heard. I even planned to gain access to the emperor's palace, and see the whole of the imperial court and household, and in this, before many months, I succeeded. The lever that I used to pry open the doors of stiff etiquette and princely exclusion was the stereopticon!

I first gave some brilliant exhibitions of pictures at the Naval College for Katz, the Minister of the navy; and afterwards at the Kaisei Gakko for Hatakeyama. These entertainments were attended by hundreds of officials and students, who of course were wonder fully pleased with the splendid stereoscopic pictures of Europe and America.

Soon the fame of the stereoscopic reached the palace, just as I intended it should! The empress and ladies of the imperial court were exceedingly desirous of seeing the beautiful pictures of western countries. But of course the ladies could not leave the palace; so I sent word politely to the lord chamberlain, through Hatakeyama, saying that I would come to the palace and give the empress an entertainment, and that the Mikado might come to the exhibition if he saw fit.

The offer was a novel one, as no foreigner had ever been admitted to the palace in such a way before; but my proposition was gladly accepted.

(To be continued.)

For "The Friend."

A Good Man's Christian Experience of the New Birth.

John Griffith, one of the valiants of his day in the Lamb's army, has, as subjoined, conveyed his experience of that washing of regeneration and renewing of the Holy Ghost, without which our Divine Lawgiver himself declares, none can see the kingdom of God. This then is a subject beyond all others of the greatest importance to be rightly understood by us, and practically carried out in a consistent godly life and conversation, being that which alone can lay a sure foundation for happiness either as respects this life or that which is to come. Such being the case, how should good heed be given to the Saviour's words—"Work while it is day," the night cometh, when no man can work."

J. Griffith writes: "Having offered a few hints by way of caution, in order that all into whose hands this shall come may examine themselves without partiality, lest they fall in advertently into an irremediable mistake respecting the eternal salvation of their own souls, I shall now endeavor to set forth, from mine own experience, a little of the nature of that new birth, without which none can see the kingdom of God; consequently are no true members of his church. It cannot therefore be supposed, that a person wholly unregenerate can be properly qualified for the performance of any religious duty, or even the least service in that kingdom, which he doth not so much as see.

I have, by experience from my childhood, found two spirits or seeds striving in me for mastery or rule: I have discovered them to be irreconcilable enemies one to the other; and that I could not serve them both at the same time. I had an understanding given me, whereby I knew one of those seeds was a measure of the all-powerful inexhaustible Source of goodness; and the other which had in a manner leavened the whole lump, was of a wicked and diabolical nature. By means of this corrupt leaven, I had a strong bias to evil of many kinds; nevertheless, I often found the good striking at the evil, as an axe laid to the root thereof, agreeably to Matt. iii, 10, in order to destroy that which deprived the Heir of all things of his inheritance. I was long in a kind of suspense, unresolved which to join with; yet saw all de-

pendent upon my determination, and that I had full power of choice. On the one hand, when the awakening visitations of God's Spirit were upon me, it appeared very dreadful to provoke an Omnipotent Being, of unmerited kindness and mercy, to cast my soul into everlasting perdition. On the other hand, especially when those blessed impressions were somewhat worn off, it was next to death itself to yield up all my sensual gratifications, and to expose myself to the scorn and contempt of the world. However, in process of time, the Lord in gracious condescension broke in upon my soul by his judgments, mixed with mercy, in such a powerful manner, as that I was made willing to yield up thereto, come life or death. For indeed I looked for nothing else at that time, but really expected my frail body would sink down under the weight of that unspeakable distress which was upon me, and that my sinful soul must be centred in a state of everlasting misery. Now the cry was with Saul, afterwards Paul, with trembling and astonishment, 'Lord! what wilt thou have me to do?' There was no holding back, or secret reserve then, but *whenever was called for was given up with all readiness*: this being all I could then do. As to performing religious duties, I had them all to learn, though I had been trained up from my infancy in a strict religious way by godly parents. But the very best outward help, and the most consistent set of religious principles, *only professed*, cannot at all enrich the soul with heavenly grace.

By carefully enquiring as above, I soon clearly perceived my business was to watch and pray continually; to commune with mine own heart, or the Witness of God therein, that I might receive fresh instruction and help as I had need. Self-denial, and taking up the daily cross, was to be my constant employ; in the doing whereof I had much inward peace and comfort, and a well grounded hope that I should thereby find, in the Lord's time, the body of sin so weakened, as that the yoke of Christ would become easy, and his burden light.

Very gross is the deception of those, who imagine the work of their conversion to be an instantaneous work. This can be nothing less than a delusion of Satan, to settle people at rest in a state of self-security as soon as he can. Oh! what a length of time it takes, to work out that rebellious, stiff-necked, backsliding nature, which was born in Egypt, before the new generation is raised up, that is fit to enter the promised land!

It is very observable that the prophet Malachi, when he had instructively set forth the nature of the new birth, breaks out in the fourth verse of the third chapter in this wise: "Then shall the offerings of Judah and Jerusalem be pleasant unto the Lord, as in the days of old, and as in former years"; which clearly implies man's unacceptable state with his Maker in any religious performances, until he hath previously known the cleansing and refining operations before mentioned. What then will become of those who have intruded themselves into religious services, and amongst his faithful followers, not having on the wedding garment! who would pass for his people, yet cannot find, by examining the state of their mind respecting religion, that they have trod the path of regeneration, nor passed through the many and varied pangs of the new birth.⁵

Payment of Indian Annuities.

The editor of *The Council Fire*, in a recent visit to the Indian Territory, witnessed of the semi-annual payments of annuity of the Delaware Indians located on Light Creek. He thus describes the mode pursued:

"The payment is a great occasion for Indians as well as white men who are interested. They come prepared to camp until payment is all over. Under present regulations every adult, over eighteen, must be present to receive his or her money from the hands of the agent, while heads of families draw for wives, children and wards. A list of all the members of the tribe entitled to draw is first run out upon sheets of paper 18 by 30 inch called 'the pay-roll.' This list is corrected by the agent and his clerk, assisted by the leading men of the tribe. The births are added, deaths noted, but usage among Indians allow one payment to be made to the heirs of deceased persons, after which their names are dropped from the pay-roll forever. The men are selected by the tribe and appointed by the agent to act as judges and inspectors very much as officers of elections among whom men are selected. Two other witnesses acceptable to the Indians, are appointed by the agent, also an interpreter. The witnesses are generally the chief clerk and interpreter, both of whom are employees of the government. Thus there are always present five persons besides the paying agent. No traders or collectors of public or private debts or assessments are permitted to be immediately present at a payment. The paying agent with his funds conveniently arranged, the clerk beside him with the open pay-roll in full view of the judge and interpreter, and the people receiving money being present, the payment commences. To illustrate. The name of Ola-Lon-ga-ni-ka, with sex, age, and family relationship being found upon the roll, the clerk calls the name and the amount to be paid. The agent asks of the judges, 'Is this Ola-Lon-ga-ni-ka? Is the amount correct? Is there any other claimant for this money?' These questions being satisfactorily answered, the clerk writes the name, holds the pen towards Ola-Lon-ga-ni-ka, who touches it with the index finger of her right hand, the clerk makes the mark X over the name, and says 'receipted for.' The agent then proceeds to count the money, laying each bill or coin, one at a time, upon an open table, with his hand resting upon the money, he repeats the name of the person and the amount due, and upon the response of the clerk 'correct,' he again counts the money in the presence of all, and asks, 'Is this correct?' If no objection is made to the count, he then places with his own hand, in this instance \$46.65, in possession of Ola-Lon-ga-ni-ka, and one per capita share has been paid. The Delaware maiden walks proudly away with ten new silver dollars jingling in her apron among the crisp new greenbacks.

"Unfortunately, Ola-Lon-ga-ni-ka has been buying bright-colored goods, in which she makes a fine display of her taste in dressing, and the merchant who sold them to her on a credit is somewhere on the ground holding a lease, to which Ola-Lon-ga-ni-ka has an imitation in a small book, with her name written on the back. This pass book shows her business relations with J. H. Bartles' licensed trader at Bartlesville, Indian Territory. Each

purchased is itemized, with amount stated. Lon-ga-ni-ka has submitted her book to educated friends, who found it all correct. She knows to a cent how much she is in debt, that it will require \$38 50 to keep her fit good. She has \$46.63 in her possession, there is no statute law to compel her to one dime, but *Oba-Lon-ga-ni-ka is an In-ian*. She goes directly to the house of Bartles, and pays him every cent due him. You half pay the poor maiden when you see her hand greenbacks and bright silver, until but 85 cents; but after all she is not to be pitied. It is, in common with the people, an heiress credit is good. Her honorable dealing purs further credit until next payment. She has had value received for the money. The trader trusted her honor. They lose less crediting than any traders in America. "A Coffeyville merchant that has dealt with the Delaware Indians for five years, aggregating \$40,000 of business, said to us that he had lost but twelve dollars in bad debts among the Delaware and other Indians in that State, where there was no law for the collection of debt against Indians, and credit was the custom and rule."

Sources of Spiritual Weakness.

The great cause of the declension referred to, in the attendance of meetings, is the love of the world. This is sufficient to account for most all, other and minor errors often being negligible at last to this. How does it affect our Meetings for Worship! By rendering the spirit in a few so earthly that it has no faith for spiritual things, tires under silence, rish with "itching ears," will bear only catering and popular ministry, knows nothing of a deep experience, and cannot join in the fellowship that there is in Christ. This is the plain truth, and we must know it if it is to be removed. Coming in such a state to worship the Lord, the spirit finds it hard to centre on a present God—to feel his power to righteousness within, and to know a willingness to do and suffer the perfect will of Him on whom each is to wait as his minister, and from whom the ministry of any is to flow. Living in the spirit of the world to a greater or less extent during the week, the heart finds it very hard to forget it now; it needs a change of nature and of aim, it must needs be the same in the meeting-house as in the office—it cannot put on a heavenly frame on one day and indulge a worldly one on the rest. Thus a meeting will be deadened as far as the influence of these spirits is felt, and even faithful ministers may be not a little affected and hindered by them. Thus, too, so many come to meeting and yet derive no good; it is their own fault and due to their own state—unfit or unwilling to receive what may be known by all.

The love of the world may be divided roughly so as to include the two spoils, the introduction of which into the camp, though they were concealed, led to the failure of the Israelites before a small enemy in the land of rest. It comprises the golden wedge and the Babylonish garment. If the love of money is the root of all evils, and is in any degree known in our Society, it must cause some of those signs of weakness which, with all the evidences of life it presents, we must recognize not only in candor but in duty. And, as to the garment, whatever may be said of an extreme of "peculiarity," much more should in justice be

spoken of the excess of fashion not unknown in our borders—which produces no "hedge," presents no sign, has no suitability, or real attractiveness, and is certainly to be justified only upon worldly grounds.

Among other reasons for such lack of life or power as is observed, is also this: want of confidence in our principles—i. e. in spiritual religion, which includes spiritual worship, ministry, life, sacraments and knowledge of Christ. This is not now confined to younger Friends—sometimes they are among the most earnest for the truths we hold. It is spreading fast among all ages amongst us, leading to a latitudinarian, compromising admission of any work or worker who has the least reverence for the Lord, and, of course, cutting short our distinctive testimony amongst those professors with whom we mingle. Instead of holding up to them the standard given us to display as different and as feeling bound to assert our spiritual views for the common good, we are now found working with these and in their methods in the prosecution of philanthropic and often political ends. Many are content to keep our principles perpetually out of sight, being slow to own their profession, seeing no difference between themselves and others, and acting as though ashamed of the history that has been revered, the ancestry that has been blest, the literature that has been answered by the world.—*British Friend*.

— "For The Friend!"

Extracts from the Diary and Letters of Ebenezer Worth.
(Continued from page 395.)

Tunnessa, 11th mo. 18th, 1848.

Dear friend Jos. Elkinton.—I received thy letter on Second-day last; and the kind and good feelings expressed rendered it truly acceptable, although it did not contain the information I much desired and was expecting: that a family of Friends was coming out to take the farm and soon take charge of the whole concern. I hope if my anxiety for that is too strong, a kind and merciful Master who knows my weakness and many trials, may forgive me, and preserve me in patience in my proper place, to finish the work which He may see meet to require of me, and may it be done in the way and time that will be most pleasing to Him; if so, all will be well. I think I feel a little liberty to tell thee how I have been getting along for a few weeks past. I have, I think, been favored to feel a renewed concern for, and a strong interest in the spiritual and temporal welfare of my red brethren and sisters. They truly feel near to me in Christian love. I think the dear Master, in unmerited mercy, has answered in a good degree the craving desires of my heart, and has opened a way where there seemed for a time to be no way. I now feel liberty to approach them in Christian love, and (have) language to express my feelings. Dear friend, I think thou wilt not think strange of me to say, when all feel pure love to God, it seems to beget within us love to our fellow creatures of so pure and perfect a character, that the partial feelings existing between children of the same earthly parent seem almost lost in that which is so much better. * * * Please do not forget to write soon. I feel for our Society in its much tried situation.

EBENEZER WORTH.

Diary resumed.

1848. 9th mo. 28th. Attended Collins

Monthly Meeting; staid the night before meeting at J. S.—s, where I was informed that J., (who is an elder, his wife and son, attended a meeting of the Universalists which was held before the interment of a young woman, one of their neighbors. I spoke to the old woman and to A. S., of the bad influence of such (an) example, and being countenance to such meetings, where a sound doctrine was preached; that it might be the cause of stumbling to some of the young and rising generation. I returned to Tunnessa the next day, pretty comfortable in mind.

10th mo. 5th. Went to Horse Shoe Bend. I felt much tried in relation to their school, they had got dissatisfied with their teacher; I could not hear of any suitable person to take his place, and knew not where to find one. When I went to the school-house he was not at home. Left my horse at George Titus' and went up as far as Isaac Half-town's, he had gone from home; on my return found the teacher had got home; procured hay and corn for my pony, put it in old stable, and put up for the night. Next morning, before breakfast, I visited George Titus; talked with him on the subject of religion in relation to our Saviour; I thought the opportunity was a favored one. After breakfast I went to Isaac's Half-town's, from there to Samuel Lap-ple's, where I found a little child, perhaps about a year old, lying a corpse, it was cleanly dressed, well laid out, and looked innocent and pretty. From there I went to Geo. Kill-barn's, found his son quite low; talked some with George; he spoke of a desire he felt (or perhaps prayer offered) day and night, that the Lord might help his son and make him well. On my way home called to see Sally Dowley, who is quite sick; has been on the decline for near a year. She seemed sober and thoughtful of her situation—poor woman, I felt much sympathy for her.

7th of the month. Before breakfast I was taken with rheumatism in the back; having promised to visit the Complanter reservation on this day, I prepared to go. I started and went down to Old town; not being able to get an interpreter, I visited Jos. Pierce's, who I understood had been indulging a good deal in the use of ardent spirits; from there I went to John Boan's, where I had a satisfactory opportunity of expressing my feelings to him and his family. On my return, feeling a concern of mind for Abel Pierce and wife, I thought it well to be right for me to visit them. When I came near his house, I found him talking with a white man. I halted a little while, and the man not making any move to leave, I started towards home; but not feeling easy, I stopped at Benj. Pierce's, stayed a little while and then went back. The man had left. Abel and his wife were digging potatoes. I talked a little while with Abel, and told him I wished to speak to them on the subject of religion, if it would be agreeable; he said he was willing, and that we had better go into the house—we went in. My mind was, I was favored with language to express it, and left relieved and comforted; had also a comfortable opportunity with King Pierce. In the evening I felt a desire that my Divine Master may so open and prepare the way for me, that I might finish the work that He is pleased to require of me in the way that would be pleasing to Him, and in the right time.

1st mo. 28th. Have been favored with composure, and a good degree of resignation, I hope. Oh! for more ability to say in truth, "Thy will be done;" that it was more fully and constantly the breathing of my spirit, for the Lord is forever worthy and a good rewarder of those who serve Him.

(To be continued.)

Prison Philanthropy.

For "The Friend."

In the Report to "The Philadelphia Society for Alleviating the Miseries of Public Prisons," made by its agent employed at the Eastern Penitentiary, there is a touching testimony to the benevolence and usefulness of the late Thomas H. Powers of this city.

A large part of the duties of this Agent consists in aiding the convicts whose term of imprisonment has expired, in procuring employment in some honest avocation, in assisting those who come from a distance in returning to their homes and families, and in providing them with suitable clothing. The following paragraphs are taken from the Report:—

"The total number of prisoners discharged during the year was four hundred and thirty-six. Total number leaving the city immediately upon their discharge, was two hundred and sixty-six, and of those remaining in the city, there was one hundred and seventy. Of those leaving the city I accompanied sixty-nine to the various railroad depots, procured their tickets and saw them safely started on their way to home and friends. Those leaving the city whom I did not see off, advised me of their desire to leave the Penitentiary unattended, as they were sufficiently well acquainted with the city to take care of themselves."

"To the total number of prisoners discharged, I furnished fourteen hundred and seventy-one pieces of clothing, one hundred and thirty-one hats, and one hundred and forty-eight pairs of shoes, this latter including some few pairs which only required mending."

"In my visitations among the prisoners I have endeavored, to the best of my abilities, to give them good Christian counsel as regards their future course of life; and, from the many letters that I have received, and from personal observation, I am led to believe that the seed sown in weakness has not been in vain. I have also been the recipient of many letters from the discharged prisoners, expressive of their thanks and kindly feelings for attentions shown them in preparing them for their discharge, and also for looking after their interests afterwards by endeavoring to secure them situations and comfortable homes."

"In closing this Report I cannot refrain from adding a few lines as a tribute of love and respect for the late Thomas H. Powers, who from my own personal knowledge and contact, has been a noble, unostentatious and untiring devotee to the great mass of suffering humanity, and especially with those whose misfortune it has been to become inmates of our Penitentiary. Of his love for the souls of men, and their worldly advancement, I can most assuredly attest.

"I have in hundreds of instances, through his noble generosity, made many a prisoner's heart to rejoice, by furnishing the funds necessary to admit of their leaving the city to find homes in other places where their unfortunate record was not known.

"Men who have proven their desire to reform, have been, out of his abundance, started in a small business. Homes have been furnished, additional fuel and clothing given, and all of this through my own hands, as it has been my great pleasure for the past twelve years to thus attend to the wants of many hundreds, and dispense the money to them which has been so generously and unselfishly furnished me by T. H. Powers for that purpose."

Does not this remind the reader of the blessing pronounced by our Saviour on those who fed the hungry, clothed the naked, and looked after those who were in prison? J.

HARVEST HYMN.

Almighty God! from out whose hand,
Our blessings, countless as the sand
Upon the ocean's sounding shore;
Full round our pathway evermore;
Let songs of praise our lips employ,
For all Thy gifts which we enjoy.

These glorious summer days have brought
Another harvest, richly fraught
With all the stores a fertile soil
Yields in reward for honest toil;
Till ripening fruit and golden grain,
Crown sunny slope and smiling plain.

Teach us, O Father! more to see,
How all our blessings come from Thee;
How wealth and plenty o'er the land
Are mercies from Thy open hand;
How all the "circle of events,"
Is governed by Thy Providence.

The teeming earth is Thine we see,
And all its fullness springs from Thee;
Beneath Thy care the season yields
Its seed-times and its harvest fields:
And beating winds, and lowing kine—
The herds on all the hills are Thine.

For all Thy blessings, Holy One!
We thank thee; and for time to come
Invoke Thy guardianship Divine,
Until the world's great harvest-time;
Then may we, free from tares of sin,
As golden sheaves be gathered in.

THY WILL BE DONE.

We see not, know not. All the way
Is night. With Thee alone is day.
From out the torrent's troubled drift,
Above the storm—our prayer we lift—
Thy will be done!

The flesh may fail, the heart may faint,
But who are we to make complaint,
Or dare to plead in times like these,
The weakness of our love or ease?
Thy will be done!

We take with solemn thankfulness
Our burden up, nor ask its less;
And count it joy that even we
May suffer, serve, or wait for Thee.
Thy will be done!

Though dim, as yet, in tint and line,
We trace Thy picture's wise design,
And thank Thee that our age supplies
Its dark relief of sacrifice—
Thy will be done!

And if, in our unworthiness,
Thy sacrificial will we press;
If from Thy orb's beated bars
Our feet are scamed with heated scars,
Thy will be done!

Strike, Thou, the Master, we Thy keys,
The anthem of the destinies!
The minor of the latter strain,
Our hearts shall breathe the old refrain:
Thy will be done!

—John G. Whittier.

Watch ye, stand fast in the faith.

Free Ministry.

For "The Friend."

In these days men make their own ministers, who make merchandise of the precious Gospel of our Saviour, and preach to suit their hearers, notwithstanding the Scriptures plainly declare against such. Such ministers follow neither the example nor the precepts the great Author of Christianity. For both He and those whom He ordained, went about preaching *freely* the Gospel of Light and Life, and turning the people from darkness to light and from the power of Satan unto God.

This was his direction to those faithful on whom He raised up to be ministers of His Word,—*Freely ye have received, freely give* and in time past when He commanded faithful servants to go forth to preach His Gospel He enjoined them to make no provision for their journeys, for there would be those among them they would come who would care for them. "The workman is worthy of his meat" And though faithful ministers of our dear Master have received money, it was not for preaching; but it was because He whom they served, knew their necessities, and put it in these men's hearts to minister to their earthly wants.

7th mo. 8th, 1879.

Troy and Mesopotamia.—Favored by the authorities at Constantinople, Dr. Schliemann is again busily excavating at Troy; and Rassam has permission to dig anywhere in Mesopotamia. With such a comprehensive grant, districts will be opened that have not hitherto been searched, and we shall hear of fresh discoveries at Nineveh, of exploration in the long hidden ancient city of Assur, an endeavor to find the famous royal "recorder office" or "Babylonian Bank," as some Assyriologists call it, in which were stored a large collection of mercantile tablets, representing the monetary transactions of a firm trading in the name of Egibi & Sons. It is curious to have bills for corn and fruits and woven goods, and invoices and vouchers from the days of Nabopolassar and Artaxerxes in the form of baked clay; but they are to be seen at the British Museum. The Arabs and Jews from whom they were obtained have kept the secret so well that the place in which they were discovered is not yet known to Europeans.

Kutha, now a group of great mounds, was the sacred university city of Babylonia, and had an extensive library, which is frequently referred to in mythological tablets discovered in other parts of the kingdom. It was from that storehouse of learning that the tablets giving an account of the creation were originally taken; and it is hoped that discoveries of other documents not less interesting will there be made.

In the mound of Nebbi-Yunis, search will be made for the palace of Sennacherib, in the expectation that some records of the latter years of that monarch may be found, "and possibly some accounts, however meagre, of the second campaign against Ezekiah."

But besides all this,—Rassam will make explorations in the country of that ancient people, often mentioned in Scripture—the Hittites. The existence of mounds along the bank of the Euphrates has long been known; and under a certain group known as the mounds of Jerabolus, it is supposed that Carchenish, the Hittite capital, lies hidden. In-

ptions in an unknown character were found that neighborhood a few years ago; and it is hoped that some key thereto may be met with in the course of the excavations now undertaken, and furnish to scholars the link wanting to connect Assyria with Western Asia. As the firm granted to — Rassam extends over a number of years, we may trust at the interesting enterprise will be carried a successful issue.—*Chamber's Journal.*

"For The Friend."

Historic Parallel, or George Fox and Martin Luther as Reformers.

BY CYRUS W. HARVEY.

(Concluded from page 295.)

"Others had talked about the work of the Holy Spirit in personal redemption, but where look for it, and how to find it, was made plain by this teaching of George Fox; by this teaching, the walk by faith is a walk in the Spirit, wherein we do not gaze into darkness, it do indeed have the 'light of life.'"

"On page 379 Fox says: 'I affirmed and proved that Balaam had the Spirit of God, that wicked men have the Spirit of God, also how would they quench it, vex it, grieve it, and resist the Holy Ghost, like the stiff-necked Jews. Wicked men were enlightened by this light, else how could they hate it. It is expressed, it did hate it, and the reason given by was because their deeds were evil, and they would not come to it because it reproved, and that must needs be in them which reproveth them. So the wicked world had it to reprove them, and the true disciples and learner of Christ, that believed in the light as Christ commanded, had it to lead them.' Ninety-five times in George Fox's Journal, this doctrine is as clearly affirmed as in the foregoing quotations. Twenty-five times he directs those whom he variously named as liars, drunkards, thieves, followers of filthy pleasures, child of the devil, corrupt magistrates, scoffers and corners, wicked men, and wicked world, to that of God in them, in their hearts, or in their consciences.' Again on page 253 of his Journal, Fox says: 'Great opposition did the priests and professors make about this time, against the light of Christ Jesus, denying it to be universally given. Wherefore, he says, we was moved of the Lord to give forth the following lines.' Here follow five pages of scripture arguments, to prove the doctrine which he says was opposed.

"Robert Barclay devotes two propositions, or nearly eighty pages in the Apology, to the proof of this doctrine, from which I quote the following: 'That God hath given to every man, whether Jew or Gentile, Turk or Scythian, Indian or Barbarian, of whatsoever nation, country or place, a certain day or time of visitation. That for this end, God hath communicated and given unto every man a measure of the light of his own Son, a measure of grace, or a measure of the Spirit which the Scripture expresses by several names, as sometimes of the seed of the kingdom, the Light that makes manifest, the Word of God, or manifestation of the Spirit given to profit withal, a talent, a little heaven, the gospel preached in every creature.' Apol. Pro. vi, sec. xi. By this seed, grace, and word of God, and light, we understand a spiritual, heavenly and invisible principle, in which God, as Father, Son and Spirit, dwells; a measure of which divine and glorious life in all men, as a seed, which of its own nature draws, invites,

and inclines to God, and this, some call *vitalium Dei*, or the spiritual body of Christ, the flesh and blood of Christ which came down from heaven, of which all the saints do feed and are thereby nourished unto eternal life. Apol. Pro. vi, sec. xiii. In this respect, then, as he is in the seed which is in all men, we have said, Christ is in all men, and have preached and directed all men to Christ in them. Sec. xv. This doctrine, if well weighed, will be found to be the foundation of Christianity, salvation and assurance. Sec. xi, William Penn says, 'That which the people called Quakers, lay down as a main fundamental in religion, is this, That God through Christ, hath placed his Spirit in every man, to inform him of his duty, and to enable him to do it. This is their ancient, first and standing testimony, with this they begin, and this they bore and do bear to the world. They call it the Light of Christ within or 'light within,' which is their ancient and most general and familiar phrase.' Friends' Lib. vol. v, p. 260-261. Similar extracts from the writings of early Friends, might be increased to thousands, indeed it is well known by all who are familiar with them, that the whole body of their writings is in unity with the foregoing quotations from Fox, Penn, and Barclay."

"For 'The Friend.'"

A Sailor's Conviction.

The writer feels somewhat constrained to leave an account of an interview he had, in the year 1843, with Michael Robson, an elder of good repute, at his residence Hartland, Niagara Co., N. Y., and as it left a savor which remains fresh at this time, it may be of service to others to adhere to the ancient plainness and integrity of our earlier Friends. I being a stranger, an immigrant, seeking a place of settlement in this country, had been recommended to call on this Friend; and after an evening of social converse, which seemed to cement our hearts in the union and fellowship of Christ, I had retired. He came very early to my room, saying, he could not sleep, believing it required of him to inform me how he was convinced and became a Friend. He then said: He was a wicked sailor boy, and had persuaded himself that religion had been established to keep people in subjection to the powers that be, and was very strongly inclined to infidelity. The vessel had put in the port of Seaboro, England, and as he was sauntering about the streets, some plain-dressed Friends appeared, going to meeting. Their plainness and demeanor struck him so forcibly, that it occurred to him, what if religion would be true,—I would like to know more about this people. He followed them; then returned to look in the meeting; some one reckoned him to a seat. The appearance, solemnity and silence, deeply affected him. When the meeting ended, he felt a desire to be good, and concluded he would try to know more; but the enemy suggested, it may be only form—he would like to know whether they were really what they appeared to be. In order to try them, he soon found some of their shops (or stores), bought some trifles, laid down more money than the real cost, to see if they would take it; but no—the money was returned,—now he was more convinced he would like to be good, and be a Friend; but how could he amongst the sailors; what to do he did not know. The vessel was ready for sea, but the wind was contrary; he again

attended meeting, and so it happened the wind still contrary, which continued for three weeks; at the end of which time he concluded to go to sea no more, but remained on shore, learned gardening, and became acquainted with nursery business. After a suitable time he was admitted to membership, afterwards married one in Society, finally emigrated to this country and settled as above, and was a steadfast pillar in the Society; and deceased in the year 1853, at the advanced age of 93.

The wheat is solid and weighty, but the chaff bloweth away; may the Lord incline the hearts of the children to the fathers, that they may grow up a seed to serve Him, and to be witnesses to others.

S. C.
Millville, Orleans Co., N. Y.,
18th of 7th mo. 1879.

Additional Advices.

Parents and Children.—Great is the responsibility resting on parents, and others having the direction of children; and strong are the claims made upon them, not only by parental love, but by the duty they owe to Him whose heritage children are, to labor patiently and fervently to bring them up in the nurture and admonition of the Lord, seeing they stand as delegated shepherds, who must give account for the lambs entrusted to their keeping. We would, therefore, affectionately, but earnestly press upon the consideration of all occupying these stations, the necessity of being willing to make such sacrifices as may be needful to secure to their offspring competent school instruction; and to seek daily for ability to check, in a right spirit, the early budding of their corrupt nature; to accustom them to a proper restraint of their youthful desires and will; and gently to lead them into an acquaintance with and submission to the voice of their Saviour, in the secret of their soul, so that they may be induced to take his yoke upon them, and, by learning of Him, be prepared to enlist in his service, and receive the inestimable reward of his peace. As this concern is maintained, and the counsel and government enforced in meekness and love, and by a daily walk of the parent consistent with the precepts he is seeking to instill into the mind of his child, we believe the blessing of the Most High will not be withheld, and a well-grounded hope may be entertained that he will see of the travail of his soul and be satisfied.—1865.

Religious Items, &c.

Friends' Meeting at San Jose, California.—A letter from San Jose says: "Our little meeting here is preserved in a good degree of ancient order and consistency, although, as in most places now, we have many delinquencies. Yet I trust we are owned of the great Head of the church, and some are endeavoring in a good measure not to dishonor Him."

The term "Saints." All who are born of God are saints. We see, therefore, how absurd it is to apply the term to a few, as if they had a monopoly of sainthood. Romanists prefix the term saint to the name of every Apostle, and they also say Saint Cyprian, Saint Jerome, Saint Augustine, Saint Patrick, Saint Louis, Saint Sebastian, Saint Mary, Saint Cecilia, &c., &c. Who does not see that this narrow application of the word is a virtual declaration that the multitudes to whom it is not applied are not saints? The use of the term, as thus employed, is a practical false-

hood. It is throwing numberless myriads of the redeemed out of the realm of saintship.

Religion in our Large Cities.—If we judge of the religious character of a people by the proportion who attend at places of Divine worship, the condition of some of our large cities is greatly to be lamented. In New York with a population of 1,100,000, of whom 922,000 are estimated to be Protestant, or rather non-Catholic, not more than about 90,000 will be found at the Protestant places of worship on a First-day morning, even in fine weather. This low state of things is probably partially due to the large proportion of foreigners residing in that city, of whom many make no profession of religion.

A Plain Garb.—The *Primitive Christian*, (a German Baptist paper), copies a commendatory notice of the Society of Friends from the *Interior*, in which is the following sentence:—"We trust that they will maintain their distinctive plainness of garb, speech, behavior, and that which has ever been their chief honor." It then makes the following comments:—"And why did the journal, in noticing the Friends' intimate that it is desirable that they 'maintain their distinctive plainness of garb?' The remark of the *Interior* is suggestive. Was it because the Friends' plainness of garb has something in it to commend it to the approval of the journalist, thinking that such a garb is more in harmony with Christian character, than an indulgence in the changeable fashions and the useless and extravagant ornaments of the dress of the people of the world is? Or was it because the journalist desired to see consistency, and knowing that the Friends profess to be a plain people, he would have them to be consistent, knowing that inconsistency detracts greatly from moral influence? Whether one of these reasons, or both of them prompted the remarks relative to the Friends' plainness of garb, they are worthy of our consideration, as our Fraternity, as well as the Friends professes to be a plain people.

It is some encouragement to know that intelligent and observing men approve of the principles of plainness exhibited in the plain garb adopted by the Friends, our own Fraternity, and some other denominations. A plain and modest garb has much in it to commend it, and those who wear such a garb need not be ashamed of it. Again, the plain garb is usually, as it is in the article we have quoted from the *Interior*, associated with high moral character, and may it ever in truth and justice be so associated, and not used as a help to deception or as a covering to a false character."

War.—The long established habit of nations falling on one another with fire and sword, and shedding the blood of thousands for any cause, or for no cause, has taken off restraint, and banished regard for human life, and reverence for Divine authority, from the great body of mankind.

Sometimes the Lord puts his servants aside, to teach him that He can do with or without him, and his servant becomes like "a bottle in the smoke," shriveled and useless.

The *Nashville Christian Advocate* says: "The lottery is doomed in these United States. The drift of public sentiment is unmistakable. It is soon to be numbered with exploded swindles. No array of once respectable names will give it respectability or save it from the blistering condemnation of honest people."

Religious Liberty in Stann.—The King of

Siam has issued a written command to the international Judge to make a proclamation to the inhabitants of Quieng Mai, Lakore, and Lappoon, that every man should be allowed, without molestation from any one, to worship God according to the dictates of his own conscience. Those who embraced Christianity were not to be forced to worship spirits, or to work on the First day of the week, except in cases of emergency, such as war and the like.

Bible Distribution.—Prince Galitzin, a young Russian nobleman, proposes to build thirty Bible kiosks and to fit up seven Bible carriages. He intends to travel for seven months in Russia with a Clough, of Paris, whom he has engaged to have charge of these carriages, and life for m.; I will give my whole life, and time, and fortune to his service."

Beer Statistics.—The National Brewers' Association, which recently met in St. Louis, presented some statistics of the enormous production and consumption of beer in this country, which will be of great interest to temperance workers, and will doubtless cause many of them to open their eyes in astonishment and alarm. During the fiscal year ending 6th mo. 30th, 1878, as shown by the sales of internal revenue stamps, 9,473,361 barrels of beer were produced.

At five cents per glass this "National drink" costs the people \$199,467,220. Does any one wonder at the building up of magnificent breweries and the increasing poverty of the working people, who are the chief consumers of this vile drink? The beer returns for the first nine months of the present fiscal year show an increase over the same period of 1878 of 409,929 barrels, and the brewers estimate that the production of 1879 will not fall short of 10,000,000 barrels! The government receives a tax of \$1 per barrel.

A Sensational Sermon.—The Portuguese in the little village of Sediellos are accustomed to have a yearly revival sermon on the Passion preached to them by Father Costa, who has had recourse each season to different experiments for impressing his hearers' consciences. This year he surpassed himself. He had contrived eccentric wooden balls to roll down the aisles and on the ceiling, concealed perforated water-pipes about the church, and behind the high altar laid up a stock of powder, resin and sulphur. At the end of his sermon, when he had worked himself and his hearers up to almost a frenzied excitement, he shrieked, "And now the world ends!" on which signal the apparatus designed to terrify the assembly was set to work. The thunder rumbled, the mimic rain drenched the faithful, the resin, powder and sulphur flashed and smoked, filling the church with Stygian fumes, and a perfect panic seized the congregation, who rushed pell-mell to the doors, believing themselves lost.—*Exchange.*

It is stated that the Baptist Church membership in Great Britain, in the last twenty-five years, has increased from 85,200 to 276,000.

Father Hyacinthe has now gathered six hundred subscribing adherents to his new church in Paris.

The Episcopal Diocese of Virginia, after an exciting debate, approved Bishop Whipple's circular against the decoration of places of worship. This action banishes flowers and altar-cloths from the Episcopal Church in Virginia.

Fine Meeting-houses.—Dr. Wayland said few years ago, that if the rage for fine churches went on as in the past, in fifty years' whole land would become idolatrous; church members would worship their edifices; their smooth-tongued preachers; and outside would worship their farms, their gold a silver; and the whole land would become idolatrous.

We ask, how far from this time are we? *The Evrnest Christian.*

Natural History, Science, &c.

Tropical Water-Snakes.—Lying in Manila Bay, it was not unusual to see water-snake (Hydridae) swimming on the surface of the water. This family of sea-serpents is for the most part distributed in the Indian sea, though some are found about Australia at the American coast, and rarely in the Pacific. I noticed them here, and in crossing the China Sea, as well as about the coasts of Borneo and Johore. The usual appearance of these snakes is more or less variegated, striped with transverse black and yellow bands—though some are of a more uniform dark color; and they are generally about two feet or two feet six inches long. In calm weather they may often be seen lying lazily upon the water apparently asleep, and basking in the sun; and they will remain undisturbed while the whole ship's length passes within a fathom of them; but sometimes, taking alarm, they will flounder about for a moment, and then dive down out of sight. When thus surprised it is not difficult to take them in a net, for they turn over before diving—it is supposed to expel the air, without which operation they cannot sink. But if taken, they must be handled with caution, for they are nearly all venomous, and are often much dreaded—and not without cause—since they have an unpleasant habit of crawling up the chains and through the hawse-holes, and thus getting on board ship, where they are anything but welcome visitors. They will creep about the deck—and, although I do not know an instance of any one having been bitten by them—I have known them cause considerable alarm by getting down into the cabin, and then making their presence first known by twining round the leg of its occupant. The sea-snakes, in nearly all species, have flattened compressed tails, which enable them to swim with great facility—the compression often including a considerable portion of the body. Their eyes are usually small, and the nostrils operculated in Manila Bay. I obtained some specimens of *Chersydryus granulatus*—a non-venomous species, which indeed differs from others of this family in being an inhabitant of rivers, from which they are occasionally drifted out to sea. Sharks also are not uncommon in the bay; and either sharks or venomous serpents were alone sufficient to deter us from taking a delightful bath, which otherwise we should much have enjoyed in this warm place.—*Collingswood's Rambles of a Naturalist.*

A Mule's Intelligence.—Prof. Nipher, of Washington University, St. Louis, says: "A friend of mine, living at Iowa City, had a mule, whose ingenuity in getting into mischief was more than ordinarily remarkable. This animal had a great liking for the company of an oat-bin, and lost no opportunity when the yard gate and barn-door were open, to secure a mouthful of oats. Finally, the mule was

THE FRIEND.

EIGHTH MONTH 2, 1879.

and in the barn in the morning, and for a long time it was impossible to discover how he had come there. This went on for some time, until the animal was "caught in the act." It was found he had learned how to open the gate, reaching over the fence to lift the latch, and then he effectually mystified his master, turning round and backing against it until the gate was latched. He then proceeded to the barn door, and pulling out the pin which held the door, it swung open of its own accord.

From the intelligence which this animal displayed on many occasions, I am of opinion that had not the discovery of his trick prevented, it would soon have occurred to him to retrace his steps before day-light, in order to avoid the clubbing which the stable boys give him in the morning.—*Nature*.

The Danger in Kerosene Oil.—It is simply to be set down to good fortune (or the preserving care of Providence), if one who has employed the light oils for household purposes has escaped injury, since no amount of care can avoid against the inevitable result which must follow one accident. It is easy to understand how persons ignorant of the highly dangerous character of the light petroleum may unknowingly make use of them in the manner above named; but it is really a matter of concern and surprise that so many, even of those who are thoroughly aware of the nature of the incendiary they are introducing into their households, are, nevertheless, thoughtless or indifferent enough to continue the suicidal practice—for no term can be too strong to properly characterize the fearful nature of the risk one is constantly running while employing these oils in the household.

There is one simple, and, for practical purposes, satisfactory method of determining the character of all such mixtures, and which applies equally as well to the common oils. Let a few drops be poured into a saucer and apply a match; if the material burns, reject it as unsafe. The fact that the material can be set on fire at the ordinary temperature of our dwellings should be sufficient evidence to a person of ordinary intelligence that, when employed in the household, it may, at the first thoughtless or careless act, become the cause of a frightful accident.

Now for the reason why these dangerous oils find their way into the market in defiance of legal prohibition:

The crude petroleum, as it comes from the wells, is not a simple substance, but consists of a mixture of a number of oils. The operation of refining the crude product consists essentially in subjecting it to a system of distillation, whereby it is separated into some six or seven products, to which the commercial names of kerosene, gasoline, naphtha, benzine, kerosene, etc., are attached.

The benzine or naphtha makes up generally about 15 to 20 per cent. of the crude oil, and for this the demand in the various industrial arts is by no means equal to the supply, in consequence of which it commands but an inferior price in the market; in fact, considerably less than that demanded for the burning oils proper. Here, then, exists a direct temptation to dishonest or ignorant manufacturers or dealers to adulterate their stock of burning oil with oils of inferior price and dangerous quality. To what extent this reckless practice is carried on the community have no just conception, but the writer feels

safe in asserting that it is as general as any of the true adulterations.

So generally has it been practised, in Philadelphia at least, that only three years ago an examination of 3,000 oil samples sold in various parts of the city and its suburbs showed that not more than one-twelfth of one per cent. of all the burning oils sold in the shops of this city were of sufficiently high grade to pass the fire test; and it may be added that there is no reason to suppose that any improvement of this condition of things has taken place since the time when the examination was made. The constant occurrence, therefore, of accidents with coal oil—so long as the cheap and highly dangerous products of the refinery are indiscriminately used to adulterate the comparatively safe-burning oil, the kerosene; or doctored, with equal impunity, into the nameless burning mixtures with alluring names that meet one at every turn—is a perfectly natural result, and one that should occasion no surprise.—*Polytechnic Review*.

Fainting is so common with some persons, particularly women, and the cause of it so little understood by non-professional people, that some knowledge on the subject often proves valuable. Fainting consists in a temporary failure of the activity of the heart, the blood not being properly circulated in consequence. Although it does not reach the head, the sufferer loses all clearness of vision, and, if not prevented, may fall, the fall not infrequently restoring the normal condition. There is no convulsion, and though he—more probably she—can hardly be called conscious, he is not so profoundly unconscious as to be incapable of arousal, as happens in epilepsy. There are all degrees of faintness, from merely feeling faint and looking somewhat pale to positive and complete swooning. In some cases one faint is not sooner cured than another and another succeeds, hour after hour, even day after day. It is scarcely necessary to say that such cases are serious and need prompt treatment. The causes are various. Some persons are so easily affected that they swoon if they cut their finger or see any one bleed. Their defect is over-sensitive nerves and weak muscular fibre. The heart is essentially a muscle, which is feeble in some, strong in others—feeble generally in women and strong in men. Whatever weakens the heart and muscles commonly produces faintness; close, foul air being an active cause. Whatever greatly affects the nerves, such as bad news or the sight of the disagreeable or horrible, may induce a swoon; and loss of blood is another and a serious incitement. Sound health, naturally accompanied by firm nerves and muscles, is the best preventive of faintness. The majority of severe and painful experiences without fainting, while delicate men and many women swoon at trifles.

[American women are less prone to faint now than formerly, owing, as it is believed, to the abandonment of tight lacing, and to their increased exercise in the open air, and as a consequence, their better physical condition.]

As large springs send forth their waters without pumping, so your benevolence should seek the poor before the poor seek your benevolence.—*Secker*.

There is danger of overestimating the importance to the Church of those of its members who are called into the more active and conspicuous positions; and to have too little regard for the more hidden ones, whose place of usefulness may be much restricted to the quiet precincts of their own family circles, and whose voices are seldom or never heard in public assemblies, but who may be animated with as sincere a love for the cause of religion as their more active brethren and sisters, and may be living in as close a union with the Spirit of the Lord.

All real good comes from the one eternal Fountain. Our own progress in religion and our ability to help others depends on being joined to that Fountain and receiving from it our supplies of strength. He who has all power is able to carry on his plans without our feeble aid, for He can turn the heart of a man, as a man turneth his water-course in his field—a simile the force of which can be best appreciated by those who have been familiar with the process of artificial irrigation, and have witnessed the manner in which the skillful laborer directs the fertilizing streams in succession to every part of his land.

Yet it does often please the Lord to make use of human instruments in the accomplishment of his designs; perhaps as much for their own growth and help, as for any other reason. It is his blessing alone that gives value to the efforts used by any of his servants, and all the glory belongs to Him.

The machinist knows that in a steam engine the hidden valves that govern the flow of the steam are as vitally essential as the ponderous fly-wheel or the quick moving piston. So in the Church, the hidden members, who, without apparently doing much for the blessed cause, are living near to the Fountain Head, wresting daily for a blessing on themselves and others, may as availing contribute to the welfare of the body and be as instrumental in procuring the flow of Divine life to its members, as some others who are more conspicuously brought to view.

Let none then despise their callings, complain of their own lot, or become weary in a faithful effort to fill up their measure of service. Whether our active duties be few or many, our place in the Church be in the hidden paths of obscurity, or in more prominent and exposed positions, the same highway of holiness must be trodden by each one of us. We must come to walk in the Light of the Lord, in close communion with Him who declared, I am the Way, the Truth and the Life; our greatest concern being to know his voice and to obey it, trusting with full confidence in that God who has declared that besides me there is no Saviour; believing that He will not only care for us in our journey through life as we become joined in fellowship with Him, but that He will care for his own cause in the earth. Then not only our language, but our every-day walk, and all our dealings with men, will spread the invitation to others—"Come and have fellowship with us, for truly our fellowship is with the Father and with his Son Jesus Christ."

We have received a short communication,

without a name attached, pleading for charity in our judgment of one another. While we unite in this feeling, yet there are some expressions in the article that appear to have a direct personal allusion, though they may not be so intended. As in such a case, private labor would be more appropriate than public, we believe it best not to print the communication.

SUMMARY OF EVENTS.

UNITED STATES.—The rainfall on Seventh-day, (26th inst.), was very heavy in many places. It did great damage in the oil towns of Petrolia and Karnis City, and along the Monongahela and Allegheny valleys, in the western part of this State. Nearly all the railroads centering at Pittsburgh, except the Pennsylvania, were damaged. The rainfall at Irwin's Station is reported to have been seven inches. A woman was drowned at Shaner Station by the flood.

A telegram from Washington announces that the recent Treasury order in reference to paying out standard silver dollars without discrimination, is not to be construed as forcing the standard silver into circulation. The option will still remain with the public of accepting or declining these dollars when they are tendered by any Government official.

The *New York Commercial Bulletin* in a recent issue published a complete list of the defaulting railroads in the United States. The record is a most striking one and clearly shows the standard silver on the pit into which was sunk the anticipated net earnings of many years. The list includes no less than 307 railroad corporations that have been compelled to go into bankruptcy, with losses to creditors varying all the way from 50 to 100 per cent. The enormous sum thus sunk cannot be accurately stated, but the paper referred to accredits the following statement: "The aggregate amount of default, up to 1st mo., 1879, at \$89,000,000; and if this estimate errs, it is in the direction of conservatism."

The Mercantile Agency of R. G. Dunn & Co., have issued their regular quarterly circular, giving their statistics of the business failures in the country for the second quarter of the year. The statistics are highly liberal is very encouraging. The failures for the second quarter in the present year are 1,534 in number, and twenty-two millions of dollars in amount of liabilities. These figures are notably less than in any single quarter of the past five years. As compared with the second quarter of 1868, the difference in favor of the last three quarters is very marked. The total number of failures in 1868 was 1,900 failures in that period, with a decline in liabilities of twenty-six millions in the quarter—a lessened loss or lock-up by bad debts of over two millions per week.

A protest against the pardon of D. M. Bennett, convicted of sending improper matter through the mails, has been prepared by the New England Society for the Suppression of Vice, and has been signed by many eminent educators, clergymen, physicians and business men of Boston and other New England cities who signed it.

Florida is now shipping 6000 head of cattle monthly to Cuba, with the prospect for an increase in the demand. The shipments of Texas cattle to Cuba are also large, giving regular occupation to several of the Morgan ships.

The mortality in New York city for the past week was about 600, a decrease of 233 compared with the week previous. This change for the better is undoubtedly due to the cooler weather, as also to the labors of the tenement-house visiting physicians. It is also worthy of note that the per centage of deaths among children under five years is much smaller this week than last.

The number of deaths in Philadelphia was 405, of whom 175 were under one year of age. The deaths from cholera infantum (summer complaint), were 105.

Five hundred tons of fresh meat left New York on one day of this week for England.

The Sanitary Committee of the Board of Health of this city have made a report recommending the disuse of burial places in the built up portions of the city. They say: "The best sanitary authorities are opposed to the practice. Says Parkes, than whom no better authority exists: 'The air over cemeteries is constantly contaminated, and water which may be used for drinking is often highly impure. Hence, in the vicinity of grave-yards two dangers to the population arise, and in addition, from time to time, the disturbance of an old grave-yard has given rise to disease.' It is a matter of notoriety that the vicinity of grave-yards is unhealthy." Another danger may be mentioned, namely,

that arising from contamination of the "ground air," which is drawn into houses through the basement floors, particularly in the winter, spring and fall. Your committee, in regard to the importance of the subject of intra-mural internments, advise that steps be taken to secure the total prohibition in the future of all such burials.

The number of deaths in Memphis from yellow fever during last week was 34. The census of its population, taken by the policemen, shows the number of fatalities to have been 110, and of those who died had the fever. James B. Cook, an architect and sanitary engineer, who resided in Memphis for many years, attributes the liability of that city to disease to the imperfect drainage and want of pure water supply.

Among the emigrants arriving at New York on the 25th ult., were 76 Icelanders, the first from that region. John Welsh, our Minister at the Court of England, who has very acceptably filled that station, has resigned his position. Family reasons are supposed to be the cause of this step.

A hostile collision occurred a few days since, between a small body of United States troops in Montana, and a party of Sioux Indians. Orders have been sent from Washington to the army there, to avoid warlike movements.

Markets.—U. S. Sixes, 1881, 104; 5's, registered, 102; do. coupon, 104; 4½ per cents, 100; 4 per cents, 102.

Cotton.—Sales of middlings at 12 a 12½ cts. per lb. for uplands and New Orleans.

Wool—Washed, 10 cts. in barrels, and standard white 6½ cts. for export, and 9½ cts. per gallon for home use.

Flour.—Prices continue steady, but the demand limited. Minnesota extra at \$5 a \$5.75; Penna. extra family, at \$5 a \$5.50; Ohio extra family, \$5.25 a \$5.75; patent, 4.25 a \$7.75, and other high grades, at \$7.75 a \$12.50. Corn—No. 2, five flour at \$1.25 a \$1.35; No. 3, \$1.25. Corn meal, \$2.50. Bran sales at \$12 a \$12.50 per ton.

Grain.—There was a fair local demand for wheat, and prices were higher; red on track at \$1.13 a \$1.14; Delaware amber, at \$1.15; Jersey do. at \$1.15. No. 2 western red, in elevator, at \$1.12; and small lots of No. 1, at \$1.10 a \$1.15. Rye flour at \$3.50 a \$3.75. Oats 36 a 37 cts. for mixed, and 39 cts. for prime white.

Hay and Straw.—Prime timothy, 70 a 80 cts. per 100 pounds; mixed, 60 a 70 cts. per 100 pounds; straw, 55 a 70 cts. per 100 pounds.

Cattle. From 35 to 55 cts. per pound, as to quality. Sheep, 15 to 25 cts. per pound. Hogs, 5 to 6 cts. Corn, at from \$29 to \$30 per head.

FOREIGN.—The *London Times*, in its financial article, mourns the bad crop prospects in Europe. There is no doubt now but that the excessive rain and the absence of sunshine has done much damage. The prevailing opinion both in France and Germany is that the wheat crop will be short, both countries not being suffered from the late rains. Southern Russia and America seem to be the only corn growing countries whence an abundant supply can be looked for.

Bishop Colenso, writing from Natal to the *London Times*, describes the war against the Zulus as a "most unrighteous and unnecessary" one, "which has been fought for the sake of a High Commissioner, in which already 10,000 human beings have been killed—2,500 on our side, and 7,500 on that of the Zulus; and which, unless, as may be hoped, the Secretary of State has interfered in the interest of peace, will be carried, no doubt, to its bitter end, involving the killing of thousands more, and the expenditure, as is freely stated here in this territory, of not less than a million and a half, but at least ten millions of English money."

The first railroad in Palestine has been the contractor for between Jaffa and Jerusalem, forty miles. The contractor is reported to be G. F. D. Lovell, a resident of Cincinnati.

The *London Standard*, despatch from Madrid intimates that the Cabinet, at the next session of the Cortes, intends to introduce bills for the gradual extinction of slavery, and the payment of compensation to proprietors of slaves, freedmen to give some years of labor for their liberty.

A council of foreign bondholders at London has telegraphed, on behalf of the holders of Louisiana bonds, a strong protest against the measures of social redistribution proposed by the Louisiana Constitutional Convention.

A Vienna despatch to the *Times* says: Russia, in reply to the friendly inquiry of Austria, has given an assurance that the last Russian soldier will have quitted Turkish territory by the 4th of 5th mo.

Patagonia.—The cession of all Patagonia to the genuine Confederation by Chili, makes another chapter in the political geography of this continent worthy of note. The region, which extends to 1530, and has longed to Buenos Ayres and to the Confederation, it the latter allowed Chili to occupy the western coast. The whole area is about 350,000 square miles, and is occupied by some thousand Patagians and Patagonians. The Welsh failed in planting a colony there some fifteen years ago, and the Swiss had the same want of success five years since. There are seven fair harbors, two volcanoes, many mountains, lakes, rivers and rivers, and gold, coal and diamonds have been found. Bears, deer, foxes, otters, cattle and horses are met. The summers are short and the vegetation is scanty, though potatoes and a few vegetables have been grown. The region has had considerable importance because it controls the navigation of M'Gellan's Straits; but since Great Britain seized Falkland Islands, fronting the Atlantic entrance to the straits, this control has been of little use, and an Argentine colony died out from cold and want of business. The political transfer carries the right of domain; but that the little use of the straits will be of no use when the Isthmian canal is constructed.

John Bright, England, in reply to one asking him to support a motion in the House for a committee inquiry into the causes of the depression in trade said:

"Parliament cannot step in by legislation material to mitigate the admitted sufferings of the farmers. As to the present depression of trade, we owe some of it to the bad harvests which have impoverished many farmers, who are not an inconsiderable portion of the home trade customers. We owe much of it to famine in India and China, and to the commercial and manufacturing distress which has prevailed in almost every country. These great changes are not in the power of Congresses or Parliaments; they are in the order of nature, and we must accept them, always endeavoring not to aggravate them by our own follies. As to Parliament and its inquiries, I have seen much of it, and of them. If Parliament would keep out of foreign broils it is not likely to do much good. The cost of the present expenditure is £260,000,000, instead of £260,000,000 in the year; if it would divert its time and labors to questions of home interest rather than those which involve the sacrifice of the blood and treasure of our people in remote lands, we might have hope and faith that Parliament could serve the nation in times of depression, and we should find that such times of suffering would visit us more rarely."

The Great Russian Project.—It is said that the war men have at last begun the long cherished project of turning the Oxus, or Amoo river into its old bed, making it flow westward to the Caspian Sea, from a point, near Khiva, instead of northward to the Sea of Aral, as at present. It is believed that the river was turned into its present bed by the Tartars, in A. D. 1235, to prevent Russian extension towards the East, and ever since the old bed was discovered, early in the last century, the Russians have been thinking about turning it back again. The most recent surveys seem to show that it would remove of the dam, which now prevents the water from flowing to the Caspian, would result in the opening up of a new desert country.

TOUGHIKENAMON BOARDING SCHOOL.

The 13th year opens Ninth month 9th, 1879.

H. M. CORP, Principal.

WESTTOWN BOARDING SCHOOL.

Our friends Benjamin W. and Rebecca G. Pashnor have resigned their positions as Superintendent and Matron of Westtown Boarding School, Friends may feel drawn to engage in the important and responsible duties of superintending this Institution, are requested to communicate with either of the undersigned. The present Superintendents desire to be released 14th month next, or earlier.

WILLIAM P. TOWNSEND, West Chester, Pa.
John S. Confort, Fallington, Bucks Co., Pa.
Charles J. Allen, 304 Arch St., Philadelphia.
Elizabeth B. Evans, 322 Union St. "
Anna V. Edge, Downingtown, Pa.
Deborah Rhoads, Hadfielden, N. J.

WILLIAM B. PALE, PRINTER,

No. 422 Walnut Street.

THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

Life and Adventure in Japan.

BY E. WARREN CLARK.

(Continued from page 402.)

At an appointed day I went to the palace with Hatakeyama, and selected the largest of the state apartments, as the most suitable in which to give the exhibition. I then asked the lord chamberlain to fix the most convenient date. He stepped out in the garden and consulted the Mikado, who was just about to take a walk. His majesty said that Tuesday of the next week would suit him; but if any important state duties interfered he would let me know.

Accordingly, about eight o'clock on Tuesday evening, I had my instruments set up in the palace, and the large curtain suspended from the top of the partition of the apartment. Two large screens were arranged around the instruments; where the officers at first fixed them so as to shut off the seats intended for the emperor and his household from all the rest of us in the room. But as soon as they had retired to give notice that all was ready, I made a slight and quick change, and pulled the screens backward, so as to make the way clear for a larger picture on the curtain.

As soon as every thing was ready for the exhibition, notice was sent to the Mikado's apartments that all things were awaiting his majesty's pleasure. The emperor and empress were ushered into the room, followed by an impressive retinue, consisting chiefly of young ladies dressed in white, with their long, dark hair streaming behind, and broad red sashes encircling their waists; the effect was very pretty, and quite unique, as this charming procession of fair ones entered, and quietly seated themselves behind his majesty, while the word "Welcome," with the wreath of flowers, was thrown by the brilliant light upon the curtain.

The chief officers of the Kunaiشو, or household department, sat on the opposite side of the room from his majesty. Tokudaigi, the lord chamberlain, and several other high officers were in attendance on his majesty; and every thing passed off in a very pleasant and social manner, there being nothing stiff or formal, though there was a subdued stillness in the room.

At the outset dissolving views were ex-

hibited of Windsor Castle, Sandringham Hall, the Parliament Houses, and other English and Scottish places of interest.

Then followed many American views of Niagara, the Yosemite, and the principal scenes in Washington, New York, and Boston. After this the magnesium stereopticon was started, and the magnificent views of Paris, Berlin, Switzerland, and Northern Italy were presented in brilliant succession.

Hatakeyama (who had accompanied the embassy in all their European experiences) sat near his majesty, and explained all the views as they were announced; designating, at the same time, the particular places visited by the embassy, and enlightening the occasion by little incidents of their experience.

The Mikado seemed exceedingly interested, and although every body else was quiet in his presence, he conversed freely and naturally, asking many questions upon places of particular importance.

The exhibition lasted an hour and a half, yet the court wished it to continue longer.

At the conclusion I thought that my turn had come to secure the long-desired peep at the Mikado and the fair members of the imperial household. The room had hitherto been dark, so that I could not readily see the distinguished people about me. Only a broad cone of light fell upon the screen from the stereopticon. But when the signal was given for the Japanese servants to approach with their little paper lanterns, I knew the Tokudaigi had planned to remove the Mikado and his court from the room, without giving the foreigner time to have a satisfactory look at them.

Science came to my assistance, however. The punctilious lord chamberlain knew not the marvellous potency of the magnesium light. No sooner had the fair retinue risen from their seats than I raised the magic clock-lamp from one of the instruments, and shot a broad beam of white light, dazzling as the sun, down the long corridor through which the procession must pass. In an instant the Japanese lanterns glimmered like fire-flies, and the darkness of the corridor changed to daylight. The Mikado and empress passed out first, followed by the ladies of the court, who walked quietly, two by two, and hand in hand. Their dresses were similar to some of those I had seen in pictures of the ancient Kioto court. The fair young faces turned one by one towards the brilliant light, which their curiosity led them to look at, and I noticed the little dots placed upon their foreheads, which designated the highest rank of nobility. Some of the ladies were very pretty; they wore their hair in thick tresses down the back, which style is only allowable for ladies of the court. Their eyes were slightly oblique.

After the stereopticon entertainment the officers of the Kunaiشو Department expressed much pleasure at the result, and said I must be fatigued and in need of refreshment. Ac-

cordingly I was led, with Hatakeyama and my two Japanese assistants, into the room where the Mikado's ministers are usually received. Here a table of refreshments awaited us. Cakes and flour-confectionery, stamped with stars, leaves, flowers, and chrysanthemums, were piled upon the table colored with all the tints of the rainbow. The confectionery was too artistic to eat, and I told the lord chamberlain that I would take it home to show my friends; he said certainly, that I might take it all, for this is the Japanese custom. I had frequently given dinners at which the invited guests carried away in their sleeves all the good things that were left! So there was no impropriety in my carrying away the sweetmeats from the Mikado's table.

The next morning all my instruments were sent to the college in the emperor's express wagon. A month after, a magnificent gold lacquer-box came to me with the compliments of the Mikado and the thanks of the ladies of the court. The latter said they felt as though the stereopticon had taken them on a journey through foreign countries, and that nothing in their seclusion at the palace had ever afforded them half so much pleasure. They would remember the occasion, they said, all their lives.

It is appropriate just here to say a few words respecting the various classes of society which prevailed in Japan before the advent of foreigners, and of the distinctions which are now slowly passing away.

In ancient times society was divided into four classes. The first constituted the literary and military class, called the Samurai. The second, strange as it may seem, was the agricultural class, or common farmer. The third was the laboring class, or carpenter and artisan. The fourth was the trading or money-making class, the merchant. These were the chief classes that existed from 1604 until 1868.

The Samurai stood at the head of the social scale. He was the gentleman—the soldier in war and the scholar in peace. He could wield either the sword or the pen. Of the two, he rather preferred the sword. The sharp steel blades thrust in his belt were to him the symbol of rank and chivalry. He might walk the streets without a hat, but never without wearing his two swords.

(To be continued.)

It is a very blessed state, always to live, walk, meet together, and wait in that which gives free access to the throne of grace, and which leadeth in the presence of Him that sitteth thereon; in whose presence, some of old could witness, were rivers of pleasures, and at his right hand, joy for evermore. Oh, all that taste of one drop of this river, and partake of the least measure of this joy, know them to over-balance and outweigh all the treasures, joys, and pleasures, this world and the glory of it can afford.—*W. Shewen.*

"For The Friend"

Extracts from the Diary and Letters of Ebenezer Worth.
(Continued from page 403.)

1818. 11th mo. 21. Went down to Corn-planters; took King Pierce for an interpreter. After speaking with them in relation to some business with their agent, I informed Charles and William O'Bail I wished to speak with their people on the subject of religion. Some of the men met in Charles' (house) and I had a comfortable opportunity with them. I felt as if I should like to see them altogether, and expressed to Charles and William to that effect; but after expressing myself as I did, and they not getting together, I felt excused.

11th mo. 7th. Since I have heard of the offer made by — and wife (to come to the reservation and act as agent), I have been much comforted and highly favored in seasons of supplication—a great blessing—may I remember it in time to come with feelings of gratitude to a kind and merciful God.

11th mo. 11th. I had a pretty full and satisfactory opportunity of talking with Jackson Curry on the subject of religion.

13th. Went to Randolph expecting to go to see George Thorp, to try to have him to teach the school at Horse Shoe. I met him in the road between the east and west villages; he was willing to teach the school and I hired him. After parting with him I felt thankful to a kind and merciful Master that I had met with so suitable a person. I had felt anxious for some time to have the school commenced, (but) the difficulty of getting a good exemplary person has made it discouraging.

14th. In the morning went to the river. William Hall, the Presbyterian missionary, was there with his interpreter, to talk to the Indians; it caused me to think pretty seriously whether I was discharging my duty. While I do not wish to lay anything in the way of other people, I should feel sorry that by neglecting what might be required of me, the Lord should find it necessary to send others to do the service designed for me. May my work be done in the day time,—the Master's time. In a letter received from my brother, I was informed there seemed no prospect of the Friend and his wife who had offered, coming to take my place; the news was trying to my natural feelings. Oh! for resignation to the Divine will.

1819. 1st mo. 27th. Went to see George Johnson, who had been confined to his bed for near six weeks from a hurt he had got in his knee. I met with J. Curry at Moses Snow's, had a satisfactory opportunity with him on the subject of religion. Moses Snow's wife appeared sober and attentive to what was said. I returned home pretty well satisfied that I went.

1st mo. 28. Felt a concern to visit the upper end of the reservation; the river being high I felt a little discouraged, and went down to Jackson Curry's and Moses Snow's. They had both left home; came back to the school house to be a little in the quiet, and to feel after what was required, at which time felt it right for me to persevere. I went home and got William and Hamilton Johnson, who quite encouraged me. They could put my pony and sleigh across in the boat. I needed some encouragement, for I felt a little afraid to attempt to cross in the boat, the river was so high. My own feelings, from a sense of duty, seemed to help me forward. We crossed over with comparatively but little

difficulty. I felt, I trust, in a degree thankful that I was favored (to get over) so comfortably. I felt my mind pretty well composed with a desire, I trust a living desire, that I might be kept in my proper place, and that I might be enabled to do all that was required of me. I called on my way up, and got James Jamson for my interpreter. When I got to the Council House at Horse Shoe, I spoke to some of those who appeared to have some management of their meeting or dance, for an opportunity of speaking to their people. The next day, George Titus informed me that I might have an opportunity in the forenoon the next day. I went to Walter Thorp's to stay that night. I felt my mind much favored with a continued desire that I might be enabled to do what my Divine Master might be pleased to require. I think I was able to feel love to Him, and a good degree of resignation to his holy will, with feelings of strong interest in the improvement of the Indians, both in spiritual and temporal things, and it seemed as if I had language to express my feelings.

(To be continued.)

The Cave of Machpelah.

The object of greatest interest in the Mosque at Hebron, is concealed beneath its pavement. It is "the double cave," or *Machpelah*, the oldest known burial-place in the world. Here the three patriarchs and their wives (except Rachel, who is buried beneath a little white mosque near Bethlehem) sleep. Joseph's body, too, is said to have been removed thither from Shechem, near Jacob's well, where his tomb is still shown. There never has been any doubt about the identity of the spot. Such caves are as everlasting as the hills to which they belong. The story of Machpelah is singularly touching. With what solemnity and carefulness did father Abraham acquire this his only property in the Holy Land from his heathen friend Ephron, and make it sure for ever by that first legal contract recorded in history. (Gen. xxiii. 3-20.) The scene comes back to us in all its circumstantial details, as Dr. Thomson shows so graphically from his own experience of bargaining among the Orientals of the present day. How simple and impressive is the record of the successive interments of the patriarchal families, and the burial of enemies between brothers over the graves of their fathers: first Sarah was buried (Gen. xxiii. 19), then Abraham by Isaac and Ishmael (xxv. 9, 10), then Isaac by his sons Esau and Jacob (xxv. 27-29); and last we read the dying request of Jacob in Egypt: "And he charged them and said unto them, I am to be gathered unto my people: bury me with my fathers in the cave that is in the field of Ephron the Hittite for a possession of a burial-place. There they buried Abraham and Sarah his wife; there they buried Isaac and Rebekah his wife; and there I buried Leah." xlix. 29-31.

From the time of its permanent Mussulman occupation in 1187 to 1862, the mosque was most jealously closed to all but Mohammedans, and the Machpelah is closed still. Previous to that year we had but three brief and confused accounts of stealthy visits, especially by a Spanish renegade, Ali Bey. Even the Mosque of Omar and the Mosque of Damascus were opened to foreigners before that of Hebron. At last, by a special firman of the Sultan, and after a great deal of trouble, the Prince

of Wales was admitted to the interior in January, 1862, the Marquis of Bute in 1866, at the crown prince of Prussia in 1869.

Dean Stanley, who, together with the Prussian Consul, Dr. Rosen, a learned archaeologist accompanied the Prince of Wales, has given us a very interesting account of this visit. From it we learn that the patriarchs and the wives have separate shrines, enclosed with graves or railings, but they are empty cenotaphs or monuments in honor of the dead who lie beneath. The shrines of Abraham and Jacob were shown to the visitors, but not those of their wives. When the gate to the shrine of Abraham was thrown open, the guardians groaned aloud, and their chief remarked, "The princes of any other nation should have passed over my dead body some time enter. But to the eldest son of Queen Victoria we are willing to accord even this privilege." Then he offered an ejaculatory prayer to Abraham: "O friend of God, forgive this intrusion." Isaac's shrine they were not permitted to enter, for the singular reason that while Abraham, who interceded for the wicked inhabitants of Sodom and Gomorrah, was full of kindness and would overlook an affront, Isaac was proverbially jealous, and might resent the insult.

The most sacred and interesting part of the mosque, the dark subterranean cave itself, which contains the remains of the patriarchs, was closed to the distinguished visitors, and could only be seen through a small hole in the pavement. It is uncertain whether even the Moslems enter the Machpelah. Once, they say, twenty-five hundred years ago, a servant of a great king entered, but returned "blind, deaf, withered, and crippled." Since then the entrance was closed, and only the aperture left open, that the holy air may come up and a lamp be let down by a chain upon the grave.—P. Schaff.

Infidelity and Crime.—We believe it to be susceptible of demonstration that the late extraordinary and deplorable increase of crime, an increase more palpable every day, crowding with its record the columns of the public prints and sickening the soul with its endless detail and novelty of horror, is largely due to the growth of materialism, or what is termed infidelity, and that mainly in reaction from the skeptical drift of the time lies the path of wholesome reform. The fruit of unbelief among the upper or wealthy classes is sensuality. Those classes get to worship instead of their Maker the pleasures of the moment. They bow down to rich food and fine clothes and overrating amusements. They make goddesses of women who possess mere physical beauty. Their hearts are set on yachts, and race-courses, and theatres, and operas. What is given, in a word, to gild or soften life, to lend grace and sparkle, and color to the plod and monotony of existence, such persons make its sole object and aim. Thus they become of the earth earthy, and all that is spiritual and exalted dries out of their souls. One after another the commandments are broken as they stand in the way of desire, and a shameful ruin is left at last in place of what might have been a perfect temple; a shattered and sated voluptuary in place of a nobly perfected human being.

Among the poorer and less educated ranks of society the cant and poison of living only for the day is even more directly disastrous.

he rich can gratify their passions without a rule and in the legal sense, coming in conflict with the rights of others. But the wretched, unrestrained by any fear of future account, and thinking only to eat and drink day-to-morrow they die, drive straight on to crime. That this is no idle assertion can be abundantly proved. A careful survey of the murders, suicides, and other great felonies committed in the chief cities of the United States during the last ten years, shows that a heavy fraction of the perpetrators were heists or free thinkers. These unhappy persons, persuaded that life is the be-all and the end-all here, imagine that in their calculations they can jump the life to come. A collection of the letters or other papers left by criminals before anticipating death, shows a fearful number of instances, some of which many readers will recall, of absolute disbelief in the existence of a God or in any reckoning for wrong one in this life to be exacted in a future one. —*Evening Post.*

Letter of Isaac Pennington.

To the friend of Francis Finckes: Friend.—After some deep exercise of spirit concerning thee, under great grief of heart for thee, I felt a constraint of love, forcing these following considerations from me, to lay before thee.

As for William Penn, thou didst not make mention of him to me in thy former letter. And as to thy charge upon him, that he denies the "Trinity," redemption by Christ's blood, and imputed righteousness, thou mayest read his apology touching those things, which it is just thou shouldst seriously weigh, as in God's sight; and then perhaps thou wilt not so resolutely charge him as now thou dost.

Christ is made unto us righteousness, by faith in his blood, and by faith in his Spirit; and he that doth not believe in his Spirit, and receives not instruction and help from his Spirit to believe, cannot believe aright in his blood. All that is of Christ is righteous; all that is of Christ, the righteous and holy root, is righteous and holy, wherever it is found. And by Christ, that which is truly holy and righteous is brought up in us, and we forgiven and washed from our sins and iniquities for his name's sake. And the receiving of the pardon of sins is precious, and the bringing forth in the new life is precious also.

I am satisfied in God's Spirit, that that which I have written in the last I sent to thee, is the sum and substance of true religion; the sum and substance whereof doth not stand in getting a notion of Christ's righteousness, but in feeling the power of the endless life, receiving the power, and being changed by the power. And where Christ is, there is his righteousness. He that hath the Son hath life and righteousness; but he that hath not the Son hath not life nor righteousness. And where Christ is not, there is not his righteousness; but only a notion thereof, from apprehensions formed out of the Scriptures by man's wisdom, which should be destroyed. I would not have thy knowledge here, nor thy standing here, nor thy faith here; but in the truth and life itself.

Christ was anointed and sent of God, a Saviour, to destroy the works of the devil, to break down all rule and authority contrary to God in man; for his work is in the heart. There He quickens, there He raiseth, there He brings into death that which is to die, raising the seed immortal, and bringing the

creature into subjection to it. Now, to feel the power that doth this, and to feel this wrought by the power, this is far beyond all talk about justification and righteousness. Either would I have thee come, out of the talk, out of the outwardness of knowledge, into the thing itself, and into the truthness of the new and living knowledge, which is witnessed here.

There is a power in Christ to mortify and overcome sin in the very root; it is not however overcome, but in the revealing of this power; nor is the soul justified, but in and by the working of this power. So that justification is not the first thing, but the power of life, in and through which (revealed in Christ) the soul is both justified and sanctified, through the working of the faith, which is from the power. And here salvation is felt right indeed, to those that truly fear the Lord; and glory dwells in the land which He hath redeemed. There, mercy and truth do indeed meet together, and righteousness and peace kiss each other. Yea, truth, there, springs out of the earth, and righteousness looks down from heaven, &c. And here, the heavenly place in Christ is sat down in, towards which is the travel of the disciple. For saith Christ to his disciples, "I go to prepare a place," and "I will come again," and translate you thither. But the disciples do not come to this place before their travel, or before any works of righteousness which God hath wrought in them.

Therefore he that will be justified by Him must abide in the faith, where the justification is. The Father justifies what is of his own life in the Son, and the Son in his life; and the Son justifies what is of the Father in us (what is of the Father's nature, the Father's spirit, the Father's life), and justifies us from that, by his blood, from which we cannot otherwise be justified. Oh, how precious it is, to see and feel this in the true light, where the blood of Christ cleanseth from all sin! Here is no covenant for us of ourselves to perform; but the true self-denial is witnessed, wherein the covenant is performed, and Christ the life, Christ the power, Christ the righteousness and wisdom of God, working all in us; and we gathered into Him, and living and working in Him, by the faith which is of Him. And here is *free will* indeed, even of the will which was bound and captivated before. And here is the election known, which obtains; and the obedience and sufferings of Christ, not looked upon as superfluous, but highly prized, and looked upon as of inestimable value.

Do we cry up works against the workman? man's grace and righteousness against God's? conformity to Christ against Christ? or make a Christ, a righteousness, a Saviour of our conformity? Oh! how wilt thou do, when God shall plead with thee for these things! Also that charge of thine on us, that we deny the person of Christ, and make Him nothing but a light or notion, a principle in the heart of man, is very unjust and untrue; for we own that appearance of Him in his body of flesh, his sufferings and death, and his sitting at the Father's right hand in glory; but then we affirm, that there is no true knowledge of Him, or union with Him, but in the seed or principle of his life in the heart; and that therein He appears, subdues sin, and reigns over it, in those that understand and submit to the teaching and government of his Spirit.

But we cannot set the manhood above the life, and make that the main or chief in the work of redemption, and the life and Spirit of his Godhead but supporting, enabling, and carrying Him up in that great undertaking.

(To be concluded.)

A Cincinnati Newsboy.

John King, of Cincinnati, who has recently presented a valuable collection of books to the Cincinnati Public Library, is a remarkable example of what may be accomplished even under unfavorable surroundings, when strong determination and untiring perseverance are combined to effect a purpose.

The *Lyley* states that he was a farmer's son, in Michigan. While still a lad a kick from a horse on the left thigh crippled him for life. For years he hobbled about on crutches, until an accident to his other knee put him in bed for five years. It was then that he developed a passion for reading, devouring whatever books came in his way, and, as there were but few that did come in his neighborhood, the purpose of his life to own them himself grew out of his long suffering and deprivation of those five years.

Growing stronger, and with no other capital than his crutches, he went to Cincinnati and got some work in a tobacco factory. He was only able to do such work there as is done by children, and the utmost that he could make by all his industry was three dollars a week. Even this little was broken in upon when he was taken down with small-pox and sent to a hospital for six months. Finally he concluded that he could make more money as a newsboy, and began to sell papers. Whenever he saw a book that he thought valuable, and was to be had cheap at a book stall, he bought it, and either read it, in his leisure hours, or stored it away for the time when he should have his own little home and his books on their shelves.

Some of his savings went in speculation. He put some capital, \$50, into a broom-making machine, which, it was claimed, could be operated at a handsome profit. In a short time, however, the firm failed for \$150, and poor King went to work to pay off his partner's indebtedness, as well as his own, in time settling up all claims. By another venture, subsequently, he lost \$600, half the savings of ten years. All this time, however, the book buying went on.

Recently a fire in the old building in which he lives put his precious books in danger, and changed his plans. He had intended to give his collection to the Public Library after his death, but, concluding that another time the building might burn down entirely, with all his books in it, he wrote a modest note to the librarian asking him to find space for a thousand volumes. When his boxes and shelves came to number over 2500 books. In fact, the furniture of his room was altogether books, excepting a small bed, a stand and a stove. About two hundred favorite volumes over and above the twenty-five hundred, he reserved for his own use, and began the next day to tell others, meaning that the collection should go on until death.

John King is a secretary of the Newsboys' Union. He stands at his corner selling papers, crutch in hand, from five o'clock to eight every morning, and from four to six each afternoon. He lived for years on the fixed

sum of twenty-five cents a day, resolving not to go beyond it. He says he thought the matter over and concluded that "it made no difference whether I spent it or saved part, my living would be what most people would term wretched. I determined to save something, no difference how little, every day, until I had enough to keep me." And, although he has not arrived at the goal of his financial ambition, which is "an income of a dollar a day" to retire on, he has managed to get much good and do good out of his other investment in books.

For "The Friend,"

Letters of James Emlen.

(Continued from page 206.)

"9th mo. 1855. * * * I am not surprised to find thou felt so much for that dear child; I felt as though I would gladly take her in and give her a home amongst congenial Friends; but had my doubts about her situation being really bettered, in best things, by being here. I felt about her much as thou expressed; as though the Good Hand was leading her about and instructing her, and I thought it very possible it might be best that she should remain under the same special care, until the way opened with clearness for her to leave. I acknowledge that the thought of her going to Westtown and being under the tender care and notice of some of the dear Friends who reside there and who visit there occasionally, did feel pleasant, and I encouraged both her and her mother to visit the school and see how it felt. * * * I remembered what a most agreeable asylum Westtown became to my dear companion, when under great affliction and bereavement, and such I know it has been to others beside her. It is a place where one may profitably enter as a teacher and scholar at the same time.

"We had W. and E. Evans with us a few days very acceptably.

"I have thought a great deal about —, in this his first engagement. P. Passmore has gone with him. It seems to be a great thing to discern the true Shepherd's voice when there are so many voices claiming to be his. I do not doubt thou feels it so. * * * I can but desire that the enemy of our Society and of all religion, may yet be thwarted in his aims to shipwreck us wholly. * * * I feel a hope that I may adopt the language used by some, 'faint, yet pursuing.' Didst thou say any thing to —, to encourage her remaining as she is till the right time is seen for her release; 'He that believeth, maketh not haste.' She may have an important service in that land of captivity. 'His reward is with Him and his work before Him.' A succession of fruitful seasons may follow the years of patience and hope. * * *

"It was always a pleasant circumstance to me to visit in —'s family, and has continued to be so since the members thereof have been separated. Quietness and inwardness of spirit is an example much needed in these days. * * * The years of plenty are past, but they have had their service, and the years of famine may be needed that Joseph be made governor over all the land of Egypt."

"Speaking of one of his little grandsons—who lives out West where there was no meeting of Friends to attend—requesting his mother "to sit down with him and let them hold a quiet little meeting." One present

leaving the room he remarked, "Oh, is it not too bad!" Such a little incident seems to show the value of silent waiting, and how possible it is for very young children to learn something in this most excellent school. He takes them in his arms and blesses them.

For "The Friend,"

The following lines appeared in this Journal some years ago; but at the suggestion of a friend, they are re-copied for it; feeling them to be much more fitting for some of us, than they were for the pure spirit of their author—who was removed by death within the year which followed their publication.

EVENING SORROW.

I am mourning to-night for a day that is gone,
That no future time can recall,
A prize beyond value, so lately my own,
But ah, I have squandered it all!

'Tis not that I've idled my time all away,
I've tried to be diligent still;
At the work that was needful I've labored to-day
With a cheerful and earnest good will.

I've been faithful to all that could claim me below,
But Oh! to our Father above,
Cloaked up with the weeds, very heavy and slow,
Has been the sweet current of Love.

When I rose with the lark in the rosy-hued morn,
I forgot the Creator of light;
When I saw the dew glistening on the grass and the corn,
I forgot who had given me sight.

And all through the day, I've accepted the gifts,
That round me so plentiful fall,
But not with a heart that in gratitude lifts
All praise to the Giver of all.

And in my own heart I've not hearkened to hear
The voice that would warn me of ill;
Neglecting the Saviour so graciously near,
And now, will He bear with me still?

Forgive me, dear Saviour, in sorrow I pray,
And strengthen my heart with Thy love,
To love Thee, look to Thee, and walk in the way
That leads to Thy presence above!

MARY K. PASSMORE.

Tenth mo. 27th, 1856.

OVER AND OVER AGAIN.

Selected.

Over and over again,
No matter which way I turn,
I always find in the book of life,
Some lesson I have to learn.
I must take my turn at the mill,
I must grind out the golden grain,
I must work at my task with resolute will,
Over and over again.

We cannot measure the need
Of even the finest flower,
Nor check the flow of the golden sands
That run through a single hour;
But the morning dews must fall;
And the sun and the summer rain
Must do their part, and perform it all
Over and over again.

Over and over again,
The brook through the meadow flows,
All over and over again
The ponderous mill-wheel goes;
Once doing will not suffice,
Though doing be not in vain;
And a blessing falling us once or twice,
May come if we try again.

The path that has once been trod,
Is never so rough to the feet,
And the lesson we once have learned,
Is never so hard to repeat.
Though sorrowful tears must fall,
And the heart to its depths be riven,
With sorrow and tempest we need them all
To render us meet for heaven.

THE CORN AND THE LILIES.

Selected.

Said the Corn to the Lilies:
"Press not near my feet.
You are only idlers,
Neither Corn nor Wheat.
Does one earn a living
Just by being sweet?"

Naught answered the Lilies,
Neither yea nor nay,
Only they grew sweeter
All the livelong day.
And at last the Teacher
Chanced to come that way.

While his tired disciples
Rested at his feet,
And the proud Corn rustled
Bidding them to eat,
"Children," said the Teacher,
"The Life is more than meat.

"Consider the Lilies,
How beautiful they grow!
Never king had such glory,
Yet he toil and sorrow."
Oh, happy were the Lilies
That He loved them so!

E. A. BRADDOCK.

A Child Saved.—Some years ago a Pacific steamer took fire. The burning vessel was headed for the shore, which was not far distant. The only thought of the passengers was self-preservation. One man, who was returning from California with a treasure of gold, the result of years of toil and sacrifice, had just buckled his belt containing his gold around him, and was preparing to leap into the water and swim to the shore, when he was addressed by a little girl:

"Sir, can you swim?" said she.
"Yes, my child," responded the man.
"And won't you please, sir, save me?"
The request sent a thrill to his heart. He knew he could not save the child and his gold, too. One or both must be lost. It was a question to be decided in a moment—a question which involved the saving of a life or the loss of the savings of his life. It was an instantaneous but mighty struggle. Yet manhood, humanity, self-sacrifice conquered. He unbuckled his belt. He cast his gold aside. He took the little child in his arms and plunged into the water. A child was saved, but the gold was lost.—Selected.

War.—Will the rulers of the earth, and they that promote wars never lift up the veil which conceals the amount of misery and unhappiness they bring on themselves, and entail on their posterity, by bowing down and worshipping the frightful idol of war! Will they never think of these things? The career of even the most successful conqueror ought to be deeply deplored, for lowering the tone of a nation's morality, which years of patient teaching will hardly rectify, and causing a drain on its resources which an age of prosperity will scarcely redeem. And though sovereigns unite to entwine the laurels for his brow—though senators applaud him in strains of the highest eloquence—though priests extol his virtues to the very heavens, and the infatuated multitude hail him as a demigod—the inscription, *Here lies a man of Blood*, should be deeply engraven on the warrior's tomb.

The root of religion is the fear of God; the rule of religion is the law of God; the motive of religion is the love of God; the end of religion is to glorify God and enjoy him forever.

Religions Items, &c.

Women's Preaching.—Among the evidences increasing light in the Christian world as to the right of woman as well as man to enter into the work of the ministry, when called to by the Head of the Church, we find the "Tinker organ" (*The Primitive Christian*), argument on this subject by one of its able correspondents. This writer refers to the prophetess, who sang a song of triumph to the Lord because He had rescued the Israelites from the Egyptian host—to Deborah, who raised the voice of thanksgiving; for deliverance from the oppression of the Canaanites—to Hannah and to Huldah the prophetess, whom King Josiah consulted in a time of the ancient Jews. She speaks of a prophecy of Joel, that in the Gospel dispensation, "your sons and your daughters shall prophesy;"—of Anna who sang of Jesus to all them that looked for redemption in Jerusalem;—and of Christ's command to Mary, "Go to my brethren and say unto them, I go unto my Father and unto your Father, and to my God and to your God." The language of Paul, "Let your women keep silence in the churches," she compares with his canon (rendered necessary by the customs of the time), against uncovering the heads of women when they pray or prophesy, with his references in the Epistle to the Philippians to those women which labored with me in the Gospel, and with his commendation of Priscilla as one of his "helpers in Christ Jesus." He indeed "expounded unto Apollos the way of God more perfectly." From these premises he draws the sound conclusion that the apostle Paul did not design to prohibit women from preaching the Gospel.

Long Prayers.—*The Primitive Christian*, in commenting on this subject, thinks it advisable "always stop when done." If this rule was rigidly adhered to we would have but few long prayers.

Female orphans of India.—*The Christian Advocate* (Methodist) publishes an interesting letter from an East Indian correspondent describing the efforts used by himself and others to care for some of the neglected children whose parents perished in the famine of 1876-78. In the Tairi month of this year, being numbers of them along the line of the railway, "naked, sore, scabby, dirty, corpse-like beings, and yet alive," a statement of their condition was made through the "*Guardian*," with an intimation of a willingness to take care of them, if the means were furnished. As money came in the children were gathered together, twenty at first, and by 4th mo. 23d, fifty had been taken care of at Goalpurga. As each body of recruits was received the facts were published in the "*Guardian*," and the responses were so liberal, that when the letter was written (6th mo. 4th), those having charge of the movement were erecting permanent bungalows to accommodate 600 children.

The Influence of Tracts.—A Japanese evangelist, Joseph Neshima by name, who is now doing a noble work among his countrymen, found, when a boy, two tracts—one about America, the other on Christianity. On reading these he was filled with the desire to go to America and become a Christian. This was at a period when any native caught leaving Japan was put to death. The Japanese boy, undeterred by the danger, secreted himself on a vessel and escaped to China, and

from thence to Boston. He was educated at Amherst College, and on his return to his native land was offered a lucrative position as interpreter. This he declined in order to preach the gospel.

The pastor of a Methodist church in Florence, Italy, writes that Count Andre de la Ville, a poet of merit and a man of great learning and a prelate of the Pontifical Court, has abjured Catholicism and joined the Italian Methodist Episcopal Church. He is an astronomer of some note.

Truth-Teller is the name of a Sioux Indian recently convinced of Christianity in Dakota Territory under the teachings of Bishop Hare, of the Protestant Episcopal Church. The bishop assures the *Evening Post* that the following account is strictly correct: "Upon the occasion of the bishop's visit, and at one of his councils with the Indians, who had gathered to hear the great spirit man talk, Truth-Teller, who was present, suddenly arose in the midst of the people and advanced to the front, shook hands with the bishop, and then, stepping back a few feet and drawing himself up to his full height, in a clear, ringing voice, which at once indicated the deep earnestness and bravery of the man, he declared his purpose to abandon all Indian ways and to adopt those of the white man—to give up all heathen rites and ceremonies, and worship only the God of civilization; and then, to attest his sincerity, took from a scalp-lock a war eagle feather—that ensign of bravery and of many years of savagery—and handing it over to the bishop, said: 'I give to you this war eagle feather; take it, and keep it in remembrance of the words of Truth-Teller; and then, with an eloquent impressiveness that touched my heart as it never was touched before, he presented the bishop with the drum of the Order of the Grass Dance, and continued, 'I part with the feather and the drum, and all Indian ways forever, and with them give to you my body and my soul!'"

The Bronze Doors of Nineveh.

A writer in *The Christian Advocate* informs of a remarkable discovery recently made by Hormuzd Rassam among the ruins at Nineveh. He was engaged excavating at Balawat, about nine miles northeast of Nimrud, where he uncovered a pair of enormous folding doors, twenty-two feet in height and sixteen feet wide. They belonged to the palace of Imgruz Bell, and are of extraordinary workmanship. They were of cedar wood, covered with bronze plates nailed horizontally across each leaf of the gates, one end being turned round the posts upon which the doors revolved. They exhibit in double bands, each six inches broad, a complete pictorial record of the historical events of the first nine years of the reign of Salmanneser II., who lived 820 years B. C., and whose invasions into the Holy Land are recorded in 2 Kings, xvii, 3-6, and xviii, 9-12. He was a mighty warrior, and during the twenty-seven years of his reign he led in person twenty-three expeditions, and traversed the entire country between the Persian Gulf and Mount Nipates, and between the Zagros Mountains and the Mediterranean. On these bronze doors are represented, in beautiful relief, the king with his army on the march, his battles, sieges, triumphal processions, containing hundreds of figures; the torture of prisoners, captives bearing presents to the king, and inscriptions

recording and explaining the events depicted. This is certainly a remarkable discovery. No similar monument has before been discovered, and no representation of such a kind is to be found on the sculptures brought from Ancient Assyria. Hence its great value cannot be overestimated to the antiquary, philologist, and ethnologist.

Earlier discoveries had assured us that the Assyrians were the equals of the Chinese in ivory work, of the Venetians in beautiful colored glass-ware, of the Jews in rich embroidery, and of the Japanese in small specimens of bronze. And it is also well-known that in their marvelous bas-reliefs they excelled all other nations. On the alabaster walls of the royal palaces, the Assyrian artist sculptured in relief flowing rivers abounding in fish, mountains covered with trees, foreign lands wherein victories were achieved, walled cities which had been stormed, triumphal processions with long lines of captives, hunting scenes on land and water, curious animals and rare flowers, men and women, and the annals of the empire. But this elaborate and extensive bronze-work is a new feature of that old civilization.

So highly valued is this unique specimen of Assyrian art, that, after careful cleansing and reconstruction, it will be reproduced in a series of plates, under the superintendence of Samuel Birch, keeper of the Oriental Department of the British Museum.

A Cure for Slander.—The following very homely, but singularly instructive lesson is by St. Ph lip Neri:

A lady presented herself to him one day, accusing herself of being given to slander. "Do you frequently fall into this fault?" inquired he. "Yes, father, very often," replied the penitent. "My dear child," said Philip, "your fault is great, but the mercy of God is still greater; for your penance, do as follows: Go to the nearest market, and purchase a chicken just killed, and still covered with feathers; you will then walk to a certain distance, plucking the bird as you go along; your walk finished, you will return to me." Accordingly she repaired to the market, plucked the fowl and set out on the journey, plucking it as she went along, as she had been ordered to do.

In a short time she returned, anxious to tell of her exactness in accomplishing her penance, and desiring to receive some explanation of one so singular.

"Ah," said Philip, "you have been very faithful to the first part of my orders; now do the second part, and you will be cured. Retrace your steps; pass through all the places you have traversed, and gather up, one by one, all the feathers that you have scattered." "But, father," exclaimed the poor woman, "that is impossible. I cast the feathers carelessly on every side; how can I recover them in every direction; how can I recover them?" "Well, my child," replied he, "so it is with your words of slander; like the feathers which the wind has scattered, they have been wafted in many directions; call them back now, if you can. Go sin no more."

Southern Violence.—*The Methodist Advocate*, of Atlanta, Georgia, publishes a long series of outrageous acts of violence and murder committed on ministers of the Methodist Episcopal Church, since the close of the war, in various Southern States, from South Carolina

to Arkansas. The motive in most or all of these cases is supposed to arise from opposition to their Church relations or political influence. In connection with this subject, it prints a letter from A. S. Lakin, the Presiding Elder of one of the Alabama Districts, detailing a conversation with one of the officers of their church who had formerly been in connection with the Kuklax Klan, which says that one dark night, the clan dragged a bayou on the Chattahoochee River, in Alabama, and brought up sixteen dead bodies of persons whom they had murdered and thrown into the water. These were buried for fear they might rise and betray their murderers.

Natural History, Science, &c.

The Boring Sponge.—In 1871 a vessel laden with marble was sunk in Long Island Sound, and according to Professor Verrill, the boring sponge has penetrated the exposed parts of the blocks for a depth of two or three inches from the surface. The canals or tunnels in a specimen of this marble vary from one-fourth to an hundredth of an inch and less in diameter; and are coated within with a thin film of dried flesh of a brown color, which was orange-colored in life. The needle-shaped spicules are plainly visible under a one-fifth inch lens, and are siliceous. The specimen shows, in what appears to have been the inner portion of the block, a series of large branching canals which connect freely with each other in the most irregular way imaginable.

Bowerbank mentions an affiliated species which is parasitic on a sea-weed, boring or dissolving away the soft parts and allowing the harder fibrous structures to remain as a means of support.

Dr. Schmidt observes that a large portion of the coasts of the Mediterranean and Adriatic Seas is composed of calcareous material which, from its tendency to become eroded, has a broken, jagged aspect, giving it a peculiar and often attractive appearance. Of such broken, Dalmatian coast, one can certainly measure off some thousands of miles of strand, and where it does not descend too abruptly, large and small stones and fragments of rocks cover the ground. One can scarcely pick up one of these billions of stones without finding it more or less perforated with holes and eroded by Cliona (boring sponge), often to such a degree that the spongy remains of the apparently solid stone may be crushed by the hand.

The mode of distribution and extension of the sponge indicate that a process of chemical solution is the real agent at work in erosion. Of the exact constitution of this corrosive fluid, we, however, as yet know nothing. The importance of the boring sponge in helping to effect the re-distribution of matter, does not consist in comminuting the stone into particles, but in dissolving it as sugar is dissolved in a glass of water, and mingling it with the sea-water in this dissolved condition. Out of this solution the innumerable shell-fish take the mineral materials which mingle with their blood, and from which they are deposited as new layers on the shell, which, when the animal dies, either is also finally re-dissolved by the sponge, or falls to the bottom of the sea as a contribution to the earth's strata of future eons.

Dr. Leidy observes in regard to the agency of this organism in disintegrating the shells of dead mollusks, that an extensive bed of oysters which had been planted by Thomas

Basley at Great Egg Harbor, had been subsequently destroyed by an accumulation of mud. The shells of the dead oysters, which were of large size and in great number, in the course of two years were so completely riddled by the boring Cliona, that they could be crushed with the utmost ease, whereas without the agency of this sponge the dead shells might have remained in their soft muddy bed devoid of sand and pebbles, undecomposed perhaps for a century.

In a specimen of the common oyster recently examined, the substance of the shell was thoroughly cavernated, so as to render it extremely brittle and readily crushed; in fact the inner table of the shell standing showed a great number of elevations within where the intruding parasite had been kept out by the oyster, which had deposited new layers of calcareous matter at these places, so as to give rise to the elevations spoken of.

Evidence of the presence of the boring sponge may very frequently be noticed in shells of oysters brought to the markets, though it often appears as if the parasite had left its work incomplete, being killed on its post.—*Am. Nat.*

Controlling Horses by Means of Electricity.—The General Omnibus Company of Paris has for some time past made use of electricity for subduing vicious horses. By the process adopted intractable animals given to biting, kicking, rearing, &c., are rendered inoffensive, and submit peacefully to be groomed and harnessed. To obtain this result a weak current of electricity is passed into the mouth of the horse, each time it becomes restive. The will of the animal seems almost annihilated. The current is produced by a small induction machine, the wires of which communicate with the bit of the bridle.—*Leisure Hour.*

An incident interesting to students of natural history occurred a few days ago at a residence. In front of the house a small tree is growing, in which an oriole some time ago took up its abode, building a nest, and evincing an intention to raise a family. The owner of the house has a spaniel, over which he has shot innumerable game birds within a few years past. From the time the oriole began to build its nest, it exhibited a marked antipathy to the dog, flying at him boldly whenever he came in front of the house, and pecking him until he retired from the field. This occurred several times, the bird always coming off victorious. Of late the oriole has shown more objection than common to the dog, perhaps because there are now some young ones in the nest. One day the unhappy spaniel came out to lie on the front steps, but was not allowed to enjoy his rest unbroken: for back, flapped his wings in his eyes, and made it so uncomfortable for him that the dog ran into the house. But his trouble did not end there, for the bird went into the house after him, beating him continually.

The *Tulahassee Floridian*, of a recent date, says: "We are informed that a gentleman residing in Wakulla County, by the name of Cox, who is cultivating a small farm, upon arising one morning last week was surprised to find that during the night his residence had been changed from a region where water could not be seen to the border of a lake. When he retired the evening before his house was far away from any pond, lake, or river, but upon going out next morning, instead of

his garden, an immense sink, fifty or six yards square, filled with water, running within eighteen or twenty feet of his residence, met his gaze. During the night transformation occurred, leaving not even a vestige of the tallest pine trees, which were standing in their full majesty only two hours before. These sinks, however, are not infrequent in that county. It has only been a short time since that a sink occurred near Lavender's Mill, more remarkable than one alluded to above, in that it occurred upon the very top of a hill—one of the highest points of land in that county.

A revenue officer in Binghamton, N. Y. has been severely poisoned about his face and hands by revenue stamps. One day when the weather was very hot, and he was perspiring freely, he stamped and cancelled the stamps on a large number of cigar-boxes. Green dust flew from the stamps and covered his hands and wrists, and a handkerchief used by him for wiping his face and neck also became filled with the dust. The result was severe and deep poisoning wherever the dust touched.

A barn swallow has built its nest under the guard of the steamer *Mary Powell*, and ridden daily between Poughkeepsie and New York.

Camels.—A herd of camels was driven here from Nevada, says the *Yuma Sentinel*, nearly two years ago. Finding no profitable work for them, their owners turned them loose along the Gila to the eastward of Yuma. There they have been living and breeding, looking fat and sleek all the time. For while they were in danger of extermination when they were put in an appearance along the wagon road they frightened mules and horses beyond the control of the drivers. They soon earned the hatred of teamsters some of whom acquired a habit of shooting camels at sight. Since, however, the railroad has been delivering freight at Adoude, the road along the Gila has been comparatively abandoned by teamsters.—*Am. Naturalist.*

Diamonds.—The district of Shantung in China, contains diamond deposits, but the stones in which the diamonds are found are generally very small—rarely the size of a pea. The following singular artifice is resorted to by the Chinese to obtain them. Men wearing large and thick boots made of straw walk in the sand of the valleys and water-courses. The diamonds, generally rugose and angular in form, penetrate into the straw and remain fixed there. Afterwards the boots are collected and burned, and the precious stones are found among the ashes.—*Eng. Mechanic.*

Peculiar Honey.—In Ethiopia there is found in subterranean cavities (according to M. Villiers), a honey made without wax by an insect resembling a large mosquito. This honey is called *tazma*. The natives use it to cure throat disease. The composition is like that of ordinary honey, but it differs in the absence of cane sugar.—*Am. Naturalist.*

The Axolotl.—The axolotl is a lizard-like animal that inhabits a shallow salt lake in Mexico. It uses its gills in breathing. Sometimes it comes out on dry land, making use of its lungs and trying to catch worms for food. It is said occasionally to cast its gills and become a permanent resident of the land, though this is not its usual habit. *Chambers' Journal* quotes from Dr. Wilson's *Leisure Hour Studies* the experiments of Fraulein Marie von Chauvin. She succeeded by dint of care

patience in enticing five specimens from native waters by gradually inuring them to terrestrial existence. The animals were highly refractory as far as their feeding was concerned; but their objections to diet when their experiment was overcome by the ingenious method of thrusting a live worm into the mouth; whilst by pinching the tail of the worm, it was made to wriggle so far into the amphibian's throat, that the animal was compelled to swallow the morsel. Of five subjects on which the patience of Aulein von Chauvin was exercised, three died, after a life of nearly fifty days on land, the period of their death, however, their fins and tail-fins were much reduced as compared with the normal state of these organs. The two surviving axolotls, however, behaved the most satisfactory manner. Gills and tail-fins grew small, apparently by an actual process of drying and shrivelling through contact with the outer air. The animals pulsed or shed their skins several times; finally, as time passed, the gills and tail wholly disappeared; the gill-opening became closed; the flattened tail of the axolotls was replaced by a rounded appendage; the eyes became large; and ultimately, with the development of a beautiful brownish-black hue and gloss on the skin, varied with yellow spots on the under parts, the axolotls assumed the form and guise of a land newt.

Curious Astronomical Error.—Otto Struve, astronomer at the Imperial Observatory of St. Petersburg, has discovered that in all his observations of stars carried on during thirty years there is a systematic error. He has ascertained the amount of error by measurements of artificial stars, and can therefore make necessary corrections to his long series of observations. He supposes the error arises from certain peculiarities of the eyes.—*Chambers Journal.*

The Fibre of Nettle.—Attempts have been made from time to time to make use of the nettle, *Urtica utilis*, in spinning and weaving. The plant grows largely in India; but the difficulty of separating the fibre from the rough outer skin has hitherto prevented its introduction as an article of commerce. The Indian Government with a view to encourage invention, offered a prize of £5000 for an efficient nettle-fibre cleaning-machine.—*Chambers Journal.*

Climate for Consumptives.—A recent medical writer says, that consumptive people do not need the warm, damp, vapor-laden atmosphere of Cuba, and Florida, but the cool, dry, still air of high latitudes. A man in consumption will more certainly get well in Greenland than in the West Indies. Dr. Kane was invalid in the waters of the Gulf of Mexico, in summer. Many considered him doomed for consumption. In six months he was in Greenland, and after remaining there several years, exposed to all the rigors of the Arctic seas, he returned in better health than he had known for several years.

In connection with this subject we remember the remark made to us by a physician who practised in Susquehanna Co., Pa., on the high plateau of the head waters of the Delaware, that consumption was almost unknown there, and he believed never originated in that section; but that as soon as we descended into the valleys of the rivers, so as to come within the reach of the fogs that are

frequent in such situations, consumption made its appearance.

On the above article our medical critic makes the following criticism: "This, in the main, is undoubtedly correct. There are, of course, exceptions in individual cases. The air of the Adirondack mountain region of New York has proved of great value in many cases of pulmonary disease."

Summer-boarding.—In seeking a summer home, the *Journal of Health* recommends a quiet country place, where the women, without wounding their self-respect, can wear the plainest, loosest clothing they possess; be under no necessity to dress but once in twenty-four hours, when they first get up in the morning; and need nothing when they wish to go out of doors, but a sun-bonnet and a loose, light shawl. The shoes should have soles nearly half an inch thick, with cork lining inside.

One who can go out thus easily, "will be far more apt to take a turn round the farm, to go to the spring-house, to gather eggs in the barn, to feed the chickens, to go a berrying, to visit the orchard, to pick berries for desserts, to watch the dairy-maid, to go out to the harvest field and smell the new-mown hay, gather wild flowers, &c." It adds the advice to eat nothing except at the three regular meals of the day, and get all the sleep possible during the hours of darkness.

Letter from R. Shackleton to D. C.

Ballitore, 17th of 8th mo. 1775.

My Dear Cousin,—It is true there is an intellectual bemoaning and a looking the wrong way for help; but there is also a time and a season and a freedom in which we may unobtrusively, in some degree, to our intimate friends, and sometimes not unprofitably, deep calling unto deep. For my part, I know no better way, than diligently to keep up the watch unto prayer and to wait in simplicity for the operation of the Spirit of Truth to appear in its own way and manner, and do its present office according to the present occasion, for manifold is the grace of God. This, with a faithful, honest discharge of what we are made sensible to be our duty, is the way, and the only way, for us to gather strength, and get the better of our many infirmities, both of flesh and spirit; at least, I have so learned; I wish I could always practise. It may sometimes not be of much use any way to dwell too long and often on the contemplation of the degenerate state of our religious Society. When this view is brought before us in the vision of light, it is good; it is productive of humbling baptism, in sympathy with the oppressed seed, and of strong cries for its deliverance; but if we look at this declension with the eye of human wisdom only, we may be much deceived, and pierce ourselves with sorrows of our own making as well as heat ourselves with sparks of our own kindling. There may be many of the staff, who, when they are in due time brought forth, will appear taller, by the heat on their shoulders, in religious stature, than the generality of their brethren; and many goodly personages who are like eldest brothers and heirs-apparent in the family, yet are known by Him who sees the heart, to have forfeited the pre-eminence of their birth-right, and not to merit the rank which they are found to assume. Let us, my

beloved friend, make it our principal care and endeavor, to get a settlement in a quiet and still habitation, taking diligent heed to ourselves that our own hearts and hands be kept clean, and simply doing, according to the best ability afforded, that little portion of the great work which appears to be our proper business; so shall we witness that peace and tranquillity of mind which cannot be enjoyed but as our obedience keeps pace with knowledge, and be freed from a numberless train of disquietudes and perplexities, which ever attend a negligent or partial performance of our duties; growing from strength to strength, and increasing in the increase of good.

Certainly nothing is better than religion for use or ornament. If it be the will of the Great Dispenser of the cup of life to pour out many prosperous circumstances, religion preserves in the moderation and gives relish to the sweets; if trouble and adversity be mingled in a great degree, religion supports and comforts, sweetens the portion and makes it salutary.

Very affectionately thine, R. S.

Fashions in Phisic.—There are fashions in phisic, and the growth, decline and fall of certain remedial agents would furnish an interesting theme for an essayist with a taste for drugs and an aptitude for figures. Two French physicians, Drs. Lasegue and Regnault, have published some figures as the result of their partial research into the French hospital reports. Bromide of potassium a quarter of a century ago was very little employed; three thousand grammes [one gramme is about 15 grains], only were prescribed in 1855. A year after the consumption had risen to seven thousand grammes; in the neighborhood of that figure it remained stationary till 1864, when suddenly it bounded up to 22,300; in 1875 it reached 95,530; in 1896, 133,000; and so it went on till in 1875 it had attained a total of 730,910 grammes. Another very interesting array of statistics recites the grandeur and decadence of the leech. From 1820 to 1823 inclusive the sick sons and daughters of France in her hospitals furnished pasture to 180,000 leeches. In 1824 bleeding seems to have become more popular, for all at once the consumption of leeches rose to 457,000. It went on rapidly increasing till in 1834 the figure was 1,050,000, and in 1836 it reached 1,280,000. Till 1840 phlebotomy continued in frightful favor; then the demand for leeches decreased so rapidly that by 1844 the consumption was only 300,000; by 1855 it had reached the figures of a generation before—180,000—and half a generation later, in 1871, it was no more than 100,000. As leeches went out liquor came in. The consumption of alcohol in 1855 was 1270 litres; in 1860, 7836; in 1865, 19,951, and in 1870, 40,500, which figure has since been maintained. Brandy is not mentioned till 1862, when 4 litres were used; in 1863 the quantity was 133; in 1867 it was 1504; in 1868, 2826, and by 1875 it had risen to 5108 litres. A like increase is noted in the case of rum—from 35 litres in 1862 to 2458 in 1865 and 5682 in 1868—and the prescriptions of port, sherry, claret and other wines have gone on growing as rapidly and as steadily.—*Late Paper.*

We are to guard against refined error as well as open evil.

THE FRIEND.

EIGHTH MONTH 9, 1879.

In an editorial article published in our issue of 4th mo. 26th, were some extracts from a letter of Isaac Pennington, showing his belief in the divinity of our Saviour, and in the atoning efficacy of his offering for the sins of mankind.

We have recently received a letter from a Friend at a distance, suggesting the reprint of the entire letter from which those extracts were taken. Our readers will find that it bears a decided testimony to the fundamental truth so firmly upheld by the Society of Friends, that there is no salvation without receiving and being changed by the power of Christ inwardly revealed—knowing Him "to mortally and overcome sin in the very root."

As the same writer elsewhere says: "Let a man believe what he can concerning the blood of Christ, and apply to himself what promises he can, yet this will not do, (oh, how grievously do men mistake herein!) but he must feel somewhat from God, somewhat of the new creation in Christ Jesus, somewhat of his light (shining from Him, the Son, into the heart), somewhat of his life, somewhat of his power working against the darkness and power of the enemy in him."—*Works*, vol. 3, p. 378.

Again: "Christ did offer up the flesh and blood of that body (though not only so, for He poured out his soul, He poured out his life), a sacrifice or offering for sin, a sacrifice unto the Father, and in it tasted death for every man; and that it is upon consideration (and through God's acceptance of this sacrifice for sin), that the sins of believers are pardoned, that God might be just and the justifier of him who believeth in Jesus, or who is of the faith of Jesus."—*Id.* vol. 3, p. 372.

Here there is no unequal holding of the truth; no upholding of one part of the plan of salvation to the neglect or disavowal of the other. There is nothing to cherish the false hopes of those who look for salvation through the merits of a crucified Saviour, without yielding their hearts to his transforming, regenerating influence; and there is nothing to strengthen the opposite error of denying that the sufferings and death of Christ are effective in procuring forgiveness from God. It is true that salvation cannot be known except through the inward work of the Holy Spirit; and hence some, relying on their own reason, have been led to believe that nothing more is or can be necessary. To all such reasoners we commend the further declarations of Isaac Pennington, from whom we have been quoting:

"God himself, who knew what virtue was in the inward, yet hath pleased to make use of the outward; and who may contradict or slight his wisdom and counsel therein? Glorious was the appearance and manifestation of his Son in flesh; precious his subjection and holy obedience to the Father; his giving Himself up to death for sinners was of great esteem in his eye! It was a spotless sacrifice of great value, and effectual for the remission of sins; and I do acknowledge humbly unto the Lord the remission of my sins thereby, and bless the Lord for it; even for giving up his Son to death for us all, and giving all that believe in his name and power to partake of remission through Him."—*Id.* vol. 3, p. 380.

Much is included in the expression "Believe

in his name and power;" as here used, it implies a living faith, reliance and obedience, and comes from "the inward life and teachings of God's Spirit," by which, and I believe, "I am I taught and made able to value that glorious outward appearance and manifestation of the life and power of God in that heavenly flesh (as in my heart I have often called it), for the life so dwelt in it, that it was even one with it. Yet still it was a veil!"—*Id.* vol. 3, p. 375.

The 52nd volume of "The Friend" closes with the present number. Our subscribers are reminded that our terms are \$2.00 per annum, payable in advance, and 10 cents per postage, which is prepaid by our Agent for those copies sent by mail.

SUMMARY OF EVENTS.

UNITED STATES.—The Cashier of the Lawrence National Bank, Mass., has confessed to speculation in mining stocks with the funds of the bank, involving a loss to the bank of \$34,000. The loss has been made good by the directors, the cashier dismissed from office, and a warrant issued for his arrest.

A copy of a contract with a negro tenant of lands in Warren, Ohio, which was void on the ground of its being in violation of the laws of the State of Mississippi, throws some light on the causes of the emigration from the lower Southern States. The rent payable in cotton, is about \$10 per acre, and \$30 for the use of a mule. The supplies of provision and clothing are charged at about double the ordinary prices. Interest is charged on running accounts at 1½ per cent per month, &c. The effect of such exorbitant charges is almost necessarily to keep the tenant always in arrears. To this cause of discouragement, must be added the violence so often used to prevent the exercise by the freedmen of their political privileges.

The general business outlook of the country is favorable. The iron trade at Pittsburg is said to be very prosperous. The imports of dry goods at New York are increasing, showing an increased demand. The *St. Louis Journal of Commerce* publishes extracts from various parts of the West, which show "a large increase in business, rapid restoration of confidence among all classes, abundant crops, and general prosperity."

On First-day, 3d inst., the temperature at Fall River is reported to have reached 102½ degrees in the shade. In the neighborhood of this city, the thermometer registered about 35 deg.

The mortality here in New York during the past week was 636. The heat of the weather on Seventh day just produced many cases of sun-stroke.

The project of a ship canal through Florida is again agitated. The number of deaths in Philadelphia during last week was 329.

The War Department has information from the Northwest that all, or nearly all the hostile Sioux who crossed the border from Canada to hunt buffalo, have recrossed the line. It is believed by military authorities that these Indians had no intention, at any time, of provoking a conflict, and the report that Sitting Bull was engaged in the skirmish of the 7th ult. is entirely discredited.

Markets, &c.—U. S. bonds, 6's, 1881, 104½; 5's, 1881, 102½; 4½'s, 1891, 105; 4's, 1907, 102.

Cotton, 12 to 12½ cts. for middlings.

Petroleum, 55 to 56 cts. for crude in barrels.

Flour, extra family \$8.55 to \$9.00; patent and other high grades, \$8.75 to \$9.00.

Wheat, \$1.07 to \$1.09. Rye, 55 cts. for new. Corn, 44 to 49 cts. Oats, 33 to 38 cts.

Beef cattle, 33 to 35 cts. Sheep, 3 to 5 cts. Hogs, 51 to 6 cts. Cows from \$20 to \$30 each.

FOREIGN.—It is reported by telegram, that the steamer *Vesta*, with the Arctic explorer, Nordenskjöld, on board, has been freed from ice, and has safely passed Behring Strait.

A despatch to the *Times* from Port Darwin, dated 13th ult., says: King Cotyayoo, when leaving the battle-field of Ulundi, told his chiefs to look to their own safety, and to be satisfied with peace as best they could. He said that the nation is dispersed, and the king and his family are in the hands of the British.

divided into three or four separate principalities, under the rule of an independent noble. Cetywa brother of the king, will receive his own territory on this arrangement.

One hundred and thirty-seven deaths from yellow fever occurred in Havana last week. Since the beginning of the year the number has been 537, against for the same time last year.

RECEIPTS.

Received from George P. Stokes, N. J., \$2.10, v. 53; from James Willis, L. I., \$6, to No. 52, vol. 53; from Benjamin Gilbert, Reading, Pa., \$2.10, vol. 53, a. for Albert Cooper, Mary M. Price and Joshua Cooper, \$2.10 each, vol. 53; from Isaac Larrance, O., \$1.10, No. 27, vol. 53; from Charles Stokes, Agent, N. J., Josiah Allen, \$2.10, vol. 53; from Elias E. Paxson, N. J., Deborah Allen, \$2.10, vol. 53; from E. Rachel P. Park, L. I., \$2.10, vol. 53; from Margaret E. Lee and Lydia L. Pa., \$2.10 each, vol. 53; from David J. Brown, Gt. \$2, v. 53; from James Scarlett, Pa., \$2.10, vol. 53; from Isaac Leeds, N. J., \$2.10, vol. 53, and for Isa Powell Leeds, N. J., and Susa Powell, Pa., \$2.10 each, vol. 53; from Robert P. Gifford, R. I., \$2.10, vol. 53; from Joseph Scattergood, Agent, Pa., \$2.10, vol. 53; and for Jane W. Knight, Jane B. Davis, Rachel Woodward and John M. Sager, \$2.10 each, vol. 53; from Lydia A. Hendrickson, N. J., \$2.10, vol. 53.

Remittances received after Fourth-day morning, will not appear in the Receipts until the following week.

FRIENDS' SELECT SCHOOLS.

These schools, under the care of the three Month Meetings of Friends in this city, will re-open on Second day, Ninth mo. 2d, 1879.

A limited number of children will now be admitted to these schools, not members of our religious Society whose parents may desire to have them educated from the unnecessary but fashionable accomplishments so common in many schools at this day.

The attention of Friends residing in the city and its neighborhood is particularly invited to these schools. The terms are moderate, and Friends belonging to Philadelphia Yearly Meeting, sending children to these schools, (also members), who may find the charge burdensome, can be fully relieved.

The principal schools will open for the next term under the care of John H. Dillingham and Margaret Lightfoot, as Principals, both successful teachers of many years' experience. With these Friends will be assisted by a complete corps of teachers, it is thought these schools may safely be recommended as affording opportunities for obtaining a liberal education in useful branches of study, and in the Latin, Greek and French languages. Facilities for illustration are afforded by a valuable collection of philosophical apparatus, minerals, and Auzoux's models or parts of the human system, &c.

Believing that advantage would arise from increased facilities for the instruction of the smaller girls, arrangements have been completed for the opening with the fall term, of a primary department in the building on Seventh St., in which special attention will be given to those children whose studies are of a elementary character. The Primary Schools in Cherry St. and near Sixth and Noble Sts., will be continued under their former efficient management.

Further information may be obtained upon application to the Treasurer of the Committee,

JAMES SMOLEY, No. 415 Market St.

TOUGHKENAMON BOARDING SCHOOL.

The 13th year opens Ninth month 9th, 1879.

H. M. CORP, Principal.

WESTWON BOARDING SCHOOL.

Our Friends Benjamin W. and Rebecca G. Passmore, having resigned their positions as Superintendent and Matron of Westwon Boarding School, Friends who are desirous of engaging in the important and responsible duties of superintending this institution, are requested to communicate with either of the undersigned. The present Superintendent, and trustee to be released in 4th month next, or earlier.

William P. Townsend, West Chester, Pa.
John W. Smith, Washington, Bucks Co., Pa.
Charles J. Allen, 304 S. 8th St., Philadelphia.
Elizabeth R. Evans, 322 Union St.
Anna V. Edge, Downingtown, Pa.
Deborah Rhoads, Haddonfield, N. J.
